Option b is correct: Pradhan Mantri Kisan Maan Dhan Yojna (PMKMY) is being implemented in order to **provide social security net for the Small and Marginal Farmers (SMF) by way of pension**. It is an old age pension scheme for all land holding Small and Marginal Farmers (SMFs) in the country. Under this scheme, provision has been made for payment of a minimum fixed pension of Rs. 3,000/- to the eligible small and marginal farmers, subject to certain exclusion clauses, on attaining the age of 60 years. The Scheme is a voluntary and contributory pension scheme, with entry age of 18 to 40 years. The eligible beneficiary can opt to become member of the Scheme by subscribing to a Pension Fund. The beneficiary is required to contribute Rs 100/- per month at median entry age of 29 years. The Central Government also contributes to the Pension Fund in equal amount, managed by the Life Insurance Corporation, which is also responsible for pension pay out.

Option c is incorrect: The Employee Pension Scheme (EPS) scheme provides pension benefits to **employees of the organised sector (not to unorganised sectors)** as a way of social security after their **retirement**. Employee Pension Scheme is administered by Employees' Provident Fund Organisation (EPFO).

Option d is incorrect: Under the Atal Pension Yojana (APY) **any citizen who is or has been an income-tax payer**, shall **not be eligible** to join APY. APY aims to create a universal social security system for all Indians, especially the poor, the under-privileged and the workers in the **unorganised sector**. APY is open to all

bank account holders in the age group of **18 to 40 years** and the contributions differ, based on the pension amount chosen.

Q.16) In the context of the Indian National Movement, which of the following movements/revolts were contemporary to the Non-Cooperation Movement?

1. Awadh Kisan Movement
2. Eka Movement
3. Mappila Revolt
4. Kherwar Movement
5. Gurudwara Reform Movement

Select the correct option from the codes given below.

- a) 1, 2 and 3 only
- b) 2, 4 and 5 only
- c) 1, 2, 3 and 5 only
- d) 1, 3, 4 and 5 only

Ans) c

Exp) Option c is the correct answer.

During 1919-22, the British were opposed through two mass movements—the Khilafat and Non-Cooperation. The movement was led by Gandhiji and the Ali brothers who took a nationwide tour and spread the movement to major nooks and corners of the nation. This spirit of defiance and unrest of the movement gave rise to many local struggles and people movements.

Statement 1 is correct: Awadh Kisan Movement (Uttar Pradesh) came into existence in October 1920, when the differences between nationalist ranks came to the fore. The movement asked the kisans to refuse to till bedakhali land, not to offer hari and begar (forms of unpaid labour), to boycott those who did not accept these conditions and to solve their disputes through panchayats.

Statement 2 is correct: Towards the end of 1921, Eka movement rose because of discontentment among the peasants in some northern districts of the United Provinces—Hardoi, Bahraich, Sitapur over the issues of high rents, operation of thikadars and practice of share rents. Madari Pasis and other lower caste leaders gave grassroot leadership to the Eka movement.

Statement 3 is correct: The Mappilas were the Muslim tenants inhabiting the Malabar region where most of the landlords were Hindus. They had earlier too resented against the oppression of the landlords. However, **during the Non-Cooperation Khilafat movement the two movements merged and leaders like Gandhi, Shaukat Ali and Maulana Azad addressed Mappila meetings and gave it a leadership.** Over the course of the movement, it got communal shades and hence this led to isolation of the movement from the Khilafat Non-Cooperation movement.

Statement 4 is incorrect: The Kherwar movement of the Santhals took place in 1833, which was motivated by the desire to return to an idealised past of tribal independence. The word "Kherwar" is said to be an ancient name of Santhals and in their opinion, it is linked to the Golden age of their history.

Statement 5 is correct: The Akali movement (also known as Gurudwara Reform Movement), 1921 was an offshoot of the Singh Sabha Movement. It aimed at liberating the Sikh gurudwaras from the control of

corrupt Udasi mahants (the post having become hereditary). Thus, it was a contemporary movement of Non-Cooperation Movement.

Source: Spectrum: A brief history of Modern India, Chapter 16, Non-Cooperation Movement and Khilafat Aandolan

Q.17) In the context of Indian history, consider the following statements about the ‘Swarajists’, which emerged in India.

1. Swarajists advocated use of legislative councils as an arena of political struggle.
2. It was led by C. Rajagopalachari and M. A. Ansari among others.
3. Congress Party did not allow Swarajists to contest the Council elections or work in the Councils.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

After Gandhi’s arrest (March 1922), there was disintegration, disorganisation and demoralisation among nationalist ranks. A debate started among Congressmen on what to do during the transition period, i.e., the passive phase of the movement. It led to formation of two poles in the congress, Swarajists on one side and No-changers on the other.

Statement 1 is correct: The Swarajists advocated entry into legislative councils so that the nationalists could enter them to expose the basic weaknesses of these assemblies and use these councils as an arena of political struggle to arouse popular enthusiasm. In other words, they wanted to ‘end or mend’ these councils, i.e., if the government did not respond to the nationalists’ demands, then they would obstruct the working of these councils.

Statement 2 is incorrect: The Swarajists were led by C.R. Das, Motilal Nehru and Ajmal Khan among others. However, the No-Changers were led by C. Rajagopalachari, Vallabhbhai Patel, Rajendra Prasad and M.A. Ansari. Hence, at the Gaya session of the Congress (December 1922). C.R. Das and Motilal Nehru resigned from the presidentship and secretaryship respectively of the Congress and announced the formation of Congress-Khilafat Swarajya Party or simply Swarajist Party, with C.R. Das as the president and Motilal Nehru as one of the secretaries.

Statement 3 is incorrect: Gandhi was initially opposed to the Swarajist proposal of council entry. But after his release from prison on health grounds in February 1924, he gradually moved towards a reconciliation with the Swarajists. Due to a government crackdown on revolutionary terrorists and the Swarajists towards the end of 1924, the agitated Gandhi had expressed his solidarity with the Swarajists by surrendering to their wishes. Both sides came to an agreement in 1924 that **the Swarajists would work in the councils as an integral part of the Congress.**

Source: Spectrum: A brief history of Modern India, Chapter 17, Emergence of Swarajists, Socialist Ideas, Revolutionary Activities and Other New Forces.

Q.18) Which of the following were part of the Joint Constitutional demands raised by Congress and Muslim League as part of the Lucknow Pact?

1. Elected majorities in representative assemblies at both central and Provincial level.
2. Government should declare that it would confer self-government on Indians as early as possible.
3. Half the members of the viceroy’s and provincial governor’ executive councils should be Indians.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Lucknow Pact between the Congress and the Muslim League could be considered an important event in the course of the nationalistic struggle for freedom.

The joint demands were–

- 1) Government should declare that it would confer self-government on Indians at an early date. Hence statement 2 is correct.
- 2) The representative assemblies at the central as well as provincial level should be further expanded with an elected majority and more powers given to them. Hence statement 1 is correct.
- 3) The term of the legislative council should be five years.
- 4) The salaries of the Secretary of State for India should be paid by the British treasury and not drawn from Indian funds.
- 5) Half the members of the viceroy's and provincial governors' executive councils should be Indians. Hence statement 3 is correct.

Source: Sonali Bansal TMH book and Ishita Banerjee Book

Q.19) Consider the following pairs regarding the activities of various nationalist leaders abroad:

Leaders	Contributions
1. Tarak Nath Das	Started a journal 'Free Hindustan'
2. G. D. Kumar	Established the 'Swadesh Sevak Home'
3. Lala Har Dayal	Established the 'Hindi Association'

How many of the pairs above are correctly matched?

- a) Only One pair
- b) Only Two pairs
- c) All the Three pairs
- d) None of the pairs

Ans) c

Exp) Option c is the correct answer.

While the British government was keen on Indians going to Fiji to work as labourers for British planters, it did not want them to go to North America where they might be infected by ideas of liberty. With this awareness, sustained agitations, both in Canada and the United States, led to the creation of a nationalist consciousness and feeling of solidarity among immigrant Indians.

Pair 1 is correctly matched: Tarak Nath Das, launched his journal named "Free Hindustan". With its columns he started influencing the American public opinion about the real condition of India and circulated the cause of a free Indian republic. He established the Indian Independence League in California and also helped Lala Hardayal in organizing the Ghadar Party Movement in the USA.

Pair 2 is correctly matched: G.D. Kumar set up a **Swadesh Sevak Home in Vancouver** on the lines of the India House in London. He also began to bring out a Gurmukhi paper called Swadesh Sevak which advocated social reform and also asked Indian troops to rise in revolt against the British. In 1910, **Tarak Nath Das and G.D. Kumar**, by now forced out of Vancouver, set up the **United India House in Seattle** in the US

Pair 3 is correctly matched: Lala Har Dayal set up the **Hindi Association** in Portland in May 1913. At the very first meeting of the Association Har Dayal set forth his plan of action: ‘Do not fight the Americans, but use the freedom that is available in the US to fight the British; you will never be treated as equals by the Americans until you are free in your own land, the root cause of Indian poverty and degradation is British rule and it must be overthrown, not by petitions but by aimed revolt; carry this message to the masses and to the soldiers in the Indian Army; go to India in large numbers and enlist their support.’

Q.20) The development of which one of the following climatic phenomena is responsible for extreme cold weather conditions in North American Continent in the recent past?

- Anti-Cyclonic Conditions
- Polar Vortex
- Cold Oceanic Gyre Current
- Sub Tropical Jet Streams

Ans) b

Exp) Option b is the correct answer.

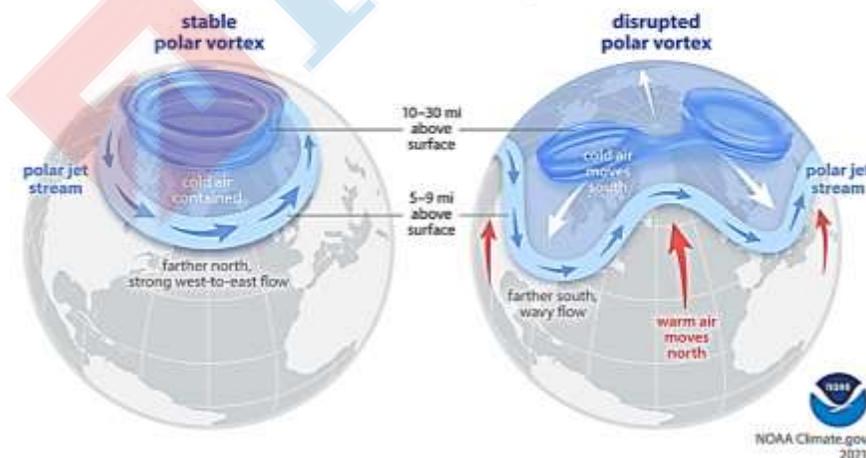

Polar Vortex is a mass of cold, low-pressure air that consistently spins over the Arctic region counter-clockwise, just like a hurricane does. Usually, the polar vortex remains strong and compact, meaning the mass of frigid air stays at the North Pole. But sometimes it weakens (like a wobbling top) and expands to influence the jet stream – an area of fast-moving air high in the atmosphere that surrounds the polar vortex. Once the jet stream is impacted, the cold polar air finds its way towards the mid-latitude regions.

Understanding the polar vortex

The Arctic polar vortex is a strong band of winds in the stratosphere, surrounding the North Pole 10–30 miles above the surface.

The polar vortex is far above and typically does not interact with the polar jet stream, the flow of winds in the troposphere 5–9 miles above the surface. But when the polar vortex is especially strong and stable, the jet stream stays farther north and has fewer “kinks.” This keeps cold air contained over the Arctic and the mid-latitudes warmer than usual.

Every other year or so, the Arctic polar vortex dramatically weakens. The vortex can be pushed off the pole or split into two. Sometimes the polar jet stream mirrors this stratospheric upheaval, becoming weaker or wavy. At the surface, cold air is pushed southward to the mid-latitudes, and warm air is drawn up into the Arctic.

The **polar vortex has been expanding more than twice as frequently in recent years**, owing to the steadily warming Arctic. The melting sea ice in the Barents and Kara seas north of Russia and Scandinavia and increasing Siberian snowfall create larger and more energetic atmospheric waves that ultimately stretch the polar vortex. **This has resulted in extreme winter weather in the US and other places.**

Knowledge Base:

About Polar Vortex:

- The polar vortex is a large area of low pressure and cold air surrounding both of the Earth's poles. It is typically circular and centered around the poles, with a radius of about 3,000 kilometers (1,864 miles).
- Within the polar vortex, the air is very cold and dry, and the winds are strong and constant. The polar vortex is caused by the Earth's rotation and the shape of the planet's surface, and it is most pronounced at high latitudes.
- During the winter months, the polar vortex can become distorted and weaken, allowing cold air to spill out from the polar regions and into lower latitudes.

Q.21) With reference to the Hindustan Republican Association/Army (HRA), which of the following is/are correct?

1. Bhagat Singh was the founding member of HRA.
2. HRA's constitutional document 'The Revolutionary' was written by Ram Prasad Bismil.
3. HRA wanted to establish a 'Federal Republic of the United States of India'.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The revolutionary activity in north India was dominated by the Hindustan Republican Association/Army or HRA (later renamed Hindustan Socialist Republican Association or HSRA).

Statement 1 is incorrect: The HRA was founded in October 1924 in Kanpur by **Ramprasad Bismil, Jogesh Chandra Chatterjee, and Sachin Sanyal**, with an aim to organise an armed revolution to overthrow the colonial government and establish in its place the Federal Republic of United States of India whose basic principle would be adult franchise. **Bhagat Singh was not the founding members of HRA. He joined it later as member.**

Statement 2 is correct: The Revolutionary was published by the Hindustan Republican Association (HRA), a revolutionary organisation. **It was written by Ram Prasad Bismil**, a leader of the Association, but was signed under a fake name. The document expressed the ideology, plans and vision of the HRA on questions regarding foreign rule, the independence movement and the future of India. It was widely circulated in different parts of the country and aimed to galvanise the people of India to mount a revolution to overthrow British rule.

Statement 3 is correct: HRA aimed to establish (through 'organised and armed revolution') a 'Federal Republic of the United States of India'. It called for a Constitution to be framed, and the resulting Constitutional republic would be based on principles that included: universal adult suffrage, nationalisation of major industries, right to recall elected representatives and group rights.

SFG 2023 | LEVEL 2 | Test #22 – Solutions | ForumIAS

Source: Spectrum, CHAPTER 17: Emergence of Swarajists, Socialist Ideas, Revolutionary Activities, and Other New Forces

Q.22) With reference to the Government of India Act, 1919, consider the following statements:

1. Bicameralism was introduced at the Provincial level.
2. As per the act, the “reserved subjects” were to be administered by the governor only on the advice of ministers responsible to the legislative Council.
3. It provided for limited voting rights to women.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 3 only
- d) 2 and 3 only

Ans) c

Exp) Option c is the correct answer.

Montague-Chelmsford reforms were implemented through the Government of India Act, 1919.

Statement 1 is incorrect: A bicameral arrangement was introduced at the central level. Hence the lower house or Central Legislative Assembly would consist of 145 members and the upper house or Council of State would have 60 members, of which 26 were to be nominated and 34 elected—20 General, 10 Muslims, 3 Europeans, and 1 Sikh

Statement 2 is incorrect: The Act divided the provincial subjects into two parts i.e., transferred and reserved. The transferred subjects were to be administered by the governor with the aid of ministers responsible to the legislative Council. **The reserved subjects, on the other hand, were to be administered by the governor and his executive council without being responsible to the legislative Council.** This dual scheme of governance was known as 'dyarchy'.

Statement 3 is correct: The Government of India Act, 1919 provided **for limited voting rights to women.** Only women with certain income criteria could be enfranchised by provinces if they wish to do so. However, women were not allowed to contest elections.

Source: Spectrum's A brief History of Modern India ch-15 pg:343-346

Q.23) With reference to the achievement of the Swarajists, consider the following statements:

1. Their efforts forced the government to appoint a committee to look into the defects of the Government of India Act 1919.
2. Their efforts led to the election of Vithalbhai Patel as the first Indian President of Central Legislative Assembly
3. They set up national schools and colleges throughout India.
4. They helped in the defeat of Public Safety Bill in the Council.

Which of the statements given above are correct?

- a) 1, 2 and 4 only
- b) 2 and 4 only
- c) 1, 2 and 3 only
- d) 1, 3 and 4 only

Ans) a

Exp) Option a is the correct answer.

After Non-cooperation Movement, one section led by C.R. Das, Motilal Nehru, and Ajmal Khan wanted to expose the basic weaknesses of legislative councils and use these councils as an arena of political struggle to arouse popular enthusiasm. So those advocating entry into legislative councils came to be known as the ‘Swarajists’.

Statement 1 is correct: The Government of India was forced to appoint a committee under Sir Alexander Muddiman, the Home Member, to enquire into the defects in the working of the Act of 1919 and to suggest remedies. The committee including eminent Indians like T.B. Sapru, M.A. Jinnah, R.P. Paranjyaya, Sir Sivaswamy Iyer, Motilal Nehru.

Statement 2 is correct: One of the swarajists achievements was the election of Vithalbhai Patel as the first Indian President of Central Legislative Assembly in 1925.

Statement 3 is incorrect: National schools and colleges were set up by No-changers (not Swarajists). The No-Changers devoted themselves to constructive work that connected them to the different sections of the masses.

Statement 4 is correct: A noteworthy achievement of Swarajists was the **defeat of the Public Safety Bill in 1928**, which was aimed at empowering the Government to deport undesirable and subversive foreigners (because the Government was alarmed by the spread of socialist and communist ideas and believed that a crucial role was being played by the British and other foreign activists being sent by the **Commintern**).

Knowledge Base: **The Communist International (Comintern)**, also known as the Third International, was a Soviet-controlled international organization founded in 1919 that advocated world communism.

Bipan chandra-Indias struggle for independence-ch- The Years Of Stagnation – Swarajists, No-Changers And Gandhiji

Q.24) Which among the following can be considered as major drawbacks of the Government of India Act, 1919?

1. The provinces are now completely deprived of their financial powers and resources.
2. The decisions of Provincial Ministers could be overruled by the Governor.
3. Separate electorates for Muslims for election to the central legislative council was established for the first time.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

In line with the government policy contained in Montagu’s statement of August 1917, the government announced constitutional reforms in July 1918, known as Montagu-Chelmsford or Montford Reforms. Based on these, the Government of India Act, 1919 was enacted. The reforms had many drawbacks; few of them are discussed below:

Statement 1 is incorrect: This statement is not true as **Dyarchy** in the provinces was introduced under this act. Dyarchy was a substantial step towards **transfer of power**. Further the act separated for the first time the provincial and central budgets, where provincial legislatures being **authorized to make their budgets**. Thus, the act provided for more financial power to provinces rather than depriving them.

Statement 2 is correct: The provincial ministers had no control over finances and over the bureaucrats; this would lead to constant friction between the two. Ministers were often not consulted on important matters too; in fact, **they could be overruled by the governor on any matter that the latter considered special.**

Statement 3 is incorrect: Under Indian Councils Act of 1909 (and not under the Government of India Act, 1919), separate electorates for Muslims for election to the central council was established for the first time.

Source: A brief history of Modern India- Spectrum Publication- 2020 Edition

Q.25) With reference to Autonomous District Councils (ADC's) constituted under the Sixth Schedule of the Indian Constitution, consider the following:

1. They are empowered to try both civil and criminal cases.
2. They can make rules for the control of trading by non-tribals in the autonomous area.
3. They can prescribe the language for primary schools on prior approval of President.
4. They have the power to levy taxes on professions and employments.

Which of the statements given above are correct?

- a) 2, 3 and 4 only
- b) 1, 2 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) b

Exp) Option b is the correct answer.

The Sixth Schedule consists of provisions for the administration of tribal areas in Assam, Meghalaya, Tripura and Mizoram, according to Article 244 of the Indian Constitution. The tribal areas in the four states of Assam, Meghalaya, Tripura and Mizoram have been constituted as autonomous districts. The district and regional councils administer the areas under their jurisdiction. They can make laws on certain specified matters like land, forests, canal water, shifting cultivation, village administration, inheritance of property, marriage and divorce, social customs and so on. But all such laws require the assent of the Governor.

Statement 1 is correct: Autonomous District Councils (ADC's) can try both civil and criminal cases. District Council or the Regional Council of autonomous areas are being conferred with powers under the Code of Civil Procedure, 1908, and the Code of Criminal Procedure, 1898.

Statement 2 is correct: Autonomous District Councils are empowered to make regulations for the **control of money-lending and trading by non-tribals.** i.e. they may make rules for the regulation and control of money-lending or trading within the district by persons other than Scheduled Tribes resident in the district.

Statement 3 is incorrect: District Council for an autonomous district can construct, or manage primary schools, dispensaries, markets, ferries, fisheries, roads, road transport and waterways in the district. **And with the previous approval of the Governor (not President) may prescribe the language** and the way primary education shall be imparted in the primary schools in the district.

Statement 4 is correct: Autonomous District Councils have the power to levy and collect all the taxes on professions, trades, callings and employments.

Source: <https://www.mea.gov.in/Images/pdf1/S6.pdf>

Q.26) In the context of the Indian independence movement, Santi Ghosh and Suniti Chandheri were known for which of the following?

- a) They were the first women graduates of Indian Women University.
- b) They provided underground support during the Quit India Movement.

- c) They participated in revolutionary activities in Bengal.
d) They provided leadership in the Dandi march.

Ans) c

Exp) Option c is the correct answer.

During the **new phase of the revolutionary movement in Bengal** there was a **large-scale participation of young women** (especially under Surya Sen). These women provided shelter, carried messages and fought with guns in hand. **Prominent women revolutionaries in Bengal** during this phase included **Pritilata Waddedar**, who died conducting a raid. **Kalpna Dutt** who was arrested and tried along with Surya Sen and given a life sentence. **Santi Ghosh** and **Suniti Chandheri**, schoolgirls of Comilla, who shot dead the district magistrate in December 1931 and **Bina Das** who fired point blank at the governor while receiving her degree at the convocation in February 1932. **Manikuntala Sen and Ashalata Sen** played a crucial role in the national movement and in organizing peasants and labour.

Chapter-17: Revolutionary Activities, A brief history of modern India by Rajiv Ahir

Q.27) Consider the following statements regarding comparison between the Home Rule Leagues of Bal Gangadhar Tilak and Annie Besant:

1. Annie Besant set up her Home Rule League much earlier than Tilak set up his League.
2. Tilak's League was restricted to Maharashtra only while Annie Besant's league covered the rest of India.
3. Tilak's League had lesser number of branches as compared to Annie Besant's league.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 3 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

The Home Rule Movement was the Indian response to the First World War in a less charged but in a more effective way than the response of Indians living abroad which took the form of the romantic Ghadar adventure. Two Indian Home Rule Leagues were organised on the lines of the Irish Home Rule Leagues, and they represented the emergence of a new trend of aggressive politics. Annie Besant and Bal Gangadhar Tilak were the pioneers of this new trend. By early 1915, Annie Besant had launched a campaign to demand self-government for India after the war on the lines of white colonies. Later they set up their leagues for this purpose. Tilak and Besant set up their separate leagues to avoid any friction.

Statement 1 is incorrect: Tilak set up his **Home Rule League in April 1916**. Annie Besant set up her league in **September 1916 in Madras**. So, Tilak's league was set up earlier than Annie Besant's league.

Statement 2 is incorrect: Tilak's **Home Rule League** was restricted to Karnataka, Central Provinces, Berar and Maharashtra (excluding Bombay city). Thus, it was **not restricted to Maharashtra only**. Its demands included swarajya, formation of linguistic states and education in the vernacular. Annie Besant's league covered the rest of India (including Bombay city).

Statement 3 is correct: Tilak's League had six branches while Annie Besant's league had 200 branches. Annie Besant's league was loosely organised as compared to Tilak's League. It had George Arundale as the organising secretary. B.W. Wadia and C.P. Ramaswamy Aiyar were also associated with it.

Source: Chapter-14: Home Rule League Movement, A brief history of modern India by Rajiv Ahir

Q.28) Which of the following personalities became the members of the Home Rule League?

1. Jawaharlal Nehru
2. Mohammad Ali Jinnah
3. Lala Lajpat Rai
4. Gopal Krishna Gokhale
5. Madan Mohan Malaviya

Select the correct answer using the code given below:

- a) 1, 3 and 4 only
- b) 2, 3 and 4 only
- c) 1, 2, 3 and 5 only
- d) 1, 3, 4 and 5 only

Ans) c

Exp) Option c is the correct answer.

The Home Rule Movement was the Indian response to the First World War in a less charged but in a more effective way than the response of Indians living abroad which took the form of the romantic Ghadar adventure. Two Indian Home Rule Leagues were organised on the lines of the Irish Home Rule Leagues, and they represented the emergence of a new trend of aggressive politics. Annie Besant and Tilak were the pioneers.

Options 1, 2, 3, and 5 are correct. The Home Rule agitation was later joined by Motilal Nehru, Jawaharlal Nehru, Bhulabhai Desai, Chittaranjan Das, Madan Mohan Malaviya, Mohammad Ali Jinnah, Tej Bahadur Sapru and Lala Lajpat Rai. Some of these leaders became heads of local branches. Many of the Moderate Congressmen who were disillusioned with Congress inactivity. However, **Anglo-Indians, most of the Muslims and non-brahmins from the South did not join** as they felt Home Rule would mean rule of the Hindu majority, and that too mainly by the high caste.

Option 4 is incorrect. Gopal Krishna Gokhale died on 19 February 1915. Thus, he was not part of home rule movement.

Source: Chapter-14: Home Rule League Movement, A brief history of modern India by Rajiv Ahir

Q.29) “He is a prominent freedom fighter who participated in the Mainpuri conspiracy of 1918. Due to the conflicting views with the Gandhi and growing resentment with the Congress party, he formed the Hindustan Republic Association (HRA) which soon had leaders like Bhagat Singh. On August 9, 1925, along with his companions he executed the plan of looting the train at Kakori near Lucknow. After the trial in the so-called Kakori conspiracy, he was sentenced to be hanged”.

Which leader has been described in the above given paragraph?

- a) Ram Prasad Bismil
- b) Ashfaq Ulla Khan
- c) Chandrashekhar Azad
- d) Sachindra Nath Sanyal

Ans) a

Exp) Option a is the correct answer.

About Ram Prasad Bismil:

1) Ram Prasad Bismil got his name etched as a prominent freedom fighter with his participation in the Mainpuri conspiracy of 1918. Bismil along with Genda Lal Dixit organised youth from Etahwah, Mainpuri, Agra and Shahjahanpur districts to strengthen their organisations, ‘Matrivedi’ and ‘Shivaji Samiti’. He published a pamphlet titled ‘Deshwasiyon ke Naam’ and distributed it along with his poem ‘Mainpuri ki Pratigya’ on January 28, 1918. To collect funds for the parties, they looted government coffers.

2) His ideals of freedom struggle stood in stark contrast to that of Mahatma Gandhi and he would reportedly say “independence would not be achieved by means of non-violence”. After conflicting views and growing resentment with the Congress party, he formed the Hindustan Republic Association which soon had leaders like Bhagat Singh and Chandrashekhar Azad.

3) On August 9, 1925, Ram Prasad Bismil along with companions Ashfaqulla Khan and others executed the plan of looting the train at Kakori near Lucknow. Within a month of the attack, the angered colonial authorities arrested more than a dozen HRA members. After the trial in the so-called Kakori conspiracy, he was sentenced to be hanged.

Q.30) With reference to works and contribution by Sri Aurobindo, consider the following:

1. He was the proponent of complete independence from British rule.
2. He was strictly against the teaching western language at the primary level of education system in India.
3. He had developed a spiritual practice called Integral yoga.

Which of the statements given above is/are correct?

- a) 1 only
- b) 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Sri Aurobindo was an Indian philosopher, yogi, maharishi, poet, and Indian nationalist. He was also a journalist of newspapers such as Bande Mataram. He joined the Indian movement for independence from British colonial rule. Later, he became a spiritual reformer, introducing his visions on human progress and spiritual evolution.

Statement 1 is correct: He was one of the nationalist leader of Indian freedom movement. He was **one of the first nationalist to put forward concept of complete freedom for India** in his newspaper Bande Matram.

Statement 2 is incorrect: Aurobindo has described the curriculum for different stages of education. He was **not against of teaching foreign language at primary level**. In fact, At Primary Stage he has suggested Sanskrit, Mother tongue, English, French, Literature, National History, Art, Painting, General Science, Social Studies and Arithmetic to taught.

Statement 3 is correct: When he was in the jail, he had mystical and spiritual experiences. For spiritual work, he left politics and moved to Pondicherry. At Pondicherry, **Sri Aurobindo developed a spiritual practice he called Integral Yoga**. The central theme of his vision was the evolution of human life into a divine life in divine body.

Q.31) Consider the following events from the Indian history:

1. Formation of Hindustan Socialist Republican Association (HSRA).
2. Occurrence of Chittagong Armoury Raid.
3. Death of Lala Lajpat Rai.
4. Bhagat Singh, Sukhdev and Rajguru were hanged.

Which of the following is the correct chronological order of the above events starting from the earliest?

- a) 1 - 3 - 4 - 2
- b) 1 - 4 - 3 - 2
- c) 4 - 1 - 3 - 2
- d) 1 - 3 - 2 - 4

Ans) d

Exp) Option d is the correct answer.

Event 1: Hindustan Republican Association (HRA) was founded in October 1924 in Kanpur by Ram Prasad Bismil, Jogesh Chandra Chatterjee, and Sachin Sanyal. **In September 1928, Hindustan Republic Association was renamed/reorganized as Hindustan Socialist Republican Association (HSRA)** under the leadership of Chandra Shekhar Azad. Ashfaqulla Khan, Bhagat Singh, Sukhdev Thapar and Jogesh Chandra Chatterjee were also involved in its formation.

Event 3: When the Simon Commission visited Lahore on 30 October, 1928, Lala Lajpat Rai led a non-violent march in protest against it. The superintendent of police, James A. Scott, ordered the police to **lathi (baton) charge** the protesters and personally **assaulted Lajpat Rai**. He did not fully recover from his injuries and died on **17 November, 1928**.

Event 2: Surya Sen decided to organise an **armed rebellion** to show that it was possible to challenge the armed might of the mighty British Empire. They had planned to **occupy two main armouries in Chittagong** to seize and supply arms to the revolutionaries to destroy telephone and telegraph lines and to dislocate the railway link of Chittagong with the rest of Bengal. The raid was conducted in **April 1930** and involved 65 activists under the banner of **Indian Republican Army–Chittagong Branch**. The raid was quite successful; Sen hoisted the national flag, took salute and proclaimed a provisional revolutionary government. Later, they dispersed into neighbouring villages and raided government targets.

Event 4: Bhagat Singh, Sukhdev and Rajguru were tried in the Lahore conspiracy case. Bhagat Singh, Sukhdev and Rajguru were hanged **on March 23, 1931**.

Q.32) Which among the following were the key reasons behind the decline of the Non-Cooperation Movement in 1922?

1. Khilafat issue lost relevance with the rise of Mustafa Kemal Pasha in Turkey.
2. Disappointment among the youth due to signing of the Gandhi Irwin Pact.
3. Gandhi's disappointment due to the violent incident at the Chauri Chaura.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: The central theme of the Non-Cooperation movement—the Khilafat question—dissipated soon. In November 1922, the people of **Turkey rose under Mustafa Kamal Pasha** and deprived the sultan of political power. Turkey was made a **secular state**. Thus, the **Khilafat question lost its**

relevance. A **European style of legal system** was established in Turkey and extensive rights granted to women. **Education was nationalised** and modern agriculture and industries developed. In 1924, the caliphate was abolished. Thus, this became one of the major factors behind the decline of the non-cooperation movement.

Statement 2 is incorrect: Gandhi Irwin Pact is **associated with civil disobedient movement and not the non-cooperation movement.** Gandhi Irwin Pact, also known as the Delhi Pact was signed on 5th March, 1931 which placed the Congress on an equal footing with the government. Gandhi on behalf of the Congress agreed to **suspend the civil disobedience movement.** Due to this move, youth were disappointed because they had participated enthusiastically and wanted the world to end with a bang and not with a whimper.

Statement 3 is correct: In **Chauri-Chaura** incident on February 5, 1922, where Twenty-two policemen were killed in the violence **prompted Gandhiji to withdraw the Non-cooperation movement.** Gandhi felt that people had **not learnt** or fully understood the **method of non-violence.** A violent movement could be **easily suppressed by the colonial regime** who would make the incidents of violence an excuse for using the armed might of the State against the protestors. Thus, this was one of the major reasons behind the decline of the non-cooperation movement.

Q.33) What was the main objective of the Public Safety Bill, introduced in 1928?

- To ensure security of high public officials engaged in handling trade.
- To ensure safety of public infrastructure like telephone lines, government buildings etc.
- To provide safety to people against the famines in wake of great depression.
- To curb the Communist movement in India by preventing contact with foreign communist organizations.

Ans) d

Exp) Option d is the correct answer.

Public Safety Bill 1928 was aimed to **stop the Communist movement in India** by cutting it off from British & foreign communist organizations. Motilal Nehru said that it was a direct attack on Indian nationalism, on the Indian National Congress' and as '**the Slavery of India, Bill No. 1**'

Before the launch of Civil Disobedience Movement, a noteworthy achievement of **Swarajist** was the **defeat of the Public Safety Bill in 1928** which was **aimed at empowering the Government to deport undesirable and subversive foreigners (because the Government was alarmed by the spread of socialist and communist ideas).** So, the Act was passed to **curb the activities of socialist and communist movements** which were influenced by outsiders and outside events.

Knowledge Base: **Bhagat Singh and Batukeshwar Dutt** threw a bomb in the Central Legislative Assembly on April 8, 1929, to protest against the passage of the Public Safety Bill.

Q.34) With reference to important events during British period in India and Viceroy during that period, consider the following pairs:

Key events	Corresponding Viceroy
1. Jallianwala Bagh Massacre	Lord Chelmsford
2. Publication of Simon Commission's report	Lord Irwin
3. Formation of Home Rule Leagues	Lord Reading

How many pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) None of the pairs

Ans) b

Exp) Option b is the correct answer.

Pair 1 is correct: Lord Chelmsford was the Viceroy of India from 1916-21. The Jallianwala Bagh Massacre took place in 1919. Other key events in his tenure were:

- 1) Lucknow session of the Congress (1916).
- 2) Lucknow pact between the Congress and Muslim League (1916).
- 3) Foundation of Sabarmati Ashram (1916) after Gandhi's return; launch of Champaran Satyagraha (1916), Kheda Satyagraha (1918), and Satyagraha at Ahmedabad (1918).
- 4) Montagu's August Declaration (1917).
- 5) Government of India Act (1919).
- 6) Jallianwala Bagh Massacre (1919).

Pair 2 is correct: Lord Irwin was The Viceroy of India during 1926-31. Key events during his tenure were:

- 1) Visit of Simon Commission to India (1928) and the boycott of the commission by the Indians. The Simon Commission published a two-volume report **in May 1930**.
- 2) An All-Parties Conference held at Lucknow (1928) for suggestions for the (future) Constitution of India, the report of which was called the Nehru Report or the Nehru Constitution.
- 3) Appointment of the Harcourt Butler Indian States Commission (1927).
- 4) Murder of Saunders, the assistant superintendent of police of Lahore; bomb blast in the Assembly Hall of Delhi (1929); the Lahore Conspiracy Case and death of Jatin Das after prolonged hunger strike (1929), and bomb accident in train in Delhi (1929).
- 5) Lahore session of the Congress (1929); Purna Swaraj Resolution.
- 6) Dandi March (March 12, 1930) by Gandhi to launch the Civil Disobedience Movement.
- 7) 'Deepavali Declaration' by Lord Irwin (1929).
- 8) Boycott of the First Round Table Conference (1930), Gandhi-Irwin Pact (1931), and suspension of the Civil Disobedience Movement.

Pair 3 is incorrect: Lord Chelmsford was the Viceroy of India (1916-21) when Home Rule Leagues by Annie Besant and Tilak were formed in 1916.

Whereas, Lord reading was the viceroy between 1921-26. Key events during Lord Reading's tenure were:

- (a) Chauri Chaura incident (February 5, 1922) and the subsequent withdrawal of Non-Cooperation Movement.
- (b) Moplah rebellion in Kerala (1921).
- (c) Repeal of the Press Act of 1910 and the Rowlatt Act of 1919.
- (d) Criminal Law Amendment Act and abolition of cotton excise.
- (e) Decision to hold simultaneous examinations for the ICS both in Delhi and London, with effect from 1923.
- Source: A brief history of Modern India- Spectrum Publication- 2020 Edition

Q.35) Consider the following pairs, with reference to places in news:

Place in news	Country
1. Sabang	Vietnam
2. Pristina	Kosovo
3. Sarajevo	Belgium
4. Lima	Peru

Which of the pairs given above is/are correct?

- a) 1 and 2 only
 b) 2 and 3 only
 c) 3 and 4 only
 d) 2 and 4 only

Ans) d

Exp) Option d is the correct answer.

Pair 1 is incorrect: Sabang is a city in Indonesia. To discuss the India-Indonesia shared vision on maritime cooperation in Indo-Pacific, an Indian team visited Sabang in Indonesia. At the same time, in a first, Indian ship INS Sumitra berthed at Sabang Port close to the Malacca Strait for operational turnaround.

Pair 2 is correct: Pristina is the capital of Kosovo. In December 2022, Kosovo has closed its border crossing with Serbia due to ethnic tension. Ethnic Serbs living in Northern Kosovo do not recognise Kosovan state institutions. They account for 5% of Kosovo's 1.8 million people, with ethnic Albanians making up about 90%.

Pair 3 is incorrect: Sarajevo is the capital of Bosnia and Herzegovina. European Union countries has agreed to grant Bosnia "candidate status" to join the union.

Pair 4 is correct: Lima is the capital of Peru. Dina Boluarte was elected as Peru's first female president in Dec-2022.

Q.36) Consider the following statements with reference to Kanpur Bolshevik Conspiracy Case of 1924:

1. It was related to controlling the spread of communist ideas in India.
2. S. A. Dange and Nalini Gupta were jailed under this case.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: Kanpur-Bolshevik conspiracy case was related to the control of the spread of communist ideas across India. The **communist groups** in cities of Calcutta, Bombay, Madras areas were **involved in organising** the workers and **educating** them with **communist ideology** and politics. Government captured the activists and they were charged “to deprive the King-Emperor of his sovereignty of British India, by complete separation of India from imperialistic Britain by a violent revolution.”

So, Kanpur-Bolshevik conspiracy case was to smash the budding communist organisation in India.

Statement 2 is correct: In 1924, many communists S.A. Dange, Muzaffar Ahmed, Shaukat Usmani, Nalini Gupta were jailed in the Kanpur Bolshevik Conspiracy Case. A “Indian Communist Defense Committee” was formed, which organized fund collections and set up the defence lawyers.

Q.37) Consider the following statements regarding the impact of the Home Rule League movement on India’s struggle for independence:

1. Morley- Minto reforms were influenced by the Home Rule agitation.

2. It helped in creation of organizational links between town and country.
3. It prepared the masses for politics of the Gandhian style.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The Home Rule Leagues and the associated activities had some positive effects and contributed to the fresh direction that the freedom struggle was to take in the coming years. The Home Rule Movement **marked a transition between the deliberative and rather inactive nature** of the Congress till then and the Gandhian phase that was to come with its mass involvement in the struggle for freedom.

Statement 1 is incorrect: The home Rule League started in April 1916. The August 1917 declaration of **Montagu and the Montford reforms** were influenced by the Home Rule agitation. Whereas, Morley Minto reforms took place in 1909; much prior to Home rule league movement.

Statement 2 is correct: The Home Rule Leagues created **organizational links between town and country** which were to prove invaluable in later years. And further, by popularizing the idea of Home Rule or self-government, and making it a commonplace thing, it generated a widespread pro-nationalist atmosphere in the country.

Statement 3 is correct: The Home Rule League movement prepared the **masses for politics of the Gandhian style**. The aim of the home rule or self-government was to be achieved by promoting political education and discussion through public meetings, organizing libraries, holding conferences, etc. Thus, the method adopted resembles with Gandhian style which became popular in later era.

Q.38) Consider the following statements regarding the Manifesto released by Swarajists, ahead of 1923 Central and Provincial Assembly Elections:

1. They will demand the right to form trade unions and to strike.
2. They will present the nationalist demand of self-government in legislative councils.
3. They will create a deadlock in legislative councils if their demands are not met.

Which of the statements mentioned above is/are correct?

- a) 1 only
- b) 2 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) d

Exp) Option d is the correct answer.

The Swarajists were the members of the Indian National Congress who formed a new party called the Swaraj Party in 1923 and they opposed the boycott of the legislative Assembly by the Congress Party.

Statement 1 is incorrect: The elections to the newly constituted Central Legislative Assembly and to provincial assemblies were to be held in November 1923. The **Swarajist were allowed to contest elections by the congress** to avoid the split between congress. The swarajist released **manifesto in October 1923**. The Manifesto undertook strong anti-imperialist stand against the Britishers. The **Swarajist Manifesto did not demand the right to form trade unions and to strike**.

Statements 2 and 3 are correct: The Swarajists manifesto provided for

- 1) The Swarajists would present the nationalist demand of self-government in councils.
- 2) The guiding motive of the British in governing India lay in selfish interests of their own country.
- 3) The so-called reforms were only a blind to further the said interests under the pretence of granting a responsible government, the real objective being to continue exploitation of the unlimited resources of the country by keeping Indians permanently in a subservient position to Britain.
- 4) If nationalist demand was rejected, they would adopt a policy of uniform, continuous and consistent deadlocking within the councils to make governance through councils impossible.

Q.39) Consider the following statements regarding the Lahore Conspiracy Case:

1. It is associated with the killing of police official J. P. Saunders.
2. Kalpana Dutt and Surya Sen were tried in the case.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1, nor 2

Ans) a

Exp) Option a is the correct answer.

A procession was organized by all parties against Simon Commission and **Lala Lajpat Rai was requested to lead it**. The processionists were Brutally assaulted by the police led by the superintendent of Police of Lahore. **The assault and its shock resulted in Lalaji's death.**

Statement 1 is correct: In the **Lahore Conspiracy Case** all the charges including the **killings of Saunders and Chanan Singh**, the **Assembly Bomb Case** and the **setting up of bomb factories** were **put together**. On 17th December, 1928, **Bhagat Singh, Chandrashekhar Azad and Rajguru assassinated J.P. Saunders at Lahore**. Bhagat Singh escaped the police net and reached Calcutta. Here further **plans were laid to set up bomb factories at Agra, Lahore and Saharanpur**.

Statement 2 is incorrect: The police was able to uncover the details of the Saunders assassination and **Bhagat Singh, Sukhdev, Rajguru, and several others were tried in the Lahore Conspiracy case**. The Special Tribunal found Bhagat Singh and Rajguru guilty of committing the murder of Saunders and Sukhdev as the brain behind the conspiracy.

Kalpana Dutt, Pritilata Waddedar and Surya Sen were involved in chittagaong armoury raid case. Pritilata Waddedar died while conducting a raid on the Railway Institute at Chittagong, while Kalpana datta was arrested and tried along with Surya Sen and given a life sentence.

Q.40) With reference to Tripura's Unakoti temple, consider the following:

1. Unakoti temple is a Vaishnav pilgrimage site.
2. The rock-cut sculptures in temple represents the distinct mongoloid features.
3. The Unakoti temple is also famous for its mural paintings.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Tripura's Unakoti temple famously known as Angkor Wat of the North-East. It is a sculptural emblem and ancient Shaivite place that hosts rock carvings figures and images of gods and goddesses. Unakoti literally means "one less one crore". The images found at Unakoti are of two types, namely rock-carved figures and stone images.

Statement 1 is incorrect: It is 'Shaiba' or Saivite pilgrimage site. It has been built around 7th – 9th centuries. It is a place of worship with huge rock reliefs celebrating Shiva. The central Shiva head known as 'Unakotiswara Kal Bhairava' is about 30 feet high including an embroidered head-dress which itself is 10 feet high. On each side of the head-dress of the central Shiva, there are two full size female figures one of Durga standing on a lion and another female figure on the other side.

Statement 2 is correct: The structures of the rock-cut sculptures in Unakoti temple are gigantic and **have distinct mongoloid features**. That's why it is also called as the Angkor Wat of North-East.

Statement 3 is correct: The marvelous rock carvings in Unakoti temple has murals with their primitive beauty. The place is famous for not just stunningly picturesque but also great mythological significance.

Q.41) Which among the following factors can be considered as responsible for the decline of the Home Rule League Movement?

1. Difference of opinion between moderates and extremists
2. Tilak was not able to provide leadership in later phase of the movement
3. Report of the Simon Commission leading to the suppression of the movement.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The Home Rule League movement started in April, 1916 with the aim of home rule or self-government. Lokmanya Tilak and Annie Besant were the two prominent leaders of the movement. The Home Rule agitation proved to be short-lived. By 1919, it had petered out. The reasons for the decline were as follows:

Option 1 is correct: The **Moderates who had joined the movement** after Annie Besant's arrest **were pacified by talk of Montagu's reforms** and Besant's release. on the other hand, Extremists want to launch **passive resistance against British. This kept the Moderates away** from activities of league from September 1918 onwards. The announcement of Montagu-Chelmsford reforms, further divided the nationalist ranks. Thus, **difference of opinion is clearly seen between extremists and moderates** here.

Option 2 is correct: Also, the **absence of effective leadership in the later period** proved detrimental for the functioning of the leagues. **Tilak had to go abroad** (September 1918) in connection with a libel case

against Valentine Chirol whose book, Indian Unrest, had featured Tilak as responsible for the agitational politics that had developed in India. With **Besant unable to give a positive lead and Tilak away in England, the movement was left leaderless.**

Option 3 is incorrect: Appointment of the **Simon commission is much later development.** It was appointed in November **1927** by the British Conservative government under Stanley Baldwin to report on the working of the Indian constitution established by the Government of India Act of 1919. Thus, the report of the Simon Commission had **no impact on the Home Rule League** Movement.

Q.42) Consider the following statements with reference to activities of Jugantar Party in Bengal:

1. Bagha Jatin was an important leader of Jugantar party.
2. Some of the leaders of the party were involved in the 'German Plot' to bring about a revolt in India.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Jugantar Party was the leading revolutionary group in colonial Bengal. An inner circle within the Calcutta Anushilan samiti under Barindrakumar Ghosh and Bhupendranath Datta with the advice of Aurobindo Ghosh started the weekly Jugantar (New Era) in April 1906. The group is named after the Jugantar, the mouthpiece of the advocates of revolutionary nationalism.

Statement 1 is correct. Jatindranath Mukherjee also known as **Bagha Jatin** came in contact with Aurobindo Ghosh, who openly supported the achievement of Swaraj through violent means. Aurobindo Ghosh made Jatin the leader of a secret society known as Jugantar whose main objective was to recruit young revolutionaries and trained them for conducting raids, robbery, etc.

Statement 2 is correct. The Jugantar Party was linked up with the Bolshevik revolutionary Manabendra Nath Roy alias Narendra Nath Bhattacharya, in Berlin. **He took prominent part in the German plot organised by the Jugantar Party during the war.** After the World War 1, the Soviet Government supplied him funds for the purpose of instigating revolution in India. Unfortunately for the revolutionaries, the German plot was leaked out by a traitor. Police came to know that Bagha Jatin was in Balasore waiting for the delivery of German arms. Jatin and his associates were located by the police. Jatin Mukherjee was shot and died a hero's death in Balasore on the Orissa coast in September 1915.

Q.43) Consider the following statements about Rash Behari Bose:

1. He was associated with the Ghadar Movement.
2. He performed a key role in establishing the Indian Independence League.
3. He made an attempt to assassinate Lord Hardinge by throwing a bomb at his parade.

Which of the above given statements are correct?

- a) 1 and 3 only
- b) 1 and 2 only
- c) 1, 2 and 3
- d) 2 and 3 only

Ans) c

Exp) Option c is the correct answer.

Rash Behari Bose was born in Bardhawan, West Bengal. Although he was more interested in revolutionary activities, he earned a degree in medical science and engineering. Bose learned the tricks of making crude bombs even before he had passed matriculation. His sacrifices and organisational skills formed a big part in India's struggle for independence.

Statements 1 and 2 are correct: He was one of the key organisers of Ghadar revolution that aimed to attack the British army from the inside. It helped in activating an uprising in India. He also played a crucial role in organising the Indian National Army (Azad Hind Fauj). To activate the Indian independence struggle in abroad, he, along with A M Nair, persuaded the Japanese authorities to support and stand by the Indian nationalists. **He performed a key role in establishing the Indian Independence League.**

Statement 3 is correct: He attempted to assassinate Lord Hardinge by throwing a bomb at his parade in Delhi on December 23, 1912. He escaped the arrest but several of his confidants were arrested and hanged for the famous **Lahore Conspiracy Case**. Rash Behari Bose escaped from India in 1915 and lived in Japan as an escapee. In 1943, he handed over the charge of Azad Hind Fauj to Subhas Chandra Bose. The Japanese government had honoured him with the 'Order of the Rising Sun'

Q.44) Which of the following statements regarding Gandhi and Ambedkar's ideologies are correct?

1. Both believed in Parliamentary democracy as the best form of government.
2. Gandhi believed that India had always been a nation.
3. Ambedkar believed that nationalistic identities were a by-product of colonial legal system.
4. Both believed that education and persuasion would result in lasting social reforms.

Select the correct option using the code given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: In 1909, Gandhi wrote in the Hind Swaraj: Parliamentary democracy as “a costly toy of the nation”. **Gandhi's unequivocal belief that the parliamentary form of democracy was ill-suited for India** was clearly evident when he wrote in the Hind Swaraj, “I pray to God that India may never be in that plight”.

He preferred governance through the **old system of village panchayats**.

Ambedkar had **modern political ideas** and believed that parliamentary democracy involving the masses would **put pressure on those in power** to act for the **welfare** of the people.

Statement 2 and 3 is correct: Gandhi was very **proud of Ancient India's heritage** and felt that Indians always had a **sense of brotherhood** and unity and saw themselves as a distinct identity, a distinct nation. Ambedkar was more rational in this matter, and **did not regard the similarities in culture or existence of ancient pan Indian empires** as proof of nationalistic identities in the modern political sense. He believed that **oppressive British policies**, and **uniform legal and administrative system** had helped create united **national identity against this foreign tyranny**.

Statement 4 is correct: Both did **not believe** in **using force** to create social changes. Both felt that changing **social attitudes** slowly by **persuasion and education** was the only way to ensure lasting and **sustainable social reforms**.

Knowledge Base)

Other points of similarities:

- 1) Use of symbolism for demonstration - e.g., Foreign Cloth burning by Gandhi & Manusmriti burning by Ambedkar; Salt satyagraha by Gandhi & Water satyagraha by Ambedkar.
- 2) Freedom of religion
- 3) Centrality of religion as an agent of social change
- 4) Limited sovereign power of state
- 5) No violent revolution; social change by peaceful and democratic means

Other points of difference:

- 1) Gandhi accepted Varnashrama dharma and denounced untouchability as a perversion. Ambedkar was against both.
- 2) Ambedkar advocated separation of state and religion.
- 3) Ambedkar believed in non-violence as an end and felt a little violence in the means was fine. Gandhi believed in non-violence as both and means was uncompromising on this issue.
- 4) Ambedkar believed machinery and industries were the future of the economy. Gandhi did not believe in displacement of human labour by machines.
- 5) Gandhi believed untouchability was merely a social stigma, whereas Ambedkar believed that untouchability was both a social and political issue, which needed Constitutional redress.

Q.45) With reference to the National Commission for Protection of Child Rights (NCPCR), consider the following statements:

1. It was established under the Juvenile Justice (Care and Protection of Children) Act.
2. Its role includes monitoring the implementations of the provisions mentioned in the United Nations Convention on the Rights of the Child.
3. Its definition of ‘child’ includes all children below the age of eighteen years
4. It developed a GHAR portal to monitor the restoration and repatriation of children.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 only
- c) 2 and 4 only
- d) 2, 3 and 4 only

Ans) d

Exp) Option d is the correct answer.

Statement 1 is incorrect: The National Commission for Protection of Child Rights (NCPCR) was set up as a **statutory body in March 2007 under the Commissions for Protection of Child Rights (CPCR) Act, 2005.**

Statement 2 is correct: The Commission is mandated under section 13 of CPCR Act, 2005 to ensure that all Laws, Policies, Programmes, and Administrative Mechanisms are in consonance with the Child Rights perspective as **enshrined in the Constitution of India and the United Nations Convention on the Rights of the Child.**

Statement 3 is correct: As per the definition of **children by the commission it includes all children below the age of 18.** It looks after the matters related to deprivation and violation of child rights, non-implementation of laws providing for protection and development of children etc,

Statement 4 is correct: The NCPCR has developed and **launched The GHAR (GO Home and Re-Unite) portal to digitally monitor and track the restoration and repatriation of children.** One of the features of this scheme is digital tracking and monitoring of children who are in the Juvenile Justice system and have to be repatriated to another Country/State/District.

Q.46) With reference to Gandhi's response to World War I, which of the following statements is/are correct?

- He believed that justice was on the side of Britain but was against the participation of Indians.
- He supported the recruitment of Indians by Britishers for participation in war.
- He decided to utilise the opportunity to wage a war on British rule and liberate the country.
- He launched the Non-Cooperation Movement against the Britishers to divert their attention from war.

Ans) b

Exp) Option b is the correct answer.

Option a is incorrect - In the Second World War, Jawaharlal Nehru was not ready to accept the opinion of either Gandhi or of the socialists. He was clear in his mind about the difference between democratic values and fascism. He believed that justice was on the side of Britain, France and Poland, but he also believed that Britain and France were imperialist powers, and that "the war was the result of the inner contradictions of capitalism maturing since the end of World War I". **He, therefore, advocated no Indian participation till India itself was free.** However, at the same time, no advantage was to be taken of Britain's difficulty by starting an immediate civil disobedience movement.

Option b is correct - In the spring of 1917 Germany had inflicted crushing defeats on both the British and French troops in France. Russia's war effort had broken down and the Revolution was threatening its Government. Though America had entered the war, no American troops had yet reached the battle front. The Viceroy of India Lord Chelmsford, invited various Indian leaders to attend a War conference. Gandhi was also invited. He accepted the invitation and went to Delhi. The Viceroy was very keen that Gandhi should support the resolution on recruiting. **Gandhi had supported the government's resolution on recruiting soldiers from India.**

Option c is incorrect - The revolutionaries decided to utilise the opportunity to wage a war on British rule and liberate the country.

Option d is incorrect - Gandhi stuck to the belief he held at that time that 'absolutely unconditional and whole-hearted co-operation with the government' on the part of educated India will bring us within sight of our goal of Swaraj as nothing else will'. He launched the Non-Cooperation Movement after the first world war and not during the war.

Q.47) Which of the following are the conditions laid by Gandhiji for accepting the office of President of the All-India Home Rule League?

- It will accept Hindustani as the national lingua franca.
- It will be a non-party organization, auxiliary to the congress.
- It must follow him in his civil-disobedience methods.
- It will denounce untouchability in all its forms and promote integration of Dalits.

Choose the correct answer using the options given below:

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 4 only
- d) 3 and 4 only

Ans) a

Exp) Option a is the correct answer.

The home rule movement was the Indian response to the First World War in a less charged but in a more effective way. Gandhiji was made the president of the Home Rule League.

Conditions laid by Gandhiji for being the president were as follows:

- 1) He would engage the league, if he can carry the members with him, in activities such as the promotion of Swadeshi, Hindu-Moslem unity, with special reference to Khilafat,
- 2) Acceptance of Hindustani as the national “lingua franca” and linguistic redistribution of provinces. **(Statement 1 is correct)**
- 3) He proposes to treat the Home Rule League as a non-party organisation and considers the Congress of which the League is an auxiliary as a national organisation providing a platform for all parties. **(Statement 2 is correct)**
- 4) While he will not expect the League to follow him in civil disobedience methods, he expects the principles of uncompromising truth and honesty in political life accepted and acted upon by the All-India Home Rule League. **(Statement 3 is incorrect)**

Statement 4 is incorrect – Gandhiji launched the campaign against untouchability in 1933 first from jail and then outside the jail. While in jail, he set up the All-India Anti-Untouchability League in September 1932 and started the weekly *Harijan* in January 1933. After his release, he shifted to the Satyagraha Ashram in Wardha as he had vowed in 1930 not to return to Sabarmati Ashram unless swaraj was won. It was not in the picture during the times of Home Rule League. Hence, that couldn't be the condition for getting the presidentship of league.

Q.48) With reference to the communists during British rule in India, consider the following statements:

1. The Communist Party of India (CPI) was formed in 1918 at Moscow.
2. In 1925, the Indian Communist Conference at Kanpur formalized the foundation of the Communist Party of India.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. The Communist Party of India (CPI) was formed in 1920 in Tashkent (now, the capital of Uzbekistan) by M.N. Roy, Abani Mukherji and others after the second Congress of Comintern. M.N. Roy was also the first to be elected to the leadership of Comintern.

Statement 2 is correct. In 1925, the Indian Communist Conference at Kanpur formalised the foundation of the Communist Party of India.

Source: A Brief History of Modern India by Rajiv Ahir - Emergence of Swarajists, Socialist Ideas, Revolutionary Activities and Other New Forces

Q.49) After coming from South Africa, Mahatma Gandhi toured India before taking any political work on the advice of:

- Rajkumar Shukla
- Gopal Krishna Gokhale
- Bal Gangaadhar Tilak
- Lala Lajpat Ray

Ans) b

Exp) Option b is the correct answer.

Mohandas Karamchand Gandhi was already a well-known political activist when he had returned to India, after starting two settlements for Indians in South Africa, and launching a successful satyagraha against unfair laws and taxes on the Indian community there.

In India, however, Gandhi was **advised by his mentor Gopalkrishna Gokhale** to tour India for a year before embarking upon any political work. Gokhale's instructions suited Gandhi well, as he realised that there was much about the country that he had not seen, or knew about. In South Africa, differences of religion, caste and language were often elided over, as the community of Indians stood as one against the imperial powers. **In India**, however, **the differences were wide and various**, and Gandhi **needed time to understand** them. He started his travel, attending meetings, and talking about indentured labour, an issue that he had fought against in South Africa.

Q.50) With reference to Methanol, consider the following statements:

- It is produced naturally in the human body through the process of metabolism.
- It is used in the manufacturing of many industrial products.
- Blending of Methanol with conventional fuels might lead to reduction of crude oil imports of India.
- Renewable methanol, when used as a fuel, can lead to reduction in the carbon dioxide and Nitrogen oxide emissions.

Which of the statements given above are correct?

- 1, 2 and 3 only
- 1 and 2 only
- 3 and 4 only
- 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Methanol is a toxic alcohol that is **used industrially as a solvent, pesticide, and alternative fuel source.**

Statement 1 is correct: Methanol is a normal part of the human diet (via low levels in **fresh fruits and vegetables**) and is **produced in the body by metabolic breakdown of other products.** Food is the primary source of human methanol exposure.

Statement 2 is correct: Methanol is a clear liquid chemical used in manufacturing of thousands of everyday products, including plastics, paints, cosmetics, and fuels. Methanol is also an energy resource used in the marine, automotive, and electricity sectors and an emerging renewable energy resource.

Statement 3 is correct: Blending of **15% methanol in gasoline can result in at least 15% reduction in the import of crude oil.** In addition, this would bring down **GHG emissions by 20%** in terms of particulate matter, **Nitrogen oxides (NOx) and Sulphur oxides (SOx)** thereby improving the **urban air quality.**

Statement 4 is correct: Compared to Conventional fuels, renewable methanol **cuts carbon dioxide emissions** by up to **95%**, reduces **nitrogen oxide emissions** by up to **80%**, and **completely eliminates sulphur oxide and particulate matter emissions**. Renewable methanol is a **low carbon and net carbon neutral liquid chemical** and fuel produced **from bio-methanol, or from captured carbon dioxide and hydrogen produced from renewable electricity**.

SFG 2023 | LEVEL 2 | Test #23 – Solutions | 

Q.1) Consider the following statements regarding the 1927 Madras Session of the Indian National Congress:

1. S. Srinivas Iyengar was the president of this Congress session.
2. At this session, Congress decided to boycott the Simon Commission.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

In response to the appointment of the Simon Commission, the congress held a session in Madras in December 1927.

Statement 1 is incorrect: Dr. M. A. Ansari was the president of the 1927 congress session. Whereas S. Srinivas Iyengar presided over the Gauhati session of the Indian National Congress in December 1926 and during his tenure of presidency, congress tried for a **rapprochement between the leaders of the Hindu and Muslim communities**, and his efforts were crowned with success at the Madras Congress in December 1927 where the **resolution on Hindu Muslim unity was passed** with general all - round support.

Statement 2 is correct: In Madras Session, 1927, congress decided to boycott the Simon commission “at every stage and in every form”. Because, appointment of an all-white Simon commission was seen as a violation of the principle of self-determination, and as a deliberate insult to the self-respect of Indians.

Source: A brief History of Modern India, Spectrum Publication, 2020 edition

Q.2) Dr B.R. Ambedkar was associated with which of the following organisations/movements?

1. All-India Depressed Classes League
2. Training School for Entrance to Politics
3. Independent Labour Party
4. Samaj Samta Sangh
5. Parvati Temple Satyagraha

Select the correct answer using the code given below.

- a) 1, 3 and 4 only
- b) 3, 4 and 5 only
- c) 2, 3, 4 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) c

Exp) Option c is the correct answer.

B.R. Ambedkar was an Indian jurist, economist, politician and social reformer who campaigned against social discrimination towards the untouchables (Dalits) and worked towards the upliftment of their rights. He was the architect of the Indian Constitution and is widely regarded as the father of the Indian Constitution.

Statement 1 is incorrect: Jagjivan Ram (not Ambedkar) played a role in the founding (1935) of the All-India Depressed Classes League, an organization dedicated to attaining equality for Dalits. Dr B.R. Ambedkar established the All-India Depressed Classes Association to make sure that fair representation was given to the Scheduled Castes in the decision-making bodies of India. This association was established in 1930.

Statement 2 is correct: Ambedkar started a school for politics training. The training school was established in July 1956 in Mumbai and was named as the **“Training School for Entrance to Politics”**.

Statement 3 is correct: In August 1936, Dr. Babasaheb Ambedkar established **the Independent Labor Party**. The main objective of the party was the welfare of the laborers. So, it was deemed as a labour organization. In order to bring the depressed classes with the purview of the labour class, they proposed that they be referred to as the labour class instead of the Depressed Class.

Statement 4 is correct: With the same objective of educating the people of the causes of their slavery, on 4 September 1927, Ambedkar established the Samaj Samta Sangh (Social Equality Association) and in 1929 launched a newspaper titled Samta. The members of the Samta Sangh included G.N. Sahastrabudhe, R.D. Kavli, P.P. Tamhane, D.V. Naik, N.V. Khandke, G.R. Pradhan, B.V. Pradhan, R.N. Bhaindarker, D.V. Pradhan and B.R Pradhan.

Statement 5 is correct: The Parvati Satyagraha was a peaceful protest organised in 1929 by Dr Bhimrao Ramji Ambedkar to allow access to lower castes to a Parvati temple in the southern part of Pune.

Q.3) Consider the following statements regarding the Hindustani Seva Dal:

1. Jawaharlal Nehru was the first president of the Hindustani Seva Dal.
2. The Dal was to work under the supervision of the Congress party.
3. Seva dal was aimed to instil military discipline in its members.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

In 1923, Sarojini Naidu proposed the formation of a Hindustani Seva Dal at a Congress convention.

Statement 1 is correct: On January 1, 1923 the Hindustani Seva Dal was established as the Hindustan Seva Mandal with **Jawaharlal Nehru as its first president**. It was expected to function on the principles of truth and non-violence.

Statement 2 is correct: According to the resolution at Kakinada, **the Hindustani Seva Dal was to work under the supervision of the Congress party's working committee**.

Statement 3 is correct: Idea behind the Hindustani Seva Dal was to establish an **organisation to train Congress workers, instil military discipline** in them and evoke in them the passion to fight. At the 1924 Belgaum Congress session, the Seva Dal was also assigned the task of managing sanitation and security for the first time.

Q.4) Which among the following were the major recommendations of the Nehru Report?

1. Dominion status for India
2. Rejection of separate electorates
3. Federal Constitution with residual powers to provinces
4. Universal Adult Suffrage

Select the correct answer using the codes given below:

- a) 1 and 2 only
- b) 2 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2 and 4 only

Ans) d

Exp) Option d is the correct answer.

As an answer to Lord Birkenhead's challenge, subcommittee under the chairmanship of Motilal Nehru was constituted in 1928 to draft a constitution. This was the first major attempt by the Indians to draft a constitutional framework for the country.

Option 1 is correct: The Nehru Report demanded Dominion status on lines of self-governing dominions as the form of government desired by Indians.

Option 2 is correct: It demanded rejection of separate electorates which had been the basis of constitutional reforms so far. Instead, report demanded **for joint electorates** with reservation of seats for Muslims at the Centre and in provinces where they were in minority.

Option 3 is incorrect: In March 1929 Jinnah gave 14 points which were to become the basis of all future propaganda of the Muslim League. **Thus, Federal Constitution with residual powers to provinces was one of the fourteen points proposed by Jinnah and not the recommendation of the Nehru Report.**

Whereas Nehru report incorporated provision of "Political structure broadly unitary, where residual powers rested with the centre". This provision too incorporated after the demand of Hindu Mahasabha.

Option 4 is correct: Nehru report also included nineteen fundamental rights including equal rights for women, right to form unions, and **universal adult suffrage.**

Source: A brief History of Modern India, Spectrum Publication, 2020 edition

Q.5) With reference to World Trade Organisation (WTO)'s New Agreement on Fisheries Subsidies, consider the following statements:

1. The agreement requires acceptance by at least two thirds of the member countries to become operational.
2. The agreement provided a twenty five-year transition period for developing countries like India to eliminate subsidies provided to illegal fishing.
3. Recently India became the first WTO member to accept this agreement.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) a

Exp) Option a is the correct answer.

The World Trade Organisation (WTO) **Agreement on Fisheries Subsidies** adopted at the 12th Ministerial Conference (MC12) held in **Geneva**, Switzerland in 2022 and the agreement aims to protect ocean

sustainability by prohibiting harmful fisheries subsidies, which are a key factor in the widespread depletion of the world's fish stocks.

Statement 1 is correct: At least two-thirds of members have to deposit their instruments of acceptance with the WTO, for the **New Agreement on Fisheries Subsidies to take effect**.

Statement 2 is incorrect: As part of special and differential treatment (S&DT), **developing countries like India** have been given a **two-year transition** period for **eliminating** subsidies given to **illegal**, unreported, or unregulated (IUU) fishing and fishing of already over-exploited stocks. However, **India demands a 25-year transition period** to protect the livelihood of people depending on the fishery sector in India.

Statement 3 is incorrect: Recently, **Switzerland became the first WTO member** to formally submit its instrument of acceptance for the New Agreement of Fisheries subsidies with the WTO. India did not provide her acceptance for this agreement so far.

Source: https://www.wto.org/english/res_e/booksp_e/impfishag_part_2_e.pdf

Q.6) Consider the following statements regarding the Independence for India League:

1. It was jointly set up by C.R. Das and Subhash Chandra Bose in 1938.
2. It aimed to carry out a socialist transformation of the economic structure of society.

Which of the statement/s given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

The younger section of the Congress led by Jawaharlal Nehru and Subhas Chandra Bose were not satisfied with the Nehru Report. The younger section regarded the idea of dominion status mentioned in the report as a step backward.

Statement 1 is incorrect: As a result of the dissatisfaction with the Nehru Report, in 1928, **Jawaharlal Nehru and Subhash Chandra Bose jointly set up** the Independence for India League.

Statement 2 is correct: The main aim of the Independence for India League was to fight for complete independence and **'a socialist transformation of the economic structure of society.'** Nehru believed that India needs to adopt a full 'socialist programme' if she was 'to end her poverty and inequality.'

Source: A brief History of Modern India, Spectrum Publication, 2020 edition

India's Struggle for Independence by Bipin Chandra

Q.7) Why did Mahatma Gandhi oppose separate electorates to depressed classes?

- a) He believed that such move would undermine the efforts of abolishing untouchability.
- b) He wanted to maintain the varna system of Hindu religion.
- c) He feared that separate electorates for depressed class will reduce the seats for Hindus in the Central Legislative Assembly.
- d) He wanted to maintain the hegemony of upper castes.

Ans) a

Exp) Option a is the correct answer.

Gandhi saw the Communal Award as an attack on Indian unity and nationalism. He thought it was harmful to both Hinduism and to the depressed classes since it provided no answer to the socially degraded position of the depressed classes.

Option a is correct: Gandhi saw the Communal Award as an attack on Indian unity and nationalism. He thought separate electorates to Depressed class was harmful to both Hinduism and to the depressed classes since it provided no answer to the socially degraded position of the depressed classes. Once the depressed classes were treated as a separate political entity, he argued, the question of abolishing untouchability would get undermined, while separate electorates would ensure that the untouchables remained untouchables in perpetuity. He said that what was required was not protection of the so-called interests of the depressed classes but root and branch eradication of untouchability.

Option b is incorrect: Gandhi **did not oppose the separate electorate on the pretext of maintaining the varna system of Hinduism.**

Option c is incorrect: Gandhi wanted the depressed classes be elected through joint and if possible a wider electorate through universal franchise, while expressing no objection to the demand for a larger number of reserved seats. Through Poona Pact seats reserved for the depressed classes were increased from 71 to 147 in provincial legislatures and to 18 per cent of the total in the Central Legislature.

Option d is incorrect: Gandhi did not seek to maintain the hegemony of upper castes. Instead, he was in favour of removing untouchability and inequality from the society.

Source: Chapter 19: Civil Disobedience Movement and Round Table Conferences (Spectrum)

Q.8) Mahatma Gandhi, on behalf of the Congress, agreed on which of the following demands of British Government under the Gandhi-Irwin Pact?

1. To revoke the civil disobedience movement.
2. To participate in the Second Round Table Conference.
3. To not to make salt even for personal consumption.

Select the correct answer using the code given below.

- a) 2 only
- b) 1 and 2 only
- c) 1, 2 and 3
- d) 2 and 3 only

Ans) a

Exp) Option a is the correct answer.

A Gandhi-Irwin pact was signed between the viceroy Irwin (representing the British Indian Government) and Gandhi (representing the Indian people) in Delhi on March 5, 1931. This Delhi Pact, also known as the Gandhi-Irwin Pact, placed the Congress on an equal footing with the government.

Statement 1 is incorrect: Gandhi agreed on to just suspend the civil disobedience movement (not on revoking the CDM).

Statement 2 is correct: Gandhi agreed on to participate in the Second Round Table Conference on the constitutional question around the three linchpins of federation, Indian responsibility, and reservations and safeguards that may be necessary in India's interests (covering such areas as defence, external affairs, position of minorities, financial credit of India, and discharge of other obligations).

Statement 3 is incorrect: Viceroy Irwin allowed on behalf of the British Government to make salt in coastal villages for personal consumption.

Source: Chapter 19: Civil Disobedience Movement and Round Table Conferences (Spectrum)

Q.9) Which of the following events/decisions were part of the Lahore Congress Session of 1929?

1. Gandhi was not in support of making Jawaharlal Nehru as president of Lahore session.
2. Congress took the decision to boycott the Round Table Conferences.
3. Dominion status was declared as the aim of the Congress.

Which of the statements given above is/are correct?

- a) 2 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 3 only

Ans) a

Exp) Option a is the correct answer.

Statement 1 is incorrect. Jawaharlal Nehru, who had done more than anyone else to popularize the concept of Poorna Swaraj, was **nominated the president** for the Lahore session of the Congress (dec 1929) **mainly due to Gandhiji's backing** (15 out of 18 provincial Congress committees had opposed Nehru). Nehru was chosen:

- Because of the oppositeness of the occasion (Congress's acceptance of complete independence as its goal).
- To acknowledge the upsurge of youth which had made the anti-Simon campaign a huge success.

Statement 2 is correct. One of the major decisions that was taken at the Lahore session of 1929 was to **boycott the proposed Round Table Conferences in London.**

Statement 3 is incorrect. Another major decision that was taken was **complete independence (Poorna Swaraj) and not the Dominion status** as the aim of the Congress. January 26, 1930 was fixed as the first Independence (Swarajya) Day to be celebrated everywhere. **Hence statement 3 is incorrect.**

Q.10) With reference to the Technical Textiles, consider the following statements:

1. These are called technical textiles because they are manufactured entirely using automated technology.
2. Currently the Government allows 100% Foreign Direct Investment (FDI) under automatic route to boost technical textile growth in India.
3. The Union Ministry of Textile offers financial grants to Academic institutes to promote the introduction of degrees associated with these textiles.
4. Polyester is one of the fibres used in almost all technical textiles.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2,3 and 4 only
- c) 2 and 3 only
- d) 1 and 4 only

Ans) b

Exp) Option b is the correct answer.

Technical textile accounts for approximately 13% of India's total textile and apparel market and contributes to India's GDP at 0.7%. Technical textiles, a sunrise sector, has become even more relevant during the Covid-19 crisis as India was entirely import dependent for Personal Protective Equipment (PPE) kits.

Statement 1 is incorrect: A technical textile is a textile product manufactured for non-aesthetic purposes i.e., they are **manufactured primarily for technical properties and functional properties** rather than aesthetic purposes e.g., medical clothes, firefighting clothes and bulletproof vests etc. Hence **technical textiles are called so, not because they are manufactured entirely using automated technology.**

Statement 2 is correct: It is true that the **Government of India currently allows 100% Foreign Direct Investment under automatic route** in the technical textiles sector to boost the growth of this sector in India. International technical textile manufacturers such as Ahlstrom, Johnson & Johnson, Du Pont Procter & Gamble, 3M, SKAPS, Kimberly Clark, Terram, Maccaferri, Strata Geosystems have already initiated operations in India.

Statement 3 is correct: Recently the Ministry of Textiles issued two guidelines under the National Technical Textiles Mission (NTTM), One among them called **General Guidelines for Enabling of Academic Institutes in Technical Textiles- for Private & Public Institutes** states that financial grant of up to **20 crores** will be given to **Academic institutes** for introducing **PG course** and up to **10 Crores for introducing UG courses** associated with technical textiles.

Other guidelines named **Guidelines for Grant for Internship Support in Technical Textiles (GIST)** states that financial grant of up to **INR 20,000 per student per month shall be provided** to the empanelled companies for providing **internships to B.Tech. students** of relevant Departments/Specializations in Public/Private Institutes.

Statement 4 is correct: Polyester is a **manufactured synthetic fibre**. It is a kind of plastic and is usually derived from **petroleum** or crude oil. It is true that **Polyester** is among the very few fibres that has **applications in all 12 classes of technical textiles**.

Q.11) With reference to agrarian reforms during Congress rule in provinces from 1937-39, consider the following statements:

1. In most of its provinces, Congress Ministries passed debtors' relief acts for the regulation of the moneylenders' business.
2. The Ministries succeeded in ensuring that the benefits of reforms reached sub tenants and agricultural labourers.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

There were certain basic constraints due to which the Congress ministries could not undertake a complete overhaul of the agrarian structure by completely abolishing zamindar These constraints were:

Statement 1 is correct: Except for U.P. and Assam, the Congress Government passed a series of stringent debtors' relief acts which provided for the regulation of the moneylenders' business. Provisions of the acts included measures such as the cancellation or drastic reduction of accumulated interests.

Statement 2 is incorrect: Most of the benefits due to Agri-reforms by congress ministries went to statutory and occupancy tenants while sub-tenants did not gain much. Agricultural labourers did not benefit as they had not been mobilized.

Source: Spectrum's A brief history of Modern India ch 21 pg:460-461, Bipinchandra's Struggle for Independence CHAPTER 26. TWENTY-EIGHT MONTHS OF CONGRESS RULE pg 328

Q.12) Consider the following statements regarding the impacts of appointment of the Simon Commission:

1. British government recognised the idea of Federalism for India.
2. Passage of Purna Swaraj Resolution by the Congress at Karachi Session.
3. Lord Birkenhead challenged Indian politicians to formulate constitution.
4. Provided stimulus to radical forces demanding socio-economic reforms on socialist lines.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

The Government of India Act, 1919 had a provision that a commission would be appointed 10 years from date to study the progress of the governance scheme and suggest new steps. Accordingly, the Simon Commission was set up by the British government on November 8, 1927.

Impacts of the appointment of the Simon Commission is discussed below:

Statement 1 is correct: Simon Commission **accepted the idea of federalism** but not in the near future. Thus, British government **recognised idea of Federalism for India**. Commission suggested that a Consultative Council of Greater India should be established, which should include representatives of both the British provinces as well as princely states.

Statement 2 is incorrect: As a response to the appointment of the Simon Commission, Congress held a session in **Madras (December 1927)** under the presidency of M.A. Ansari and **decided to boycott the commission** "at every stage and in every form". Meanwhile, Nehru succeeded in getting a snap resolution passed at the session, declaring complete independence as the goal of the Congress.

Whereas, the Indian National Congress, on 19 December 1929, passed the historic '**Purna Swaraj**' – **(total independence) resolution – at its Lahore session**. The declaration was passed **due to the breakdown of negotiations** between leaders of the freedom movement and the British over the question of **dominion status for India**.

Statement 3 is correct: Lord Birkenhead **challenged Indian politicians to produce** an agreed **constitution** and it was accepted by various political sections, and thus prospects for Indian unity seemed bright at that point of time.

Statement 4 is correct: It **gave a stimulus to radical forces** demanding not just complete independence but major socio-economic reforms on socialist lines. When the Simon Commission was announced, the Congress, which did not have any active programme in hand, got an issue on which it could once again forge mass action.

Source: A brief History of Modern India, Spectrum Publication, 2020 edition

https://www.constitutionofindia.net/historical_constitutions/declaration_of_purna_swaraj__indian_national_congress__1930__26th%20January%201930

Q.13) Which of the following was the main reason for resignation of Congress Ministries in 1939?

- Unilateral decision of the British government to involve India in the World War II
- Rising corruption and indiscipline in the congress
- They were devoid of necessary financial resources.
- Viceroy's refusal to appoint an Indian as the Defence Member of his Executive Council.

Ans) a

Exp) option a is the correct answer.

In September 1939, two years after the Congress ministries assumed office, the Second World War broke out. Mahatma Gandhi and Jawaharlal Nehru had both been strongly critical of Hitler and the Nazis. Accordingly, they promised Congress support to the war effort if the British, in return, promised to grant India independence once hostilities ended. The offer was refused. In protest, the Congress ministries resigned in October 1939 in protest against the unilateral decision of the British government to draw India into the Second World War.

A history of modern India-Ishita banerjee-pg 372, 373

Q.14) Which of the following were issues of disagreement between Congress and other participants (British Government and other Indians) at the 2nd Round Table conference?

- British Government was against the claim of Congress that it alone represented interests of India.
- Idea that untouchables were Hindus and thus did not need a separate electorate.
- Issue of providing safeguards to minorities.

Select the correct answer using the code given below:

- 1 and 3 only
- 2 and 3 only
- 1 and 2 only
- 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The second Round Table Conference was held in London from September 7, 1931, to December 1, 1931.

The Indian National Congress nominated Gandhi as its sole representative. A. Rangaswami Iyengar and Madan Mohan Malaviya were also there. There were many Indian participants, besides the Congress.

Statement 1 is correct: At the second Round Table Conference, Mahatma Gandhi reiterated that the Congress alone represented interests of India. But because of the participation of many groups, the British government claimed that the Congress did not represent the interests of all of India. So, this was one of the points of disagreement.

Statement 2 is correct: Mahatma Gandhi pointed that untouchables were Hindus, and thus not to be treated as a minority, he discarded the idea of a separate electorate for them. But government disagreed on this by using viewpoint of other representatives of untouchables like B. R. Ambedkar.

Statement 3 is correct: The session got deadlocked on the question of the minorities. Separate electorates were being demanded by the Muslims, depressed classes, Christians and Anglo-Indians. All these came together in a 'Minorities' Pact'. Gandhi fought desperately against this concerted move to make all constitutional progress conditional on the solving of this issue. He also said there was no need for separate electorates or special safeguards for Muslims or other minorities. So, this also resulted in disagreement.

SFG 2023 | LEVEL 2 | Test #23 – Solutions | 

Knowledge Base: The **princes were also not too enthusiastic about a federation**, especially after the possibility of the formation of a Congress government at the Centre had receded after the suspension of civil disobedience movement.

Source: Chapter-19 : Civil Disobedience Movement and Round Table Conferences, A brief history of modern India by Rajiv Ahir

Q.15) With reference to Aspirational Block Programme, consider the following statements:

1. The Programme has been launched by the Union Ministry of Rural Development.
2. The Programme provides States the choice to include State specific parameters to assess the performance of blocks.
3. Aspirational blocks have been selected only from the 117 identified Aspirational districts across the nation.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 only
- c) 2 and 3 only
- d) 3 only

Ans) b

Exp) Option b is the correct answer.

Recently the Hon'ble Prime Minister of India launched the government's Aspirational Block Programme (ABP), which is aimed at improving performance of blocks lagging on various development parameters.

Statement 1 is incorrect: Aspirational Blocks Programme (ABP) was not launched by the Ministry of Rural Development, rather it was first announced in Union Budget 2022-23 (Union Finance Minister mooted the idea of launching ABP) and **was launched by the Hon'ble Prime Minister of India during the 2nd National Conference of Chief Secretaries.**

The Programme is an extension of the Aspirational District Programme (ADP) to the block level in the district as the **Prime Minister asked Chief secretaries to implement** the 'Aspirational Block Programme' in their respective states. The Aspirational District Programme was launched in 2018 and covers 112 districts across the country. At Government of India level, programme is implemented by NITI Aayog. In addition, individual Ministries have assumed responsibility to drive progress of districts.

Statement 2 is correct: The Programme aims to assess the performance of Blocks based on its performance in the 15 Key Socio-economic Indicators (KSIs) including health, nutrition, education, agriculture, water resources, financial inclusion, skill development, and basic infrastructure. **The ABP provides states the choice to include additional State-specific KSIs to address local challenges.**

Statement 3 is incorrect: Currently, the Aspirational Block Programme (ABP) **extends to cover 500 blocks across 31 states and Union Territories** (there are 36 States and UTs in India). Hence it is not the that Aspirational blocks are selected only from the 117 identified Aspirational districts.

About half of the blocks included under these programmes are in 6 states—Uttar Pradesh, Bihar, Madhya Pradesh, Jharkhand, Odisha and West Bengal (in decreasing order). Further States can add more blocks to the programme later.

Q.16) Consider the following statements regarding Parallel Governments formed during the Quit India Movement:

1. Satara Prati Sarkar had its own armed wing known as Toofan Sena (typhoon army).
2. The parallel government in Balia made arrangements for carrying out the civil administration.
3. Nyayadan Mandals were organized by Tamluk Jatiya Sarkar in Bengal region.

Which of the statements given above are correct?

- a) 1 and 3 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The emergence of what became known as parallel governments in some parts of the country was a significant feature of the Quit India Movement.

Statement 1 is correct: During the Quit India movement, parallel governments were formed in different parts of the country, challenging the authority of the British Raj. One such government took shape in the Satara district of Maharashtra in 1942-43, known as Prati Sarkar. The Prati Sarkar was formed under the leadership of Krantisinha Nana Patel. The Sarkar held control over 600 villages, and functioned as a government in every possible way, having its own system of markets, law and order, and food distribution. They penalized money lenders and landlord collaborators of the Raj. Violence against women was severely punished by the Sarkar. **The Sarkar had its own armed wing known as Toofan Sena (typhoon army) to carry out guerrilla attacks against the Raj.** The Sena raided the imperial establishments to gather funds for their functioning. On 7th June 1943, they conducted an attack on a goods train carrying the salaries of British officials from Pune to Miraj and looted the money. In the same year, they raided a police station at Bhavani Nagar in the Sangli district to procure the guns needed for their fight.

Statement 2 is correct: The parallel government in Balia, led by Chittu Pandey made arrangements for carrying out the civil administration. Separate panchayats were set up for different localities. Congress workers were appointed for the defence of the city. This government came to control seven out of the ten police station areas. However, this government did not last long.

Statement 3 is incorrect: Nyayadan Mandals or people's courts were organized by Satara based Prati Sarkar and not by Jatiya Sarkar in Bengal region.

Q.17) With respect to Indian response to Simon Commission, consider the following statements:

1. Dr. B. R. Ambedkar submitted a memorandum regarding the rights and safeguards of depressed classes to the commission.
2. Unionists in Punjab and the Justice Party in the South did not boycott the commission.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. Dr. Ambedkar was appointed by the Bombay Legislative Council to work with the Simon Commission. In October 1928, Ambedkar went before the commission. He argued for '**Universal adult franchise**' for both male and female alike for provincial autonomy in the provinces and dyarchy at

centre. Dr. B. R. Ambedkar **on the behalf of Bahishkrita Hitakarini Sabha**, submitted a **memorandum on the rights and safeguards** he felt were required for **depressed classes**.

Statement 2 is correct. Unionists in Punjab and Justice Party in the south **decided not to boycott the commission**.

Q.18) The Second Round Table Conference (2nd RTC) ended with MacDonald's announcement. In this context, which of the following statements were part of this announcement?

1. The setting up of an Indian Consultative Committee.
2. Establishing of two Muslim majority provinces namely, Sindh and North-West Frontier Province (NWFP).
3. India was to be made a federation of states.
4. The setting up of three expert committees—finance, franchise, and states.

Select the correct answer using the code given below.

- a) 2 and 4 only
- b) 1, 2 and 4 only
- c) 2, 3 and 4 only
- d) 1, 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

The Second Round Table Conference (2nd RTC) was held in London from 7th September to 1st December, 1931. The conference was held in an effort to reach a compromise between the British and the Indian nationalists, and to find a way to provide a measure of self-government for India.

The 2nd RTC session ended with MacDonald's announcement of:

- 1) the setting up of an Indian Consultative Committee; **(Hence, statement 1 is correct.)**
- 2) two Muslim majority provinces—Sindh and North-West Frontier Province (NWFP); **Hence, statement 2 is correct.**
- 3) setting up of three expert committees—finance, franchise, and states; (Hence, statement 4 is correct.)
- 4) the prospect of a unilateral British Communal Award if Indians failed to agree.

It was generally agreed during **1st RTC (not 2nd RTC)** that **India was to develop into a federation. (Hence, statement 3 is incorrect.)**

Source: Chapter 19: Civil Disobedience Movement and Round Table Conferences (Spectrum)

Q.19) The Resolution on National Economic Programme was adopted during the Karachi Congress Session of 1931. Which of the following were included in the Resolution on National Economic Programme?

1. Exemption from rent for uneconomic holdings
2. Equal pay for equal work
3. Substantial reduction in rent and revenue
4. Limited hours of work

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 1, 2 and 3 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

In March 1931, a special session of the Congress was held at Karachi to endorse the Gandhi-Irwin Pact. Two resolutions were adopted - one on Fundamental Rights and the other on National Economic Programme, which made the session particularly memorable.

Statement 1, 3 and 4 are correct: The Resolution on National Economic Programme included: **substantial reduction in rent and revenue, exemption from rent in case of uneconomic holdings**, and relief of agricultural indebtedness and control of usury; better conditions for workers including a living wage, **limited hours of work** and protection of women workers; the right to organize and form unions to workers and peasants; and state ownership or control of key industries, mines and means of transport.

Statement 2 is incorrect: Equal pay for equal work **is not a part** of the Resolution on National Economic Programme.

Source: India's Struggle For Independence; Chapter 23: From Karachi To Wardha: The Years From 1932-34

Q.20) With reference to the Sustainable Aquaculture in Mangrove Ecosystem (SAIME) initiative, consider the following statements:

1. The initiative has been launched by Conservation International.
2. The initiative aims to promote the wise use of the mangrove ecosystem by communities to satisfy their livelihood needs.
3. The initiative has been implemented to protect all the Mangrove ecosystems present across India.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 2 and 3 only
- d) 3 only

Ans) b

Exp) Option b is the correct answer.

Mangroves are the most important and productive ecosystem on the earth. The root system of mangroves stabilizes the coastline, reduces soil erosion from storm surge and provides a favourable environment and nursery ground for fishes, crabs, and other aquatic organisms.

Statement 1 is incorrect: The Sustainable Aquaculture in Mangrove Ecosystem (SAIME) initiative is being **launched** by the Non-Governmental Organisation (NGO) **Nature Environment and Wildlife Society (NEWS)** in association with Global Nature Fund (GNF) and Naturland Bangladesh Environment and Development Society (BEDS).

Statement 2 is correct: The SAIME initiative aims to curb the practice of unsustainable aquaculture, particularly shrimp collection, after cleaning large tracts of mangrove forests in Sunderbans. Under the SAIME initiative, **farmers are planting mangrove trees around shrimp ponds** to protect both mangrove ecosystems as well as improve the productivity of shrimps. Hence this initiative promotes the wise use of the mangrove ecosystem to satisfy communities' livelihood needs, is correct.

Statement 3 is incorrect: The Sustainable Aquaculture in Mangrove Ecosystem (SAIME) initiative has been implemented **only in the state of West Bengal** to protect the Mangrove ecosystem in this area. Under SAIME initiative, farmers have taken up cultivation of shrimp at 20 hectares at Chaital in West Bengal's North 24 Parganas, and 10 hectares at Madhabpur in adjoining South 24 Parganas.

Source: <https://naturewildlife.org/saime/>

<https://www.thehindu.com/news/national/other-states/sustainable-shrimp-cultivation-provides-hope-for-mangrove-restoration-in-sundarbans/article66324538.ece>

Q.21) With reference to the work done by Congress Ministries after forming government in the majority of the provinces in the elections of 1937, consider the following statements.

1. They lifted all the restrictions on the return of political exiles to India.
2. Industrial Disputes Bill was introduced in Bombay with the aim to prevent strikes and lockouts as far as possible.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

In the provincial elections of 1937, Congress ministries were formed in Bombay, Madras, Central Provinces, Orissa, United Provinces, Bihar and later in the NWFP and Assam also. In the 28 months of Congress rule in the provinces, there were some efforts made for people's welfare. They tried to ameliorate the civil liberties by bringing in several reforms.

Statement 1 is incorrect: The Congress worked for lifting restrictions on the return to India of political exiles like Rash Behari Gosh, Prithvi Singh, Maulvi Abdullah Khan, Abani Mukerjee, etc. However, **it could not do much in this regard.**

Statement 2 is correct: In October 1937, the Labour Committee appointed by the Congress, gave a programme which was accepted by the AICC. **However, Bombay was the only province to undertake Labour Legislation. The Ministry introduced the Industrial Disputes Bill** with the aim to prevent strikes and lockouts as far as possible.

Source: Spectrum: A Brief History of Modern India, Chapter 21, Congress Rule in Provinces
<https://egyankosh.ac.in/bitstream/123456789/44320/3/Unit-17.pdf> (pg no 35 & 36)

Q.22) During the Civil Disobedience movement, Gandhi and Congress did not include which of the following as a way of protest against British Government?

- a) Picketing of foreign cloths shops
- b) Industrial strikes on a large scale.
- c) Boycott of courts by refraining from litigation.
- d) Nonpayment of taxes to the government

Ans) b

Exp) Option b is the correct answer.

It was the **start of the Civil Disobedience Movement (CDM)** which commenced as **Mahatma Gandhi broke the salt law on the coastal town of Dandi** on Gujarat's western coast. **Mahatma Gandhi's** march started in March 1930, where he along with his 78 other ashram members set off on foot **for Dandi. On April 6, 1930, they arrived in Dandi, where Gandhi violated and broke the Salt Law.**

Options a, c and d are correct: Gandhiji declared that:

- 1) 'Wherever possible, civil disobedience of salt laws should be started.
- 2) **Liquor and foreign cloth shops should be picketed. (Hence option a is correct)**
- 3) **People can refuse to pay taxes to the government. (Hence Option d is correct)**
- 4) **The lawyers can give up practice; the public can boycott the courts by refraining from litigation. (Hence option c is correct)**
- 5) Government servants can resign their posts.

He prescribed only one condition, viz., let the pledge for truth and nonviolence as the only means for the attainment of Swaraj be faithfully kept.’

Option b is incorrect: There were frequent hartals in towns, but to the relief of British officials the Congress did not include industrial or communication strikes in its programme.

Source: Chapter-19: Civil Disobedience Movement and Round Table Conferences, A brief history of modern India by Rajiv Ahir

Q.23) The congress ministries formed in 1937 somehow resulted in the widening rift between Hindus and Muslims. In this context, which of the following contributed to further widening the rift between the two communities?

1. Congress rejection to form joint government with Muslim league in United Province.
2. Presence of Strong social support for Muslim league in Bengal, the NWFP and the Punjab.
3. Failure to achieve substantial gains in the “Muslim mass contact” program launched by congress.

Select the correct answer from the options given below:

- a) 2 only
- b) 3 only
- c) 1 and 2 only
- d) 1 and 3 only

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: In the United Provinces, the Muslim League wanted to form a joint government with the Congress. The Congress had won an absolute majority in the province, so it rejected the offer. Some scholars argue that this rejection convinced the League that if India remained united, then Muslims would find it difficult to gain political power because they would remain a minority. This led to widening rift between Hindus and Muslims.

Statement 2 is incorrect: Though popular in the United Provinces, Bombay and Madras, social support for the League was **still fairly weak in three of the provinces** from which Pakistan was to be carved out just ten years later – **Bengal, the NWFP and the Punjab**. Even in Sind it failed to form a government.

Statement 3 is correct: Congress failed to achieve any substantial gains in the “**Muslim mass contact**” programme it launched. In the end, the secular and radical rhetoric of the Congress merely alarmed conservative Muslims and the Muslim landed elite, **without winning over the Muslim masses**.

Source: Themes in Indian History Part III pg: 385-386

Q.24) Consider the following statements regarding the provisions of the Poona pact:

1. It abandoned the idea of separate electorates for the depressed classes.
2. It increased the number of reserved seats in the Central and Provincial legislatures for the depressed classes.
3. It provided for educational grants for the members of Depressed Classes in every province.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Nationalists felt the demand for a separate electorate was a threat to national unity. **Mahatma Gandhi's fast unto death** (September 1932) led to **Poona Pact which abandoned separate electorates for depressed classes. The Poona pact was signed by B.R. Ambedkar** on behalf of the depressed classes on September 24, 1932. The Poona Pact was **accepted by the government as an amendment to the Communal Award.**

Statement 1 is correct: The Poona Pact **abandoned the idea of separate electorates for the depressed classes.** So, the election will be through a joint electorate to seats of assembly and central legislature.

Statement 2 is correct: **Under the Poona pact the seats reserved for the depressed classes were increased from 71 to 147 in provincial legislatures and to 18 percent of the total in the Central Legislature.** So, it led to a general increase in seats for depressed classes.

Statement 3 is correct: Under the Poona pact it was agreed that **in every province out of the educational grant an adequate sum will be ear-marked for providing educational facilities to the members of Depressed Classes.**

Source: Chapter-19: Civil Disobedience Movement and Round Table Conferences, A brief history of modern India by Rajiv Ahir

Q.25) With reference to Wassenaar Arrangement (WA), consider the following statements:

1. The arrangement controls the export of both conventional weapons and sensitive dual-use goods and technologies.
2. It is mandatory for member countries to share information related to the export of items mentioned in this arrangement.
3. India is one of the founding members of this arrangement.
4. Admission of new members to this arrangement requires the consensus of all members.

Which of the statements given above are correct?

- a) 1, 2 and 3 only
- b) 2 and 3 only
- c) 1 and 4 only
- d) 2 and 4 only

Ans) c

Exp) Option c is the correct answer.

Recently, **India assumed the chairmanship of 26th annual session** of the Wassenaar Arrangement (WA), for one year. The Wassenaar Arrangement was established in **1996** to contribute to regional and international security and stability by promoting transparency and greater responsibility in transfers of conventional arms and dual-use goods and technologies.

Statement 1 is correct: Wassenaar Arrangement (WA) **controls the export of conventional weapons and dual-use goods and technologies.** It is a multilateral export control regime which aims to promote regional and international security and stability by controlling the transfers of conventional arms and dual-use goods and technologies, thus preventing destabilising accumulations.

Statement 2 is incorrect: To promote transparency, Wassenaar Arrangement calls on states to **make a series of voluntary information exchanges (arrangement does not mandate states to share information)** and notifications on their export activities related to weapons and items appearing on the arrangement's two control lists. The arrangement provides for two lists for Dual-Use Goods and Technologies, and they are Basic list and Sensitive lists.

Statement 3 is incorrect: **India is not a founding member of Wassenaar Arrangement (WA).** The Wassenaar Arrangement was **established in 1996** after 33 countries had given its approval and **India became a member of WA in 2017 only.**

Statement 4 is correct: It is true that **admission of new members requires the consensus of all members.** India was the latest country to be included in this arrangement as the 42nd participating 2017. India's membership was supported by Russia, USA, France and Germany.

Q.26) Which of the following promises were made by the Congress in their 1937 election manifesto?

1. Removal of untouchability.
2. Fight against the implementation of the Government of India Act, 1935.
3. Encouraging the Khadi and Village industries.
4. Provide Right to form Trade Unions for industrial workers.

Select the correct option from the codes given below.

- a) 1, 2 and 3 only
- b) 1, 3 and 4 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

In February 1937, elections to the provincial assemblies were held. Elections were held in eleven provinces—Madras, Central Provinces, Bihar, Orissa, United Provinces, Bombay Presidency, Assam, NWFP, Bengal, Punjab and Sindh. In its earlier sessions at Lucknow in early 1936 and Faizpur in late 1937, the Congress decided to fight these elections.

Congress Manifesto had following key provisions:

Statement 1 is correct: On the social issues, the 1937 election manifesto of the congress has made several promises which include **removal of the untouchability**, providing equal status to women and finding a satisfactory solution to the communal problems.

Statement 2 is correct: The Manifesto made it clear that the purpose of sending Congressmen to the legislatures was **not to cooperate with the Government, but to combat the Act of 1935** and to end it. British imperialism was to be resisted in its "attempts to strengthen its hold on India".

Statement 3 is correct: **The manifesto promised to encourage the Khadi and village industries**, to ensure economic development in the rural areas.

Statement 4 is correct: In relation to the industrial workers the policy of Congress was to secure for them a decent standard of living and regular work hours. **It promised to realise this by allowing access to cheap credits and right to form trade unions.**

Source: Spectrum: A Brief History of Modern India, Chapter 20, Debates on the Future Strategy after CDM
<https://egyankosh.ac.in/bitstream/123456789/20073/1/Unit-30.pdf>

Q.27) After the Lahore Session of Congress in 1929, Gandhi presented 11 demands to the British government and gave an ultimatum of January 31, 1930, to accept or reject these demands. Consider the following statements with reference to these demands:

1. There was demand for Dominion Status for India.
2. There was a demand for abolition of the salt tax and government's monopoly over salt production.
3. There was a demand for reducing the land revenue by 50 percent.
4. There was a demand for reserving coastal shipping for Indians.

Which of the statements given above are correct?

- a) 1, 3 and 4 only
- b) 1, 2 and 3 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

Statement 1 is incorrect: Gandhi's 11-point ultimatum to Irwin for 31 January, 1930 seemed to many a sad climb-down from the Purna Swaraj resolution, **since no demand was made for any change in the political structure, not even Dominion Status was demanded for India.**

Statement 2, 3 and 4 are correct: The letter from Gandhi to Irwin combined:

1) Issues of general interest:

50% cuts in army expenses and civil service salaries, total prohibition, release of political prisoners, reform of the C.I.D., and changes in the Arms Act allowing popular control of issue of firearms Licenses)

2) Three specific bourgeois demands (Lowering of the rupee sterling exchange ratio to 1s 4d, textile protection, and **reservation of coastal shipping for Indians**) (Hence Statement 4 is correct)

3) two basically peasant themes-50% reduction in land revenue, and abolition of the salt tax and government salt monopoly. (Hence statement 2 and 3 are correct).

Source: Modern India by Sumit Sarkar PAGE 284

Q.28) With reference to social welfare reforms under Congress Ministries during 1937-39, consider the following statements:

1. All political prisoners were released in Congress ruled provinces.
2. Due to Congress' education policy, the number of educational institutions increased in most of the provinces.
3. Efforts were made to increase the participation of harijans in government services.

Which of the given above statements is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Congress ministries implemented various social welfare reforms aimed at improving the lives of ordinary people. These included land reforms, labor laws, education and health reforms, and measures aimed at improving the status of women.

Statement 1 is incorrect: It is not accurate to say that all political prisoners were released during the Congress rule. As even in the provinces where Congress did come to power, not all political prisoners were released.

Statement 2 is correct: In all the Congress ruled provinces efforts were made to introduce prohibition; encourage education and to give an impetus to village industries. As a result of congress significant progress in provinces. **Due to Congress education policy students as well as educational institutions increased.** For example, in Bombay the number of educational institutions was 14,609 in 1936-37 and increased to 18,729. Similarly, the number of pupils which was 1,335,889 in 1936-37 increased to 1,556,441 by 1939-40.

Statement 3 is correct: Measures for welfare of Harijans taken-temple entry, use of public facilities, scholarships, their numbers in government service and police, etc. an increase in their numbers in government service and police etc.

Source: <https://egyankosh.ac.in/bitstream/123456789/20073/1/Unit-30.pdf> Spectrum's A brief history of Modern India ch 21 pg:462

Q.29) Consider the following statements regarding the Cunningham Circular:

1. It mandated for parents, guardians and students to furnish assurances of good behaviour.
2. It banned strikes by labours in tea plantations owned by Britishers.
3. It was issued during the Quit India Movement.
4. It was issued by the Governor of Assam at that time.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 1, 2 and 3 only
- d) 3 and 4 only

Ans) a

Exp) Option a is the correct answer.

To discourage and stop students to participate in the Civil Disobedience Movement, J.R. Cunningham issued the Cunningham circular in 1930.

Statement 1 is correct: It forced parents, guardians and students to furnish assurances of good behaviour and asked them to sign an undertaking that they would have to quit their schools and colleges if they participated in anti-government demonstrations or movements.

Statement 2 is incorrect: It imposed a blanket ban on any anti-British and pro-swadeshi activity by students. The circular was not related to the strikes by labourers in tea plantations.

Statement 3 is incorrect: It was issued during the Civil Disobedience Movement and not during Quit India movement.

Statement 4 is incorrect: J. R. Cunningham was the Director of Public Information of Assam and not the Governor of Assam.

Source: TMH Book by Sonali Bansal

Q.30) What are 'Local Bubbles' sometimes mentioned in the news?

- a) Network of stratospheric balloons to provide internet connectivity.
- b) A great cavity in the interstellar gas around the solar system.
- c) A technology to stop plastic from entering the Yamuna River.
- d) A programming language that enables non-technical people to build web applications.

Ans) b

Exp) Option b is the correct answer.

Researchers from the **Center for Astrophysics (CfA) Harvard & Smithsonian** have generated a **3D magnetic map of the cavity** called **Local Bubble**. The Local Bubble is a **cavity at least 1,000 light-years wide** in the interstellar gas around the solar system – a 'super bubble' in interstellar space. The Local Bubble was blown out by a series of supernovas between 10 million and 20 million years ago and is one of many such bubbles in the interstellar medium that riddle our Milky Way galaxy and others like the cavities in Swiss cheese.

Option a is incorrect: Project loon is a **network of stratospheric balloons** that helps to connect rural and remote regions of the world to **Internet connectivity** via wireless communication technology. Project Loon is a research and development project being developed by Google.

Option b is correct: The Local Bubble is a **great cavity in the interstellar medium** (ISM), about 1,000 light-years wide, within which the Sun and many nearby stars reside. The Local Bubble has a neutral hydrogen density of only about 0.07 atoms per cm³ – at least 10 times lower than the average ISM in the Galaxy and contains a thin gruel of million-degree X-ray-emitting plasma.

Option c is incorrect: A technology used to stop plastic from entering the Yamuna River is a **bubble curtain Technology**, which is a non-invasive solution to stop plastic from entering the oceans. Ships and fish can pass through the air bubbles, but plastics will be stopped. The bubble screen is created by a specially designed air tube which is placed diagonally on the bed of the canal or river. It brings waste to the surface, channels the plastic onto the banks where it can be extracted.

Option d is incorrect: Bubble is a **visual programming language**, a no-code development platform and an application platform as a service, developed by Bubble Group, that enables non-technical people to build web applications without needing to type code.

Source: <https://www.downtoearth.org.in/news/world/bubble-of-secrets-here-s-what-the-new-3d-map-of-a-gigantic-cosmic-cavity-tells-us-about-the-universe-87090> <https://www.space.com/local-bubble-first-3d-magnetic-field-map> <https://www.livemint.com/news/india/yamuna-to-get-bubble-curtain-to-stop-plastic-from-entering-the-river-11621354904056.html>

Q.31) Which of the following women leaders played an active role in the Civil Disobedience Movement that was launched in 1930?

1. Matangini Hazra.
2. Kamla Nehru.
3. Sarojini Naidu

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Women have played a significant role in the civil disobedience movement in India. Women from all walks of life, including students, farmers, laborers, and political leaders, joined the march to protest the British Salt Tax.

Option 1 is correct: Matangini Hazra was an Indian revolutionary who was devoted to the cause of the country's freedom from British rule. **She participated in the civil disobedience movement and was arrested for her role in the Salt Satyagraha movement. Though** she was quickly released, she persisted with the demand that the Salt Tax be repealed.

Option 2 is correct: **Kamla Nehru got involved to protest the British's monopoly on salt as a part of the 'Civil Disobedience Movement.** Kamla Nehru was believed as one of the first leaders who sold contraband salts during salt Satyagraha.

Option 3 is correct: On May 21, 1930, **Sarojini Naidu**, Imam Sahib and Manilal (Gandhi's son) took up the unfinished task of leading a raid on the Dharasana Salt Works. The unarmed and peaceful crowd was met with a brutal lathicharge which left 2 dead and 320 injured.

Q.32) Consider the following statements with reference to Rani Gaidinliu and her contribution to the Indian freedom struggle:

1. During the Quit India Movement, she undertook many armed raids on the British offices in Assam.
2. She was associated with the socio-religious movement known as Heraka Movement.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Rani Gaidinliu was a Naga spiritual and political leader who fought against British colonial rule in India.

Statement 1 is incorrect: Due to her activities during the Civil-Disobedience movement, she was arrested in 1932 by the British and sentenced to life imprisonment. She then served prison time from 1933 to 1947 in various jails. After India achieved independence, Rani Gaidinliu was released from prison. She was resolved to work for the development of the Zeliangrong people. Therefore, she was in jail during the time period of quit-India movement. Hence statement 1 is incorrect.

Statement 2 is correct: In 1927, at the age of 13, **Gaidinliu**, along with her cousin Haipou Jadonang, **joined the Heraka movement**, which aimed at the revival of the Naga tribal religion and establish self-rule of the Nagas (Naga Raj).

Q.33) An All-Parties Conference in 1928 appointed a sub-committee under the chairmanship of Motilal Nehru to draft a constitution. Which of the following personalities were part of this sub-committee?

1. Sir Ali Imam
2. Subash Chandra Bose
3. Tej Bahadur Sapru

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

In December 1927, at its Madras session, the Indian National Congress took two major decisions in response to the setting up the Simon Commission: first, it decided to not cooperate with the Commission; second, it set up an All-Parties Conference to draft a Constitution for India.

An All-Parties Conference met in February 1928 and appointed a sub- committee under the chairmanship of Motilal Nehru to draft a constitution. The All-Parties Conference included the All-India Liberal Federation, All India Muslim League, Sikh Central League and others.

Option 1, 2, and 3 are correct: Some of the notable members of this Committee were: Motilal Nehru (Chairman), Sir Ali Imam, Tej Bahadur Sapru and Subash Chandra Bose, M.S. Aney, Mangal Singh, Shuab Qureshi and G.R. Pradhan.

M.R. Jayakar and Annie Besant joined the Committee later. Jawaharlal Nehru was appointed the secretary to the Committee.

Source: Spectrum Modern India 2019–20 Edition CH-18

Q.34) Consider the following statements with reference to the features of the Government of India Act of 1935:

1. As per the act, members of federal assembly were to be elected through indirect elections.
2. It abolished dyarchy at the Provincial level and introduced it at the Centre.
3. It provided for the separate electorate for women.

Which of the statements given above is/are correct?

- a) 1, 2 and 3
- b) 1 and 3 only
- c) 1 and 2 only
- d) 2 and 3 only

Ans) a

Exp) Option a is the correct answer.

The Government of India Act was passed by the British Parliament in August 1935.

Statement 1 is correct: Under the Government of India Act, 1935, the Central Legislature was bicameral, consisting of the Federal Assembly and Council of States. **The Federal Assembly was the lower house with a tenure of five years.** It was to be made of 375 members, out of which 250 were to be representatives of British India and not more than 125 members from the princely states. **As per the act, members of the Council of States were to be directly elected and members of Federal Assembly were to be indirectly elected.**

Statement 2 is correct: The Act of 1935 abolished dyarchy at the Provincial level and introduced it at the Centre. There were two categories of federal subjects: Reserved and Transferred. Religious affairs, defence, administration of tribal areas and external affairs were included in the reserved subjects. The Governor-General remained overall in charge of both the Reserved and Transferred subjects.

Statement 3 is correct: It further extended the principle of communal representation. Even the workers and women got separate representation although they had not asked for it. **Separate electorates for women** were beneficial to women's advancement in the decision-making process. Workers had their own representation as well, which aided in the progress of the working class.

Source: A Brief History of Modern India by Rajiv Ahir (Spectrum), 6th Edition

Statement 3: https://www.legislation.gov.uk/ukpga/1935/2/pdfs/ukpga_19350002_en.pdf (Pg:215)

Q.35) With reference to “Neuromorphic computers”, consider the following statements:

1. Unlike traditional computers, Neuromorphic computers mimic the working of human brains and nervous system.
2. Unlike traditional computers which use silicon chips to store data, human DNA is used to store data in the Neuromorphic computers.
3. Neuromorphic computers consume more energy as compared to traditional computers.

Which of the statements given above is/are correct?

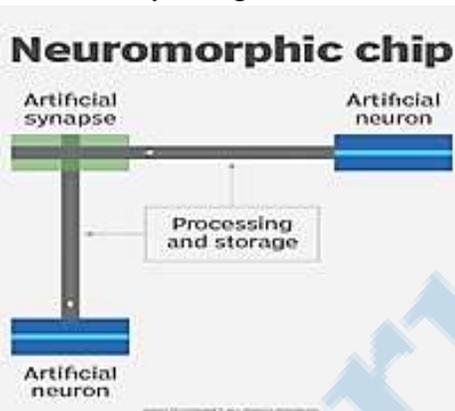

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Neuromorphic computers mimic the neuro-biological networks in the human brain and perform tasks efficiently and effectively, such as visual recognition and data interpretations. Compared to traditional computers, neuromorphic computers are built to work like a human brain and so their processing is highly rapid.

Statement 1 is correct: It is true that **Neuromorphic computers are modelled after systems in the human brain and nervous system**. Traditional computers have **physically separated memory storage and processing units**, and the human brain is a supreme **biological computer** that is smaller and more efficient due to the presence of a **synapse** (the connection between two neurons) that plays the role of both **processor and memory storage unit**.

Statement 2 is incorrect: Neuromorphic computing uses hardware based on the structures and processes of neurons and synapses in **biological brains (not DNA of humans)**. The most common form of neuromorphic hardware is the **spiking neural network (SNN)**.

Statement 3 is incorrect: Neurons use chemical and electronic impulses to send information between different regions of the brain and the rest of the nervous system. Neuromorphic computers by using this process, will make it **function faster and conserve more energy** as compared to traditional computers. Statement is incorrect as **Neuromorphic computers consume less energy than traditional computers**.

Source: https://blog.forumias.com/artificial-synapse-developed-for-brain-like-computing-with-industry-compatible-nitride-semiconductors/#Why_Neuromorphic_computing

Q.36) Consider the following statements with reference to the Indian National Liberal Federation, established during Indian freedom struggle:

1. It was founded by Jawaharlal Nehru and Subash Chandra Bose.
2. It was established immediately after the withdrawal of the Civil Disobedience movement.

Which of the above given statement is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

Statement 1 is incorrect: Indian National Liberal Federation (INLF) was founded by Surendra Nath Banaerja in 1919 and some of its prominent leaders were Tej Bahadur Sapru, S. Srinivasa Sastri and M. R. Jayakar.

Statement 2 is incorrect: When the Montagu report of 1918 was made public, there was a divide in the Congress over it. The moderates welcomed it while the extremists opposed it. This led to a schism in the Congress with moderate leaders **forming the "Indian National Liberal Federation" in 1919 (not after Civil Disobedience movement).**

Source: A Brief History of Modern India by Rajiv Ahir (Spectrum), 6th Edition

Q.37) With reference to Gandhi's campaign against untouchability in India, consider the following statements.

1. He set up the All-India Anti Untouchability League for campaigning against the practice of untouchability.
2. He pleaded to throw open temples for the untouchables.
3. He advocated for the complete annihilation of the Varna system, which he considered as the source of untouchability in India.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Gandhi was determined to undo the divisive intentions of the government's divide and rule policy; hence, he gave up all his other preoccupations and launched a whirlwind campaign against untouchability.

Statement 1 is correct: He set up the All-India Anti-Untouchability League in September 1932 and started the weekly Harijan in January 1933. Starting from Wardha, he conducted a Harijan tour of the country in the period from November 1933 to July 1934, covering 20,000 km, collecting money for his newly set up Harijan Sevak Sangh, and propagating removal of untouchability in all its forms.

Statement 2 is correct: He called for total eradication of untouchability by making pleas to the upper caste Hindus to allow temple entry for the untouchables. He also stressed the need for caste Hindus to do 'penance' for untold miseries inflicted on Harijans.

Statement 3 is incorrect: According to Gandhi untouchability was a sin, which needs to be eradicated. Where Gandhiji believed that untouchability could be eradicated by the change of heart of the upper castes, **however he didn't oppose to the varna system.** For Gandhi, the reinvigorated socio-religious whole would be structured by **an ideal notion of varna in which there would be no enmity among the interdependent units.** At the same time, Ambedkar believed that the roots of untouchability lie in the Varna system, so to end untouchability, the eradication of Varna system is necessary. As there is no scope for reform in Varna system, it is appropriate to eradicate it completely. Therefore, the upliftment of Dalits is only possible when their rights are protected, grievance redressal system, and political powers are also conferred to them.

<https://journals.sagepub.com/doi/full/10.1177/0971685818805328>

Q.38) After the withdrawal of Non-Cooperation Movement, which among the following leaders supported an end to the boycott of legislative councils?

1. M A Ansari
2. C Rajagopalachari
3. Motilal Nehru
4. C R Das
5. Ajmal Khan

Select the correct answer using the code given below:

- a) 2, 3 and 4 only
- b) 1, 4 and 5 only
- c) 1, 3 and 5 only
- d) 3, 4 and 5 only

Ans) d

Exp) Option d is the correct answer.

After Gandhi's arrest (March 1922), there was disintegration, disorganisation, and demoralisation among nationalist ranks. A debate started among Congressmen on what to do during the transition period, i.e., the passive phase of the movement.

One section led by **C.R. Das, Motilal Nehru, and Ajmal Khan** wanted **an end to the boycott of legislative councils so that the nationalists could enter them to expose the basic weaknesses of these assemblies and use these councils as an arena of political struggle to arouse popular enthusiasm**. They wanted, in other words, to 'end or mend' these councils, i.e., if the government did not respond to the nationalists' demands, then they would obstruct the working of these councils. Those advocating entry into legislative councils came to be known as **the 'Swarajists'**. The **other group with C. Rajagopalachari, Vallabhbhai Patel, Rajendra Prasad, and M.A. Ansari** came to be known as the **'No- changers'**. The 'No-Changers' opposed council entry, advocated concentration on constructive work and continuation of boycott and non-cooperation, and quiet preparation for resumption of the suspended civil disobedience programme.

Source: A Brief History of Modern India by Rajiv Ahir (Spectrum), 6th Edition

Q.39) With reference to the events related to Indian National Congress, consider the following statements:

1. British Government declared Congress as illegal in 1930 after the Congress adopted the aim of Purna Swaraj in Lahore Session.
2. M. K. Gandhi resigned from Congress in 1934 and never joined back.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

There was a marked change in the Government attitude towards the Civil Disobedience Movement in its 2nd phase compared to 1st phase and it decided to suppress the movement strongly.

Statement 1 is incorrect: There was no such ban on the Congress in the first phase of CDM in 1930. Viceroy Irwin in fact had signed Gandhi Irwin pact (Delhi Pact) on an equal footing with the Congress and thus raised the prestige of Congress. But a marked change was noticed in the Government attitude after Gandhi returned from 2nd Round Table Conference. **On January 4, 1932, Gandhi was arrested, Congress organisations at all levels were declared to be illegal soon after.**

Statement 2 is correct: In October 1934, Gandhi announced his resignation from the Congress to serve it better in thought, word, and deed. He never joined Congress again even though he did accept the Congress's offer to lead the Quit India struggle after being urged by the Congress Working Committee. He continued to focus on constructive work after resigning in 1930s. He also clarified that he didn't resign from the Congress in disgust and retained highest regard for the party.

Source: The Years that Changed the World by Ramachandra Guha

<https://www.newdelhitimes.com/when-gandhiji-resigned-from-the-congress/>

Q.40) With reference to “Hybrid immunity”, sometimes seen in news, which of the following statement is correct?

1. It is an immunity offered by the combination of primary doses and booster shots of vaccines.
2. It has higher degree of immunity as compared to infection induced immunity.

Select the correct answer using the code given below:

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

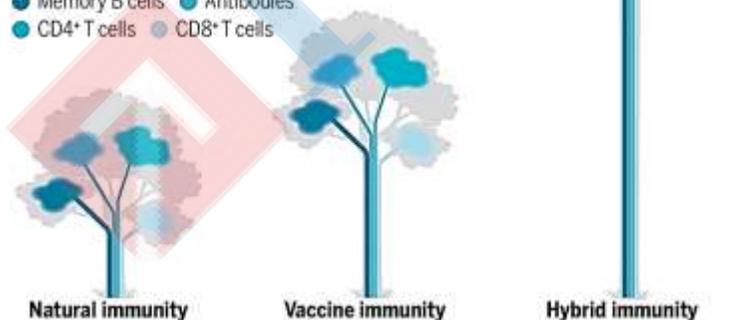

A recent study by The Lancet Infectious Diseases held that **hybrid immunity provides better protection against severe Covid-19**, while all immunity against a re-infection wane within a few months.

Statement 1 is incorrect: Hybrid immunity is a combination of natural protection of the human body against diseases along with the immunity provided by the vaccine. The statement is incorrect as it is not a combination of primary and booster shots of vaccines. It appears to result in stronger protection than just infection or vaccination alone.

Hybrid vigor immunity with COVID-19 vaccines

Hybrid vigor can occur when different plant lines are bred together and the hybrid is a much stronger plant. Something similar happens when natural immunity is combined with vaccine-generated immunity, resulting in 25 to 100 times higher antibody responses, driven by memory B cells and CD4⁺ T cells and broader cross-protection from variants.

- Memory B cells ● Antibodies
- CD4⁺ T cells ● CD8⁺ T cells

Statement 2 is correct: Hybrid immunity is gained from a previous infection plus vaccines (either the primary doses or both primary and booster doses.) A hybrid immunity offers a “higher magnitude and durability” of protection as compared to infection alone, emphasising the need for vaccination.

Source: <https://indianexpress.com/article/explained/explained-health/hybrid-immunity-most-effective-against-severe-covid-study-8392858/>

Q.41) In the context of the performance of the Indian National Congress in the elections to eleven provincial assemblies in 1937, consider the following statements.

1. The party had won more than half of the seats it contested in total.
2. It had got a majority in Bengal and Assam Provinces.
3. Congress failed to form government in Punjab.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

In February 1937, elections to the provincial assemblies were held. Elections were held in eleven provinces Madras, Central Provinces, Bihar, Orissa, United Provinces, Bombay Presidency, Assam, NWFP, Bengal, Punjab and Sindh.

Statement 1 is correct: The Congress won 716 out of 1,161 seats it contested (there were 1,585 seats in the legislative assemblies of the eleven provinces). Hence, the party had won more than half of the total seats it contested in the elections of all the 11 provinces.

Statement 2 is incorrect: The party got a majority in some provinces (Madras, Central Provinces, Bihar, Orissa, United Provinces and Bombay Presidency), **except in Bengal, Assam, Punjab, Sindh and the NWFP.**

Statement 3 is correct: It emerged as the largest party in Bengal, Assam and the NWFP. Though Congress was the single largest party in these provinces **but it failed to form a government. In Punjab, Unionist Party formed the government.**

Source: Spectrum: A Brief History of Modern India, Chapter 20, Debates on the Future Strategy after CDM

Q.42) Consider the following statements regarding the Hindu Mahasabha's response to 'Delhi Proposals' of 1927 of Muslim League:

1. The Hindu Mahasabha was opposed to the proposal for creating new Muslim majority provinces.
2. It opposed the reservation of seats for Muslims in Punjab and Bengal.
3. It demanded that there should be no constitutional amendment without concurrence of the states constituting the Indian federation.

Which of the statements given above is/are correct?

- a) 1 only
- b) 3 only
- c) 1 and 2 only
- d) 2 and 3 only

Ans) c

Exp) Option c is the correct answer.

During the preparation of Nehru Report, there were differences between different groups regarding the proposals. Later large number of Muslim leaders had met at Delhi at the Muslim League session and evolved four proposals for their demands to be incorporated into the draft constitution. These came to be known as the '**Delhi Proposals**'.

Statement 1 is correct. After the Delhi proposals, the Hindu Mahasabha was vehemently **opposed to the proposals of creating new Muslim majority provinces** whereas the Muslim League proposed joint electorates in place of separate electorates with reserve seats for Muslims. This became the bone of contention between in the finalization of the Nehru Report.

Statement 2 is correct. The Hindu Mahasabha strongly **opposed the reservation of seats for Muslim majorities in Punjab and Bengal**, since according to the Hindu Mahasabha this would ensure Muslim control over legislatures in both the provinces.

Statement 3 is incorrect. **Jinnah's Fourteen Points (and not Hindu Mahasabha)** proposed that there should be no **constitutional amendment** by the centre **without the concurrence of the states** constituting the Indian federation.

Source: Spectrum (Page No. 372-373)

Q.43) Which of the following reason may be given to justify the stand that Gandhi-Irwin Pact (1931) was not a retreat from the Movement?

1. Capacity of the masses to make sacrifices, unlike that of the activists, is limited.
2. Mass movements are generally short-lived.
3. The shopkeepers and merchants who participated in the movement were exhausted.

Choose the correct answer using the codes given below:

- a) 2 Only
- b) 2 and 3 Only
- c) 1 and 3 Only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Gandhi's decision to suspend the civil disobedience movement as agreed under the **Gandhi-Irwin Pact (1931) was not a retreat**, as:

- (1) **mass movements are necessarily short-lived; (Hence statement 2 is correct.)**
- (2) **capacity of the masses** to make sacrifices, unlike that of the activists, **is limited;** and **(Hence statement 1 is correct.)**
- (3) there were **signs of exhaustion** after September 1930, especially among shopkeepers and merchants, who had participated so enthusiastically. **(Hence statement 3 is correct.)**

Q.44) Consider the following statements with reference to the spread of Salt Satyagraha:

1. C. Rajagopalachari organized a march on Tanjore coast to break the salt law.
2. K. Kelappan led a Salt march in Malabar.
3. Imam Sahib and Manilal were the main leaders in the Dharasana salt march.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: In April 1930, **C. Rajagopalachari organized a march from Tiruchirappalli (Trichinopoly as it was called by the British) to Vedaranniyam on the Tanjore (or Thanjavur) coast to break the salt law.** The event was followed by widespread picketing of foreign cloth shops. The anti-liquor campaign gathered forceful support in interior regions of Coimbatore, Madura, Vidyanagar, etc. Although,

Rajaji tried to keep the movement non-violent, violent eruptions of masses and the violent repressions of the police began.

Statement 2 is correct: In Malabar, K. Kelappan led a march from Calicut to Poyannur. K. Kelappan led a procession of 33 satyagrahis from Kozhikode to Payyannur.

Statement 3 is correct: British Journalist Web Miller writes: In my whole career, I have never seen this kind of dastardly act On May 21, 1930, Sarojini Naidu, Imam Sahib and Manilal (Gandhi's son) took up the unfinished task of leading a raid on the Dharasana Salt Works. The unarmed and peaceful crowd was met with a brutal lathi charge which left 2 dead and 320 injured. This new form of salt satyagraha was eagerly adopted by people in Wadala (Bombay), Karnataka (Sanikatta Salt Works), Andhra, Midnapore, Balasore, Puri and Cuttack.

Q.45) With reference to Global Risks Report 2023, consider the following statements:

1. In addition to environmental risks, the report also captures geopolitical and technological risks faced by the world.
2. It was published by the United Nations Environment Programme (UNEP).
3. Global risks report 2023 ranked “Biodiversity loss and ecosystem collapse” as the top risks over the ten years by 2033.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The Global Risks Report 2023 tries to explore some of the most severe risks that the world may face over the next decade. The world is facing a set of risks that feel both wholly new and already familiar, this report explores the various risks faced by the countries across the world.

Statement 1 is correct: It is true that the Global risk report 2023, in addition to **environmental risks**, also captures **geopolitical, technological, economic and societal risks** faced by the world.

Global Risks Report 2023

Top 10 Risks

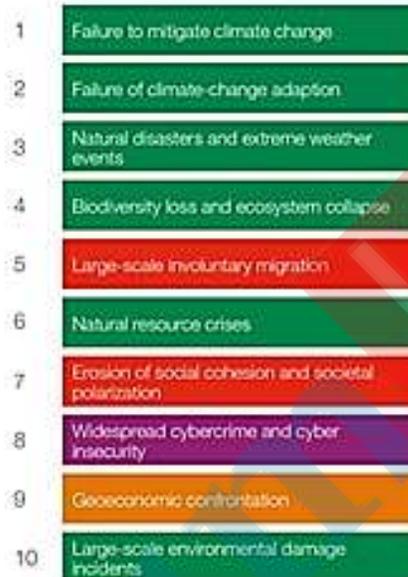

"Please estimate the likely impact (severity) of the following risks over a 2-year and 10-year period"

2 years

10 years

Risk categories

 Economic
  Environmental
  Geopolitical
  Societal
  Technological

Statement 2 is incorrect: Global risks report 2023 was published by the **World Economic Forum (WEF)** (not UNEP). Global risks report 2023 is an 18th edition of WEF and the report **use three-time frames** for understanding global risks - **current crisis, long term crisis (10 years) and Poly crisis** (how various risk will combine to have a compound effect on the world e.g., how the risk of reducing **global cooperation climate change, food security, peace will aggravate the global risks**)

Statement 3 is incorrect: Global risks report 2023 ranked **Failure to Mitigate Climate Change** as top risks followed by 'Failure of Climate Change Adaptation'. 'Natural disasters and extreme weather events" and '**Biodiversity loss and ecosystem collapse**' (which is ranked as **4th most severe facing the world by 2033**). Source: <https://www.downtoearth.org.in/news/climate-change/davos-2023-natural-disasters-extreme-weather-second-most-severe-global-risk-in-short-term-says-wef-report-87140>

Q.46) With reference to British India, which among the following women participated in Third Round Table Conference?

1. Begum Jahanara Shahnawaz
2. Sarojini Naidu
3. Annie Besant
4. Vijay Laxmi Pandit

SFG 2023 | LEVEL 2 | Test #23 – Solutions | ForumIAS

Select the correct answer using the codes given below:

- a) 1 only
- b) 2 and 3 only
- c) 1 and 4 only
- d) 2 and 4 only

Ans) a

Exp) Option a is the correct answer.

The **Third Round Table Conference**, held between November 17, 1932, and December 24, 1932, was not attended by the Indian National Congress and Gandhi. It was ignored by most other Indian leaders. **Only forty-six delegates attended** since most of the main political figures of India were not present. The Labour Party from Britain and the Indian National Congress refused to attend.

Option 1 is correct. British-Indian Representatives: Aga Khan III, B. R. Ambedkar (Depressed Classes separate Electorate), Ramakrishna Ranga Rao of Bobbili, Sir Hubert Carr (Europeans), Nanak Chand Pandit, A. H. Ghuznavi, Henry Gidney (Anglo-Indians), Hafiz Hidayat Hussain, Muhammad Iqbal, M. R. Jayakar, Cowasji Jehangir, N. M. Joshi (Labour), **Narasimha Chintaman Kelkar, Arcot Ramasamy Mudaliar, Begum Jahanara Shahnawaz (Women).**

Option 2, 3 and 4 are incorrect.

- 1) **Sarojini Naidu participated in Second Round Table Conference and not in Third Round Table Conference.** The Gandhi–Irwin Pact opened the way for Congress' participation in this conference. **Gandhi was invited from India and attended as the sole official Congress representative accompanied by Sarojini Naidu** and also Madan Mohan Malaviya, Ghanshyam Das Birla.
- 2) **Annie Besant did not attend any of the Round Table Conference.** Besant died on 20 September 1933, at age 85, in Adyar, Madras Presidency, British India.
- 3) **Vijay Laxmi Pandit** was the first Indian woman to **hold a cabinet post** in pre-independent India. In 1937, she was elected to the provincial legislature of the United Provinces and was designated minister of local self-government and public health. **She also did not participate in any of the Round Table Conference.**

Source: A Brief History of Modern India (Revised and Enlarged Edition 2019) Pg no 384

Q.47) Consider the following statements with reference to Zakir Hussain Committee set up during Indian Freedom Struggle:

1. It formulated a detailed national scheme for promoting basic education.
2. It recommended the inclusion of knowledge of handicrafts in the curriculum.
3. It proposed that teaching must be in vernacular languages from class II to VII and in English only after class VIII.

Which of the above statements is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1, 2 and 3
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

Statements 1 and 3 are correct. The Congress had organized a National Conference on Education in October 1937 in Wardha. In the light of the resolutions passed there, **Zakir Hussain committee** formulated

a detailed **national scheme for basic education**. The main principle behind this scheme was ‘**learning through activity**’.

It was **based on Gandhi’s ideas** published in a series of articles in the weekly Harijan. Gandhi thought that Western education had created a gulf between the educated few and the masses and had also made the educated elite ineffective.

The scheme had the following provisions:

- (1) Inclusion of a **basic handicraft in the syllabus**.
- (2) **First seven years of schooling to be an integral part of a free and compulsory nationwide education system** (through mother tongue).
- (3) Teaching to be in **vernacular languages from class II to VII and in English only after class VIII**.
- (4) Ways to be devised to establish contact with the community around schools through service.
- (5) A suitable technique to be devised with a view to implementing the main idea of basic education – **educating the child through the medium of productive activity of a suitable handicraft**.

The system, rather than being a methodology for education, was **an expression of an idea for a new life and a new society**. The basic premise was that only through such a scheme could India be an independent and non-violent society. This scheme was **child-centred and cooperative**.

Statement 2 is correct: The most important **point according to the committee was the economic goals of the basic education** which would develop by the manual handicraft of the children for a period of 7 years according to the regional/local needs.

Source: **A Brief History of Modern India: SPECTRUM**

Q.48) Consider the following pairs regarding different sessions of Indian National Congress and their important events during the Freedom Struggle of India:

Congress session/ meeting	Important event
1. Ramgarh, 1940	Congress demanded complete independence
2. Wardha, 1939	Formation of All India Youth Congress
3. Faizpur, 1936	Congress session held in a village for the first time

Which of the pairs given above is/are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Pair 1 is correct. The **Ramgarh session** of the Congress was held in March 1940 with Maulana Abul Kalam Azad in the president’s chair. In Ramgarh session Congress **demand complete independence**. All members agreed that a battle must be waged but there was disagreement over the form. **Jawaharlal Nehru reiterated that complete independence for India must be a precondition for Congress support to the British war effort**. The Congress finally declared at the session that the people of India would accept nothing short of **complete independence**. Indian freedom could not be in the form of dominion or any other status within the imperial structure.

Pair 2 is incorrect. Formation of **All India Youth Congress** was held at **Calcutta session** of congress in 1928 presided by Motilal Nehru. At Wardha, the Congress Working Committee passed a resolution which condemned Fascist aggression. It said that India could not be party to a war being fought, on the face of it, for democratic freedom, while that freedom was being denied to India.

Pair 3 is correct. Faizpur session was **held in a village for the first time in India**. The Fiftieth (50th) Session of the Indian National Congress was held on 27 and 28 December 1936 at Faizpur, a village on the outskirts of Yawal Taluka of Jalgaon District of Bombay Presidency (Maharashtra). A large number of peasants participated in the session. The Faizpur Session was important for the Congress which had been raising demands for the **welfare of the peasants** and struggled for them. The Faizpur Session was also important because it was **presided over by Jawaharlal Nehru** who was at his peak of influence in the Congress.

Q.49) With reference to the views of Mahatma Gandhi and Subhash Chandra Bose, consider the following statements:

1. Unlike Gandhi, Bose was in favour of large-scale industrialization.
2. Gandhi emphasized on vocational training whereas Bose emphasized on technical and scientific education.

Which of the statements given above are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. Gandhi favored a **decentralized economy** while Bose was in favour of an **industrialized economy**. Gandhi's concept of Swaraj had its own brand of economic vision. He wanted a decentralized economy **without state control**. Gandhi dismissed both capitalism and Western socialism—the former for its exploitative excesses and the latter for its connection to industrialization. Bose considered economic freedom to be the essence of social and political freedom. He was all in **favour of modernisation** which was necessarily to be brought about by industrialization.

Statement 2 is correct. Gandhi wanted to make Indian villages self-sufficient units; he emphasized on **vocational education**. He wanted education to be in the vernacular. He advocated free and compulsory education for all boys and girls between 7 and 14 years. Subhash Bose was up for **higher education**, especially in the technical and scientific fields, as he wanted an industrial India. He said, "National Reconstruction will be possible only with the aid of science and our scientists'.

Knowledge Base: Other views -

Both Gandhi and Bose were religious men and **disliked communism**. Bose was non-communist when he supported empowerment of women, secularism and other liberal ideas. Gandhi was primarily a man of religion. He had a steadfast view on religion, and his religion was the **basis of all his other ideas**. Subhash Bose believed in **Upanishadic teachings**. He revered the Bhagavad Gita and was inspired by Vivekananda. He was also inspired by the India of the past as reinterpreted by thinkers.

Q.50) With reference to the ‘Wildlife Conservation bond’, which of the statements given below are correct?

1. The Bond was offered by the International Bank for Reconstruction and Development (IBRD).
2. The Bond aims to mobilise private capital for conservation efforts of endangered species.
3. The interest rate paid on the bond is inflation indexed to protect the interest of investors.
4. Recently, the bond was used to mobilise funds for the conservation effort of India’s one horned Rhinoceros.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 4 only
- c) 3 and 4 only
- d) 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

Wildlife Conservation Bond aims to Protect the umbrella species like the rhino and their habitats. Further the bond aims to provide environmental and social benefits to people and communities.

Statement 1 is correct: It is true that the **Wildlife conservation bond was offered by** the International Bank for Reconstruction and Development (**IBRD**), **an arm of the World Bank**.

Statement 2 is correct: Wildlife conservation bond is a first of its kind **outcome-based bond that channels private capital to finance conservation activities**. It is an Outcome based bond in the sense the bond **allots funds** to conservation effort **based on the performance i.e., increase in the population of protected species**.

Statement 3 is incorrect: **Wildlife conservation bond will not pay out any interest rate (coupon payments) to its investors**, thus this statement is incorrect. The bond **issuer will make payment to investors on maturity period** based on the increase in number of the endangered species (Black rhinos).

Statement 4 is incorrect: It is **not true that the bond was used by India** but used by **South Africa** to mobilise private investment to conserve their **Rhino species**. In fact, Wildlife conservation bond is also known as **Rhino Bond**, this bond aims at protecting and increasing **black rhino populations in two protected areas in South Africa**, the Addo Elephant National Park (AENP) and the Great Fish River Nature Reserve (GFRNR).

Source: <https://www.worldbank.org/en/news/press-release/2022/03/23/wildlife-conservation-bond-boosts-south-africa-s-efforts-to-protect-black-rhinos-and-support-local-communities>

Q.1) A series of events unfolded after British Government of India declared India's support for the World War 2 without consulting Indian opinion. In this context, arrange the following events in the correct chronological order:

1. Japan occupies Rangoon
2. August Offer proposed by the British government
3. Resignation of Congress Ministeries
4. Launch of Individual Satyagraha

Select the correct answer using the codes given below:

- a) 1-3-2-4
- b) 3-2-4-1
- c) 1-2-3-4
- d) 3-2-1-4

Ans) b

Exp) Option b is the correct answer.

On September 1, 1939, Germany attacked Poland—the action that led to the Second World War. On September 3, 1939, Britain declared war against Germany and the British Government of India declared India's support for the war without consulting Indian opinion. This culminated into the events given below. The chronology of these historical events are as follows:

Statements 3. The Congress Ministries resigned office in **November 1939** on the ground that the Viceroy on its own had made India a participant in the imperialist war without consulting the Congress.

Statement 2. August Offer (1940): The August Offer was a proposal made by the British government on **August 8, 1940**, during World War II, to give India greater self-governance, including the right to draft its own constitution, in exchange for Indian support for the war effort.

Statement 4. Individual Satyagraha: Towards the end of 1940, the Congress once again asked Gandhi to take command. Gandhiji decided to **initiate a limited satyagraha on an individual basis by a few selected individuals in every locality**. The movement **started on 17th October 1940**. The first Satyagrahi selected was Acharya Vinoba Bhave, who was sent to jail when he spoke against the war.

Statement 1: In 1942, Japan invaded Rangoon (Burma) and nominally declared the colony independent as the State of Burma on 17 May 1942.

Source) Spectrum

Q.2) Which of the following can be said to be the correct reasons for the failure of Cripps Proposal of 1942?

1. The proposal made it mandatory for independent India to join the organization of Commonwealth.
2. There was no representation of the princely states in the constituent assembly to be formed.
3. The provision of the right to provinces to secede was against national unity.
4. There was no plan for immediate transfer of power into Indian hands.

Select the correct answer using the codes given below:

- a) 1 and 2 only
- b) 3 and 4 only
- c) 1 and 4 only
- d) 2, 3 and 4 only

Ans) b

Exp) Option b is the correct answer.

In March 1942, a mission headed by Stafford Cripps was sent to India with constitutional proposals to seek Indian support for the war. Stafford Cripps was a left-wing Labourite, the leader of the House of Commons, and a member of the British War Cabinet who had actively supported the Indian national movement.

Statement 1 is incorrect: Cripps Mission proposed that Indian Union with a dominion status would be set up; it would be **free to decide its relations with the Commonwealth** and free to participate in the United Nations and other international bodies. Hence, Free India could withdraw from the Commonwealth. Therefore, it was not the reason for the failure of Cripps Mission.

Statement 2 is incorrect: The Congress objected to the proposal of **representation of the princely states by nominees** and not by elected representatives.

Statement 3 is correct: The **provision of the right to provinces to secede went against the principle of national unity**, which was an important demand of the Indian National Congress. Therefore, this can also be considered a reason for the failure of the Cripps proposal.

Statement 4 is correct: The **immediate transfer of power into Indian hands was not explicitly mentioned in the Cripps proposal**. However, it was implied that the transfer of power would be gradual, which was not acceptable to the Indian National Congress.

Knowledge Base:

The main proposals of the Crips mission were as follows:

- 1) An **Indian Union with a dominion status would be set up**; it would be free to decide its relations with the Commonwealth and free to participate in the United Nations and other international bodies.
- 2) After the end of the war, a **constituent assembly** would be convened to frame a new constitution. **Members of this assembly would be partly elected by the provincial assemblies through proportional representation and partly nominated by the princes.**
- 3) The British government **would accept the new constitution subject to two conditions:**
 - (a) any province not willing to join the Union could have a separate constitution and form a separate Union, and
 - (b) the new constitution-making body and the British government would negotiate a treaty to affect the transfer of power and to safeguard racial and religious minorities.
- 4) In the meantime, **defence of India would remain in British hands** and the governor general's powers would remain intact.

Source: Spectrum - Nationalist Response in the Wake of World War II

Q.3) What were the conditions laid down by Indian National Congress to cooperate with the British government, to defend Indian territory in the midst of Japan's aggressive actions in 1941?

1. Establishment of rule of people in the princely states
2. Full independence to be given after the war
3. No bifurcation of Indian Union in any scenario
4. Substance of power be transferred immediately.

Select the correct answer using the codes given below:

- a) 1 and 2 only
- b) 1, 3 and 4 only
- c) 2 and 4 only
- d) 2, 3 and 4 only

Ans) c

Exp) Option c is the correct answer.

Option 2 and 4 are correct: The Congress leaders, released in December 1941, in the midst of Japan's aggressive actions, were anxious to defend Indian territory and go to the aid of the Allies. The **Congress Working Committee passed a resolution** offering to cooperate with the government in the defence of India, if:

- (a) full independence was given after the war, and

(b) substance of power was transferred immediately.

Option 1 and 3 are incorrect: Establishment of the rule of people in the princely states and no bifurcation of Indian Union in any scenario **were not explicitly mentioned as one of the conditions by the Indian National Congress during World War II.**

Source: Spectrum

Q.4) With reference to 'August Offer', consider the following statements:

1. It provided for expansion of viceroy's executive council with majority of Indians.
2. It proposed that no future constitution to be adopted without the consent of minorities.
3. Indian National Congress rejected the offer as it did not offer complete independence to India.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The August Offer was a proposal made by the British government in August 1940, during World War II, as a response to the growing demands for Indian independence. The offer was made by the British Prime Minister, Winston Churchill, in a speech broadcasted to the Indian people.

Statement 1 is correct: The **August Offer proposed to expand the Viceroy's Executive Council and to include more Indians in the council**, with a majority of Indians. This was seen as a significant step towards Indian participation in the governance of the country.

Statement 2 is correct: The August Offer proposed a constitution to be framed mainly by Indians. Also, it proposed that no future **constitution to be adopted without the consent of minorities**. The Muslim League welcomed the veto assurance given to the League, and reiterated its position that partition was the only solution to the deadlock.

Statement 3 is correct: The Indian National Congress **rejected the August Offer as it did not offer complete independence to India**. The Congress demanded that India be granted complete independence immediately and that there should be no delay in the transfer of power from the British to the Indian people.

Source: Spectrum- Nationalist Response in the Wake of World War II

Q.5) With reference to the Wildlife Protection Amendment Act, 2022, consider the following statements:

1. It introduced a new Schedule to include the flora and fauna listed under CITES agreement, into the Wildlife Protection Act.
2. It provides compensation for the person who voluntarily surrenders his/her captive animals to the Chief Wildlife Warden.
3. It prohibits the usage of any animals mentioned in the schedule I of this act for any religious purposes.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 only
- d) 2 and 3 only

Ans) a

Exp) Option a is the correct answer.

The Wildlife (Protection) Amendment Act 2022 amends the Wildlife Protection Act (WLPA), 1972 to incorporate more species protected under the law. This amendment act raised serious concerns and objections among wildlife activists. The Act will come into force from April 1, 2023.

Statement 1 is correct: It is true that Wildlife Protection Amendment Act, 2022 introduces a **new schedule for species listed in the Appendices** under CITES. Under CITES, plant and animal specimens are classified into three categories (Appendices) based on the threat to extinction.

Statement 2 is incorrect: The Amendment act provides for **any person to voluntarily surrender any captive animals** or animal products to the Chief Wildlife Warden, but **no compensation will be paid to the person** for surrendering such items. The surrendered items become property of the state government.

Statement 3 is incorrect: The Wildlife Protection **Amendment act, 2022 permits elephants (Schedule I animal) to be used for 'religious or any other purpose**. The new act amended Section 43 which permitted the use of elephants for religious or any other purposes. The act allows for the transfer or transport of captive elephants for religious or other purposes by individuals possessing valid ownership certificates,

<https://prsindia.org/billtrack/the-wild-life-protection-amendment-bill-2021>

Q.6) With reference to 'Forward Bloc', consider the following statements:

1. It was established in 1939 within the framework of Indian National Congress.
2. H. V Kamath became the first general secretary of the bloc.
3. The ideology of the bloc was influenced by socialism and anti-imperialism.
4. The bloc was dismantled after the passage of Indian Independence Act of 1947.

Which of the statements given above are correct?

- a) 1 and 4 only
- b) 1, 2 and 3 only
- c) 2 and 3 only
- d) 3 and 4 only

Ans) b

Exp) Option b is the correct answer.

The Forward Bloc was a political party formed within the Indian National Congress in 1939 by Subhas Chandra Bose, who was then the President of the Congress. Bose formed the Forward Bloc in protest against the policies of the Congress leadership, particularly their opposition to direct action to achieve Indian independence.

Statement 1 is correct: The Forward Bloc was **established within the framework of the Indian National Congress in 1939 by Subhas Chandra Bose**. Bose formed the Forward Bloc in protest against the policies of the Congress leadership, particularly their opposition to direct action to achieve Indian independence.

Statement 2 is correct: H. V. Kamath, a prominent journalist and politician, was one of the founding members of the Forward Bloc and became its first general secretary. Bose was elected as its first president.

Statement 3 is correct: Bose, after resigning from the post of Congress president in April 1939, had decided to form a bloc within the party to **consolidate Left and socialist-minded leaders** under one platform. The ideology of the Forward Bloc was based on **socialism and anti-imperialism**. The party aimed to achieve complete independence for India through revolutionary means, including mass mobilization and civil disobedience. The party also advocated for the rights of workers, peasants, and other marginalized sections of society.

Statement 4 is incorrect: The Forward Bloc was not dismantled after the passage of the Indian Independence Act of 1947. Although the party faced many challenges, including the arrest and

imprisonment of many of its leaders, it continued to exist as a separate political entity even after India's independence in 1947. The party was later renamed as **All India Forward Bloc (AIFB)** – a socialist, political organisation. Over the years, the **AIFB became a constituent of the CPI(M)**-led Left Front, losing its independent identity. Currently, the AIFB has just a handful of panchayat members in some of the pockets of West Bengal.

<https://forwardbloc.org/>

Q.7) The Plan of Cripps Mission was different from other constitutional schemes proposed under British rule because:

- for the first time, the mission explicitly mentioned that the goal of the British is to establish a responsible government in India.
- the mission recognised Pakistan as a Separate nation.
- the mission promised Indians the sole right to make their own Constitution.
- the mission promised complete independence for India in return for its support in World War II.

Ans) c

Exp) Option c is the correct answer.

The British Government in **1942** sent a **mission headed by Stafford Cripps** (known as Cripps Mission) to India with constitutional proposals **to seek Indian support for the war**. Stafford Cripps was a left-wing Labourite, the leader of the House of Commons and a member of the British War Cabinet who had actively supported the Indian national movement.

Option a is incorrect: Even before the Cripps Mission, 1942, the **August Declaration of 1917** for the **first time** explicitly stated that the goal of the British is to establish a **responsible government in India**. The declaration was announced by the Secretary of State for India, Edwin Samuel Montagu in **August 1917**. **The declaration stated that an** increasing participation of Indians in every branch of administration and gradual development of self-governing institutions for progressive realisation of responsible government in India as an integral part of the British Empire.

Option b is incorrect: **The Cripps Mission did not recognise Pakistan as a separate nation**. The Muslim League rejected the Cripps Mission 1942 because the mission did not recognize Pakistan and presented the idea of a single Indian Union. However, the mission provided an **option to Provinces to have a separate constitution which was considered a blueprint for India's partition**

Option c is correct: It is true that the Cripps Mission promised Indians the sole right to make their own constitution. Although the British acknowledged India's demand for a Constituent Assembly in 1940 (August offer) itself, it was the Cripps mission which granted Indians the sole right to frame their own constitution **by promising party elected and partly nominated (by Princely states) Constitutional Assembly for India**. Hence it is correct to say that the Cripps Mission granted Indians the sole right to frame their own constitution.

Option d is incorrect: The Cripps Mission **did not promise complete Independence** for India after World War II, rather it **promised dominion status to India**. The **Congress rejected Cripps Mission** because of the offer of dominion status by the British Government, instead of a provision for complete independence.

Source: Spectrum - Nationalist Response in the Wake of World War II

Q.8) Which of the following statements is/are correct with respect to the “Quit India Resolution”?

1. The resolution was first proposed by Yusuf Meherally, a socialist and trade unionist.
2. The resolution stated that the Quit India Movement was a ‘Leaderless Movement’.
3. The resolution proposed to form a provisional Government of India after British withdrawal.

Select the correct answer using the codes given below:

- a) 1 and 3 only
- b) 2 only
- c) 2 and 3 only
- d) 3 only

Ans) d

Exp) Option d is the correct answer.

After the failure of the Cripps Mission, the advances of the Japanese in South-East Asia and the general frustration with the British in India, Gandhiji decided to utilise this opportunity to launch a national movement which called for a voluntary British withdrawal from India. The movement is known famously as Quit India movement.

Statement 1 is incorrect: The Quit India resolution was **proposed by Jawaharlal Nehru and seconded by Sardar Patel** and was ratified at the **Congress meeting at Gowalia Tank, Bombay, on August 8, 1942.**

Yusuf Meherally, a socialist and trade unionist and Mayor of Mumbai, coined the **slogan Quit India.**

Statement 2 is incorrect: The Quit India resolution accepted **Gandhi as the leader of the struggle**, thus the resolution proposed the Quit India movement as leaderless movement is not correct. On **9 August 1942**, **Gandhi**, members of the Congress Working Committee and other Congress leaders were **arrested by the British Government under the Defence of India Rules.** People took their movement in their own hands and devised a freedom struggle in their own ways.

Statement 3 is correct: It is true that the Quit India resolution proposed to form a **Provisional Government of India after British withdrawal.** Further the resolution declared a commitment of free India to defend itself against all types of fascism and imperialism.

Q.9) With reference Krishak Praja Party (KPP), consider the following statements:

1. The party was founded by Fazlul Huq.
2. The party tried to defend the rights of landless peasants in Bengal Province.
3. The party formed a coalition Government with Indian National Congress in Bengal after the 1937 elections.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Krishak Praja Party (KPP) was a major political party with considerable influence during the late 1930s and early 1940s in Bengal province (modern West Bengal & Bangladesh). **KPP was founded in 1936** as a separate party by disassociating itself from **Nikhil Banga Praja Samiti (All Bengal Tenants’ Association).**

Statement 1 is correct: The **Nikhil Banga Praja Samiti** was formed in 1929 with **Sir Abdur Rahim** as its president and **Ak Fazlul Huq** as one of the vice presidents. Following the rivalries between West Bengal group led by Khan Bahadur and East Bengal group led by Fazlul Huq in Nikhil Banga Praja party, **Fazlul Huq established the Krishak Praja Party (KPP) at Dhaka in 1936.**

Statement 2 is correct: The **Krishak Praja Party (KPP) tried to defend the rights of landless peasants against landholders in Bengal province.** Further the KPP programme included abolition of the zamindari system, making peasants the absolute proprietors of land, reduction of rent rate etc. Due to the non-communal approach of Fazlul Huq, he commanded support from the scheduled caste Hindu peasantry as well in Bengal province.

Statement 3 is incorrect: The Krishak Praja Party election manifesto for Bengal legislative election in 1937 was Dal-Bhat (pulse and rice) for all. KPP emerged as the third biggest party after Congress and Muslim league. **The KPP formed a coalition ministry** with the support and participation of the **Muslim League (not Indian National Congress)** and some other smaller groups and independent members.

Source: https://en.banglapedia.org/index.php/Krishak_Praja_Party

Q.10) With reference to Fly Ash, consider the following statements:

1. The Supreme Court has recently directed the Central Government to constitute a 'Fly Ash Management and Utilisation Mission'.
2. The Fly ash notification, 2021 has introduced penalty for non-compliance with fly ash rules by thermal power plants.
3. The Union Government recently mandated 100% fly ash utilisation by all the existing Thermal Power Plants in India.
4. The Fly ash notification, 2021 provides for mandatory usage of fly ash in the construction of public as well as private buildings within 300 km radius of thermal power plants.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 4 only
- c) 4 only
- d) 1, 3 and 4 only

Ans) b

Exp) Option b is the correct answer.

Fly ash is the fine powder resulting from the combustion of coal and is transported from the combustion chamber by exhaust gases. It consists of the non-combustible carbon that remains from incomplete combustion. Recently the Union Ministry of Environment, Forests and Climate Change (MoEFCC) has released notification on fly ash utilisation.

Statement 1 is incorrect: To streamline the monitoring and coordination of all issues regarding the handling and disposal of fly ash in Uttar Pradesh and Madhya Pradesh, the **National Green Tribunal (and not the Supreme Court) tribunal directed the Centre to constitute a 'Fly Ash Management and Utilisation**

Mission' comprising of secretaries from the ministries of environment, coal and power and the chief secretaries of the two states. The Mission's primary goal will be to 'coordinate and monitor issues relating to the handling and disposal of fly ash and associated issues.' However, the jurisdiction of the mission is currently limited to Madhya Pradesh and Uttar Pradesh – it should be expanded to states like Odisha, Chhattisgarh and Tamil Nadu as well, which have reported the most incidents of ash pond failure.

Statement 2 is correct: It is true that the new **Fly Ash utilisation notification,2021** was released under the **Environment Protection Act,1986**. The new notification **introduced a penalty regime for non-compliance for the first time**. The penalty regime was based on the Polluter Pay principle. Under new rules, the non-compliant power plants will be imposed with an environmental compensation of Rs 1,000 per tonne for unutilized ash during the end of every financial year.

Statement 3 is incorrect: The New Fly Ash notification released in 2021 **mandated 100% fly ash utilisation target for only new Thermal Power Plants (TPPs)** (established on or after the publication of fly ash rules,2021). These new TPPs are given a transition time period of 4 years to achieve 100 percent fly ash utilisation target.

Statement 4 is correct: The New Fly Ash utilisation **rules 2021 provides for mandatory usage of fly ash-based construction material for both public and private constructions** lying within a radius of 300 Kms from coal or lignite based TPPs.

Q.11) During the Quit India Movement, a parallel government was established in Satara region of Maharashtra. In this context, which of the following statements are correct?

1. Nana Patil played an instrumental role in establishing a parallel government in Satara.
2. This government conducted “Gandhi marriages” to which untouchables were invited.

Which of the statements given above are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

During the course of the Quit India Movement many parallel governments were launched by Indian nationalist to administer their own affairs. In following places, the parallel governments had been set up, Satara in Maharashtra, Midnapore in Bengal, Bhagalpur in Bihar, Ballia in Uttar Pradesh and Basudevpur in Odisha.

Statement 1 is correct: Satara parallel government was established in the name of **Prati Sarkar** and was active from **1943 to 1945**. Some of the prominent **leaders** associated with the Satara Parallel Government are **Nana Patil, and Y.B. Chavan**.

Statement 2 is correct: The Satara Government conducted **Gandhi marriages which was a frugal style of marriage, and to which so called untouchables were invited**. **Nana Patil**, the important leader of Satara Parallel Government, was influenced by Mahatma Phule's Satyashodhak ideology. He worked towards social reform through various means like establishing the frugal style of marriage ceremonies in Satara.

Q.12) Which of the following were the proposals of the Wavell Plan?

1. It provided for the Executive Council in which all the members, except Governor General and Commander in Chief, were to be Indians.
2. It made the Central Executive Council responsible to the Central Legislative Assembly.
3. The Governor General's Executive Council was to function within the framework of the 1935 Act.
4. It provided for equal representation of caste Hindus and Muslims in the Governor General's Executive Council.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1, 3 and 4 only
- c) 2 and 4 only
- d) 1, 2, 3 and 4

Ans) b

Exp) Option b is the correct answer.

The **Wavell Plan** was initially introduced in 1945 at the Shimla Conference. The Shimla Conference was held in order to reach an agreement on the Wavell Plan for Indian self-government. However, the plan failed to take effect because of a disagreement between the Muslim League and the Indian National Congress to reach an agreement.

Statement 1 is correct: The Wavell plan intended to reconstruct the governor-general's executive council till the establishment of a new constitution. The plan provided for an **executive council in which all members except the governor-general and the commander-in-chief, were to be Indians**.

Statement 2 is incorrect: The Wavell plan **did not recommend for making the Central executive council responsible to the Central legislative assembly**. Further the Plan placed **defence of India** in the hands of a British authority till Power was transferred to the Indian hands.

Statement 3 is correct: The reconstructed council was to function as an interim government within the framework of the 1935 Act.

Statement 4 is correct: It is true that the Wavell plan provided for **equal representation of caste Hindus and Muslims in the Governor General's executive council**. Further other minorities represented in the Council include depressed classes, Sikhs, Christians.

Q.13) Consider the following statements with reference to the Freedom Army (Mukti Sena):

1. The Freedom Army was formed with the help of Hitler.
2. It consisted of Prisoners of War of Indian origin captured by Germany and Italy.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Subhash Chandra Bose was an Indian nationalist leader who fought against British colonial rule in India during the 1930s and 1940s. He was born on January 23, 1897, in Cuttack, Odisha, India. He was also known as Netaji ("Respected Leader") and was one of the most prominent leaders of the Indian independence movement.

Statement 1 is correct: Subhash Chandra Bose had left India "to supplement from outside the struggle going on at home". He was reported to have approached Russia for help in the Indian struggle for freedom from Britain. But, in June 1941, Russia joined the Allies in the war, which disappointed Bose. He then went to Germany. Bose met Hitler under the pseudo name, Orlando Mazzotta. **With the help of Hitler, the 'Freedom Army' (Mukti Sena) was formed.**

Statements 2 is correct: The Freedom Army consisted of **all the prisoners of war of Indian origin captured by Germany and Italy. Dresden, Germany was made the office of the Freedom Army.** Bose came to be called 'Netaji' by the people of Germany. Subhash Chandra Bose gave the famous slogan, 'Jai Hind' from the Free India Centre, Germany. SC Bose began regular broadcasts from Berlin radio in January 1942, which enthused Indians.

Source: Page no.457, Chapter 23 Quit India Movement, Demand for Pakistan and the INA - Spectrum

Q.14) Consider the following statements with reference to the objections raised over C. Rajagopalachari (CR) Formula:

1. Mahatma Gandhi strongly condemned the Plan as it demanded for partition of India.
2. Mohammed Ali Jinnah condemned the plan as it provided for all sections of people to vote in plebiscite in North-West and North-East India.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

During Indian national Movement (INM), Various efforts were made to solve the constitutional crisis. In fact, some individuals also tried to come up with constitutional proposals. For example, C. Rajagopalachari

(CR), the veteran Congress leader, prepared a formula for Congress-League cooperation in 1944. The main objections raised against it included as follows:

Statement 1 is incorrect: Mahatma Gandhi supported the C. Rajagopalachari formula. However, some sections of nationalist leaders opposed it. For example, Vir Savarkar, a Hindu leader condemned the CR Plan.

Statement 2 is correct: Mohammed Ali Jinnah opposed the plan as he **wanted the Congress to accept the Two Nation Theory**. Secondly, he **wanted only the Muslims of North-West and North-East to vote in the plebiscite** and not the entire population. Thirdly, he also opposed the idea of a common Centre.

Knowledge Base:

C. Rajagopalachari (CR) Plan:

- 1) Muslim League to endorse Congress demand for Independence
- 2) League to cooperate with Congress in forming a provisional government at centre.
- 3) After the end of the war, the entire population of Muslim majority areas in the North-West and North-East India to decide by a plebiscite, whether or not to form a separate sovereign state.
- 4) In case of acceptance of partition, agreement to be made jointly for safeguarding defence, commerce, communications, etc.
- 5) The above terms to be operative only if England transferred full powers to India

Source: Page 454, Chapter 23 Quit India Movement, Demand for Pakistan and the INA - Spectrum

Q.15) Which of the following can be considered as the causes of land subsidence in Joshi-Math town in Uttarakhand?

1. Overexploitation of Groundwater in the region.
2. Overexploitation of minerals in Joshimath region.
3. Location of town on the transformative plate boundary.
4. Lack of stormwater drainage system in the region.
5. Geological base of Joshimath is composed majorly of heavy rocks.

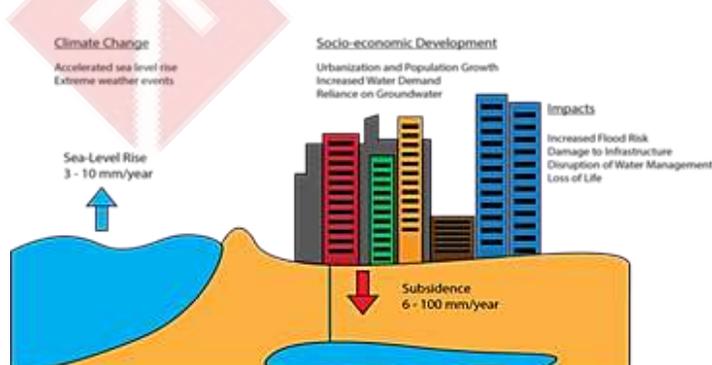

Select the correct answer using the code given below:

- a) 1, 2, 3 and 4 only
- b) 1, 3 and 5 only
- c) 1, 2 and 4 only
- d) 1, 2, 4 and 5 only

Ans) c

Exp) Option c is the correct answer.

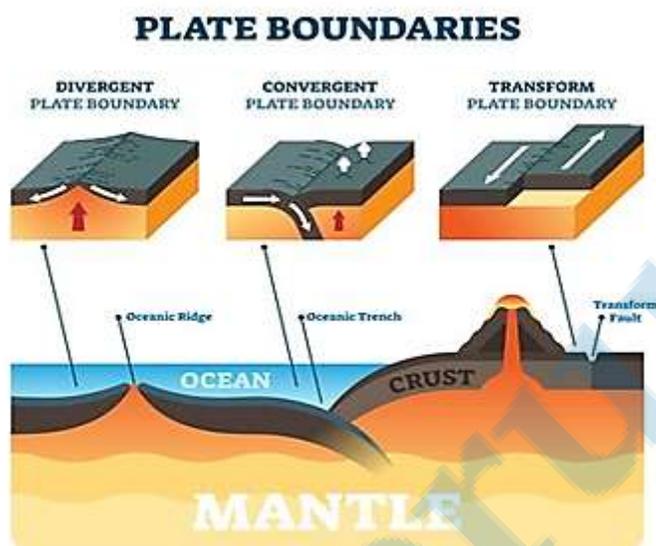

Land subsidence is a gradual settling or **sudden sinking of the Earth's surface** due to removal or displacement of subsurface earth materials. Recently **Joshimath town in Chamoli district in Uttarakhand** has been declared as a landslide and subsidence-hit zone.

Option 1 is correct: Overexploitation of groundwater in Joshimath town is one of the **causes of Land subsidence** in this region. The US geological survey states that more than 80% of land subsidence across the world is caused due to excessive extraction of groundwater and it is one of the reasons attributed to land subsidence in Joshimath. For instance, the **Tapovan Vishnugad Hydro Power Project** which punctured aquifer led to the drying of water resources in the area and resulted in land subsidence in Joshimath.

Option 2 is correct: Land subsidence has also been caused due to the **extraction of natural resources** such as oil, natural gas, or other mineral resources **out of the Earth's ground** by pumping, fracking, or mining activities. River-bed sandmining is considered as one of the reasons for land subsidence in Joshimath region.

Option 3 is incorrect: Location of town on the convergent plate boundary, not transformative plate (convergence of India - Eurasia plate near Himalayan region) is attributed as one of the reasons for land subsidence in Joshimath. Location of Joshimath town along the convergent plate boundary make this region prone to **seismic activity**, which induces landslides and land subsidence in the region.

Option 4 is correct: Lack of storm water drainage is considered one of the reasons for land subsidence in Joshi math. Due to the lack of drainage system in Joshimath, natural and anthropogenic liquid waste seeps into the ground and **weakens the land** which accelerates the process of land subsidence.

Option 5 is incorrect: Geological base of the **Joshimath composed majorly of sand and stone and absence of rocks** makes the region more **vulnerable** to the event of land subsidence. Hence the geological base of region composed majorly of rocks is one of the reasons for land subsidence in Joshimath is not correct.

Source: <https://www.usgs.gov/mission-areas/water-resources/science/land-subsidence#:~:text=Land%20subsidence%20is%20a%20gradual,drainage%20of%20organic%20soils>

https://www.orfonline.org/wp-content/uploads/2023/02/ORF_IB_616_Lessons-from-Joshimath-Need-for-Himalayan-Development-Model.pdf

Q.16) Consider the following statements with reference to the Cabinet Mission Plan of 1946:

1. It provided for a common centre which would control defence, communication and external affairs.
2. It accepted the demand for a full-fledged Pakistan.
3. It proposed that all the members of Constituent Assembly were to be elected directly by the people on the basis of Universal Adult Franchise.
4. Under the plan, the residuary powers were to be enjoyed by the Provincial Governments.

Which of the statements given above are correct?

- a) 1, 2 and 4 only
- b) 1 and 4 only
- c) 2, 3 and 4 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

The Attlee government announced in February 1946 the decision to send a high-powered mission of three British cabinet members (**Pethick Lawrence**, Secretary of State for India; **Stafford Cripps**, and **A.V. Alexander**) to India to find out ways and means for a negotiated, peaceful transfer of power to India. **Pethick Lawrence was the chairman** of the mission. The important recommendations of the Cabinet Mission Plan were as follows:

Statement 1 is correct: The Cabinet Mission **recommended a common centre to control defence, communication and external affairs**. A federal structure was envisaged for India.

Statement 2 is incorrect: Cabinet mission had rejected the demand for a full-fledged Pakistan, because
 1) the Pakistan so formed would include a large non-Muslim population of 38 per cent in the North-West and 48 per cent in the North-East.

2) deep-seated regional ties would be disturbed if Bengal and Punjab were partitioned.

3) partition would entail economic and administrative problems, for instance, the problem of communication between the western and eastern parts of Pakistan.

The division of the armed forces would be dangerous.

Statement 3 is incorrect: It proposed a constituent assembly to be elected by provincial assemblies by proportional representation (voting in three groups—General, Muslims, Sikhs). This **constituent assembly would be a 389-member body** with provincial assemblies sending 292, chief commissioner's provinces sending 4, and Princely states sending 93 members through nomination.

Statement 4 is correct: Under the Cabinet Mission Plan, the **residuary powers were to be enjoyed by Provincial Governments**.

Knowledge Base:

Other Provisions of Cabinet Mission Plan are as follows:

Grouping of existing provincial assemblies into three sections:

(a) Section-A: Madras, Bombay, Central Provinces, United Provinces, Bihar and Orissa (Hindu-majority provinces)

(b) Section-B: Punjab, North-West Frontier Province and Sindh (Muslim-majority provinces)

(c) Section-C: Bengal and Assam (Muslim-majority provinces).

1) In the constituent assembly, members from groups A, B and C were to sit separately to decide the constitution for provinces and if possible, for the groups also. Then, the whole constituent assembly (all three sections A, B and C combined) would sit together to formulate the union constitution

2) Three-tier executive and legislature at provincial, section and union levels.

3) Communal questions in the central legislature were to be decided by a simple majority of both communities present and voting.

4) Princely states were no longer to be under paramountcy of the British government. They would be free to enter into an arrangement with successor governments or the British government.

5) After the first general elections, a province was to be free to come out of a group and after 10 years, a province was to be free to call for a reconsideration of the group or the union constitution.

6) Meanwhile, an interim government was to be formed from the constituent assembly.

Source: page 474- chapter 24 - Post-War National Scenario of Spectrum

Q.17) With reference to the Indian Nation Congress Sessions, consider the following events:

1. Haripura Session
2. Tripuri Session
3. Belgaum Session
4. Faizpur Session

What is the correct chronological sequence of the occurrence of the above-mentioned Sessions of Congress?

- a) 3-2-1-4
- b) 3-1-2-4
- c) 3-4-1-2
- d) 4-3-2-1

Ans) c

Exp) Option c is the correct answer.

The Indian National Congress was founded at Bombay in December 1885. W.C. Bannerjee Was the first President. In an effort to reach all regions, it was decided to rotate the Congress session among different parts of the country. The President belonged to a region other than where the Congress session was being held.

3- The Belgaum Session took place in **1924** and was presided by Mahatma Gandhi. It is the **only INC Session presided over by Mahatma Gandhi.**

4- Faizpur Session took place in **1936** and presided by Jawaharlal Nehru. It was the **first INC Session to be held in a village.**

1- Haripura Session took place in **1938** and was presided by Subhash Chandra Bose. Bose also talked of economic development of the country through planning and was instrumental in setting up a **National Planning Committee** later (set up under Jawahar Lal Nehru). The session adopted a resolution that the Congress would give **moral support** to those who were **agitating against the governance in the princely states.**

2- Tripuri Session took place in **1939** and was presided by Subhash Chandra Bose. In this Session, **Subash Chandra Bose** was re-elected but had to **resign**. Later, **Rajendra Prasad** was appointed in his place.

Knowledge Base: Tripuri Session

In January 1939, Subhash Bose decided to stand again for the president's post in the Congress. Gandhi was not happy with Bose's candidature. Sardar Patel, Rajendra Prasad, J.B. Kripalani favoured the candidate supported by Gandhi, namely, Pattabhi Sitaramayya. Subhash Bose won the election.

In May 1939, Bose and his followers formed the Forward Bloc (at Makur, Unnao) as a new party within the Congress. But when he gave a call for an all-India protest on July 9 against an AICC resolution, the Congress Working Committee took disciplinary action against Bose. He was debarred from holding any elective office in the Congress for a period of three years.

Source: A Brief History of Modern India by Rajiv Ahir 2019 Edition - Chapter 17 Emergence of Swarajists, Socialist Ideas, Revolutionary Activities and Other New Forces P 343, Chapter 20 Debates on the Future Strategy after Civil Disobedience Movement P 409, Chapter 22 Nationalist Response in the Wake of World War II P 417-420.

Q.18) With reference to Indian National Army (INA), consider the following statements:

1. It was placed under the 'Indian Independence League'.
2. INA formed the Provisional Government for Free India at Rangoon, Myanmar.
3. Shah Nawaz commanded the INA battalion in the Imphal campaign.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 3 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) c

Exp) Option c is the correct answer.

The idea of creating an army out of the Indian prisoners of war (POWs) was originally that of Mohan Singh, an Indian army officer who had decided not to join the retreating British army in Malaya. He decided to turn to the Japanese for help. The Japanese had till then encouraged Indian civilians to form anti-British organisations. Mohan Singh asked for Indian prisoners of war.

Statement 1 is correct: After being founded, and before being commanded by Bose, the INA was placed under an organisation called the Indian Independence League, founded by Rash Behari Bose, an Indian revolutionary living in exile in Japan. He was also working towards recruiting Indian PoW soldiers for fighting for Indian independence.

Statement 2 is incorrect: On October 21, 1943, Subhash Bose formed the Provisional Government for Free India at Singapore with H.C. Chatterjee (Finance portfolio), M.A. Aiyar (Broadcasting), Lakshmi Swaminathan (Women Department), etc. The famous slogan “Give me blood, I will give you freedom” was given in Malaya. This provisional government declared war on Britain and the United States and was recognised by the Axis powers.

Statement 3 is correct: One INA battalion commanded by Shah Nawaz was allowed to accompany the Japanese Army to the Indo-Burma front and participate in the Imphal campaign. However, the Indians received discriminatory treatment from the Japanese, which included being denied rations and arms and being made to do menial work for the Japanese units, and this disgusted and demoralised the INA units.

Source: Page 459, chapter 23- Quit India Movement, Demand for Pakistan of spectrum

Q.19) Consider the following statements regarding the ‘Pakistan Resolution’ of 1940:

1. It was passed in the Lahore Session of the Muslim League.
2. This resolution provided for creation of a separate Nation consisting of Muslim majority provinces to be called as ‘Pakistan’.

Which of the statements given above is/ are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

The ‘Pakistan Resolution’ passed on March 24, 1940 by the All-India Muslim League. The Resolution was moved in the session by the then Chief Minister of undivided Bengal A.K. Fazl ul Huq.

Statement 1 is correct: The Pakistan Resolution of 1940 was passed in a three-day session of Muslim League in Lahore. It is formally known as the ‘Lahore Resolution’ (1940). Mohammad Ali Jinnah explained how Hindus and Muslims cannot co-exist peacefully. The resolution stated that no constitutional plan will be accepted by the Muslims until geographical units are demarcated, so as to constitute independent states.

Statement 2 is incorrect: The resolution rejected the proposal of a ‘United India’ and recommended the creation of a separate state for the Muslims. According to the resolution, the new state should comprise

of Muslims from regions like North-West Frontier Province, Punjab, Bengal, Assam, Sindh, and Baluchistan. **However, this resolution has no mention of ‘Pakistan’.** In other words, the word ‘Pakistan’ was not mentioned in this resolution. Media and some Hindu Leaders started calling it as ‘Pakistan Resolution’. The resolution called for **“grouping of all geographically contiguous Muslim majority areas (mainly north-western and eastern India) into independent states in which the constituent units shall be autonomous and sovereign, and adequate safeguards to Muslims in other areas where they are in a minority”.** This led to **varied interpretations of Lahore Resolution/ Pakistan Resolution.** Some interpreted the resolution as a demand for two distinctive countries, whereas others argued that the words ‘independent states’ referred to the liberation of Muslim-dominated provinces, such as Punjab and Sindh, which would be autonomous and sovereign.

Knowledge Base: The ‘Pakistan Resolution’ holds great significance in Pakistan’s history. In 1941, the resolution was **made a part of the constitution, framed by ‘All India Muslim League’.** It was said that the resolution was a decisive step towards finding cultural, economic, social, and political future for the Muslim populace in British India. **A monument called ‘Minar-e-Pakistan’ stands at Lahore to commemorate the famous resolution. March 23 is observed as a national holiday in Pakistan to celebrate their Republic Day and to commemorate the ‘Lahore Resolution’,** often called as Pakistan Resolution.

Spectrum’s a Brief History of Modern India (Page 507, Chapter 24)

Q.20) Which of the following statements are correct regarding “Galathea National Park” recently seen in the news?

1. The park is spread over the region of Great Rann of Kutch.
2. The park is the nesting site for the world’s largest turtle called leatherback turtle.
3. Recently the National Board for Wildlife (NBWL) chose this park as an ideal place to introduce Asiatic lions.

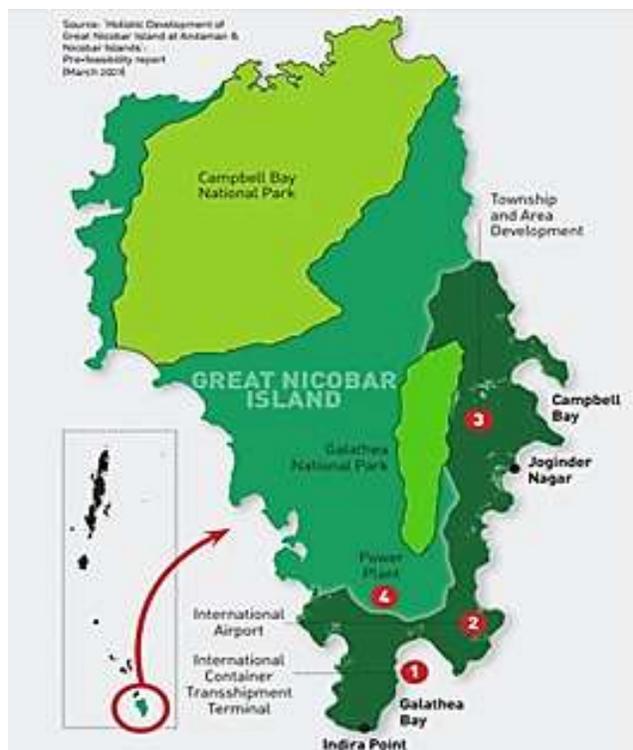

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is incorrect: Galathea National Park is located in the Union Territory of Andaman and Nicobar Islands. It is located on the island of **Great Nicobar** in the Nicobar Islands in the Bay of Bengal, whereas Rann of Kutch is located in the state of Gujarat, in the Arabian Sea.

Statement 2 is correct: It is true that Galathea National Park is the **nesting site for the world's largest turtle called leatherback turtle**. Further the notable animal species found in the park are giant robber crab, megapode and Nicobar pigeon.

Statement 3 is incorrect: Recently **Galathea Bay** (an area surrounding Galathea NP) was in news due to National Board for Wildlife (NBWL)'s decision to **de-notify entire Galathea Bay** for implementing the Ministry of Ports, Shipping, and Waterways project called **International Container Trans-shipment Port (ICTP)** at Great Nicobar Islands. The National Park has not been chosen for the introducing Asiatic lion.
Source: <https://www.hindustantimes.com/environment/denotify-turtle-nesting-site-in-andaman-for-shipment-project-wildlife-board-101611807608329.html>

Q.21) Who among the following has founded the Indian Club of Tokyo?

- Mohan Singh
- Subhash Chandra Bose
- Shah Nawaz
- Rashbehari Bose

Ans) d

Exp) Option d is the correct answer.

Rashbehari Bose founded the Indian Club of Tokyo and gave lectures on the **evils of Western imperialism**. He had also founded **Indian Independence League** in Tokyo in 1942 of which he was an elected President. Rashbehari Bose was a revolutionary activist. Rashbehari Bose (and Sachin Sanyal) staged a **bomb attack on Viceroy Hardinge** in 1912 while he was making his official entry into the new capital of Delhi in a procession through Chandni Chowk. However, he evaded the arrest. Rashbehari Bose was also involved in the **Ghadr Revolution**. As the plan for revolution did not succeed, Rashbehari Bose **escaped to Japan in 1915 and was living in Japan since then as a fugitive**. He made a lot of effort in getting the Japanese interested in the Indian independence movement.

Source: Spectrum's a Brief History of Modern India (Page 477, Chapter 23)

Q.22) Consider the following statements regarding the Indian National Army (INA):

1. It was first formed in 1942 by Subhash Chandra Bose.
2. It had different regiments named after Gandhi, Nehru and Maulana Azad.
3. It had an all women regiment headed by Rani Lakshmibai Rajwade.
4. It had participated in Operation U-Go against the British.

Which of the statements given above are correct?

- a) 1, 2 and 3 only
- b) 2 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2 and 4 only

Ans) b

Exp) Option b is the correct answer.

The Indian National Army (INA), **also known as Azad Hind Fauj**, was an armed force formed by Indian nationalists. It had patronage of Imperial Japanese Army. It's more important objective was to secure India's independence. **The army was declared as the army of Arzi Hukumat-e-Azad Hind which is the provisional government of free India.**

Statement 1 is incorrect: INA was originally formed in 1942 by Captain Mohan Singh in Singapore in **September 1942** with Japan's Indian Prisoners of War (POWs). Rashbehari Bose also supported the formation of INA. But disagreements between Mohan Singh and Japanese army command regarding the autonomy of the Indian National Army led to the disbandment of the first INA in December 1942. **Mohan Singh recommended Subhas Chandra Bose as the leader of the INA. Hence, in 1943 INA was revived by Subhash Chandra Bose.**

Statement 2 is correct: Netaji Subhash Chandra Bose had named **brigades/ regiments after Gandhi, Nehru, Maulana Azad, and himself**. There was also an all-women regiment named after **Rani of Jhansi, Lakshmibai**.

Statement 3 is incorrect: Bose had a very progressive approach for women. In 1943, he called on women to serve in INA. He formed a women's regiment and named it as Rani of Jhansi Regiment. It was commanded by Captain Lakshmi Sehgal. Bose insisted that there should be a separate Planning Commission for women when he set up the Planning Commission in 1938. This commission was chaired by Rani Lakshmi Bai Rajawade and was to deal with the role of women in planned economy in future India.

Statement 4 is correct: Operation U-Go (1944) was launched by Japan against the British India. INA, under the leadership of Bose, had supported and participated the Japanese campaign (Operation U-Go) against the British forces in the Indian regions.

Q.23) Consider the following statements regarding the National Planning Committee (NPC), established in 1938:

1. Subhash Chandra Bose was appointed as the first Chairman of this Committee.
2. N.M. Joshi was one of the members of the Committee.

Which of the statements given above is/ are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

In 1938, **Subhash Chandra Bose was appointed as the Chairperson of Congress' Haripura session** of Indian National Congress (INC). His chairmanship marks important events like establishing of National Planning Committee.

Statement 1 is incorrect: Jawaharlal Nehru was appointed as the first Chairman of this Committee in 1938. Other important members were Sir M. Visveswaraya, Sir Puruhottamdas Thakurdas, Dr. Megh Nad Saha etc.

Statement 2 is correct: The committee was represented by various industrialists- **Sir Purshottamdas Thakurdas, A.D. Shroff, Walchand Hirachand and Ambalal Sarabhai**. Trade union leader **N.M. Joshi** was also a member of this Committee.

Source: <https://indianculture.gov.in/reports-proceedings/report-national-planning-committee-1938>

Q.24) Consider the following statements regarding Punnapra-Vayalar Uprising of 1946:

1. It was a tribal revolt against the settlement of outsiders in the tribal areas.
2. The Dewan of Travancore supported this movement.

Which of the statements given above is/ are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

The Punnapra-Vayalar revolt is named after two of the places involved in Kerala. **It started under the leadership of undivided Communist Party of India (CPI) in a place called Punnapra on 23 October and lasted for 10 days until it culminated in Vayalar.**

Statement 1 is incorrect: It was a **revolt of organized working class in India**. It was **against the exploitative policies of the then ruler C.P. Ramaswamy Aiyer** (Dewan of Travancore). As former Kerala Chief Minister had said, "For instance, half of the produce of fishermen would go into the hands of the landlord. Half of the rest would go to the Church (in memory of the soul of the dead landord). It was called Valla-karam and Palli-karam."

Statement 2 is incorrect: It was primarily against the Government of Travancore and the exploitative policies of Dewan, C.P. Ramaswamy Aiyer. The Dewan had full backing of the British Government. Hence it is incorrect that Dewan supported the movement instead he tries to suppress it.

Source : <https://www.livemint.com/Politics/Gbimy6vm42wFeDe851AOEN/A-veteran-recounts-the-1946-PunnapraVayalar-uprising-70-ye.html>

Q.25) With reference to Global Overturning Circulation (GOC), consider the following statements:

1. It is a circulation of deep ocean water driven mainly by the temperature and salinity difference.
2. It is responsible for transportation of carbon between oceans and atmosphere.
3. The Atlantic Meridional Overturning Circulation (AMOC) is circulation between the Atlantic Ocean and the Indian Ocean.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The global ocean conveyor belt is a constantly moving system of **deep-ocean circulation driven by temperature and salinity**. Cold, salty water is dense and sinks to the bottom of the ocean while warm water is less dense and remains on the surface.

Statement 1 is correct: Global Overturning Circulation (GOC) is the **transport of cold, deep waters** towards the equator and **transport of warm, near-surface waters** towards poleward. The circulation process begins as warm water near the surface moves toward the poles where it cools and forms sea ice. As this ice forms, **salt is left behind** in the ocean water and due to the large amount of salt in the water, it becomes **denser, sinks down**, and is **carried equator wards** in the depths below. Eventually, the water gets pulled back up towards the surface and warms up in a process called upwelling, completing the cycle in global climate.

Statement 2 is correct: The Global Overturning Circulation (GOC) is **responsible for the transport of carbon and heat** between the ocean and the atmosphere and among the ocean basins. There is a loss of heat to the atmosphere when the warm water flowing towards poles, heats the ocean water in poles.

Statement 3 is incorrect: The Global Overturning Circulation is a system of two interconnected ocean circulation. The first one is Atlantic Meridional Overturning Circulation (AMOC) circulation of **ocean waters between North and South Atlantic Ocean (not between the Atlantic and Indian Ocean)**. AMOC carries warm surface waters from the tropics towards the **Northern Hemisphere (North Atlantic)**, where it cools and sinks and then returns to the tropics and then to the **South Atlantic** as a bottom current.

The second one is **Southern Ocean Meridional Overturning Circulation** occurs in the Pacific Ocean. Currently the **Indian Ocean does not have GOC of its own and it acts only as a host for both GOC components.**

Q.26) Clement Attlee, the then British Prime minister, made an announcement about the future of British government in India on February 20, 1947. In this context, consider the following statements.

1. A clear deadline was fixed for transfer of power even if there was no consensus on the new constitution.
2. After the transfer of power, princely states would still be under the obligation and paramountcy of the British.
3. Attlee's statement clearly ruled out the partition or bifurcation of India.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1 and 2 only

Ans) a

Exp) Option a is the correct answer.

Clement Attlee, the British prime minister, sensing the trouble all around, made an announcement on February 20, 1947. The British House of Commons declared the British intention of leaving the Indian subcontinent.

Statement 1 is correct: A deadline of June 30, 1948, was fixed for transfer of power even if the Indian politicians had not agreed by that time on the constitution.

Statement 2 is incorrect: British powers and obligations vis-a-vis the princely states would lapse with transfer of power, but these would not be transferred to any successor government in British India. Hence, princely states won't be under any obligations of the British government after the transfer of power.

Statement 3 is incorrect: The British would relinquish power either to some form of central government or in some areas to the existing provincial governments if the constituent assembly was not fully representative, i.e., if the Muslim majority provinces did not join. This statement contained **clear hints of partition and even Balkanisation of the country into numerous states** and was, in essence, a reversion of the Cripps Offer. Hence, Attlee's statement didn't infer an idea of a Single Indian Union, rather hinted at a balkanised state.

Source: Spectrum, A Brief History of Modern India, Chapter 25, Independence with partition

Q.27) Consider the following statements regarding the provisions of the Indian Independence Act, 1947:

1. It empowered the constituent assemblies of the two dominions to frame and adopt constitution for their respective nations.
2. Lord Mountbatten was to be appointed as a common Governor-General of India and Pakistan.
3. The existing Central Legislative Assembly and the Council of States were to continue and exercise the powers in respective dominion.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

On July 5, 1947 the British Parliament passed the Indian Independence Act which was based on the Mountbatten Plan, and the Act got royal assent on June 18, 1947. The Act was implemented on August 15, 1947. The Act provided for the creation of two independent dominions of India and Pakistan with effect from August 15, 1947.

Statement 1 is correct: It empowered the constituent assemblies of the two dominions to frame and adopt any constitution for their respective nations and to repeal any act of the British parliament, including the independence act itself.

Statement 2 is incorrect: Each dominion was to have a governor-general to be responsible for the effective operation of the Act. Jinnah became the first Governor-General of Pakistan. India, however, decided to request Lord Mountbatten to continue as the Governor-General of India. On the other hand, Mountbatten had hoped to be the common Governor-General of India and Pakistan, thus providing the necessary link, but Jinnah wanted the position for himself in Pakistan.

Statement 3 is incorrect: The existing Central Legislative Assembly and the Council of States were to be automatically dissolved and the constituent assembly of each new dominion was to exercise the powers of the legislature of that dominion.

Source: Spectrum, A Brief History of Modern India, Chapter 25, Independence with partition

Q.28) With reference to integration of states into the Union of India after the independence, consider the following statements:

1. All India State People's Conference declared that the states refusing to join the Constituent Assembly are free to form their own constitution.
2. States which signed an instrument of accession with the Indian government acknowledged central authority over defence, external affairs, and communication.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: Nehru presided over the All-India State People's Conference sessions in Udaipur (1945) and Gwalior (April 1947). Under this it was declared that **the states refusing to join the Constituent Assembly would be treated as hostile.** There was **no provision for the princely states to form their own constitution.**

Statement 2 is correct: By August 15, 1947, all states except Kashmir, Hyderabad and Junagarh had signed an **instrument of accession with the Indian government,** acknowledging central **authority over defence, external affairs and communication.** However, in course of time the remaining 3 states were also

integrated with the union. Hyderabad by means of police action, Junagarh by means of referendum and Kashmir by the Instrument of Accession.

Source: Spectrum, A Brief History of Modern India, Chapter 25, Independence with partition

Q.29) Which of the following is/are considered as reason for Punjab Massacre in 1947?

1. Absence of transitional institutional structures to tackle the problems of partition.
2. Delay in the announcement of the Boundary Commission award.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

The Indian Independence Act of 1947 had provided for the creation of the two independent dominions of the India and Pakistan with effect from August 15, 1947. In the meantime, the breakneck speed of events under Mountbatten caused anomalies in arranging the details of partition and totally failed to prevent the Punjab massacre, because,

Statement 1 is correct: The early withdrawal announced by Mountbatten was one of the reasons for Punjab massacre. **There were no transitional institutional structures within which partition problems could be tackled.** Hence, the void in this respect of mediating in the issue of partition by British, led to a chaos between the two new borne dominions.

Statement 2 is correct: There was a delay in announcing the Boundary Commission Award (under Radcliffe); though the award was ready by August 12, 1947, **Mountbatten decided to make it public after August 15 so that the British could escape all responsibility of disturbances. Thus, delay in announcing Boundary Commission Award became one of the reasons of Punjab Massacre.**

Source: Spectrum, A Brief History of Modern India, Chapter 25, Independence with partition

Q.30) In the context of Indian polity, which of the following statements is correct with respect to the doctrine of proportionality?

- a) This doctrine was first adopted by the Supreme Court of India in K.S. Puttaswamy case, 2017.
- b) This doctrine prohibits legislature to enact laws on any subjects that falls outside its jurisdiction.
- c) This doctrine empowers the court to strike down a punishment awarded to a person in excess of the crime s/he committed.
- d) This doctrine allows an executive action which might not be mandated by the laws.

Ans) c

Exp) Option c is the correct answer.

Doctrine of Proportionality or proportionality test is a **Judicial innovation to examine the constitutional validity of laws/executive actions.**

Option a is incorrect: Doctrine of Proportionality was adopted by the **Supreme court in Om Kumar v. Union of India case (2000) even before K.S. Puttaswamy case (2017).** The Supreme Court in the Om Kumar case observed that the proportionality test was used by the Court since 1950 to determine the constitutional validity of legislation in the context of laws violating Article 19 (1) of the constitution.

Option b is incorrect: Doctrine of colourable legislation (not doctrine of proportionality) prohibits legislature to make laws on subjects that falls outsides its jurisdiction. Doctrine of colourable legislation

states that when a legislature does not have the power to make laws on a particular subject directly, it cannot make laws on it indirectly.

Option c is correct: It is true that **doctrine of proportionality** empowers supreme court to **strike down a punishment awarded to person in excess of the crime he/she committed**. According to this doctrine, the punishment awarded should be in proportion to the crime one committed.

Option d is incorrect: **This doctrine does not allow an executive action, if such actions were not mandated by laws.** In The **Puttaswamy case**, the court laid down a few tests to determine the constitutional validity of the state's actions.

- 1) State action must have a **legislative mandate**.
- 2) The action must show that the objective of its law is founded on a **legitimate governmental aim**.
- 3) State action must be **proportionate** and such action must have **no alternative and less intrusive measures** available to achieve the same objective.

Source: <https://blog.forumias.com/what-is-doctrine-of-proportionality/>
<https://blog.ipleaders.in/all-about-judicial-review/#:~:text=Proportionality%20means%20that%20the%20administrative,to%20balance%20means%20with%20ends.>

Q.31) Why did the Congress agree for dominion status when India was heading up to Independence in 1947?

1. Dominion status would provide time to establish the legal and infrastructural basis for the Indian republic.
2. Granting of dominion status did not require a complicated process of constitution-writing.
3. Dominion status would allow for some much-needed continuity in the bureaucracy and the army.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Countries with Dominion status were autonomous communities within the British Empire which were “equal in status” but had an “allegiance to the Crown”. **What it meant was that King George VI continued to reign as the Emperor of India and Lord Mountbatten was the first Governor-General of the country.** The Congress was willing to accept dominion status in 1947 despite its being against the Lahore Congress (1929) spirit because of many circumstances.

Statement 1 is correct: When India was leading up to Independence, the Congress did agree for dominion status. The reason for the reversal in their stance is that **it bought them time to establish the legal and infrastructural basis for the Indian republic**. It also bought them time to integrate the over 500 princely territories into the national framework.

Statement 2 is correct: According to the congress, constitution-making process would take longer than anticipated. **Dominion status could be granted by Act of Parliament and did not require a complicated process of constitution-writing.** The grant of Dominion status was speedy and able to accommodate a variety of transnational arrangements.

Statement 3 is correct: The Congress also agreed for dominion status because:

- 1) it would ensure a peaceful and quick transfer of power;
- 2) it was more important for the Congress to assume authority to check the explosive situation; and
- 3) it would allow for some **much-needed continuity in the bureaucracy and the army.**

Q.32) Sardar Vallabhbhai Patel was initially opposed to the partition of India, but eventually he supported the partition of India. What may be the possible reasons behind this change in his position?

1. Partition would remove Muslim League's capacity to obstruct in decision making.
2. He wanted to avoid the threat of Civil war in the country.

Select the correct answer using the code given below:

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Vallabhbhai Patel was India's first home minister and also the first deputy prime minister. He is known as the "Iron Man" of India and was instrumental in uniting the country through merger of small princely states.

Statement 1 is correct: Partition would provide two separate countries. India can take decision for the protection and welfare of its citizens. Partition would remove Muslim League's capacity to obstruct in deciding the fate of India.

Statement 2 is correct: Patel thought if partition were not accepted, there was bound to be a **civil war** like situation like **long-drawn-out communal strife in cities**, in some rural areas and even regiments and police forces would be torn by communal dissensions. If therefore, such conflict was inevitable, the Hindus, being more disorganized and less fanatic, might go under for want of a compact organization.

Q.33) Consider the following statements:

1. Subhash Chandra Bose resigned from the Indian Civil Services in 1921 to join the struggle for freedom by becoming a member of the Congress.
2. The political guru of Subhash Chandra Bose was Rashbehari Bose.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Subhas Chandra Bose made significant contributions in Indian freedom struggle.

Statement 1 is correct: Subhash Chandra Bose was an intrepid man. He had always shown a militant streak and reacted violently to any insult of Indians by the Europeans. He passed the Indian Civil Services examination securing fourth position but **resigned from the service in 1921** to join the **struggle for freedom** by becoming a **member of the Congress**.

Statement 2 is incorrect: The political guru of Subhash Chandra Bose was Chittaranjan Das. (And not Rashbehari Bose).

Source: A brief History of India. Spectrum Revised and enlarged edition of 2019. Chapter no.23 Quit India Movement, Demand for Pakistan and the INA. Page no. 456.

Q.34) Which of the following is **incorrect** with regard to the aims/demands of the Individual Satyagraha?

- To show that nationalist patience was not due to weakness.
- To start a mass struggle immediately after satyagraha.
- To give another opportunity to the government to accept Congress' demands peacefully.
- To have freedom of speech against war.

Ans) b

Exp) Option b is the correct answer.

Individual Satyagraha (1940) was the resultant of August offer. It was started by Mahatma Gandhi. He decided to initiate a **limited satyagraha on an individual basis** by a few selected individuals in every locality.

Option a is correct: One of the aims for launching the **Individual Satyagraha** was to show that **nationalist patience was not due to weakness**. It also wanted to express people's feeling that they were not interested in the war and that they made no distinction between Nazism and the double autocracy that ruled India.

Option b is incorrect: Towards the end of 1940, the Congress once again asked Gandhi to take command. Gandhi now began taking steps which **would lead to a mass struggle** within his broad strategic perspective. Individual Satyagraha was one such step. It did not want to start a mass struggle immediately.

Option c is correct: Mahatma Gandhi wanted to give another **opportunity to the government** to accept Congress' demands peacefully.

Option d is correct: The **demand of satyagrahi** would be the **freedom of speech against the war through an anti-war declaration**. If the government did not arrest the satyagrahi, he or she would not only repeat it but move into villages and start a march towards Delhi, thus precipitating a movement which came to be known as the 'Delhi Chalo Movement'.

Knowledge Base: Vinoba Bhave was the first to offer the satyagraha and Nehru, the second.

Source: A Brief History of Modern India by Rajiv Ahir 2019 Edition - Chapter 22

Nationalist Response in the Wake of World War II P 440, 441.

Q.35) With reference to recently announced "Endorsement Guidelines for Celebrities and Social Media Influencers", consider the following statements:

- These guidelines were issued by the Union government under the Information Technology Act, 2000.
- The guidelines prohibit social media influencers to endorse any products/services that are not personally used/experienced by them.
- Social media influencer can be imprisoned up to three years in case of repeated offences.

Which of the statement/s given above is/are correct?

- 1 and 3 only
- 2 only
- 3 only
- 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Social media influencers are individuals or groups with access to an audience and have the power to affect their purchasing decisions. Regulating social media influencers became necessary as there are more than 100,000 social-media influencers and their market is likely to reach Rs 2,800 crore by 2025.

Statement 1 is incorrect: The guidelines were issued by the Union government **under Consumer Protection Act, 2019**. The Department of Consumer Affairs under the **Ministry of Consumer Affairs, Food and Public Distribution** has released guidelines 'Endorsement Guidelines for Celebrities and Social Media Influencers' on social media platforms.

Statement 2 is correct: The guidelines state that **social media influencers should not endorse any product or service** that they have **not personally used or experienced** or in which due diligence has been done by them.

Statement 3 is incorrect: For violations of guidelines, **the penalty prescribed for misleading advertisements** by the social media influencers is a penalty of up to ₹10 lakhs for first time offence and **up to ₹ 50 lakhs in case of repeated offences (not imprisonment).**

Source: <https://blog.forumias.com/centre-releases-endorsement-guidelines-for-celebs-and-social-media-influencers/>

Q.36) With reference to Magazines/Newspapers during pre-Independence period, consider the following pairs:

Magazines/ Newspapers Started by

1. Amrita Bazar Patrika N.N. Sen
2. Sudharak Gopal Krishna Gokhale
3. Hindustan and Advocate G.P. Verma

How many pairs given above is/are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) None of the pairs

Ans) a

Exp) Option a is the correct answer.

Magazines/Newspapers	Started by	
1) Amrita Bazar Patrika	Sisir Kumar Ghosh and Motilal Ghosh (Indian Mirror - N.N. Sen)	Hence, pair 1 is incorrect.
2) Sudharak	Gopal Ganesh Agarkar (Not Gopal Krishna Gokhale)	Hence, pair 2 is incorrect.
3) Hindustan and Advocate	G.P. Verma	Hence, pair 3 is correct.

Source: Chapter 29: Development of Indian Press (Spectrum)

Q.37) What was the main reason behind the occurrence of the Warli Adivasi Revolt of 1945?

- a) Demand made for better wages and working conditions by the tribal people.
- b) Extending the Quit India movement to the rural areas.
- c) Protest against the intervention of outsiders in the cultural matters of the tribal people.
- d) Protesting against the British government's policies about the shifting cultivation.

Ans) a

Exp) Option a is the correct answer.

In 1945, Warli Adivasi Revolt began in Zari village, Talasari taluka (Maharashtra). Affected from the exploitation from the landlords and money-lenders, **nearly 5,000 indentured tribals gathered and refused to work on landlords' fields until they received 12 annas a day in wages.** Their resistance sowed the first seeds of rights-based movements among the region's indigenous communities. Women played an important role in the revolt and helped the men in all possible aspects. The involvement of the women was supported by the Kisan Sabha leader, Godaveri Parulekar, also known as Godutai (elder sister) by the

Adivasis. Women followed her and spoke at meetings about the oppression they faced and encouraged other women to join the struggle.

Q.38) Who among the following took charge of the INA prisoners' legal defense during the trial at the Red Fort in 1945?

1. Bhulabhai Desai
2. Sardar Vallabhbhai Patel
3. Asaf Ali
4. Tej Bahadur Sapru

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

The INA fought alongside the Japanese during the Burma campaign and were able to capture some parts of India's north-eastern region. However, the INA's advance was ultimately halted, and they were forced to retreat. Many of the INA soldiers were captured and held as prisoners of war by the British.

During this time, the British government accused the INA soldiers of treason and mutiny. The INA Defence Committee, later the INA Defence and Relief Committee, was a committee established by the Indian National Congress in 1945 to defend those officers of the Indian National Army who were to be charged during the INA trials. The committee declared the formation of the Congress' defence team for the INA and included famous lawyers of the time like **Bhulabhai Desai, Jawaharlal Nehru, Tej Bahadur Sapru, Kailash Nath Katju, and Asaf Ali**. The Congress organised an INA Relief and Enquiry Committee, which provided small sums of money and food to the men on their release, and attempted, though with marginal success, to secure employment for these men. The trials garnered widespread attention in India and became a turning point in India's struggle for independence.

Source: Spectrum's A brief History of Modern India ch 24 pg 521

Q.39) In the context of Quit India Movement, the term "Karnataka Method" denotes:

- a) a tactic where part-time peasant squads engaged in farming during the day and revolutionary activities at night.
- b) a method adopted by the British administrators to suppress the movement.
- c) crowd funding initiative, where funds were gathered to support the Quit India Movement throughout India.
- d) a framework developed by the students' unions for carrying out underground activities in urban areas of Karnataka.

Ans) a

Exp) Option a is the correct answer.

The hallmark of the second phase of Quit India Movement was the widespread underground terrorist activities carried out by different groups of revolutionaries all over India. Such activities involved attempts to sabotage War efforts by dislocating communication, disseminating messages inspiring 'subversive' acts through slogans, pamphlets, leaflets, handbills and other 'incendiary' underground publications. Acts of sabotage were carried out not just by students and revolutionaries, ordinary peasants too participated

willingly. **Practiced and popularized in Karnataka, where part-time peasant squads engaged in farming by day and sabotage activities by night, this tactic came to be known as the ‘Karnataka method’.**

Q.40) Which one of the following statements best reflects the term “spear phishing” recently seen in the news?

- It involves sending the text message to persons through offline mode to access their bank accounts.
- It involves gaining control over individuals’ devices without human interaction.
- It is a highly advanced phishing method used exclusively to steal crypto assets such as Non-Fungible Tokens (NFTs).
- It involves stealing personal details of a person over the internet usually by sending malicious email.

Ans) d

Exp) Option d is the correct answer.

Phishing attacks are social engineering attacks, and they can have a great range of targets depending on the attacker.

Option a is incorrect: Smishing involves **sending text messages to steal individuals’ personal information such as their bank accounts.** On the other hand, **Phishing** involves contacting individuals over the **internet or emails,**

Option b is incorrect: A **Zero-Click attack** involves gaining control over individuals’ devices without human interaction. For instance, spyware like **Pegasus gain control over a device without human interaction.** In contrast spear phishing involves human interaction over the internet or email.

Option c is incorrect: **Spear phishing is not exclusively related to stealing individuals’ crypto assets** such as Non-Fungible Tokens (**NFTs**). NFTs are unique cryptographic tokens that exist on a blockchain and cannot be replicated, and the report shows that more than **\$100m worth of NFTs have been stolen** using various phishing methods.

Option d is correct: Spear phishing is an attempt to **trick a particular person** or group into **giving private information over the internet or by email,** especially by sending emails that seem to be from someone they know. Criminals who do this will already have some or all of the following information about the victim: their name, place of employment, Job title, Email address and Specific information about their job role.

Q.41) The British India experienced three violent upsurges during winter of 1945-46 in Calcutta and Bombay, one is by sailors of Royal Indian Navy and two are against the INA trials. In this context, consider the following statements:

- Indian National Congress officially extended its support to these upsurges.
- These upsurges prompted the government to announce that only those INA members who conspired with axis powers would be brought to trial.
- Withdrawal of Indian soldiers from Indonesia was one of the implications of these upsurges.

Which of the above given statements is/are correct?

- 3 only
- 1 and 3 only
- 2 and 3 only
- 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The nationalist sentiment which reached a crescendo around the INA trials developed into violent confrontations with authority in the winter of 1945-46. There were three major upsurges-

- 1) November 21, 1945-in Calcutta over the INA trials
- 2) February 11, 1946-in Calcutta against the seven-year sentence to INA officer Rashid Ali.
- 3) February 18, 1946-in Bombay, strike by the Royal Indian Navy ratings.

Statement 1 is incorrect: The Congress did not officially support these upsurges because of their tactics and timing. However, some individual Congress leaders, such as Jawaharlal Nehru, did express sympathy with the demands of the striking sailors during the RIN mutiny.

Statement 2 is incorrect: The government did not announce that only those INA members who conspired with Axis powers would be brought to trial. **On December 1, 1946, the government announce that only those INA members accused of murder or brutal treatment of fellow prisoners would be brought to trial.** In fact, the British government wanted to bring all INA members to trial, which led to widespread protests and demands for their release.

Statement 3 is correct: Indian soldiers were withdrawn from Indochina and Indonesia after the end of World War II in February 1947, which was one of the demands raised by the Naval ratings of RIN during their strike.

Source: Spectrum's A brief History of Modern India ch 24 pg 522-525; India's Struggle for Independence by Bipin Chandra ch:36 post war national upsurge.

Q.42) Consider the following statements about 'Library Movements' in India:

1. The movement was confined only to some urban pockets of Bengal and Maharashtra.
2. Balshastri Jambhekar founded the Bombay Native General Library.
3. These libraries acted as a forum for discussions and debates about the government policies.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Library Movement aimed at instilling national spirit among the masses. Through the Library Movement, people were able to spread the message of nationalism and arouse feelings against wrongdoings of the government with the help of the newspapers, books and periodical magazines.

Statement 1 is incorrect: The influence of the press extended far beyond its literate subscribers. Also, it was **not confined to cities and large towns only**. A newspaper **would reach remote villages** and would then be read by a reader to tens of others. Gradually **library movements sprung up all over the country (and was not confined to the urban pockets of Bengal and Maharashtra only)**. So, statement 1 is incorrect.

Statement 2 is correct: Balshastri Jambhekar founded the Bombay Native General Library and started the Native Improvement Society of which an offshoot was the Students Literary and Scientific Library. (He was also the **first professor of Hindi at the Elphinstone College**, besides being a **director of the Colaba Observatory**).

Statement 3 is correct: Under the library movement a **local library would be organized around a single newspaper**. A table, a bench or two or a charpoy would constitute the capital equipment. **Every piece of news or editorial comment would be read or heard and thoroughly discussed**. The newspaper not only

became a **political educator** reading or discussing it became a **form of political participation**. In this way, these libraries served the purpose of not only **political education but also of political participation**. In these newspapers, **government Acts and policies were put to critical scrutiny**. They acted as an institution of opposition to the government.

Q.43) Consider the following statements regarding the Licensing Regulations, 1823:

1. It was enacted by Warren Hastings to suppress the freedom of press in India.
2. According to these regulations, starting or using a press without licence would be a penal offence.
3. The Act also covered journals, pamphlets and books under its ambit.
4. These regulations were repealed by William Bentinck.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1, 2 and 3 only
- d) 2, 3 and 4 only

Ans) b

Exp) Option b is the correct answer.

John Adam became Acting Governor General of India on Lord Hastings's departure in January 1823. His rule lasted for seven months. He enacted Licensing Regulations, 1823 which led to the **suppression of the freedom of the press in India**.

Statement 1 is incorrect: In 1823, the then acting governor-general, **John Adams (and not by Warren Hastings)**, who had reactionary views for the press, enacted the Licensing Regulations, 1823. So statement 1 is incorrect.

Statement 2 is correct: According to Licensing Regulations, 1823, **starting or using a press without licence was made a penal offence**. It curbed the freedom enjoyed by the press to a greater extent.

Statement 3 is correct: The Licensing Regulations, 1823 was also **extended to cover journals, pamphlets and books apart from newspapers**. These restrictions were directed **chiefly against Indian language newspapers or those edited by Indians**. **Rammohan Roy's Mirat-ul-Akbar had to stop publication due to this act**.

Statement 4 is incorrect: **The Press Act of 1835** came to be known as the **liberator of the press**. **The act revoked the License Regulations of 1823. It was revoked by Charles Metcalfe (and not by William Bentinck)**. It enabled the press to be more liberal, which contributed to the development of the press in India to a great extent. So, statement 4 is incorrect.

Source: Chapter-29: Development of Indian Press, A brief history of modern India by Rajiv Ahir

Q.44) "He was one of the main architects of the Indian National Conference. Later, as a moderate leader he provided leadership during the anti-partition movement in Bengal. In 1883, he became the first Indian journalist to be imprisoned. He also founded the Indian National Liberal Federation. He was elected as Congress President twice. Only the second Indian to qualify the Indian Civil Service examinations, he was also associated with the newspaper Bengalee."

The above description is related to which of the following nationalist leaders?

- a) Romesh Chandra Dutt
- b) Chittaranjan Das
- c) Surendranath Banerjee
- d) Gopal Krishan Gokhale

Ans) c

Exp) Option c is the correct answer.

Surendranath Banerjee (1848-1925), often known as **Rashtraguru** was born in Calcutta. **Surendranath Banerjee and Ananda Mohan Bose were the main architects of the organisation Indian National Conference/Association** to bring Hindu and Muslims together for political action. He provided the crucial leadership to Moderate-led **anti-partition movement (1903-05)**. In 1883, **Surendranath Banerjee became the first Indian journalist to be imprisoned**. In an **editorial in The Bengalee (of which he was editor for many years)**, Banerjee had criticised a judge of Calcutta High Court for being insensitive to the religious sentiments of Bengalis in one of his judgements. He also founded the **Indian National Liberal Federation in 1919**. He was **only the second Indian to qualify the Indian Civil Service examinations** in 1869. Later he was dismissed for a minor and apparently inadvertent procedural error, but he again cleared the exam in 1871. He was widely known as the **Father of Indian Nationalism** due to his significant contribution in early years. He was elected the **Congress President in 1895 at Poona and in 1902 at Ahmedabad**. He had also written **A Nation in the Making** in the last years of his life.

Source: Chapter-29: Development of Indian Press, A brief history of modern India by Rajiv Ahir

Q.45) With reference to Broadcasting Infrastructure and Network Development (BIND) scheme, consider the following statements:

1. The Ministry of Communication is a nodal agency for this scheme.
2. The scheme provides financial assistance to public broadcasting organisations to improve their outreach in border areas of India.
3. The scheme aims to provide free Wi-Fi facilities in tribal areas to improve internet infrastructure in the country.
4. Funds required to implement this scheme will be sourced from Universal Service Obligation Fund (USOF)

Which of the statements given above is/are correct?

- a) 1,2 and 4 only
- b) 2 only
- c) 2 and 3 only
- d) 3 and 4 only

Ans) b

Exp) Option b is the correct answer.

Broadcasting Infrastructure and Network Development (**BIND**) scheme aims to bring modernisation to the **public broadcaster** Prasar Bharati i.e. All India Radio (AIR) and Doordarshan (DD).

Statement 1 is incorrect: The **Ministry of Information and Broadcasting is a nodal agency for this scheme**. Broadcasting Infrastructure and Network Development (BIND) is a **central sector scheme administered** by the Ministry of Information and Broadcasting with financial outlay of ₹2,539.61 crore.

Statement 2 is correct: The **BIND scheme provides financial assistance to public broadcasting organisations** such as All India Radio, Doordarshan to improve their **outreach in border areas of India**. BIND scheme provides financial support to Prasar Bharati for expenses related to the expansion and upgradation of its broadcasting infrastructure, content development and civil work related to the organisation.

Statement 3 is incorrect: BIND scheme **does not provide free Wi-Fi facilities** in tribal areas. However, the scheme provides over **8 lakh Doordarshan (DD) Free Dish** to people living in **remote, tribal, LWE and border areas**.

Statement 4 is incorrect: **Fund required to implement BIND scheme is not sourced from the USOF**. The Universal Service Obligation Fund (**USOF**) is under the administrative control of the **Department of**

telecommunication, Ministry of Communications. USOF provides funding support to implementation of the **BharatNet project** which aims to provide broadband connectivity to 2.5 lakhs Gram Panchayats in the country.

Q.46) Which of the following statements is/are correct about the Royal Indian Navy Mutiny, 1946?

1. The mutiny was first started at the Calcutta Harbour.
2. The mutineers demanded the release of INA prisoners.
3. The mutiny was outrightly supported by Mahatma Gandhi.

Select the correct answer using the code given below:

- a) 1 only
- b) 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

In February 1946, 1100 Royal Indian Navy (RIN) ratings of HMIS Talwar went on strike to protest against racial discrimination, unpalatable food, abuse by superior officers, arrest of a rating for scrawling 'Quit India' on HMIS Talwar, INA trials, and use of Indian troops in Indonesia, demanding their withdrawal. The rebellious ratings hoisted the tricolor, crescent, and the hammer and sickle flags on the mast of the rebel fleet. They went around Bombay in lorries holding Congress flags threatening Europeans and policemen, and crowds brought them food and offered them help.

Statement 1 is incorrect: The Royal Indian Navy Mutiny began on February 18, 1946, in Bombay. It quickly spread to other naval bases in India, including Karachi, Madras, and Calcutta.

Statement 2 is correct: The ratings of the Royal Indian Navy demanded the release of all political prisoners, including those who were held for their involvement in the Indian independence movement, as well as the release of the INA prisoners who were being held by the British authorities.

Statement 3 is incorrect: Gandhi, criticised the strikers for mutinying without the call of a 'prepared revolutionary party' and without the 'guidance and intervention' of 'political leaders of their choice'. Newly formed Naval Central Strike Committee (NCSC), Bombay Students' Union and the CPI had called for a general strike in support of the mutiny and the NCSC had asked people to make it a success. **In contrast, Gandhi was clearly unsupportive of the unplanned uprising and Sardar Patel even asked people to 'go about their work as usual'.** For once, the people rejected the great leaders. The strike was 'total' and processions rolled across the city.

Source: Spectrum's A brief History of Modern India ch 24 pg 522-525

Q.47) Which of the following statements is/are **incorrect** regarding the Tebhaga Movement?

1. The nerve centre of the movement was Bardoli region of Gujarat.
2. Implementation of the Adhiary Pratha Sytem of cultivation was one of the main demands of the movement.
3. Flood Commission, which was appointed as a result of this movement, accepted the demands of the peasants.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 1 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

In September 1946, the Bengal Provincial Kisan Sabha gave a call to start a mass struggle for the implementation of the recommendations of **Bengal Land Revenue Commission**. It aimed at ensuring the bargadars their due share in crop (The **bargadars used to work on lands rented from the jotedars**). The communist cadres, including many urban students, went to the countryside to organise the bargadars. The central slogan was **nij khamare dhan tolo** i.e., sharecroppers taking the paddy to their own threshing floor and not to the jotedar's house, as before, to **enforce tebhaga**.

Statement 1 is incorrect: Farmers from the remote areas of **Sundarbans to various parts of North Bengal (and not Bardoli region of Gujarat)** raised their demand for Tebhaga. Also, the storm centre of the movement was north Bengal, **principally among Rajbanshi**, a low caste of tribal origin. **Muslims also participated in large numbers**. So, statement 2 is incorrect.

Statement 2 is incorrect: In Bengal Jotedars fixed the total yield from land, to be shared equally between the cultivator and the owner of the land i.e. jotedar. **This system of cultivation of land was commonly known as Adhiary Pratha (half-half system), mostly prevalent in north Bengal. Tebhaga movement opposed this system and demanded for two thirds share to the cultivator instead of the half share under the Adhiary Pratha system.**

Statement 3 is incorrect: The **Bengal Land Revenue Commission or the Flood/Floud Commission** gave recommendations of **tebhaga means two-thirds' share to the bargardars or the sharecroppers** also known as bagchasi or adhyar, instead of the one-half share. **The Bengal Provincial Kisan Sabha's call to implement Commission's recommendation through mass struggle led to start of the movement. Hence, the movement was started as a result of the Flood Commission's recommendations.**

Source: Chapter-29: Development of Indian Press, A brief history of modern India by Rajiv Ahir

Q.48) Which of the following statements about the campaign against the trial of Indian National Army (INA) Prisoners is/are correct?

1. The central theme of the Campaign was questioning the Britain's right to decide a matter concerning Indians.
2. All India Women's Conference supported the INA cause and demanded the release of INA prisoners.
3. Various political parties including Muslim league and Hindu Mahasabha supported INA cause.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Indian National Army (INA) agitation was a significant movement during the Indian independence struggle against British colonial rule.

Statement 1 is correct: The central theme of the INA agitation was questioning the Britain's right to decide a matter concerning Indians.

statement 2 is correct: During the campaign for the release of INA prisoners, women participated actively in protests and demonstrations. They organized rallies and satyagraha's, and many of them were arrested and jailed. Women's organizations such as **the All-India Women's Conference and the Women's Indian Association supported the INA cause and demanded the release of INA prisoners.**

Statement 3 is correct: There was a near unanimous support to the INA cause. Apart from the congress, parties which extended support for INA include **the Muslim League, Communist Party, Unionists, Akalis, Justice Party, Ahrars in Rawalpindi, Rashtriya Swayamsevak Sangh, Hindu Mahasabha and the Sikh League.**

Source: Spectrum's A brief History of Modern India ch 24 pg 521-522

Q.49) In March 1940, an Anti-Compromise Conference at Ramgarh was organized under the leadership of which one of the following personalities?

- Mahatma Gandhi
- Subhash Chandra Bose
- JL Nehru
- JP Narayan

Ans) b

Exp) Option b is the correct answer.

In March 1940, **Subhash Chandra Bose** convened an Anti-Compromise Conference at Ramgarh. It was a joint effort of the **Forward Bloc** and **the Kisan Sabha**. At the conference, it was resolved that a world-wide struggle should be launched on April 6, the first day of the National Week. It was proposed that people of India should be called **not to help the Imperialist War with any type of resource** viz. men, money or materials. Subhash Chandra Bose called the people to offer resistance to all forms of exploitation of the Indian resources that are used for the imperial cause. There was enthusiastic participation by the people in the struggle launched on April 6.

Q.50) With reference to Asian Waterbird Census, consider the following statements:

- The census is conducted in Asia as part of the Convention on Migratory Species (CMS).
- In India, the census was coordinated by the Zoological Survey of India (ZSI).
- The census can be used to generate awareness about the importance of wetland conservation in a nation.

Which of the statement/s given above is/are **incorrect**?

- 2 only
- 2 and 3 only
- 1 and 2 only
- 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

Every year, thousands of volunteers participate in the Asian Waterbird (AWS) census to count the number of waterbirds in a place. AWC is part of the International Waterbird census coordinated by the non-governmental organisation **Wetland International**.

Statement 1 is incorrect: Asian Waterbird census (AWC) is part of the global International Waterbird Census (IWC) coordinated by Wetlands International (not part of the Convention on Migratory Species).

AWC runs in parallel with other regional programmes of the IWC in Africa, Europe, West Asia, the Neotropics and the Caribbean countries.

Statement 2 is incorrect: In India, AWC is jointly coordinated by the **Bombay Natural History Society (BNHS)** and **Wetlands International**. Zoological society of India (ZSI) does not coordinate AWC in India.

Statement 3 is correct: AWC gives an idea of the birds at the wetlands which in turn indicate the health of the wetland i.e., more **waterbirds, the healthier the wetland is**. Thus, **AWC can be used to generate awareness about the conservation of wetlands in India**. Wetlands act as important habitats for waterbirds.

SFG 2023 | LEVEL 2 | Test #25 – Solutions | ForumIAS

Q.1) With reference to the British rule in India, consider the following pairs regarding various educational institutions and their founders:

Educational Institution	Founder
1. The Calcutta Madrasah	Warren Hastings
2. The Sanskrit College	Jonathan Duncan
3. Fort William College	Sir John Shore

How many pairs given above are correctly matched?

- Only one pair
- Only two pairs
- Only three pairs
- None of the pairs

Ans) b

Exp) Option b is the correct answer.

For the first 60 years of its dominion in India, the East India Company, a trading and profit-making concern, took no interest in the promotion of education. Some minor exceptions were efforts by individuals such as:

Pair 1 is correctly matched: The **Calcutta Madrasah** was established by **Warren Hastings** in 1781 for the study of **Muslim law** and related subjects. The main object was to promote the study of Arabic and Persian Language and of Mohammedan laws with a view to qualify the sons of Muslim gentlemen for responsible and lucrative offices and to produce competent officers for the courts of justice.

Pair 2 is correctly matched: The **Sanskrit College** was established by **Jonathan Duncan**, the resident, at **Benaras in 1791** for the study of Hindu law and philosophy.

Pair 3 is incorrectly matched: **Fort William College** was set up by **Wellesley** in 1800 for **training of civil servants** of the Company in languages and customs of Indians (closed in 1802). Wellesley envisioned ruling British India efficiently with the help of an enlightened and trained bureaucracy. He felt that **both academic and moral training** were necessary to make the new arrivals capable of facing the challenge of governing an alien people. Whereas, **Sir John Shore was Governor General of India from 1793-98**. The reforms in the revenue administration in 1786 and 1790 were mostly initiated and executed according to the ideas of Shore.

A brief History of Modern India, Spectrum Publication, 2020 edition.

Q.2) With reference to the education during British rule in India, consider the following statements regarding Orientalist- Anglicist Controversy:

- The Anglicists argued that government spending on education should be exclusively for modern studies.
- The orientalists completely opposed the inclusion of western sciences in the education system.
- The controversy was settled in favor of Anglicists with Lord Macaulay's Minute.

Which of the statements given above is/are correct?

- 1 only
- 1 and 3 only
- 2 and 3 only
- 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

When East India Company took educational administration into their hands, a conflict of opinion arose eventually that whether the company should promote western education or Indian education. The medium of instruction between English or Indian languages was also a concern. This controversy is known as Orientalist-Anglicist Controversy.

Statement 1 is correct: Within the General Committee on Public Instruction, the **Anglicists** argued that the **government spending on education should be exclusively for modern studies**.

Statement 2 is incorrect: The Orientalists said while Western sciences and literature should be taught to prepare students to take up jobs, emphasis should be placed on **expansion of traditional Indian learning**.

Statement 3 is correct: The famous **Lord Macaulay's Minute settled the row in favour of Anglicists**. It said that the limited government resources were to be devoted to teaching of Western sciences and literature through the medium of English language alone.

Source: A brief History of Modern India, Spectrum Publication, 2020 edition.

Q.3) Consider the following statements regarding the Deccan Riots of 1870s:

1. It was against the heavy taxation on ryots under the Ryotwari system.
2. It included a social boycott movement against the moneylenders.
3. The Deccan Agriculturists Relief Act of 1879 was passed to pacify the unsatisfied farmers during the movement.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct. The Deccan peasants uprising (1875) was directed mainly against the excesses of the Marwari and Gujarati money lenders. The **ryots suffered heavy taxation under the Ryotwari system**. The land revenue was also **raised by 50%** in 1867.

Statement 2 is correct. The growing tension between the moneylenders and the peasants **resulted in a social boycott movement**, organized by the ryots against the moneylenders. The ryots **refused to buy from their shops**. No peasant would cultivate their fields. The barbers, washermen, shoemakers would **not serve them**. Soon the social boycott was transformed into agrarian riots with systematic attacks on moneylenders' houses and shops.

Statement 3 is correct. The British government succeeded in repressing the movement. As a conciliatory measure, The **Deccan Agriculturists Relief Act was passed** in 1879 in an effort to quell the movement and safeguard the peasants from moneylender. This **Act ensured** that the **farmers could not be arrested** and imprisoned if they were **unable to pay** their debts. The modern nationalist intelligentsia of Maharashtra supported the peasants' cause.

Source: Spectrum (Page no. 601-602)

Q.4) With reference to the moderate nationalists during the 19th and the early 20th century and their efforts on working class movement, consider the following statements:

1. Most of the Moderates supported the Factory Act of 1881 and 1891.
2. They differentiated between the labour in the Indian and British owned factories.
3. Sorabjee Shapoorji Bengalee made efforts to pass a bill in Bombay Legislative Council on the working conditions of workers.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Indian working class suffered from the same kind of exploitation witnessed during the industrialisation of Europe and the rest of the West, such as low wages, long working hours, unhygienic and hazardous working conditions, employment of child labour and the absence of basic amenities.

Statement 1 is incorrect: The early nationalists, especially the Moderates did not want a division in the movement on the basis of classes. They **did not support the Factory Acts of 1881 and 1891**. They believed that labour legislations would affect the competitive edge enjoyed by the Indian-owned Industries.

Statement 2 is correct: The early nationalists, especially the Moderates, were indifferent to the labour's cause. **They differentiated between the labour in the Indian owned factories and those in the British-owned factories.**

Statement 3 is correct: **Sorabjee Shapoorji Bengalee tried to get a bill, providing better working conditions to labour, passed in the Bombay Legislative Council.**

Source: Page 585, Chapter 32 - The Movement of the Working Class of spectrum

Q.5) With reference to the 'Himalayan Griffon', consider the following statements:

1. It is endemic to the Himalayan region.
2. They are the only vulture not susceptible to toxicity induced by diclofenac drug.
3. They are categorized as 'Critically Endangered' under IUCN Red list.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) None of the above

Ans) d

Exp) Option d is the correct answer.

Recently, once nearly extinct species of Himalayan Griffon spotted in Dudhwa & Banbasa and seen nesting in Terai.

Statement 1 is incorrect: Himalayan Griffon is an Old-World vulture in the **family Accipitridae**. It is one of the two largest Old-World vultures and true raptors. This species is found along the Himalayas and the adjoining Tibetan. This species is distributed from western China, Kazakhstan, Uzbekistan, Kyrgyzstan, Tajikistan, Afghanistan and Pakistan, east through the Himalayan Mountain range in India, Nepal and Bhutan, to central China and Mongolia.

Himalayan Griffon

Statement 2 is incorrect: Himalayan vultures are **susceptible to toxicity induced by diclofenac**, a drug whose residues are in domestic animal carcasses. But their population have however not shown signs of rapid decline as witnessed in populations of other Gyps vultures across Asia.

Statement 3 is incorrect: According to the International Union for Conservation of Nature (IUCN), the Himalayan Griffon (*Gyps himalayensis*) is classified as "**Near Threatened**" on the **IUCN Red List** of Threatened Species. This means that the species is at risk of becoming threatened with extinction in the near future if the current conservation efforts are not maintained.

Knowledge Base: Old World vultures are a group of vultures that are found in Europe, Africa, and Asia. They belong to the family Accipitridae, which also includes eagles, hawks, and kites. Old World vultures are different from New World vultures, which are found in the Americas, in that they have a hooked beak, rather than a straight one, and their nostrils are not divided by a septum.

Q.6) Consider the following statements regarding the Hunter Commission:

1. It was appointed to review the development of education since the Wood's Despatch of 1854.
2. It recommended transfer of control of primary education to district and municipal boards.
3. It recommended that there should be vocational training in high schools for commercial careers.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

When education was shifted to provinces in 1870, primary and secondary education suffered because the provinces already had limited resources at their disposal. In 1882, the government appointed a commission under the chairmanship of W.W. Hunter to review the progress of education in the country since the Despatch of 1854. The Hunter Commission mostly confined its recommendations to primary and secondary education.

Statement 1 is correct: The government appointed the **W.W. Hunter Commission to review the progress of education in the country since the Wood's Despatch of 1854.**

Statement 2 is correct: Hunter Commission recommended **transfer of control of primary education to newly set up district and municipal boards.** The Hunter Commission held that **State should make special efforts for extension and improvement of vernacular education.** Mass education was to be seen as instructing masses through vernaculars.

Statement 3 is correct: The Hunter Commission also recommended that **secondary (high school) education** should have two divisions:

- 1) literary—leading up to university
- 2) vocational—for commercial careers

Source: A brief History of Modern India, Spectrum Publication, 2020 edition.

Q.7) Consider the following statements with reference to Narendra Mandal of 1920–21:

1. It provided a forum for giving expression to the needs and aspirations of the rulers of the princely states.
2. It was set up on the recommendations of Montford Reforms.
3. It was given a wide mandate with powers to regulate the internal affairs of the states.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Post-1905, a policy of cordial cooperation began to counter progressive and revolutionary developments in face of large-scale political unrests.

Both statements 1 and 2 are correct: The **Chamber of Princes or Narendra Mandal** was an institution established in 1920 to provide a forum for giving the voice to needs and aspirations of the rulers of the princely states of India. It was set up on the basis of the recommendations of Montford Reforms.

Statement 3 is incorrect: It was formed as a consultative and advisory body having no say in the internal affairs of individual states and having no powers to discuss matters concerning existing rights and freedoms. The Indian states were divided into three categories for the purpose of the chamber:

- 1) Directly represented–109
- 2) Represented through representatives–127
- 3) Recognised as feudal holdings or jagirs

Source: Page 605, Chapter 34 -The Indian State of spectrum.

Q.8) Which of the following personalities are associated with All India State Peoples Conference (AISPC)?

- 1. Baiwantrai Mehta
- 2. Vijay Singh Pathik
- 3. Manikial Kothari
- 4. Jawaharlal Nehru
- 5. G.R. Abhayankar

Select the correct answer using the code given below:

- a) 1, 2, 3 and 5 only
- b) 1, 3 and 4 only
- c) 1, 3 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) d

Exp) Option d is the correct answer.

All India States' People's Conference (AISPC) was convened in December 1927 which was attended by 700 political workers from the States. The men chiefly responsible for this initiative were **Baiwantrai Mehta, Manikial Kothari and G.R. Abhayankar**.

In 1939, the AISPC elected **Jawaharlal Nehru as its President for the Ludhiana session**, thus setting the seal on the fusion of the movements in Princely India and British India.

Vijay Singh Pathik was an Indian revolutionary who led Bijolia peasant movement or the Bijolia kisan satyagraha. He gave a definite ideological and sharp political edge to the struggle of peasants and broader segments of people in princely states against feudalism and British imperialism. He was the **vice-president and chief publicist of the All-India States Peoples' Conference (AISPC) or Praja Mandal, an organisation of people from all princely states of India**.

Knowledge Base: Vijay Singh Pathik, whose original name was Bhoop Singh came in contact with the young revolutionary Sachindranath Sanyal in Indore. Bhoop along with Bhai Balmukund also organised and

SFG 2023 | LEVEL 2 | Test #25 – Solutions | ForumIAS

expanded the revolutionary movement in Rajasthan. In 1916, Vijay Singh Pathik entered the Bijolia estate and gave a definitive turn to the peasant movement.

Source: India struggle for Independence Bipin Chandra Chapter-28 page-356

<https://www.rajras.in/vijay-singh-pathik/>

Q.9) In the context of working-class movements in India, consider the following pairs:

Leader	Contribution
1. Sasipada Banerjea	Started newspaper 'Bharat Shramjeevi'
2. Pheroza Shah Mehta	Set up Bombay Mills and Millhands Association
3. Narayan Meghaji Lokhande	Editor of newspaper 'Deenbandhu'

How many pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) All three pairs
- d) None of the pairs

Ans) b

Exp) Option b is the correct answer.

The Indian working class during the second half of 19th Century was facing the same kind of exploitation witnessed during the industrialization of Europe. They suffered with low wages, long working hours, hazardous working conditions etc. Newspapers and journals became one of the instruments for arousing consciousness against labor exploitation.

Pair 1 is correct: The newspaper 'Bharat Shramjeevi' was started by Sasipada Banerjea in 1870. The Bharat Shramjeevi was one of the first publications for the cause of working class. Sasipada Banerjea was associated with Brahmo Samaj. He also started a Working Men's Club in 1870, which is described as one of the first labor organization in India.

Pair 2 is incorrect: Bombay Mill and Millhands Association was set up by Narayan Meghaji Lokhande in 1880s. Its objective was to give a platform to workers to voice their opinions.

Pair 3 is correct: The newspaper 'Deenbandhu' was edited by Narayan Meghaji Lokhande during 1880s. It was a weekly Marathi newspaper. Besides labour and social issues, he also wrote influential editorial notes for Hindu-Muslim unity.

Source: Spectrum's A Brief History of Modern India (Page 623, Chapter 32)

Q.10) 'KamLAND Project', recently seen in news, is related to-

- a) Low-cost space tourism
- b) Observation of Gravitational waves
- c) Detection of Neutrinos
- d) Human settlement on Mars

Ans) c

Exp) Option c is the correct answer.

Recently, the Kamioka Liquid Scintillator Antineutrino Detector (KamLAND) experiment in Japan has **found no evidence that neutrinos are their antiparticles.**

The Kamioka Liquid Scintillator Antineutrino Detector (KamLAND) is a **neutrino and antineutrino detector located in the Kamioka Observatory in Japan**. It is designed to study the properties of neutrinos and antineutrinos, which are subatomic particles that have very little mass and interact very weakly with matter. KamLAND is an important tool for studying neutrinos and antineutrinos because it can detect neutrinos from various sources, including the sun, nuclear reactors, and the Earth's mantle.

Knowledge Base: **Antiparticle**: In quantum theory, every type of particle is associated with an antiparticle with the same mass but with opposite physical charges. For example, the antiparticle of the electron is the positron.

Q.11) Consider the following pairs:

- Wetlands - States**
1. Kole Wetland - Andhra Pradesh
 2. Harike Wetland - Punjab
 3. Kheda Wetland - Maharashtra

How many pairs given above are correctly matched?

- a) None of the pairs
- b) Only one pair
- c) Only two pairs
- d) All three pairs

Ans) b

Exp) Option b is the correct answer.

Pair 1 is incorrectly matched: Kole wetland is the largest brackish, humid tropical wetland ecosystem located in the state of Kerala. It extends from the northern bank of Chalakudy River in the south to the southern bank of Bharathapuzha River in the north. It is situated in the central Asian Flyway of migratory birds. Recently, researchers from Kerala has been discovered a new species of cuckoo bee from the Kole wetlands and named it Thyreus narendrani.

Pair 2 is correctly matched: Harike Wetland is a man-made wetland located in the Tarn Taran district of Punjab. The wetland was created in 1953 by constructing a barrage on the Sutlej River, and it covers an area of approximately 86 square kilometers. Harike Wetland is an important habitat for migratory birds, fish, and other wildlife. It has been designated as one of the Ramsar sites in India. According to the recent water bird census, the Harike wetland witnessed a decline in migratory birds' arrival this year.

Pair 3 is incorrectly matched: The wetlands of Kheda is located between two major rivers in Gujarat: Mahisagar on the eastern side and Vatrak, a tributary of River Sabarmati on the western side. This site is selected as an IBA mainly because it has good, breeding population of the globally threatened Sarus Crane in India.

Source: <https://www.thehindu.com/sci-tech/energy-and-environment/migratory-bird-arrivals-at-punjab-harike-wetland-decline-this-season-latest-census-shows/article66528115.ece>

Q.12) Which of the following was the main cause of the Bardoli Satyagraha launched in 1928?

- Demand of increased land revenue by the British Government.
- Inhumane treatment of plantation workers by the European plantation owners.
- The British Government's indifferent attitude towards exploitation of peasants by landowners.
- Salt tax imposed by the British government.

Ans) a

Exp) Option a is the correct answer.

Option a is correct: The Bardoli Satyagraha was launched in 1928 in Gujarat to oppose Bombay Presidency's Government decision to **impose an exorbitant 30% increase in land revenue assessment**. The British Government refused to cancel this hike in land revenue despite petitions by peasants and eventually Peasants of this area approached **Vallbahai Patel to guide this non-violent non-cooperation movement** against the British, which is famously called as Bardoli Satyagraha.

Options b and c are incorrect: Main causes of Bardoli Satyagraha is neither inhumane treatment of plantation workers by the European plantation owners nor the exploitation of peasant by landowners using fraudulent contracts.

Option d is incorrect: Bardoli Satyagraha is not related to showing protest against British Salt tax law. The **Dharasana Satyagraha** was a protest against the British salt tax law in colonial India in 1930. Mahatma Gandhi chose a **non-violent raid of the Dharasana Salt Works in Gujarat as the next protest against British rule** following his Dandi March in 1930. In this movement **hundreds of satyagrahis were beaten by soldiers** under British command at Dharasana. The ensuing publicity attracted **world attention to the Indian independence movement** and brought into question the legitimacy of British rule in India.

Source: Spectrum - Peasant Movements 1857-1947 (Bardoli Satyagraha)

Q.13) Consider the following revolts and the leaders associated with them:

List I (Revolts)	List II (Leaders associated)
1. Eka Movement	Madari Pasi
2. Santhal Rebellion	Ishan Chandra Roy
3. Pagal Panthis Movement	Karam Shah and Tipu Shah
4. Pabna Agrarian Uprising	Siddhu and Kanhu

Which of the pairs given above are correctly matched?

- 1 and 2 only
- 1 and 3 only
- 3 and 4 only
- 1 and 4 only

Ans) b

Exp) Option b is the correct answer.

Pair 1 is correct. **Eka Movement** – This movement was **against the hike in rents**. This movement was led by **Madari Pasi** near the region of Hardoi, barabanki, Sitapur and Bahraich districts of Uttar Pradesh (then United Province) between 1921-1922.

Pair 2 is incorrect. **Santhal Rebellion** – Santhals, were the agricultural people, who had fled to settle in the plains of the **Rajmahal Hills (Bihar)** to lead the Santhal rebellion against the zamindars. The zamindars use to subject the peasants to oppressive exactions and dispossession of lands. The rebellion turned into an

anti-British movement under Siddhu and Kanhu. The Santhals proclaimed an end to Company Rule and declared the area between Bhagalpur and Rajmahal as autonomous. The rebellion was suppressed by 1856. Whereas, Ishan Chandra Roy was related to Pabna Peasant Uprisings.

Pair 3 is correct. Pagal Panthi Movement – Pagal Panthis movement of the **Hajong and Gar tribes** was under the leadership of **Karam Shah and Tipu Shah** against the hike in rents (1825-1835; Mymensingh district, earlier in Bengal). The movement was violently suppressed.

Pair 4 is incorrect. Pabna Agrarian revolt- This revolt was led by **Ishan Chandra Roy, Shambhu Pal, Khoodi Mullah and supported by B.C. Chatterjee and R.C. Dutt** (1873, Pabna District, East Bengal, now in Bangladesh). The revolt was against policies of zamindars to prevent occupants from acquiring occupancy rights; the **Bengal tenancy Act of 1885** was passed as a result to this uprising.

Source: Spectrum (Page No. 160, 840-841)

Q.14) “In 1917, the Government of India set up a commission to study and report on problems of Calcutta University. This commission held the view that for the improvement of university education, improvement of secondary education was a necessary precondition. Most importantly, it recommended less rigidity in framing university regulations.”

The above passage is referring to which of the following commissions/committees?

- Hartog Committee
- Raleigh Commission
- Sargent Plan of Education
- Sadler Commission

Ans) d

Exp) Option d is the correct answer.

Option a is incorrect: An increase in the number of schools and colleges had led to deterioration of education standards. The **Hartog Committee was set up in 1929** by the Simon Commission as an auxiliary committee under the chairmanship of Phillip Hartog to prepare a report on education.

Option b is incorrect: In **1902, Raleigh Commission was set up** to go into conditions and prospects of universities in India and to suggest measures for improvement in their constitution and working. The commission precluded from reporting on primary or secondary education. Based on its recommendations, the Indian Universities Act was passed in 1904.

Option c is incorrect: The **Sargent Plan of Education** analysed the prevailing situation in education and provided a **long-term plan for educational development** in India. It gave details of programmes and schemes directed towards reconstructing the education system. The aim of the plan was to bring about universal literacy in India within 40 years of its introduction.

Option d is correct: In 1917, the Government of India appointed the **Calcutta University Commission**, commonly called the **Sadler Commission** after its chairman, Michael Sadler. The commission was set up to study and report on **problems of Calcutta University**, but its recommendations were applicable more or less to other universities also. It reviewed the entire field from school education to university education. It held the view that for the **improvement of university education, improvement of secondary education was a necessary precondition**. Its key observations were as follows:

- School** course should cover **12 years**. Students should enter university after an intermediate stage (rather than matric) for a three-year degree course in university.
- There should be **less rigidity** in framing university regulations.
- A **university** should function as a **centralised, unitary** residential-teaching autonomous body, rather than as scattered, affiliated colleges.

4) **Female education**, applied scientific and technological education, teachers' training, including those for professional and vocational colleges, should be extended.

Source: A brief History of Modern India, Spectrum Publication, 2020 edition.

Q.15) Urban Infrastructure Development Fund, proposed in the Union Budget 2023-24, will be managed by which of the following institutions?

- Ministry of Housing and Urban Affairs
- NITI Aayog
- Reserve Bank of India
- National Housing Bank

Ans) d

Exp) Option d is the correct answer.

Finance Minister in her Union Budget speech 2023-24 proposed to establish Urban Infrastructure Development Fund on the lines of Rural Infrastructure Development Fund through use of priority sector lending shortfall. This will be managed by the National Housing Bank, and will be used by public agencies to create urban infrastructure in **Tier 2 and Tier 3 cities**.

States will be encouraged to leverage resources from the grants of the 15th Finance Commission, as well as existing schemes, to adopt appropriate user charges while accessing the UIDF. Central government expects to make available Rs 10,000 crore per annum for this purpose.

Knowledge Base: National Housing Bank is a statutory organization set up on July 9, 1988 under the National Housing Bank Act, 1987. NHB is a government-owned entity. The government took over the NHB from the RBI in 2019 after buying entire stake of Rs. 1,450 crores. NHB regulates the housing finance system of the country, extends refinance to different primary lenders and lends directly in respect of projects undertaken by public housing agencies for housing construction and development of housing related infrastructure.

Source: Union Budget Speech 2023-24

Q.16) Consider the following differences between the nature of peasant movements in 19th and those in the 20th century:

- The movements of 19th century were generally centered on economic issues whereas movements of 20th century were generally centered on anti-colonialism consciousness among peasants.
- The leadership in the 19th century revolts were from among the peasants itself whereas in the 20th century movements were led by the Congress and the communist leaders.
- Unlike the movements of 19th century there was emergence of formal organizations in 20th century movements.
- Unlike the movements of 19th century, the movement of 20th century were limited to particular region.

Which of the statements given above are correct?

- 1, 2 and 3 only
- 2, 3 and 4 only
- 1 and 4 only
- 1, 2, 3 and 4

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct. The 19th century peasant movements were not focused to end the system of subordination or exploitation of the peasants. Their demands were almost centered wholly on economic issues whereas the peasant movement of 20th century became the part of Indian National Movement and were mainly anti-colonial in nature (Champaran, Kheda etc).

Statement 2 is correct. The leadership in the 19th century peasant revolts was from the peasantry itself (Indigo revolt 1859-60) whereas in 20th century the peasant movements were mainly led by the Congress and the communist leaders (the Tehbhaga Movement, Telangana Movement etc).

Statement 3 is correct. The 19th century peasant movements lacked any sort of formal organization, this lack caused the movement to be a short-term phenomenon whereas in the movements of 20th century there was an emergence of class-conscious organizations which later led to the formation of Kisan Sabhas.

Statement 4 is incorrect. The peasant movements of 19th century were limited to a particular local region whereas with the coming of National parties the peasant movements of 20th century became all India movements.

Source: Spectrum (Page No. 599-610)

Q.17) Consider the following statements regarding the Wood's Despatch:

1. It was considered as “Magna Carta” of English Education in British India.
2. It asked the government to assume the responsibility for education of the masses.
3. It recommended a system of grants-in-aid to encourage private enterprise.

Which of the statements given above is/are correct?

- a) 2 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: In 1854, Charles Wood prepared a despatch on an educational system for India. Considered the “**Magna Carta of English Education in India**”, this document was the first comprehensive plan for the spread of education in India.

Statement 2 is correct: It asked the government of India to assume responsibility for education of the masses, thus repudiating the ‘downward filtration theory’, at least on paper. It systematized the hierarchy from vernacular primary schools in villages at bottom, followed by Anglo-Vernacular High Schools and an affiliated college at the district level, and affiliating universities in the presidency towns of Calcutta, Bombay, and Madras.

Statement 3 is correct: It recommended a system of grants-in-aid to encourage private enterprise. In addition to this, the Despatch also laid stress on female and vocational education, and on teachers’ training.
Source: A brief History of Modern India, Spectrum Publication, 2020 edition.

Q.18) “He served as a foreign secretary to the government of India from 1842 to 1843. he was also the lieutenant governor of the North-Western Provinces. He had established a system of 897 locally supported elementary schools in centrally located villages. through the medium of vernacular languages. He improved communications, police protection, and social services in North-Western Provinces.”

Which of the following personalities is the above paragraph referring to?

- a) Charles Wood
- b) Sir John Philip Sargent
- c) James Thomson
- d) Jonathan Duncan.

Ans) c

Exp) Option c is the correct answer.

James Thomson served as magistrate-collector and settlement officer in Azamgarh (1832–37) and **foreign secretary** to the government of India (1842–43). In 1843 he was named **lieutenant governor of the North-Western Provinces**, and for the next 10 years he served in that post. He developed a **comprehensive scheme of village education** through the medium of **vernacular languages**. He had established 897 **locally supported elementary schools** in centrally located villages. In these village schools, useful subjects such as mensuration and agriculture sciences were taught. The purpose was to train personnel for the newly set up Revenue and Public Works Department.

<https://www.britannica.com/biography/James-Thomason>

Q.19) Consider the following statements regarding the Kisan Sabha Movement:

1. Home Rule League members helped in formation of Kisan Sabhas in the United province.
2. The movement remained non-violent in nature throughout its course of existence.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

The nationalist struggle against the colonial rule also gave inspiration to peasants and their leaders in several regions to express their grievances more openly. In the Awadh region of UP, a powerful peasant movement developed under the leadership of Baba Ramachandra.

Statement 1 is correct: Mainly due to the **efforts of the Home Rule activists, kisan sabhas were organised in** United Provinces. The United Provinces Kisan Sabha was set up in February 1918 by Gauri Shankar Mishra and Indra Narayan Dwivedi. Madan Mohan Malaviya supported their efforts.

Statement 2 is incorrect: In 1921, in some of UP districts, there were significant peasant agitations in which the crops of the **landlords were burnt**, the landlords' strongmen and the **police were attacked**, and some **markets were looted. The movement thus did not remain non-violent, and the peasants attacked the landlords and the government properties.**

Q.20) With reference to International Relations, what is the objective of 'Fab 4 Alliance'?

- a) To support Ukraines war effort through financial and humanitarian aid
- b) To promote free trade and economic integration across the Asia-Pacific region.
- c) To enhance the security and resilience of semiconductor supply chains
- d) To oppose any totalitarian tendencies and promote democratic values around the globe.

Ans) c

Exp) Option c is the correct answer.

The **"Chip 4" or "Fab 4" alliance** includes four of the world's top producers of semiconductors: the **U.S., Japan, Taiwan, and Korea**. It represents more than 70 percent of the value of the global semiconductor industry. It was first proposed by the US in March 2022 as part of **wider plans aimed at enhancing the "security" and "resilience" of semiconductor supply chains, including by reducing the world's reliance on chips made in China**. It is intended to cooperate on policy implementation that would support sustainable semiconductor manufacturing in the member states' home countries.

Source: <https://www.reuters.com/technology/taiwan-says-fab-4-chip-group-held-first-senior-officials-meeting-2023-02-25/>

Q.21) The Maxwell-Broomfield Commission is related to which of the following movements in the history of the modern India?

- Bardoli Satyagraha
- Civil Disobedience Movement
- Quit India Movement
- Champaran Satyagraha

Ans) a

Exp) Option a is the correct answer.

Maxwell-Broomfield Commission was appointed as a response to the people's protest during **Bardoli Satyagraha**.

Bardoli Satyagraha:

- The no-tax movement that was launched in Bardoli taluq of Surat district in Gujarat in 1928.
- At the roots of the Bardoli satyagraha lay the cold truth that the principal concern of the colonial government was not to improve socio-economic conditions of the people, but to find the means of increasing tax collection.
- The protests were sparked by a report prepared by an Indian officer of the Provincial Civil Service who was directed by the governor's office to examine the extent to which the tax settlement of 1896 could be revised upward.
- Based on the report, government recommended an increase in land revenue by 30% over the existing assessment.
- Local population was angered by the recommendations of the report and the government was not in the mood to examine the situation from people's perspective.
- Thus, the resolution was passed in February 1928 under the leadership of Sardar Patel. He advised all occupants of land to refuse payment of the revised assessment until the Government appointed an independent tribunal or accepted the current amount as full payment.

As a response to the people's protest through Bardoli Satyagraha, an independent enquiry was conducted by a judicial officer, Broomfield, and a revenue officer, Maxwell. They came to the conclusion that the increase had been unjustified and reduced the enhancement to 6.03 per cent.

India's Struggle for Independence by Bipin Chandra

Q.22) During the British Rule, Wagon Tragedy is associated with which of the following revolts?

- Direct Action Day
- The Travancore rebellion
- Mappila rebellion
- Royal Indian Navy Mutiny

Ans) c

Exp) Option c is the correct answer.

Recently a three-member review panel of the Indian Council of Historical Research (ICHR) proposed the removal of the martyrs of Wagon Tragedy from the compendium on martyrs of India's Freedom struggle.

Option c is correct. The **wagon tragedy** also known as wagon massacre was an incident which occurred **during the Malabar rebellion, also called Mappila Rebellion against British colonial rule in India that led to the deaths of 70 Indian prisoners.** In 1921, a rebellion against British colonial rule by Mappila Muslims broke out in the Malabar District of British India. Following the rebellion, 100 Mappila prisoners who had been taken into custody were ordered by the colonial authorities to be **transferred from the Malabar Coast**

to Podanur as the jails in the Malabar District were overcrowded. Thousands of Mappila prisoners were transported to other regions of British India during and after the rebellion via train, though they were typically transported in open-air carriages in order to prevent suffocation. However, **the 100 prisoners** (who were being transported in November of that year) were sent to Podanur **in a closed train carriage**, causing death of 70 prisoners.

Source : <https://www.thehindu.com/news/national/kerala/wagon-tragedy-victims-too-to-go-out-of-dictionary-of-freedom-struggle/article36120339.ece>

Q.23) Consider the following statements regarding the Government's Resolution on Education Policy of 1913:

1. The government decided to introduce free and compulsory primary education in a phased manner.
2. As per the policy it was decided to establish a university in each province.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

National leaders urged the Government to bring compulsory primary education like state of Baroda did in 1906. In this respect, Gokhale introduced a bill in March 1911 calling for the introduction of free and compulsory primary education in a phased manner. The bill was, however, rejected by a select committee. The government came up with its Resolution on Education Policy in 1913.

Statement 1 is incorrect: The government **refused to take up the responsibility of compulsory education** but accepted the policy of removal of illiteracy and urged provincial governments to take early steps to provide free elementary education to the poorer and more backward sections. Private efforts were to be encouraged for this and the quality of secondary schools was to be improved.

Statement 2 is correct: A **university**, was decided, to be established **in each province** and teaching activities of universities were to be encouraged.

Knowledge Base: Regarding women's education, it was suggested that there should be curriculum of practical utility for girls, and that examination of girls should not get much importance; however, there should be an increase in the number of women teachers and inspectors.

Source: Spectrum

Q.24) Consider the following statements regarding the Trade Union Act, 1926:

1. The Act explicitly defined the meaning of 'trade disputes'.
2. It provided detailed provisions for the registration of a trade union.
3. It prohibited members of trade unions from participating in any kind of political activity.

Which of the statements given above is/ are **incorrect**?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 3 only

Ans) d

Exp) Option d is the correct answer.

Trade Unionism aims to collectively assert the rights of workers. The Trade Union Act, 1926 was enacted to provide recognition to trade unions as legal associations. It contains detailed rules regarding the registration and regulation of trade unions.

Statement 1 is correct: The Act defines the important terms like ‘trade disputes’, ‘trade unions’ etc. According to the Act, "trade dispute" means

“Any dispute between employers and workmen or between workmen and workmen, or between employers and employers which is connected with the employment or non-employment, or the terms of employment or the conditions of labour, of any person, and "workmen" means all persons employed in trade or industry whether or not in the employment of the employer with whom the trade dispute arises.”

Statement 2 is correct: The Act provided for detailed provisions regarding the registration of trade unions. It contains a dedicated Chapter (Chapter-II), which deals with the registration related matters like appointment of registrars, mode of registration, application for registration, cancellation of registration and so on.

Statement 3 is incorrect: The Act does not prohibit members from participating in political activities (it only provides certain regulations or restrictions). The Act even allows setting up of separate fund for political purposes. This fund can be used, for example, for the payment of expenses related to election of members to legislative bodies, local authorities, maintenance of any person who is a member of any legislative body, etc. Giving political representation to workers’ representatives has been one of the most important objectives of the trade union movement in India.

Q.25) Economic Survey 2022-23 has pointed major measurement issues in Female Labour Force Participation Rate. Which of the following statements highlight these issues?

1. Clubbing of productive work with domestic duties.
2. Periodic Labour Force Survey (PLFS) questionnaire relies mainly on a single question for measuring the labour force status of an individual.
3. It only measures work as a market product and does not include the value of women’s unpaid domestic work.

Select the correct answer using the code given below:

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Economic survey has pointed out that, the common narrative of Indian women’s low LFPR misses the reality of working females integral to the economy of the household and the country. Measurement of employment through the survey design and content can make a significant difference to final LFPR estimates.

Statement 1 is correct: Use of overly broad categories clubbing productive work (collection of firewood, poultry farming, etc.) with domestic duties can in one sweep shift a significant proportion of women in the labour force into the out-of- labour-force category. For example, unless the production of primary goods is identified as the main activity by the respondent, the PLFS questionnaire would categorize women who do both domestic activities and primary goods production/collection into ‘Activity Code 93,19 and thus out-of-the-labour-force.

Statement 2 is correct: No Recovery questions in the PLFS questionnaire. As, the survey design relies mainly on a single question for measuring the labour force status of an individual, which eliminates the scope to rectify any error in self-reporting, considering the large rural population and literacy levels. Contrary to ILO recommendations, there are no additional questions ('recovery questions') in the PLFS questionnaire to double-check individuals' labour force status, relying too much on how the individual self-identifies in the first instance.

Statement 3 is correct: Measurement of "Work" alongside "Employment". As, there is a need to broaden the horizon of measuring work, which constitutes the whole universe of productive activities alongside employment. According to the latest ILO standards, limiting productive work to labour force participation is narrow and only measures work as a market product. It does not include the value of women's unpaid domestic work, which can be seen as expenditure-saving work such as collecting firewood, cooking, tutoring children, etc, and contributes significantly to the household's standard of living.

Source: Economic Survey 2022-23, Chapter 6, Pg. 160.

Q.26) Consider the following statements regarding Lord Macaulay's Minute, 1835:

1. Lord Macaulay considered Indian learning as inferior to European learning especially in scientific knowledge.
 2. The minute advocated English education to be taught to masses through establishment of village schools.
- Which of the statements given above is/are correct?
- a) 1 only
 - b) 2 only
 - c) Both 1 and 2
 - d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

The famous **Lord Macaulay's Minute** advocated the limited government resources were to be devoted to teaching of Western sciences and literature through the medium of English language alone.

Statement 1 is correct: Lord Macaulay held the view that "**Indian learning was inferior to European learning**"—which was true as far as physical and social sciences in the contemporary stage were concerned.

Statement 2 is incorrect: Lord Macaulay wanted the government to spend money only on imparting western education and not on oriental education. Lord Macaulay's Minute **never intended for the British government to teach English education to the masses** through village schools in India. On the contrary, he advocated that the **government try to educate only a few Indians**, who would in turn teach the rest of the masses. This is called the '**downward filtration**' policy. He also advocated the **shutting down of all colleges** where only eastern philosophy and subjects were taught.

Source: A Brief History of Modern India Revised and Enlarged Edition 2019 Chapter 30 Development of Education

Q.27) Which of the following were the objectives of All India Kisan Sabha, 1936?

1. Abolition of Zamindari.
2. Security of tenure for tenants.
3. Securing living wage for Agricultural labourers.
4. Complete abolition of land revenues.

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) a

Exp) Option a is the correct answer.

In 1936, at the Lucknow session of the Congress, All India Kisan Sabha was formed with Swami Sahajanand as its first president and N.G. Ranga as its first General Secretary. The first session of All India Kisan Sabha was greeted in person by Jawaharlal Nehru.

Options 1,2 and 3 are correct: The All-India Kisan Sabha finalised a Kisan Manifesto in Bombay and formally presented it to the Congress Working committee to be incorporated into its forthcoming manifesto for the 1937 elections. The following were the items included by this manifesto,

- 1) Abolition of Zamindari
- 2) Security of tenure for Peasants
- 3) A living wage for Agricultural labourers
- 4) The recognition of Peasant Unions.

Option 4 is incorrect: Abolition of land revenue and rents is not the objective of the All India Kisan Sabha, rather the Saba demanded for 50% reduction in land revenue and rent.

Source: Bipin Chandra- Peasant Movements in the 1930s and 40s (pg no 345)

<https://egyankosh.ac.in/bitstream/123456789/44334/1/Block-6.pdf> (pg no 14 last para)

Q.28) Which among the following factors influenced the British India Government's policy regarding promotion of education in British India?

- 1. Agitation by enlightened Indians in favour of modern education.
- 2. Need of educated Indians at subordinate posts in the administration.
- 3. To expand market for British manufactures in India.

Select the correct answer using the codes given below:

- a) 2 and 3 only
- b) 1 and 2 only
- c) 1 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The measures taken by the government for the expansion of education in India were sheerly inadequate. Moreover, the steps taken by the rulers to promote education were inspired by the concerns other than philanthropic. The following factors influenced the education policy in India during British rule:

Statement 1 is correct: Agitation in favour of modern education by enlightened Indians, Christian missionaries, and humanitarian officials.

Statement 2 is correct: The need to ensure a cheap supply of educated Indians to man an increasing number of subordinate posts in administration and in British business concerns—thus there was an emphasis on English medium as the language of administration and of education.

Statement 3 is correct: The hope that educated Indians would help expand market for British manufactures in India. The British thus wanted to use modern education to strengthen the foundations of their political authority in India.

Source: Brief History of Modern India- Spectrum Publication. 2020 edition

Q.29) With reference to Santhal Rebellion, consider the following statements:

1. The primary reason behind the rebellion was the British policy of banning human sacrifice.
2. During the movement, Santhals proclaimed an end to the company rule.
3. Santhals enacted a parallel government to collect taxes and made its own laws.
4. After the rebellion, the British made it illegal for Santhals to transfer their land to non-Santhals.

Which of the statements given above are correct?

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 3 and 4 only
- d) 1 and 2 only

Ans) b

Exp) Option b is the correct answer.

The Santhal tribes are mostly distributed in Jharkhand, Odisha and West Bengal. The East India Company divided the **Damin-i-Koh from the Jharkhand area in 1832** and handed it to the Santhals to settle with the promise of non-interference in their country. However, the interference of Zamindar, Money lenders and British Land revenue policy made Santhals feel alienated from their lands and this led to Santhal rebellion (1855-56).

Statement 1 is incorrect: The British policy of **banning human sacrifices is not the main cause of Santhal rebellion**, instead it was the main cause of **Khond Uprisings (1837-1856)**. The main cause of Santhal rebellion are **exploitative practices of Money lenders, Zamindars and British Land revenue policy**.

Statement 2 is correct: **The Santhals explicitly declared an end to Company rule** and declared the territory between Bhagalpur and Rajmahal independent under the leadership of two brothers, **Sidhu and Kanhu Murmu**.

Statement 3 is correct: **It is true that Santhals created a Parallel government to collect taxes and to create their own laws to administer them**. This along with their resolve to overthrow company rule threatened British sovereignty in India. The result is the **ruthless suppression of the Santhal rebellion** by the British.

Statement 4 is correct: It is true that after the subsidence of Santhal rebellion, the **British made it illegal for Santhals to transfer their land to non santhals**. The British hoped that this measure would prevent the takeover of Santhal lands by the outsiders.

Also, after the Santhal Revolt (1855-56), **the British created the Santhal Pargana** by carving out 5,500 square miles from districts of Bhagalpur and Birbhum. The colonial state hoped that by creating a new territory for the Santhals and imposing some special laws within it, the Santhals could be conciliated.

Q.30) Which of the following could be the consequences of 'Geomagnetic storm' in the Earth's magnetic field?

1. Disruption of global navigation systems
2. Creation of beautiful auroras in the skies
3. Damage to satellite electronics
4. Reversal of oceanic gyre circulation

Select the correct answer using the codes given below:

- a) 1 and 3 only
- b) 2 and 4 only
- c) 1, 2 and 3 only
- d) 1, 3 and 4 only

Ans) c

Exp) Option c is the correct answer.

Geomagnetic storms are disturbances in the Earth's magnetic field that are caused by the **interaction between the Earth's magnetosphere and solar wind**. The solar wind is a stream of charged particles that flows from the Sun and interacts with the Earth's magnetic field. When the solar wind encounters the Earth's magnetosphere, it can cause fluctuations and disturbances in the magnetic field, which can lead to a geomagnetic storm. The **consequences of 'Geomagnetic storm' in the Earth's magnetic field are:**

Option 1 is correct: Global navigation systems rely on precise measurements of the Earth's magnetic field to accurately determine location and orientation. Geomagnetic storms can **disrupt these systems by causing fluctuations in the magnetic field**, leading to errors in navigation and communication.

Option 2 is correct: Geomagnetic storms can cause **charged particles from the Sun to interact with the Earth's magnetic field, resulting in colorful displays of light known as auroras**. These are a natural and beautiful phenomenon that can be observed in regions near the Earth's poles.

Option 3 is correct: Geomagnetic storms can cause **damage to satellite electronics by inducing electrical currents** that can overload circuits and damage sensitive equipment. This can lead to communication disruptions, loss of data, and other issues that can impact satellite-based services and infrastructure.

Option 4 is incorrect: Oceanic gyre circulation is driven by a combination of factors, including the Earth's rotation, prevailing winds, and ocean currents. **Geomagnetic storms are not known to cause a reversal of oceanic gyre circulation**, which is a much larger and more complex process.

Q.31) With reference to Telangana movement, consider the following statements:

1. One of the reasons of the movement was subjugation of peasants into forced labour by landowners.
2. To bring peasant friendly reforms, Indian National Congress established Jagir Ryotu Sangham to pressurize the Government.
3. The movement experienced active participation of women.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The **Telangana Movement (1946-52)** of Andhra Pradesh was fought against the feudal oppression of the rulers and local landowners.

Statement 1 is correct: It is true that the **Telangana movement was largely a peasants' reaction against practise of forced labour (called Vetti)**. In addition to forced labour the illegal exaction and eviction of the poor tenants by the landowners were the major reasons behind Telangana movement.

Statement 2 is incorrect: Although the **Indian National Congress** along with Andhra Maha Sabha (AMS) raised the issue of poor condition of the peasantry of Telangana since late 1920, the active leadership role for this movement was given by AMS. It is **Andhra Mahasabha (not Congress) which established Jagir Ryotu Sangham** to pressure the Government to bring peasant friendly reforms in Telangana.

Statement 3 is correct: **Telangana movement experienced active participation of women** and exploitation of women by the upper caste landowners had become a prominent issue in these movements. **Armed women** defended themselves against the **razakar** ((state paramilitary wing of the Telangana government).

<https://www.cambridge.org/core/books/abs/telangana-peoples-struggle-and-its-lessons/women-in-the-telangana-movement/23DDD34D312DC29BA738B8E3C8E3C497#:~:text=Summary-,Women,-played%20an%20important>

Q.32) Consider the following statements with reference to the All-India Trade Union Congress (AITUC):

1. Chittaranjan Das was elected as the first president of AITUC.
2. It was influenced by social democratic ideas of the British Labour Party.
3. Its formation was supported by the Indian National Congress.

Which of the statements given above is/are correct

- a) 1 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

International events like the establishment of a socialist republic in the Soviet Union, formation of the Comintern and setting up of International Labour Organisation (ILO) lent a new dimension to the movement of the working class in India.

Statement 1 is incorrect: The All-India Trade Union Congress was founded on October 31, 1920. The Indian National Congress president for the year, **Lala Lajpat Rai, was elected as the first president of AITUC and Dewan Chaman Lal as the first general secretary.** The prominent Congress and swarajist leader **Chittaranjan Das (C.R. Das) presided over the third and the fourth sessions** of the AITUC.

Statements 2 and 3 are correct: The AITUC **was influenced by social democratic ideas of the British Labour Party.** The Gandhian philosophy of non-violence, trusteeship, and class-collaboration had great influence on the labour class movement aided by AITUC. **The Gaya session of the Congress (1922) welcomed the formation of the AITUC, and a committee was formed to assist it.**

Source: Page 587, Chapter 32 - The Movement of the Working Class of spectrum

Q.33) ‘The British Government, deeply worried about the rapidly growing communist influence, arrested some leaders including S.A. Dange and Ben Bradley under this case. The basic aim of the Government was to behead the trade union movement and to isolate the Communists from the national movement. The defence of the prisoners in this case was to be taken up by many nationalists including Jawaharlal Nehru.’
The above passage refers to which of the following conspiracy case?

- a) Meerut Conspiracy Case
- b) Lahore Conspiracy Case
- c) Kanpur Bolshevik Conspiracy case
- d) Delhi Conspiracy Case

Ans) a

Exp) Option a is the correct answer.

Option a is correct: The Government was deeply worried about the rapidly growing communist influence in the national and trade union movements. It decided to strike hard. In March 1929, it arrested thirty-two radical political and trade union activists of them three were Englishmen. The trial resulted in the conviction of Muzaffar Ahmed, S.A. Dange, Joglekar, Philip Spratt, Ben Bradley and others. The basic aim of the Government was to behead the trade union movement and to isolate the Communists from the national movement. The defence of the prisoners was to be taken up by many nationalists including Jawaharlal Nehru, M.A. Ansari and M.C. Chagla. Gandhiji visited the Meerut prisoners in jail to show his solidarity with them and to seek their cooperation in the coming struggle.

Option b is incorrect: In the **Lahore Conspiracy Case** all the charges including the **killings of Saunders and Chanan Singh, the Assembly Bomb Case and the setting up of bomb factories were put together**. On 17th December, 1928, **Bhagat Singh, Chandrashekhar Azad and Rajguru assassinated J.P. Saunders at Lahore**. The police was able to uncover the details of the Saunders assassination and Bhagat Singh, Sukhdev, Rajguru, and several others were tried in the Lahore Conspiracy case.

Option c is incorrect: The **communist groups** in cities of Calcutta, Bombay, Madras areas were **involved in organising the workers and educating them with communist ideology and politics**. So, **Kanpur-Bolshevik conspiracy case was master-minded to smash the budding communist organisation**. Leaders like S.A. Dange, Muzaffar Ahmed, Shaikat Usmani, Nalini Gupta—were jailed in the Kanpur Bolshevik Conspiracy.

Option d is incorrect: **Rashbehari Bose and Sachin Sanyal** staged a spectacular **bomb attack on Viceroy Hardinge** while he was making his official entry into the **new capital of Delhi** in a procession through Chandni Chowk in December **1912**. **Investigations following the assassination attempt led to the Delhi Conspiracy trial**.

<https://egyankosh.ac.in/bitstream/123456789/20636/1/Unit-10.pdf>

Q.34) The Butler Committee was established in December 1927. In this context, what was the purpose behind establishing the committee?

- To examine the recruitment process of Indian Civil Services (ICS).
- To report on the condition of provincial government and its powers.
- To report on the conditions and prospects of universities in India
- To examine the nature of relationship between the princely states and the government.

Ans) d

Exp) Option d is the correct answer.

Option d is correct: The Butler Committee (1927) was **set up to examine the nature of relationship between the princely states and government**. It was a three-member committee headed by Harcourt Butler. India's viceroy Irwin appointed the committee in December, 1927. It gave the following recommendations:

- Paramountcy must remain supreme and must fulfil its obligations, adopting and defining itself according to the shifting necessities of time and progressive development of states.
- States should not be handed over to an Indian Government in British India, responsible to an Indian legislature, without the consent of states.

Source: Page 606, Chapter 34 -The Indian State of spectrum.

Q.35) Which one of the following international organisations has recently released Services Trade Restrictiveness Index, 2022 (STRI)?

- World Trade Organisation
- Organization for Economic Co-operation and Development
- World Economic Forum
- International Monetary Fund

Ans) b

Exp) Option b is the correct answer.

Services Trade Restrictiveness Index (STRI) was launched in 2014 by Organization for Economic Co-operation and Development (OECD) and provides information on regulations affecting trade in services in 22 sectors across all member countries.

The regulatory database and indices are updated annually in December. There is also a Digital STRI that identifies, catalogues, and quantifies cross-cutting barriers that affect services traded digitally.

Scoring: This index takes values between zero and one, one representing a totally closed and zeros a fully open sector.

In the recent services trade restrictiveness index (STRI), **India's rank improved a notch to 47 from 48 among 50 countries surveyed by the Organization for Economic Co-operation and Development (OECD).**

Source: https://www.business-standard.com/article/economy-policy/india-s-rank-improves-in-oecd-services-trade-restrictiveness-index-123021601063_1.html

Q.36) Consider the following statements regarding the Indian Universities Act, 1904:

- The act gave government a veto power over universities' senate regulations.
- It had a provision of sanctioning five lakh rupees per annum for improvement of higher education and universities.

Which of the statements given above is/are correct?

- 1 only
- 2 only
- Both 1 and 2
- Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

In 1902, Raleigh Commission was set up to go into conditions and prospects of universities in India and to suggest measures for improvement in their constitution and working. The commission precluded from reporting on primary or secondary education. Based on its recommendations, the Indian Universities Act was passed in 1904. The main provisions of the act are discussed below:

Statement 1 is correct: According to the act, **government was to have powers to veto universities' senate regulations** and could amend these regulations or pass regulations on its own. The nationalists saw provisions of the act as an attempt to strengthen imperialism and to sabotage nationalist feelings.

Statement 2 is correct: According to the act, **five lakh rupees were to be sanctioned per annum for five years for improvement of higher education and universities.** Also, it made a provision that universities should give more attention to study and research.

Source: Brief History of Modern India- Spectrum Publication, 2020 edition

Q.37) In the context of modern history of India, which of the following statements is correct about the Moplah revolt, 1921?

- Forced religious conversion of Muslims is one of the major causes of this rebellion.

- b) Mahatma Gandhi initially supported this movement.
- c) The rebellion came to an end after the British passed a law to restore land rights to Muslim tenants.
- d) The movement remained largely as a nonviolent movement.

Ans) b

Exp) Option b is the correct answer.

The Moplah peasant movement was organised in 1921 among the peasants of Malabar district in Kerala. The **Moplah tenants were Muslims** and they agitated against the Hindu landlords and the British government.

Option a is incorrect: Forced **religious conversion of Muslims is not the reason** why Moplah rebellion was started. The major causes of the Moplah rebellion were,

- 1) Insecurity among tenants, due to an unfavourable land tenure system. It caused Moplahs to be ejected from their land without any appropriate notice.
- 2) High renewal of fees fixed by the Jenmis (landlords)
- 3) High rent fixed for Moplah and discriminating them against Hindu tenants

Option b is correct: It is true that **Mahatma Gandhi initially supported this movement**, however he **distanced himself** once the movement took a **violent and communal tone**. In the **early 1920s**, Mahatma Gandhi gave a call for non-cooperation and included the demand of Khilafat to achieve Hindu-Muslim unity and the Moplah rebellion gathered momentum after the launch of the Non-cooperation movement in Malabar region. The movement mainly targeted landlords (who were largely Hindus) and British officials.

Option c is incorrect: The **Moplah rebellion came to an end after the British suppression** of this movement. The British established a **special battalion called the Malabar Special Force** to suppress the riot and the British did not pass any law to restore the land holding rights to Muslim tenants.

Option d is incorrect: The Moplah rebellion was **largely a violent movement**, the rebellion's principal targets were Landlords and British officials. Some historical accounts state the uprising led to the **loss of around 10,000 lives, including 2,339 rebels**.

Source: <https://egyankosh.ac.in/bitstream/123456789/67775/1/Unit-8.pdf>

<https://indianexpress.com/article/explained/malabar-rebellion-of-1921-explained-7462838/>

Q.38) Recently, the term 'Financial Contagion' appeared in Economic Survey 2022-23. In the given context, which of the following statements best describes the term?

- a) It refers to negative impact of the banking sector issues on the overall economy
- b) It refers to the solutions provided for the recovery of economy from Recession.
- c) It is a disturbance in the banking system caused by cyber-attack.
- d) It is the spread of financial instability from one market or country to another.

Ans) d

Exp) Option d is the correct answer.

Option d is correct: A **Financial contagion is the spread of an economic crisis from one market or region to another and can occur at both a domestic or international level**. It often causes a domino effect on financial markets, financial institutions, and the broader economy.

- 1) Financial contagion can **occur due to various factors**, including the **interconnectedness of financial markets**, the **globalization of financial transactions**, the **proliferation of complex financial instruments**, and the **increased speed and volume of financial transactions**.
- 2) This may lead to a loss of confidence in the financial system and a rush to exit investments or liquidate assets.
- 3) The 1997 Asian financial markets crisis and the 2008 global financial crisis are the prime example of financial contagion.

SFG 2023 | LEVEL 2 | Test #25 - Solutions | 

Source: <https://www.investopedia.com/terms/c/contagion.asp>
<https://world101.cfr.org/global-era-issues/monetary-policy-and-currencies/global-consequences-financial-contagion>
<https://www.oecd.org/economy/monetary/50556019.pdf>

Q.39) Which of the following statements is correct regarding the Policy of Subordinate Isolation?

- The Indian states surrendered all forms of external sovereignty but retained sovereignty in internal administration
- The Indian states retained external sovereignty but surrendered the rights of revenue collection
- The Indian states were forced to surrender sovereignty in the matters of external affairs as well as internal administration.
- The Indian states were allowed to retain external as well as internal sovereignty.

Ans) a

Exp) Option a is the correct answer.

Under the Policy of Subordinate Isolation of Britishers, **the Indian states were forced to surrender all forms of external sovereignty but retained sovereignty in internal administration.** The policy was **actively pursued during the period 1813-57.** This Policy marks the **emergence of the theory of 'Paramountcy'.** Under this policy, the British Residents in Indian States were elevated from diplomatic agents of a foreign power to executive and command officers of a superior government. **This was also a period of aggressive territorial expansion.** For instance, prior approval was required by the Indian States for the succession matters. In 1834, the Board of Directors of Company issued guidelines to annex states wherever and whenever possible.

Knowledge Base: Under the **Policy of Subordinate Union (1857-1935),** the Crown assumed paramount supremacy over Indian states. The British government has started to interfere in the internal affairs of the states, but abandoned the policy of annexation.

Source: Spectrum's A Brief History of Modern India (Page 641, Chapter 34)

Q.40) With reference to Raising and Accelerating MSME Performance (RAMP) scheme, consider the following statements:

- The scheme offers scope for concerned State governments to prepare their own plans to improve the growth of MSMEs.
- The World Bank provides funding support to this scheme based on the fulfilment of certain conditions by the government of India.
- At national level, Prime Minister Economic Advisory council acts as a nodal agency for this scheme.

Which of the statements given above are correct?

- 1 and 2 only
- 1 and 3 only
- 2 and 3 only
- 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The RAMP scheme aims at **improving access of MSMEs** to market and credit, technology upgradation and addressing issues of delayed payments and greening of MSMEs.

Statement 1 is correct: The RAMP scheme offers the scope for concerned State governments to prepare their own plan for the development of MSME sectors in the state. Important component of RAMP is

preparation of **Strategic Investment Plans (SIPs)**, in which **all States/UTs will be invited** to prepare their development plans for MSMEs and the funding will be based on the appraisal of this plan by the Ministry of MSME.

Statement 2 is correct: The World Bank provides funding support for this scheme. Of the total financial outlay of 6,062.45 crore, World bank provided **3750 crores as loans based on the fulfilment of following conditions** by the Government of India.

- 1) Implementing the **National MSME Reform Agenda**
- 2) Accelerating MSME Sector **Centre-State collaboration**
- 3) Enhancing effectiveness of Technology Upgradation Scheme (**CLCS-TUS**)
- 4) Strengthening Receivable **Financing Market** for MSMEs
- 5) Enhancing Effectiveness of **Credit Guarantee Trust** for Micro and Small Enterprises (**CGTMSE**) and **Greening and Gender** delivery
- 6) Reducing the incidence of **delayed payments**

Statement 3 is incorrect: At national level the **Ministry of Micro, Small and Medium enterprises (MoMSME) act as a nodal agency for this scheme, not PM Economic Advisory Council.** RAMP program will help setup a high-level **MSME Council, headed by the Minister for MSME** to enable better coordination between national and state-level programs and further it provides overall monitoring and policy overview of RAMP programme.

Source: <https://pib.gov.in/PressReleasePage.aspx?PRID=1811360>

Q.41) The increasing strength of trade union movements made the British Government to put legislative restrictions. In this context, consider the following statements regarding the Trade Disputes Act (TDA) of 1929:

1. It made it compulsory to appoint Conciliation Boards for settling industrial disputes.
2. It prohibited strikes in public utility services under any circumstance.

Which of the statements given above is/ are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

During late 1920s, trade union movement in India was **influenced by strong communist forces.** Under the leadership of communists, there were **incidents of violence and other forms of extremism.** This compelled the British Government of India to enact the Trade Union Act (TDA), 1929.

Statement 1 is correct: The TDA made it compulsory to appoint Court of Inquiry as well as Conciliation Boards for settling industrial disputes. The objective of Conciliation Board was to resolve disputes amicably by arriving at a mutually acceptable solution. The conciliator function as a neutral third party who facilitate negotiations between the disputed parties.

Statement 2 is incorrect: Public utility services include posts, railways, water, electricity etc. The TDA made strikes in public utility services illegal. However, it was not illegal if each individual worker planning to go on a strike gave an advance notice of one month to the administration. Hence, **by giving a month's notice, even a worker in public utility service could go on a strike.**

Q.42) Which of the following statements most appropriately describes the objective of the Policy of Ring Fence?

- To establish Paramountcy of the British Crown all over India.
- To make Indian rulers dependent on army and ammunition of the British.
- To create buffer zones to defend the Company's frontiers.
- To confiscate kingdoms where there is no specific legal heir.

Ans) c

Exp) Option c is the correct answer.

The Policy of Ring Fence was actively pursued by the Britishers in India during the period 1765-1813. It was introduced by **Warren Hastings**. The main aim of the Policy was to **create buffer zones to protect the Company's frontiers**. This was in the **backdrop of threats from Marathas and Afghans invaders**. To avoid possible invasion of Bengal and Company's stakes, the Britishers created Awadh as their buffer. The Britishers undertook to organize Awadh's defense to safeguard Bengal's security. The Policy was **further implemented by Wellesley in extended form**, where he sought to reduce states to a position of dependence on British Government in India.

Source: Spectrum's a Brief History of Modern India (Page 641, Chapter 34)

Q.43) With reference to the integration of Indian princely states, who were the 'Razakkars'?

- A paramilitary organization that was formed to oppose the idea of merger of Hyderabad with India.
- Military force of Junagarh state who fought against India.
- A tribal community in Northeast India known for their martial arts.
- Tribal militia who attacked Jammu and Kashmir opposing its integration with India.

Ans) a

Exp) Option a is the correct answer.

The Razakkars were a Muslim paramilitary organization that emerged in Hyderabad State in the late 1940s. They were formed to support the rule of the Nizam and opposed the idea of merging Hyderabad with India. The Razakkars were led by Kasim Razvi, who was also the founder of the Majlis-e-Ittehadul Muslimeen (MIM) party. The Razakkars were notorious for their violent attacks on Hindus and other minority communities in Hyderabad. After the Indian government launched a military operation in September 1948 to annex Hyderabad, the Razakkars were disbanded, and their leaders were arrested.

Source: India Since Independence by Bipin Chandra ch 6 The initial Years

Q.44) Who were Poligars, with reference to the history of India?

- Traditional landed militia in Odisha who enjoyed rent free land tenures for their military services.
- Feudal lords appointed as military chiefs and governors in Vijayanagara empire.
- Aboriginal tribesmen of the Jungle Mahal who were basically farmers and hunters.
- Low-caste peasants who followed the teachings of Aniruddhadeva.

Ans) b

Exp) Option b is the correct answer.

Polygars were a group in Southern India in the administration of various rulers who rose in revolt in the colonial period. Details are as follows:

Option a is incorrect - The Paiks of Odisha were the traditional landed militia ('foot soldiers' literally) and enjoyed rent free land tenures for their military service and policing functions on a hereditary basis. The English Company's conquest of Odisha in 1803, and the dethronement of the Raja of Khurda had greatly

reduced the power and prestige of the Paiks. The Paik Rebellion succeeded in getting large remissions of arrears, reductions in assessments, suspension of the sale of the estates of defaulters at discretion, a new settlement on fixed tenures and other adjuncts of a liberal governance.

Option b is correct - Polygars or Poligars (Palaiyakkarars) were feudal lords who were appointed as military chiefs and administrative governors from the time of the Vijayanagara Empire in parts of Southern India. (They were given the charge of a Palayam or a group of villages). It was the Polygars who collected taxes from the cultivators. But the East India Company came into conflict with the Polygars over the question of who should collect taxes, and sought to control the Polygars. The first rebellion, also called the First Polygar War broke out in September 1799 in Tirunelveli district in modern Tamil Nadu.

Option c is incorrect - Chuar aboriginal tribesmen of the Jungle Mahal of Midnapore district and also of the Bankura district (in Bengal) to take up arms. These tribes people were basically farmers and hunters. The Chuars were prominent in Manbhum and Barabhum, especially in the hills between Barabhum and Ghatsila. They held their lands under a kind of feudal tenure, but were not strongly attached to the soil, being always ready to change from farming to hunting, at the bidding of their jungle chiefs or zamindars.

Option d is incorrect - The revolt of the Moamarias in 1769 was a potent challenge to the authority of Ahom kings of Assam. **The Moamarias were low-caste peasants who followed the teachings of Aniruddhadeva (1553-1624),** and their rise was similar to that of other low-caste groups in north India. Their revolts weakened the Ahoms and opened the doors for others to attack the region, for instance, in 1792, the King of Darrang (Krishnanarayan), assisted by his band of *burkandazes* (the demobilised soldiers of the Muslim armies and zamindars) revolted.

Q.45) Consider the following statements regarding Indian Antarctic Act, 2022:

1. The Act is applicable on a citizen of India as well a citizen of any other country.
2. According to the act, no permit is required to collect sample of mineral resources from Antarctic for the purposes of scientific research.
3. Commercial fishing in Antarctica is allowed only after obtaining permit from the appropriate authority.

Which of the statement(s) given above is/ are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 only
- d) 3 only

Ans) b

Exp) Option b is the correct answer.

Recently, Indian Antarctic Act, 2022 has been passed. Its key objectives include having India's **own national measures** for protecting Antarctic environment, ensuring **de-militarization** of the region, getting rid of **mining** or illegal activities, management of growing Antarctic **tourism** and sustainable development of **fisheries**.

Statement 1 is correct: The Indian Antarctic Act, 2022 is applicable on **Indian citizens, citizens of foreign countries** and a **vessel or aircraft** registered in India or outside India. It is also applicable on a company, body corporate, corporation, partnership firm, joint venture, an association of persons or any other **entity incorporated, established or registered as such under any law in force in India.**

Statement 2 is incorrect: In general, drilling, dredging, excavating, collecting samples etc. of mineral resources is **not allowed**. However, **permission can be granted** for these activities for the purposes of **scientific research or construction, repair and maintenance of an Indian station or any other structure.** Hence, permit is required.

SFG 2023 | LEVEL 2 | Test #25 – Solutions |

Statement 3 is correct: Any person who intends to go to Antarctica for the purpose of **commercial fishing shall apply for a permit** to the appropriate authority.

Other regulated and prohibited activities:

Regulated Activities- 'Permit' is required	Absolute Prohibition
1) Indian expedition to Antarctica	1) Nuclear explosion or disposal of radioactive waste material
2) Indian station in Antarctica	2) Introducing non-sterile soil
3) Permit for vessel and aircraft entering Antarctica	3) Damage, destroy or remove any historic site or monument or any of its part
4) Permit for mineral resource activities.	4) Discharge of certain specified products or substances.
5) Permit for introducing non-native animals and plants into Antarctica.	5) Other specified activities
6) Permit for introducing microscopic organisms.	
7) Permit for discharge into sea.	
8) Permit for waste disposal.	
9) Permit to enter protected areas.	
10) Special permit for commercial fishing in Antarctica	
11) Other specified activities	

Knowledge Base:

Other important provisions of the Act:

- 1) **Background:** To give effect to the provisions of **Antarctic Treaty**, the **Protocol on Environment Protection (Madrid Protocol)** to the Antarctic Treaty and to the **Convention on the Conservation of Antarctic Marine Living Resources**. **India acceded to Antarctic Treaty system in 1983.**
- 2) Central Government shall establish a **Committee on Antarctic Governance and Environmental Protection**. This committee shall be chaired by the **Secretary, Ministry of Earth Sciences**.
- 3) This committee shall establish a **waste classification system and waste management plans**.

Important Facts about Antarctica

- 1) It is the southernmost continent, fifth largest in area and contains the geographic South Pole.
- 2) It is mostly uninhabited, except approximately 40 permanent stations established by several countries. **Maitri and Bharti are India's research stations** on the continent.
- 3) Native species of animals include **mites, nematodes, penguins, seals and tardigrades** etc. Vegetation occurs, mostly, in the form of **lichens and moss**.

Q.46) Consider the following statements regarding the Bhil Uprisings of 19th century in colonial India:

1. The Bhil revolt was a series of uprisings that took place in present-day Bihar.
2. The Bhil rebels revolted against the British rule because of famine, economic distress and misgovernment.
3. The British used both force and conciliatory efforts to control the uprising.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The Bhils were a tribal community that had traditionally relied on the forest for their livelihoods. However, with the arrival of the British colonial authorities, their access to forest resources was restricted, leading to resentment among the Bhil community.

Statement 1 is incorrect: The Bhil revolt was a series of uprisings that took place in the 19th century (in 1817-19, 1825, 1831 and 1846) in present-day Gujarat, Maharashtra and Rajasthan.

Statement 2 is correct: The Bhil rebels were led by tribal leaders who fought against the British colonial authorities for the rights of their communities, including the control over land and forests. They revolted against Company rule in 1817-19, as they had to face famine, economic distress and misgovernment.

Statement 3 is correct: The British government did respond to the Bhil revolt by increasing its military presence in the region, but it did not suppress the rebellion with only force. Instead, the British authorities negotiated with the Bhil leaders and offered them some concessions. Thus, they used both force and conciliatory measures to control the revolt.

Source: Spectrum's A brief History of Modern India Ch 6 pg 173

Q.47) With reference to Curzon's approach towards Princely states, consider the following statements:

1. He adopted the policy of patronage and intrusive surveillance towards princely states.
2. He thought that the relations between the states and the government were neither feudal nor federal.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Curzon stretched the interpretation of old treaties to mean that the princes, in their capacity as servants of people, were supposed to work side-by-side with the governor-general in the scheme of Indian government.

Statement 1 is correct: Curzon's policy towards Indian princes was characterized by a stretching of old treaties, which he interpreted to mean that the princes were to serve as allies to the governor-general in governing India. This approach involved patronage and intrusive surveillance by the British government.

Statement 2 is correct: He thought that the relations between the states and government were neither feudal nor federal, but a type not based on a treaty but consisting of a series of relationships having grown under different historical conditions that, in the course of time, gradually conformed to a single line.

Source: Spectrum's A brief History of Modern India Ch 25 pg 682

Q.48) With reference to Tribal Movements during British rule in India, consider the following pairs:

Movements : Leaders Associated

1. Khasi rebellion : Tirath Singh
2. Koya revolt : Alluri Sitarama Raju
3. Ramosi uprising : Bhima Nayak
4. Khond Uprisings : Chakra Bisoi

How many of the above given pairs are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) All the four pairs

Ans) b

Exp) Option b is the correct answer

- 1) Khasi rebellion : Tirath Singh
- 2) Koya revolt : Tomma sora
- 3) Ramosi uprising : Chittur Singh
- 4) Khond Uprisings : Chakra Bisoi

Pair 1 is correctly matched: The Khasi people in present-day Meghalaya revolted against British rule from 1829 to 1833, led by their chief Tirath Singh. They opposed the British imposition of taxes and interference in their social and cultural practices. The British eventually defeated the Khasi rebels and established their authority over the region.

Pair 2 is incorrectly matched: The Koyas of the eastern Godavari track (modern Andhra), joined by Khonda Sara chiefs, rebelled in 1803, 1840, 1845, 1858, 1861 and 1862. They rose once again in 1879-80 under Tomma Sora.

Pair 3 is incorrectly matched: The Ramosis, a hill tribe of the Western Ghats, did not accept British rule and resented their policies. They revolted under Chittur Singh in 1822 after losing their means of livelihood with the annexation of Maratha territories.

Pair 4 is correctly matched: The Khond uprisings took place from 1837 to 1856 in the hilly tracts extending from Odisha to the Srikakulam and Visakhapatnam districts of Andhra Pradesh against the British Company rule. The uprising was led by a young raja named Chakra Bisoi and the Khonds were joined by others in their revolt.

Source: Spectrum's A brief History of Modern India Ch 6 pg 170-177

Q.49) With regard to Jungle Mahal Revolt, which of the following statements is/are correct?

1. Those participated in the revolt included farmers and hunters.
2. Durjan Singh was the leader of the revolt.
3. This revolt primarily occurred in the Chota Nagpur region.

Select the correct answer using the codes given below:

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 3 only

Ans) b

Exp) Option b is the correct answer.

The Chuar uprising was also known as the Revolt of Jungle Mahal. This uprising was a series of revolts that took place between 1771 and 1809.

Statement 1 is correct: The Chuars were Bhumij tribes descended from the Mundari mainstream. After leaving the Chotanagpur plateau, they settled in considerable numbers in the Bengal districts of Midnapur, Bankura, and Purulia. These people were **primarily farmers and hunters**, with some working for local zamindars. The individuals involved in the uprisings were all connected to the land in some way: **zamindars, paiks, and common Chuars**.

Statement 2 is correct: **Leader of the Chuar revolt was Durjan Singh**, a displaced Zamindar who along with his 1500 followers created havoc.

He established his rule over 30 villages and attacked the East India Company establishments. The British was able to suppress the rebellion with utmost cruelty and deceit with the help of local landlords. Around 200 rebels were executed in the process.

Statement 3 is incorrect: The Chuars lived in Jungle Mahal of **north-western Midnapur**. The revolt covered **Midnapur, Bankura, Birbhum and Dhalbhum**.

Spectrum Revised edition 2019 chapter-6 page-155, 156

Q.50) The Union Budget 2023-24 aims to make India a global hub for 'Shree Anna'. In this context, which of the following groups of crops contain only items referred to as 'Shree Anna'?

- Kodo, Proso and Foxtail
- Lentils, Chickpeas and Vetches
- Chickpea, Sorghum and Kodo
- Vetches, Foxtail and Proso

Ans) a

Exp) Option a is the correct answer.

In Budget 2023-24, millets have been referred to as 'shree anna'. India is the leading producer and consumer of the millets. Consumption of millets leads to food and nutritional security, in addition to the welfare of the farmers. **The Budget aims to make India a global hub of millets.** On India's initiative, United Nations has declared the year **2023 as the 'International Year of Millets'**.

Option a is correct: All the three items- Kodo, Proso and Foxtail are the different varieties of millets.

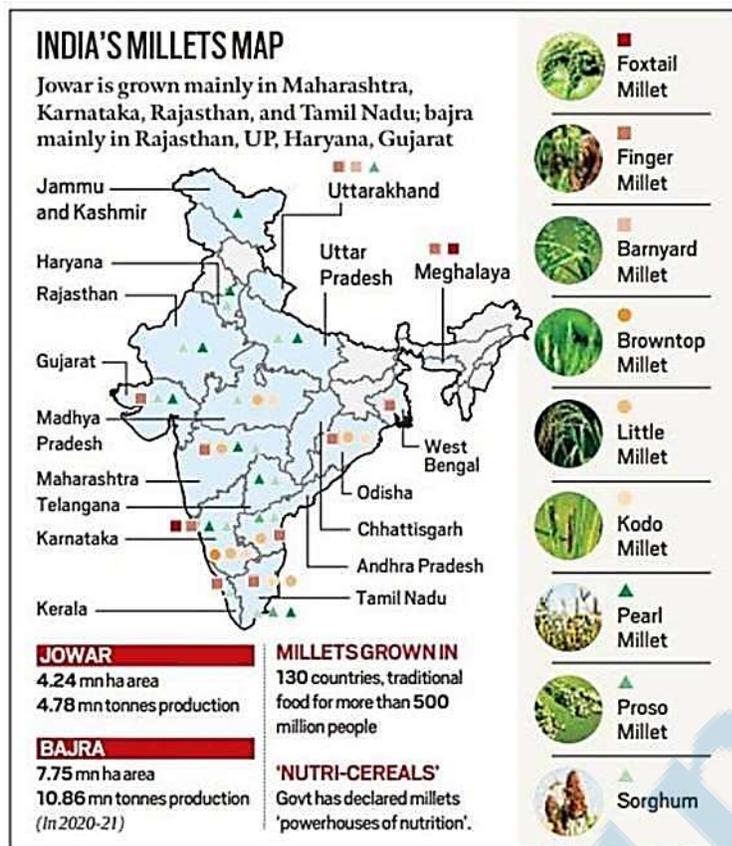

Option b is incorrect: All the three items- lentils, chickpeas and vetches are the different varieties of pulses.

Option c is incorrect: Sorghum and Kodo are the millet varieties, but chickpea is a variety of pulses.

Option d is incorrect: Foxtail and Proso are the millet varieties, but vetches are a variety of pulses.

A brief account on millets:

Earliest evidence of millets is **found in Indus Valley Civilization (3000 BC)**. Millets are a group of **small seeded grass that are grown for their grains**, which are used as both for humans and animals. Millets are good source of **proteins, fiber and essential nutrients**. They are also used as staple food in various parts of the world where other grains are scarce. They are called as **famine reserves** as they can grow in very little rainfall. Millets are **environmentally sustainable crops** as they require less water and are resistant to pests and diseases. Different types of millets are:

(Source: Indian Express)

Q.1) Which of the following were the recommendations of the Royal Commission on Decentralisation (1908)?

1. Village panchayats should be entrusted with more powers and adequate sources of income.
2. Withdrawal of existing restrictions on the taxation powers of local bodies.
3. The municipalities should undertake the responsibility for higher education.

Select the correct answer using the code given below.

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The Royal Commission upon Decentralization in India was appointed on 12 September 1907 to inquire into the relations now existing for financial and administrative purposes between the Government of India and the various Provincial Governments in India, and between the Provincial Governments and the authorities subordinate to them and to report whether, by measures of decentralization or otherwise, those relations can be simplified and improved.

Statement 1 is correct: It emphasized that village panchayats should be entrusted with more powers like judicial jurisdiction in petty cases, incurring expenditure on minor village works, village schools, small fuel and fodder reserves, etc. The panchayats should be given adequate sources of income.

Statement 2 is correct: It urged the withdrawal of existing restrictions on local bodies powers of taxation. It also recommended the stoppage of regular grants-in-aid from provincial governments except for undertaking large projects.

Statement 3 is incorrect: The municipalities might undertake the responsibility for primary education and, if willing, for middle vernacular schools (but not higher education). If it could not be done then the government should relieve them of any charges in regard to secondary education, hospitals, relief, police, veterinary works, etc.

Source: Chapter 26: Constitutional, Administrative, and Judicial Developments (Spectrum)

Q.2) In the context of the economic impact of the British rule in India, consider the following statements:

1. India became a net importer of finished goods and an exporter of raw materials.
2. The development of railways in India led to an industrial revolution in India which led to the growth of Indian manufacturing industries.
3. Initially, the railway was developed in India to allow easier access of markets and raw materials to the British.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) d

Exp) Option d is the correct answer.

British rule in India caused a transformation of India's economy into a colonial economy, i.e., the structure and operation of Indian economy were determined by the interests of the British economy. The capital development led by Britishers in India was seen from separate spectacles by the analyst and economists from India and Britain.

Statement 1 is correct: The Nationalists like Dadabhai Naoroji, R. C. Dutt and others exposed the force of British arguments that the growth of foreign trade and railways implied development for India. **They pointed out that the pattern of foreign trade was unfavourable to India. It relegated India to a position of importer of finished goods and exporter of raw materials and foodstuffs.**

Statement 2 is incorrect: These nationalists argued that **the development of railways was not coordinated with India's industrial needs, and it ushered in a commercial rather than an industrial revolution.** The net effect of the railways was to enable foreign goods to outsell indigenous products. Further, the benefits from impetus to steel, machinery and capital investment in railways accrued to the British. G.V. Joshi remarked, "Expenditure on railways should be seen as an Indian subsidy to British industries."

Statement 3 is correct: The initial advocates for developing railways in India were the mercantile interests in London and Manchester. The expectation was railways would lower transport costs and allow English merchants easier access to raw cotton from India. Simultaneously railways would open Indian markets to British manufactured products such as cotton textiles. Neither the railway promoters nor the East India Company envisioned much of a demand for passenger traffic at that time. **Hence, initially the British envisaged railways in India to get better and easier access to local market rather than cater to the local passenger demands.**

Source: Spectrum: A Brief History of Modern India, Chapter 29, Economic Impact of British Rule in India.

Q.3) Consider the following statements regarding the evolution of civil services under the British Rule:

1. Lord Cornwallis tried to check corruption in administration by raising the civil servants' salary.
2. The Pitts' India Act of 1784 provided for the formation of a Federal Public Service Commission and Provincial Public Service Commissions.
3. The Charter Act of 1853 provided recruitment of civil servants through an open competition.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The civil service system introduced in India by the East India Company for the benefit of its commercial affairs got transformed into a well-structured machinery to look after the administrative affairs of the acquired territories in India. Gradually, the civil servants were bestowed with other responsibilities and authority. Some of the major reforms in the domain of civil service are discussed below:

Statement 1 is correct: Cornwallis (governor general, 1786–93) was the first to bring into existence and organise the civil services. He tried to check corruption through:

- 1) raising the civil servants' salary;
- 2) strict enforcement of rules against private trade;
- 3) debarring civil servants from taking presents, bribes etc.

Statement 2 is incorrect: The 1935 Act proposed the formation of a Federal Public Service Commission and a Provincial Public Service Commission within their respective spheres. However, positions of control and authority remained in British hands, and the process of Indianisation of the civil service did not provide Indians with effective political power because Indian bureaucrats acted as agents of colonial rule.

Statement 3 is correct: The 1853 Charter Act ended the Company's patronage, enjoining **recruitment to be through an open competition henceforth.** Although the Charter Act of 1833 theoretically threw open the services to the Indians, the relevant provisions were never really implemented.

Source: A brief history of modern India- Spectrum Publication- 2020 Edition

Q.4) The British imperialism and colonisation of Indian economy led to deindustrialisation in India. In this context, consider the following statements.

1. In 1813, British prohibited ships above 350 tonnes from sailing between India and Britain to restrict Indian exports to British market.
2. The Indian steel industry was not allowed to produce a higher standard steel.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

The British imperialism and colonisation of Indian economy led to destruction of local industries, and also delayed the development of modern industries in India. It led to a lopsided industrial development which neglected core and heavy industries and was focussed on strategic destruction of the local industry for colonial benefits.

Statement 1 is incorrect: A thriving ship-building industry in India was crushed by the British. The British ships contracted by the Company were given a monopoly over trade routes, while even the Indian merchant ships plying along the coast were made to face heavy duties. **In 1813, a law by the British parliament prohibited ships below (not above) 350 tonnes from sailing between India to Britain;** this effectively put a large proportion of Bengal built ships out of commission on the Indo-British trade routes.

Statement 2 is incorrect: The Indian steel industry was also decisively destroyed by the British by putting stringent restrictions. **The Indian industries like Tata and others had received permission with the forced restriction of producing a higher standard of steel for British use.** Hence, at the same time the firms were unable to produce the lower standard of steel, to meet the demands of the local market for lower quality steel.

Source: Spectrum: A Brief History of Modern India, Chapter 29, Economic Impact of British Rule in India.

Q.5) India is an active member of the Financial Stability Board having three seats in its Plenary represented by which of the following?

1. Finance Minister of India
2. Secretary of Department of Economic Affairs
3. Deputy Governor of Reserve Bank of India
4. Chairman of Securities and Exchange Board of India
5. Chief Executive Officer of Niti Aayog

Select the correct answer using the codes given below:

- a) 1, 2 and 4 only
- b) 1, 3 and 5 only
- c) 2, 3 and 4 only
- d) 2, 4 and 5 only

Ans) c

Exp) Option c is the correct answer.

Financial Stability Board (FSB) is an international body that monitors and makes recommendations about the global financial system. It was **established in April 2009 after the G20 Summit in London as the successor to the Financial Stability Forum.**

Option 2, 3 and 4 are correct. The Plenary serves as the sole decision-making body. India is an active Member of the FSB, having **three seats in its Plenary represented by Secretary (Dept of Economic Affairs), Deputy Governor-RBI, and Chairman-SEBI.**

The board includes all G20 major economies. The FSB consists of 68 member institutions. It comprises several central banks, ministries of finance, and supervisory and regulatory authorities from 25 jurisdictions, as well as 10 international organizations and six Regional Consultative Groups (RCGs). The FSB's decisions are **not legally binding on its members.**

Q.6) Which of the following were the important items of export from British India during the latter half of the nineteenth century?

1. Opium
2. Indigo
3. Sugar
4. Jute

Select the correct option for the codes given below.

- a) 1, 2 and 3 only
- b) 1, 3 and 4 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

In the latter half of the nineteenth century, the British rule led commercialisation of the Indian agriculture. Prior to this, agriculture was seen as a mean of subsistence and not as a business enterprise. However, now it was influenced by commercial market forces. Certain specialised crops began to be grown not for consumption in the village but for sale in the national and even international markets.

During this period Opium, Indigo, Sugar, raw cotton and jute were the major commodities exported by India.

Option 1 is correct: Opium was traded by the British East India company which even established a monopoly on opium cultivation in the Indian province of Bengal, where they developed a method of growing opium poppies cheaply and abundantly.

Option 2 is correct: Indigo was one of the major items of exports during British era. In 1788 only about 30 per cent of the indigo imported into Britain was from India. By 1810, the proportion had gone up to 95 per cent. As the indigo trade grew, commercial agents and officials of the Company began investing in indigo production. In the year 1895-96, the export of indigo from India was recorded 9366 tonnes.

Option 3 is correct: Sugar was seen as an important commodity of export from India. Since, the tropical climate of the Indian subcontinent aided sugarcane cultivation, it was promoted as a plantation crop in India.

Option 4 is correct: Both raw jute and jute products constituted a significant portion of India's export economy during the nineteenth century. **In the 1850s roughly £250,000 of jute products were exported annually. Jute was an export material demanded by Southeast Asia which was fulfilled by Indian exports.**

Source: Spectrum: A Brief History of Modern India, Chapter 29, Economic Impact of British Rule in India.

Q.7) Which of the following personalities was/were associated with the Women's Indian Association?

1. Margaret Cousins
2. Sarojini Naidu
3. Kamaladevi Chattopadhyay
4. Annie Besant
5. Muthulakshmi Reddy

Select the correct answer using the code given below:

- a) 1, 2 and 5 only
- b) 2, 3 and 4 only
- c) 1, 3, 4 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) d

Exp) Option d is the correct answer.

Women's Indian Association was formed on 8th May **1917** at Adyar, Chennai. It was one of the first Women's Association, which brought all Indian women together for mutual assistance. The main aim of the organization was to obtain women's franchise to represent in the local state and central legislatures and achieved it in the year 1930.

Margaret Cousins, Kamaladevi Chattopadhyay, Annie Besant, Sarojini Naidu, Muthulakshmi Reddy, and others, set up the Women's Indian Association (WIA) at Adyar, Madras. On May 8, 1917 the Women's Indian Association(WIA) was established by Dorothy Jinarājadāsa, with **Annie Besant** as President and **Margaret Cousins as the Honorable General Secretary**.

On 18 December 1917, the WIA sent a **delegation led by Sarojini Naidu** (1879–1949) to Edwin Montagu, secretary of state for India. Representing themselves as Indian women who had awakened to their civic responsibilities, they requested female suffrage on a par with men in the expanded provincial legislatures as a part of the forthcoming Government of India Act of 1919.

Muthulakshmi Reddy became the president of Women's India Association in 1931 and President of the All-India Women's Conference in 1933.

Q.8) With reference to evolution of police system in modern India, consider the following statements:

1. Cornwallis relieved the zamindars of their police duties.
2. A Department of Criminal Intelligence (DCI) was introduced during the tenure of Lord William Bentinck.
3. The Police Commission 1902–03 recommended the appointment of Indians at the officer level.

Which of the statements given above is/are correct?

- a) 1 only
- b) 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

An account of steady developments in the police system under the British have been given below:

Statement 1 is correct: Cornwallis organised a regular police force to maintain law and order by going back to and modernising the old Indian system of thanas (circles) in a district under a daroga (an Indian) and a superintendent of police (SP) at the head of a district. **He relieved the zamindars of their police duties.**

Statement 2 is incorrect: Lord Curzon set up the **Police Commission under Sir Andrew Frazer** which recommended some far-reaching police reforms. It suggested for creating a Criminal Intelligence Department at the Centre. Following the recommendations, the Department of Criminal Intelligence (DCI) was attached to the Government of India, and it became the central domestic and foreign intelligence agency. **Hence, DCI was introduced during the period of Lord Curzon in 1902 (not during the tenure of Lord William Bentinck).**

Statement 3 is correct: Police commission 1902-03 under Sir Andrew Frazer, provided for the appointment of educated Indians to the position of officers in the police force; but they “stopped in rank where the European officer began”.

He said, **“We require Englishmen as well as Indians in the higher ranks of the police in the interests of good administration;** and we require from both classes of men the same qualifications, intelligence and capacity for work, knowledge of and sympathy with the people, self-reliance and resourcefulness, sober judgement and promptitude.” We all honestly desire to combine European discipline and methods of work with the Indian's intimate knowledge of the habits and manners of his own people; and this object can be **secured only by the selection of an adequate number both of Europeans and Indians in the higher police service.**

Q.9) To prevent the recurrence of another 1857 like revolt, which of the following measures had been taken by the British?

1. Strict European monopoly over key geographical locations and departments was maintained.
2. An ideology of ‘martial races’ and ‘non-martial races’ was introduced in military recruitments.
3. Indian soldiers were prevented from reading newspapers and journals.

Select the correct answer using the code given below.

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The military was the backbone of the Company's rule in India. Prior to the revolt of 1857, there were two separate sets of military forces under the British control, which operated in India. The first set of units known as the Queen's army, were the serving troops on duty in India. The other was the Company's troops – a mixture of European regiments of Britons and Native regiments recruited locally from India but with British officers.

Statement 1 is correct: Strict European monopoly over key geographical locations and departments, such as artillery, tanks, and armed corps, was maintained. Even the rifles given to Indians were of an inferior quality till 1900, and Indians were not allowed in these high-tech departments till the Second World War.

Statement 2 is correct: An ideology of ‘martial races’ and ‘non-martial races’ was introduced. It assumed that good soldiers could come only from some specific communities. It was used to justify a discriminatory recruitment policy directed towards Sikhs, Gurkhas, and Pathans (**martial races**) who had assisted in the

suppression of the revolt and were relatively marginal social groups. Therefore, less likely to be affected by nationalism. The soldiers from Awadh, Bihar, Central India, and South India who had participated in the revolt were declared to be **non-martial**.

Statement 3 is correct: Conscious efforts were made to isolate the Indian soldiers from life and thoughts of rest of the population **through measures such as preventing newspapers, journals, and nationalist publications from reaching them.**

Q.10) Which one of the following options is **incorrect** about Mahila Samman Saving Certificate, proposed in Union Budget 2023-24?

- Savings can be done only in the name of a girl child or women.
- There is no maximum deposit limit under the Mahila Samman Saving Certificates.
- It is a one-time scheme with a tenure of two years.
- A partial withdrawal of funds can be done before the maturity of the scheme.

Ans) b

Exp) Option b is the correct answer.

Mahila Samman Savings Certificate scheme is a small savings scheme backed by the government. Scheme will give a **fixed interest rate of 7.5%**, much higher than most bank Fixed Deposits (FDs) and other popular small savings schemes.

Option a is correct: The Mahila Samman Savings Certificate can be **done only in the name of a girl child or woman**, unlike other small saving schemes like Public Provident Fund (PPF), National Savings Certificate (NSC), Senior Citizens Small Savings Scheme (SCSS) and Sukanya Samridhi Yojana (SSY)

Option b is incorrect: The maximum deposit amount under the Mahila Samman Savings Certificate is Rs.2 lakh. The minimum amount is yet to be specified.

Option c is correct: This scheme is a one-time scheme with a tenure of two years. This scheme will be available for two years, i.e., from 2023 to 2025.

Option d is correct: A partial withdrawal facility is provided under the Mahila Samman Saving Certificate scheme. Hence, it allows for premature withdrawal of the deposits.

Union Budget Speech 2023-24

Q.11) Consider the following statements regarding the development of Civil Services in India under British Rule:

- Lord Cornwallis tried to reform civil services through strict enforcement of rules against private trade by civil servants.
- Lord Curzon set up Fort William College in 1800 for training new recruits.
- The Lee Commission (1923) was appointed to study ethnic composition of Government of India's superior public services.

Which of the statements given above is/are correct?

- 1 and 2 only
- 1 only
- 2 and 3 only
- 1 and 3 only

Ans) d

Exp) Option d is the correct answer.

The **civil service system** introduced in India by the East India Company for the benefit of its **commercial affairs and** to look after the administrative affairs of the acquired territories in India. European supremacy was assured in the civil service as in other spheres of governance.

Statement 1 is correct: Lord Cornwallis was one of the first administrators to bring into existence and organise the civil services. He tried to check corruption through **raising the civil servants' salary, strict enforcement of rules against private trade**, debarring civil servants from taking presents, bribes etc. and enforcing promotions through seniority.

Statement 2 is incorrect: In 1800, Lord Wellesley (and not Lord Curzon) set up Fort William College for the training of new recruits. In 1806 Wellesley's college was disapproved by the Court of Directors and instead the **East India College was set up at Haileybury in England to impart two years' training to the recruits.** So, statement 2 is incorrect.

Statement 3 is correct: The Lee Commission was established in 1923 under the chairmanship of Lord Lee, with an equal number of Indian and British members, **with the goal of studying the ethnic/racial composition of the government of India's superior public service.** In 1924, it submitted its report. The commission reviewed the existing position of two groups of services, **the All-India Services and the Central Services**, as well as the recommendations of the Islington Commission report (1912). Provincial Services were not considered because they had already been taken over by provincial governments.

Knowledge Base: Although the **Charter Act of 1833** theoretically **threw open the services to the Indians**, the relevant **provisions were never really implemented.** After 1857, when the Indians claimed a share in higher services, the **Proclamation of 1858 declared the British intention of including the Indians, freely and impartially**, in offices under the civil service.

The Aitchison Committee on Public Services (1886) recommended dropping the terms covenanted and uncovenanted and **raising the age limit to 23.**

Source: Chapter-26: Constitutional Administrative and Judicial Developments, A brief history of modern India by Rajiv Ahir

Q.12) Which of the following statements most appropriately represent the impact of 'economic drain' from India by the British?

1. It deprived India of its productive capital.
 2. Domestic capital formation in India was stalled.
 3. It led to a fall of Indian handicraft industry.
- Select the correct option from the codes given below.

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Dadabhai Naoroji, the 'Grand Old Man of India' put forward the theory of economic drain in Poverty and Un-British Rule in India. The term 'economic drain' refers to a portion of national product of India which was not available for consumption for its people but was being drained away to Britain for political reasons and India was not getting adequate economic or material returns for it.

Statement 1 is correct: The drain theory incorporated all threads of the nationalist critique that it **denuded India of its productive capital. According to nationalist estimates, the economic drain at that time was more than the total land revenue**, or half the total government revenue, or one third of the total savings (in today's terms, it amounted to 8 per cent of the national product).

Statement 2 is correct: The drain of wealth checked and retarded capital formation in India while the same portion of wealth accelerated the growth of British economy. The surplus from British economy re-entered India as finance capital, further draining India of its wealth. Now the profits earned on the same invested capital also flew out of India, rather than reinvesting the same here. This had immense effect on income and employment potential within India.

Statement 3 is correct: The nationalists claimed that one-way free trade was ruining Indian handicrafts industry, exposing it to premature, unequal and unfair competition, while tariff policy was guided by British capitalist interests. Hence, the domestic handicraft industry couldn't compete with the mechanised craft of the west and succumbed to the British drain of wealth.

Source: Spectrum: A Brief History of Modern India, Chapter 29, Economic Impact of British Rule in India.

Q.13) Consider the following statements regarding the developments after the Battle of Buxar:

1. Robert Clive introduced the dual system of government in Bengal.
2. East India Company got diwani rights of Bengal, Bihar and Orissa.
3. British completely annexed Awadh by defeating its ruler Siraj-Ud-Daulah.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Robert Clive concluded two important treaties at Allahabad in August 1765—one with the Nawab of Awadh and the other with the Mughal Emperor, Shah Alam II. The combined armies of Mir Kasim, the Nawab of Awadh and Shah Alam II were defeated by the English forces under Major Hector Munro at Buxar on October 22, 1764, in a closely contested battle. The importance of this battle lay in the fact that not only the Nawab of Bengal but also the Mughal Emperor of India was defeated by the English. Buxar is a city located on the banks of river Ganga in the state of Bihar.

Also, the British government decided to regulate the Company to bring some order into its business.

Statement 1 is correct: After the battle of Buxar, the East India Company became the real power center in Bengal. **Robert Clive introduced the dual system of government, i.e., the rule of the two—the Company and the Nawab—in Bengal.**

Statement 2 is correct: Under the Treaty of Allahabad emperor Shah Alam-II had to issue a Farman granting the Diwani of Bengal, Bihar and Orissa to the East India Company in lieu of an annual payment of Rs 26 lakh.

Statement 3 is incorrect: After the Battle of Buxar, English did not annex Awadh even after Shuja-Ud-Daulah was defeated because it would have placed the Company under an obligation to protect an extensive land frontier from the Afghan and the Maratha invasions. So, statement 3 is incorrect.

Knowledge Base: The dual system **led to an administrative breakdown** and proved disastrous for the people of Bengal. Neither the Company nor the Nawab cared for administration and public welfare. **Warren Hastings did away with the dual system in 1772.**

Source: Chapter-26: Constitutional Administrative and Judicial Developments, A brief history of modern India by Rajiv Ahir

Q.14) Which of the following statements are correct regarding the Regulating Act of 1773?

1. It recognized the East India Company's role in administrative and political fields in India.
2. It took away all the legislative powers of the Governors of Madras and Bombay.
3. The Supreme Court was established in Bengal under this Act.

Select the correct answer using the code given below:

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) c

Exp) Option c is the correct answer.

East India Company officials had become super-rich while working in India. Many people in Britain feared that they could upset the political environment of their country. Thus, the Regulating Act of 1773 was implemented to overhaul the management of the East India Company's rule in India.

Statement 1 is correct: The 1773 Regulating Act recognized that the Company's role in India extended beyond mere trade to administrative and political fields, and introduced the element of centralized administration as it empowered the Governor-General-in Council to frame regulations for the Provincial Courts and Councils. The governor-general could exercise some powers over Bombay and Madras. The first such Governor General was Lord Warren Hastings.

Statement 2 is incorrect: Under the Charter Act of 1833, Bengal, Madras, Bombay and all other territories were placed under complete control of the governor-general. The Governments of **Madras and Bombay were deprived of their legislative powers** and left with a right to propose to the governor-general the projects of law which they thought to be expedient. It was not done under the Regulation Act of 1773. So, statement 2 is incorrect.

Statement 3 is correct: A Supreme Court of judicature (comprising one chief justice and three other judges) was to be established in Bengal with original and appellate jurisdictions where all subjects could seek redressal. In practice, however, the Supreme Court had a debatable jurisdiction vis-a-vis the council which created various problems.

Q.15) Consider the following statements:

1. It is a traditional folk-dance form popular in Coastal Karnataka.
2. Traditionally, men used to portray all roles, including the roles of females, though women are now part of the troupes.
3. Each performance typically focuses on a small sub-story from ancient Hindu epics of Ramayana or Mahabharata.

Which one of the following art-forms is correctly described in the above given statements?

- a) Villu Paatu
- b) Bayalata
- c) Yakshagana
- d) Theyyam

Ans) c

Exp) Option c is the correct answer.

Recently, the Prime Minister of India has expressed deep grief over the demise of noted Yakshagana playback singer, Shri Balipa Narayana Bhagawatha.

Yakshagana is a **traditional folk-dance form popular in Coastal Karnataka**. It is a rare combination of dance, music, song, scholarly dialogues and colourful costumes. Traditionally, **men portray all roles, including the female ones, though women are now part of Yakshagana troupes**. A typical troupe consists of 15 to 20 actors and a Bhagawatha, who is the master of ceremonies and the main storyteller.

Yakshagana

- 1) Each performance typically focuses on a small sub-story (known as 'Prasanga') from ancient Hindu epics of Ramayana or Mahabharata. The show consists of both stage performances by talented artists and commentary (performed by the lead singer or Bhagawatha) accompanied by traditional music.
- 2) Musical instruments used in Yakshagana include **Chande (drums), Harmonium, Maddale, Taala (mini metal clappers) and flute** among others.
- 3) Costumes used in Yakshagana are very unique and elaborate. Large size **headgear**, coloured faces, elaborate costumes all over the body and musical beads on the legs (Gejje).

Nitin Sighania

Q.16) Consider the following statements:

1. She became the first woman to receive the 'Padmaboti Swarnapodok', the gold medal from Calcutta University.
2. She founded the Bharat Stree Mahamandal in 1910.
3. She was associated with the newspaper 'Hindusthan' as editor and publisher.

Which one of the following personalities is being described in the above given statements?

- a) Sarojini Naidu
- b) Suniti Chaudhari
- c) Sarala Devi Chaudhurani
- d) Sumati Morarjee

Ans) c

Exp) Option c is the correct answer.

The personality being described in the given statements is Sarala Devi Chaudhurani.

- 1) Sarala Devi Chaudharani, daughter of Janakinath Ghoshal, was Rabindranath Tagore's niece.
- 2) She pursued higher education at Bethune College under Calcutta University to become the first woman to achieve the highest marks in that university and receive the 'Padmaboti Swarnapodok', the gold medal.
- 3) She wrote a book, Ahitagnika, to generate awareness concerning the freedom struggle among school children and also launched an underground revolutionary group as she believed aggression and violence to be the only way to get freedom from the British.
- 4) Sarla Devi founded the Bharat Stree Mahamandal, the All India Women's Organisation, a pioneering venture; it was a semi-revolutionary group in Allahabad, Lahore, Amritsar, Delhi, Karachi, Hyderabad, Kanpur, and Calcutta.
- 5) She was associated with the newspaper Hindusthan as editor and publisher. Towards the end of her life, she was involved in writing her biography, Jiboner Jhora Pata (the 'Scattered Leaves of My Life')

Q.17) Which of the following statements are **incorrect** regarding the Indian Civil Service Act of 1861?

1. The Act was passed during the Viceroyalty of Lord Ripon.
2. As per the act, civil services examination was to be held simultaneously in England and India.
3. According to the Act, knowledge of vernacular was not necessary for district appointments.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The civil services act 1861 laid down that any person, whether Indian or European, could be appointed to any of the offices provided that he had resided for a minimum of 7 years in India. It contained provisions related to appointments to be filled only by the members of the covenanted Civil Service.

All appointments were now to be reported to the Secretary of State and unless the Secretary of State approves within twelve months, were declared void.

Statement 1 is incorrect: The Indian Civil Service Act was passed in 1861 with the support of Viceroy Lord Canning (and not Lord Ripon). According to the Indian Civil Service Act of 1861, any person, **regardless of his nationality as an Indian or European**, could assume any public office with the **condition that he had stayed in India for a minimum period of 7 years**. So, statement 1 is incorrect.

Statement 2 is incorrect: The Indian Civil Service Act, 1861 reserved certain offices for covenanted civil servants but the **examination was held in London, England in English medium only**, based on classical learning of Greek and Latin.

Statement 3 is incorrect: The appointments made under the **Indian Civil Service Act of 1861** required the candidates to go through **some departmental tests, meet specific requirements, and also clear an exam in the vernacular language** of the district they were supposed to work in. So, knowledge of vernacular was necessary. So, statement 3 is incorrect.

Source: Chapter-26: Constitutional Administrative and Judicial Developments, A brief history of modern India by Rajiv Ahir

Q.18) The Government's Resolution of May 1918 is related to which among the following?

- a) Jallianwala Bagh massacre
- b) Rowlatt Act
- c) Revolutionary Activities in Punjab
- d) Local Self Government

Ans) d

Exp) Option d is the correct answer.

The Resolution of May 1918 reviewed the entire question of local self-government in the light of the announcement of August 20, 1917, which had declared that the future direction of constitutional advance was towards grant of responsible government to the people of India, and the first step towards the progressive realisation of that ideal was to be in the sphere of local self-government. **The resolution suggested that the local bodies be made as representative as possible of the people with real and not nominal authority vested in them.**

Source: Chapter 26: Constitutional, Administrative, and Judicial Developments (Spectrum)

Q.19) Which among the following actions regarding the judiciary were undertaken by the Lord Cornwallis during his tenure as Governor-General of India?

1. Abolition of District Fauzdari courts.
2. Establishment of Supreme Court of Calcutta
3. Appointment of Law Commission under Macaulay

Select the correct answer using the codes given below:

- a) 1 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

With the Company's transformation from a trading company into a ruling power, new elements of judicial system replaced the existing Mughal legal system.

Option 1 is correct: During the time of Lord Cornwallis (1786–93), District Fauzdari Courts were abolished and, instead, circuit courts were established at Calcutta, Dacca, Murshidabad, and Patna. These circuit courts had European judges and were to act as courts of appeal for both civil and criminal cases.

Option 2 is incorrect: Under the Regulating Act of 1773, a Supreme Court was established at Calcutta, which was competent to try all British subjects within Calcutta and the subordinate factories, including Indians and Europeans. It had original and appellate jurisdictions. Often, the jurisdiction of the Supreme Court clashed with that of other courts. This development occurred **during the tenure of Warren Hastings (1772–85)** and not under Lord Cornwallis.

Option 3 is incorrect: A Law Commission was set up in 1833 under Macaulay for codification of Indian laws. As a result, a Civil Procedure Code (1859), an Indian Penal Code (1860), and a Criminal Procedure Code (1861) were prepared. **William Bentinck (1828–33)** was Governor General of India at this time and not Lord Cornwallis.

Source: A brief history of modern India- Spectrum Publication- 2020 Edition

Q.20) With reference to pharmaceutical sector of India, consider the following statements:

1. India is the third largest producer of pharma products in the world in terms of volume.
2. Pharma industry is one of the eight-core industries of the Indian economy.
3. Among Indian industries, pharmaceutical industries had received the largest share of private investment in 2022-23.
4. The value of India's pharmaceutical exports has drastically reduced in the last couple of years.

Which of the statements given above is/are correct?

- a) 1, 2 and 3 only
- b) 1 only
- c) 3 and 4 only
- d) 1, 3 and 4 only

Ans) b

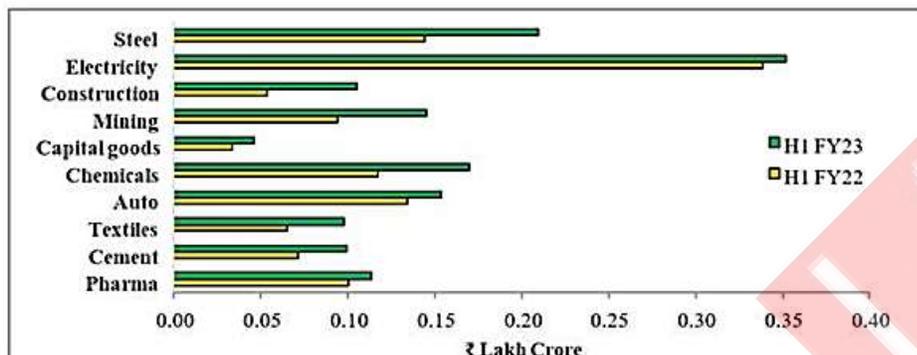

Exp) Option b is the correct answer.

The Indian Pharmaceuticals industry plays a prominent role in the global pharmaceuticals Industry. India is the **largest provider of generic medicines** globally, accounting for 20% of global supply by volume.

Statement 1 is correct: It is true that **India is ranked 3rd worldwide in the production of pharma products by volume and 14th by value.** Furthermore, India is the leading vaccine manufacturer globally with a market share of 60 per cent.

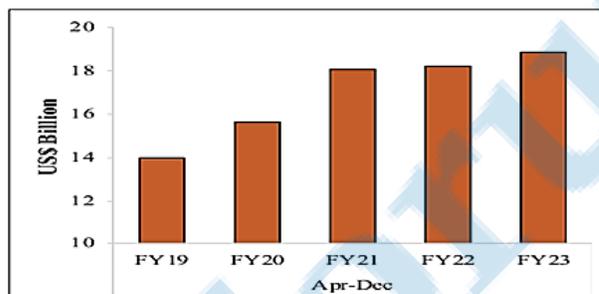

Statement 2 is incorrect: Pharmaceutical industry is not one of the eight core industries of the Indian economy. The main or the key industries constitute the core sectors of an economy. The eight-core industries of the Indian economy are **electricity, steel, refinery products, crude oil, coal, cement, natural gas and fertilisers.**

Statement 3 is incorrect: Electricity attracted the largest share of private investment in India, followed by Steel, Chemicals, Automobile, Mining and Pharmaceutical industry. Hence the pharmaceutical industry **ranked fifth** in terms of its share of total private investments in the country.

Statement 4 is incorrect: The value of pharmaceutical exports has increased in the last five years. Indian Pharmaceutical exports received a growth of 24 per cent in 2021 due to Covid 19 pandemic induced demand for drugs and even after the waning of covid 19 the sector witnessed the steady increase in exports.

Figure IX.19: Strong growth in pharmaceutical exports

Source: DGCI&S

Source: Economic Survey 2022-23 : Pg no 281

Q.21) In the context of criticism by the nationalists about the colonial economy in India, consider the following statements:

1. Dadabhai Naoroji in his work 'The Economic History of India' gave the theory of Economic Drain.
2. The economic analysts like Naoroji advocated complete cut-off of India's economic dependence on Britain.
3. The Indian nationalists argued that industrialisation in India needs to be based on Indian capital and not on foreign capital.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The early intellectuals of the first half of the nineteenth century supported British rule under the impression that it would modernise the country based on latest technology and capitalist economic organisation. After the 1860s, disillusionment started to set in among the politically conscious and they began to probe into the reality of British rule in India.

Statement 1 is incorrect: Dadabhai Naoroji, the ‘Grand old man of India’ did a brilliant analysis of Indian economy and put forth the theory of ‘Economic Drain’, in his work **Poverty and Un British Rule in India**. **The Economic History of India was a critical analysis of Indian economy by Romesh Chandra Dutt.** The term ‘economic drain’ refers to a portion of national product of India which was not available for consumption of its peoples but was being drained away to Britain for political reasons and India was not getting adequate economic or material returns for it.

Statement 2 is correct: The economic analysts like Dadabhai Naoroji, Justice Mahadeo Govind Ranade, Romesh Chandra Dutt (The Economic History of India), Gopal Krishna Gokhale, G. Subramaniya Iyer and Prithwishchandra Ray **organised intellectual agitations and advocated a complete severance (cut-off) of India’s economic subservience to Britain and the development of an independent economy based on modern industries.**

Statement 3 is correct: The nationalists argued that the colonialism led to the transformation of India into a supplier of foodstuffs and raw materials to the metropolis, a market for metropolitan manufacturers and a field for investment of British capital. However, **they advocated that industrialisation in India needs to be based on Indian and not foreign capital because**, the foreign capital had replaced and suppressed the Indian capital. This suppression led to economic drain, further strengthening British hold over India. The political consequences of foreign capital investments were equally harmful as they caused political subjugation and created vested interests which sought security for investors, thus perpetuating the foreign rule.

Source: Spectrum: A Brief History of Modern India, Chapter 29, Economic Impact of British Rule in India.

Q.22) Which of the following administrative changes was/were brought by the British Government immediately after 1857 revolt?

1. Dual System of Administration, introduced by Pitt’s India Act of 1784, was abolished.
2. Powers of Secretary of State for India were drastically reduced.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

The British were quick to learn from their experience of 1857—an organised mass action could pose a serious challenge to the existence of British rule in India. The ruler-subject gap was sought to be narrowed so as to reduce, if not eliminate altogether, the alienation of the masses from the administration. Some of the major changes in the administration in the post 1857 era are discussed below:

Statement 1 is correct: The Act for Better Government of India, 1858 transferred the power to govern from the East India Company to the British Crown. **The power to govern was to be wielded through a secretary of state** (earlier this power was exercised by Directors of the Company and the Board of Control). The secretary of state was to be a member of the British cabinet and was to be assisted by a council of 15. He

was answerable to the British Parliament. All initiatives and final decisions rested with the secretary and the council was only advisory in nature. Thus, **the dual system introduced by Pitt's India Act, 1784 came to an end**. Also, the ultimate power over India remained with Parliament.

Statement 2 is incorrect: As per the 1858 Act, the Secretary of State was the supreme authority and had a free hand in the administration of India and was responsible only to the British parliament. The concentration of the main authority in the hands of the secretary of state based in London gradually reduced the viceroy to a subordinate status and further alienated the Indian public opinion from the government policymaking.

Source: A brief history of modern India- Spectrum Publication- 2020 Edition

Q.23) Consider the following statements regarding the Ripon's Resolution of 1882:

1. The resolution was based on the recommendations of the Royal Commission on Decentralization.
2. According to provisions of the resolution, non-officials were to be in majority in the local bodies.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

The Government of Ripon desired to apply the principle of financial decentralisation in the local bodies in the same manner as applied by Lord Mayo in the provincial Governments. For his contributions, Lord Ripon is called father of local self-government in India.

Statement 1 is incorrect: In the year 1907, the Royal Commission on Decentralization was constituted by the British Government. Its main objective was to investigate the financial and administrative relations of the Central and provincial governments. The only Indian member of this commission was R.C. Dutt. So, Rippon's resolution was issued in 1882 a way before the establishment of the Royal commission on Decentralization.

Statement 2 is correct: According to provisions of the resolution, **non-officials were to be in majority in local bodies** who could be elected if the officials thought that it was possible to introduce elections.

Source: A brief history of modern India- Spectrum Publication- 2020 Edition

Q.24) Consider the following statements regarding the different Factories Acts under the British rule:

1. Under the Factories Act of 1881, employment of children under 9 years of age was prohibited.
2. The Factories Act of 1891 introduced the provisions for maternity leave for the first time in India.
3. The Factory Acts of 1881 and 1891 were not applicable to indigo factories.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 3 only
- c) 2 and 3 only
- d) 2 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. The Factories Act 1881 prohibited the employment of children under the age of 7 years (not under 9 years) in any factory.

The Factories Act of 1891, on the other hand, prohibited the employment of children under the age of 9 years (not under 9 years) in any factory.

Statement 2 is incorrect. Factories Act of 1891 did not introduced any provisions regarding maternity leave and maternity benefit. The Bombay maternity Benefit Bill was introduced in 1929 in the Bombay legislative council. **It was the first law established for working women in India.**

Statement 3 is correct. The Indian Factories Acts of 1881 and 1891, did not apply to the premises of Indigo Factories and tea and coffee plantations.

Q.25) Economic survey 2022-23 talks about the Guidotti–Greenspan IMF rule. In this context, select the option which best describes the rule?

- According to the rule, the adequacy of foreign exchange can be determined by Ratio of reserves to imports, to money aggregates and measure of external debt.
- It states that a country's foreign exchange reserves should be equal to short-term external debt.
- The rules state that the Gross Fixed capital formation increases with an increase in investment.
- The rule provides for the precautionary measures to be taken by the economy in economic crisis.

Ans) b

Exp) Option b is the correct answer.

Foreign exchange reserves are **required** for various purposes, such as to **maintain the exchange rate** within a certain range, or to maintain a certain level of exchange rate if the country follows a fixed exchange rate system; **maintain liquidity** and allow time to **absorb shocks**.

Option a is incorrect: The **optimal level** of reserves empowers the government to **maximise the welfare** of the representative consumer, given the constraint of sudden stops in terms of debt rollover crisis. Therefore, adequacy of reserves comes in picture. **Conventionally**, there are **three measures** of adequacy of reserves, **viz. ratios of reserves to imports, to monetary aggregates, and measures of external debt**.

Option b is correct: **Guidotti–Greenspan IMF rule** states that a **country's reserves should be equal to short-term external debt** (one-year or less maturity), suggesting a ratio of reserves-to-short term debt of one. The **traditional approach** determines the adequacy of reserves by **three months of imports or full cover of short-term debt**. **This approach is based on Guidotti–Greenspan IMF rule.**

Option c and d are incorrect: Guidotti–Greenspan IMF rule does not talk about Gross Fixed capital formation nor it talks about the precautionary measures to be taken by the economy in economic crisis.

Source: Page 331, chapter 11: External Sector: Watchful and Hopeful of Economic survey 2022-23.

Q.26) Consider the following statements regarding the Mahalwari System of land revenue:

- It was a land revenue system devised by Hector Munro in 1822.
- The local zamindars were responsible for the collection of land revenue in this system.
- The revenue demand was to be revised periodically and was not fixed permanently under this system.

Which of the statements given above is/are correct?

- 1 and 2 only
- 3 only
- 2 and 3 only
- 1 and 3 only

Ans) b

Exp) Option b the correct answer.

Statement 1 is incorrect. In 1822, Englishman Holt Mackenzie (and not Hector Munro) devised a new system known as the Mahalwari System in the North-western Provinces of the Bengal Presidency. It was not devised by Hector Munro. Hence this statement is incorrect.

Statement 2 is incorrect. Under the Mahalwari system, the land revenue was collected from farmers by the village headmen on behalf of the whole village (and not the zamindar).

Statement 3 is correct. The entire village was converted into one bigger unit called 'Mahal' and was treated as one unit for the payment of land revenue. The revenue under this system was to be revised periodically and not fixed permanently.

http://www.govtgirlsekalpur.com/Study_Materials/History/CC12_MOD4A_PART2.pdf

Q.27) The period between 1813-1860s is considered as period of the Colonialism of Free Trade in Indian History. Consider the following statements regarding the dominant features of this period:

1. All import duties in India were either totally removed or drastically reduced to nominal rates
2. Traditional agrarian structure was being transformed into a capitalist one.
3. Administration was made more comprehensive and included villages and outlying areas of the country.
4. Personal laws of Hindus and Muslims were reformed on a large scale as it affected colonial transformation of the economy.

Which of the statements given above are correct?

- a) 1, 2 and 4 only
- b) 2 and 3 only
- c) 1, 2 and 3 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

The period between 1813-1860s is considered as period of the Colonialism of Free Trade in Indian History. Owing to its mode of exploitation being trade, this stage is also termed as Colonialism of Free Trade.

statement 1 is correct: India's colonial economy was integrated with the British and the world capitalist economy. This was made possible with the introduction of free trade. All import duties in India were either totally removed or drastically reduced to nominal rates.

statement 2 is correct: The Permanent Settlement and the Ryotwari system in agriculture were introduced to transform traditional agrarian structure into a capitalist one.

Statement 3 is correct : Administration was made more comprehensive and included villages and outlying areas of the country. These changes were brought about to make British goods reach, and agricultural products drawn from, interior villages and remotest parts.

Statement 4 is incorrect: Personal law was largely left untouched since it did not affect colonial transformation of the economy. However, the changes related to criminal law, law of contract and legal procedures were overhauled to promote capitalist commercial relations and maintain law and order.

Knowledge Base: Instead of constituting a new law modulating religious sentiments of both communities, Governor-General of India, Warren Hastings nurtured the personal laws of Hindus and Muslims. Under the Charter Act of 1753, Indians were explicitly spared from trying their suits and disputes in the Mayor's court (highest court during the British rule) and were directed to resolve their disputes themselves, unless both the parties of the case subjected themselves to the jurisdiction of the court. **Hastings Rule** specifically demarcating the personal laws of Hindus and Muslims was rephrased in Cornwallis Code of 1793 and it is by this rule that personal laws found a firm ground in the 17th century and continues to be what it is today.

Q.28) Which of the following recommendations was/were made by the Police Commission of 1860?

1. Creation of post of inspector general in a province.
2. Abolition of office of Superintendent of Police.

Select the correct answer using the codes given below.

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Option 1 is correct: The Police Commission of 1860 led to the Indian Police Act, 1861. It **recommended inspector-general as the head in a province**, deputy inspector-general as the head in a range, and **Superintendent of Police (SP) as the head in a district**. The commission also recommended a system of civil constabulary—maintaining the village set-up in the present form (a village watchman maintained by the village) but in direct relationship with the rest of the constabulary.

Option 2 is incorrect: William Bentinck (governor-general, 1828-35) **abolished the office of the SP**. Thus, it was not recommended by the Police Commission of 1860. The collector/magistrate was now to head the police force in his jurisdiction and the commissioner in each division was to act as the SP. This arrangement resulted in a badly organised police force, putting a heavy burden on the collector/magistrate.

Q.29) Consider the following statements regarding economic impact of the British rule in India:

1. The economic policies of British government gave rise to absentee landlordism.
2. It led to the loss of traditional livelihoods, accompanied by a process of deindustrialization.
3. It led to decline of many cities and led to a process of ruralisation of India.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 3 only
- c) 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The major difference between the British colonists in India and earlier invaders was that none of the earlier invaders made any structural changes in Indian economy or drained away India's wealth as tribute.

Statement 1 is correct: Land was passed into new hands—merchants, moneylenders and other moneyed classes living in towns. The new zamindars, with increased powers but with little or no avenues for new investments, resorted to land grabbing and sub-infeudation. Increase in number of intermediaries to be paid gave rise to absentee landlordism and increased the burden on the peasant. Thus, the economic policies of British gave rise to absentee landlordism.

Statement 2 is correct: The artisans were reduced step by step to the position of bonded labourers by the denial of free access to the market, by the use of coercion, and by laws and regulations made by the Company's government. This loss of traditional livelihoods was not accompanied by a process of industrialization in India, as had happened in other rapidly industrializing countries of the time. This resulted in deindustrialization of India at a time when Europe was witnessing a reintensified Industrial Revolution.

Statement 3 is correct: Another feature of deindustrialisation was the decline of many cities and a process of ruralisation of India. Many artisans, faced with diminishing returns and repressive policies abandoned their professions, moved to villages, and took to agriculture.

Q.30) Investments in infrastructure and productive capacity have a large multiplier effect on growth and employment. In this regard, the Union Budget 2023-24 has proposed to:

1. establish 'Urban Infrastructure Development Fund (UIDF)' to be managed by the Ministry of Housing and Urban Affairs.
2. create a 'Harmonized Master List of Infrastructure' for the first time in India.
3. increase capital investment outlay to more than 3% of the Gross Domestic Product (GDP).

Which of the statements given above is/ are correct?

- a) 1 only
- b) 3 only
- c) 1 and 2 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: On the lines of Rural Infrastructure Development Fund (RIDF), the government aims to establish Urban Infrastructure Development Fund (UIDF) **through use of priority sector lending shortfall**. The Fund **will be managed by the National Housing Bank**. It will be used by public agencies to create urban **infrastructure in Tier-2 and Tier-3 cities**.

Statement 2 is incorrect: India has a Harmonized Master List of Infrastructure **already in existence and has been updated from time to time**. The list is notified by the **Ministry of Finance** and includes sub-sectors like transport and logistics, energy, water and sanitation etc. **Inclusion in the list** implies access to **concessional funds, promotion of projects and continuity of construction for the specified sub-sectors**. The **Union Budget 2023-24** proposes to conduct a review of the List by an **expert committee** for recommending the classification and financing framework suitable for 'Amrit Kaal'.

Statement 3 is correct: **Capital investment outlay** has been proposed to be increased **to 3.3% of GDP**. This has been **increased for the third time in a row by 33%**. It is expected to help in government's efforts to enhance growth potential and job creation, crowd-in private investments, and provide a cushion against global headwinds.

Knowledge Base: **National Housing Bank comes under Department of Financial Services, Ministry of Finance.**

Source: https://www.indiabudget.gov.in/doc/budget_speech.pdf

Q.31) Consider the following statements with reference to Sarojani Naidu and her contributions:

1. Foundation of All India Women's Conference (AIWC)
2. Leading a raid on the Dharasana Salt Works during Civil Disobedience Movement
3. Representing women in Second Round Table Conference
4. Became India's first woman Governor

Which of the above-given options are correct?

- a) 2 and 3 only
- b) 1, 2 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Sarojini Naidu was a prominent Indian nationalist, poet, and political activist who played a leading role in the Indian independence movement.

Option 1 is correct: The All-India Women's Conference (AIWC) was founded in 1927 by a group of leading women social reformers and activists in India, including **Margaret Cousins, Kamaladevi Chattopadhyay, Annie Besant, and Sarojini Naidu, among others.** The AIWC is one of the oldest and most prominent women's organizations in India, and it has played a significant role in advancing the rights and welfare of women in the country.

Option 2 is correct: Gandhiji's arrest came on May 4, 1930, during Civil Disobedience Movement when he had announced that he would lead a raid on Dharasana Salt Works on the west coast. **On May 21, 1930, Sarojini Naidu, Imam Sahib, and Manilal (Gandhi's son) took up the unfinished task of leading a raid on the Dharasana Salt Works.** The unarmed and peaceful crowd was met with a brutal lathi-charge.

Option 3 is correct: Sarojini Naidu played a crucial role in representing the interests of women at the Second Round Table Conference held in London in 1931. Sarojini Naidu used this platform to bring attention to the issues faced by women in India, including their lack of political representation and the need for greater participation in the decision-making process. She also advocated for greater social and economic rights for women, including access to education, healthcare, and employment opportunities.

Option 4 is correct: India's first woman Governor was Sarojini Naidu. She was appointed as the Governor of the United Provinces (now known as Uttar Pradesh) in 1947, making her the first woman to hold this position in India.

Q.32) Consider the following statements regarding the Ryotwari System:

1. Thomas Munro introduced Ryotwari Settlement with the intention of preserving India's village communities.
2. The peasants had full rights regarding the sale, transfer, and leasing of their land.
3. The revenue to be paid by each village and by each ryot was fixed.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Munro advocated rents be kept suitably low and be fixed for 30 years, a measure that would protect peasant-farmers from mounting and arbitrary exactions by 'intermediaries' who had caused much damage to peasant property rights.

statement 1 is correct: Sir Thomas Munro, governor of Madras, thought that the Cornwallis permanent settlement system did not heed Indian tradition and experience. He thought such reforms had to be modified to suit the Indian context and so he introduces the Ryotwari Settlement to preserve India's village communities and emphasize the protective role of the company's government. But ultimately, he aimed to consolidate the Company's state in the south by expanding its revenue base, where land taxes would be collected directly from the peasants by a large number of British officers.

Statement 2 is correct: The ownership rights were handed over to the peasants, who had full rights regarding the sale, transfer, and leasing of the land. The British Government collected taxes directly from the peasants.

Statement 3 is correct: The Ryotwari System defined the state itself as the supreme zamindar and vested a ryot with individual proprietary rights in land in return for annual cash payment or revenue assessments to the government. The revenue to be paid by each village was fixed, as well as the rent or the revenue to be paid by each ryot. Ryots were given pattas, annual receipts that constituted a title to land. The state retained its claim over wastelands.

Source: plasey to partition chapter 2 page 70, ishita banerjee chapter 2 page 73

Q.33) Promotha Mitter, Barindrakumar Ghosh and Jatindranath Bannerji are known for founding which of the following organizations?

- Anushilan Samiti in Calcutta
- Calcutta Unitarian Committee
- Indian Association of Calcutta
- Bengal British India Society

Ans) a

Exp) Option a is the correct answer.

Option a is correct: Promotha Mitter, Barindrakumar Ghosh, Jatindranath Bannerji founded the **Anushilan Samiti in Calcutta**. It was physical exercise group, which was actually used as an underground society for anti-British revolutionaries.

Option b is incorrect: The **Calcutta Unitarian Committee, jointly founded by William Adam and Rammohun Roy** in September 1821, sought to bring together prominent Brahmins who were friends of Roy's and supporters of his agenda for the promotion of religious monotheism and social reform.

Option c is incorrect: The **Indian Association of Calcutta was founded by Surendranath Banerjee and Ananda Mohan Bose in 1876**. By 1886, this association was merged with the Indian National Congress.

Option d is incorrect: The **Bengal British India Society was founded in 1843 by the combined efforts of George Thompson, Dwarkanath Tagore, Chandra Mohan Chatterjee, and Parmananda Maitra**. It was founded on the advice of George Thompson. He was brought to India from England by Dwarkanath Tagore. George Thomas was the Secretary of the British Indian Society.

Source: A Brief History of Modern India by Rajiv Ahir, Spectrum, 6th Edition

Q.34) With reference to the period after 1860s in India's colonial history, consider the following statements:

- Large scale investment in Railways
- Huge investments made in training Indian people for self-government.
- Reactionary imperialist policies got replaced with Liberal imperialist policies

Which of the statements given above is/are correct?

- 1 and 3 only
- 1 only
- 2 and 3 only
- 1 and 2 only

Ans) b

Exp) Option b is the correct answer.

The Period after 1860s in Indian history is considered as the Era of Foreign Investments and International Competition for Colonies. During this stage, Britain made strenuous efforts to consolidate its control over India.

Statement 1 is correct: The strengthening of colonial rule over India was meant to keep out the rivals as well as to attract British capital to India and provide it security. As a result, a **very large amount of British**

capital got invested in railways, loans (to the Government of India), trade and, to a lesser extent, in plantations, coal mining, jute mills, shipping and banking in India.

Statement 2 is incorrect: The notion of training the Indian people for self-government vanished (revived only after 1918 because of pressure exerted by the Indian national movement). Now, the aim of British rule was declared as permanent 'trusteeship' over the Indians. The Indians were declared to be permanently immature—a 'child' people—needing British control and trusteeship. Geography, climate, race, history, religion, culture and social organisation were all cited as factors in making the Indians unfit for self-government or democracy. The British thus tried to justify their rule over Indians for centuries to come—all in the name of civilising a barbaric people—"the White Man's burden

Statement 3 is incorrect: Liberal imperialist policies got replaced with reactionary imperialist policies, which were reflected in the viceroalties of Lytton, Dufferin, Lansdowne and Curzon. The strengthening of colonial rule over India was meant to keep out the rivals as well as to attract British capital to India and provide it security.

Source: Plassey to Partition chapter 2 page 122 and Spectrum

Q.35) NASA has been tracking a giant asteroid named '199145 (2005 YY128)'. Which one of the following is the most appropriate reasons for this?

- It is believed to be remnants from the early solar system.
- It contains valuable resources such as rare earth metals.
- It can help us in understanding the origins of life on Earth.
- It is classified as a potentially hazardous asteroid for our planet.

Ans) d

Exp) Option d is the correct answer.

Experts at NASA are tracking a giant asteroid named 199145 (2005 YY128) which is just days away from entering Earth's orbit. The asteroid is **classified as a potentially hazardous asteroid (PHA)** because its orbit brings it within 0.05 astronomical units (AU) of Earth's orbit. Tracking and studying asteroids like 199145 (2005 YY128) is important for identifying potential threats to Earth.

199145 (2005 YY128): It is an asteroid whose **orbit crosses the orbit of Earth**. It orbits the sun every 774 days (2.12 years) in an elliptical orbit. 2005 YY128 is probably between 566 to 1.265 kilometers in diameter. Its orbit is 0.03 astronomical unit from Earth's orbit at its closest point.

Source: <https://economictimes.indiatimes.com/news/new-updates/giant-asteroid-to-hit-earths-atmosphere-find-out-when-will-it-happen/articleshow/97797292.cms>

<https://www.virtualtelescope.eu/2023/02/10/potentially-hazardous-asteroid-199145-2005-yy128-close-encounter-a-image-09-feb-2023/>

Q.36) Which one of the following statements correctly explains the 'Paternalistic Imperialists' School of thought during British rule in India?

- This school respected Indian culture and advocated introduction of as few changes as possible.
- This school was sharply critical of Indian society and used to justify economic and political enslavement of India.
- This school wanted to make India a part of the modern and progressive world of science and humanism.
- This school wanted that the modernisation of India had to occur thorough social reformation.

Ans) b

Exp) Option b is the correct answer.

The new currents of thought based on rationalism, humanism and doctrine of progress caused conflicts among administrators and produced different schools of thought during British rule in India.

Option a is incorrect: The **Conservatives school of thought** advocated **introduction of as few changes as possible**. Indian civilisation, they felt, was different from the European one but not necessarily inferior to it. Many of these thinkers respected Indian philosophy and culture. If at all, Western ideas and practices were to be introduced gradually and cautiously. Early representatives of this school of thought were Warren Hastings and Edmund Burke and later ones included Munro, Metcalfe, and Elphinstone

Option b is correct: The **Paternalistic Imperialists** became influential, especially after 1800. They were **sharply critical of Indian society and culture and used to justify economic and political enslavement of India**.

Option c is incorrect: The **Radicals** applied advanced humanistic and rational thought to the Indian situation. They thought that India had the capacity to improve and that they must help the country do that. They **wanted to make India a part of the modern progressive world of science and humanism** and therefore advocated the introduction of modern western science, philosophy, and literature.

Option d is incorrect: Predominantly, the **ruling elements in the British Indian administration continued to be imperialistic and exploitative**. They thought that the modernisation of India had to occur within broad limits imposed by the needs of an easier and more thorough exploitation of its resources.

Source: Spectrum- ch-Survey of British Policies in India

Q.37) Which of the following were the major aims of British foreign policy in Asia and Africa during colonial era?

1. Protection of the invaluable Indian empire
2. Gradual transfer of power to the Indigenous people
3. Expansion of British commercial interests
4. Prevent other European powers from expanding their influence in the region
5. Ensure freedom of navigation for unhindered global trade

Select the correct answer using the codes given below:

- a) 1 and 3 only
- b) 2, 3 and 5 only
- c) 1, 3 and 4 only
- d) 1, 2, 3, 4 and 5

Ans) c

Exp) Option c is the correct answer.

The pursuance of a foreign policy, guided by interest of British imperialism, often led to India's conflicts with neighbouring countries. During the colonial era, the major aims of British foreign policy in Asia and Africa were as follows:

Statement 1 is correct: Protection of the invaluable Indian empire- The British aimed to protect their valuable Indian empire, which was the jewel in the crown of the British Empire.

Statement 2 is incorrect: Although the British did eventually transfer power to the indigenous people, this was **not a major aim of their foreign policy during the colonial era**. The transfer of power was more a result of pressure from nationalist movements and the changing geopolitical landscape.

Statement 3 is correct: Expansion of British commercial interests- The British were interested in expanding their commercial interests in Asia and Africa. They established trade networks, invested in infrastructure, and exploited the natural resources of the regions.

Statement 4 is correct: Keeping other European imperialist powers at an arm's length- The British aimed to maintain their dominance in Asia and Africa and prevent other European powers from expanding their influence in the region. This was a major factor in the partition of Africa and the Scramble for Asia.

Statement 5 is incorrect: While the British supported trade and navigation, this was not a major aim of their foreign policy in Asia and Africa. Rather, their **focus was on expanding their own commercial interests and protecting their empire.**

Source: Spectrum- CH-Survey of British Policies in India

Q.38) With reference to 'British Policy towards Princely States after 1857', consider the following statements:

1. Britishers decided to pursue the policy of annexation of princely states through constitutional means.
2. The British made clear that the princes ruled their states merely as agents of the British Crown.
3. After 1857, the British government abandon their right to interfere in the internal affairs of states.
4. British helped these states adopt modern administrative institutions.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1, 2 and 4 only
- d) 2 and 4 only

Ans) d

Exp) Option d is the correct answer.

After the Indian revolt of 1857, the British government adopted a new policy towards the princely states in India. This policy was based on the doctrine of paramountcy, which asserted the sovereignty of the British Crown over the entire Indian subcontinent, including the princely states.

Statement 1 is incorrect: After the revolt of 1857, **Britishers decided to abandon the policy of annexation.** The new policy was to depose or punish but not annex. Also, territorial integrity of states was guaranteed, and it was announced that their right to adopt an heir would be respected.

Statement 2 is correct: The subordination of princely states to British authority was completed when the fiction of Indian states standing in a status of equality with the Crown as independent, sovereign states ended with the Queen adopting the title of Kaiser-i-Hind (Queen Empress of India) in 1876, to emphasise British sovereignty over entire India. It was **later made clear by Lord Curzon that the princes ruled their states merely as agents of the British Crown.**

Statement 3 is incorrect: With paramountcy, the British Government **exercised the right to interfere in the internal affairs of states through their residents** or by appointing and dismissing ministers and officials.

Statement 4 is correct: British encouraged the princely states to modernize and reform their administrations. They **provided financial and technical assistance for infrastructure development, such as railways, roads, and telegraphs**, and also established educational institutions in the princely states. By doing so, the British aimed to create a modern, efficient, and loyal administrative class in the princely states that would support British rule.

Source: Spectrum-Survey of British Policies in India

Q.39) With reference to the contribution of 'Chidambaram Pillai' in National Freedom Struggle, consider the following statements:

1. He helped in spreading of Swadeshi movement in the Madras region of southern India.
2. He headed the 'Mylapore' group in the Madras Presidency in 1918.
3. He founded a navigation company to challenge the trade monopoly of the British India Steam Navigation Company.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

V.O. Chidambaram Pillai (also known as V.O.C. Pillai) was an Indian freedom fighter and politician who played a significant role in India's struggle for independence from British colonial rule. He was born on 5 September 1872 in Ottapidaram, a town in present-day Tamil Nadu.

Statement 1 is correct: Chidambaram Pillai was responsible for **spreading the Swadeshi movement in the Madras region of southern India**. He was actively involved in promoting the use of Indian-made goods and boycotting British goods as part of the Swadeshi movement. He organised the strike of the Tuticorin Coral Mill to protest against the working conditions in the mills.

Statement 2 is incorrect: Chidambaram Pillai did not head the Mylapore group in the Madras Presidency in 1918. **V. Krishnaswami Iyer headed the 'Mylapore' group in the Madras Presidency**. The Mylapore group was a political group formed in 1916 by a group of Indian nationalists in the Madras Presidency (now Tamil Nadu) of British India. The Mylapore group was known for its moderate approach and believed in using constitutional means to achieve their goals. They sought to work within the colonial system and gain concessions from the British authorities rather than advocating for outright independence.

Statement 3 is correct: Chidambaram Pillai founded the Swadeshi Steam Navigation Company in 1906, which aimed to challenge the monopoly of British shipping companies on coastal trade in India. He founded the Swadeshi Steam Navigation Company in Tuticorin on the east coast of the Madras Province to **break the trade monopoly of the British India Steam Navigation Company**. He bought the SS Lavo and SS Galia from France and started regular services between Tuticorin and Colombo (Sri Lanka) though the British tried their best to suppress his efforts. His **ships flew flags emblazoned with 'Vande Mataram'**.

Source: Spectrum- APPENDICES

Q.40) With reference to 'Sickle Cell Anemia', consider the following statements:

1. It is an inherited blood disorder that affects the production of hemoglobin.
2. A person can develop the disease only if they inherit two copies of the abnormal gene, one from each parent.
3. It can be prevented through appropriate vaccination at the early stage of its onset.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

Union Finance Minister recently announced the Central Government's plan to launch a mission to eliminate sickle cell anemia by 2047.

Statement 1 is correct: Sickle cell anemia is an **inherited blood disorder that affects the production of hemoglobin**, a protein in red blood cells that carries oxygen throughout the body. In individuals with sickle cell anemia, the hemoglobin protein is abnormal, causing red blood cells to become rigid, sticky, and

crescent-shaped (resembling a sickle) instead of the normal round shape. These abnormal red blood cells can get stuck in small blood vessels, reducing blood flow and causing various complications.

Statement 2 is correct: Sickle cell disease is an autosomal recessive genetic disorder, which means that a **person needs to inherit two copies of the abnormal hemoglobin gene (one from each parent) in order to develop the disease.**

If both parents have the sickle cell trait (one copy of the abnormal gene and one normal gene), there is a 25% chance that each of their children will inherit two copies of the abnormal gene and develop sickle cell disease, a 50% chance that each child will inherit one copy of the abnormal gene and be a carrier of the trait, and a 25% chance that each child will inherit two normal genes and neither have the disease nor be carriers of the trait.

Statement 3 is incorrect: Sickle cell anemia **cannot be prevented through vaccination as it is a genetic disorder.** The only cure for this disease is **bone marrow or stem cell transplantation.**

However, there are treatments that can help relieve symptoms, lessen complications, and prolong life.

Q.41) “This legislation restricted the company’s monopoly over trade with India. It gave the company, the right to collect revenue for 20 more years from British territories in India. It provided for the spread of western education among the inhabitants of the British territories in India. It allowed the Christian missionaries to come to India to preach their religion. The constitutional position of the British territories in India was explicitly defined for the first time in this Act.”

Identify the Act to which the above description is related to:

- Pitt’s India Act of 1784
- The Charter Act of 1793
- The Charter Act of 1813
- The Charter Act of 1833

Ans) c

Exp) Option c is the correct answer.

In England, the **business interests were pressing for an end to the Company’s monopoly** over trade in India because of a **spirit of laissez-faire** (the policy of allowing private businesses to develop without government control) **and the continental system by Napoleon** by which the European ports were closed for Britain. **The Charter Act of 1813 Act** sought to redress these grievances. The powers of the Board of Control were further enlarged. **It asserted the sovereignty of the British Crown over the Company’s territories in India.** It has following provisions: -

- 1) It abolished the trade monopoly of the company in India i.e., the Indian trade was thrown open to all British merchants. However, it continued the monopoly of the company over trade in tea and trade with China (abolished under Charter Act of 1833).
- 2) The Company’s shareholders were given a 10.5 per cent dividend on the revenue of India.
- 3) The Company was to retain the possession of territories and the revenue for 20 years more, without prejudice to the sovereignty of the Crown. Thus, the constitutional position of the British territories in India was defined explicitly for the first time.
- 4) A sum of one lakh rupees was to be set aside for the revival, promotion and encouragement of literature, learning and science among the natives of India, every year.

5) The regulations made by the Councils of Madras, Bombay and Calcutta were now required to be laid before the British Parliament. The constitutional position of the British territories in India was thus explicitly defined for the first time.

6) Separate accounts were to be kept regarding commercial transactions and territorial revenues. The power of superintendence and direction of the Board of Control was not only defined but also enlarged considerably.

7) It allowed the Christian missionaries to come to India to preach their religion.

Q.42) Prabhat Kusum Roy Chaudhuri, Athanasius Apurbakumar Ghosh and Premtosh Bose were prominent leaders related to which of the following during the Indian National Movement?

- Social reformers from Atmiya Sabha
- Revolutionaries who were hanged in Delhi conspiracy case
- Labour leaders who helped in organising labour
- Indian Industrialist who funded national movement

Ans) c

Exp) Option c is the correct answer.

Prabhat Kusum Roy Chaudhuri, Athanasius Apurbakumar Ghosh, and Premtosh Bose were lawyers (Labour leaders) who helped in organizing labor.

Prabhat Kusum Roy Chaudhuri (1878–1921), son of Debi Prasanna, the well-known Brahmo editor of NabyaBharat, was closely associated with the work of organizing an Indian mill-hands' union among the jute employees.

Athanasius Apurbakumar Ghosh was a barrister in Calcutta. He was a pioneer labor leader during the early decades of the twentieth century in the British Empire in India.

Premtosh Bose was a proprietor of a Printing Press in Calcutta. He was a pioneer labor leader in the Bengal Province of the British Empire in India. He played an active role in organising a Railwaymen's Union in East Indian Railway in 1906 when Bengal was agitating against the partition of Bengal.

http://ccnet.vidyasagar.ac.in:8450/pluginfile.php/6118/mod_resource/content/1/sumit_sarkar_the_swadeshi_movement_in_bengal_1903%281%29%281%29.pdf

Q.43) Consider the following statements with reference to Ambikagiri Roy Chaudhuri, a leader during Indian National Movement:

- He was a prominent writer and poet.
- He, along with some others, formed a British Opposition Anarchist team during Swadeshi movement.
- He established Assam Jatiya Mahasabha to protect Assamese people from encroachment of infiltrators.

Which of the above given statements is/are correct?

- 1 only
- 2 and 3 only
- 1 and 3 only
- 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Ambikagiri Roy Chaudhuri joined the Swadeshi Movement and social development work from 1904–05.

Statement 1 is correct: Ambikagiri Roy Chaudhuri was an Assamese poet, lyricist, singer, powerful prose writer, news worker, magazine editor, patriotic, social worker, and the leading freedom fighter of India's freedom struggle. He was elected president of the Assam Sahitya Sabha in 1950. Raichoudhury published poetry books called 'Tumi' in 1915 and 'Beena' in 1916. In 1918, in collaboration with Chandranath Sharma, he came out with a monthly magazine called 'Chetana'. He discussed in the writings of 'Chetna' the freedom movement, non-cooperation, the place of violence and non-violence in politics, various problems at home and abroad, as well as the national problems of Assam, etc. He wrote a patriotic drama named Bandini Bharat.

Statement 2 is correct: He joined the Swadeshi Movement and did social development work from 1904 to 05. He joined a few other youth students and formed a British Opposition Anarchist team during this period, as a result, the British government captured Ambikagiri in Barpeta from 1908 to 1915.

Statement 3 is correct: For the protection of the future of Assam and Assamese, Raichoudhury established **'The Assamese Rights and Interests Conservation Meeting, Assam Jatiya Mahasabha, and Asam Shikha Prachar Samiti** to protect the dignity of Assamese in view of the encroachment of infiltrators on the farmland of state. Raichoudhury himself took care to show Assamese society the path of self-establishment economically by opening the 'Swadeshi Kinok Sangha' and establishing a business company called 'Mayabini Chemical Works'.

A Brief History of Modern India by Rajiv Ahir, Spectrum, 6th Edition

Q.44) The period of 1757–1813 is considered as The Period of Merchant Capital (Mercantilism) in Indian History. Consider the following statements regarding the changes introduced during this period:

1. British traders no longer required import of Bullion from England to finance their trade in India.
2. Gomastas were replaced by Dadni merchants, which reduced the Indian merchants to commissioned brokers.
3. There was no large-scale import of British manufactured goods into India.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

In this phase there was large-scale drain of wealth from India which constituted 2–3 per cent of Britain's national income at the time. It was this wealth that played an important role in financing Britain's industrial revolution.

Statement 1 is correct: Prior to 1757 the English trade in Bengal was largely financed through import of bullion from England. But after that year not only bullion import stopped, but bullion was exported from Bengal to China and other parts of India, which gave a competitive advantage to the English Company over its European rivals.

Statement 2 is incorrect: From 1753 the English Company began to replace the independent dadni merchants with gomastas who were agents of the English and dependent on commission paid by the English as a percentage on value of cloth collected by these agents. After the battle of Plassey the increasing political power in the hands of the English enabled them to swith over to this new gomasta system which reduced the Indian merchants to commissioned brokers. In 1775 a variant of this system, known as the 'contract system', consolidated the position of the English in relation to the Indian brokers. Finally, in 1789 the system of 'direct agency' was introduced, dispensing with Indian middlemen altogether Thus step by

step Indian businessmen were reduced to a subordinate position (e.g. in salt, saltpeter business) or virtually excluded (e.g. in raw silk, cotton cloth) by the end of the 18th century.

Statement 3 is correct: In this stage, there was no large-scale import of British manufactures into India, rather, the reverse occurred—there was an increase in export of Indian textiles, etc. The weavers were, however, ruined at this stage by the Company's monopoly and exploitation. They were forced to produce for the Company under uneconomic compulsions.

Q.45) Which one of the following statements correctly explains 'Vostro Account'?

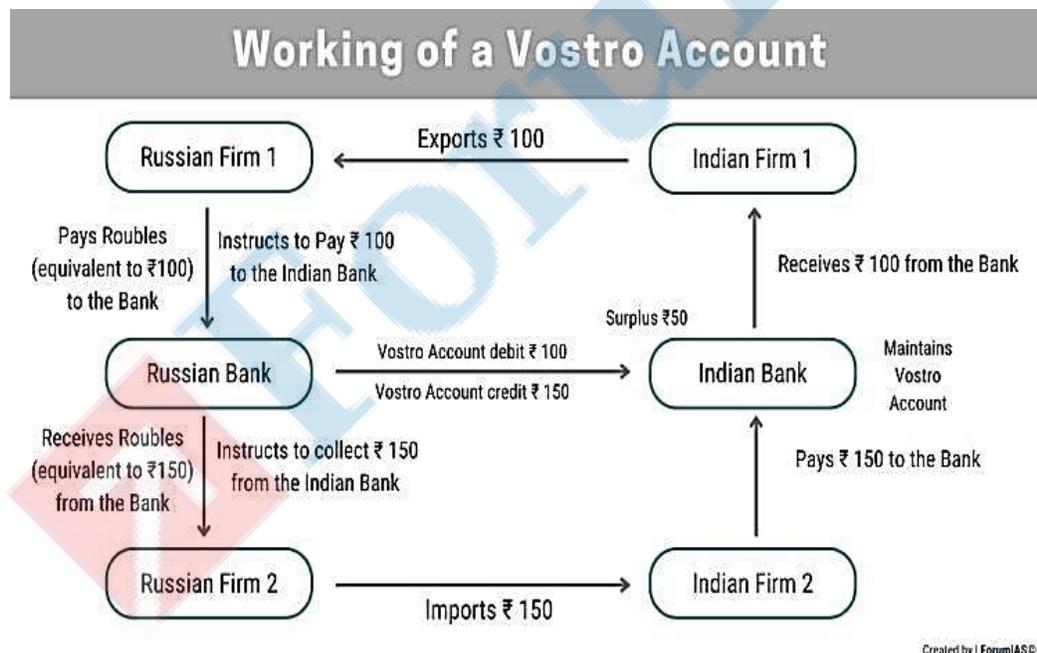

- It is similar to a savings bank account, but usually offers a higher interest rate.
- It is an account that domestic banks hold for foreign banks in the former's domestic currency.
- It is a bank account held in foreign country by domestic banks, denominated in foreign currency.
- It is an account designed for businesses and offers features such as payroll processing, online banking, and merchant services.

Ans) b

Exp) Option b is the correct answer.

Government officials informed that 20 Russian banks have opened Special Rupee Vostro Accounts (SRVA) with partner banks in India.

A **vostro account is an account that domestic banks hold for foreign banks in the former's domestic currency**, in this case, the rupee. Domestic banks use it to provide international banking services to their clients who have global banking needs. It is an integral offshoot of correspondent banking that entails a bank to facilitate wire transfers, conduct business transactions, accept deposits and gather documents on behalf of the other bank.

Source: <https://blog.forumias.com/explained-vostro-accounts-and-how-they-facilitate-trade/>
<https://www.thehindu.com/business/Economy/explained-vostro-accounts-and-how-they-facilitate-trade/article66537848.ece#:~:text=A%20vostro%20account%20is%20an,who%20have%20global%20banking%20needs.>

Q.46) Consider the following statements regarding the Permanent Settlement Act of 1793:

1. The Permanent Settlement Act was introduced during the reign of Cornwallis.
2. The share of the government in the revenue collected in a particular year was fixed as 10/11th of the total revenue collected in that year.
3. Under this law, land of the zamindars was liable to be sold by government if they failed to pay the revenue by due date.

Which of the statements given above are correct?

- a) 1 and 3 Only
- b) 1 and 2 Only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is Correct: The Permanent settlement system of land revenue collection or the zamindari system in Bengal was introduced through Permanent Settlement Act 1793 during the reign of then Governor general of Bengal **Lord Cornwallis**.

Statement 2 is incorrect. The amount to be paid was fixed permanently, that is, it was not to be increased (or decreased) ever in future. The governments share in revenue was not the 10/11th of revenue collected in that particular year, but the amount was fixed as the **10/11th of the revenue collected in the assessment year 1789-90. This amount was fixed at 26.8 million rupees.**

It was felt that this would ensure a regular flow of revenue into the Company's coffers and at the same time encourage the zamindars to invest in improving the land. Since the revenue demand of the state would not be increased, the zamindar would benefit from increased production from the land.

Statement 3 is Correct: The Permanent settlement law also came to be known as Sunset Law. Under this law, land of the zamindars was liable to be sold if they failed to pay government revenue by due date. Under the operation of the Sunset Law, greater part of the zamindari lands of Bengal were sold through auction sales and their lands were transferred to new hands.

Q.47) Consider the following statements with reference to Aurobindo Ghosh:

1. He was imprisoned by British in Alipore Conspiracy Case.
2. He gave a new philosophical doctrine called the Integral Humanism.
3. His one of the most famous literary works is a book titled 'The Life Divine.'
4. In his famous essay 'The Demand of the Mother', Aurobindo compared the Nation to the Mother Goddess.

Which of the above given statements is/are correct?

- a) 2 and 3 only
- b) 1, 3 and 4 only
- c) 2, 3 and 4 only
- d) 1 and 4 only

Ans) b

Exp) Option b is the correct answer.

Aurobindo Ghosh was an Indian revolutionary who became yogi, seer, philosopher, poet, and propounded a philosophy of divine life on earth through spiritual evolution.

Statement 1 is correct: From 1902 to 1910 Aurobindo Ghosh partook in the struggle to free India from the British. The partition of Bengal in 1905 provoked Aurobindo to leave his job in Baroda and plunge into the nationalist movement. He started the patriotic journal Bande Mataram to propagate radical methods and

revolutionary tactics instead of supplication. **In 1908, he was arrested in the Alipore Bomb Conspiracy Case and was acquitted in 1909 after a long trial.**

Statement 2 is incorrect: Integral humanism was a set of concepts drafted by Deendayal Upadhyaya and not Aurobindo Ghosh. Sri Aurobindo had begun the practice of Yoga in 1905 in Baroda. In 1908 he had the first of several fundamental spiritual realisations. In 1910 he withdrew from politics and went to Pondicherry in order to devote himself entirely to his inner spiritual life and work. **During his forty years in Pondicherry, he evolved a new method of spiritual practice, which he called Integral Yoga.** Its aim is a spiritual realization that not only liberates man's consciousness but also transforms his nature.

Statement 3 is correct: The Life Divine is a major philosophical work of Sri Aurobindo. Sri Aurobindo presents a theory of evolution, which will culminate in the transformation of the human being and the advent of a divine life upon earth. The Life Divine first appeared serially in the monthly review Arya. The first edition and the first Volume of this monumental work was published in 1939.

Statement 4 is correct: In April 1908, Aurobindo published his famous essay 'The Demand of the Mother' in the same journal. In this piece, Aurobindo compared the Nation to the Mother Goddess, and asserted that the masses of Bengal must be willing to dedicate themselves wholly to the cause of her liberation.

Q.48) Consider the following statements regarding Izaredari System of land revenue during British India:

1. It was introduced in 1773 by Warren Hastings in Bengal presidency.
2. In this system, the right to collect revenue was auctioned to the highest bidder.
3. There was a fixed revenue generation for the Company in the Izaredari system.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. After the battle of Plassey 1757, British got Diwani Rights (right to collect revenue) in Bengal. When Roberts Clive obtained the Diwani of Bengal, there used to be annual settlements of Land revenue. Izaredari system was introduced in 1773 by Warren Hastings in Bengal whereby he assumed that all the land belongs to State. This was the first land tenure system implemented in India by British.

Statement 2 is correct. Under this system, right of collecting revenue of a particular area was auctioned to the highest bidder. The peasants, shopkeepers and merchants had to pay their taxes to the Izaredars who eventually was also the highest bidder to the company. The Izaredar was essentially a contractor who collected the revenue from the poor peasants and then paid to the company saving his profits without any interest in peasants' welfare.

Statement 3 is incorrect. From the Company's point of view, the Izaredari system was not good because there was a frequent change in the assessment period and no fix revenue generation. The Izaredari system ended when Lord Cornwallis introduced the Permanent settlement in Bengal, Bihar, Orissa etc.

Q.49) Indian Sandhurst Committee is related to which of the following subjects?

- State interference in event of famines
- Development of irrigation facilities
- Indianisation of army
- Indian Currency and coinage

Ans) c

Exp) Option c is the correct answer.

Option c is correct: In June 1925, a new committee called **Indian Sandhurst Committee or Skeen Committee** was appointed to **suggest reforms for Indianisation of the army**. This committee recommended that the number of **vacancies at Sandhurst be increased from 10 to 20**, Indians be made eligible as Kings' Commissioned Officers in Artillery, Signals and Engineers too and that a military college be opened in India. As late as 1926, the Indian Sandhurst Committee was visualising a 50% Indianised officer cadre for 1952. The government **did not accept the recommendations** of the Skeen Committee in full but agreed to increase the **vacancies reserved for Indians at Sandhurst from 10 to 20 per year**.

Source: <https://www.tribuneindia.com/news/features/how-indians-rose-up-to-be-officers-10124>

Q.50) The Union Budget 2023-24 has proposed to launch Pradhan Mantri PVTG (Particularly Vulnerable Tribal Group) Development Mission. In this context, consider the following statements about the PVTGs:

- At present, 75 PVTGs have been identified in India.
- As per Census 2011, PVTGs make up for around 8% of the total population.
- Great Andamanese and Sentinelese tribes of the Andaman and Nicobar Islands have been identified as PVTGs.

Which of the statements given above is/ are correct?

- 1 only
- 1 and 2 only
- 1 and 3 only
- 2 and 3 only

Ans) c

Exp) Option c is the correct answer.

The Union Budget 2023-24 proposed for launching Pradhan Mantri PVTG (Particularly Vulnerable Tribal Groups) Development Mission. The aim is to improve the socio-economic conditions of the PVTGs. To achieve this, the Mission shall aim at safe housing, clean drinking water and sanitation, improved access to health, nutrition, education, road and telecom connectivity and sustainable livelihood opportunities.

Statement 1 is correct: In 1975, The Government of India initiated to identify the most vulnerable tribal groups as a separate category and identified 52 such groups, while in 1993, 23 more such groups have been added to this category. **So, at present, there are 75 PVTGs out of around 705 Scheduled Tribes (STs).** Government follows the following **criteria to identify PVTGs:**

- Pre-agricultural technology
- Low level of literacy
- Economic backwardness
- A declining or stagnant population.

Statement 2 is incorrect: As per Census 2011, **the total population of all the Scheduled Tribes (STs) is 8.6%** of the country's total population. Approximately, 10.42 crore Indians (Census 2011) have been notified as the Scheduled Tribes. **PVTGs constitute a very small proportion of the total tribal population.** As per the

Census, PVTG population comprised of **only around 17 lakh people**. The PVTG of **Sahariyas has the highest population**. Only around 12 PVTGs have population of more than 50,000.

Statement 3 is correct: The Great Andamanese and the Sentinelese have been identified as PVTGs in the Andaman and Nicobar (A&N) Islands by the government. Other PVTGs in the A&N Islands are **Jarawa, Onge and Shom Pen**. As per the website of South Andaman District, the population of **the Great Andamanese and the Sentinelese has been reduced to only 43 and 39 individuals respectively**.

Q.1) The average number of visitors to a Museum every Monday is 96, whereas it is 156 on other days of the month. What will be the average number of visitors for the entire month if it has 30 days and begins on Monday?

- a) 144
- b) 145
- c) 146
- d) 147

Ans) c

Exp) Option c is the correct answer.

Since the Month begins on Monday, there will be 5 Mondays in the month.

There are 30 days so 5 Mondays and 25 would be the rest of the days.

The average number of visitors on Monday = 96

The average number of visitors on the rest of the days = 156

Thus, visitors on Monday = $96 \times 5 = 480$

Visitor on rest of the days = $25 \times 156 = 3900$

Total visitors in a month = 4380

Average visitors in the month = $4380/30 = 146$

Q.2) Ayush had three books in which Book A had 120 pages. Book B had 10% more pages than Book A and Book C had 10% less pages than Book A. If she tore roughly 5%, 10% and 15% of pages in A, B and C respectively, then approximately what percent of pages did she tear out?

- a) 5%
- b) 10%
- c) 11%
- d) 15%

Ans) b

Exp) Option b is the correct answer.

Given,

Total No. of pages in book A = 120

Total No. of pages in book B

= 10% of 120 + 120

= 12 + 120

= 132

Total No. of pages in book C

= 120 - 10% of 120

= 120 - 12

= 108

No. of pages torn from book A = 5% of Total No. of pages in book A = $(5/100) \times 120 = 6$

No. of pages torn from book B = 10% of 132 = 13.2

No. of pages torn from book C = 15% of 108 = 16.2

Total No. of pages torn out from books A, B, and C = $6 + 13.2 + 16.2 = 35.4$

Now, Total No. of pages in books A, B, and C earlier = $120 + 132 + 108 = 360$

Required Percentage = $(\text{Total No. of pages torn out} / \text{Total No. of pages in books A, B and C earlier}) \times 100$

= $(35.4/360) \times 100$

= 9.83% (i.e. approximately 10%)

Q.3) In a bag, there are 12 pens which are divided into 7 green and 5 black pens. In how many ways can we remove 8 pens so that at least 1 green pen and 1 black pen remain in the bag?

- a) 445
- b) 455
- c) 566
- d) 636

Ans) b

Exp) Option b is the correct answer.

Total No of Pens = 12

Total No of Green Pens = 7

Total No of Black Pens = 5

Given Condition: Number of Possible ways to draw 8 pens from the bag which contains at least 1 green and 1 black

No of Possible ways are = (6,2) (5,3) (4,4)

Case 1:

$${}^7C_6 \times {}^5C_2$$

$$\Rightarrow 7 \times 10$$

$$\Rightarrow 70$$

Case 2:

$$\Rightarrow {}^7C_5 \times {}^5C_3$$

$$\Rightarrow 7 \times 3 \times 5 \times 2$$

$$\Rightarrow 21 \times 10$$

$$\Rightarrow 210$$

Case 3:

$$\Rightarrow {}^7C_4 \times {}^5C_4$$

$$\Rightarrow 35 \times 5$$

$$\Rightarrow 175$$

Total Ways = 70 + 210 + 175

$$\Rightarrow 455.$$

Q.4) The price of wheat increases by 40 paise every year, while the price of rice increases by 15 paise every year. If in 2013, the price of wheat was Rs. 4.20 and that of rice was Rs. 6.30, in which year wheat will cost 40 paise more than the rice?

- a) 2020
- b) 2021
- c) 2022
- d) 2023

Ans) d

Exp) Option d is the correct answer.

Price of wheat increases by 40 paise every year, while the price of rice increases by 15 paise every year.

In 2013, price of wheat = Rs. 4.20 = 420 paise

Price of rice = Rs. 6.30 = 630 paise

Let number of years = x

According to question,

$$420 + 40x = 40 + 630 + 15x$$

$$25x = 250, x = 10 \text{ years}$$

So, it will take 10 years for the price of wheat to be 40 paise above the price of rice.

$$2013 + 10 = 2023$$

Q.5) There is a 117-digit number which is formed by linear arrangement of first 63 natural numbers. If this number is divided by 8, what remainder it leaves?

- a) 5
- b) 6
- c) 7
- d) 8

Ans) c

Exp) Option c is the correct answer.

To find the remainder by 8,

We only divide the number formed by the last 3 digit by 8.

The last six of the 117 digit would be = (.....616263)

The last 3 digits of the number is 263

After dividing by 8 the remainder will be 7

Q.6) There are 21 bottles inside a refrigerator which is numbered from 1 to 21. Two bottles are drawn one after one without replacement. What is the probability that both bottles are even numbered?

- a) $2/7$
- b) $3/14$
- c) $8/21$
- d) $5/21$

Ans) b

Exp) Option b is the correct answer.

There are 10 even numbers in the group 1-21.

The probability that the first bottle is even numbered = $10/21$

Since that the bottle is not replaced there are twenty bottles left, of which 9 are even numbered.

The probability that the second bottle is even numbered = $9/20$

Thus, required probability = $10/21 \times 9/20$

= $3/14$

Q.7) How many 4 digit numbers are there such that the product of the digits is less than 8?

- a) 13
- b) 15
- c) 19
- d) 21

Ans) c

Exp) Option c is the correct answer.

For the product of a 4-digit number to be lesser than 8, it should comprise of either 1, 2, 3, 4, 5, 6 or 7 in a certain way.

Let's start with

Product 1 => Possible in only one way (1111).

Product 2 => Possible in 4 ways (2111, 1211, 1121 and 1112).

Product 3=> Possible in 4 ways (3111, 1311, 1131 and 1113).

Product 4 => Possible in 10 ways (4111, 1411, 1141, 1114, 2211, 2121, 2112, 1212 and 1221).

Total = $1 + 4 + 4 + 10 = 19$ numbers.

Q.8) A second-hand motorbike was bought on marked at Rs. 25000 with successive discounts of 20% and 10%. If the buyer spends Rs. 3000 for its repair and sells it for Rs. 28000, what would be the profit or loss percentage?

- a) 21.22%
- b) 26.66%
- c) 33.33%
- d) 42.22%

Ans) c

Exp) Option c is the correct answer.

Marked price = Rs. 25000 Formula for successive discounts is

Total Discount = $D1 + D2 - \frac{D1 \times D2}{100}$

$$= 20 + 10 - \frac{20 \times 10}{100}$$

$$= 30 - 2$$

$$= 28\%$$

Since 100% = 25000

After applying 28% discount, 72% of 25000 = 18000.

Amount spent on repair = 3000.

Total cost price is = 18000 + 3000 = 21000.

Given that selling price is 28000.

Since $SP > CP$ it is profit.

Profit = $SP - CP = 28000 - 21000 = \text{Rs } 7000$

Profit% = $\frac{\text{Profit}}{CP} \times 100$

$$= \frac{7000}{21000} \times 100$$

$$= 33.33\%$$

Q.9) What will be the sum of the digits of the smallest five-digits number which when divided by 9, 12, 15 and 24 leaves remainders 1, 4, 7 and 16 respectively?

- a) 10
- b) 12
- c) 8
- d) 11

Ans) a

Exp) Option a is the correct answer.

Given:

The smallest 5-digit number divided by 9, 12, 15, and 24 and the remainder is 1, 4, 7, and 16 respectively.

The least number which when divided by a, b, c and leaves the remainder p, q, and r respectively, is calculated by, LCM of (a, b, and c) - N where $N = (a - p) = (b - q) = (c - r)$

LCM of 9, 12, 15, and 24,

$$\Rightarrow 9 = 3 \times 3$$

$$\Rightarrow 12 = 2 \times 2 \times 3$$

$$\Rightarrow 15 = 3 \times 5$$

$$\Rightarrow 24 = 2 \times 2 \times 2 \times 3$$

$$\Rightarrow \text{LCM} = 2 \times 2 \times 2 \times 3 \times 3 \times 5 = 360$$

We know that the smallest number of five digit = 10,000

When 10000 divided by 360 then remainder is 280.

So, smallest five-digit number which is divided.

$$\begin{aligned} \text{by } 360 &= 10000 + (360 - 280) \\ &= 10080 \end{aligned}$$

Now we calculated the N

$$\begin{aligned} N &= (9 - 1) = (12 - 4) = (15 - 7) = (24 - 16) \\ &= N = 8 \end{aligned}$$

$$\begin{aligned} \text{Hence Required number} &= \text{smallest five-digit number which is divided by } 360 - N \\ &= 10080 - 8 \\ &= 10072 \end{aligned}$$

$$\begin{aligned} \text{Sum of digit of } 10072 &= 1 + 7 + 2 \\ &= 10 \end{aligned}$$

Thus, sum of the smallest five-digit number which when divided by 9, 12, 15, and 24 leaves remainders 1, 4, 7 and 16 respectively is 10.

Q.10) The profit earned by selling an article for Rs. 832 is equal to the loss incurred when the article is sold for Rs. 448. What will be the selling price of the article if it is sold at a 10% loss?

- a) 576
- b) 640
- c) 625
- d) 540

Ans) a

Exp) Option a is the correct answer.

The selling price at profit = Rs. 832

The selling price at loss = Rs. 448

Required loss = 10%

Formula used:

$$\text{S.P.} = (100 - \text{Loss\%})/100 \times \text{C.P.}$$

Where, C.P. = Cost price; S.P. = Selling price

Calculation:

Let, the profit = loss = x

$$\text{So, } 448 + x = 832 - x$$

$$= x + x = 832 - 448$$

$$= 2x = 384$$

$$= x = 384/2 = 192$$

The cost price = $(448 + 192) = (832 - 192) = \text{Rs. } 640$

So, the selling price = $(100 - 10)/100 \times 640 = \text{Rs. } 576$

The selling price of the article will be Rs. 576

Q.11) WHO's project report on 'CORONAVIRUS' consists of 30 pages each of 55 lines with 80 character on each line. In case the number of character is increased by 88 per lines but the numbers of lines is reduced to 50 per page, what is the percentage change in number of pages.

- a) 25%
- b) 12.5%
- c) 6.25%
- d) None of these

Ans) d

Exp) Option d is the correct answer.

Total character in report = $30 \times 55 \times 80$

Let the new number of pages be n . Then,

$$n \times 88 \times 50 = 30 \times 55 \times 80$$

$$\Rightarrow n = \frac{30 \times 55 \times 80}{50 \times 88} = 30$$

This means report has same number of pages as before. Therefore, no change.

Q.12) Divide Rs. 680 among A, B, and C such that A gets $\frac{2}{3}$ of what B gets and B gets $\frac{1}{4}$ of what C gets. Now, what is the share of C?

- a) 420
- b) 480
- c) 380
- d) 240

Ans) b

Exp) Option b is the correct answer.

$$A + B + C = 680$$

A gets $\frac{2}{3}$ of what B gets and B gets $\frac{1}{4}$ of C gets.

Thus,

$$A = \frac{2}{3} \text{ of } B$$

$$A : B = 2 : 3$$

$$\text{Ratio of } A : B \text{ is } 2 : 3 \text{ ----- (1)}$$

B gets $\frac{1}{4}$ of C what gets,

$$\text{Ratio of } B : C \text{ is } 1 : 4 \text{ ----- (2)}$$

Multiplying equation (2) by 3,

$$\text{Ratio of } B : C \text{ is } 3 : 12$$

$$\text{Ratio of } A : B : C \text{ is } 2 : 3 : 12$$

$$2 \text{ units} + 3 \text{ units} + 12 \text{ units} = 680$$

$$17 \text{ units} = 680$$

$$1 \text{ unit} = 680 / 17$$

$$1 \text{ unit} = 40$$

$$\text{Share of } C = 12 \text{ units}$$

$$= 12 \times 40$$

$$= 480$$

Q.13) What is the Unit's digit of the given expression?

$$78^{5562} \times 56^{256} \times 97^{1250}$$

- a) 6
- b) 5
- c) 4
- d) 3

Ans) a

Exp) Option a is the correct answer.

We need to look at the pattern followed by 78, 56, 97 when they are raised to high powers.

For 78, the unit digit for 'raised powers' are as follows:

$$78^1 = 8. \quad 78^5 = 8$$

$$78^2 = 4. \quad 78^6 = 4$$

$$78^3 = 2. \quad 78^7 = 2$$

SFG 2023 | LEVEL 2 | Test #27 – Solutions (CSAT) | ForumIAS

$$78^4 = 6.$$

$$78^8 = 6$$

$$78^{(5562)} = 78^{(4 \times 1390)} \times 78^2 = 78^{(4n+2)} = 78^{4n} \times 78^2 = 6 \times 4 = 24, \text{ hence unit digit is 4 here.} \text{---(1)}$$

Similarly, the unit digit for 'raised powers' of 56 are as follows:

$$56^1 = 6$$

$$56^2 = 6$$

$$56^3 = 6$$

Implies 56 raised to the power n will yield 6 as unit digit.-----(2)

Now, unit digit for 'raised power' of 97:

$$97^1 = 7$$

$$97^2 = 9$$

$$97^3 = 3$$

$$97^4 = 1$$

$$97^{1250} = 97^{(4 \times 312)} \times 97^2 = 97^{(4n+2)} = 97^{4n} \times 97^2 = 1 \times 9 = 9 \text{-----(3)}$$

Hence the unit digit for the given expression is , unit digit of $4 \times 6 \times 9 \rightarrow 6$

Q.14) LCM of two positive integers is thrice the smaller number. The difference of the larger number and the HCF of the two numbers is 10. The larger number is:

- a) 5
- b) 10
- c) 15
- d) 12

Ans) c

Exp) Option c is the correct answer.

Let the smaller number be 'x' and larger number be 'y'.

We know that $LCM \times HCF = x \times y$

So, $3x \times HCF = x \times y$ (Since, of two positive integers is thrice the smaller number)

$$HCF = y/3$$

And $y - y/3 = 10$ (given)

$$y = 15.$$

Q.15) Ranjit and Gaurav met at 9 AM at the Victoria Memorial. After one hour, Gaurav proceeded in the East direction while Ranjit proceeded in the North direction. Exactly at noon, they were 60KMs apart. Find the speed of the slower-moving person if the difference between Gaurav's and Ranjit's speed is 6 km/h.

- a) 13 km/h
- b) 14 km/h
- c) 18 km/h
- d) 26 km/h

Ans) c

Exp) Option c is the correct answer.

Given:

Gaurav and Ranjit Met at 9 AM and left at 10 AM. At Noon (12 PM) their distance is 60 KMs.

Their speed difference was 6 km/h

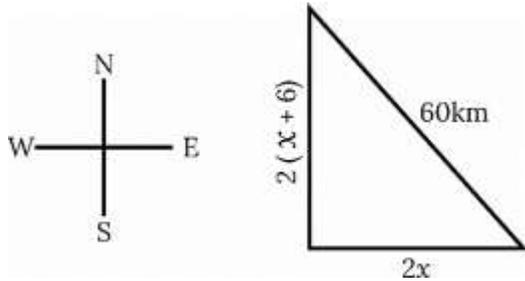

So total travel time = 2 hours

Let's assume the slower person was moving at x km/h. Hence distance traveled by slower person is 2x km

SFG 2023 | LEVEL 2 | Test #27 – Solutions (CSAT) | ForumIAS

The faster person's speed will be $(x+6)$ km/h. Hence, the distance traveled by the slower person is $2(x+6)$ km

Let's draw the diagram with help of the above data

As per Pythagoras theorem,

$$60^2 = (2x)^2 + (2x + 12)^2$$

Let's take 4 common from both sides, hence

$900 = (x)^2 + (x + 6)^2$ or $30^2 = (x)^2 + (x + 6)^2$ [Hint: For such problems, never attempt to solve the whole quadratic equation as it will be time-consuming. Just eliminate the options quickly as we have done below)

From the above equation, it's clear that x can't be more than 24 km/h (as the speed of one person will become 30). Let's see the available options,

- (a) 13 km/h : $13 + (19)^2$ can't be 900 (Hint: square of units digit will not be divisible by 10, hence eliminated without calculating complete problem.)
- (b) 14 km/h: $(14)^2 + (20)^2$ can't be 900 (Hint: square of units digit will not be divisible by 10, hence eliminated without calculating complete problem.)
- (c) 18 km/h: $(18)^2 + (24)^2$ is 900, Hence this is the correct answer.
- (d) 26 km/h : Option eliminated as speed is more than 24 km/h.

Q.16) Shakti and Rashmi are among 22 students who write an examination. Shakti scores 81. The average score of the 21 students other than Rashmi is 61. The average score of all the 22 students is one more than the average score of the 21 students if we drop Shakti. Calculate how many marks Rashmi scored in the same examination?

- a) 39
- b) 49
- c) 51
- d) 37

Ans) a

Exp) Option a is the correct answer.

It is given that, $a_1, a_2, a_3, \dots, a_{22}$ write an examination.

Also given that, Average score of the 21 students other than Rashmi = 61

So, the (Total Score - Rashmi's score) = 61×21 ----- (1)

Given that Shakti scored 81 ----- (2)

and when Shakti leaves, the average score drops down by 1 mark ("The average score of all the 22 students is one more than the average score of the 21 students if we drop Shakti").

This means that Shakti scored more than the Overall class average.

Since his departure has resulted in the decrease of the overall class average by 1, his score is 21 more than the average.

So shakti's marks = Overall Class average + 21

Using equation 2:

SFG 2023 | LEVEL 2 | Test #27 – Solutions (CSAT) | 

Overall Class average = $81 - 21 = 60$ marks

So Total Score = 60×22 ------(3)

From equation 1,

Total Score - Rashmi's score = 61×21

Using equation 1, 2 and 3,

$60 \times 22 - 61 \times 21 = \text{Rashmi's score}$

$1320 - 1281 = \text{Rashmi's score}$

Rashmi's score = 39 marks

Q.17) Five digit numbers divisible by 9 are to be formed by using the digits 0, 1, 2, 3, 4, 7, 8 (without repetition). What is the total number of such numbers that can be formed with the above arrangement?

- a) 284
- b) 196
- c) 216
- d) 254

Ans) b

Exp) Option b is the correct answer.

Sum of all given numbers = $0 + 1 + 2 + 3 + 4 + 7 + 8 = 25$

Hence, we will select only those five numbers whose sum is 18 or 9. But no five numbers will make the sum 9.

So, we choose the five numbers which make their sum 18.

Since the sum of all the seven digits is 25, so we exclude those two digits out of the given seven digits whose sum is 7.

Thus, we exclude either 0, 7 or 3, 4 as both these have sum 7.

Hence, we have the following two sets.

(a) 1, 2, 3, 4, 8, (0, 7 excluded) Therefore, sum = 18

The number to be formed is _ _ _ _ _

They can be arranged in $5 \times 4 \times 3 \times 2 \times 1 = 120$ ways

(b) 1, 2, 7, 8, 0 (3, 4 excluded) Therefore, sum = 18

They can be arranged in $4 \times 4 \times 3 \times 2 \times 1 = 96$ ways (1st place can't be 0, hence 1st place can be arranged in 4 ways)

Thus, the total number of numbers divisible by 9 is $120 + 96 = 216$

Q.18) The Lemon Tree outlet has a pricing policy for different sets of food items which allows for different mark-ups. Chinese items are marked up at 40%, Tandoor items are marked up at 50%, Indian items are marked up at 25%, Thai items are marked up at 75%, Mexican items are marked up at 75%. Amar went to the outlet with a family of 5. He got a bill at the end. The bill had Rs 126 for Chinese items, Rs 180 for Tandoor items, Rs 300 for Indian items, Rs 245 for Thai items and Rs 210 for Mexican items.

How much profit Lemon tree earned?

- a) 49%
- b) 42%
- c) 24%
- d) 40%

Ans) a

Exp) Option a is the correct answer.

Bill of Chinese items = Rs 126, and Chinese items are marked up at 40%,

So, using formula for Cost price and sale price,

The cost price for Chinese items are = $(126 \times 100) / 140 = \text{Rs } 90$

The bill for Tandoor items are Rs 180 and the Tandoor items are marked up at 50%.

So, the cost price for the Tandoor items are = $(180 \times 100) / 150 = \text{Rs } 120$

The bill for Indian items are Rs.300 and Indian items are marked up at 25%

So, the cost price for Indian items are $(300 \times 100) / 125 = \text{Rs } 240$

The price for Thai items are marked up at 75% and the bill paid for thai item is Rs.245

So, the cost price for Thai items are $(245 \times 100) / 175 = \text{Rs } 140$

The bill paid for Mexican items are Rs.210 and the Mexican items are marked up at 75%.

So, the cost price for Mexican items are $(210 \times 100) / 175 = \text{Rs } 120$

So, now the cost price for all the items are = $\text{Rs } (90 + 120 + 240 + 140 + 120) = \text{Rs } 710$

Bill paid = $\text{Rs } (126 + 180 + 300 + 245 + 210) = \text{Rs } 1061$

Profit % = $[(1061 - 710) / 710] \times 100 = 49.43\%$

Q.19) A train of length 450 metres, moving at a speed of 90 km/hr can cross a 500 metres bridge in

- a) 38 seconds
- b) 14 seconds
- c) 36 seconds
- d) 15 seconds

Ans) a

Exp) Length of train = 450 m

Speed of train = 90 km/h = $90 \times \frac{5}{18} = 25 \text{ m/s}$

Length of bridge = 500 m

To cross the bridge, the train has to travel a distance equal to sum of the length of bridge and the length of train.

Total distance to be covered = $450 + 500 = 950 \text{ m}$

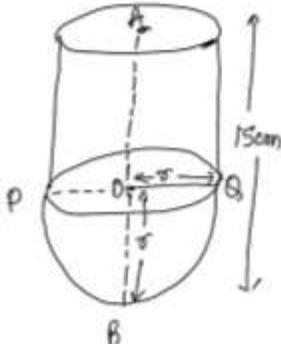

Time taken = $\frac{\text{Distance}}{\text{Speed}} = \frac{950}{25} = 38 \text{ seconds.}$

Q.20) A coffee mug is in the shape of a hollow cylinder mounted on a hemispherical bowl. The diameter of the hemispherical bowl is 14cm. The total height of the coffee mug is 15 cm. How much coffee can be filled in this coffee mug?

- a) 2056.56 cubic cm
- b) 2256.66 cubic cm
- c) 1950.66 cubic cm
- d) 2454.66 cubic cm

Ans) c

Exp) Option c is the correct answer.

Given, the diameter of the hemispherical bowl is 14cm, implies $PQ = 14\text{cm}$,

So the radius of hemispherical bowl (r) = 7 cm

Now, the volume of the hemispherical bowl = $(\frac{2}{3})\pi r^3 = (\frac{2}{3}) \times (\frac{22}{7}) \times 7 \times 7 \times 7 = 718.66$ cubic cm.---(1)

For the cylinder above,

Height of the cylindrical portion of the mug is $(15-7) = 8$ cm

Radius of the cylindrical portion is also $OQ = 7$ cm.

So volume of the cylindrical portion = $\pi r^2 h = (\frac{22}{7}) \times 7 \times 7 \times 8 = 1232$ cubic cm.-----(2)

Using equation 1 and 2,

Volume of the coffee mug is Sum of volume of cylindrical portion and that of hemispherical bowl = $1232 + 718.66 = 1950.66$ cubic cm

Q.21) A student has 60% chance of passing in English and 42% chance of passing in both English and Mathematics. What is the percentage probability that he will fail in Mathematics?

- a) 12
- b) 36
- c) 40
- d) 30

Ans) d

Exp) Option d is the correct answer.

$P(E)$ = Probability of passing in English = 0.6

$P(E \cap M)$ = Probability of passing in Maths and English = 0.42

$P(M)$ = Probability of passing in Maths

Since, $P(M)$ and $P(E)$, both are independent events.

So, $P(E \cap M) = P(E) \times P(M)$

$P(M) = P(E \cap M) / P(E) = 0.42 / 0.6 = 0.7$

Therefore, Probability of failing in Maths = $1 - 0.7 = 0.3 = 30\%$

Q.22) The State Bank of India employs Regional managers, General managers and Branch managers in the proportion of 8:5:1, and the salary of a Regional manager, a General manager and a Branch manager are in the ratio of 5:2:3. When the bank employs 20 Regional managers, the total salary of all amounts to Rs 31800. What is the salary paid to each category of managers (Regional manager, General manager and Branch manager respectively)?

- a) Rs 25000, Rs 5000, Rs 1800
- b) Rs 15000, Rs 10800, Rs 6000
- c) Rs 24000, Rs 6000, Rs 1800
- d) Rs 20000, Rs 9000, Rs 2800

Ans) c

Exp) Option c is the right answer.

Given, proportion of Regional Manager, General Manager, Branch Manager = 8:5:1----(1)

Proportion of the salary of a Regional Manager, a General Manager, a Branch Manager = 5:2:3----(2)

So, the ratio of total salaries will be obtained by multiplying the proportion for 'Number of managers' and their 'individual salary ratio'. That is $(8 \times 5) : (5 \times 2) : (1 \times 3) = 40 : 10 : 3$

Ratio of total salaries of Regional Manager, General Manager, Branch Manager = 40:10:3 ----(3)

Given, total salaries of all amounts to Rs 31800.

Let's assume the salary of Regional Manager, General Manager, Branch Manager be $40y$, $10y$, $3y$, where y is a variable.

Sum of $(40y + 10y + 3y) = \text{Rs } 31800$

Solving for variable y , we get $y = 600$

So, using equation 3, we get Salary paid to Regional managers = $\text{Rs } (40 \times 600) = \text{Rs } 24,000$

Salary paid to General Managers = $\text{Rs } (10 \times 600) = \text{Rs } 6000$

Salary paid to Branch Managers = $\text{Rs } (3 \times 600) = \text{Rs } 1800$.

Here the information 'When the bank employs 20 Regional managers' is irrelevant.

Q.23) Anil wins a lottery of certain amount at Howrah junction. He then goes to race course with that money. There he loses 32.5% of his lottery money. From there he boards a cab to orphanage. The cab driver on the way steals Rs1,00,000 from his wallet. Of the rest he donates 20% to the orphanage. Then he opens a demat account and invests Rs 7.5 lakh in the shares of LIC. Now he realises that he is left with only Rs 2.5 lakh with him. How much money he had won in the lottery?

- a) 25 lakhs
- b) 20 lakhs
- c) 28 lakhs
- d) 30 lakhs

Ans) b

Exp) Option b is the correct answer.

Let's proceed reversed way, as this type of Questions can be solved more easily in reverse manner.

1) he is left with Rs 2.5 lakhs

2) Invests Rs 7.5 lakhs in share

Implies he had $\text{Rs } (2.5 + 7.5) \text{ lakhs} = \text{Rs } 10 \text{ lakhs}$

Since he donated 20% to the orphanage, so the rest amount left with him is 80% of the amount left with him after the cab driver stole his money.

So, 80% of the amount left with him after the cab driver stole his money = $\text{Rs } 10 \text{ lakhs}$

So, the total amount left with him after the cab driver stole his money = $(10/80) \times 100 = \text{Rs } 12.5 \text{ lakhs}$

Since the cab driver stole Rs 1 lakh.

So, the amount before van driver stole money = $\text{Rs } (12.5+1) \text{ lakhs} = \text{Rs } 13.5 \text{ lakhs}$

Since he had lost 32.5% in the race course. So the amount left with him was $(100-32.5= 67.5)\%$ of the lottery money.

67.5% of the lottery money = $\text{Rs } 13.5 \text{ lakhs}$

100% of the lottery money = $\text{Rs } (13.5/67.5) \times 100 = \text{Rs } 20 \text{ lakhs}$

So, the money he had won in the lottery = $\text{Rs } 20 \text{ lakhs}$

Q.24) Two jars contain equal quantities of 40% alcohol. Rajeev changed the concentration of the first jar to 50% by adding an extra quantity of pure alcohol. Raj changed the concentration of the second jar to 50% replacing a certain quantity of the solution with pure alcohol. By what percentage is the quantity of alcohol added by Rajeev more than that replaced by Raj?

- a) 10%
- b) 20%
- c) 30%
- d) 40%

Ans) b

Exp) Option b is the correct answer.

Let solutions = 100 ml and therefore, alcohol = 40ml

For the first jar; $\frac{40+y}{100+y} = \frac{1}{2}$

$$80 + 2y = 100 + y \Rightarrow y = 100 - 80 = 20\text{ml}$$

For second jar; $\frac{40-\frac{2}{5}y+y}{60-\frac{3}{5}y} = \frac{1}{1}, y = \frac{100}{6}$

Hence, the required percentage

$$= \frac{20-\frac{100}{6}}{\frac{100}{6}} \times 100 = 20\%$$

Q.25) Ram speaks the truth in 40 percent of the cases and Shyam in 60 percent of the cases. Each of them, is asked a series of questions, for which the answer can be only yes or no. What is the probability that they will contradict each other in answering a particular question?

- a) 2/5
- b) 3/5
- c) 6/25
- d) 13/25

Ans) d

Exp) Option d is the correct answer.

Probability of Ram speaking truth, $P(r) = 40/100 = 2/5$

Probability of Ram speaking lie, $P(r1) = (100-40)/100 = 3/5$

Probability of Shyam speaking truth, $P(s) = 60/100 = 3/5$

Probability of Shyam speaking lie, $P(s1) = (100-60)/100 = 2/5$

They contradict each other when one of them lie while other speak truth

$$= P(r) \times P(s1) + P(r1) \times P(s)$$

$$\Rightarrow 2/5 \times 2/5 + 3/5 \times 3/5 = 13/25$$

Direction for (Q.26): Five players Vikram, Uttam, Ema, Danish and Peter played five overs of cricket among themselves. Each of the five players bowled exactly one over and also batted exactly for one over. The runs conceded by the five bowlers in the respective overs bowled by them are 1, 2, 3, 4 and 5, not necessarily in the same order. Vikram bowled to Danish and conceded 1 run and he scored 2 runs in Uttam's over. Ema neither scored 3 runs nor conceded 3 runs. Danish did not bowled to Ema. Uttam batted when Ema bowled, then he scored 5 runs.

Q.26) Which of the following statement **cannot** be true?

- a) Peter conceded 4 runs to Ema.
- b) Danish neither bowled to Ema nor batted in Ema's over.

- c) Peter did not score 3 runs
d) None of the above

Ans) c

Exp) Option c is the correct answer.

Peter did not score 3 runs
Vikram conceded 1 run to Danish
Uttam conceded 2 run to Vikram
Ema conceded 5 runs to Uttam
Peter conceded 4 runs to Ema
Danish conceded 3 runs to Peter
Hence option (C) is not true.

Q.27) What is the number of numbers from 1 to 100, which are not divisible by any one of 3, 7 and 5 ?

- a) 48
b) 54
c) 45
d) 50

Ans) c

Exp) Option c is the correct answer.

Step 1: First calculate the number of numbers from 1 to 100, which are divisible by 3, 6, 9, _____ 99

Either use the table of 3, which will give the number of numbers as 33
Or

Using formula for nth term of Arithmetic Progression(AP) to find 99 is which term:

$$S_n = a + (n-1)d$$

$$\text{Here } a = 3, d = 3, S_n = 99$$

$$99 = 3 + (n-1)3$$

$$\text{Solving, we get } n = 33$$

Implies there are 33 numbers from 1 to 100 which are divisible by 3.------(1)

Step 2: Now calculate the number of numbers from 1 to 100, which are divisible by 5, 10, 15, _____ 100

Either use the table of 5, which will give number of numbers as 20 or,
Same formula of AP,

$$100 = 5 + (n-1)5$$

$$n = 20$$

Implies there are 20 numbers from 1 to 100 which are divisible by 5.------(2)

But the numbers 15, 30, 45, 60, 75, 90 (total of 6) have been counted in divisibility of 3 also. So this has to be subtracted at the end.------(2a)

Step 3: Now calculate the number of numbers from 1 to 100, which are divisible by 7, 7, 14, 21, _____ 98

Either use the table of 7, which will give the number of numbers divisible by 7 as 14,
Or use formula of AP,

$$98 = 7 + (n-1)7$$

$$n = 14, \text{ Implies there are 14 numbers between 1 to 100 which are divisible by 7 } \text{---(3)}$$

Now there are numbers 21, 42, 63, 84 which are divisible by 3 also, so already counted there, so it has to be subtracted at the end. -----(3a)

Similarly, 35, 70 have been counted in divisibility of 5 also. So, all these will be subtracted at the end----
 $-(3b)$

Final step:

To get the total number of numbers from 1 to 100 which are divisible by 3, 5 and 7 are

Equation (1)+(2)+(3) - [Equation (2a)+ (3a) + (3b)]

$33+20+14- (6+4+2) = 55,$

So there are total 55 numbers which are divisible either by 3, 5 and 7

Hence the number of numbers from 1 to 100, which are not divisible by any one of 3 and 7 and 5 is $(100-55) = 45$

Q.28) A garment factory took orders for a certain piece of work. It has three employees Suman, Aman and Raman. Suman can do as much work in 2 days as Raman can do in 3 days. Raman can do as much work in 4 days as Aman can do in 5 days. Raman, Aman and Suman decide to work together. If they all work together it takes 20 days to complete a piece of work. How many days will Raman take to do all the work by himself?

- a) 44 days
- b) 50 days
- c) 82 days
- d) 66 days

Ans) d

Exp) Option d is the correct answer.

Let's assume that Suman does 100 units of work in 2 days,

So, Raman does 100 units of work in 3 days.

Implies units of work Suman does in 1 day = $100/2 = 50$ units----(1)

Units of work Raman does in 1 day = $100/3$ units -----(2)

Given, Raman can do as much work in 4 days as much Aman can do in 5 days.

So, units of work which Raman can do in 4 days = $(100/3) \times 4 = 400/3$ units = the units of work which Aman can do in 5 days.

So, Aman can do $400/3$ units in 5 days.

Hence in 1 day, Aman can do $400/15$ units = $80/3$ units -----(3)

So, now the number of units of work by all three in one day = $[(50+(100/3)+(80/3)] = 110$ units per day.

Given, it takes 20 days to complete a piece of work.

Hence the unit of work was = $110 \times 20 = 2200$ units of work

Given Speed of work of Raman from equation 2 is $100/3$ units per day.

So, using unitary method, the time taken to complete 2200 units of work $2200/(100/3) = 66$ days.

Q.29) In the mobile market, only three competitors (iPhone, Redmi and Samsung) exist. Last year the sales of Redmi mobiles were 10% more than iPhone. In this year, both the firms iPhone and Redmi increases their respective sales by 20%. This year, the sales of the firm Redmi is five times that of Samsung. How much were the sales of the firm Samsung (approx) last year, if the total sales remained constant over the two years period?

- a) 25%
- b) 32%
- c) 38%
- d) 41%

Ans) a

Exp) Option a is the correct answer.

For last year; iPhone = 100, Redmi = 110

For this year; iPhone = 120; Redmi = 132

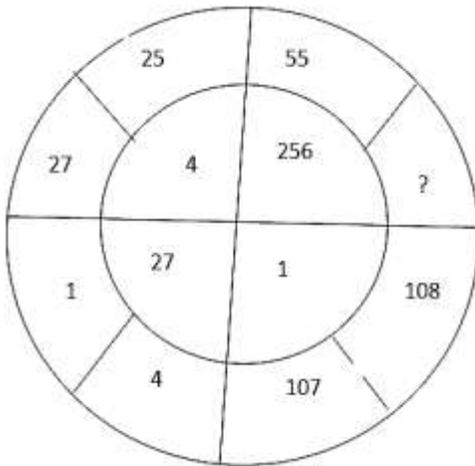

Samsung = 26.4 sales (sales of the firm Redmi is five times that of Samsung)

Last year Samsung = 68.4 sales

Required percentage = $\frac{68.4}{278.4} * 100 = 25\%$

Hence, last year the sales of Samsung mobiles were 25% of the total market for the mobiles.

Q.30) Find the missing number

- a) 201
- b) 51
- c) 100
- d) 47

Ans) b

Exp) Option b is the correct answer.

The pattern is = $(108 - 107) = 1^1$, $(4 - 1) = 3^3$, $(27 - 25) = 2^2$.

So, the missing number = $(55 - x)^{55-x} = 256 \Rightarrow (55 - x)^{55-x} = 4^4$. So, $(55 - x) = 4$, $x = 51$

Q.31) The sum of the radius and the height of a cylinder is 27m. The total surface area of the cylinder is 3564 m^2 , what is the volume of the cylinder? (in m^3)

- a) 9768
- b) 7654
- c) 9123
- d) 8316

Ans) d

Exp) Option d is the correct answer.

Let the radius of the cylinder be r and height be h .

Then, $r + h = 27$ (i)

Again, total surface area of cylinder = $(2\pi rh + 2\pi r^2)$

Now, $2\pi r(h + r) = 3564$

$$\text{or, } 2\pi r \times 27 = 3564$$

$$\text{or, } 54\pi r = 3564, \pi r = (3564/54) = 66\text{m, } r = (66 \times 7) / 22 = 21\text{m}$$

$$\text{Height} = 27 - 21 = 6\text{m}$$

$$\text{Volume of cylinder} = \pi r^2 h = (22/7) \times 21 \times 21 \times 6 = 8316\text{m}^3$$

Q.32) In a class of 138, where girls are twice that of boys, Lucky ranked thirty fifth from the top, if there are 10 girls ahead of Lucky, how many boys are after him in rank?

- a) 21
- b) 16
- c) 17
- d) 25

Ans) a

Exp) Option a is the correct answer.

No of boys = x; No of girls = 2x;

$$x+2x = 138 \Rightarrow 3x = 38$$

So, (Boys)= 46 and 2x(Girls) = 92

Number of student behind Lucky = 138 – 35 = 103

No of girls behind Lucky = 92 – 10 = 82

No of boys behind Lucky = 103 – 82 = 21

Q.33) Tom, Dick and Harry are friends, being looked after by a matron Fatima, Tom weighs 50% more than Dick and Harry weighs 25% less than Tom. Fatima weighs one third of the combined weight of the three boys. All four together weigh 232kg. The correct arrangement of the persons in the ascending order of their weights, is:

- a) Harry, Dick, Fatima, Tom
- b) Harry, Dick, Tom, Fatima
- c) Dick, Harry, Tom, Fatima
- d) Dick, Harry, Fatima, Tom

Ans) d

Exp) Let weight of Dick = x kg.

Then weight of Tom = $\frac{3x}{2}$ kg

And weight of Harry = $\left(\frac{3x}{2} - \frac{3x}{4 \times 2}\right) = \frac{9x}{8}$ kg

Hence weight of Fatima = $\frac{1}{3}\left(x + \frac{3x}{2} + \frac{9x}{8}\right) = \frac{29x}{24}$ kg

According to question $x + \frac{3x}{2} + \frac{9x}{8} + \frac{29x}{24} = 232$

$$\Rightarrow \frac{29x}{8} + \frac{29x}{24} = 232 \Rightarrow x = 48$$

Tom's weight = $\frac{3}{2}(48) = 72$ kg

Harry's weight = $\frac{3}{2}(48)\left(1 - \frac{1}{4}\right) = 54$ kg

Dick's weight = 48 kg

And Fatima's weight = $\frac{29}{24} \times 48 = 58$ kg

Therefore, Arrangement of persons in the ascending order:

Dick < Harry < Fatima < Tom.

Q.34) Amul runs at a speed of 40 metres/minute. Raina follows him after an interval of 5 minutes and runs at a speed of 50 metres/minute. Raina's dog runs at a speed of 60 metres/minute and starts along with Raina. The dog reaches Amul and then comes back to Raina and continues to do so till Raina reaches Amul. What is the total distance covered by the dog?

- a) 600 metres
- b) 750 metres
- c) 980 metres
- d) 1200 metres

Ans) d

Exp) Option d is the correct answer.

Let they meet at a distance of 'x' from start, after time 't' since Raina starts.

$$40 \times (5 + t) = 50 t$$

$$200 + 40 t = 50 t$$

$$t = \frac{200}{10} = 20 \text{ min}$$

$$\text{Total distance covered by dog} = 60 \times t = 60 \times 20 = 1200 \text{ metres}$$

Q.35) Three mugs of coffee are served to three friends A, B and C at the Cafe Coffee Day. The total amount of coffee served to them is 21.5 liters. Amount of coffee in the mugs of A and B is in the ratio of 5:4. And the amount of coffee in the mug of B and C is in the ratio of 6:8. What is the amount of coffee in the mug of that person who had the least coffee?

- a) 8
- b) 10
- c) 6
- d) 15

Ans) c

Exp) Option c is the correct answer.

Given, total amount of coffee served = 21.5 liters

Ratio of A's coffee to B's coffee = 5:4----- (1)

Ratio of B's coffee to C's coffee = 6:8----- (2)

Since B is common in both equations. So, to bring both ratios to same proportion,

We need to multiply equation 1 by 3 and equation 2 by 2:

$$A : B = 15 : 12$$

$$B : C = 12 : 16$$

$$\text{So now } A : B : C = 15 : 12 : 16$$

So, now from the ratio it's evident that B had the least coffee.

So amount of coffee had by B = $\left[\frac{\text{Ratio of B}}{\text{Sum of ratio of A+B+C}} \right] \text{Total amount of coffee} = \left(\frac{12}{43} \right) \times 21.5 = 6 \text{ liters.}$

Q.36) A, B and C have 20, x and y balls with them respectively. If B gives 10 balls to A, he is left with half as many balls as C. If together they had 30 more balls, each of them would have had 50 balls on an average. What is the ratio of x to y?

- a) 4 : 3
- b) 3 : 2
- c) 2 : 3
- d) 2 : 5

Ans) c**Exp) Option c is the correct answer.**Given, $(20 + x + y + 30)/3 = 50$ $x + y = 100$ 1 $x - 10 = y/2 \Rightarrow 2x - y = 20$ 2

Solving 1 and 2

We get $x = 40, y = 60$.Ratio of $x : y = 2 : 3$

Q.37) In Dehri, only two newspaper The Hindu and TOI are published. It is known that 25% of the city population reads The Hindu and 20% reads TOI while 8% reads both the newspaper. It is also known that 30% of those who read The Hindu but not TOI look into advertisement and 40% of those who read TOI but not The Hindu look into advertisement while 50% of those who read both the newspaper look into advertisement. What is the percentage of the population who read an advertisement?

- a) 13.9%
- b) 15.8%
- c) 17.2%
- d) 21.4%

Ans) a**Exp) Option a is the correct answer.**

Let the population of Dehri be 100. Then,

People reading The Hindu = 25

People reading TOI = 20

People reading both = 8

People reading only The Hindu = 17

People reading only TOI = 12

Therefore, required percentage of people who read an advertisement.

$$= 17 \times \frac{30}{100} + \frac{12 \times 40}{100} + \frac{8 \times 50}{100} = 13.9\%$$

Q.38) The sum of height of P and Q is more than that of R and S taken together. The sum of height of P and R is the same as Q and S taken together. Moreover, P's height is half of the sum of height of Q and S. Who is tallest?

- a) P
- b) Q
- c) R
- d) S

Ans) b**Exp) Option b is the correct answer.**

Given,

$P + Q > R + S$ (1)

$P + R = Q + S$ (2)

$P = 1/2(Q + S)$ (3)

From (2) and (3),

$R = 1/2(Q + S)$ or $P = R$ (4)

From (1) and (4), $Q > S$

As per equation (3), P (or R) is the mean of the values of Q and S. Hence, its value must fall between Q and S

So, $Q > R = P$ and $Q > S$.

Hence, Q is the tallest.

Q.39) Aman alone would take 8 hrs. more to complete a job than when both Aman and Bikram would together. If Bikram worked alone, he took 2 hrs. more than Aman and Bikram would together. In how many days Aman and Bikram together can do it?

- a) 6
- b) 10
- c) 4
- d) 15

Ans) c

Exp) Option c is the correct answer.

let Aman and Bikram work together is x.

Then, time taken by Aman, $A = x + 8$,

And time taken by Bikram, $B = x + 2$

$$\text{Then } x = \frac{(x+8)(x+2)}{(x+8)+(x+2)}$$

$$x = \frac{x^2+10x+16}{2x+10}$$

$$\Rightarrow 2x^2 + 10x = x^2 + 10x + 16$$

$$\Rightarrow x^2 = 16$$

$$\Rightarrow x = 4$$

Q.40) A person's present age is $\frac{4}{9}$ times of the age of his mother. After 4 years, he will be one-half of the age of his mother. How old is his mother at present?

- a) 32 years
- b) 36 years
- c) 40 years
- d) 48 years

Ans) b

Exp) Option b is the correct answer.

Let the mother's age be 'M' years.

$$\text{Present age of the person} = \frac{4}{9}M$$

After 4 years \rightarrow mother's age = $M + 4$

$$\text{Person's age} = \frac{4}{9}M + 4$$

$$= \frac{4}{9}M + 4 = \frac{M+4}{2} \Rightarrow 8M + 72 = 9M + 36$$

$$= M = 36.$$

Q.1) Which of the following statements best describes 'Outwash Plain'?

- These are plains mainly formed by the upliftment of a part of the seafloor or continental shelf.
- These are plains formed by deposition of sediments by glacial meltwater at the terminus of a glacier.
- These are plains formed in desert regions at the foot of a mountain or hill.
- These are plains formed by deposition at the bed of the river or lake.

Ans) b

Exp) Option b is the correct answer.

Option a is incorrect: Structural plains are mainly formed by the uplift of a part of the seafloor or continental shelf. These are located on the borders of almost all the major continents.

Option b is correct: An outwash plain is formed by glaciers. Such a plain is **formed when a glacier deposits sediments at its terminus**. As a glacier moves, it erodes the bedrock and carries the eroded sediments downstream. These sediments are deposited by the meltwater of the glacier at the snout.

Option c is incorrect: An Outwash plain is not related to desert regions.

Option d is incorrect: A Lacustrine plain is a type of depositional plain that is formed at the bed of a lake.

Source: 11th NCERT (Fundamental of Physical Geography)- Chapter 7: Landforms and their Evolution

<https://education.nationalgeographic.org/resource/flood-plain/>

<https://earthclipse.com/science/geology/plain-landform-types-location-importance.html>

Q.2) Consider the following statements regarding a geomorphological landform called Mesas:

- It is a plateau with a flat top and steep sides.
- It is usually formed in arid regions.

Which of the statements given above is/are correct?

- 1 only
- 2 only
- Both 1 and 2
- Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: Mesas is an isolated, high plateau with a flat top and steep slides.

A mesa is a flat-topped mountain or hill. It is a wide, flat, elevated landform with steep sides. A mesa is a section of a plateau that has been eroded by water removing the rock so that it now has cliffs on all sides.

Statement 2 is correct: Mesas are usually found in dry regions where rock layers are horizontal. The top of the mesa is called the caprock, this upper layer is often harder and more resistant to weathering or erosion. Mesas are abundant in the southwestern states of Colorado, New Mexico, Utah, and Arizona.

Source : <https://www.mapeffects.co/tutorials/plateau-mesa-butte>

<https://www.nationalgeographic.org/encyclopedia/butte/#:~:text=Buttes%20usually%20form%20in%20arid%20regions%2C%20such%20as%20those%20in,of%20buttes%20in%20the%20world.>

<https://education.nationalgeographic.org/resource/mesa/>

Q.3) Which of the following are primarily the examples of Sedimentary Rocks?

1. Conglomerate
2. Coquina
3. Andesite
4. Dolomite
5. Gabbro

Select the correct answer using the code given below.

- a) 1, 2 and 4 only
- b) 1, 2, 4 and 5 only
- c) 2, 4 and 5 only
- d) 1, 2, 3, 4, and 5

Ans) a

Exp) Option a is the correct answer.

Sedimentary rocks are formed from pre-existing rocks or pieces of once-living organisms. They form from deposits that accumulate on the Earth's surface. Sedimentary rocks often have distinctive layering or bedding.

Option 1 is correct: Conglomerate is a clastic sedimentary rock that contains large (greater than two millimeters in diameter) rounded particles. The space between the pebbles is generally filled with smaller particles and/or a chemical cement that binds the rock together.

Option 2 is correct: Coquina is a type of limestone composed of calcium carbonate shells, shell fragments, and other sand-sized fossil debris. It forms in the shallow waters of coastal areas with a tropical or subtropical climate. The particles are weakly cemented together, and therefore coquina is a very porous material that can function as an aquifer or a reservoir for oil and natural gas.

Option 3 is incorrect: Andesite is a fine-grained, extrusive igneous rock composed mainly of plagioclase with other minerals such as hornblende, pyroxene, and biotite.

Option 4 is correct: Dolomite (also known as "dolostone" and "dolomite rock") is a chemical sedimentary rock that is very similar to limestone. It is thought to form when limestone or lime mud is modified by magnesium-rich ground water.

Option 5 is incorrect: Gabbro is a coarse-grained, dark-colored, intrusive igneous rock that contains feldspar, pyroxene, and sometimes olivine.

Source: <https://geology.com/rocks/sedimentary-rocks.shtml#:~:text=Examples%20include%3A%20breccia%2C%20conglomerate%2C,%2C%20limestones%2C%20and%20rock%20salt.>

<https://geology.com/rocks/igneous-rocks.shtml#:~:text=These%20rocks%20include%3A%20andesite%2C%20basalt,are%20shown%20on%20this%20page.>

Q.4) Consider the followings statements:

1. Rocks in cold and dry climates always experience faster rates of chemical weathering than rocks in hot and wet climates.
2. The rate of biological weathering is most rapid in the desert ecosystem under windy conditions.
3. Calcite rocks are characterised by quick weathering due to richness in calcium.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Weathering is defined as **mechanical disintegration and chemical decomposition** of rocks through the actions of various elements of weather and climate. **Weathering** occurs one of three ways: through **physical processes** or through **chemical processes** or through biological activity.

Statement 1 is incorrect: Chemical weathering typically increases as temperatures rise with rain. Thus, **rocks in hot and wet climates experience faster rates of chemical weathering than do rocks in cold, dry climates.** Wet climates accelerate the rates of chemical weathering, caused when CO₂ in dirt mixes with air and water to form a weak acid. The weak acid breaks down rocks more rapidly in wet climates compared with dry ones.

Statement 2 is incorrect: Biological weathering occurs when living organisms break up rocks. Tree roots, for example, can fracture rocks in the same way they buckle pavement. Warm, humid climates are most favourable to life. The rates of biological weathering are most **rapid in warm humid climates** like those in tropical regions and not in desert ecosystem due lack of wet conditions.

Statement 3 is correct: Certain types of rocks are more vulnerable to different types of weathering, while others are more stable. **Calcite is a type of rock that weathers quickly, due to the fact that it is rich in calcium.** Rocks containing iron and magnesium also tend to weather rapidly, while quartz is a stable type of rock.

Source: What Factors Determine the Rate of Weathering? (sciencing.com)
chapter-6 (ncert.nic.in)

Q.5) With reference to different types of Bails, consider the following pairs:

Types of Bail	Features
1. Statutory Bail	It is given when the police fail to investigate on time.
2. Anticipatory Bail	It is a Pre-arrest bail for non-bailable offence.
3. Bail for non-bailable offences	It is granted on the discretion of court or concerned police officer.

Which of the pairs given above are correctly matched?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Bail means temporary release of an accused person awaiting trial, sometimes on condition that a sum of money is lodged to guarantee their appearance in court. Everyone who is accused of an offence Civil or Criminal has a right to apply for Bail. Only exception for it is if the said or accused is a repeat offence maker or other is a dire possibility of the fleeing away from justice, intimidating the witness or the crime is grave enough.

Pair 1 is correct: Statutory bail are also known as Default bail. It is right to bail that accrues when the police fail to complete investigation within a specified period in respect of a person in judicial custody. It is enshrined in Section 167(2) of the Code of Criminal Procedure where it is not possible for the police to complete an investigation in 24 hours, the police produce the suspect in court and seek orders for either police or judicial custody. **A magistrate cannot authorise a person's judicial remand beyond the 60- or 90-day limit. At the end of this period, if the investigation is not complete, the court shall release the person if he/she applies for bail.**

Pair 2 is correct: Anticipatory bail is literally applied for 'in anticipation of arrest'. **It is a direction to release a person on bail, issued even before the person is arrested.** If the accused has a reason to believe that he or she may be arrested on accusation of having committed a non-bailable offence then he or she has the right to apply for an anticipatory bail in the Sessions Court or High Court. Certain factors need to be examined before providing for anticipatory bail.

Pair 3 is correct: When a person is accused of committing a non-bailable offence, that person loses the right to claim bail. In such offences, the grant of bail becomes a matter of the discretion of the magistrate or the police officer. For such offences, bail can only be granted in some exceptional circumstances.

<https://indiankanoon.org/doc/1687975/>

Q.6) Which one of the following is the most appropriate reason for the occurrence of the phenomenon of land subsidence?

- The movement of a mass of rock, debris, or earth down a slope resulting into heavy pressure on the land.
- Heavy rainfall resulting from thunderstorms or cloud burst leading to flooding of the land.
- The large amounts of groundwater have been withdrawn from the aquifers below the ground.
- Collapse of the vent or the conduit of volcano during explosive blast of the thin and fluid lava.

Ans) c

Exp) Option c is the correct answer.

Land subsidence is a **gradual settling or sudden sinking** of the Earth's surface owing to subsurface movement of earth materials. Land subsidence generally occurs when **groundwater is mined in an unplanned way and large amounts of groundwater have been withdrawn from the aquifers below ground.** The impact is more evident in rocks made of fine-grained sediments. **Decline of groundwater table** causes a vertical compression of sediments bearing the water. Sometimes, lateral compression may also take place along with this vertical compression. Lowering of the pore water pressure in a layer result in an increase of the effective stress in the soil, resulting in consolidation of the soil which manifests as land subsidence.

Option a is incorrect: The **movement of a mass of rock**, debris, or earth down a slope resulting into heavy pressure on the land results into **Landslide**. Mass movement processes are occurring continuously on all slopes; some act very slowly, others occur very suddenly and is not usually the cause of land subsidence.

Option b is incorrect: Cloudbursts usually occur in connection with a thunderstorm. During these thunderstorms, a **large amount of water may accumulate at high levels** and, if the upward currents are weakened, the accumulated water comes down at one time, causing flash floods. Mountainous areas witness cloudbursts on a regular basis. Cloudbursts cause **great devastation in hilly areas** because the water gets concentrated in gullies and valleys. The flash floods due to mountain cloudbursts are "sudden" and "destructive." It is not the cause of land subsidence.

Option d is incorrect: A volcano is a vent through which molten rock and gas escape from a magma chamber. The collapse of volcanoes results into depression such as Crater Lake. They are usually **large, steep-walled, basin-shaped depressions formed by the collapse of a large area over**, and around, a volcanic vent or vents. It is not categorized as a land subsidence.

Source: Land subsidence is serious (downtoearth.org.in)

Land Subsidence | U.S. Geological Survey (usgs.gov)

CAUSES OF LAND SUBSIDENCE (ct.gov)

The principal causes of land subsidence in India is - Search (bing.com)

Q.7) Consider the following statements:

Statement 1: Pole star enables sailors to identify the north direction.

Statement 2: Pole star is not visible from most locations south of the equator.

Which one of the following is correct in respect of the above statements?

- Both Statement 1 and Statement 2 are correct and Statement 2 is the correct explanation of Statement 1
- Both Statement 1 and Statement 2 are correct and Statement 2 is not the correct explanation of Statement 1
- Statement 1 is correct but Statement 2 is not correct
- Statement 1 is not correct but Statement 2 is correct

Ans) b

Exp) Option b is the correct answer.

Statement 1 is correct: The pole star as the name suggests, is located directly over the **north pole**. As the earth rotates around its axis, the pole **star unlike other stars in the night sky, does not change its position**. So, the sailors can identify it and thereby find out the North direction.

Statement 2 is correct, but is not the correct explanation of Statement 1.

The North Star, also known as Polaris, is known to stay fixed in our sky. It marks the location of the sky's north pole, the point around which the whole sky turns. We can see the North Star from the Southern Atmosphere, but only in very specific places, at specific times, and if atmospheric conditions are optimal. Typically, this will be around 1.23 degrees south of the equator. The star is, unfortunately, not visible for most locations south of the equator.

In the Southern Hemisphere, we can use **the Southern Cross** – also known as the constellation Crux – to find celestial south.

Source: <https://www.astronomyscope.com/can-you-see-the-north-star-from-the-southern-hemisphere/>

how did sailors navigate by the stars - Lisbdnet.com

North pole star. (satsig.net)

Q.8) Which among the following can be considered as Active Volcanoes?

- Barren Island
- Mount Mauna Loa
- Mount Kilimanjaro

4. Mount Mauna Kea
5. Mount Etna

Select the correct answer using the code given below:

- a) 1, 2 and 5 only
- b) 1, 3 and 4 only
- c) 2, 4 and 5 only
- d) 2, 3 and 4 only

Ans) a

Exp) Option a is the correct answer.

Active volcanoes are those which have a recent history of eruptions and are likely to erupt again. Dormant volcanoes have not erupted for a very long time but may erupt at a future time. Extinct volcanoes are not expected to erupt in the future.

Option 1 is correct: Barren Island is located in the Andaman Sea, about 140 kilometers (87 miles) northeast of Port Blair, the capital city of the Andaman and Nicobar Islands, which are territories of India. **Barren Island is considered an active volcano because it has erupted multiple times in the past, with the most recent eruption occurring in 2018.** Since the 1780s, Barren Island has erupted at least ten times.

Option 2 is correct: Mauna Loa is a large shield volcano located on the Big Island of Hawaii, in the United States. **It is one of the most active volcanoes on Earth, with its last eruption occurring in 1984.**

Option 3 is incorrect: Mount Kilimanjaro is the highest mountain in Africa, located in Tanzania, and it is actually a dormant stratovolcano that has three distinct cones - Kibo, Mawenzi, and Shira. The last eruption of Mount Kilimanjaro is believed to have occurred between 150,000 and 200,000 years ago, and since then, the volcano has been quiet.

Option 4 is incorrect: Mauna Kea is a shield volcano located on the Big Island of Hawaii. Shield volcanoes are characterized by their gentle slopes and large size, and they are typically formed by repeated eruptions of lava flows. Mauna Kea is one of the tallest mountains in the world. **Mauna Kea last erupted about 4,500 years ago. It is considered a dormant volcano.**

Option 5 is correct: Mount Etna is an active volcano located on the east coast of the island of Sicily in Italy. **It is one of the most active volcanoes in the world and has been erupting for millions of years,** with its most recent eruption occurring in February 2021. Mount Etna is a stratovolcano that is characterized by its frequent explosive eruptions, lava flows, and ash emissions. The volcano has a long history of eruptions, with its first well-documented eruption occurring around 1500 BCE.

Q.9) With reference to the Pelean Eruptions, consider the following statements:

1. They are characterized by the formation of Lava Domes.
2. They are not particularly dangerous or destructive.

Which of the above given statements is/are correct?

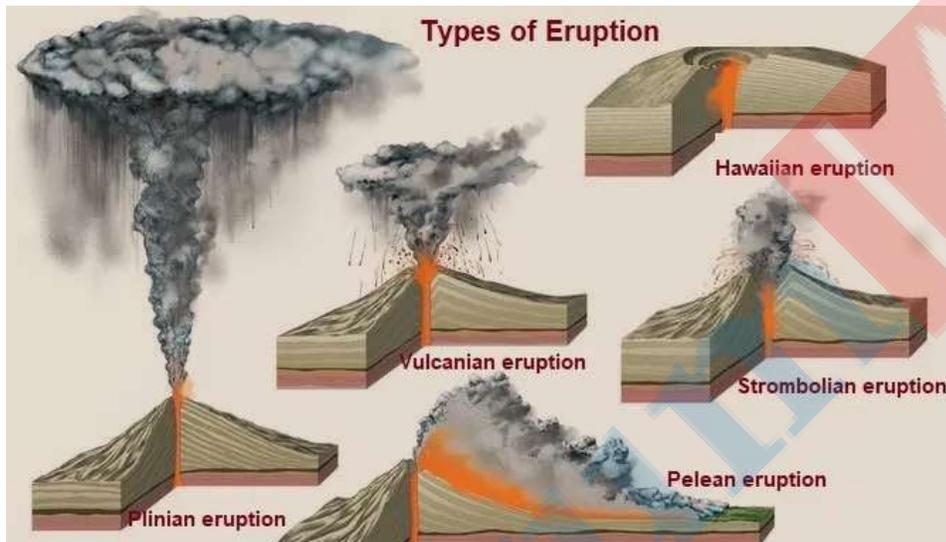

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Pelean eruptions are named after the 1902 eruption of Mount Pelée in Martinique Island, which destroyed the town of Saint-Pierre and killed more than 30,000 people.

Statement 1 is correct: Formation of lava domes is a characteristic of Pelean eruptions. A lava dome is a steep-sided mound that forms when viscous lava is extruded from a volcanic vent and piles up around the vent. The lava is too viscous to flow far, so it accumulates near the vent, forming a dome-like shape. In Pelean eruptions, the initial phases are characterized by pyroclastic flows and the tephra deposits have lower volume and range than the corresponding Plinian and Vulcanian eruptions. The viscous magma then forms a steep-sided dome or volcanic spine in the volcano's vent. The dome may later collapse, resulting in flows of ash and hot blocks.

Statement 2 is incorrect: Pelean eruptions are characterized by the collapse of a volcano's eruption column and the release of hot, fast-moving pyroclastic flows. **These pyroclastic flows can be extremely dangerous and destructive, and they are often associated with the collapse of the dome or flank of a stratovolcano.** This is because stratovolcanoes are typically made up of hardened lava, ash, and other debris that can create unstable slopes prone to collapse during an eruption.

Source: <https://www.britannica.com/science/Pelean-eruption>

Q.10) Consider the following statements regarding the Public Accounts Committee (PAC):

1. It was first constituted in 1921.
2. Currently, the committee cannot examine the annual audit reports of the Comptroller and Auditor General of India.
3. The committee examines the appropriation and finance accounts of the Union Government.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Statement 1 is correct: In 2021, the Public accounts committee completed 100 years of its formation. **Public Accounts Committee was introduced in 1921** after its first mention in the Government of India Act, 1919 also called Montford Reforms.

Statement 2 is incorrect: Former vice president V. Naidu said the PAC may be redesignated as **Public Accounts and Audit Committee given the fact that audit review is also its core function.** The function of the committee is to **examine the annual audit reports of the comptroller and Auditor General of India (CAG).** The three reports submitted by CAG are: Audit report on appropriation accounts, Audit report on finance accounts and Audit report on public undertakings.

Statement 3 is correct: The functions of Public accounts committee are **to examines the appropriation accounts and the finance accounts of the Union government and any other accounts laid before the Lok Sabha.** which are laid before the Parliament by the President. The committee examines public expenditure from a legal and formal point of view to discover technical irregularities.

Knowledge Base:

The Public accounts committee is one of three Financial Parliamentary committees, with the Estimates Committee and the Committee on Public Undertakings being the other two.

Article 105 (on Parliamentary privileges) and Article 118 (on Parliament's authority to make rules for governing its procedure and conduct of business) provide Parliamentary committees with their authority.

- 1) Public accounts committee members are elected by the Parliament every year from amongst its members according to the principle of proportional representation by means of the single transferable vote.
- 2) It presently comprises 22 members (15 members elected from the Lok Sabha and 7 members from the Rajya Sabha) with a term of one year only.
- 3) The chairman of the Public accounts committee is appointed by the Speaker from amongst its members.
- 4) A minister cannot be elected as a member of the Public accounts committee.

Chapter 23, Parliamentary Committee, Indian Polity by M. Laxmikant

Q.11) With reference to geomorphology, which among the following statements best describes the term 'Tephra'?

- a) Sedimentary rock formed by the accumulation of river sediments.
- b) A type of rock formed by the cooling and solidification of hot molten magma.
- c) A geochronological technique in which archaeological records can be found.
- d) Solid material that is ejected out during a volcanic eruption.

Ans) d

Exp) Option d is the correct answer.

When a volcano erupts it will sometimes eject **material such as rock fragments** into the atmosphere. This material is known as **tephra**. The largest pieces of tephra are called blocks and bombs. Blocks and bombs are normally shot ballistically from the volcano.

Thus, **Tephra is a general term used to describe any solid material that is ejected during a volcanic eruption.** It includes everything from tiny particles of volcanic ash and dust to larger rocks and boulders. Tephra can be **composed of a variety of materials, including volcanic glass, pumice, and fragments of lava,** and can be ejected into the air by explosive volcanic eruptions or released as hot, flowing volcanic ash

and rock. Tephra can be dangerous and disruptive to human settlements and infrastructure, especially when volcanic eruptions occur in densely populated areas.

Source: <https://www.sciencedirect.com/topics/earth-and-planetary-sciences/tephra>

<http://www.geo.mtu.edu/volcanoes/hazards/primer/tephra.html>

Q.12) Consider the following pair:

Types of Mass Movements	Characteristic/causes
--------------------------------	------------------------------

- | | |
|----------------------|--|
| 1. Solifluction | Slow downslope flowing fine grained rock debris saturated or lubricated with water |
| 2. Debris flow | Heavy rains causing saturation of the soil and regolith with water. |
| 3. Debris avalanches | high velocity flows of large volume of rocks that result from collapse of a mountainous slope. |

Which of the pairs given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 3 only
- d) 1, 2 and 3

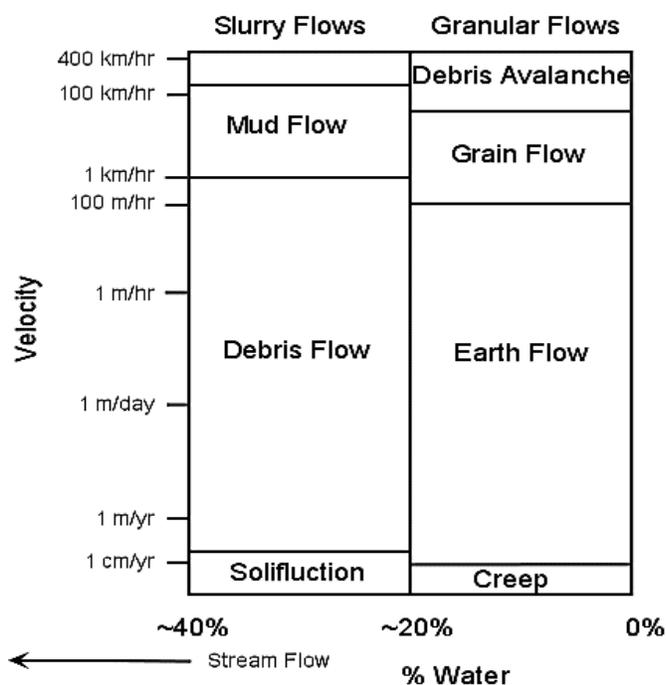

Ans) d

Exp) Option d is the correct answer.

Mass Movements involves transfer the mass of rock debris down the slopes under the direct influence of gravity. Mass movements are aided by gravity and geomorphic agent like running water, glaciers, wind, waves and currents participate in the process of mass movements.

Pair 1 is correctly matched: Solifluction - It involves slow **downslope flowing soil mass or fine-grained rock debris saturated** or lubricated with water. This process is **quite common in moist temperate areas** where surface melting of deeply frozen ground and long continued rain respectively, occur frequently. When the upper portions get saturated and when the lower parts are impervious to water percolation, flowing occurs in the upper parts.

Pair 2 is correctly matched: Debris Flows occur at higher velocities than solifluction, and often result from **heavy rains causing saturation of the soil and regolith with water**. They sometimes start with slumps and then flow downhill forming lobes with an irregular surface consisting of ridges and furrows.

Pair 3 is correctly matched: Debris Avalanches are very high velocity flows of **large volume mixtures of rock and regolith** that result from **complete collapse of a mountainous slope**. They **move down slope and then can travel for considerable distances along relatively gentle slopes**. They are often triggered by earthquakes and volcanic eruptions. Snow avalanches are similar, but usually involve only snow. **Sliding of individual rock masses down bedding, joint or fault surfaces is rockslide**.

Source: Mass Movements (tulane.edu)
chapter-6 (ncert.nic.in)

Q.13) Which of the following statements are correct regarding 'Crater'?

1. Impact Crater is a large depression mostly formed due to collision of a meteorite with the Earth's surface.
2. Craters are usually smaller than calderas.
3. Lonar Crater Lake was created by the impact of an extra-terrestrial body.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

A crater is a landform consisting of a hole or depression on a surface. It is usually caused either by an object hitting the surface, or by geological activity like volcanic explosion.

Statement 1 is correct: Craters produced by the collision of a meteorite with the Earth (or another planet or moon) are called impact craters. Whereas crater formed during volcanic eruption is known as volcanic crater.

Statement 2 is correct: A crater is not the same thing as a caldera. Craters are formed by the outward explosion of rocks and other materials from a volcano. Calderas are formed by the inward collapse of a

volcano's magma chamber. **Craters are usually much smaller features than calderas**, and calderas are sometimes considered giant craters.

Statement 3 is correct: Lakes are **formed when craters and calderas fill with water**. The crater is basically a **circular depression formed** on the land due to volcanic eruptions and activities. **Lonar lake of Maharashtra is a crater lake**. Lonar Lake lies within the only known extraterrestrial impact crater **found within the great Deccan Traps**, a huge basaltic formation in India. The lake was initially believed to be of volcanic origin, but now it is recognized as an impact crater. Lonar Lake was **created by the impact of either a comet or of an asteroid** (extra-terrestrial body).

Source: Chapter-3: Interiors of the Earth, NCERT, Class 11th

<https://education.nationalgeographic.org/resource/types-calderas/>

<https://www.definitions.net/definition/caldera#:~:text=A%20caldera%20is%20a%20cauldron,term%20cauldron%20is%20also%20used.>

Q.14) Which of the following statements is/are correct regarding the distribution of volcanoes and earthquakes around the world?

1. Volcanoes are located closely to regions that have been intensely folded or faulted.
2. In the central parts of the Atlantic Ocean, volcanoes are found almost parallel to the coastlines.
3. The Indian Ocean has been estimated to have around two-thirds of the world's volcanoes.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 1 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

A volcano is a **vent or fissure in Earth's crust** through which **lava, ash, rocks, and gases erupt**. An **active volcano is a volcano that has erupted in the recent past**. Material that flows to or reaches the ground comprises lava flows, volcanic bombs, pyroclastic debris, dust, gases etc.

Statement 1 is correct: Volcanoes are located in a fairly clearly defined pattern around the world, **closely related to regions that have been intensely folded or faulted**. They occur **along coastal mountain ranges, offshore islands and in the midst of oceans** but there are few in the **interiors of the continents**.

Statement 2 is correct: **In the central parts of the Atlantic Ocean volcanoes are found almost parallel to the coastlines**. It further extends into the Indian Ocean. It bifurcates a little south of the Indian subcontinent with one branch moving into East Africa and the other meeting a similar line from Myanmar to New Guiana. **Also, their presence coincides with the mid- oceanic ridges**.

Statement 3 is incorrect: The greatest **concentration is probably that in the Circum-Pacific region (and not in Indian ocean region)**, popularly termed the '**Pacific Ring of Fire**', which has been estimated to include two-thirds of the world's volcanoes.

Source: Chapter-4: DISTRIBUTION OF OCEANS AND CONTINENTS, NCERT, Class 11th

Q.15) During the 2nd National Conference of Chief Secretaries, the Aspirational Blocks Programme (ABP) was launched. In this context, consider the following statements with reference to ABP:

1. The Programme will cover only 100 districts across India.
2. It aims to address the inequalities by improving governance at the block level.
3. Convergence, Collaboration and Competition are three broad contours of the programme.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 3 only
- c) 2 only
- d) 2 and 3 only

Ans) d

Exp) Option d is the correct answer.

On 7th January 2023, during the Second National Conference of Chief Secretaries, Prime Minister Narendra Modi launched the Aspirational Blocks Programme (ABP).

Statement 1 is incorrect: The Aspirational Blocks Programme (ABP) will cover 500 districts across 31 states and Union Territories initially. Over half of these blocks are in 6 states—Uttar Pradesh (68 blocks), Bihar (61), Madhya Pradesh (42), Jharkhand (34), Odisha (29) and West Bengal (29).

Statement 2 is correct: The Aspirational Blocks Programme (ABP) is on the lines of the Aspirational District Programme that was launched in 2018. The programme will **improve the quality of life of citizens** in the most backward districts of the country. **It will also address inequalities by improving governance at the block level.**

Statement 3 is correct: The **Aspirational Blocks Programme (ABP)** strives to protect the rights and uphold the dignity of every single citizen. It will achieve it by increasing their awareness and enhancing access to government schemes. This forward-looking programme will **leverage the three Cs of convergence, collaboration, and competition to achieve this vision.**

Source: <https://indianexpress.com/article/opinion/columns/aspirational-blocks-programme-building-blocks-of-viksit-bharat-8398073/>

Q.16) Consider the following statements regarding the Geysers:

1. They are vent in Earth's surface that periodically ejects hot water and steam.
2. They are very common and can be found evenly in every region of the world.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Geysers are **springs of hot water and steam** that may spout up to a height of 150 feet from the earth beneath. **The jet of water is usually emitted with an explosion and is often triggered off by gases seeping out of the heated rocks.** Old Faithful is the world's best-known geyser. It is located in **Yellowstone National Park (USA).**

Statement 1 is correct: A geyser is a vent in Earth's surface that periodically ejects a column of hot water and steam. Natural geysers are formations that absorb heat from the earth. Hot water is sprouted from its reservoir with a massive amount of force and is accompanied by a huge amount of steam. **This process generates an intensive amount of heat.** The water and steam sprouted from the geysers are **owed to the pipe channels known as conduits** found below the surface of the geysers.

Statement 2 is incorrect: Geysers are rare formations and are **largely distributed across five countries on the earth's surface, i.e. US, Russia, Chile, New Zealand and Iceland.** Most of the world's geysers are mainly confined to **three major areas – Iceland, the Rotorua district of North Island, New Zealand and Yellowstone Park in the USA.** So, statement 2 is incorrect.

Source: NCERT, Class 11th, Physical Geography
G C Leong book

Q.17) With reference to the intrusive volcanic landforms, consider the following statements:

Volcanic landform Feature

- | | |
|--------------|--|
| 1. Laccolith | It is a body of intrusive rock with a dome-shaped upper surface and a level base, fed by a conduit from below. |
| 2. Lopolith | It is a saucer shaped body of intrusive igneous rock, formed by the penetration of magma between the beds or layers of existing crustal rocks. |
| 3. Batholith | It is a large body of magmatic material that cools in the deeper depth of the Earth's crust. |

Which of the pairs given above are correct?

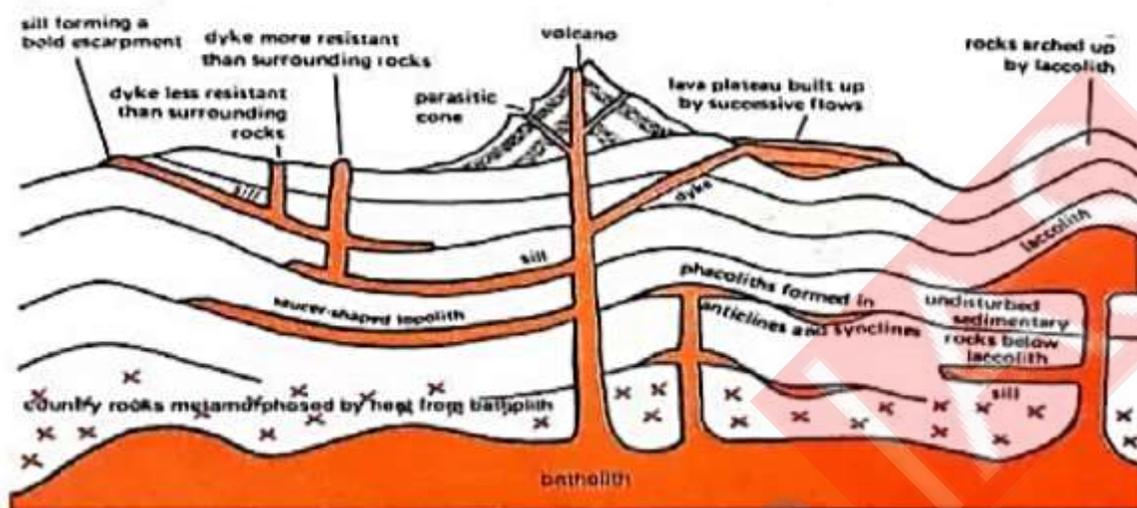

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Volcanic landforms are divided into **extrusive and intrusive landforms** based on whether magma cools within the crust or above the crust. Intrusive landforms are formed when magma cools within the crust.

VOLCANO & VOLCANIC LANDFORMS

Pair 1 is correct: A **laccolith** is a body of intrusive rock with a **dome-shaped upper surface and a level base, fed by a conduit from below.**

Pair 2 is correct: **Lopoliths** are the **saucer shaped body** of intrusive igneous rock, formed by the penetration of magma between the beds or layers of existing rock and subsequent subsidence beneath the intrusion.

Pair 3 is correct: **Batholiths** are the large body of magmatic material that cools in the deeper depth of the crust develops in the form of large domes. They appear on the surface only after the denudational processes remove the overlying materials. They cover large areas, and at times, assume depth that may be several km. These are granitic bodies. **Batholiths are the cooled portion of magma chambers.**

Source: 11th NCERT (Fundamental of Physical Geography)- Chapter 3 : Interior of the Earth

Q.18) With reference to Solar System, Consider the following statements:

1. Earth is the densest planet in the solar system.
2. Mars is often referred to as the 'Earth twin' due to its similar size and proximity to the Sun.
3. Jupiter has the maximum number of satellites in the solar system.
4. Venus is often called the 'Red Planet' due to its reddish appearance.

Which of the above given statements are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1, 2 and 4 only
- d) 1, 2, 3 and 4

Ans) a

Exp) Option a is the correct answer.

Our solar system consists of our star, the Sun, and everything bound to it by gravity – the planets Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune; dwarf planets such as Pluto; dozens of moons; and millions of asteroids, comets, and meteoroids.

SFG 2023 | LEVEL 2 | Test #28 – Solutions | 

Statement 1 is correct: The densest planet in the Solar System is Earth, which has an average density of $5,513 \text{ kg/m}^3$ (344 lb/cu ft). The next most dense planet is Mercury, at $5,240 \text{ kg/m}^3$ (327 lb/cu ft).

Statement 2 is incorrect: Venus is often referred to as the 'Earth twin' due to its similar size and proximity to the Sun. However, Venus has a thick and toxic atmosphere, which makes it the hottest planet in the solar system.

Statement 3 is correct: Jupiter has the maximum number of satellites in the solar system. It has up to 92 known moons, with the four largest known as the Galilean moons: Io, Europa, Ganymede, and Callisto.

Statement 4 is incorrect: Mars is often called the 'Red Planet' due to its reddish appearance, caused by iron oxide or rust on its surface. It is also known for its volcanoes, valleys, and polar ice caps.

Q.19) Which of the following countries experiences the phenomenon of 'Land of Midnight Sun' during the summer solstice?

- a) Norway
- b) Switzerland
- c) Spain
- d) Greece

Ans) a

Exp) Option a is the correct answer.

The 'Land of Midnight Sun' is a natural phenomenon that occurs in countries located in the Arctic Circle, where the sun remains visible for 24 hours during the summer solstice, the longest day of the year. Norway is one of the countries that experience this phenomenon, along with Finland, Sweden, and Iceland. However, Norway is the most commonly associated with the 'Land of Midnight Sun'. This phenomenon occurs **because of the tilt of the Earth's axis**, which causes different parts of the planet to receive varying amounts of sunlight at different times of the year.

During the summer solstice (around June 20-21), the sun remains visible above the horizon for the entire day in these regions, resulting in continuous daylight for up to 24 hours. Conversely, during the winter solstice (around December 21-22), these same regions experience the opposite phenomenon known as polar night, where the sun remains below the horizon for 24 hours or more.

Source: <https://bestarctic.com/why-is-norway-the-land-of-the-midnight-sun/>

<https://explore.quarkexpeditions.com/blog/greenland-the-land-of-the-midnight-sun>

Q.20) With reference to 'Election expenditure limits in India', consider the following statements:

1. The expenditure limits of the candidates for Lok Sabha elections are set and reviewed by Delimitation Commission after every five years.
2. The election expenditure limit is always the same for every state for the candidates contesting for Lok Sabha elections.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

Recently, Election Commission has raised the expenditure limit of candidates to Rs 95 lakh (up from Rs 70 lakh) each for Lok Sabha elections, and up to Rs 40 lakh (up from Rs 28 lakh) for Assembly polls. Similarly, for smaller states the new limit is Rs 28 lakh, up from Rs 20 lakh. As per Section 77 of the Representation of the People Act (RPA), 1951 every candidate must keep an account of all **expenditure incurred from the date on which they are nominated to the date of declaration of the result**. Section 10A of the Act also states that an incorrect account or expenditure beyond the cap can lead to disqualification of a candidate for up to three years.

Statement 1 is incorrect: The expenditure limits of the candidates for Lok Sabha elections are **set by Election Commission of India**. The expenditure limits for candidates running for the Lok Sabha are set under the Representation of the People Act, 1951 and the Conduct of Elections Rules, 1961.

Statement 2 is incorrect: The expenditure limits for candidates running for the Lok Sabha **can vary depending on the state in which the candidate is running for election**. The Election Commission of India takes into account several factors when setting expenditure limits, including the population, geographical area, and other socio-economic indicators of the state. The expenditure limit is determined by ECI on the basis of the state and their population, in order to make it fair and equal for all the candidates, regardless of the state they are contesting from. Recently, the Election Commission has enhanced the existing election expenditure limit for candidates in Parliamentary and Assembly constituencies. The ceiling on parliamentary poll expenditure has been **raised from 70 lakh to 95 lakh rupees in bigger states and 54 lakh to 75 lakhs in smaller states**. The bigger states include Maharashtra, Madhya Pradesh, Uttar Pradesh, West Bengal and Karnataka, and the smaller states include Goa, Sikkim, Arunachal Pradesh and UTs.

Source: <https://www.thehindu.com/news/national/expenditure-limit-for-lok-sabha-assembly-candidates-revised/article38161846.ece>

<https://blog.forumias.com/as-parties-get-an-ec-raise-the-high-ambition-and-low-reach-of-poll-expense-limits/>

<https://eci.gov.in/files/file/13928-limits-of-candidate%E2%80%99s-expenses-enhanced/>

Election Commission hikes expenditure limit for candidates in Parliamentary and Assembly polls (newsonair.gov.in)

Q.21) Which of the following statements best describes the term 'dyke'?

- It is an intrusive igneous landform, formed when the lava makes its way through cracks and solidifies vertically within Earth's crust.
- It is an elongated form of calcific landform formed by depositional activity of slowly dripping water.
- It is a depression or hole in the ground caused by the collapse of the surface layer.
- It is an oval-shaped hill largely composed of glacial deposits and formed beneath a glacier or ice sheet.

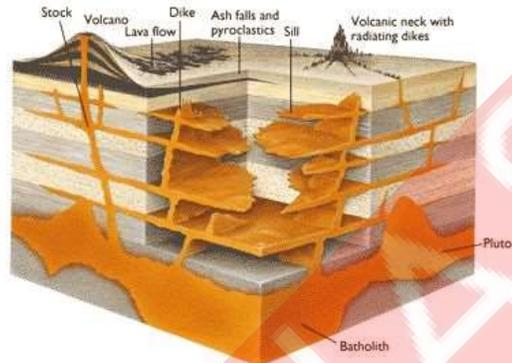

Ans) a

Exp) Option a is the correct answer.

Magma while thrusting its way up to the surface **cools and solidifies resulting in intrusive landforms**. When magma cools to form landforms like dykes the resulting rocks are called **plutonic rocks**. Intrusions when injected vertically as narrow walls of **igneous rocks** within the **sedimentary layers** are termed as dykes. Dykes are the most common intrusive formation.

Statement a is correct: When the lava makes its way through **cracks and the fissures** developed in the land, it **solidifies almost perpendicular to the ground**. It **gets cooled** in the same position to develop a **wall like structure**. Such structures are called **dykes**.

Dykes frequently intrude on open spaces between rocks, called fissures. A **dyke will either flow or build up in a fissure**, pushing the surrounding rock to the side. A dyke is, therefore, **younger than the rocks surrounding it**. Dykes are often vertical, or straight up and down. Dykes are the most commonly found intrusive forms in the **western Maharashtra area**. These are considered the **feeders for the eruptions** that led to the development of the **Deccan traps**.

Statement b is incorrect: Stalactite and stalagmite, **elongated forms of various minerals deposited from solution by slowly dripping water**. A stalactite hangs like an icicle from the ceiling or sides of a cavern. A stalagmite appears like an inverted stalactite, rising from the floor of a cavern.

Statement c is incorrect: A sinkhole is a depression or hole in the ground caused by some form of collapse of the surface layer.

Statement d is incorrect: **Drumlins** a very small **hill formed by the movement of a large mass of ice**. Drumlins are oval-shaped hills, largely composed of glacial drift, formed beneath a glacier or ice sheet and aligned in the direction of ice flow.

<https://education.nationalgeographic.org/resource/dike/>

Q.22) With reference to Standard time and Time zones, consider the following statements:

1. Earth is divided into various time zones each differing the next by 15 degrees in longitude.
2. Indian Standard Time is ahead of Greenwich Mean Time by 5 hours and 30 minutes.
3. A country can have multiple time zones.

Which of the above given statements is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) d

Exp) Option d is the correct answer.

Sir Sandford Fleming, a Canadian railway engineer, first proposed the concept of Standard Time in 1879. The Prime Meridian, which passes through Greenwich, England, is used as the reference point for calculating Standard Time. Standard Time was established to prevent confusion and improve efficiency in transportation and communication, especially with the growth of railways and telegraphs.

Statement 1 is correct: The division of the world into 24 standard time zones is a well-established convention that is generally followed by most countries. **Each time zone differs from the next by 15**

degrees in longitude or one hour in time. However, due to the unique shapes and locations of some countries, it is not always practical or feasible to adhere strictly to this standard.

Statement 2 is correct: Indian Standard Time is ahead of Greenwich Mean Time by 5 hours and 30 minutes. This is because India is located east of the Prime Meridian.

Statement 3 is correct: A country can have multiple time zones, depending on its size and geographic location. For example, Russia has 11 time zones, while the United States has 6 time zones.

Source: Certificate Physical and Human Geography pg:9 <https://www.thoughtco.com/sir-sandford-fleming-1991817>

Q.23) Which of the following evidences prove that the Shape of the Earth is spherical?

1. The occurrence of day and night.
2. The appearance of volcanoes.
3. The shape of the Earth's shadow during a lunar eclipse.

Select the correct answer from the code given below:

- a) 2 and 3 only
- b) 3 only
- c) 1 and 3 only
- d) 1 and 2 only

Ans) b

Exp) Option b is the correct answer.

There are many ways to prove that the Earth is spherical in shape. Some of the evidences of Earth's sphericity are:

Statement 1 is incorrect: Occurrence of day and night can be explained by the rotation of the Earth on its axis, but not necessarily by its shape.

Statement 2 is incorrect: Volcanoes are not related to the shape of the Earth. Volcanoes erupt because of the way heat moves beneath Earth's surface. Heat is conveyed from the planet's interior to its surface largely by convection—the transfer of heat by movement of a heated fluid.

Statement 3 is correct: The shape of the Earth's shadow during a lunar eclipse. The shadow is always round, which suggests that the Earth is spherical.

Source: Certificate physical and human geography ch:1

Q.24) Consider the following statements with reference to comparison between Terrestrial Planets and Jovian Planets:

1. Terrestrial planets are comparatively smaller in size than Jovian Planets.
2. Terrestrial planets rotate much faster than the Jovian planets.
3. Terrestrial Planets have much thicker atmosphere compared to Jovian planets.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) 1 and 2 only
- d) 1 and 3 only

Ans) a

Exp) option a is the correct option.

There are eight planets in our solar system. These can be divided into two groups: the four rocky planets nearest to the Sun are called Terrestrial Planets, and the four gas giants called Jovian Planets beyond the asteroid belt.

Statement 1 is correct: Terrestrial Planets are comparatively small in size and have relatively higher density compared to Jovian planets. Their atmospheres contain very little hydrogen and helium. Mercury and Mars have solid iron cores, while the solid cores of Venus and Earth contain iron and nickel. On the other hand, the Jovian Planets or the gas giants have deep, often stormy atmospheres. Unlike the rocky planets, these planets do not have solid surfaces, instead, each has a small, rocky core, surrounded by swirling gases and liquids, and is held together by the force of gravity and hence they have lesser density as gases couldn't escape them.

Statement 2 is incorrect: Unlike the spherical shapes of terrestrial planets, the jovian planets are all slightly oblong. The jovian planets rotate much faster than any of the terrestrial planets. Gravity by itself would make a planet spherical, but their rapid rotation flattens out their spherical shapes by flinging material near the equator outward.

Statement 3 is incorrect: Jovian planets are generally larger than the terrestrial planets and have thick atmosphere, mostly of helium and hydrogen. The solar wind was most intense nearer the sun; so, it blew off lots of gas and dust from the terrestrial planets. The solar winds were not all that intense to cause similar removal of gases from the Jovian planets. Also, the terrestrial planets are smaller and their lower gravity could not hold the escaping gases.

Class 11 NCERT-CH 2

Q.25) Consider the following statement with reference to the office of Mayor:

1. The Mayor is elected by the elected and nominated Councilors of all the wards in the city.
2. Mayor presides over the meetings of the Municipal Council.
3. The 2nd Administrative Reforms Commission (ARC) recommends for the direct elections of the Mayor by the people.

Which of the statements given above is/are correct?

- a) 1, 2 and 3
- b) 2 and 3 only
- c) 3 only
- d) 1 and 2 only

Ans) b

Exp) Option b is the correct answer.

A municipal corporation has three authorities, namely, the council, the standing committees and the commissioner.

Statement 1 is incorrect: The **Council is the deliberative and legislative wing of the Municipal Corporation**. It consists of the Councillors directly elected by the people, as well as a few nominated persons. The **Council is headed by a Mayor**. Recently, the **Supreme Court ruled that nominated members cannot vote in the election for the mayor**. **Article 243R of Indian Constitution** provided that "persons having knowledge or experience in municipal administration" can be nominated to the civic bodies, but had specified that **these nominated members "shall not have the right to vote in the meetings of the municipality"**. Thus, they are prohibited from voting in election of Mayor.

Statement 2 is correct: The **municipal commissioner** is responsible for the implementation of the decisions taken by the council and its standing committees. Thus, he is the **chief executive authority of the corporation**. He is appointed by the state government and is generally a member of the IAS. While

Mayor is basically an ornamental figure and a formal head of the corporation. His main function is to preside over the meetings of the Council.

Statement 3 is correct: The 2nd Administrative Reforms Commission (ARC) recommended that the Chairperson/Mayor should be directly elected by popular mandate through a city-wide election. The Chairperson/Mayor will be the chief executive of the municipal body. Executive power should vest in the Mayor.

<https://mohua.gov.in/upload/uploadfiles/files/chap08.pdf>

Q.26) Consider the following Pairs of Seismic Discontinuities:

Discontinuity	Separates
1. Mohorovicic Discontinuity	The Crust and the Mantle
2. Gutenberg Discontinuity	The Outer core and the Inner core.
3. Conrad Discontinuity	The mantle and the outer core

How many of the pairs given above are correct?

- Only one Pair
- Only two Pairs
- All the three Pairs
- None of the Pairs

Ans) a

Exp) Option a is the correct answer.

Seismologists have located two major layers which separate zones within the Earth having markedly different properties.

Pair 1 is correct: The outer one – Mohorovicic Discontinuity (Moho) – separates the crust from the mantle, its average depth being about 35 km.

Pair 2 is incorrect: The liquid outer core and solid lower mantle is marked by a boundary known as 'Gutenberg Discontinuity'. Lehmann Discontinuity separates the outer core from inner core.

Pair 3 is incorrect: The line of separation between the oceanic and continental crust is known as Conrad discontinuity.

Source: <https://egyankosh.ac.in/bitstream/123456789/59074/1/Block-2.pdf>

Q.27) Consider the following statements regarding the Surface Earthquake Waves:

- They are generated by the interaction of body waves with surface rocks.
- Their speed is slower than Body waves.
- They are usually more destructive than Body waves.
- As compared to Deeper Earthquakes, Shallow Earthquakes produce stronger Surface Waves.

Which of the statements given above are correct?

- 1, 2 and 3 only
- 1, 2 and 4 only
- 2, 3 and 4 only
- 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

There are two categories of seismic waves known as body and surface waves. Body waves move along the internal division of the Earth and further divided into two sub-types. These are primary and secondary waves designated by the P and S. Surface waves as the name itself indicates moves at the external division of the Earth's surface with two subtypes namely Rayleigh and Love waves.

Statement 1 is correct: Body waves are generated due to the release of energy at the focus and move in all directions travelling through the body of the earth. Hence, the name body waves. The body waves interact with the surface rocks and generate a new set of waves called surface waves. These waves move along the surface.

Statement 2 is correct: Surface waves arrive at the surface after the Body waves as their speed is slower than Body waves. In the Body waves, Primary or P waves are the first to arrive and then secondary or s waves. The surface waves are the last to report on seismograph as they are the slowest.

Statement 3 is correct: Surface waves are more destructive. They cause displacement of rocks, and hence, the collapse of structures occurs. It makes everything upon the surface to be in motion including buildings, bridges, transmission lines and numerous man-made objects. These waves generally affect only the surface of the earth and die out at smaller depth. These waves cover the longest distances of all the seismic waves. Though their speed is slower than P and S waves, but these are most violent and destructive.

Statement 4 is correct: **Shallow** earthquakes produce stronger surface waves; the strength of the surface waves is reduced in deeper earthquakes.

Source: <https://egyankosh.ac.in/bitstream/123456789/59074/1/Block-2.pdf> and

<https://www.mtu.edu/geo/community/seismology/learn/seismology-study/surface-wave/#:-:text=Surface%20waves%20travel%20more%20slowly,are%20reduced%20in%20deeper%20earthquakes.>

Q.28) Consider the following statements regarding the processes of Weathering and Erosion:

1. Weathering cannot occur if there is no erosion of the rocks.
2. Unlike Weathering, Erosion does not involve any movement of fragments of rock.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) option d is the correct answer.

Weathering is defined as mechanical disintegration and chemical decomposition of rocks through the actions of various elements of weather and climate. Erosion involves acquisition and transportation of rock debris.

Statement 1 is incorrect: Weathering processes are responsible for breaking down the rocks into smaller fragments and preparing the way for formation of not only regolith and soils, but also erosion and mass movements. **Erosion cannot be significant if the rocks are not weathered and not the other way round.** Weathering is a precondition for erosion even though not necessary for it. That means, weathering aids mass wasting, erosion and reduction of relief and changes in landforms are a consequence of erosion.

Statement 2 is incorrect: As very little or no motion of materials takes place in weathering, it is an in-situ or on-site process. Weathering is a static process whereas Erosion is a mobile process. Erosion is a process often confused with weathering. Both are geological processes in which the rocks are broken down

into finer particles. Erosion involves the movement of fragments of rock by the erosion processes and therefore differs from weathering, which is just concerned with the decay of rock in situ.

Source: NCERT chapter 5 and <https://www.bgs.ac.uk/discovering-geology/geological-processes/erosion/>

Q.29) Consider the following statements with reference to “Mantle Plumes “:

1. They are the cause of volcanic hotspots.
2. They are a secondary way through which the earth loses heat.

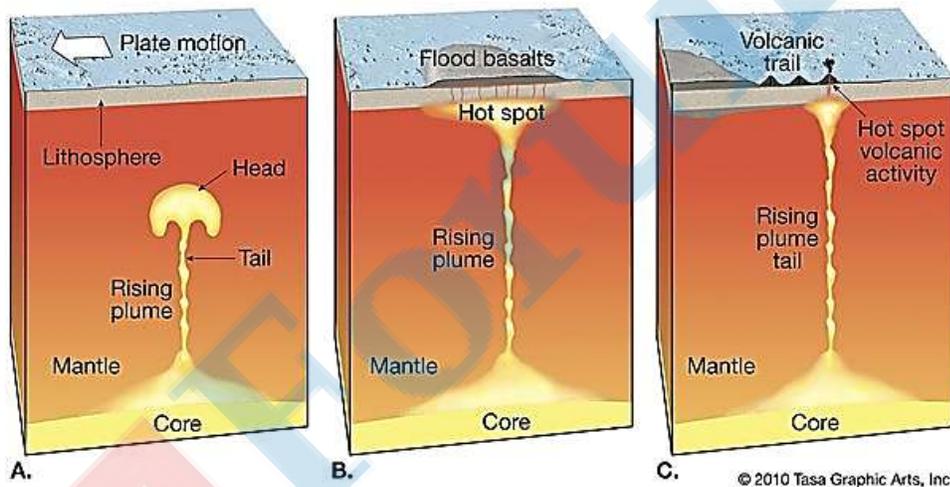

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Mantle plume is an **upwelling of abnormally hot rock** within the earth’s mantle which carries **heat upward** in narrow, rising columns, **driven by heat exchange** across the core–mantle boundary. Eventually, the rising column of hot rock reaches the base of the lithosphere, where it spreads out, forming a mushroom-shaped cap to the plume. Heat transferred from the plume raises the temperature in the lower lithosphere to above melting point, and forms magma chambers that feed volcanoes at the surface. It is a **secondary way** through which earth loses heat.

Option 1 is correct. Mantle plumes are also thought to be the **cause of volcanic centres** known as **hotspots** and probably have also caused **flood basalts**. When a plume head encounters the base of the lithosphere, it is expected to flatten out against this barrier and to undergo widespread decompression melting to form large volumes of basalt magma. It may then erupt onto the surface.

Option 2 is correct. Plumes are a **secondary way** that Earth loses heat, much less important in this regard than is **heat loss at plate margins**. Some scientists think that plate tectonics cools the mantle, and **mantle plumes cool the core**. Two of the most well-known locations that fit the mantle plume theory are Hawaii and Iceland as both have volcanic activity.

Source: <https://blog.forumias.com/answered-define-mantle-plume-and-explain-its-role-in-plate-tectonics/>

Q.30) Consider the following statements with reference to Indian Judiciary:

1. When any case involves the substantial interpretation of Constitution, the verdict is based on the numerical majorities of Judges.
2. Minimum 5 number of judges are required for sitting, when the President seeks opinion of Supreme Court.
3. The Judgements are given only with the concurrence of majority of Judges hearing the case.
4. Only Parliament is empowered to make rules regarding the number of judges to sit for a hearing.

Which of the following statements is/are correct?

- a) 1, 2, and 3 only
- b) 2, 3, and 4 only
- c) 1 and 4 only
- d) 1, 2, 3, and 4

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: As opposed to standard matters heard by Division Benches consisting of two judges, **numerical majorities are of particular importance to cases which involve a substantial interpretation of constitutional provisions.** In such cases, Constitutional Benches, consisting of five or more judges, are set up in consonance with Article 145(3) of the Constitution. **Such Benches usually consist of five, seven, nine, 11 or even 13 judges.** This is done to facilitate decision-making by ensuring numerical majorities in judicial outcomes.

Statement 2 is correct: In the matters involving the substantial question of law as to the interpretation of the Constitution, minimum 5 number of judges are required to sit for the purpose of deciding the case. Also, **when the President seeks opinion of Supreme Court under Article 143, minimum number of judges required for the sitting is 5.**

Statement 3 is correct: The requirement for a majority consensus flows from Article **145(5) of the Constitution** which states that **no judgment in such cases can be delivered except with the concurrence of a majority of the judges** but that judges are free to deliver dissenting judgments or opinions. Hence, the judicial decisions are taken on the basis of majority.

Statement 4 is incorrect: Under Article 145, Supreme Court can fix the minimum number of judges who are to sit for any purpose. This rule is subject to two exceptions:

- 1) Where the case involves question of law as to the interpretation of Constitution.
- 2) Where a case has been referred to it by the President for an opinion.

In all other cases, the Supreme Court may fix minimum number of judges for hearings. However, this is subject to the Parliamentary law and approval of the President.

Source: <https://epaper.thehindu.com/ccidist->

ws/th/th_delhi/issues/23469/OPS/GOKAQV7I2.1+GE0AQVDDF.1.html

<https://indiankanoon.org/doc/1537130/>

Q.31) Consider the following statements regarding the Elastic Rebound Theory of earthquake:

1. This theory states that earthquake is result of elastic rebound of previously stored elastic strain energy in rocks along a fault.
2. When the accumulated strain due to tectonic movements is enough to overcome the strength of the rock, an earthquake occurs.
3. During an earthquake, the stored energy within the rocks is released only in the form of elastic waves.

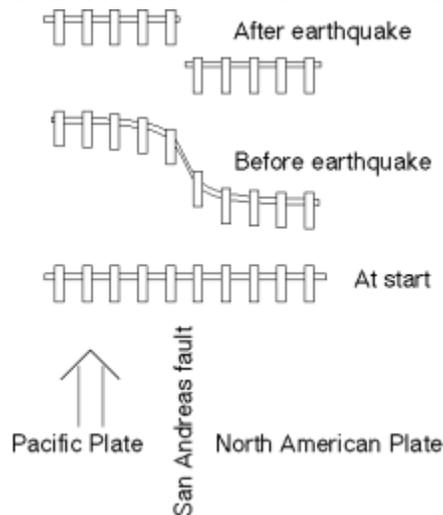

Which of the statements above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) option a is the correct answer.

Statement 1 is correct. The elastic rebound theory is an explanation for how energy is spread during earthquakes. Following the great 1906 San Francisco earthquake, Harry Fielding Reid examined the displacement of the ground surface around the San Andreas Fault. From his observations he concluded that the earthquake must have been the result of the elastic rebound of previously stored elastic strain energy in the rocks on either side of the fault.

Statement 2 is correct. As rocks on opposite sides of a fault are subjected to force and shift, they accumulate energy and slowly deform until their internal strength is exceeded. The deformation builds at the rate of a few centimeters per year, over a time period of many years. When the accumulated strain is great enough to overcome the strength of the rocks, an earthquake occurs.

Statement 3 is incorrect. Like an elastic band, the more the rocks are strained the more elastic energy is stored and the greater potential for an event. **The stored energy is released during the rupture partly as heat, partly in damaging the rock, and partly as elastic waves.** Hence this statement is incorrect.

Source : <https://courses.seas.harvard.edu/climate/eli/Courses/EPS281r/Sources/Earthquake>

Q.32) Consider the following statements about Vadose Zone of Earth's crust:

1. It is the subsurface zone between the land surface and the top of the ground water table.
2. This zone is completely saturated with water.

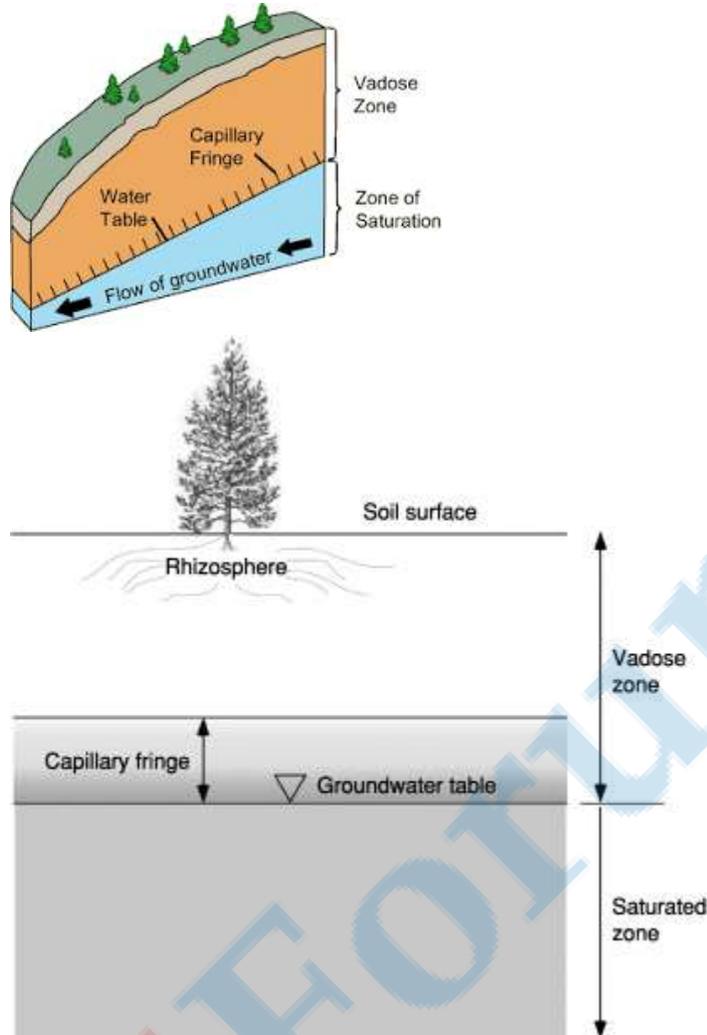

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct. The vadose zone is the part of Earth between the land surface and the top of the phreatic zone (the position at which groundwater is at atmospheric pressure). It is the portion of terrestrial subsurface that extends from the land surface downward to the water table. As such, it comprises the surface soil (the rooting zone), the underlying subsoil, and the capillary fringe that directly overlies the water table.

Statement 2 is incorrect. The vadose zone has also been defined as the unsaturated zone, since the sediments pores and rock fractures are generally not completely water filled, but instead contain both water and air. It is also known as 'zone of aeration'.

On the other hand, the water table is the zone of saturation where the pores and fractures of the ground are saturated with water.

Source: <https://www.science.gov/topicpages/v/vadose+zone+soils>

http://www.columbia.edu/~vjd1/groundwater_basics.htm

<https://web.viu.ca/earle/geol304/geol-304-b.pdf>

Q.33) Which one of the following region(s) experiences “intraplate seismicity”?

1. Narmada-Son region
2. Rann of Kutch
3. Latur region

Select the correct answer using the code given below:

- a) 3 only
- b) 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Seismicity may also occur away from tectonically stable regions. Such seismic activities, located within the plates away from the plate margins, are called **intraplate seismicity**. They are generally confined to the weaker zones of the earth's crust.

These weaker zones are represented by **faults or fractures** within the earth's crust and are generally **less intense** than the ones found near the **plate margins**.

Statement 1 is correct. One such zone of in-plate seismicity is the **Narmada-Son lineament**, cutting across the northern plane.

Activation of Narmada south fault caused the **devastating Jabalpur earthquake** (6.0 M) on May 22, 1997.

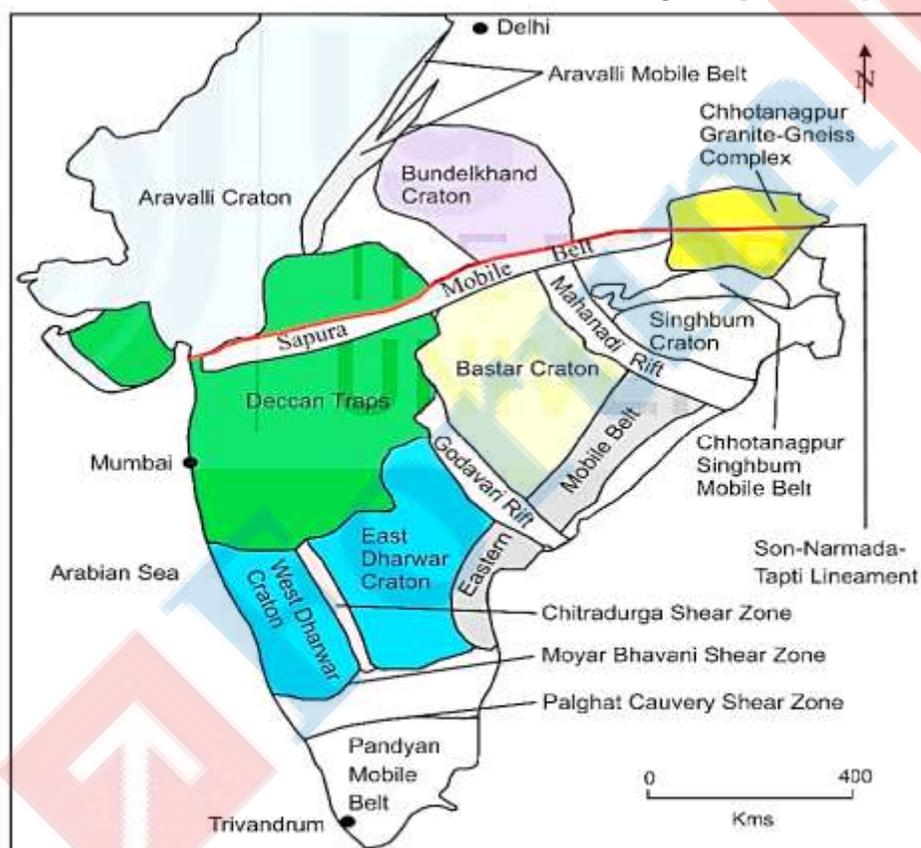

Fig. 6.3: Map of peninsular India showing major cratons and mobile belts.

(Source: simplified after Vaidyanadhan and Ramakrishnan, 2008; Sharma, 2009)

Statement 2 is correct. The earthquake of January 26, 2001 of **Gujarat** was also caused by the growing 'in-plate stress: whole **Kutch is a fault**. Bhuj, lies close to the Allah bund fault.

Hence, in-plate seismicity is due to the reactivation of concealed shields (stable parts of the Earth) and release of energy.

Statement 3 is correct. The intraplate seismicity caused the **Latur** earthquake of 30th September, 1993 in Peninsular India. It is characterised by a rather localised earthquake occurrence on the segmented fault lineaments. These fault zones are a zone of weakness which facilitates the faulting process.

Knowledge Base: Structurally, the Peninsular Plateau forms the **India shield**. A shield is, basically, a large tectonically stable area made up of crystalline igneous and metamorphic rocks of Precambrian age.

The east-west trending **Son-Narmada Tapti (SONATA) lineament** separates the Aravalli craton from the Bastar and Singhbhum cratons.

Q.34) Consider the following statements:

1. P-Waves create troughs and crests in the material through which they pass.
2. S-Waves can travel only through solid materials in Earth's crust.
3. The shadow zone of S-wave is much larger than that of the P-waves.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Earthquake waves are basically of two types – body waves and surface waves. Body waves are generated due to the release of energy at the focus and move in all directions travelling through the body of the earth. There are two types of body waves. They are called P and S-waves. P-waves move faster and are the first to arrive at the surface. These are also called ‘primary waves’.

Statement 1 is incorrect.

P-waves vibrate parallel to the direction of the wave. This exerts pressure on the material in the direction of the propagation. As a result, it creates density differences in the material leading to stretching and squeezing of the material.

The direction of vibrations of **S-waves** is perpendicular to the wave direction in the vertical plane. Hence, they **create troughs and crests** in the material through which they pass. Surface waves are considered to be the most damaging waves.

Statement 2 is correct.

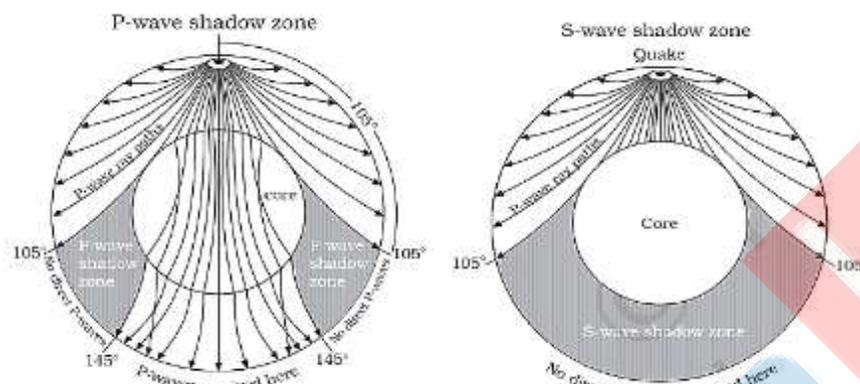

S-waves arrive at the surface with some time lag. These are called secondary waves. An **important fact about S-waves is that they can travel only through solid materials**. This characteristic of the S-waves is quite important. It has helped scientists to understand the structure of the interior of the earth.

Statement 3 is correct.

Earthquake waves get recorded in seismographs located at far off locations. However, there exist some specific areas where the waves are not reported. Such a zone is called the ‘shadow zone’. The study of different events reveals that for each earthquake, there exists an altogether different shadow zone. It was

observed that seismographs located at any distance within 105° from the epicentre, recorded the arrival of both P and S-waves. However, the seismographs located beyond 145° from epicentre, record the arrival of P-waves, but not that of S-waves.

Thus, a zone between 105° and 145° from epicentre was identified as the shadow zone for both the types of waves. The **entire zone beyond 105° does not receive S-waves**. The **shadow zone of S-wave is much larger than that of the P-waves**. The shadow zone of P-waves appears as a band around the earth between 105° and 145° away from the epicentre. The shadow zone of S-waves is not only larger in extent but it is also a little over 40 per cent of the earth surface.

Source: FUNDAMENTALS OF PHYSICAL GEOGRAPHY Pg no 23, 24

Q.35) With reference to 'Role of Governor in Indian polity', consider the following statements:

1. The Constitution of India provides for Governor to act as an ex-officio Chancellor of the state universities.
2. The functions and powers of the Governor as the Chancellor are given in the statutes of Central Universities Act, 2009.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

Recently, the Kerala High Court restrained **the Governor of the state in his capacity as Chancellor of universities, from passing final orders on the show cause notices** he issued to Vice-Chancellors of eight universities. The Governor had issued the notices to the Vice-Chancellors citing violation of University Grants Commission (UGC) norms in their appointment.

Statement 1 is incorrect: Constitution of India **does not provide any provisions for Governor** to act as an ex-officio Chancellor of the state universities. The original intent of making Governors hold the office of Chancellor and vesting some statutory powers on them was to insulate universities from political influence. In most cases, the **Governor of the state is the ex-officio chancellor of the universities in that state as specified in respective state statutes.**

Statement 2 is incorrect: State public universities are established through laws passed by state legislatures. The Governor's powers and functions as the Chancellor are laid out in the **statutes that govern the universities under a particular state government.**

Under the **Central Universities Act, 2009, and other statutes, the President of India shall be the Visitor of a central university.** Chancellors are appointed by the President in his capacity as Visitor.

Source: <https://prsindia.org/theprsblog/explained-role-of-governor-in-public-universities>

<https://indianexpress.com/article/explained/explained-kerala-row-governors-role-in-universities-7669572/>

Q.36) Consider the following statements regarding the Epeirogenic movement of Earth:

1. These movements acts only horizontally along the surface of the earth.
2. These movements are responsible for the formation of continents.

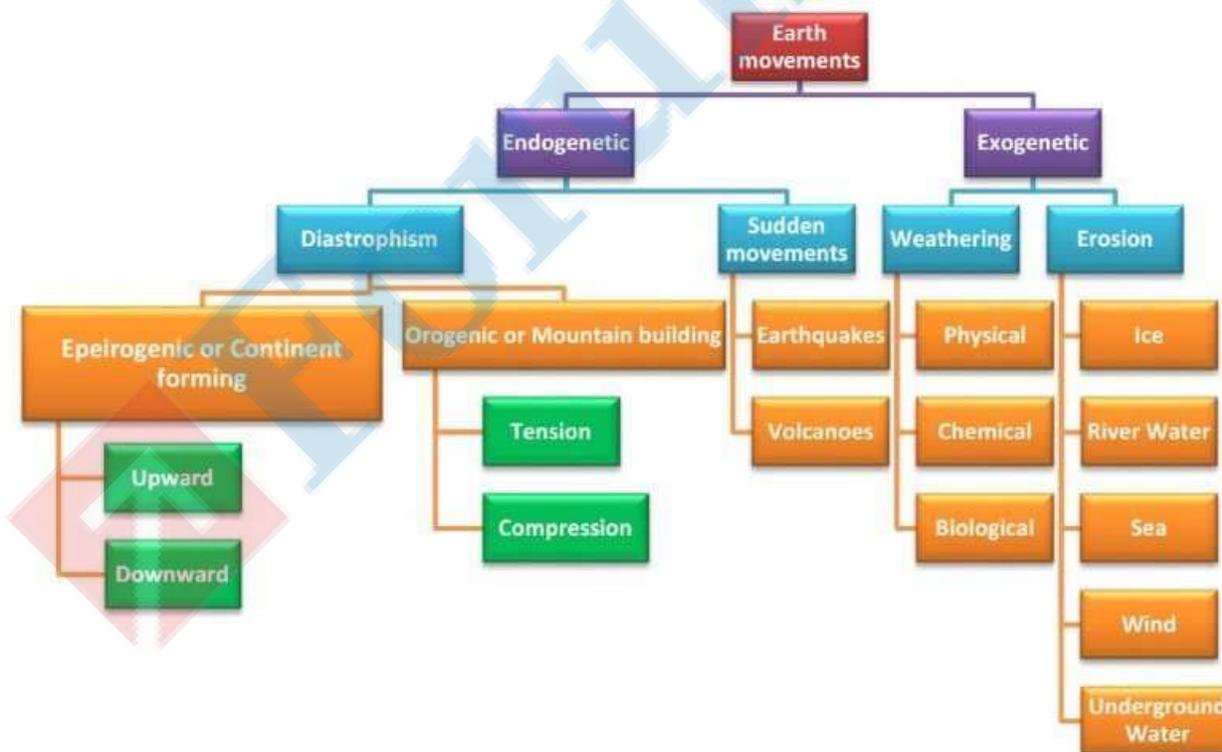

Which of the statements given above is/are correct?

- a) 1 Only
- b) 2 Only
- c) Both 1 & 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. The Epeirogenic movements are the ones which operate vertically from the center of the earth to its surface (do not work horizontally on the surface of earth) caused by radial forces (Convection Currents). It causes regional upliftment but on a large scale therefore, not much noticeable deformation of the surface takes place. Hence this statement is incorrect.

Statement 2 is correct. The Epeirogenic movements are basically the continent forming movements of earth. This movement causes regional upliftment or subsidence of the ground at a large scale without any noticeable deformation.

Knowledge Base: These movements (epeirogenic and orogenic) produce structural changes on the earth surface and make it uneven thus, producing land forms.

Source: Fundamentals of physical Geography textbook for class 11th - Chapter 6th - (Page No. 45-46) NCERT.
http://epgp.inflibnet.ac.in/epgpdata/uploads/epgp_content/S000017GE/P001786/M025376/ET/1512629383EarthMovements_EpeirogenicOrogenicCymatogenic.pdf

Q.37) Consider the following statements about the apparent movement of the sun observed from the Earth:

1. The days on which the sun is directly overhead at the equator are known as equinoxes.
2. During the summer solstice in the Northern Hemisphere, the sun is directly overhead at the tropic of Capricorn around 21st of June of the year.
3. According to Hindu astrology, the Winter Solstice in the Northern Hemisphere marks the beginning of Tropical Uttarayana.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1 only
- d) 1 and 2 only

Ans) a

Exp) Option a is the correct answer.

In the course of a year, the earth's revolution round the sun with its axis inclined at 66.5 degree to the plane of the ecliptic changes the apparent altitude of the midday sun.

Statement 1 is correct: The sun is vertically overhead at the equator on two days each year. These are usually 21 March and 21 September, though the dates may change because a year is not exactly 365 days. These two days are termed as equinoxes meaning 'equal nights' because on these two days all parts of the world have equal days and nights.

Statement 2 is incorrect: After the March equinox, the sun appears to move north and is vertically overhead of the Tropic of Cancer (Not tropic of Capricorn) on about 21st June. This is known as the June or Northern Hemisphere's Summer Solstice, when the northern hemisphere will have its longest day and the shortest night. When the sun is overhead at the tropic of Capricorn on about 22nd December, it is known as Winter Solstice in the Northern Hemisphere. During this, the southern hemisphere will have the longest day and the shortest night.

Statement 3 is correct: According to Hindu astrology, the Winter Solstice is considered as Tropical Uttarayana. The Sidereal Uttarayana begins from Makar Sankranti as the beginning of harvest season where new crops are worshipped and shared.

Source: Certificate Physical and Human Geography, G C Leong. Pg. 6
NCERT, Class 11, Fundamental of Physical Geography

Q.38) The African Great Rift Valley system was recently seen in news. In this context, which of the following are the primary forces involved in the formation of rift valleys?

1. The tension forces in the crust caused by large scale Earth movements.
2. The Compression forces set up by earth movements.
3. The agents of denudation like running water, wind, glaciers and waves.

Select the correct answer from the codes given below.

- a) 1 only
- b) 1 and 2 only
- c) 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

A rift valley is a lowland region that forms where Earth's tectonic plates move apart or rift. It is formed majorly due to the process of faulting. Faulting may be caused by tension or compression forces which lengthen or shorten the Earth's crust, causing a section of it to subside or rise above the surrounding level.

Statement 1 is correct: The Earth's movement generate tension forces that tend to pull the crust apart and faults are developed. The tension may cause the central portion to be let down between the two adjacent blocks forming a graben or rift valley, with very steep walls. E.g., The great African Rift Valley.

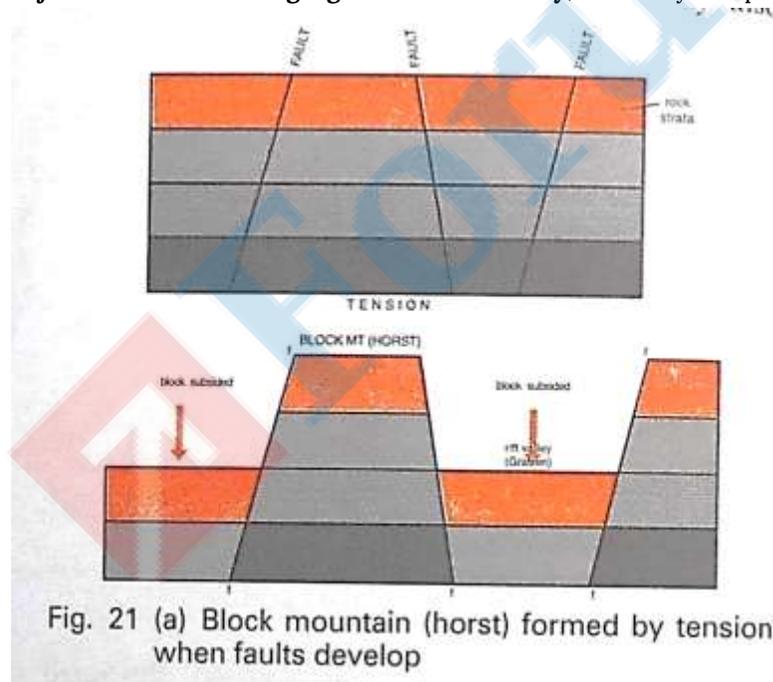

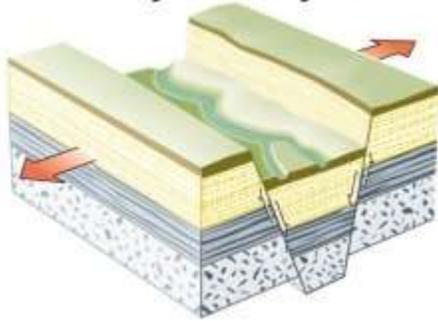

Fig. 21 (a) Block mountain (horst) formed by tension when faults develop

Statement 2 is correct: Compression forces set up by the Earth movements may produce a thrust or reverse fault and shorten the crust. Hence, a block may be raised to form a horst mountain or may be lowered to form a rift valley.

Rift Valley Formed by Extension

Statement 3 is incorrect: Agents of denudation like moving water, wind, glaciers do not lead to the formation of rift valleys, however they may modify a landform into residual mountains like Mt. Manodnock of the US, or as dissected plateau.

Source: Certificate Physical and Human Geography, G C Leong. Pg. 16

Q.39) Which of the following statements about the 'Continental Drift' Theory is correct?

- Pangaea first broke into two large continental masses as Laurasia and Panthalassa.
- The movement responsible for the drifting of the continents was caused by tectonic forces.
- The theory provided direct evidence and a mechanism to prove movement of continents.
- The presence of rocks of same age across the oceans are due to the drift of the continents.

Ans) d

Exp) Option d is the correct answer.

Continental drift describes one of the earliest ways geologists thought continents moved over time. Today, the theory of continental drift has been replaced by the science of plate tectonics.

Option a is incorrect: According to Wegener, all the continents formed a single continental mass and mega ocean surrounded the same. The supercontinent was called Pangea which meant all earth. The **mega-ocean was called PANTHALASSA**, meaning all water. He argued that, around 200 million years ago, the super continent, Pangaea, began to split. **Pangaea first broke into two large continental masses as Laurasia and Gondwanaland forming the northern and southern components respectively.** Subsequently, Laurasia and Gondwanaland continued to break into various smaller continents that exist today.

Option b is incorrect: Wegener suggested that the movement responsible for the drifting of the continents was caused by **pole-fleeing force and tidal force**. The polar-fleeing force relates to the rotation of the earth. The second force that was suggested by Wegener—the tidal force—is due to the attraction of the moon and the sun that develops tides in oceanic waters.

Option c is incorrect: The greatest problem facing Wegeners theory was the lack of direct evidence for the movements of continents (no GPS at the time!) and no mechanism was known to be powerful enough to move entire continents. Wegener proposed gravitational pull, tidal and centrifugal forces, but British geophysicist and astronomer Harold Jeffreys (1891-1989) demonstrated that these forces are much too weak to explain moving continents.

Option d is correct: Rocks of Same Age across the Oceans gave evidence about the drift of the landmasses. The radiometric dating methods developed in the recent period have facilitated correlating the rock formation from different continents across the vast ocean. The belt of ancient rocks of 2,000 million years from Brazil coast matches with those from western Africa. The earliest marine deposits along the coastline of South America and Africa are of the Jurassic age.

This suggests that the ocean did not exist prior to that time.

<https://www.nationalgeographic.org/encyclopedia/continental-drift/>

<https://www.forbes.com/sites/davidbressan/2017/01/06/alfred-wegeners-lost-cause-for-his-continental-drift-theory/?sh=67849c311149>

Q.40) Consider the following statements:

1. Acidic lava is less viscous with low melting pointing than Basic Lava.
2. The presence of high percentage of silica is found in acidic lava.
3. Basic lava spreads out as thin sheets over great distances before solidifying.
4. High explosivity and rigidity are the defining features of Basic Lava.

Which of the statements given above are correct?

- a) 1, 2 and 3 only
- b) 2 and 3 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) b

Exp) Option b is the correct answer.

Magma is composed of molten rock and is stored in the Earth's crust. Lava is magma that reaches the surface through a volcano vent.

Statement 1 is incorrect.

Acidic lavas are **highly viscous** with a high melting point. Sometimes the lavas are so viscous that they form a lava plug at the crater like that of Mt. Pelée in Martinique They **flow slowly and seldom travel far** before solidifying. Basic Lava are **highly fluid and less viscous**.

Statement 2 is correct.

Acidic lavas are light-coloured, of low density, and have a **high percentage of silica**. They **flow slowly and seldom travel far** before solidifying. The resultant volcanic cone is therefore stratified (hence the name **stratovolcano**) and steep-sided.

Statement 3 is correct.

Basic lavas are the **hottest lavas**, about 1,000 °C and are **highly fluid**. Due to their high fluidity, they flow readily with a speed of 10 to 30 miles per hour. **They affect extensive areas, spreading out as thin sheets over great distances before they solidify**.

Statement 4 is incorrect.

Basic Lavas flow out of volcanic vent **quietly and are not very explosive**. But with respect to Acidic Lavas, the **rapid solidifying of lava** in the vent obstructs the flow of the out-pouring lava, resulting in **loud explosions**, throwing out many volcanic **bombs or pyroclasts**

Source: G C Leong Chapter 3 Vulcanism and Earthquakes pg 21, 22

Q.41) Which one of the following statements is correct with reference to the "Earth's Axial tilt"?

- a) Axial tilt has an impact on the length of day and night on Earth.
- b) It has no effect on the seasons on earth.
- c) Earth has the largest axial tilt in the solar system.
- d) Without axial tilt, equator would have had lesser temperature than at the poles.

Ans) a

Exp) Option a is the correct answer.

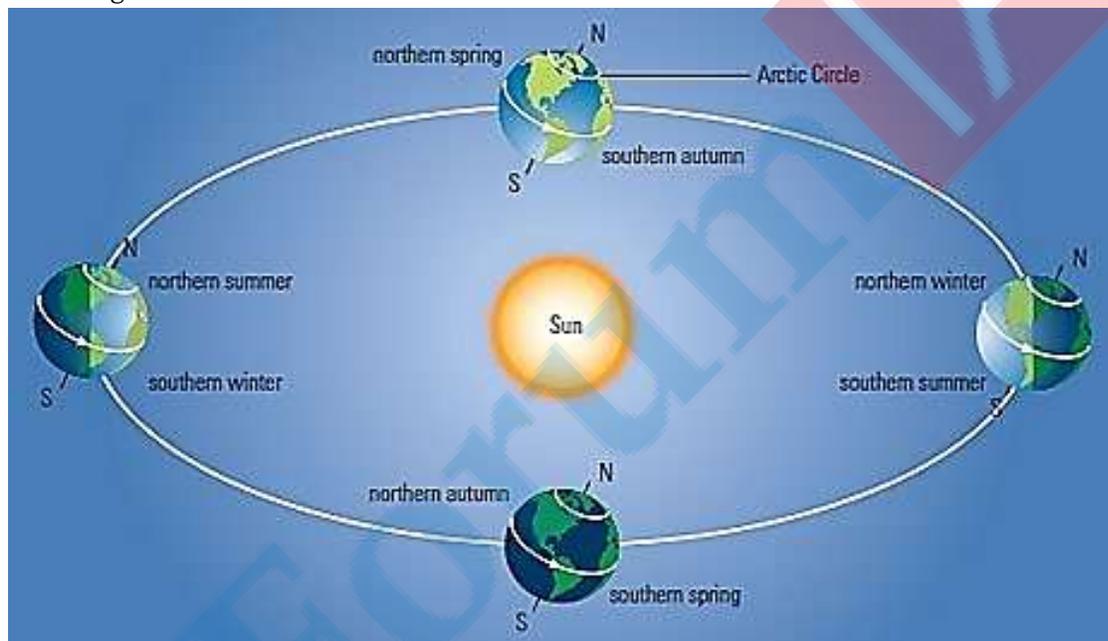

Option a is correct. Axial tilt determines the **length of daylight** at any point on the earth. The 23.5 degrees of tilt and the position of the north pole relative to the sun matters in this case. When the pole is tilted towards the sun, daylight is longer than when it is pointed away and vice-versa.

Option b is incorrect. Earth's axial tilt (also known as the obliquity of the ecliptic) is about 23.5 degrees. Due to this axial tilt, the sun shines on different latitudes at different angles throughout the year. This **causes the seasons on Earth.**

Option c is incorrect. Uranus has the largest axial tilt in the solar system. Its axis is tilted about 98 degrees, so its north pole is nearly on its equator. Astronomers suspect that this extreme tilt was caused by a collision with an Earth-sized planet billions of years ago, soon after Uranus formed.

Option d is incorrect. Without axial tilt, equator would have had **more temperature than the poles** and not otherwise. It would still be warm at the equator and cold at the poles. The most profound impact on temperatures would be at the poles. Instead of dark and frigid temperatures in the winter and warmer and constant sun in the summer, the **polar areas** would have much more **uniform temperatures year-round** and the **sun** would always be **low on the horizon.**

Knowledge Base:

Source: <https://www.nationalgeographic.org/encyclopedia/axis/>

<https://spaceplace.nasa.gov/seasons/#:~:text=Earth's%20tilted%20axis%20causes%20the,winter%20in%20the%20Northern%20Hemisphere.>

<https://theweatherprediction.com/habyhints2/471/>

Q.42) In the context of Earth's interior, consider the following statements about the Barysphere.

1. Olivine is the primary component of the Barysphere.
2. Owing to extremely high temperature and pressure, this entire region exists in the liquid state.

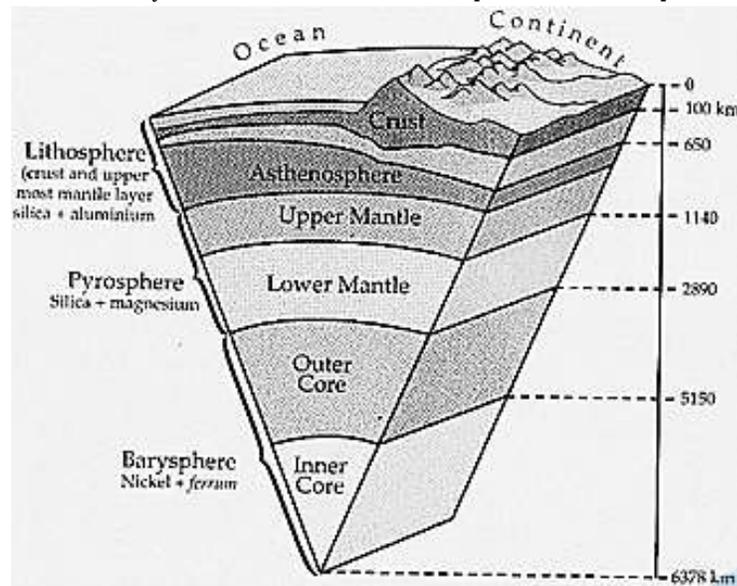

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

The earth is made up of several concentric layers like crust, mantle, outer core and inner core. Mechanically, it can be divided as lithosphere, asthenosphere, mesosphere, and barysphere.

Statement 1 is incorrect: The interior layer of the Earth is known as the Core or barysphere. It is further divided as inner core and outer core. It is primarily composed of Iron and nickel (nife). Olivine is a major constituent of the mantle/mesosphere.

Statement 2 is incorrect: The temperature in barysphere is estimated to be as high as 3,500°F, and is also subjected to extremely high pressure. In this, though the composition of both the inner and outer core is same, but due to difference in the amount of pressure, **outer core is in liquid state while the inner core is in solid state. Hence, the whole of barysphere is not in a liquid state, rather only outer core is in the liquid state.**

Source: Certificate Physical and Human Geography, G C Leong. Pg. 12

Q.43) 'These types of rocks are formed by the cooling and solidification of molten rock (magma) from beneath the earth's crust. They are normally crystalline in structure and do not occur in strata (layers).'

Which one of the following rocks is described in the above paragraph.

- Sedimentary Rocks
- Metamorphic Rocks
- Igneous Rocks
- Calcareous Rocks

Ans) c

Exp) Option c is the correct answer.

Igneous rocks (from the Latin word for fire) form when hot, molten rock crystallizes and solidifies. The melt originates deep within the Earth near active plate boundaries or hot spots, then rises toward the surface. They are normally crystalline in structure and do not occur in strata (layers). Due to extreme temperature during formation, they are devoid of any fossils.

Igneous rocks may be sub-divided based on mineral composition. When they contain a high proportion of silica, they are said to be acid.

In terms of origin there are two main classes of igneous rocks:

1) Plutonic rocks. These are igneous rocks, formed at some depth in the earth's crust. They have cooled and solidified slowly so that large, easily recognized crystals have been able to form.

2) Volcanic rocks. These are molten rocks poured out of volcanoes as lavas. They solidify rapidly on the earth's surface and the crystals are small.

Option a is incorrect: Sedimentary rocks are formed from sediment accumulated over long periods, usually under water. They are distinguished from the other rock types in their characteristic layer formation and are termed stratified rocks.

Option b is incorrect: Metamorphic rocks form when rocks are subjected to high heat, high pressure, hot mineral-rich fluids or, more commonly, some combination of these factors.

Option d is incorrect: Calcareous rocks are a type of sedimentary rocks formed from a variety of chemical and detrital sediments such as limestone, and dolostone.

Source: Certificate Physical and Human Geography, G C Leong. Pg. 12-13
NCERT, Class 11, Fundamental of Physical Geography

Q.44) Consider the following statements with reference to different types of rocks:

1. Sedimentary rocks are stratified and non-crystalline.
2. Igneous rocks contain a large quantity of fossils.
3. Limestone is a type of metamorphic rock.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct- Sedimentary rocks are properly stratified (exist as layers) in different rock beds and are great source of fossil fuels. They **do not have any crystalline structure** as those of igneous rocks. Thus, they are stratified and non-crystalline.

Statement 2 is incorrect- Igneous rocks **contains no or very less fossils** because of its formation from the hot molten magma.

It is sedimentary rocks which contains large quantity of fossils.

Statement 3 is incorrect-Limestone is type of sedimentary rock which is formed organically. Limestone converts into marble under heat and pressure. The marble thus formed is a metamorphic rock.

Source: NCERT- class 11- world physical geog-ch 5

Q.45) On which of the following charges can a Member of Parliament/ Member of Legislative Assembly be disqualified even if he/she is sentenced to less than two years of imprisonment?

1. Practicing and preaching untouchability.
2. Awarded the conviction of 8 months in case of contravention of law relating to food adulteration.
3. Given fine as punishment for committing offence of bribery.
4. Promotion of hostility among groups on ground of language.

Select the correct answer using the code given below:

- a) 1 only
- b) 2 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Section 8 of the Representation of the People Act (RPA), 1951, contains provisions aimed at decriminalising electoral politics. There are two categories of criminal cases that attract disqualification upon conviction. In the first category are offences that entail disqualification for a period of six years upon any conviction. The second one forms a separate category under which mere conviction will not entail disqualification. A sentence of at least two years in prison is needed to incur such disqualification.

Statement 1 is correct: Any person convicted of offence pertaining to the Protection of Civil Rights Act, 1955 (22 of 1955), which provides for punishment for the preaching and practice of “untouchability” and for the enforcement of any disability arising therefrom shall be disqualified.

Statement 2 is correct: If the person is awarded the conviction of 8 months in case of contravention of law relating to food adulteration then he/she is disqualified from the seat in legislative assembly/ parliament. There are offences under which a person is sentenced to imprisonment for not less than six months, shall be disqualified from the date of such conviction and shall continue to be disqualified for a further period of six years since his release. These offences include:

A person convicted for the contravention of--

- (a) any law providing for the prevention of hoarding or profiteering
- (b) any law relating to the adulteration of food or drugs
- (c) any provisions of the Dowry Prohibition Act.

Statement 3 is correct: If the MP/MLA has committed offence under section 171E (offence of bribery) of Indian Penal Code 1860 then he/she is remained disqualified. If the punishment is a fine, the six-year period will run from the date of conviction.

Statement 4 is correct: MP/MLA is disqualified if he/she is convicted of an offence punishable under section 153A of IPC,1860. The offence includes promoting enmity between different groups **on ground of religion, race, place of birth, residence, language, etc., and doing acts prejudicial to maintenance of harmony.**

<https://www.thehindu.com/news/national/explained-can-convicted-legislators-be-disqualified-from-assembly/article66088235.ece>

Q.46) Consider the following statements about the “Intermontane plateaus”:

1. These are generally formed because of the continual denudation by agents like water streams and glaciers.
2. These are some of the highest and the most extensive plateaus in the world.
3. The Deccan plateau is an example of intermont plateau.

Which of the statements given above is/are correct?

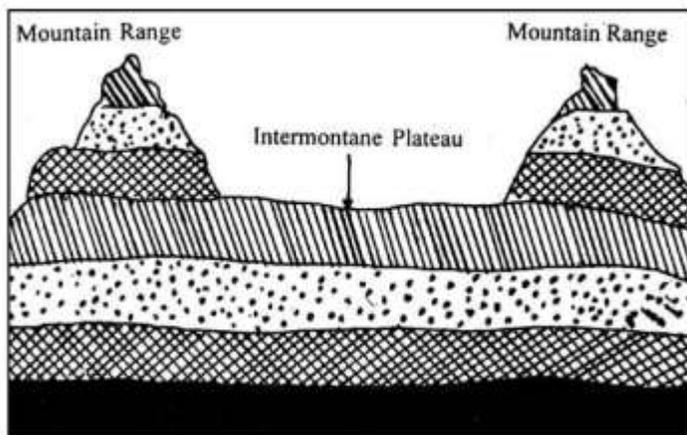

- a) 1 and 2 only
- b) 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Plateaux are elevated uplands with extensive level surfaces, and usually descend steeply to the surrounding lowland. They are sometimes referred to as tablelands.

Statement 1 is incorrect: Intermontane plateaus are a type of tectonic plateaus formed by earth movements which cause uplift, and are normally of a considerable size, and fairly uniform altitude. **When the plateaus are enclosed by the fold mountains, they are known as intermont plateaus. However, plateaus formed from denudation are known as dissected plateaus.** E.g., Scottish Highlands.

Statement 2 is correct: Intermontane plateaus are landforms bordered by mountain rims and contained by high mountain chains. They feature almost horizontal rock strata that are uplifted to great heights by vertical earth movements. Hence, **they are considered as some of the highest and the most extensive plateaus in the world.**

Statement 3 is incorrect: The Deccan plateau is an example of volcanic plateau. However, the Tibetan plateau located between the Himalayas in the south and the Kunlun Mountains in north is an example of intermont plateau. The Bolivian plateau located between the ranges of the Andes is another example.

Source: Certificate Physical and Human Geography, G C Leong. Pg. 17

NCERT, Class 11, Fundamental of Physical Geography

Q.47) Consider the following statements about the metamorphism and metamorphic rocks.

1. In metamorphism, recrystallisation and reorganisation of minerals occurs within rocks.
2. In metamorphic rocks, minerals get arranged in layers or lines by the process known as foliation.
3. Slate, gneiss and schist are some of the examples of metamorphic rocks.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1, 2 and 3
- c) 1 only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

The word metamorphic means 'change of form'. These rocks form under the action of pressure, volume and temperature (PVT) changes.

Statement 1 is correct: Metamorphism occurs when rocks are forced down to lower levels of the Earth by tectonic processes or when molten magma rising through the crust comes in contact with the crustal rocks or the underlying rocks are subjected to great amounts of pressure by overlying rocks. **Metamorphism is a process by which already consolidated rocks undergo recrystallisation and reorganisation of materials within original rocks.**

Statement 2 is correct: In the process of metamorphism in some rocks grains or minerals get arranged in layers or lines. Such an arrangement of minerals or grains in metamorphic rocks is called foliation or lineation.

Statement 3 is correct: Some of the well-known examples of metamorphosed rocks are as follows: clay may be metamorphosed into **slate**, limestone into **marble**, sandstone into **quartzite**, granite into **gneiss**, shale into **schist** and coal into **graphite**.

Source: Certificate Physical and Human Geography, G C Leong. Pg. 12-13
NCERT, Class 11, Fundamental of Physical Geography, Chapter 5, pg. 42.

Q.48) Consider the following statements about the volcanic mountains:

1. They can only occur near divergent boundaries of tectonic plates.
2. Composite volcanic mountains are the smallest type of volcanic mountains on the Earth.
3. Mt. Merapi, a type of volcanic mountain recently seen in news, is located in Indonesia.

Which of the statements given above is/are correct?

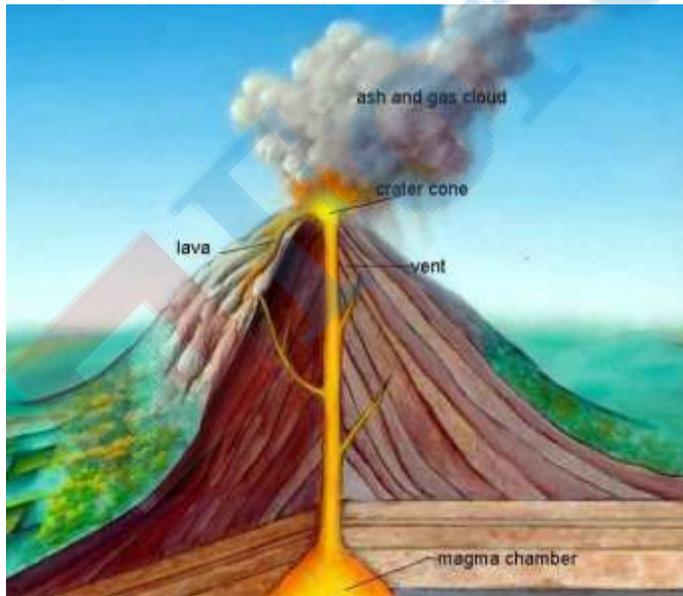

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 3 only.

Ans) d

Exp) Option d is the correct answer.

Mountains which are built up from material ejected from fissures in the earth's crust are commonly known as volcanic mountains.

Statement 1 is incorrect: Volcanic mountains are, in fact, volcanoes which are built up from material ejected from fissures in the earth's crust. **They are commonly found in the circum-Pacific belt; however, they can also be often found in places where tectonic plates diverge or converge. They can also be found in alpine-Indonesian mountain belt, East African-Arabian belt, Eurasia, and Atlantic's.**

Statement 2 is incorrect: Cinder cones are also known as pyroclastic cones are the smallest and simplest type of volcanic mountains. Whereas, composite mountains/ Composite cones are large volcanoes (many thousands of feet or meters tall) generally composed of lava flows, pyroclastic deposits, and mudflow (lahar) deposits, as well as lava domes.

Statement 3 is correct: Mt. Merapi is the most active volcano in Indonesia and has erupted regularly since 1548. It is one of the most active volcanos of Indonesia. It is located near the centre of the island of Java and Indonesia's cultural capital, Yogyakarta.

Source: Certificate Physical and Human Geography, G C Leong. Pg. 17.
NCERT, Class 11, Fundamental of Physical Geography

Q.49) Consider the following statements regarding the recent earthquakes in Turkey:

1. Turkey lies in seismically active region at the confluence of three plates.
2. The mining events in Zonguldak region of Turkey caused isostatic imbalance.
3. The recent earthquakes were caused due to strike-slip fault.

Which of the statements given above are correct?

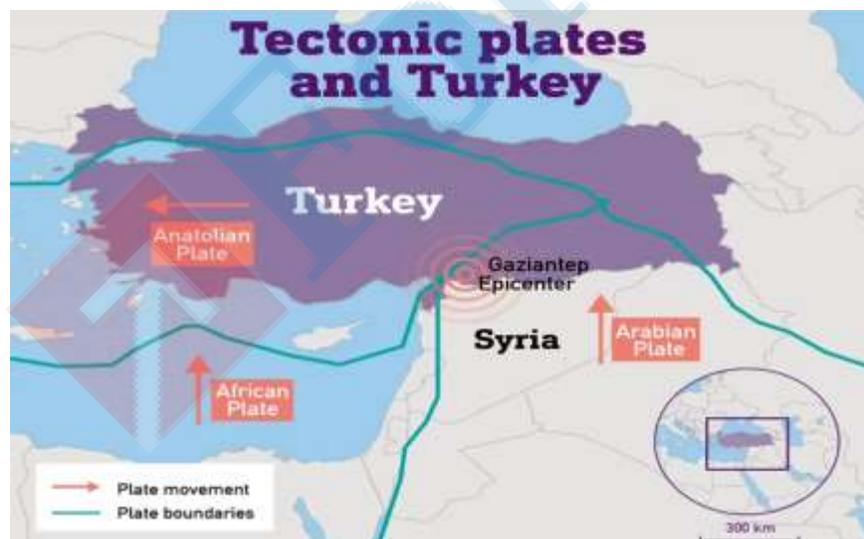

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Two large earthquakes, **one of magnitude 7.8 and closely followed by a magnitude 7.5**, hit **south-eastern Turkey**, claiming thousands of lives, wreaking considerable damage in **Turkey** as well as **Syria**. According to one estimate, **almost 95% of the country's land mass** is prone to earthquakes, while about a third of the country is at high risk, including the areas around the major cities of Istanbul and Izmir and the region of East Anatolia. The earth crust plates **continually collide, push and grate against each other** and the meeting points of these plates are made up of a series of 'faults.

Statement 1 is correct: Turkey and Syria lie at the **confluence of three plates – the Arabian Plate, the Anatolian Plate and the Eurasian Plate**, making the region an extremely seismically active zone. The Arabian Plate is inching north into Europe, causing the Anatolian Plate (which Turkey sits on) to be pushed out west. **The bulk of Turkey sits on the Anatolian Plate** between two major faults: the North Anatolian Fault and the East Anatolian Fault.

Statement 2 is incorrect: Mining events in Zonguldak region of Turkey **did not cause any isostatic imbalance** in Turkey. Hence this statement is incorrect.

Statement 3 is correct: Geologists say that the earthquakes were from a **strike-slip** fault, which is like a earthquake in the region. One set of rocks rising up relative to the other is a **normal fault**, and one sliding down relative to the other is a **reverse fault**. **When they grate or move past one another, it's a strike-slip.** The **energy released travels as waves** that cause the ground to shake.

Knowledge Base: In addition to the Arabian and Anatolian plate, **the Aegean Sea Plate, located in the eastern Mediterranean Sea** under southern Greece and western Turkey, is also a source of seismic activity in the region.

Source: <https://www.thehindu.com/sci-tech/science/explained-why-were-the-turkey-earthquakes-so-deadly/article66498307.ece>
<https://indianexpress.com/article/explained/explained-sci-tech/turkey-earthquake-aftershocks-8427443/>

Q.50) Which of the following best describes the phenomena of “scissors effect” as mentioned in the report of 15th Finance Commission?

- The effect where increase in Gross Domestic Product results in a proportionately larger rise in capital investment spending.
- A phenomenon where contracting revenue along with increasing expenditure is observed.
- Phenomena where decrease in sale of a product is due to consumers switching to cheaper alternatives when its price rises.
- The effect of increase or decrease in final income resulting from injection or withdrawal of capital in economy.

Ans) b

Exp) Option b is the correct answer.

A phenomenon in economy where contracting revenues along with need for increasing expenditure is observed is referred as Scissors effect

Statement a is incorrect: The accelerator effect states that investment levels are related the rate of change of GDP. Hence, when there is increase in Gross Domestic Product which results in large investment spending, acceleration effect is observed.

Statement b is correct: The 15th Finance (FC) commission expressed the concern on the dual pressure called “scissor effect” of the pandemic on state finances. The dual pressure of loss of revenues and need for increased spending was expected to hit hard the finances of the state governments.

Statement c is incorrect: The substitution effect is purely a reflection of frugality. It refers to decrease in sales for a product that can be attributed to consumers switching to cheaper alternatives when its price rises. If a brand raises its price, some consumers will select a cheaper alternative.

Statement d is incorrect: The multiplier effect refers to the proportional amount of increase, or decrease, in final income that results from an injection, or withdrawal of spending. Multipliers effects measure the impact that a change in economic activity—like investment or spending will have on the total economic output of something. This amplified effect is known as the multiplier.

Q.1) With reference to coastal plains of India, consider the following statements:

1. The Eastern Coastal Plain is an example of Emergent Coast.
2. The rivers flowing through Western Coastal Plains do not usually form deltas as *slope of rivers is very steep*.
3. *Kayals* are found along the Western Coastal Plains.
4. No estuary is found along the eastern coastal plains.

Which of the statements given above is/are correct?

- a) 1 and 4 only
- b) 2 and 3 only
- c) 1, 2 and 3 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

On the basis of the location and active geomorphological processes, coastal plains can be broadly divided into two: (1) the western coastal plains; (2) the eastern coastal plains.

Statement 1 is correct: The eastern coastal plain is broader and is an example of an emergent coast. There are well developed deltas here, formed by the rivers flowing eastward into the Bay of Bengal. Because of its emergent nature, it has a smaller number of ports and harbours.

Whereas the western coastal plains are an example of submerged coastal plains. It is believed that the city of Dwaraka which was once a part of the Indian mainland situated along the west coast is submerged under water. Because of this submergence it is a narrow belt and provides natural conditions for the development of ports and harbours. Kandla, Mazagaon, JLN port Navha Sheva, Marmagao, Mangalore, Cochin, etc. are some of the important natural ports located along the west coast. Extending from the Gujarat coast in the north to the Kerala coast in the south.

Statement 2 is correct: The rivers flowing through western coastal plain do not form any deltas as slope of rivers is very steep. The slope of the Western Ghats is steep and that is the reason that these rivers have a rapid flow. They don't have to travel much distance to drain into the sea. As a result, they don't carry much sediments required to form deltas.

Statement 3 is correct: The Malabar coast, which is a part of western coastal plains, has got certain distinguishing features in the form of 'Kayals' (backwaters), which are used for fishing, inland navigation and also due to its special attraction for tourists. Every year the famous Nehru Trophy Vallamkali (boat race) is held in Punnamada Kayal in Kerala.

Statement 4 is incorrect: Estuaries are also found along the eastern coastal plains. For example - The Vellar estuary on the eastern coast of southern India (Tamil Nadu) and Hooghly River estuary. Western coastal plains also have estuaries. The Narmada, Periyar and Tapti are the long rivers, which flow west and make estuaries along the western coastal plain. Estuaries and their surrounding wetlands are bodies of water usually found where rivers meet the sea.

Q.2) Which among the following conditions can be considered as favorable for the formation of Karst Topography?

The Presence of-

1. dense limestone near the surface.

2. moderate to heavy rainfall.
3. good groundwater circulation.

Select the correct answer using the codes given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Option 1 is correct: Karst Topography is the formation of landforms due to solution and deposition on **any limestone or dolomitic region** by the action of groundwater or surface water. **The presence of dense limestone near the surface is an important requirement for the formation of the Karst topography.** Different types of landforms will be developed from these limestone regions/blocks due to the action of ground water and rainwater.

Option 2 is correct: A **moderate to heavy rainfall is a favorable condition for the formation of Karst topography.** Rainwater percolates along both horizontal and vertical cracks, dissolving the limestone and carrying it away in solution.

Option 3 is correct: **Good groundwater circulation is an important condition for the formation of karst topography.** Ground water act as a primary agent in the formation of the karst landforms.

Source: <https://www.britannica.com/science/karst-geology>

Q.3) Rivers go through three main stages - the youthful or upper course, the mature or middle course, and the old or lower course. In this context, which of the following landforms are predominantly formed by the river in its upper course or youthful stage?

1. Interlocking spurs
2. Oxbow lakes
3. V-shaped valleys
4. Rapids
5. Plunge pools

Select the correct answer from the code given below:

- a) 1, 2 and 3 Only
- b) 1, 3 and 5 Only
- c) 3, 4 and 5 Only
- d) 1, 3, 4 and 5 only

Ans) c

Exp) Option c is the correct answer.

Rivers go through three main stages - the youthful or upper course, the mature or middle course, and the old or lower course.

V-shaped valleys, rapids, and plunge pools are typically formed by the river in its upper course or young age, while meanders and oxbow lakes are formed in the middle and lower course of the river.

Option 1 is incorrect: Interlocking spurs are convex (rounded) slopes that extend alternately from opposite sides of a valley, each one fitting into the "gap" between two similar slopes on the other side. Interlocking spurs are the predominant feature of mature stage.

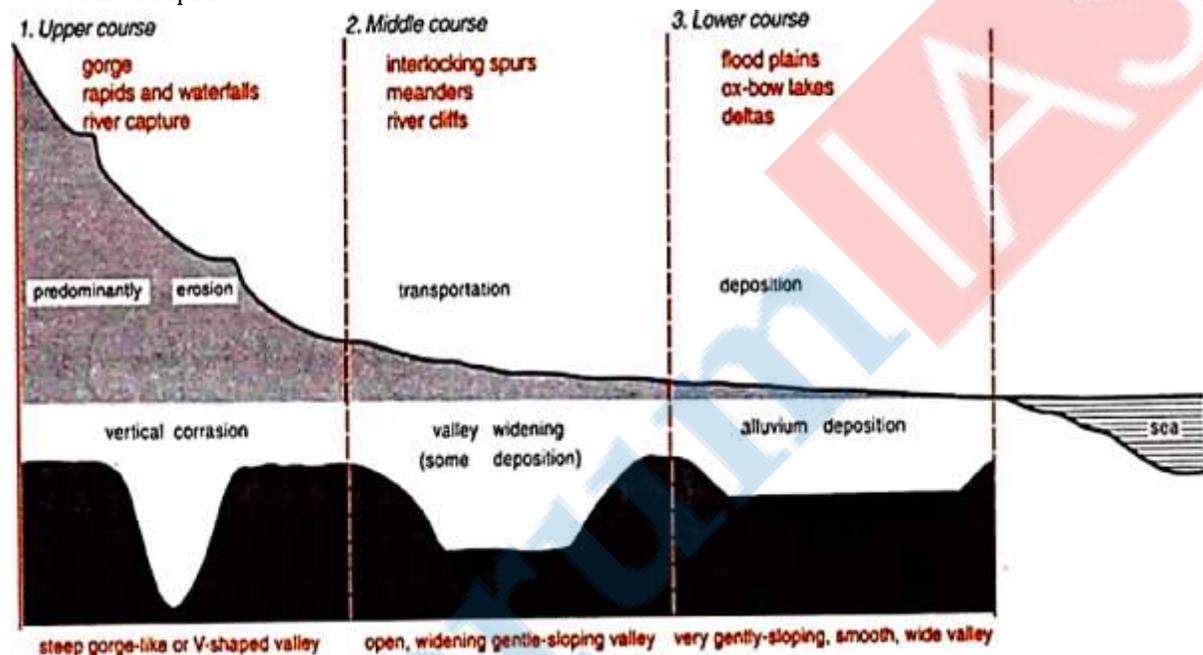

Option 2 is incorrect: Oxbow lakes are formed during the old or lower stages of a river's development, when it has a low gradient and a meandering course. They are formed when a meandering river erodes the

outer banks of a bend, causing the river to take a new, straighter course and leaving the old bend cut off from the main channel.

Option 3 is correct: V-shaped valleys are typically formed during the youthful stage of a river's development, when it has a high gradient and a greater erosive power. The river erodes the sides and bottom of the valley, creating a narrow, V-shaped channel.

Option 4 is correct: Rapids are formed wherever there is a sudden change in the river's gradient or where there are obstructions such as rocks or boulders in the river's course. They can form at any stage of a river's development but are most common during the youthful stage.

Option 5 is correct: Plunge pools are typically formed during the youthful stages of a river's development, when it has a greater erosive power. They are formed by the erosive action of falling water at the base of a waterfall or rapids.

Knowledge Base:

1) Youthful or Upper Course

- V-shaped valleys
- Waterfalls
- Rapids
- Plunge pools
- Gorges

2) Mature or Middle Course

- Meanders
- Interlocking spurs
- River cliff and slip off slopes

3) Old or Lower Course

- Deltas
- Oxbow lakes
- Floodplains
- Braided Channels
- Estuaries
- Natural levees
- Bayous

Source: Certificate physical and human geography ch 5 pg 41-44

Q.4) Which of the following water bodies in India are examples of Ox-Bow lakes?

1. Chilika Lake
2. Pulicat Lake
3. Kanwar Lake
4. Deepor Beel

Select the correct answer using the codes given below:

- a) 1 and 2 Only
- b) 2 and 3 Only
- c) 3 and 4 Only
- d) 1 and 4 Only

Ans) c

Exp) Option c is the correct answer.

Ox-Bow lakes are U-shaped bodies of water that form when a river's meander becomes so pronounced that it erodes the narrow strip of land between two bends and creates a new channel. As a result, a part of the river is cut off from the main channel, and the water gets collected in a curved lake.

Option 1 is incorrect: Chilika Lake is not an example of an Ox-Bow Lake as it is a lagoon, which is a shallow coastal water body separated from the sea by a narrow strip of land.

Option 2 is incorrect: Pulicat Lake is a brackish water lagoon that is located at the border of Andhra Pradesh and Tamil Nadu. The lagoon is separated from the Bay of Bengal by a sand bar and is connected to the sea by a narrow mouth.

Option 3 is correct: Kanwar jheel, as it is locally called, is located 22 km north-west of Begusarai town. It is a residual oxbow lake, formed due to meandering of Gandak river, a tributary of Ganga, in the geological past.

Option 4 is correct: Deepor Beel is a large oxbow lake located in the southwestern part of Guwahati city in Assam, India. It is a wetland of international importance under the Ramsar Convention and is also an Important Bird Area (IBA).

Q.5) With reference to 'UPI23Pay facility' recently launched by Reserve Bank of India, consider the following statements:

1. It is a method to initiate and execute transactions that will work on simple non-smart feature phones.
2. Users can initiate a secured call from their phones to a predetermined Interactive Voice Response number to complete UPI based transaction.
3. Transactions can be made even without any internet connection.

Which of the statements given above are correct?

- a) 1 and 2 Only
- b) 2 and 3 Only
- c) 1 and 3 Only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Reserve Bank of India has launched new UPI service for feature phones called UPI123Pay. It has also launched a 24x7 helpline for digital payments called 'Digisaathi'.

Statement 1 is correct. UPI 123PAY is a **three-step offline method** to initiate and execute transactions that will work on simple feature phones. It will allow users to use feature phones for almost all transactions except scan and pay. The service **does not need an internet connection for transactions**. Users just need to link their bank account with their phones to use the service.

UPI123Pay offers users four options to make payments without internet connectivity-

Statement 2 is correct. Interactive Voice Response (IVR): Users would be required to initiate a secured call from their feature phones to a predetermined IVR number and complete UPI on-boarding formalities to start making financial transactions like money transfer, mobile recharge, EMI repayment, balance check, among others.

Statement 3 is correct. App-based functionality: One could install an app on feature phones through which several UPI functions, available on smartphones, will be available on their feature phone, except the **scan and pay** feature which is currently **not available**.

Missed call facility: The missed call facility will allow users to access their bank account and perform routine transactions such as receiving, transferring funds by giving a missed call on the number displayed at the merchant outlet. The customer will receive an incoming call to authenticate the transaction by entering UPI PIN.

Proximity sound-based payments: One could utilize the proximity sound-based payments option, which uses **sound waves to enable contactless**, offline, and proximity data communication on any device.

Reserve Bank of India - Press Releases (rbi.org.in)

Q.6) Which of the following conditions are favourable for the formation of deltas?

1. Active lateral and vertical erosion at the upper course of the river.
2. Absence of heavy tides on coasts.
3. Presence of shallow sea adjoining the delta.
4. Presence of large lakes in the middle course of river.
5. Absence of strong currents running at right angles to the river mouth.

Select the correct answer from the codes given below.

- a) 1, 2 and 3 only
- b) 3, 4 and 5 only
- c) 1, 2, 3 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) c

Exp) Option c is the correct answer.

The Delta is originated from the Greek letter Δ which closely resembled the triangular delta of the Nile. It is formed when a river reaches the sea, and the fine materials it has not yet dropped are deposited at its mouth, forming a fan-shaped alluvial area. A number of factors such as the rate of sedimentation, the depth of the river and the seabed, and the character of the tides, currents and waves greatly influence the eventual formation of delta.

Statement 1 is correct: Active vertical and lateral erosion in the upper course of the river is necessary to provide extensive sediments to be eventually deposited as deltas. It acts as a source of sedimentation for further deposition.

Statement 2 is correct: The coast should be sheltered preferably tideless. If the coast is not sheltered, then the tides may erode the deposition at the river mouth and the sediments may get washed away.

Statement 3 is correct: The sea adjoining the delta should be shallow or else the load will disappear in the deep waters. Hence, presence of longer continental shelf is one of the key requirements of the formation of delta.

Statement 4 is incorrect: There should be no large lakes in the course of the river to filter off the sediments. If there is an extensive deposition at middle of the river, due to presence of large lakes there will be not enough load to be deposited at the river mouth and hence probability of forming a delta will be less.

Statement 5 is correct: There should be no strong current running at right angles to the river mouth. If such currents are present, then they may wash away the sediment deposits and hinder the formation of delta at the river mouth.

Source: Certificate Physical and Human Geography, G C Leong, pg. 44

Q.7) “It is a type of glacial erosional landform. It is a horseshoe shaped, deep, long and wide trough or basin with very steep to vertically dropping high walls at its head. It is a depression in which the firm or neve accumulates.”

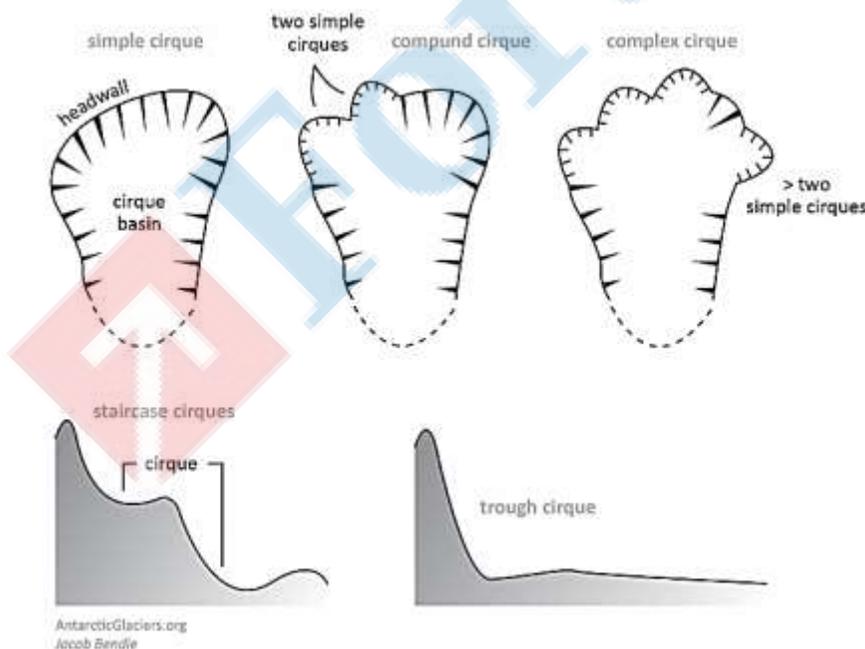

Which of the following landforms is described in the above passage?

- Hanging valley
- Aretes
- Cirque
- Bergschrund

Ans) c

Exp) Option c is the correct answer.

The downslope movement of a glacier from its snow-covered valley-head, and the intensive shattering of the upland slopes, tend to produce a depression where the firm or neve accumulates. The process of plucking operates on the back-wall, steepening it and the movement of the ice abrades the floor, deepening the depression into a steep, horse-shoe-shaped basin called a cirque (in French). It is also known as corrie.

Option a is incorrect: A tributary valley whose ice has melted and hence, hangs above the main valley so that its stream plunges down as a waterfall is known as hanging valley.

Option b is incorrect: When two corries or cirques cut back on opposite sides of a mountain, knife-edged ridges are formed called aretes (a French word).

Option d is incorrect: At the head of a glacier, where it begins to leave the snowfield of a corrie, a deep vertical crack opens up called a bergschrund (in German) or rimaye (in French).

Source: Certificate Physical and Human Geography, G C Leong, pg. 48

<https://www.nps.gov/articles/cirques.htm>

Q.8) With reference to the Equatorial Rainforests, consider the following statements:

1. These forests are characterized by the presence of Lianas and Epiphytes.
2. Tropical rain forests in the Amazon Basin are called *Selvas*.
3. Equatorial forests are highly conducive for commercial exploitation of timber.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 2 only
- d) 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

The equatorial regions support a tropical rain forest due to high temperature and abundant rainfall, which is characterized by a great variety of vegetation including evergreen trees, smaller palm trees, climbing plants, ferns, orchids, and Lalang.

Statement 1 is correct: Epiphyte, also called air plant, any plant that grows upon another plant or object merely for physical support. Lianas are plants with long, flexible, climbing stems that are rooted in the ground, and usually have long dangling branches. Equatorial rainforests are characterized by the presence of Epiphytes and Lianas. One of the main reasons for such adaptation is to get access to the physical prerequisites like Sunlight.

Statement 2 is correct: In the Amazon basin, Tropical Rain Forests are so dense and so complete in their vegetational extravagance that a special term "*Selvas*" is used to denote them.

Statement 3 is incorrect: Tropical evergreen forests are difficult to exploit for commercial purposes because these forests are dense, and many plants and climbers are tangled with each other. Secondly, the lack of means of transport deep into the forests has made these trees difficult to be used commercially.

Source: Certificate of Physical Geography pg: 118

Q.9) Lakes can be formed by various geo-climatic and anthropogenic processes. In this context consider the following pairs.

Lakes - **Type of lakes**

1. Vembanad lake - Lagoon
2. Wular lake - Tectonic Lake
3. Vynthala lake - Man made Lake

How many of the pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) All the three pairs
- d) None of the pairs

Ans) b

Exp) Option b is the correct answer.

Lakes are amongst the most varied features of the earth's surface. They occupy the hollows of the land surface in which water accumulates. They vary tremendously in size, shape, depth and mode of formation.

Pair 1 is correct: Vembanad, one of the Ramsar site, is a coastal lagoon. It has a single, relatively narrow opening to the sea and must have been formed by the detritus dumped by six perennial rivers forming a narrow sand bar in the sea further west of the seashore.

Pair 2 is correct: Tectonic lakes are lakes formed as a result of the deformation of the Earth's crust and the resulting lateral and vertical motions. These motions include faulting, tilting, folding, and warping. **Wular Lake is one of Asia's largest freshwater lakes, having been produced by geological action. Hence, it is type of tectonic lake.**

Pair 3 is incorrect: Vynthala Lake is a natural oxbow lake found in Vynthala, near Mala, Thrissur District of Kerala. It was formed from a "cut-off" of the Chalakudy River which flows near to it. The lake is considered to be the only naturally formed Oxbow Lake in whole of South India.

Source: <https://whc.unesco.org/en/tentativelists/5896/>

[https://bandipore.nic.in/tourist-](https://bandipore.nic.in/tourist-place/wullar/#:~:text=Wular%20Lake%20(also%20spelt%20Wullar,)%2C%20depending%20on%20the%20season.)

Q.10) Consider the following pairs:

Poverty Measures	Assumptions
1. Welfare Approach	Level of income reflects the level of freedom enjoyed by an individual.
2. Capability Approach	Real opportunities are the key to increasing human development
3. Multidimensional Poverty Index	Basic needs of the people need to be fulfilled rather than their choices

Which of the pairs given above is/are correctly matched?

- a) 1 and 2 only
- b) 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

Poverty measures are used to quantify the extent and nature of poverty in a given population. These measures are used by governments, international organizations, and researchers to understand the nature of poverty, identify those in need, and evaluate the effectiveness of poverty reduction programs.

Pair 1 is incorrectly matched: Welfare Approach approach looks at **human beings as beneficiaries or targets of all development activities**. The approach **argues for higher government expenditure on education, health, social secondary and amenities**. People are not participants in development but only passive recipients. The government is responsible for increasing levels of human development by maximising expenditure on welfare.

On the other hand, Income Approach is based on the idea that the **level of income reflects the level of freedom an individual enjoys**. Higher the level of income, the higher is the level of human development.

Pair 2 is correctly matched: The capabilities approach, developed by economist Amartya Sen, looks at a **person's capabilities, or the real opportunities they have to live a fulfilling life**. This approach emphasizes the importance of not just income, but also access to education, healthcare, and other opportunities that can lead to a person's overall well-being.

Pair 3 is incorrectly matched: The Multidimensional Poverty Index is based on the **understanding that poverty is a multidimensional phenomenon and that a household can be considered poor if it is deprived in several different ways**.

On the other hand, Basic Needs Approach emphasizes the provision of basic needs of defined sections and ignores the question of human choices.

Source: <https://ncert.nic.in/textbook/pdf/legy104.pdf>

Q.11) Fjord is a glacial landform. Regarding Fjord, consider the following statements.

1. A fjord is formed when a glacier retreats after carving its typical U-shaped valley, and then the sea fills the resulting valley floor with water.
2. Fjords are characteristically very shallow and wide water bodies.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Fjord comes from the Norse fjørðr. The word fjord was mostly used in the meaning "where one fares through", which has the same origin as the word "fare" (travel). It is a landform of highland glaciation.

Statement 1 is correct: Fjords are found in locations where current or past glaciation extended below current sea level. A fjord is formed when a glacier retreats, after carving its typical U-shaped valley, and the sea fills the resulting valley floor. The fjords were thus formed by the giant glacier tongues that through several ice ages have shaped the landscape.

Statement 2 is incorrect: A fjord is a deep, narrow and elongated sea or lake drain, with steep land on three sides. The opening toward the sea is called the mouth of the fjord and is often shallow. The fjord's inner part is called the sea bottom. **If the geological formation is wider than it is long, it is not a fjord.**

Then it is a bay or cove.

Source: <https://www.fjordnorway.com/en/inspiration/what-is-a-fjord>

<https://www.fjords.com/what-is-a-fjord/>

Q.12) Consider the following statements regarding the Taiga or Boreal forests:

1. It is the world's largest land biome in terms of area.
2. They are only found in the Northern Hemisphere, and not found in the Southern Hemisphere.
3. Trees are completely absent in these forests.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) option a is the correct answer.

Taiga, the term includes all cool, northern coniferous forests, including the so-called boreal forests of North America and Europe

Statement 1 is correct: The boreal forest (or "taiga") is the **world's largest land biome in terms of area**. The boreal ecozone principally spans 8 countries: Canada, China, Finland, Japan, Norway, Russia, Sweden and the United States.

Statement 2 is correct: The **Taiga types of forest are only found in the northern hemisphere** where the continents within the high latitudes have a broad east-west spread. The narrowness of the southern continents in the high latitudes is the main reason for absence of taiga forests in southern hemisphere.

The strong oceanic influence also reduces the severity of the winter in the southern hemisphere.

Statement 3 is incorrect: It is mainly made up of coniferous forest and **trees such as larches, spruces, birches, aspens, firs, and pines**. The conifers, which require little moisture are best suited to this type of sub-Arctic climate. Thus, there is no absence of trees, hence incorrect.

Q.13) With reference to various coastal landforms, consider the following statements:

1. A *Tombolo* is formed when a 'Spit' connects the mainland coast to an island.
2. A *Gloup* is a steep and often vertical column of rock in the sea near a coast.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

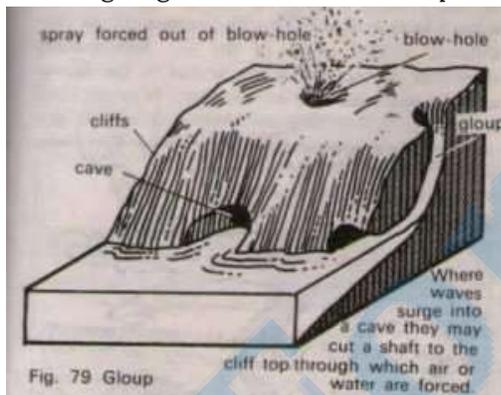

Exp) Option a is the correct answer.

Coastal landforms, any of the relief features present along any coast, the result of a combination of processes, sediments, and the geology of the coast itself. Examples of coastal landforms include cliffs, bays, sea arch, and caves, etc.

Statement 1 is correct: A Tombolo is formed when a spit connects the mainland coast to an island. A spit is a feature that is formed through deposition of material at coastlines. The process of longshore drift occurs, and this moves material along the coastline. (Fig. below is showing the tombolo)

Statement 2 is incorrect: Gloop is an opening in the roof of a sea cave through which incoming waves may force air to rush upward or water to spout intermittently. While **stack or sea stack** is a geological landform consisting of a steep and often vertical column or columns of rock in the sea near a coast, formed by wave erosion. Stacks are formed over time by wind and water, processes of coastal geomorphology. Like all other features, sea stacks are also temporary and eventually coastal hills and cliffs will disappear because of wave erosion giving rise to narrow coastal plains

Q.14) With reference to the terms related to the processes of erosion and weathering, consider the following pairs:

Term	Definition
1. Corrasion	It is the mechanical grinding of the river's traction load against banks and bed of the river
2. Corrosion	It is the gradual destruction or alteration of a material by chemical reaction.
3. Attrition	The process by which transported materials undergo wear and tear when they collide and roll into each other.

How many of the pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) All three pairs
- d) None of the pairs

Ans) c

Exp) Option c is the correct answer.

The above terms are related to the processes of erosion and weathering that occur in natural environments.

Pair 1 is correctly matched: Corrasion or abrasion is the mechanical grinding of the river's traction load against banks and bed of the river. The rock fragments are hurled against the sides of the river and also roll along the bottom of the river.

Pair 2 is correctly matched: Corrosion is the gradual destruction or alteration of a material by chemical reaction with its environment. In geology, it often refers to the dissolution of minerals in rocks by acidic water or other fluids.

Pair 3 is correctly matched: Attrition is the process by which transported materials undergo wear and tear when they collide and roll into each other. This causes coarser boulders to break down into smaller stones and angular edges to become rounded. Finer materials are carried downstream and eventually deposited.

Source: Certificate physical and human geography ch 5 pg 39-40

Q.15) Consider the following statements:

1. India is the largest importer of palm oil in Asia.
2. Andhra Pradesh is the largest producer of palm oil in India.
3. Palm oil production in India has declined continuously in the last five years.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

India is the world's second-largest consumer of palm oil. Palm oil accounts for about 40% of India's edible oil consumption and the nation is almost entirely dependent on imports to meet this demand.

Statement 1 is correct. In Asia, **India** is the **largest importer of palm oil** and accounts for **15 percent of global imports**. China with 9 percent, Pakistan with 4 percent, and Bangladesh with 2 percent of global imports are the other significant countries with a stake in palm oil production and trade. **India** relies on **Indonesia** to fulfil nearly half of its palm oil requirement of around 700,000 tonnes per month.

Statement 2 is correct. **Andhra Pradesh (AP)** is the largest producer of Palm oil in India with **240016 Metric Tons** of production in 2020-21. It is followed by Telangana with 39347 Metric Tons of palm oil.

Statement 3 is incorrect. According to the Economic Survey 2021-2022, the **palm oil production in India has increased between 2015-2016 and 2020-2021** at a compound annual growth rate of **6.1 per cent**. Since the launch of the **National Edible Oil Mission**, around **2.8 million hectares** of land have been assessed to be fit for oil palm cultivation by the reassessment committee of the Indian Council for Agricultural Research-Indian Institute of Oil Palm Research.

Source: <https://www.thehindubusinessline.com/economy/agri-business/5-major-palm-oil-importers-form-asian-alliance/article65921524.ece>

<https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1780271>

Q.16) What is common among *Ria coasts*, *Dalmitian coast* and *Fiord coast*?

- They all have Submergent coastline.
- They all have Emergent coastline.
- They all have Concordant coastline.
- They all have Discordant coastline.

Ans) a

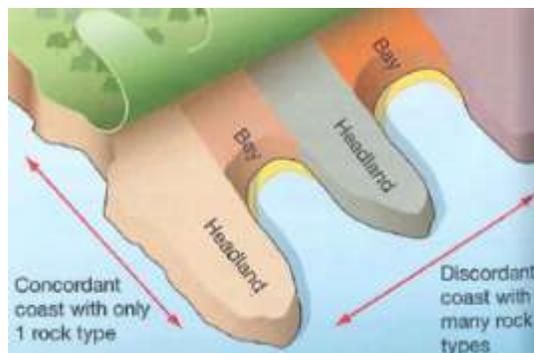

Exp) Option a is the correct answer.

Coastline is the area where land meets water. The water, with an endless supply of waves, whether pounding or gentle ripples, is constantly changing coastlines around the globe.

Option 1 is correct: Submergent coastlines are coastlines submerged under water due to rising sea levels. Many of these types of coastlines were actually formed toward the end of the Last Glacial Period (LGP). **Such coasts are Ria coasts, Fiord coasts, Dalmatian Coast and Estuarine coasts.**

Option 2 is incorrect: Emergent coastlines happen when either the water level has fallen, or the land has risen. Either way, there is now a (bit of) coastline that is no longer submerged under water. Emergent coastlines can pop up after tectonic activity. Emergent coastlines can have features such as marine terraces, relict sea cliffs, sea stacks, and raised beaches.

Option 3 is incorrect: Discordant coastlines occur when bands of different types of rocks run perpendicular (at 90 degrees) to the coast. These bands of rocks alternate between soft rock and hard rock, all eroding at different rates and in varying ways. Because of this difference in erosion resistance, discordant coastlines are home to **headlands**, due to eroding hard rock, and **bays**, due to eroding soft rock.

Option 4 is incorrect: Concordant coastlines have bands of similar rock types running parallel (alongside) to the coast. The difference in rock types between discordant and concordant coastlines means that there are differences in erosion. As mentioned earlier, discordant coastlines form headlands and bays; on the other hand, concordant coastlines form **coves**. These coves are formed by waves breaking through an outer layer of hard rock, such as limestone, and then, over time, the waves sweep away the soft rock further inland, like sand and clay, creating a cove.

Source: GC Leong Pg: 76

<https://www.studysmarter.co.uk/explanations/geography/coasts-geography/coastlines/#:~:text=The%20four%20major%20types%20of,concordant%20coastlines%3B%20and%20discordant%20coastlines.>

Q.17) Consider the following pairs with reference to different types of Coral reefs:

Types of Coral Description

Reefs

- | | |
|------------------|--|
| 1. Fringing reef | It grows seaward directly from the shore and form borders along the shoreline. |
| 2. Barrier reef | It is separated from the shore by a lagoon. |
| 3. Atoll | It is a circular oceanic reef system surrounding a large central lagoon |

Which of the pairs given above is/are correctly matched?

- a) 1 and 2 only
- b) 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Coral reefs are important ocean habitats and offer a compelling case of the risks of climate change. Reefs provide a large fraction of Earth's biodiversity—they have been called **“the rain forests of the seas.”** Scientists estimate that 25 percent of all marine species live in and around coral reefs, making them one of the most diverse habitats in the world. There are three kinds of coral reefs: fringing reefs, barrier reefs, and atolls.

Pair 1 is correct: Fringing reefs are the most common type of reef. This type of reef grows seaward directly from the shore. They form borders along the shoreline and surrounding islands. A fringing reef is composed of a reef flat and a reef slope. The reef flat is nearest to shore. Due to heavy sediment, few live corals live in the reef flat. **It is mostly made of exoskeletons.** The reef slope faces the open ocean. Most marine life is found on the reef slope.

Pair 2 is correct: A barrier reef is separated from the shore by a lagoon. The reef forms a barrier between the coast and the open ocean or sea. **Barrier reefs are far less common** than fringing reefs or atolls, although examples can be found in the tropical Atlantic as well as the Pacific.

Pair 3 is correct: An atoll is a roughly circular (annular) oceanic reef system surrounding a large (and often deep) central lagoon. When a fringing reef continues to grow upward from a volcanic island that has sunk entirely below sea level, an atoll is formed.

Q.18) Consider the following statements regarding the Alluvial Fans:

1. Alluvial fans are erosional landforms that are generally formed at the peak of the Mountains.
2. Alluvial fans cannot be formed underwater.
3. Fans formed due to mass wasting, without the aid of water, are called Colluvial Fans.

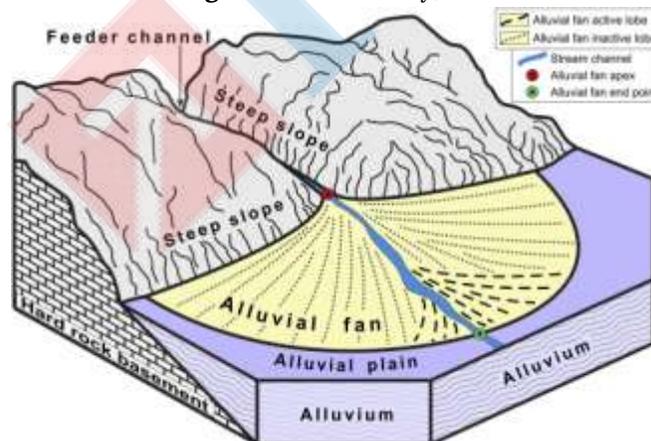

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 3 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: Alluvial fans are depositional landforms not erosional landforms. An alluvial fan is a triangle-shaped deposit of gravel, sand, and even smaller pieces of sediment, such as silt. This sediment is called alluvium. A river mouth is a place where a river flows into another larger body of water like ocean or large lakes. Generally, deltas are formed at the river mouth.

Statement 2 is incorrect: Alluvial fans are even found underwater. An underwater fan is created as an underwater current deposits alluvium from a submarine hill or glacier.

Statement 3 is correct: Sometimes, fans are formed without the aid of water. These are called colluvial fans. **Colluvial fans are created by mass wasting.** Mass wasting is simply the downward movement of rock, soil, or other material. **Alluvium is a material transported by water, while colluvium is material transported by mass wasting.** Landslides are an instance of mass wasting that often create colluvial fans.

Source: <https://education.nationalgeographic.org/resource/alluvial-fan/>

<https://www.britannica.com/science/alluvial-fan>

<https://www.sciencedirect.com/topics/earth-and-planetary-sciences/alluvial-fan#:~:text='Alluvial%20fans'%20are%20depositional%20landforms,onto%20a%20low%2Drelief%20plain>

Q.19) Consider the following statements regarding the Meanders:

1. They are only formed at the upper course of the river mainly because of vertical erosion by the rivers.
2. Slip-off slope and River cliff are the landforms associated with the Meanders.

Which of the statements given above is/are correct?

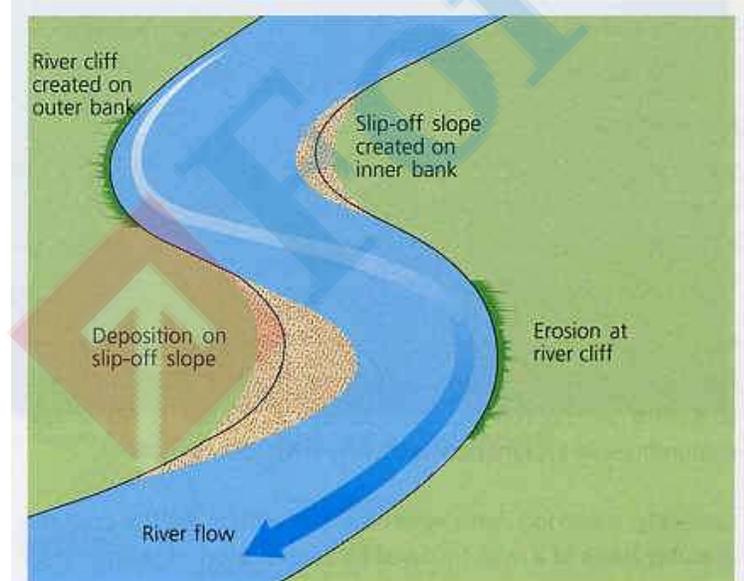

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

The middle course of a river has more energy and volume than the upper course. The gradient is gentler and more lateral (sideways) erosion has widened the channel. The river channel has also become deeper. Meanders are typical landforms found in this stage of the river.

Statement 1 is incorrect: A meander is a winding curve or bend in a river. They are typical of the middle and lower course of a river. **This is because vertical erosion is replaced by a sideways form of erosion called LATERAL erosion, plus deposition within the floodplain.**

Statement 2 is correct: A meander is formed because the river flows faster on the outside edge of any small curve and slower along the inside edge. Deposition of sediment occurs on the inner edge because the river, moving slowly, cannot carry its sediment load, creating a slip-off slope. The faster moving current on the

outside bend has more erosive ability and the meander tends to grow in the direction of the outside bend, forming a river cliff.

Source: geography.learnontheinternet.co.uk/topics/river_middle_course.html

<https://www.cs.mcgill.ca/~rwest/wikispeedia/wpcd/wp/m/Meander.htm>

[https://link.springer.com/referenceworkentry/10.1007/3-540-31060-](https://link.springer.com/referenceworkentry/10.1007/3-540-31060-6_186#:~:text=Intrenched%20or%20entrenched%20meanders%20are,normally%20develop%20under%20slower%20incision.)

[6_186#:~:text=Intrenched%20or%20entrenched%20meanders%20are,normally%20develop%20under%20slower%20incision.](https://link.springer.com/referenceworkentry/10.1007/3-540-31060-6_186#:~:text=Intrenched%20or%20entrenched%20meanders%20are,normally%20develop%20under%20slower%20incision.)

Q.20) Consider the following statements regarding 'Swatantrata Sainik Samman Yojana':

1. The scheme provides monthly pension to freedom fighters as a token of respect for their contribution in the national freedom struggle.
2. The Union Ministry of Culture is the nodal ministry for the implementation of the scheme.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

The government has recently approved the continuation of the Swatantrata Sainik Samman Yojana (SSSY) till 2025-26.

Statement 1 is correct: Swatantrata Sainik Samman Yojana (SSSY) aims to provide a **monthly Samman Pension to freedom fighters**, as a token of respect for their contribution in the national freedom struggle and on their demise to their eligible dependents viz. spouses and thereafter, unmarried and unemployed daughters and dependent parents.

Statement 2 is incorrect: Ministry of Home Affairs is the nodal agency for the scheme. In 1972, to commemorate the 25th Anniversary of Independence, a regular scheme for grant of freedom fighters' pension was introduced. Thereafter, in 1980, a scheme by the name 'Swatantrata Sainik Samman Pension Scheme' was implemented. From 2017-18 onwards, the nomenclature of the Scheme has been changed to 'Swatantrata Sainik Samman Yojana'.

Source: Government has approved continuation of Swatantrata Sainik Samman Yojana(SSSY) -ForumIAS Blog

Q.21) Which of the following statements best describes the term "River Piracy"?

- a) The act of illegally taking over a river vessel by pirates.
- b) The process of stealing water from a river for irrigation purposes.
- c) The process by which a river captures the drainage of another river.
- d) The illegal transportation of goods through a river.

Ans) c

Exp) Option c is the correct answer.

River capture, also known as river piracy or beheading, occurs when one river captures the drainage of another river by eroding the divide that separates them. This is due to differences in the rate of headward erosion into the divide caused by varying gradients or precipitation. The more erosive river enlarges its basin at the expense of the weaker river, eventually breaking through the divide and capturing the other river. The point at which this occurs is called the elbow of capture, and the beheaded river is referred to as the misfit. The valley below the elbow is called a wind gap and can serve as a valuable transportation route.

Examples of river capture can be found in various places, including the Upper Sittang captured by the Irrawaddy in Burma and the Blyth and Wansbeck beheaded by the North Tyne in Northumberland, England.
Source: Certificate physical and human geography ch 5 pg 40

Q.22) Consider the following statements regarding the Caverns:

1. It is an underground cave formed by the action of water in a limestone area.
2. Borra caves in Andhra Pradesh is a well-known site of caverns in India.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: Cavern is an underground cave formed by water action by various methods in a limestone or chalk area. Cave formation is prominent in areas where there are alternating beds of rocks (shales, sandstones, quartzites) with limestones or dolomites in between or in areas where limestones are dense, massive and occurring as thick beds.

Statement 2 is correct: Borra Caves located in the Visakhapatnam district of Andhra Pradesh is a prominent example of caverns in India. Among the deepest caves of India, the Borra cave was created millions of years ago by the karstic action of the Gosthani river and has some spectacular speleothems. The local tribals also associate several legends with the cave. The cave is also highly valuable for anthropological research, with excavations unearthing stone tools of middle Paleolithic culture (confirming human habitation in the area dating back to between 30,000 and 50,000 years ago)

Knowledge Base: Geologists refer to the mineral formations in caves as “speleothems.” While the water flows, the speleothems grow in thin, shiny layers. The amount of growth is an indicator of how much ground water dripped into the cave. Little growth might indicate a drought, just as rapid growth could point to heavy precipitation. When the speleothems stop growing, the outside becomes dirty and eroded in places, giving it a dull appearance. A growing speleothem looks smooth and wet.

Source : <https://worldofcaves.com/whats-the-difference-between-a-cavern-vs-cave/>

<https://cavern.com/learn/Cavern%20Geology%20Lesson%20Plan%201.pdf>

https://earthobservatory.nasa.gov/features/Paleoclimatology_Speleothems

Q.23) Consider the following description:

“These forests are characterized by cold temperatures, short growing seasons, and coniferous trees. These forests are found in the high latitudes of the Northern Hemisphere, primarily in Canada, Alaska, Scandinavia, and Russia. The soil in these forests is thin and nutrient-poor, and the vegetation is adapted to survive harsh conditions such as cold temperatures and permafrost.”

Which of the forest types is mentioned in the above paragraph?

- a) Tropical rainforest
- b) Temperate deciduous forest
- c) Tundra forest
- d) Mediterranean forest

Ans) c

Exp) Option c is the correct answer.

Tundra forests, also known as boreal forests or taiga, are a biome **characterized by their cold and harsh climate, dominated by long, cold winters** and short, cool summers. They **are found in the northern hemisphere, in regions such as Canada, Russia, and Scandinavia**. The dominant tree species in **tundra forests are evergreens, such as spruce, fir, and pine**. These trees are adapted to the **cold climate by having narrow needles, which help them conserve water**, and a conical shape, which allows them to shed snow easily. The understory of tundra forests is typically composed of shrubs, mosses, and lichens. Tundra forests are an important habitat for a wide range of wildlife. Mammals such as moose, reindeer, wolves, and bears are commonly found in these forests, as are a variety of bird species, including owls, woodpeckers, and grouse. Many of these animals rely on the forests for food and shelter, and some, such as the lynx and the snowshoe hare, have evolved specialized adaptations to survive in the harsh winter conditions.

<https://ncert.nic.in/textbook/pdf/iess105.pdf>

Q.24) With reference to Ocean currents, consider the following pairs:

Current	Feature
1. Humboldt current	a main cause of dry climatic conditions prevailing in Atacama Desert
2. Gulf stream	Responsible for bringing warm water from the Gulf of Mexico to the east coast of North America
3. Canaries current	Cold ocean current that flows off the west coast of Africa

How many of the above given pairs are correctly matched?

- Only one pair
- Only two pairs
- All the three pairs
- None of the pairs

Ans) c

Exp) Option c is the correct answer.

Ocean currents play a significant role in redistributing heat and salt throughout the world's oceans. They are driven by a combination of factors, including wind, temperature, and the Earth's rotation.

Pair 1 is correctly matched: The Atacama is one of the driest places on earth. It receives less than 1 mm of precipitation each year, and some areas haven't seen a drop of rain in more than 500 years. There are two main reasons for the prevailing dry climatic conditions in Atacama Desert. On one hand Andes Mountains obstruct the moisture laden winds, these winds ascend near the mountains only and bring rains in those regions. The dry winds will reach Atacama Desert. On the other hand, **Humboldt Current, which is a cold ocean current, makes coastal surface water cold and prevents evaporation of the water**. When winds blow from ocean into the land, they will be dry and cold. These dry winds do not bring any rain to the Atacama region.

Pair 2 is correctly matched: The Gulf stream is a warm ocean current that flows from the Gulf of Mexico along the east coast of North America. It is responsible for bringing warm water to the region and has a significant impact on the climate and weather patterns in the area.

Pair 3 is correctly matched: The Canaries current is a cold ocean current that flows off the west coast of Africa, between the Canary Islands and the African mainland. It is known for its strong winds and large waves, which can make navigation in the region difficult.

Source: Certificate of Physical Geography pg: 89-90

Q.25) Which of the following best describes the DeFi (Decentralized Financing) system, that has been recently seen in news?

- a system that provides a range of financial services using digital assets.
- a technology used for the mining of crypto currencies.
- a new loan disbursement scheme launched by the RBI for achieving financial inclusion.
- a new type of Non-Banking Financial Company set up to exclusively provide credit facilities in tribal areas.

Ans) a

Exp) Option a is the correct answer.

DeFi refers to Decentralised Financing which is a component of the Web 3.0 concept. **DeFi** provides a **range of financial services** like **trading in securities, lending & borrowing, paying for services/ assets, or maintaining saving accounts** using **digital assets** such as cryptocurrencies using a **peer-to-peer system**. In case of DeFi system entire financial transaction occurs between two ordinary individuals without the involvement of a central authority like a tech company or a central bank or a commercial bank which generally regulates financial transactions currently.

These transactions will use the Distributed Ledger Technology (DLT) (such as blockchain) for carrying out these transactions. DLT means that the resources used to complete the transaction and record the financial agreement will be distributed across several personal systems and not concentrated in servers/ clouds owned by a few tech corporates or government.

Q.26) Which of the following are erosional desert landforms?

- Barchans
- Loess
- Hoodoos
- Mesas
- Inselbergs

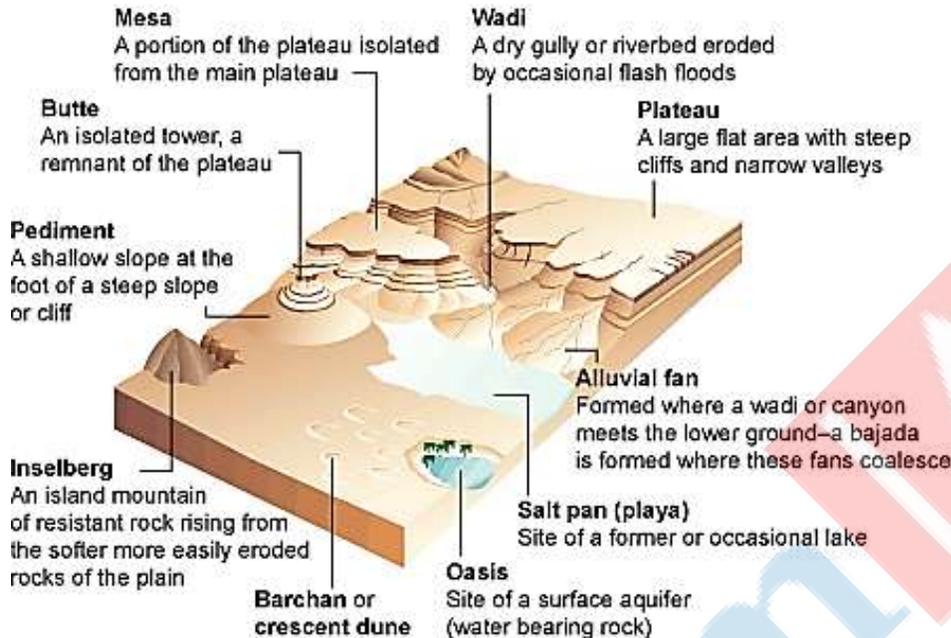

Select the correct answer from the code given below:

- 2, 3 and 4 only
- 3, 4 and 5 only
- 1, 3, 4, and 5 only
- 1, 2, 3, 4, and 5

Ans) b

Exp) Option b is the correct answer.

Erosional desert landforms are created by the action of wind and water on the landscape.

Options 1 and 2 are incorrect: Barchans and Loess are examples of depositional landforms of the desert.

Barchans are primarily crescent-shaped sand dunes that are likely to shift while facing the wind with intensity from one particular direction. Loess is defined as sediment that has been entrained, transported, and deposited by the wind and is dominated by silt-sized (50–2 μm diameter) particles.

Option 3 is correct: Hoodoos are tall, thin spires of rock that are formed by the erosive action of wind and water on soft rock formations. They are also an example of an erosional desert landform.

Option 4 is correct: Mesas are flat-topped hills with steep sides that are formed by the erosion of softer rock layers that cover harder, underlying rock formations. They are also an example of an erosional desert landform.

Option 5 is correct: Inselbergs are isolated hills or mountains that rise abruptly from a plain or desert floor. They are formed by the exposure of hard, resistant rock that has been uplifted and eroded over time.

Source: Certificate of Physical Geography pg: 56-61

Q.27) Which of the following best describes the difference between Gorges and Canyons?

- Gorges are always deeper than Canyons.
- Gorges are formed on the land surface whereas canyons are only formed on the ocean surface.
- A gorge is a result of river erosion, while a canyon is a result of glacial deposition.
- Canyons are generally wider than Gorges.

Ans) d

Exp) Option d is the correct answer.

Canyons and gorges are geographical landforms belonging to the broad categories of valleys. Morphologically, they are either V-shaped or U-shaped with a downward fold extending below the earth's surface. Though these terms have been utilized interchangeably, there exists some critical differences between a canyon and a gorge in terms of size, mode of formation, localization and preference of usage of the terms.

In terms of the proportions of the two, a canyon is considered larger than a gorge. **They are both deep valleys, but a canyon is often wider compared to a gorge. The term gorge is at times used to describe ravines which are narrower than canyons.** Canyons are mainly localized to the arid areas while gorges can be found in temperate areas like between mountain ranges.

Option a is incorrect: Both Gorges and Canyons are deep valleys, depth of gorges and canyons changes with the location and other factors. However, we cannot say that gorges are always deeper than canyons or vice versa.

Option b is incorrect: Submarine canyons are the canyons formed on the ocean floor. Apart from these submarine canyons, canyons can also be widely found on the land surface. For example, The Grand Canyon is canyon carved by the Colorado River in Arizona, United States.

Option c is incorrect: Both canyons and gorges are erosional landforms.

Source: <https://www.worldatlas.com/articles/what-is-the-difference-between-a-canyon-and-a-gorge.html>

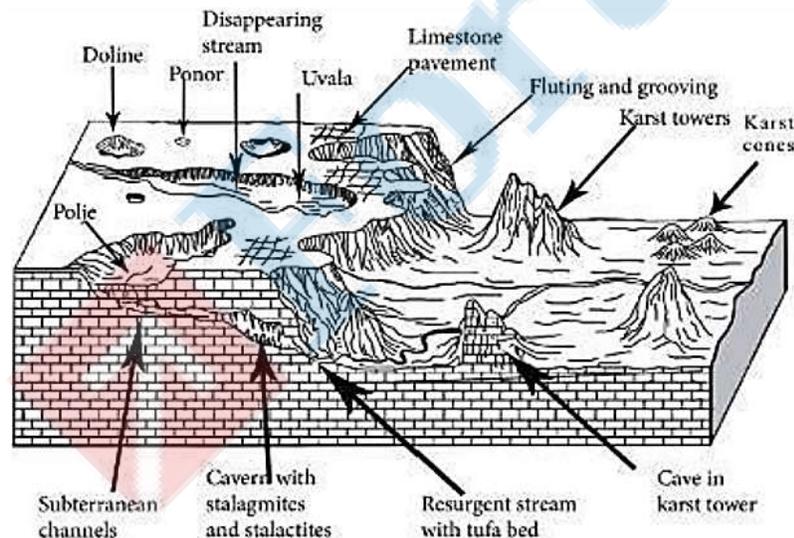

Q.28) The Kentucky region of the United States, the Yucatan peninsula of Mexico and the Cockpit country of Jamaica are well known for which of the following topographic features?

- Karst landforms
- Loess formations
- Mesas and buttes topography
- Ox bow lake formations

Ans) a

Exp) Option a is the correct answer.

Karst Topography is the formation of landforms due to solution and deposition on any limestone or dolomitic region by the action of groundwater or surface water. It is a type of landscape where the dissolving of the bedrock has created sinkholes, sinking streams, caves, springs, and other characteristic features.

The most characteristic stretch of limestone occurs in north-west Yugoslavia. Other regions include: the Causses district of southern France, the Pennines of Britain, Yorkshire and Derbyshire in particular, **the Kentucky region of the United States, the Yucatan Peninsula of Mexico, the Cockpit Country of Jamaica, and the limestone hills of Perlis.**

Source: Certificate Physical and Human Geography, G C Leong, pg. 64

Q.29) This is an important landform of river which provides valuable flood control and erosion protection services. It also helps to direct the flow of the river. It is formed parallel to a river channel due to repeated flooding events. It is composed of coarser material such as gravel and sand.

Which of the following landforms has been described in the passage above?

- Monadnocks
- Penplain
- Natural levees
- Rapids

Ans) c

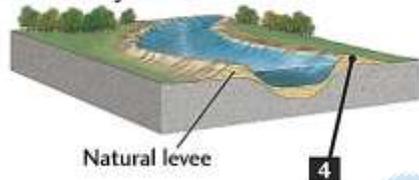

Exp) option c is the correct answer.

Option a is incorrect. **Monadnock** is an isolated hill of bedrock standing conspicuously above the general level of the surrounding area. Monadnocks are left as erosional remnants because of their more resistant rock composition.

Option b is incorrect. **Peneplains** represent low **featureless plain** having undulating surface and remnants of convexo-concave residual hills. These are, in fact, the end products of the normal cycle of erosion. It refers to an undulating featureless plain punctuated with low-lying residual hills of resistant rocks. It is considered to be an end product of an erosional cycle.

Option c is correct. Natural levees are embankments formed naturally after a river floods and recede. Friction with the floodplain during a flood causes a decrease in the velocity of the river leading to the deposit of the material that the flood water is carrying. The deposits in natural levees contain **mud, sand, and stones** and are formed such that they slope away from either side of the river or flood plain. Levees also **direct the flow of the river.**

After many floods

Option d is incorrect. Rapids are areas of shallow, fast-flowing water in a stream. Rapids tend to form in younger streams, with water flow that is straighter and faster than in older streams. Softer rocks in the streambed erode, or wear away, faster than harder rocks.

Source: NCERT 11th

Q.30) Consider the following statements regarding the Sovereign Green Bond Framework of India:

- The Framework applies to all Sovereign Green Bonds issued by Government of India.
- The Department of Economic Affairs of the Ministry of Finance reserves the right to modify this Framework.
- The framework is designed to comply with recommendations of the Green Bond Principles of International Capital Market Association.
- As per the provisions of the framework, Green Finance Working Committee was constituted.

Which of the statements given above are correct?

- 1, 2 and 3 only
- 1, 2 and 4 only
- 3 and 4 only
- 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

The Union Budget 2022-23 announced the issuance of Sovereign Green Bonds. As a part of the government's overall market borrowings in 2022-23, sovereign Green Bonds will be issued for mobilizing resources for green infrastructure. The proceeds will be deployed in public sector projects which help in reducing the carbon intensity of the economy.

Statement 1 is correct: Green Bond Framework sets forth the obligations of the Government of India as a Green Bond issuer. **The Framework applies to all sovereign Green Bonds issued by the Government of India.**

Statement 2 is correct: Department of Economic Affairs, Ministry of Finance reserves the right to modify **this Framework** according to international best practices or in accordance with the Government of India's international commitments and environmental priorities. Changes to the Framework will be reviewed by an independent provider.

Statement 3 is correct: The framework is designed to comply with four components and key recommendations of the International Capital Market Association (ICMA) Green Bond Principles (2021). These principles recommend delineation of a clear process and disclosure by the issuer to enable the investors and banks and others to understand the characteristics of the green bond. The four core components as outlined by ICMA green bond principles are: i. Use of proceeds; ii. Project evaluation and selection; iii. Management of proceeds; and iv. Reporting.

Statement 4 is correct: Green Finance Working Committee (GFWC) has been established to oversee and validate key decisions on issuance of Sovereign green bonds under the Chairmanship of Chief Economic Adviser, Government of India.

Source: <https://pib.gov.in/PressReleasePage.aspx?PRID=1874788>

<https://dea.gov.in/sites/default/files/Framework%20for%20Sovereign%20Green%20Bonds.pdf>

Q.31) Which of the following statements is/are correct about River Rejuvenation?

1. River rejuvenation can lead to the formation of waterfalls and incised meanders.
2. The point where the old and rejuvenated profile of river meet is called Knick point.

Select the correct answer using the codes below:

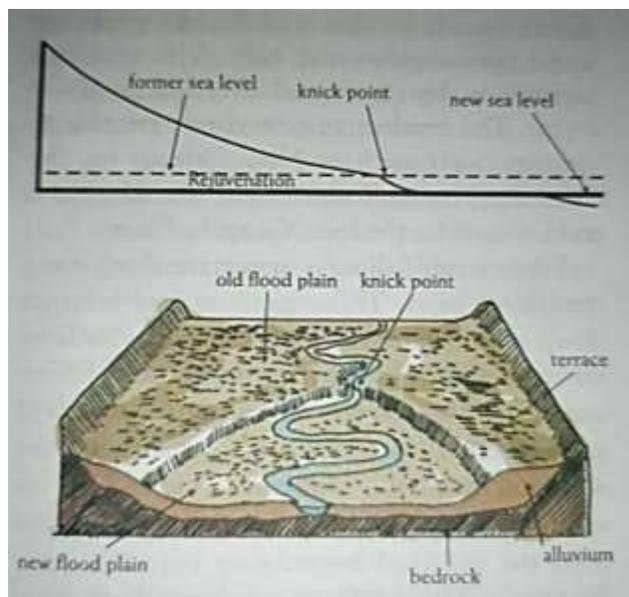

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) option c is the correct answer.

Statement 1 is correct: River rejuvenation can lead to a number of changes in landscape. **These include the formation of waterfalls and rapids, Knick points, river terraces and incised meanders.** Rejuvenated terrains usually have complex landscapes because remnants of older landforms are locally preserved. Parts of floodplains may be preserved as terraces alongside the down-cutting stream channels.

Statement 2 is correct: A Knick point is a point where the old and rejuvenated profile of river is met. It is also known as rejuvenated head. It is a point on the river's course where there is a change in the gradient of the river profile. **An example of a visible knick point would be a waterfall.** However, some Knick points can be concealed in the landscape.

Source: NCERT

Q.32) Which of the following landforms can be considered as depositional landforms formed by glaciers?

1. Esker
2. Drumlin
3. Aretes
4. Cirque

Select the correct answer using the codes below:

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 4 only

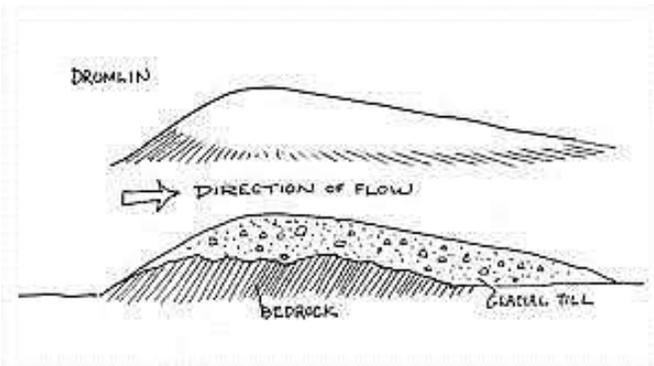

Ans) a

Exp) option a is the correct answer.

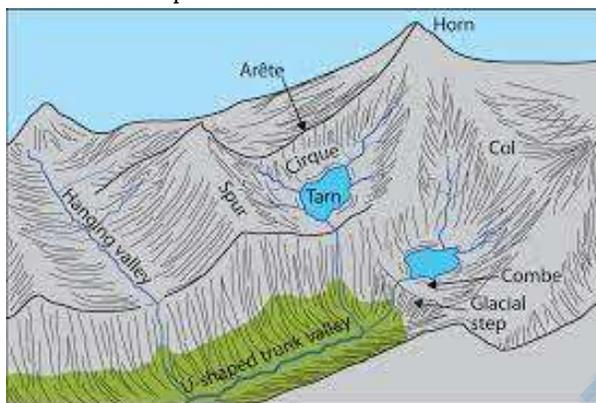

A depositional landform is a **landform that is created from glacial deposits**. This is when a glacier carries some sediment, which is then placed (deposited) somewhere else. This could be a large group of glacial sediment or a single significant material.

Option 1 is correct: Esker refers to **Winding ridge of un-assorted depositions of rock, gravel, clay etc.** running along a glacier in a till plain. The eskers resemble the features of an embankment and are often used for making roads. It is a type of depositional feature of glacial.

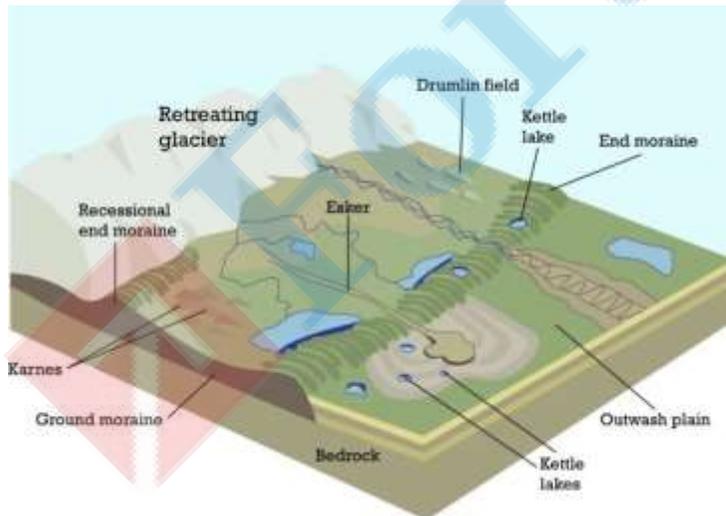

Option 2 is correct: **Drumlin have been formed by the streamlined movement of glacial ice sheets across rock debris, or till. It looks like an Inverted boat-shaped** deposition in a till plain. These are mainly depositional features of glaciers.

Option 3 is incorrect: When the divide between two cirque walls gets narrow because of progressive erosions, it results in the formation of a saw-toothed ridge called **Arête**. They are formed by **headward erosion** of cirque wall.

Option 4 is incorrect: Cirque is Hollow basin cut into a mountain ridge. It has steep sided slope on three sides, an open end on one side and a flat bottom. When the ice melts, the cirque may develop into a tarn lake. It is an **erosional landform**.

Source: NCERT

Q.33) Consider the following statements regarding the Moraines:

1. It is formed by the deposition of unsorted glacial debris including gravel, sand and clay.
2. Moraines can be used to reconstruct the history of a glacier including its shape and size.

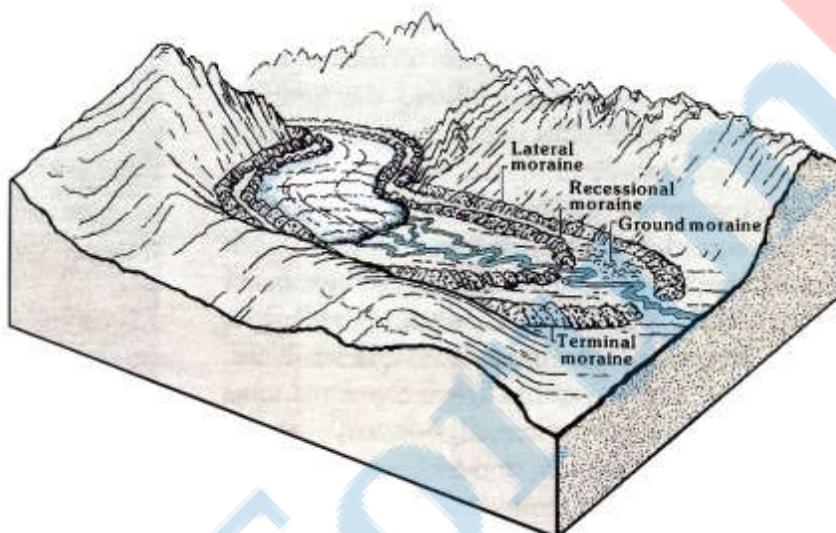

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) option c is the correct answer.

Statement 1 is correct: Moraines are glacial landforms formed by the deposition of glacial sediments that accumulate along the edges and at the terminus of a glacier. Moraines are typically composed of **unsorted glacial debris including rocks, boulders, gravel, sand, and clay**. These landforms are important indicators of past glacial activity and can be used to reconstruct the history of a glacier, including its size, shape, direction of movement, and the timing of its advance and retreat.

Statement 2 is correct: By studying the characteristics of moraines, scientists **can reconstruct the history of a glacier, including its size, shape, direction of movement**, and the timing of its advance and retreat. **For example**, the location of a terminal moraine can provide an estimate of the maximum extent of the glacier during its last advance, while the size and shape of lateral moraines can provide information about the width and direction of the glacier's movement.

Source: GC leong

Q.34) Which of the following statements are the correct reason for Narmada and Tapi rivers not forming deltas?

1. Both rivers follow a very steep gradient
2. Both rivers have strong flow of water.
3. Both rivers flow through rocky topography.
4. Both rivers have large numbers of tributaries.

Select the correct answer using the code given below.

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) a

Exp) option a is the correct answer.

Option 1, 2 and 3 are correct. The Narmada and Tapi rivers do not form deltas due to the **steep gradient** and **strong flow** of the rivers, which prevents sediment accumulation at their mouths, and the **rocky and uneven topography of the region**. Further they meet the Arabian Sea, where rivers create estuaries.

Option 4 is incorrect: This option is incorrect as large number of tributaries **increases the volume of water** which helps eroding and formation of sediments. This eventually is helpful in the formation of the delta.

Source: NCERT & G C LEONG

Q.35) Which of the following are the features of the Bharat Gaurav Scheme?

1. An operator can take trains on lease from Indian railways to run on a theme-based circuit.
2. Indian railways will get fixed 30% of the generated revenue in a financial year.
3. Mandatory insurance of the tourists shall be the liability of the service provider and not the Indian railways.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Bharat Gaurav policy, launched in 2021, allows private players to operate trains on theme-based circuits.

Option 1 is correct: According to the Bharat Gaurav policy, **any operator or service provider, or virtually anyone, can lease trains from Indian Railways** to run on a theme-based circuit as a special tourism package. The operator has the **freedom to decide the route, the halts, the services provided**, and, most importantly, the tariff.

Option 2 is incorrect: Under the Bharat Gaurav scheme, the **Railways will get revenue in the form of right to use charges for the rakes; haulage charges; empty haulage charges and stabling charges. There are not any provisions for fix 30% revenue.**

Option 3 is correct: Mandatory insurance of the tourists shall be the **liability of the service provider and the Railways shall bear no liability** in this regard. All liability arising out of accident/untoward incident will be borne by the Indian Railways based on Accident Inquiry Report.

Knowledge Base:

Other features of the Bharat Gaurav Scheme:

- 1) The tenure of the arrangement is a **minimum of two years** and maximum of the codal life of the coach.
- 2) The Bharat Gaurav operator will also have to propose a similar business model wherein it takes care of **local transport, sightseeing, food, local stays**, etc. along with operating the trains.

- 3) The operator has to, however, take care of end-to-end, comprehensive service like hotel stay, local arrangements, etc. These trains **cannot be used as ordinary transport trains** between an origin and destination.
- 4) Indian **railways will provide staff** to drive the trains, guards and also maintenance staff on board for the coaches. Other staff, like housekeeping and catering, etc, will be deployed by the operator.

Source: <https://indianexpress.com/article/explained/explained-bharat-gaurav-train-indian-railways-7973371/>

<https://www.thehindubusinessline.com/blexplainer/why-indian-railways-bharat-gaurav-scheme-is-significant/article65548423.ece>

Q.36) Xerophytes are predominantly and most likely to be found in which of the following climate types?

- Tropical rainforest
- Temperate oceanic climate
- Continental climate
- Dry desert Climate

Ans) d

Exp) Option d is the correct answer.

Xerophytes are a group of plants that have **evolved adaptations to survive in deserts where dry or arid environments exist with little available water**. They are able to thrive in these harsh conditions due to a variety of physical and physiological adaptations, **such as water-storing stems, deep roots to access underground water sources, and specialized leaf structures** that reduce water loss through transpiration. Xerophytes are most likely to be found in desert environments, where rainfall is low and temperatures can be extreme. Examples of **desert xerophytes include cacti, agaves, and yuccas**. Some xerophytes also live in other types of dry environments, such as grasslands or rocky outcrops. The reason xerophytes are predominant in these environments is due to their adaptations to cope with the lack of water.

<https://ncert.nic.in/pdf/publication/sciencelaboratorymanuals/classXII/biology/lelm212.pdf>

Q.37) Consider the following statements:

- The rate of decrease of temperature of oceans with depths is lower at the equator than at the poles.
- The winds blowing from the land towards the ocean helps in upwelling of cold water at coast.
- The enclosed seas in the high latitudes record relatively higher temperatures than the open seas.

Which of the statements given below is/are correct?

- 1 and 2 only
- 2 only
- 1 and 3 only
- 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. The rate of decrease of temperature with depths **is greater at the equator** than at the poles. **Though the surface temperature of the seas decreases from equator towards the poles but the temperature at the ocean bottoms is uniform from the equator towards the pole, which means that the rate of decrease of temperature with increasing depth is more rapid near the equator than towards the poles.**

SFG 2023 | LEVEL 2 | Test #29 – Solutions | 

Statement 2 is correct. The winds blowing from the land towards the oceans drive warm surface water away from the coast resulting in the upwelling of cold water from below.

Statement 3 is incorrect. The enclosed seas in the low latitudes record relatively higher temperatures than the open seas. Whereas the enclosed seas in the high latitudes have lower temperatures than the open seas.

Source: <https://ncert.nic.in/ncerts/l/kegy213.pdf>

Q.38) Consider the following pairs:

Karst Landform	Description
1. Sinkhole	Topographic depression formed due to dissolution of underlying limestone.
2. Stalactites	An upward-growing mound of mineral deposits precipitated from water dripping onto the floor of a cave.
3. Polje	Numerous needle-shaped dripstones hanging from the cave ceiling.

How many of the above given pairs are correctly matched?

- Only one pair
- Only two pairs
- All the three pairs
- None of the pairs

Ans) a

Exp) Option a is the correct answer.

Karst is a type of topography that features landforms produced by the dissolution of soluble rocks like limestone, gypsum, and dolomite.

Pair 1 is correct: Sinkhole, also called sink or doline is a topographic depression formed when underlying limestone bedrock is dissolved by groundwater. It is considered the most-fundamental structure of karst topography. Sinkholes vary greatly in area and depth and may be very large. There are two main varieties, one caused by the collapse of the roof of a cavern, the other by the gradual dissolving of rock under a soil mantle.

Pair 2 is incorrect: A stalactite is an icicle-shaped formation that hangs from the ceiling of a cave and is produced by precipitation of minerals from water dripping through the cave ceiling. Most stalactites have pointed tips. **A stalagmite is an upward-growing mound of mineral deposits that have precipitated from water dripping onto the floor of a cave. Most stalagmites have rounded or flattened tips.**

Pair 3 is incorrect: Polje is an elongated basin having a flat floor and steep walls. It is formed by the coalescence of several sinkholes. The basins often cover 250 square km (about 100 square miles) and may expose “disappearing streams.” Numerous needle-shaped dripstones hanging from the cave ceiling are called Drapes or Curtains.

Source: <https://www.worldatlas.com/articles/the-different-types-of-karst-landforms.html>

<https://education.nationalgeographic.org/resource/karst/>

<https://www.britannica.com/science/polje>

<https://oceanexplorer.noaa.gov/facts/stalactite.html>

Q.39) The Subsidence Theory and the Glacial Control Theory are related to:

- Formation of mantle plume
- Formation of coral reefs and atolls
- Chronological sequencing of fossils
- Direction of Gyre circulations

Ans) b

Exp) Option b is the correct answer.

Subsidence theory and Glacial control theory are related to the formation of coral reefs and atolls. The subsidence theory was postulated by Charles Darwin in 1837 and modified in 1842. According to this theory, **fringing reefs, barrier reefs, and atolls are successive stages of coral reef development** due to the **gradual subsidence of land**. Glacial control theory was proposed by Reginald Aldworth Daly. According to this theory, fluctuations of sea level during the building up and melting down of glaciers during the Pleistocene Epoch played a **major role in allowing coral to slowly build up structures**.

Source : <https://www.britannica.com/science/glacial-control-theory>

<https://www.britannica.com/science/Darwinian-subsidence-theory>

Q.40) Consider the following statements regarding the report ‘Poverty and Shared Prosperity 2022’:

- The report was released by the International Monetary Fund (IMF).
- The report stated that the world is on track to end extreme poverty by 2030.
- The data on India was based on studies conducted by private organisation ‘Centre for Monitoring Indian Economy’.

Which of the statements given above is/are correct?

- 3 only
- 2 and 3 only
- 2 only
- 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

The latest Poverty and Shared Prosperity report offers the first comprehensive look at the global landscape of poverty in the aftermath of COVID-19 and the war in Ukraine. It outlines the limits of current fiscal policies for poverty reduction in low and lower-middle income economies, and points to the importance of reviving economic growth. It also shows the potential of fiscal policy reforms to help reduce poverty and support broad-based growth and development.

Statements 1 and 2 are incorrect: The World Bank has released the report ‘Poverty and Shared Prosperity 2022: Correcting Course’. By 2015, the global extreme-poverty rate had been cut by more than half. Since then, poverty reduction has slowed in tandem with subdued global economic growth. The economic upheavals brought on by COVID-19 and later the war in Ukraine produced an outright reversal in progress. **It became clear that the global goal of ending extreme poverty by 2030 would not be achieved.** In 2020 alone, the number of people living below the extreme poverty line rose by over 70 mn. That is the largest one-year increase since global poverty monitoring began in 1990.

Statements 3 is correct: The World Bank report publishes global and regional estimates based on new data for India available for 2015–19. The source of the data is the Consumer Pyramids Household Survey (CPHS), conducted by the Centre for Monitoring Indian Economy, a private data company. India has not published official survey data on poverty since 2011. According to CPHS data for 2020, 5.6 crore Indians slipped into poverty in 2020.

Source: <https://openknowledge.worldbank.org/bitstream/handle/10986/37739/9781464818936ov.pdf>

Q.41) Consider the following statements regarding the Tropical Marine Climate:

1. It is experienced only along the western coast of tropical lands.
2. The rainfall here is both orographic as well as convectional.
3. It usually experiences rainfall every month of the year.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) option c is the correct answer.

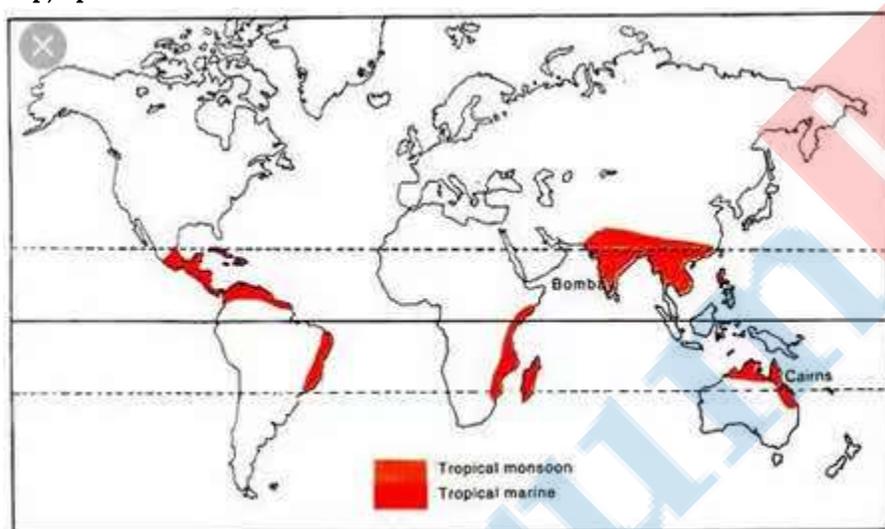

Fig. 124 The tropical monsoon and marine regions

Statement 1 is incorrect: This type of climate is experienced **along the eastern coasts of tropical lands**, receiving steady rainfall from the Trade Winds all through the year.

Statement 2 is correct: The rainfall is **both orographic** where the moist trades meet upland masses as in eastern Brazil, **and convectional** due to intense heating during the day and in summer.

Statement 3 is correct: Rainfall tendency is towards a summer maximum as in monsoon lands, but without any distinct dry period. Approximately 70 percent of the annual rainfall is concentrated in the summer months. There is **no month without any rainfall**.

Source: G C Leong chapter 16

Q.42) Which of the following options is the correct description of the geographical feature named 'Playas'?

- a) These are depressions formed due to the impact of extra-terrestrial objects.
- b) These are depressions occur in the limestone regions where the bedrock contains water-soluble materials like gypsum.
- c) These are flat-bottomed depressions found in interior desert basins.
- d) These are glacial depressions filled with water from melted glacier.

Ans) c

Exp) Option c is the correct answer.

Lakes are large waterbodies that are surrounded by land and generally occupy inland basins. Usually, they have standing water unless any river or other outlet serves to feed or drain them. Lakes are usually bigger than ponds, and distinct from lagoons by the fact that lagoons are connected to oceans, while lakes are not.

Option a is incorrect: Meteorite Lakes are formed in craters on the earth's surface due to the impact of extraterrestrial objects like asteroids or meteorites. Over time, water accumulates in these craters, and lakes appear. So, they are often referred to as extraterrestrial impact lakes or crater lakes. Sediments obtained from the bottom of these lakes often carry useful information on extraterrestrial or cosmic objects. **Examples: Lonar Lake in India.**

Option b is incorrect: Solution lakes occur in the basins where the bedrock contains water-soluble materials like limestone, gypsum, and dolomite. The bedrocks are dissolved by rainfall and percolation of water, thus producing cavities that are eventually filled by rainfall, giving birth to a solution lake.

Examples: Dalmatian coast of Croatia and Florida.

Option c is correct: Playa, also called dry lake, are **flat-bottom depressions found in interior desert basins** and adjacent to coasts within arid and semiarid regions. They are periodically covered by water that slowly filtrates into the ground water system or evaporates into the atmosphere. It causes the deposition of salt, sand, and mud along the bottom and around the edges of the depression. It is a dry, vegetation-free, flat area at the lowest part of an undrained desert basin. It is a location where ephemeral lakes form during wet periods, and is underlain by stratified clay, silt, and sand, and commonly, soluble salts. **Example:** Lake Eyre in Australia, Lake Chad in central Africa, **Sambhar Lake in India.**

Option d is incorrect: Glacial lakes are formed from a melted glacier. As glaciers flow down, the erosive action of the glaciers often creates natural depressions in the bedrock below the glaciers. Once the ice in these depressions' melts, glacial lakes are created. Glacial lakes are quite common and most of North America's and Europe's lakes have a glacial origin. The Great Lakes of North America and **South Lhonak Lake, Roop Kund and Kedartaal in India.**

Source: <https://pubs.usgs.gov/of/2004/1007/playas.html>

<https://www.britannica.com/science/playa>

<https://www.worldatlas.com/articles/how-many-types-of-lakes-are-there-on-the-basis-of-origin.html>

Q.43) With reference to the Ekman Spiral, consider the following statements:

1. It is the result of Coriolis force on the movement of surface water.
2. In Ekman spiral, each deeper layer moves more slowly than the layer above it.
3. Due to Ekman spiral, net waterflow in oceans is at 90 degrees of the wind direction.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

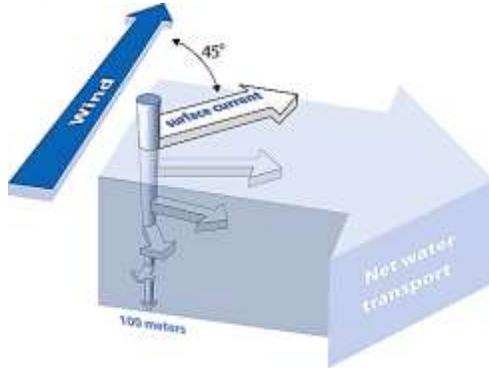

Ans) d

Exp) option d is the correct answer.

Statement 1 is correct. Ekman Spiral is the result of **Coriolis force on the movement of surface water**. The wind-stress moves the uppermost layer of water. This layer, in turn, drags the layer below it. Each deeper layer moves more slowly than the layer above it until the movement ceases at a depth of about 100 meters.

Statement 2 is correct. In Ekman spiral each layer of water molecules is moved by friction from the shallower layer, and **each deeper layer moves more slowly than the layer above it**, until the movement ceases at a depth of about 100 meters (330 feet).

Statement 3 is correct. All layers of water are deflected by Coriolis force to the right in the Northern Hemisphere and to the left in the Southern Hemisphere. As a result, each successive layer moves 45 deg. to the direction of drag force being applied. This creates a **twisting effect** creating the spiral. The spiral is known as **Ekman Spiral**. The average movement of oceanic water (of all the layers) comes out to be **90 degrees** to the direction of the surface wind.

Source: https://oceanservice.noaa.gov/education/tutorial_currents/media/supp_cur04e.html

Q.44) Consider the following statements regarding the impact of Downwelling of Ocean Currents:

1. Regions of downwelling generally have low biological productivity.
2. Ekman transport plays an important role in the downwelling of ocean currents.
3. Due to downwelling, hydrogen sulfide is produced at the bottom of ocean in huge quantity.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

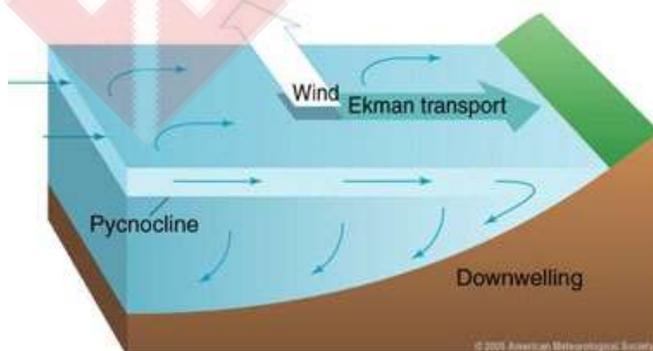

Ans) a

Exp) option a is the correct answer.

Downwelling is where surface water is forced downwards, where it may deliver oxygen to deeper water.

Statement 1 is correct: Regions of downwelling have **low productivity** because the nutrients get used up and are not continuously resupplied by the cold, nutrient-rich water from below the surface. Downwelling reduces biological productivity and transports heat, dissolved materials, and surface waters rich in dissolved oxygen to greater depths.

Statement 2 is correct: Ekman transport **helps in both upwelling and downwelling of water** in oceans. Where Ekman transport moves surface waters toward the coast, the water piles up and sinks in the process known as coastal downwelling. This example is from the Northern Hemisphere.

Statement 3 is incorrect: This is **not the impact of Downwelling** but rather what would happen if there were no Downwelling. A downwelling takes oxygen-rich surface water and flushes it through the deep sea. Without this renewal, the dissolved oxygen in bottom sediments and waters would quickly be used up by the decay of organic matter. **Anaerobic bacteria** would take over decomposition, **leading to a buildup of hydrogen sulfide**. Only a few benthic animals would survive such toxic conditions.

Source: https://oceanexplorer.noaa.gov/edu/learning/8_ocean_currents/activities/currents.html
<http://oceanmotion.org/html/background/upwelling-and-downwelling.htm>

Q.45) The term 'Doom Loop' was recently seen in the news. Which of the following statements is **incorrect** regarding 'Doom Loop'?

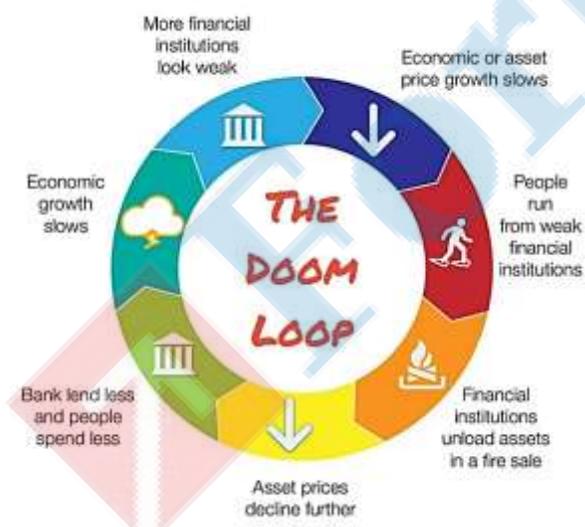

- Doom Loop is a vicious cycle in which an economic vulnerability spirals down and becomes self-reinforcing.
- The excessive government debt can never lead to an economic doom loop.
- The Doom loop can be activated by external forces such as a slowdown in global economic activity.
- Intervention in the form of a bailout is usually needed to break an economic doom loop.

Ans) b

Exp) Option b is the correct answer.

Option a, c and d are correct: Doom loop is the circle of vulnerability where a country's banking system can be severely hurt by volatility in the economy. A country is at risk of a doom loop when a shock to one part of its economic system is amplified by its effect on another. **It is a vicious cycle in which a vulnerability spirals down and becomes self-reinforcing. The Doom loop can also be activated by external forces such as a slowdown in global economic activity. Intervention in the form of a bailout is usually needed to break a doom loop.**

Option b is incorrect: Excess government debt can trigger an economic doom loop, as happened in Greece in 2010.

Source: <https://www.investopedia.com/doom-loop-6748009#:~:text=A%20doom%20loop%20describes%20a,downward%20trend%20becomes%20self%20reinforcing.>

Q.46) Which of the following is/are Tropical Grasslands found around the world?

1. Llanos
2. Campos
3. Pustaz
4. Pampas
5. Prairies

Select the correct answer using the code given below.

- a) 1 and 2 only
- b) 1, 2, 3 and 5 only
- c) 1, 2 and 4 only
- d) 2 and 4 only

Ans) a

Exp) option a is the correct answer.

Tropical grasslands include the hot savannas of sub-Saharan Africa and northern Australia. Rainfall can vary across grasslands from season to season and year to year, ranging from 10 to 40 inches annually.

The Savanna or Sudan Climate or Tropical Grasslands is a transitional type of climate found between the equatorial forests and the trade wind hot deserts.

Option 1 and 2 are correct: Llanos and Campos are tropical grasslands. In South America, there are two distinct regions of savanna north and south of the equator, namely the *llanos* of the Orinoco basin and the *campos* of the Brazilian Highlands.

Option 3 is incorrect: Pustaz is a temperate grassland biome of the Great Hungarian Plain. The Pustaz landscape is composed of treeless plains, saline steppes and salt lakes, and includes scattered sand dunes, low, wet forests and freshwater marshes along the floodplains of the ancient rivers.

Option 4 and 5 are incorrect: The South American pampas and prairies of North America are example of temperate grasslands (not tropical grassland).

Source: GC Leong

Q.47) Consider the following statements with reference to the effects of ocean currents:

1. Cold Ocean currents result in desert formation in west coast regions of the tropical continents.
2. North Atlantic Drift keeps the coasts of the North Sea warm.
3. The mixing of warm and cold currents favors the growth of plankton.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Ocean currents have a number of direct and indirect influences on human activities -

- 1) West coasts of the continents in tropical and subtropical latitudes are bordered by cool waters. **Cold ocean currents have a direct effect on desert formation in west coast regions of the tropical and subtropical continents.**
- 2) Warm ocean currents bring rain to coastal areas and even interiors. Example: The **North Atlantic Drift keeps the coasts of the North Sea warm** which is unusual for such high latitudes.
- 3) Warm currents flow parallel to the east coasts of the continents in tropical and subtropical latitudes. This results in warm and rainy climates. These areas lie in the western margins of the subtropical anti-cyclones.
- 4) They are responsible for moderate temperatures at coasts. Ex: **Canary cold current brings cooling effect to Spain, Portugal etc.**
- 5) The mixing of warm and cold currents helps to **replenish the oxygen and favour the growth of planktons**, the primary food for fish population.

Source: Geography, NCERT XI, Chapter-14, Pg. 120

Q.48) With reference to Estuaries, consider the following statements:

1. Estuaries are among the lowest productive zones in the world and are the least populated.
2. Estuaries are the ecotone zones where the freshwater mixes with the salt water.

Which of the above-mentioned statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

An Estuary is a semi enclosed coastal body of water with one or more rivers or streams flowing into it. Features of estuaries are:

Statement 1 is incorrect - Estuarine environments are among the most productive on earth, creating more organic matter each year than comparably sized areas of forest, grassland or agricultural land. The sheltered waters of estuaries also support unique communities of plants and animals specially adapted for life at the margin of the sea. Thousands of species of birds, mammals, fish and other wildlife depend on estuarine habitats as places to live, feed and reproduce. And many marine organisms, including most commercially important species of fish, depend on estuaries at some point during their development.

Statement 2 is correct - An estuary is a partially enclosed body of water along the coast where freshwater from rivers and streams meets and mixes with salt water from the ocean. It is an ecotone zone between river environments and maritime environments. Estuaries and the lands surrounding them are places of transition from land to sea and freshwater to salt water.

Source: NCERT – Class XI – Oceans

Q.49) This type of vegetation features short grasses with very few trees. It has hot summers and cold winters and is found in parts of Eurasia. The type of vegetation refers to-

- a) Tropical Savannah
- b) Cold Dessert
- c) Boreal forest
- d) Temperate Steppe

Ans) d

Exp) Option d is the correct answer.

Temperate Steppe Grassland are found in the parts of Eurasia and North America. It experiences hot summers and cold winters with the rainfall of 500-900 mm. It has thin flocculated soil, rich in bases. With respect to flora and fauna, it has **grasses and occasional trees** such as cottonwoods, oaks and willows; gazelles, zebras, rhinoceros, wild horses, lions, varieties of birds, worms, snakes etc., are common animals.

Temperate Steppe

Option a is incorrect. The **Tropical Savannahs** are practically treeless and the grasses are taller as compared to temperate steppe. Large regions of tropical savanna extend through the nations of Botswana, Namibia, and Kenya in Africa, southern Brazil, India, and Australia.

Option b is incorrect. In **cold dessert**, few plants survive. The greatest inhibiting factor is the region's deficiency in heat. There are no trees in the tundra. Such an environment can support only the lowest form of vegetation, mosses, lichens and sedges.

Option c is incorrect. The **taiga**, which is also known as the boreal forest region, occupies about 17 percent of Earth's land surface area in a circumpolar belt of the far Northern Hemisphere. The taiga is characterized predominantly by a limited number of conifer species of pine. Plants and animals in the taiga are adapted to short growing seasons of long days that vary from cool to warm.

Source: NCERT 11th Chapter 15 Life on Earth

Q.50) Consider the following statements with respect to the Sovereign Gold Bond Scheme:

1. The gold bonds can be sold only through small finance banks and Payment Banks.
2. The bonds cannot be issued to trusts or charitable institutions.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

Sovereign Gold Bonds (SGBs) are government securities denominated in grams of gold. They are substitutes for holding physical gold. Investors have to pay the issue price in cash and the bonds will be redeemed in cash on maturity.

Statement 1 is incorrect: The Sovereign Gold Bonds (SGBs) will be sold through **Scheduled Commercial banks (except Small Finance Banks and Payment Banks)**, Stock Holding Corporation of India Limited (SHCIL), Clearing Corporation of India Limited (CCIL), **designated post offices, and recognised stock exchanges** viz., National Stock Exchange of India Limited and Bombay Stock Exchange Limited.

Statement 2 is incorrect: The SGBs can be issued/sold to **resident individuals, HUFs, Trusts, Universities and Charitable Institutions.**

Knowledge Base:

Sovereign Gold Bond Scheme 2022-23

- 1) To be **issued by Reserve Bank** of India on behalf of the Government of India.
- 2) The SGBs will be denominated in multiples of gram(s) of gold with a **basic unit of one gram.**
- 3) The tenor of the SGB will be for a **period of eight years** with an option of **premature redemption after 5th year** to be exercised on the date on which interest is payable.
- 4) Minimum permissible investment will be **One gram** of gold.
- 5) The **maximum limit** of subscription shall be **4 KG for individual**, 4 Kg for HUF and **20 Kg for trusts** and similar entities per fiscal year (April-March) notified by the Government from time to time.

Source: <https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1834549>

<https://www.rbi.org.in/Scripts/FAQView.aspx?Id=109>

Q.1) Consider the following statements with reference to the ‘Atlantic Meridional Overturning Circulation (AMOC)’:

1. It is the movement of ocean water driven by differences in densities.
2. It carries warm surface waters from the tropics to northward in the Atlantic Ocean.
3. The melting of ice shelves in the Arctic has caused the AMOC to strengthen.
4. The weakening of the AMOC can result in droughts across Europe.

Which of the statements given above are correct?

- a) 1, 2, and 3 only
- b) 1, 2, and 4 only
- c) 2 and 4 only
- d) 1, 3, and 4 only

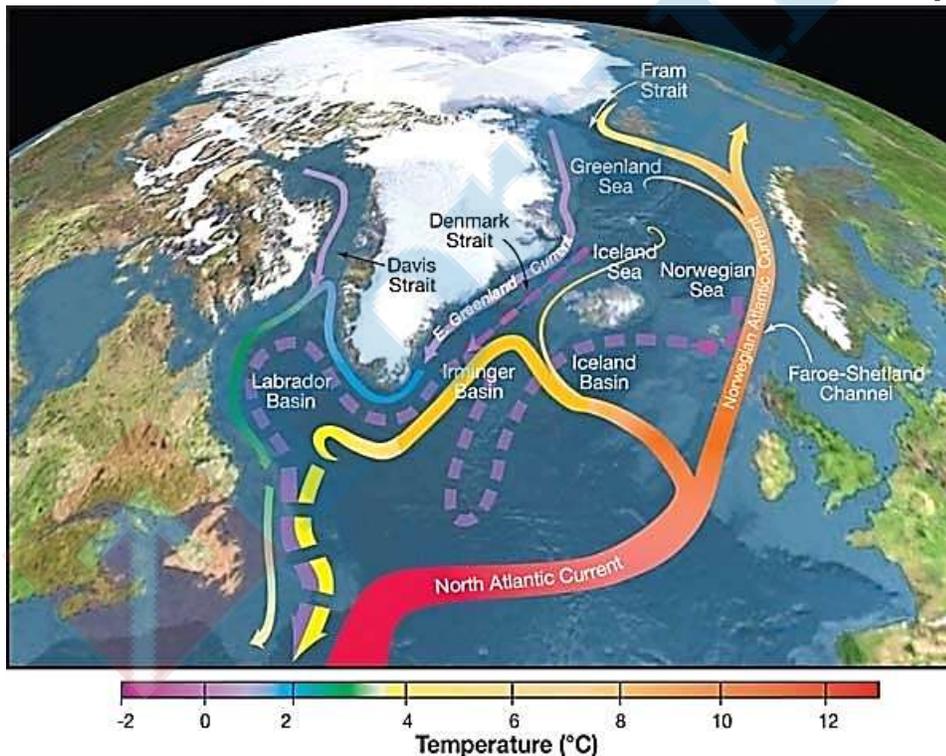

Ans) b

Exp) Option b is the correct answer.

Atlantic Meridional Overturning Circulation (AMOC) is a part of the global ocean conveyor belt (THC) that works to distribute nutrients and heat all over the globe.

Statement 1 is correct: Atlantic Meridional Overturning Circulation (AMOC) is a Thermo-Haline circulation (THC) -i.e., **movement of ocean water driven by differences in densities due to salinity and temperature**, in the Atlantic Ocean.

Statement 2 is correct: AMOC carries **warm surface waters from the tropics northwards in Atlantic Ocean**, where it cools and sinks. It then returns to the tropics and then to the South Atlantic as a bottom current. From there it is distributed to all ocean basins via the Antarctic circumpolar current.

Statement 3 is incorrect: IPCC's Assessment Report 6 (AR6) as well as recent papers in Nature Climate Change, indicate that **due to anthropogenic climate change, the AMOC is slowing down** to unprecedented levels in a millennium. Global warming is causing **melting** of even the deepest and most untouched **ice shelves in the Arctic** from an area called “The Last Ice Area”. The freshwater from the melting ice **reduces**

the salinity and density of the water. Now, the water is unable to sink as it used to, and **this weakens the AMOC flow.**

Statement 4 is correct: The **weakening** of the Atlantic Meridional Overturning Circulation (AMOC) could result in more storms in the UK, more **intense winters and an increase in damaging heatwaves and droughts across Europe.**

Source: <https://www.theguardian.com/environment/2021/feb/25/atlantic-ocean-circulation-at-weakest-in-a-millennium-say-scientists>

<https://www.the-scientist.com/news-opinion/atlantic-circulation-weakest-in-more-than-a-millennium-study-68497>

<https://indianexpress.com/article/explained/explained-atlantic-ocean-current-system-slowng-implications-7445388/>

Q.2) Consider the following statements regarding the Ionosphere, present in the atmosphere:

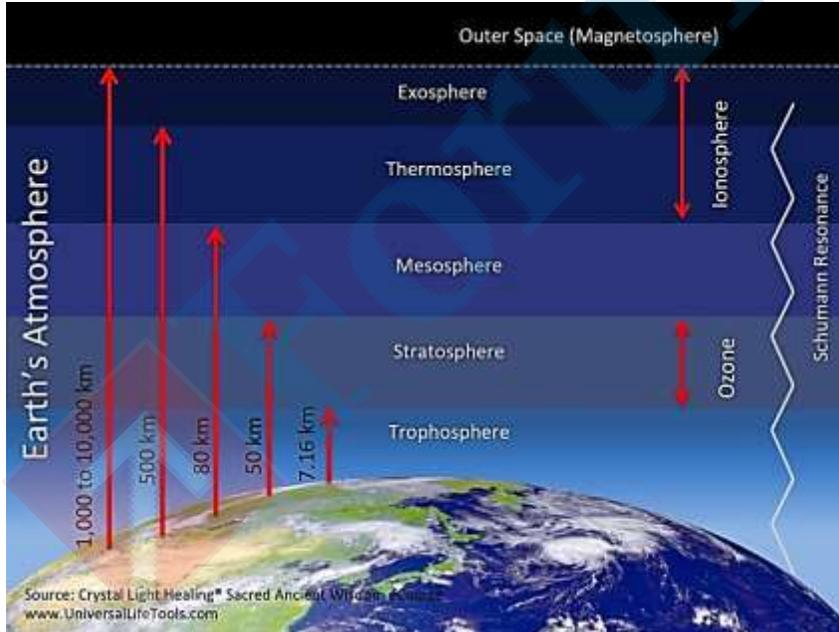

1. Many of the low-Earth orbiting satellites are located in the ionosphere.
2. In this layer, the temperature starts decreasing with increasing height.
3. Radio waves transmitted from the Earth are reflected back to the Earth by this layer of atmosphere.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct option.

Statement 1 is correct. The ionosphere is home to many low-Earth orbiting satellites, including the International Space Station. It also acts as a conduit for many of our communications signals, such as radio waves and the signals that make GPS systems work. Particles in the ionosphere carry electrical charges that can disrupt communications signals, induce electrical charge in low-Earth orbiting satellites, and, in extreme cases, spark power outages on the ground. Unpredicted changes in the ionosphere, such as ripples and bubbles of dense plasma, can have significant impacts on our technology and communication systems.

Statement 2 is incorrect. In the ionosphere, **temperature starts increasing with the increasing height.** The radiation from the sun is so powerful that it ionizes, or breaks electrons free from different atoms present in the atmosphere **Ionization processes release energy which heat up the upper atmosphere.** So temperature increases with height in the ionosphere region to the extent that by 150-200km, the Earth's atmosphere is extremely hot compared to surface temperatures Hence this statement is incorrect.

Statement 3 is correct. Due to the ability of ionized atmospheric gases to refract high frequency, the ionosphere can reflect and modify radio waves directed into the sky, back towards the earth which helps in communication and navigation for long distances.

Source: NCERT- Class 11th- Chapter 8th. (Page-No. 77)

Q.3) With reference to ocean currents, consider the following statements:

1. They help in the distribution of solar radiation across the Earth.
2. They can lead to the formation of fog and storms in certain regions.
3. Some of the ocean currents help in the formation of deserts.

Which of the statements given above are correct?

- a) 1 and 3 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct. Ocean currents are the in-charge of transporting heat from the Equator to the poles. As a result, it contributes to climate balance. Currents in the ocean serve as a conveyor belt. Warm water flows from the equator to the poles, whereas cold water flows from the poles to the tropics. It also aids in the distribution of solar radiation across the Earth's surface. Regional temperatures would be more extreme without ocean currents, with the equator becoming extremely hot and the poles becoming extremely cold.

Statement 2 is correct. Fog and storms are noticed at the junction of the warm and cold ocean currents due to the variety of warm and cool ocean currents as well as a change in temperature in a limited space. New Falkland and Japan are practically foggy all the time because of these factors. A violent storm can occur when warm and cold currents meet. Hurricanes that strike the United States' coast follow the line where the Gulf Stream meets the Labrador Current.

Statement 3 is correct.: Cold Ocean currents have a direct effect on desert formation in west coast regions of the tropical and subtropical continents. There is fog and most of the areas are arid due to desiccating effects (loss of moisture).

Source: NCERT- Class 11th - Chapter 13th - Page No- 115-117

Q.4) Consider the following statements:

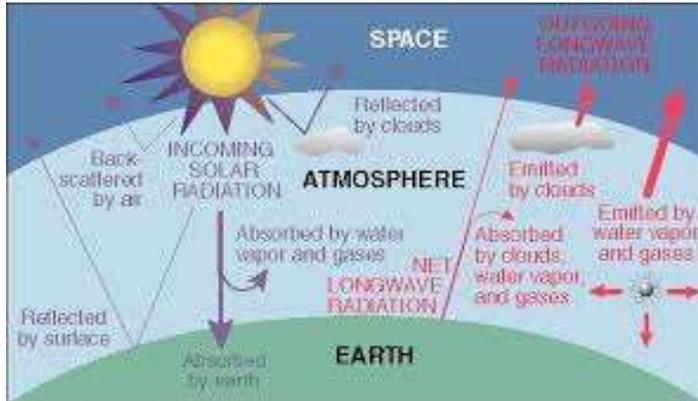

1. Earth absorbs only the long-wave radiation coming from the Sun.
2. Out of total radiation coming to Earth from the sun, more than 50% is reflected back to space by clouds.

Which of the statements given above is/are **incorrect**?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) option c is the correct answer.

Statement 1 is incorrect. Solar energy enters our atmosphere as shortwave radiation in the form of ultraviolet UV rays and visible light. Earth's surface absorbs this short-wave radiation and re-emits the energy as long-wave radiation in the form of infrared rays.

Statement 2 is incorrect. It is estimated that of the total radiation coming to us, 35% is directly reflected to space by dust, clouds and air molecules. Another 14% is absorbed by water vapor, carbon dioxide and other gases. The remaining 51% reaches the earth and warms the surface.

Although the Earth maintains a balance between insolation and terrestrial radiation, we do not see this at all latitudes. The amount of insolation in the tropical zone is greater than the amount of terrestrial radiation.

Source: G.C. Leong – Chapter- 14th (Page No- 105-106)

Q.5) Consider the following statements regarding Indian Antarctic Act, 2022:

1. The Act is applicable on a citizen of India as well as citizens of any other country.
2. According to the act, no permit is required to collect samples of mineral resources from the Antarctic for the purposes of scientific research.
3. Commercial fishing in Antarctica is allowed only after obtaining a permit from the appropriate authority.

Which of the statements given above is/ are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 only
- d) 3 only

Ans) b

Exp) Option b is the correct answer.

Recently, Indian Antarctic Act, 2022 has been passed. Its key objectives include having India's **own national measures** for protecting Antarctic environment, ensuring **de-militarization** of the region, getting rid of **mining** or illegal activities, management of growing Antarctic **tourism** and sustainable development of **fisheries**.

Statement 1 is correct: The Indian Antarctic Act, 2022 is applicable on **Indian citizens, citizens of foreign countries** and a **vessel or aircraft** registered in India or outside India. It is also applicable on a company, body corporate, corporation, partnership firm, joint venture, an association of persons or any other **entity incorporated, established or registered as such under any law in force in India**.

Statement 2 is incorrect: In general, drilling, dredging, excavating, collecting samples etc. of mineral resources is **not allowed**. However, **permission can be granted** for these activities for the purposes of

scientific research or construction, repair and maintenance of an Indian station or any other structure. Hence, a permit is required.

Statement 3 is correct. Any person who intends to go to Antarctica for the purpose of **commercial fishing shall apply for a permit** to the appropriate authority.

Other regulated and prohibited activities:

Regulated Activities- 'Permit' is required	Absolute Prohibition
1) Indian expedition to Antarctica	1) Nuclear explosion or disposal of radioactive waste material
2) Indian station in Antarctica	2) Introducing non-sterile soil
3) Permit for vessel and aircraft entering Antarctica	3) Damage, destroy or remove any historic site or monument or any of its part
4) Permit for mineral resource activities	4) Discharge of certain specified products or substances.
5) Permit for introducing non-native animals and plants into Antarctica.	5) Other specified activities
6) Permit for introducing microscopic organisms.	
7) Permit for discharge into sea.	
8) Permit for waste disposal.	
9) Permit to enter protected areas.	
10) Special permit for commercial fishing in Antarctica	
11) Other specified activities	

Knowledge Base:

Other important provisions of the Act:

- 1) **Background:** To give effect to the provisions of **Antarctic Treaty**, the **Protocol on Environment Protection (Madrid Protocol)** to the Antarctic Treaty and to the **Convention on the Conservation of Antarctic Marine Living Resources**. **India acceded to Antarctic Treaty system in 1983.**
- 2) Central Government shall establish a **Committee on Antarctic Governance and Environmental Protection**. This committee shall be chaired by the **Secretary, Ministry of Earth Sciences**.
- 3) This committee shall establish a **waste classification system and waste management plans**.

Important Facts about Antarctica

- 1) It is the southernmost continent, fifth largest in area and contains the geographic South Pole.
- 2) It is mostly uninhabited, except approximately 40 permanent stations established by several countries. **Maitri and Bharti are India's research stations** on the continent.
- 3) Native species of animals include **mites, nematodes, penguins, seals and tardigrades** etc. Vegetation occurs, mostly, in the form of **lichens and moss**.

Source:

https://prsindia.org/files/bills_acts/acts_parliament/2022/The%20Indian%20Antarctic%20Act,%202022.pdf

<https://pib.gov.in/PressReleasePage.aspx?PRID=1847047>

Q.6) Consider the following paragraph:

“When an air parcel remains over a homogenous area for a sufficiently longer time, it acquires the characteristics of the area. The homogenous area can be the vast ocean surface or vast plains. This air parcel has distinctive characteristics in terms of temperature and humidity. It is defined as a large body of air having little horizontal variation in temperature and moisture. The homogenous surfaces, over which it is formed, are called the source regions”.

About which phenomenon the above paragraph is talking about?

- a) Local winds
- b) Jet streams
- c) Fronts
- d) Air Masses

Ans) d

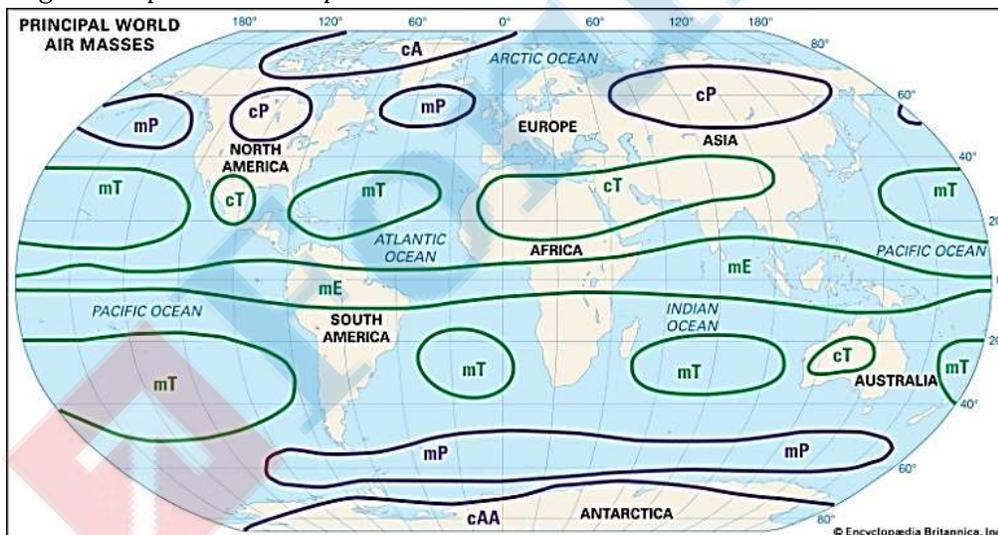

Exp) option d is the correct answer.

Option a is incorrect: Local winds - Local Winds are a natural phenomenon that can be observed in many parts of the world. It is created when air moving over a geographic feature such as a mountain or body of water is forced to rise and then falls. The high-pressure air at the top of the hill (or over the water) causes the air at the bottom to rush out and create local winds.

Option b is incorrect: The Intertropical Convergence Zone- ITCZ is the region that circles the Earth, near the equator, where the trade winds of the Northern and Southern Hemispheres come together. The intense sun and warm water of the equator heats the air in the ITCZ, raising its humidity and making it buoyant.

Option c is incorrect: - A front is a weather system that is the boundary separating two different types of large air bodies. One type of air is usually denser than the other, with different temperatures and different levels of humidity. This clashing of air types causes weather: rain, snow, cold days, hot days, and windy days.

Option d is correct: Air mass is large body of air having nearly uniform conditions of temperature and humidity at any given level of altitude. Such a mass has distinct boundaries and may extend hundreds or thousands of kilometres horizontally and sometimes as high as the top of the troposphere (about 10–18 km [6–11 miles] above the Earth's surface). An air mass forms whenever the atmosphere remains in contact with a large, relatively uniform land or sea surface for a time sufficiently long to acquire the temperature and moisture properties of that surface. The Earth's major air masses originate in polar or subtropical latitudes.

Source: NCERT- Chapter- 10th – (Page-no- 93)

Q.7) Consider the following statements about the Inter-Tropical Convergence Zone (ITCZ):

1. It is formed due to the convergence of trade winds from the southern and northern hemispheres.
2. High incidence of thunderstorms is an important feature of the ITCZ.

Which of the above given statements is/are correct?

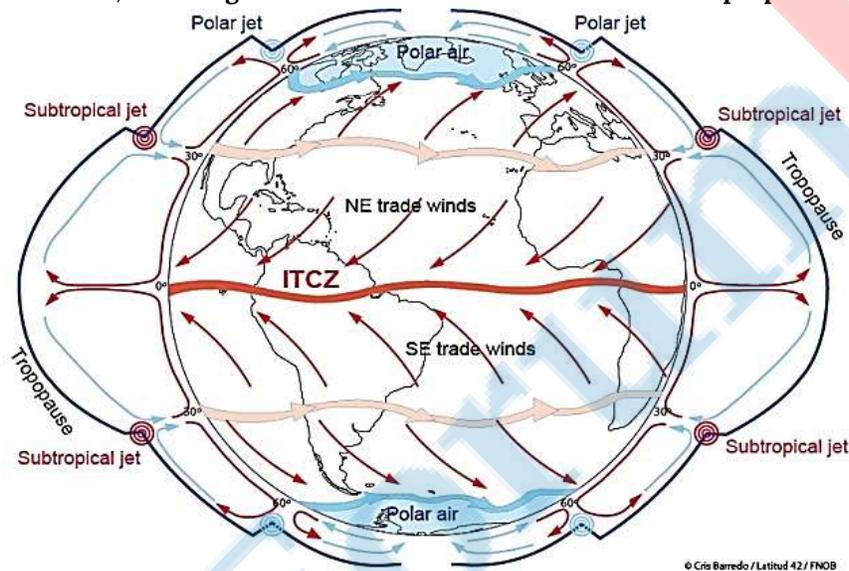

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: ITCZ exists because of the convergence of the trade winds. In the northern hemisphere the northeast trade winds converge with southeast winds from the Southern Hemisphere. The point at which the trade winds converge forces the air up into the atmosphere, forming the ITCZ.

Statement 2 is correct: The Intertropical Convergence Zone, or ITCZ, is the region that circles the Earth, near the equator, where the trade winds of the Northern and Southern Hemispheres come together. The intense sun and warm water of the equator heats the air in the ITCZ, raising its humidity and making it buoyant. Aided by the convergence of the trade winds, the buoyant air rises. **As the air rises it expands and cools, releasing the accumulated moisture in an almost perpetual series of thunderstorms.**

Source: NCERT- class 11th - Chapter 10th - (Page No- 92)

<https://earthobservatory.nasa.gov/images/703/the-intertropical-convergence-zone#:~:text=The%20Intertropical%20Convergence%20Zone%2C%20or,and%20Southern%20Hemisphere%20come%20together.>

Q.8) Consider the following statements about the El Niño:

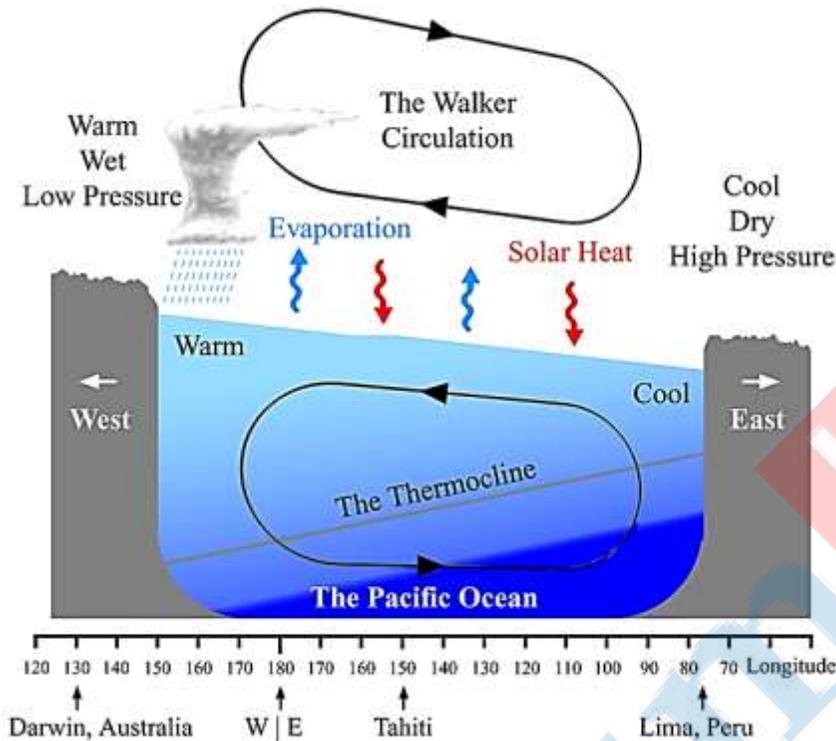

1. Intensity of Walker Circulation diminishes during an El Niño event.
2. Compared to normal circumstances, there will be low pressure near Peruvian coast and high pressure in the Indian Ocean during the El-Niño.
3. An El-Niño event always leads to increased occurrence of hurricanes in the mid-Atlantic Ocean.

Which of the statements given above is/are correct?

- a) 2 only
- b) 1 and 3 only
- c) 1 and 2 only
- d) 1 only

Ans) c

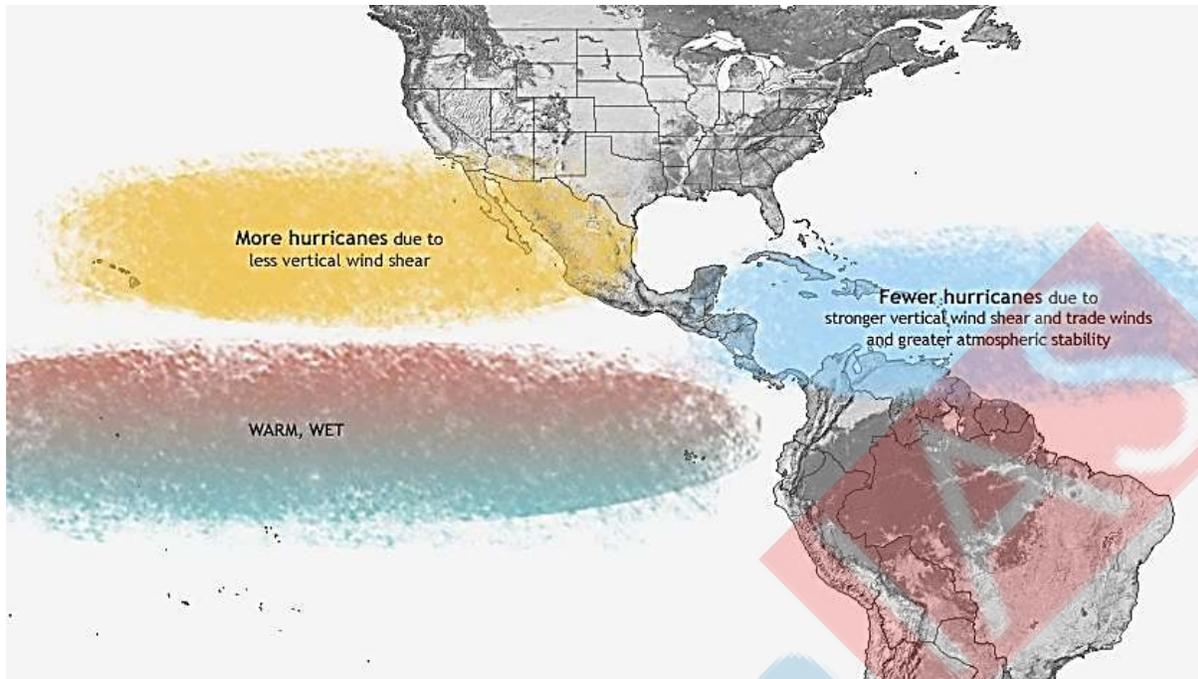

Exp) option c is the correct answer.

Statement 1 is correct. The Walker Circulation is an atmospheric system of air flow in the equatorial Pacific Ocean. **During an El Niño event, the Walker Circulation is greatly diminished. Increased precipitation and abnormally warm water are found in the central Pacific during an El Niño event (or ENSO warm phase).** These changes in weather patterns have a cascading effect on weather patterns in other parts of the world.

Statement 2 is correct. In normal times, when the tropical south Pacific Ocean (especially near Peru and Chile) experiences high pressure, alternatively the tropical Indian ocean experiences low pressure conditions. However, these pressure conditions are sometimes reversed which results in low pressure in the Pacific and alternatively high pressure in the Indian ocean. This is the periodic change in pressure conditions which is referred to as the Southern Oscillation.

Statement 3 is incorrect. In the Atlantic, **El Niño typically leads to fewer hurricanes.** This is largely due to increased vertical wind shear and more stability in the atmosphere. Wind shear is not good for the development or the sustaining of hurricanes as it rips them apart and a more stable atmosphere prevents the lift required for these storms.

Source: NCERT- Class 11- Chapter 10- (Page No- 92)

Statement 2: <https://www.weather.gov/fwd/basics>

Q.9) The term 'Methane Rainfall' is often heard in the news. In this context, consider the following statements regarding the Methane Rainfall:

1. It occurs due to the chemical reaction between the water in clouds and small amounts of gases containing methane.
2. It generally occurs in the deserts of Sub-Saharan Africa.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

Scientists have found that Saturn's largest moon Titan has small liquid lakes that run more than 100 meters deep and are filled with methane. Scientists have known that Titan's hydrologic cycle works similarly to Earth's – with one major difference. Instead of water evaporating from seas, forming clouds and rain, Titan does it all with methane and ethane.

Statement 1 is incorrect: Lakes on Titan's surface are made of methane. Scientists believe that ice volcanoes erupt and spew methane into Titan's atmosphere, which then rains down onto the surface, forming lakes. Liquid methane is the dominant force behind Titan's weather and surface erosion. Water is not present on the titan and methane rainfall is not due to the chemical reaction between water and methane gases.

Statement 2 is incorrect: Earth and Titan are the only bodies in the Solar System where liquid rains on a solid surface – though **on Titan, the rain is methane rather than water. On Titan, liquid hydrocarbons take the place of water as rainfall. This phenomenon does not occur in deserts of sub-Saharan Africa.**

NASA's Cassini orbiter captured the occurrence of rainfall on the north pole of Titan, looking like a wet sidewalk after a bit of rain. This rainfall also signifies a change in season on the Titan.

Source: <https://astronomy.com/news/2019/01/methane-rain-falls-on-titans-north-pole-from-cloudless-skies>

<https://blogs.scientificamerican.com/lab-rat/what-makes-things-acid-the-ph-scale/>

<https://www.epa.gov/acidrain/what-acid-rain>

Q.10) Which among the given sets of international groupings, has both India and Bangladesh as member countries?

- SAARC, G20 and Shanghai Cooperation Organization (SCO)
- BIMSTEC, Organization for Economic Cooperation and Development (OECD) and G20
- Asian Infrastructure and Investment Bank (AIIB), New Development Bank (NDB) and Organization for Economic Cooperation and Development (OECD)
- International Solar Alliance (ISA), New Development Bank (NDB) and Indian Ocean Rim Association (IORA)

Ans) d

Exp) Option d is the correct answer.

Option a is incorrect: Both India and Bangladesh are the members of SAARC, but **Bangladesh is not a member either of G20 or SCO**. G20 is a grouping of 19 countries (Argentina, Australia, Brazil, Canada, China, France, Germany, India, Indonesia, Italy, Japan, Republic of Korea, Mexico, Russia, Saudi Arabia, South Africa, Turkey, United Kingdom and United States) and European Union.

Members of SCO nations include Kazakhstan, China, Kyrgyzstan, Russia, Tajikistan, Uzbekistan, India and Pakistan.

Option b is incorrect: Both India and Bangladesh are the members of BIMSTEC, but Bangladesh is not a member either of G20 and OECD. OECD is a group of 38 high-income countries to stimulate world trade and economic progress.

Option c is incorrect: Bangladesh is a member of AIIB and NDB, but not a member of OECD. As of January 2023, members of NDB include **Brazil, Russia, India, China, and South Africa**. Also, **Bangladesh and UAE joined the organization in 2021. Egypt and Uruguay are the prospective members.**

Option d is correct. Both India and Bangladesh are the members of all the three groupings- ISA, NDB and IORA. **The membership of ISA is open to all the members of United Nations.** So far, 106 nations have signed the ISA Framework agreement. IORA members:

(Source: IORA)

Q.11) “These are the highest clouds in the Earth’s atmosphere and are observed slightly below the mesopause in the polar summertime. These clouds are of special interest, as they are sensitive to both global climate change and to solar/terrestrial influences. Both satellite and ground-based observations over the past four decades have indicated that the presence of these clouds has been increasing in both frequency and brightness. The first recorded sightings of these clouds were reported in 1885”

Which of the following types of clouds is described in the above passage?

- Cirrus clouds
- Cirrostratus clouds
- Noctilucent clouds
- Cumulonimbus clouds

Ans) c

Exp) Option c is the correct answer.

Noctilucent clouds are the highest clouds in the Earth's atmosphere, 83 km (50 miles) and are observed slightly below the mesopause in the polar summertime. These clouds are of special interest, as they are sensitive to both global climate change and to solar/terrestrial influences. The first recorded sightings of noctilucent clouds were reported in 1885 and both satellite and ground-based observations over the past four decades have indicated that the presence of these clouds has been increasing in both frequency and brightness. Scientists now realize that these clouds are very sensitive indicators for what is going on in the atmosphere at higher altitudes as small changes in the atmospheric environment can lead to large changes in the properties of these clouds. Further, since these clouds form on condensation nuclei through cold temperatures and the presence of water vapor – and these properties of the mesosphere are tied to carbon dioxide and methane, the anthropogenic causes of climatic change may be directly related to the presence of noctilucent clouds.

Source: <https://www.space.com/noctilucent-clouds#section-are-noctilucent-clouds-appearing-more-frequently>

<https://www.bbc.com/news/uk-northern-ireland-27936905>

Q.12) The term 'Heat Island' is often seen in the news. In this context, consider the following statements regarding the Heat Island:

1. Calm and clear weather conditions can result in severe heat islands.
2. Strong winds and cloud cover enhances the formation of heat islands.
3. The low albedo value of concrete surfaces helps in the formation of Heat Islands.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 2 only

Ans) b

Exp) Option b is the correct answer.

Structures such as buildings, roads, and other infrastructure absorb and re-emit the sun's heat more than natural landscapes such as forests and water bodies. Urban areas, where these structures are highly concentrated, and greenery is limited, become "islands" of higher temperatures relative to outlying areas. These pockets of heat are referred to as "heat islands."

Statement 1 is correct: Calm and clear weather conditions result in more severe heat islands by maximizing the amount of solar energy reaching urban surfaces and minimizing the amount of heat that can be carried away.

Statement 2 is incorrect: Strong winds and cloud cover suppress heat island formation. Geographic features also impact the heat island effect such as nearby mountains can block wind from reaching a city or create wind patterns that pass through a city.

Statement 3 is correct: Conventional human-made materials used in urban environments such as pavements or roofing tend to reflect less solar energy and absorb and emit more of the sun's heat compared to trees, vegetation, and other natural surfaces. Thus, low albedo value of concrete surfaces helps in the formation of Heat Islands in urban areas. Often, heat islands build throughout the day and become more pronounced after sunset due to the slow release of heat from urban materials.

Source: [https://www.epa.gov/heatislands/learn-about-heat-](https://www.epa.gov/heatislands/learn-about-heat-islands#:~:text=These%20temperature%20differences%20constitute%20intra,are%20cooler%20than%2)

Q.13) Consider the following statements with reference to the conditions favorable for occurrence of Cold Wave in India:

1. Foggy weather developed during the day.
2. Clear sky conditions developed during the night.
3. Intense radiation cooling during the night.

Which of the statements given above are correct?

- a) 2 and 3 only
- b) 1 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

A cold wave is a rapid fall in temperature within a 24-hour period. A cold wave is a weather phenomenon that is distinguished by the cooling of the air. Cold wave conditions develop if the temperature falls rapidly much below normal.

Statement 1 is correct: Foggy weather developed during the day which inhibits day warming and provides favorable conditions for cold wave conditions to linger on.

Statements 2 and 3 are correct: Clear sky conditions during the night, further facilitate lowering of temperature by radiation cooling. Occasionally, in the absence of western disturbances and persistent clear sky conditions, intense nocturnal radiation cooling may also cause night temperatures to fall below normal and result in cold wave conditions.

Source: <https://egyankosh.ac.in/bitstream/123456789/25165/1/Unit-17.pdf>

Q.14) With reference to World Geography, what is Madden Julian Oscillation?

- a) It is a warm ocean current, which occasionally replaces the normal cold Peru Current that moves north along the western coast of South America.
- b) It is an eastward moving pulse of cloud and rainfall near the equator that typically recurs every 30 to 60 days.
- c) It is a zone where air tends to ascend.
- d) It is the periodic change in pressure conditions in the Central Pacific and Australia.

Ans) b

Exp) Option b is the correct answer.

Statement a is incorrect: El Nino is a warm ocean current, which occasionally replaces the normal cold Peru Current that moves north along the western coast of South America. The surge of warm ocean waters recurs every three to five years and lasts from six to eighteen months. (Between El Nino there are often periods of cooling surface waters in the same area called La Nina).

Statement b is correct: The Madden-Julian Oscillation (MJO) is the major fluctuation in tropical weather on weekly to monthly timescales. The MJO can be characterised as an eastward moving 'pulse' of cloud and rainfall near the equator that typically recurs every 30 to 60 days. The MJO consists of two parts or phases. Strong MJO activity often dissects the planet into halves. One half within the enhanced convective phase and the other half in the suppressed convective phase.

Statement c is incorrect: The **Inter Tropical Convergence Zone (ITCZ)** is low pressure zone located at the equator where trade winds converge, and so, **it is a zone where air tends to ascend**. In July ITCZ is located around 20 degrees north – 25-degree north latitudes (over the Gangetic plains), sometimes called the monsoon trough. This monsoon trough encourages the development of thermal low over north and North West India.

Statement d is incorrect: **El Nino event is closely associated with the pressure changes in the Central Pacific and Australia**. This change in pressure condition over pacific is known as the southern oscillation. The combined phenomenon of southern oscillation and El Nino is known as ENSO (El Nino Southern Oscillation).

Source:

[http://www.bom.gov.au/climate/mjo/#:~:text=The%20Madden%2DJulian%20Oscillation%20\(MJO,Read%20more%3A%20About%20the%20MJO](http://www.bom.gov.au/climate/mjo/#:~:text=The%20Madden%2DJulian%20Oscillation%20(MJO,Read%20more%3A%20About%20the%20MJO)

<https://egyankosh.ac.in/bitstream/123456789/46759/1/Unit-14.pdf>

Q.15) Which of the following statements correctly describes the ‘Samarkand’ declaration?

- It is a commitment by SCO members for peaceful settlement of disputes through dialogue.
- It is to strengthen primary healthcare and achieve universal health coverage by 2030.
- It is for tackling global nitrogen challenge by halving nitrogen waste by 2030.
- It is to reaffirm WHO’s goal to end tuberculosis by 2030.

Ans) a

Exp) Option a is the correct answer.

The annual summit of **Shanghai Cooperation Organization (SCO)** has been recently held in **Samarkand, Uzbekistan**. Members of the organization concluded the summit with Samarkand declaration.

Statement a is correct: Samarkand Declaration advocated commitment to **peaceful settlement of differences and disputes between countries** through dialogue and consultation. The Samarkand Declaration stressed that SCO member states agree on further **improvement of the global economic governance architecture** and are committed to promoting an **open and transparent trade system, opposing protectionist actions and the unilateral application of economic sanctions**.

Statement b is incorrect: Astana Declaration of WHO pertains to achieving primary healthcare and universal health coverage by 2030.

Statement c is incorrect: Colombo Declaration of UN members deal with tackling global nitrogen challenge. The aim of the declaration is to halve nitrogen waste by 2030.

Statement d is incorrect: Moscow Declaration is popularly known to reaffirm WHO’s goal to end TB by 2030.

Source:<https://www.mea.gov.in/bilateraldocuments.htm?dtl/35724/Samarkand+Declaration+of+the+Council+of+Heads+of+State+of+Shanghai+Cooperation+Organization>

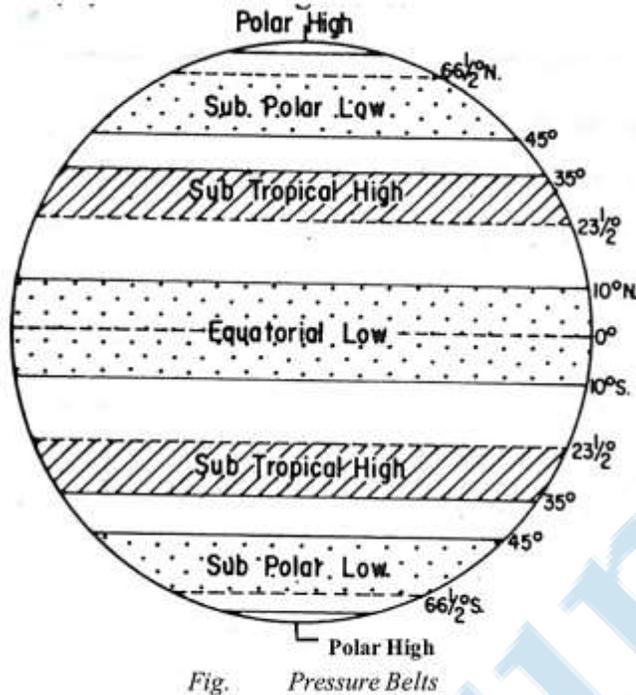

Q.16) Which one of the following statements is **incorrect** about the Sub-Tropical High-Pressure belt?

- It is formed due to subsidence of air coming from the equatorial region.
- Many of the world’s deserts are present along this belt.
- This belt is also known as the ‘Doldrums’.
- It is characterized by anticyclonic conditions with calm and arid weather.

Ans) c

Exp) Option c is the correct answer.

The latitudinal distribution of atmospheric pressure is also known as horizontal distribution of atmospheric pressure. It is characterized by low- and high-pressure belts. There are mainly seven pressure belts on the earth.

Option a is correct: The **sub-tropical high-pressure** belts are located between latitudes 25° to 35° in both hemispheres. In the northern hemisphere it is called the North sub-tropical high-pressure belt and in the southern hemisphere it is known as South sub-tropical high-pressure belt. **The high-pressure belt in these latitudes is because of the settling down of winds that arose in the equatorial region and got deflected towards poles due to the earth's rotation.**

Option b is correct: Hot deserts are mainly found around the Tropics of Cancer and Capricorn. The hot deserts of the world are located between 15° and 30° north or south of the equator, where the air is subsiding or sinking air. **The hot deserts lie along the Horse Latitudes or the Sub-Tropical High-Pressure Belts where the air is descending,** a condition least favorable for precipitation of any kind to take place. The rain-bearing Trade Winds blow off-shore and the Westerlies that are on-shore blow outside the desert limits.

Option c is incorrect: The **Equatorial Low-Pressure Belt** is located in the vicinity of the equator between 5° N and 5° S latitudes. The equatorial trough of low pressure is the zone of convergence of trade winds blowing equator wards from the sub-tropical belts of high pressure in the northern and southern hemispheres. As these regions receive vertical rays of the sun the ground gets heated cause air to rise upwards creating a low pressure along the ground. **That is why these belts are called the Doldrums.** Whereas the latitudes of sub-tropical high-pressure belts are called **horse latitudes.**

Option d is correct: The **sub-tropical high-pressure** belts have a convergence zone at higher altitudes which when subsides, causes piling up of air and reduction of volume thus resulting in high pressure. Thus, anticyclonic conditions develop which results in **calm and arid weather.**

Source: <https://egyankosh.ac.in/bitstream/123456789/79918/1/Block-2.pdf>

Q.17) Consider the following statements regarding the Ozone Layer present in the atmosphere:

1. The Ozone layer is almost transparent to most Ultraviolet-A (UV-A) type of radiation.
2. Carbon Tetrachloride is one of the Ozone layer depleting substances.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) option c is the correct answer.

Statement 1 is correct. UV radiation is divided into three categories, based on its wavelength; these are referred to as UV-A (400–315 nm), UV-B (315–280 nm), and UV-C (280–100 nm). Ozone is transparent to most UV-A, so most of this longer-wavelength UV radiation reaches the surface, and it constitutes most of the UV reaching the Earth. This type of UV radiation is significantly less harmful to DNA, although it may still potentially cause physical damage, premature aging of the skin, indirect genetic damage, and skin cancer.

Statement 2 is correct. Carbon tetrachloride (CCl_4) is a long-lived greenhouse gas and an ozone-depleting substance. Its emissive use, production and consumption are regulated under the Montreal Protocol on Substances that Deplete the Ozone Layer

Source: NCERT for Class 11th- Chapter 8th (Page No-76)

Q.18) With reference to the velocity and direction of wind, consider the following statements:

1. The speed of the wind is directly proportional to the pressure gradient force.
2. The friction force on the wind is more at the land surface than on the sea surface.
3. The rotation of Earth on its axis causes a change in wind's direction.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The air in motion is called wind. Wind is moving air and is caused by differences in air pressure within our atmosphere. Air under high pressure moves toward areas of low pressure. The greater the difference in pressure, the faster the air flows.

Statement 1 is correct: The differences in atmospheric pressure produce a force. **The rate of change of pressure with respect to distance is the pressure gradient.** The pressure gradient is strong where the isobars are close to each other and are weak where the isobars are apart. The **speed of the wind is directly proportional to the pressure gradient force**, meaning that as the change in pressure increases (i.e. pressure gradient increases) the speed of the wind also increases at that location.

Statement 2 is correct: The **friction force on the wind is more at the land surface** than on the sea surface. The Frictional Force is **greatest at the surface** and its influence generally extends up to an elevation of 1 – 3 km. Over the sea surface the friction is minimal. Over uneven terrain, however, **due to high friction, the wind direction makes high angles with isobars and the speed gets retarded.**

Statement 3 is correct: The **rotation of Earth on its axis causes winds to shift direction, creating what are called the prevailing winds.** This wind shift, **known as the Coriolis effect**, causes winds in the Northern Hemisphere to shift to the right and winds in the Southern Hemisphere to shift to the left.

Source:

<https://www.weather.gov/jetstream/wind#:~:text=Pressure%20gradient%20is%20just%20the,also%20increases%20at%20that%20location.>

<https://sciencing.com/wind-affect-weather-6394667.html>

Q.19) Consider the following pairs:

Terms	Description
1. Relative Humidity	It is the ratio of mass of water vapour to the total mass of the air parcel.
2. Dew Point	It is the temperature at which the air becomes fully saturated.
3. Absolute Humidity	It represents the actual amount of water vapour present in the air.

Which of the pairs given above is/are correctly matched?

- a) 1 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The amount of Water Vapour present in the air is known as humidity. It is expressed quantitatively in different ways.

Pair 1 is incorrect: Specific Humidity (not relative humidity) is the ratio of the mass of water vapour to the total mass of the air parcel.

Whereas Relative humidity is the ratio of the amount of water vapor actually in a volume occupied by air to the amount the space could contain at saturation. The **percentage of moisture present in the atmosphere as compared to its full capacity at a given temperature** is known as the relative humidity. The relative humidity of an air at saturation point is hundred percent.

Pair 2 is correct: Dew point is the temperature at which the air becomes fully saturated (100 percent relative humidity). It is dependent on only the amount of moisture in the air.

Pair 3 is correct: Absolute humidity is the actual amount of water vapour present in the air. In other words, **it is the mass of water vapor divided by the mass of dry air in a volume of air.** It does not take temperature into consideration. Absolute humidity in the atmosphere ranges from near zero to roughly 30 grams per cubic meter when the air is saturated at 30 °C. The absolute humidity differs from place to place on the surface of the earth.

Q.20) Consider the following statements regarding Eastern Economic Forum (EAF):

1. It is an intergovernmental body that aims to encourage investments in Russia's Far East.
2. India has made significant investments in the Russian Far East in the fields of diamonds and pharmaceuticals.
3. Indian Government has also announced an "Act Far East" policy to boost India's engagement with the Russian Far Eastern region.

Which of the statements given above is/ are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Eastern Economic Forum is an **international forum** that takes place in **Vladivostok, Russia** to **encourage investments in Russian Far East**. Russia's Far East comprises area from Lake Baikal to Pacific Ocean, which is **approximately a third of Russia's territory**.

Statement 1 is incorrect: Eastern Economic Forum is **not** an inter-governmental body. It is an international platform to **encourage entrepreneurs** to invest in Russia's Far East. It is organized annually by **Roscongress Foundation**.

Statement 2 is correct: Russia's Far East is a **resource rich region** having abundant resources like **coal, natural gas, diamonds, gold, tungsten, borax materials, fish and sea food**. India has made investments in fields of pharmaceuticals, diamonds, oil and gas exploration etc. India can also supply skilled workforce to the region.

Statement 3 is correct: 'Act Far East' policy of India was launched in 2019 at the plenary session of 5th **Eastern Economic Forum** to boost India's engagement with Russia's Far East region. India extended \$1 billion line of credits towards the development of Russia's Far East. This policy gives a new dimension to India's economic policy.

Knowledge Base:

(Source: <https://forumvostok.ru/en/about-the-forum/>)

Q.21) Which one of the following conditions is favorable for the formation of Hailstorm in India?

- absence of a jet stream at a higher level in the atmosphere.
- less variations in wind velocity over vertical distances.
- active western cyclonic disturbances during winter and the pre-monsoon season
- low moisture content in the atmosphere.

Ans) c

Exp) Option c is the correct answer.

Hail is a type of precipitation or water in the atmosphere. Hail is formed when drops of water freeze together in the cold upper regions of thunderstorm clouds. Most hailstones measure between 5 millimeters and 15 centimeters in diameter and can be round or jagged.

Option c is correct: Hailstorms occur mostly over mid-latitude continental regions and decrease in frequency towards the pole and equator and over oceans. In India, the **favourable hail conditions are met by active western cyclonic disturbances during winter and the pre-monsoon season.** Low level circulation associated with western disturbance, middle level trough in westerly winds and **presence of a jet stream at higher level** provide favourable conditions for the formation of hail-bearing thunderstorms along the line of discontinuity over north and northeast India. Other Atmospheric conditions favourable for the formation of hail bearing thunderstorm are: High degree of instability, **High moisture content in the atmosphere**, Low freezing level, **High vertical wind shear (strong variation of wind velocity over vertical distances).**

SFG 2023 | LEVEL 2 | Test #30 – Solutions |

Q.22) Consider the following statements about the effects of temperature inversion on the local weather:

1. It causes atmospheric stability in the lower layers of atmosphere by limiting the vertical movement of air.
2. It makes condition suitable for the formation of dense fog.
3. Temperature inversion in hills and mountains helps to protect plants from frost damage.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Normally, temperature decreases with increase in elevation. It is called normal lapse rate. At times, the situation is reversed, and the normal lapse rate is inverted. It is called Inversion of temperature. Inversion is usually of short duration but quite common, nonetheless.

Statement 1 is correct: Inversion of temperature causes atmospheric stability which stops upward and downward movement of air. The atmospheric stability discourages rainfall and favours dry conditions.

Statement 2 is correct: It intensifies the process of formation of fog, as fog is formed due to the situation of warm air above and cold air below. Because the warm air is cooled from below and resultant condensation causes the formation of tiny droplets around suspended dust particles. Hence, dense fogs in mornings are common occurrences especially during winter season.

Statement 3 is correct: The inversion takes place in hills and mountains due to air drainage. Cold air at the hills and mountains, produced during night, flows under the influence of gravity. Being heavy and dense, the cold air acts almost like water and moves down the slope to pile up deeply in pockets and valley bottoms with warm air above. **This is called air drainage. It protects plants from frost damages.**

Source: Fundamental of Physical Geography, Class 11, pg. 85

Q.23) Consider the following statements regarding different types of Local Winds:

1. Sirocco is a cold and dry wind which flows towards the Mediterranean Sea from the Arctic region.
2. Mistral is a cold wind which blows from southern France into the Gulf of Lion.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. Sirocco is a **hot, dry, dusty wind which** flows towards the Mediterranean Sea. It **originates in Sahara Desert.** It is most frequent in spring. It **blows towards the Mediterranean Sea from the desert interior.**

Statement 2 is correct. The mistral is a strong, cold, north-westerly wind that blows from southern France into the Gulf of Lion in the northern Mediterranean. Mistral blows towards the Rhone valley. Its velocity is

intensified by the **funnelling effect in the valley between the Alps and Central Massif**. It is **most frequent in winter**.

Knowledge Base: A similar type of **cold north-easterly winds are Bora** which is experience along the **Adriatic coast**. It also usually occurs in winter. But it is **more violent than mistral winds**. Bora blows onwards into Mediterranean Sea.

Source: GC Leong Chapter-19 pge-143, 144

Q.24) Which of the following are the characteristic features of China type of Climate?

1. High degree of pressure variation between the summer and winter seasons.
2. Low pressure region created during the summers due to intense heating.
3. Presence of rain bearing South-west monsoon winds.
4. Very low annual temperature range.

Select the correct answer from the codes given below.

- a) 1 and 2 only
- b) 1, 3 and 4 only
- c) 2, 3 and 4 only
- d) 1, 2 and 4 only

Ans) a

Exp) Option a is the correct answer.

China type of climate is found on the eastern margins of continents in warm temperate latitudes, just outside the tropics. It is typified by a warm moist summer and a cool, dry winters. It can be found in central and north China, including southern Japan. There are various local geological conditions responsible for occurrence of this type of climate.

Statement 1 is correct: The vast landmass of the Asian continent and mountainous regions that lie in the heart of it create great changes in pressure between the winter and summer seasons. It results in a temperate monsoon kind of climate i.e., China type of climate.

Statement 2 is correct: This region also known as the heart of Asia gets intensely heated up in the summers. This intense heating of a wider landmass leads to formation of a low-pressure region.

Statement 3 is incorrect: The creation of low-pressure region causes the moist air stream from the Tropical Pacific to flow in and cause rain in the form of the South-East Monsoon (not south-west monsoon). This contributes to heavy precipitation in the northern and central parts of China, which results in annual rainfall of approximately 100cm.

Statement 4 is incorrect: In winter, a steep pressure gradient is set up between the cold interiors of Mongolia and Siberia. The continental polar air stream flows outwards as the North- West Monsoon, bitterly cold and very dry. This results in a great annual temperature range in this type of climate.

Source: G C Leong, pg. 155

Q.25) Consider the following statements regarding India-UN Development Partnership Fund?

1. The 'Fund' is established by United Nations (UN) to support India's progress towards Sustainable Development Goals (SDGs).
2. The fund is also aimed to promote multilateralism and shared prosperity in the global South.
3. UNICEF, UNESCO and WHO are the implementing partners of the Fund.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The year 2022 marks the 5th anniversary of India-UN Development Partnership Firm.

Statement 1 is incorrect: The fund was **established (in 2017), supported and led** by the **Government of India** and implemented in collaboration with the UN Systems. Its key objectives are:

- 1) Promote **multilateralism and shared prosperity** in the global South. (**South-South Cooperation**)
- 2) The Fund **supports Southern-owned and -led, demand-driven and transformational sustainable development** projects across the developing world, with a focus on **least developed countries and Small Island developing States**.
- 3) Its thematic reach spans all 17 Sustainable Development Goals (SDGs).
- 4) **The Government of India has committed USD150 million over 10 years to the India-UN Fund.**

Statement 2 is correct: One of the key objectives of the fund is to **promote multilateralism and shared prosperity in the global South**.

Statement 3 is correct: **UNICEF, UNESCO and WHO** are among the implementing partners of the Fund. The fund has 12 UN entities as implementing partners:

12 UN entities as implementing partners

(Source: <https://indiaunfund.unsouthsouth.org/>)

Source: <https://indiaunfund.unsouthsouth.org/>

Q.26) Consider the following statements about the Polar Vortex, often seen in news:

1. It is a large area of high pressure and warm air surrounding both the poles of Earth.
2. Cold surges in the parts of the US, Europe and Asia are sometimes associated with polar vortex.
3. Sudden stratospheric warmings can strengthen the polar vortex.
4. Polar vortex is generally located above the polar jet streams in the atmosphere.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 4 only
- c) 1, 2 and 3 only
- d) 2, 3 and 4 only

Ans) b

Exp) Option b is the correct answer.

The stratospheric polar vortex is a large-scale region of air that is contained by a strong west-to-east jet stream that circles the polar region.

Statement 1 is incorrect: The polar vortex is a large area of low pressure (and NOT high pressure) and cold air surrounding both of the Earth's poles. It exists near the poles but weakens in summer and strengthens in winter. The term "vortex" refers to the counter-clockwise flow of air that helps keep the colder air near the Poles.

Statement 2 is correct: Many a times during winter in the northern hemisphere, the polar vortex will expand, sending cold air southward with the jet stream. This occurs fairly regularly during wintertime and is often associated with large outbreaks of Arctic air in the United States. However, this phenomenon is also observed in parts of Europe and Asia as well.

Statement 3 is incorrect: A sudden stratospheric warming is a significant disruption of the stratospheric polar vortex that begins with large-scale atmosphere waves (called Rossby waves) getting pushed higher into the atmosphere. These waves can "break" (like waves in the ocean) on top of the polar vortex and weaken it (and NOT strengthen it). If waves are strong enough, the winds of the polar vortex can weaken so much that they can reverse from being westerly to easterly.

Statement 4 is correct: The polar vortex is a band of strong westerly winds located 16-50 kilometres (10-30 miles) above Earth's surface in the stratosphere. Whereas the polar jet stream occurs in the troposphere at altitudes of 8-14 km (5-9 miles). The polar vortex thus, lies above and does not interfere with the polar jet streams.

Source : <https://www.weather.gov/safety/cold-polar-vortex>

https://www.weather.gov/bis/sudden_stratospheric_warming_events#:~:text=A%20sudden%20stratospheric%20warming%20is,polar%20vortex%20and%20weaken%20it.

[https://scied.ucar.edu/learning-zone/climate-change-impacts/why-polar-air-keeps-breaking-out-arctic#:~:text=The%20polar%20vortex%20is%20a,\(5%2D9%20miles\)](https://scied.ucar.edu/learning-zone/climate-change-impacts/why-polar-air-keeps-breaking-out-arctic#:~:text=The%20polar%20vortex%20is%20a,(5%2D9%20miles)).

Q.27) Consider the following statements about Katabatic winds, in the context of mountain and valley winds:

1. It is warm wind that blows up a mountain slope due to a warmer temperature on the mountain slope.
2. The Bora winds of Adriatic and Oroshi winds of Japan are the examples of katabatic wind.
3. They can sometimes lead to the formation of Antarctic Oases.

Which of the statements given above is/are correct:

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Wind is the bulk movement of air that either result from temperature difference, largescale synoptic pressure, or local pressure and temperature differences. When these winds occur in the mountainous region they are called as mountain winds. There are two types of winds, anabatic and katabatic winds.

Statement 1 is incorrect: An anabatic wind is warm wind that blows up a mountain slope due to a warmer temperature on the mountain slope compared to the temperature in the air column. Also known as an upslope wind or upslope flow. This type of wind usually occurs on a clear sunny day. The opposite of an anabatic wind is a katabatic wind, which blows down the slope of a mountain. Additionally, katabatic winds blow at night and are caused by reversed temperature differences between the air column and the mountain slope.

Statement 2 is correct: The examples of katabatic winds include bora winds of the Adriatic, Oroshi winds of Japan, and Pitera winds in Greenland.

Statement 3 is correct: Katabatic winds most commonly blow out from large, elevated ice sheets in Greenland and Antarctica regions. The high-density cold air that builds up over the ice sheet and the elevation of the ice sheet increases the force of gravity. When these winds are concentrated in a restricted area, they will blow with hurricane speed. **In some areas, especially in Antarctica, the snow may be scoured away by the force of these winds, leading to the formation of Antarctic oases.**

The areas where, during the summer season, much of the snow melts away, revealing Antarctica's rock surface. They are dotted with freshwater lakes of various sizes, which become ice-free in the summer. It is these areas that are known as **Antarctic oases**.

de.

Q.28) In the context of Indian physiography, consider the following statements about Karewas:

1. Karewas are fertile alluvial soils found in the Kashmir valley.
2. These are important for the cultivation of almonds, walnuts and apples.
3. Karewas are formed by unconsolidated lacustrine deposits.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Kashmir Himalayas are also famous for Karewa formations, which are useful for the cultivation of Zafran, a local variety of saffron.

Statement 1 is correct: Karewas are plateau like landform which are 13000-18000-metre-thick deposits of alluvial soils and sediments like sandstone and mudstone. These are found in Kashmir valley region, especially in the Pir Panjal range. The karewa sediments not only hold fossils and remnants of many human civilisations and habitations but are also the **most fertile spots** in the valley.

Statement 2 is correct: Karewas are very famous for the Zafran cultivation but are also very important for the cultivation of almonds, walnuts, apples and several other cash crops.

Statement 3 is correct: Karewas are formed by unconsolidated lacustrine deposits which are also known as lake deposits. In Pleistocene period, when the upliftment of the Pir Panjal ranges happened, the flow of the river had stopped. As a result, the whole of Kashmir valley became a large lake. Slowly, the glacial deposits have accumulated here in this lake. Thus, creating a large lacustrine plain. Later, the water drained away, and these unconsolidated deposits remained there. These unconsolidated gravel and mud deposits are known as Karewa formation.

Source: <https://www.downtoearth.org.in/news/environment/heritage-erased-how-the-kashmir-valley-s-ancient-mound-formations-are-being-levelled-81683>

Q.29) Which of the following statements best describe the term 'Rohi'?

- The fertile flood plains located near the western slopes of Aravali.
- A marshland area recently recognised as the Ramsar site.
- A hilly tract famous for Gucchi cultivation located in the Khasi hills.
- Dry wasteland located on the western side of the cold deserts of Ladakh.

Ans) a

Exp) Option a is the correct answer.

The region lying to the west of the Bangar region in the desert of Rajasthan is known as Rohi. It is a fertile floodplain formed by several small rivers or streams which rise in the Aravalli range and flow westwards through the desert region. The streams remain dry for most of the time in the year but get flooded during the rainy season. **The plain thus created by the flooding of these streams is known as Rohi.**

Source: ICSE Total Geography

Q.30) Consider the following statements regarding India-ASEAN relationship:

- Recently India and ASEAN have elevated their ties from the existing 'Strategic Partnership' to the 'Comprehensive Strategic Partnership'.
- The year 2022 has been designated as ASEAN-India Friendship Year.
- In 2021-22, for the first-time bilateral trade between India and ASEAN has crossed USD100 billion.

Which of the statements given above are correct?

- 1 and 2 only
- 2 and 3 only
- 1 and 3 only
- 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Recently, 19th India-ASEAN Summit has been held in **Cambodia**. The year 2022 marks **30 years of ASEAN-India relations**.

Statement 1 is correct: Following are the key takeaways from the recent Summit:

- ASEAN and India announced **elevating of the existing 'Strategic Partnership' to 'Comprehensive Strategic Partnership'**.
- Both the sides reaffirmed importance of **maintaining and promoting peace, stability, maritime safety and security, freedom of navigation and overflight in the Indo-Pacific region**
- Reiterated the commitment to enhance India-ASEAN cooperation in various areas such as **maritime activities, counterterrorism, transnational crimes, cyber security, digital economy, regional connectivity** etc.

Statement 2 is correct: The leaders of both sides have designated year 2022 as ASEAN-India Friendship year. The year 2022 marks 30 years of ASEAN-India relations.

Statement 3 is correct: The ASEAN-India bilateral trade during 2021-22 has crossed USD 100 billion for the first time and reached **USD 110.39 billion**. Out of this, approximately USD 30 billion worth trade was made between India and Singapore only. **India has overall trade deficit**, despite having signed Free Trade Agreement (FTA) with ASEAN.

Knowledge Base: ASEAN is a regional grouping of 10 member states:

Image: ASEAN

(Source: World Economic Forum)

Key Initiatives with ASEAN/ Member Countries: ASEAN-India Free Trade Agreement, ASEAN-India Green Fund, India-Myanmar-Thailand Trilateral Highway, Kaladan Multimodal Project, Mekong Ganga Cooperation etc.

https://www.mea.gov.in/Portal/ForeignRelation/India-ASEAN-_Relations_2022.pdf

Q.31) The Indian Peninsular Plateau is often characterized by the presence of which of the following geomorphological features?

1. Tors
2. Hummocky hills
3. Eskers
4. Quartzite dykes
5. Rift valleys

Select the correct answer from the codes given below:

- a) 1, 3 and 5 only
- b) 2, 4 and 5 only
- c) 1, 3 and 4 only
- d) 1, 2, 4 and 5 only

Ans) d

Exp) Option d is the correct answer.

Peninsular plateau is an irregular triangle which rises from the height of 150 m above the river plains up to an elevation of 600–900 m. Delhi ridge in the northwest, (extension of Aravalis), the Rajmahal hills in the east, Gir range in the west and the Cardamom hills in the south constitute the outer extent of the Peninsular plateau. Some of the important physiographic features of this region are **tors, block mountains, rift valleys, spurs, bare rocky structures, series of hummocky hills and wall-like quartzite dykes offering natural sites for water storage.**

Statement 1 is correct: Tors are exposed rock mass of jointed and broken blocks. Tors are seldom more than 15 metres (50 feet) high and often occur as residues at the summits of inselbergs and at the highest points of pediments. Tors are observed in peninsular plateau region of India.

Statement 2 is correct: In geology, a hummock is a small knoll or mound above ground. They are typically less than 15 meters (50 ft) in height and tend to appear in groups or fields. Large landslide avalanches that typically occur in volcanic areas are responsible for formation of hummocks. Hummocks are observed in peninsular plateau region of India.

Statement 3 is incorrect: Eskers are landforms of glaciated lowlands. They are found in the glacial regions and not in the peninsular plateau region. They are long, narrow, sinuous ridges composed of sand and gravel which mark the former sites of sub-glacial melt-water streams.

Statement 4 is correct: When the lava makes its way through cracks and the fissures developed in the land, it solidifies almost perpendicular to the ground. It gets cooled in the same position to develop a wall-like structure. Such structures are called dykes. These are the most commonly found intrusive forms in the western Maharashtra area.

Statement 5 is correct: A rift valley is a lowland region that forms where Earth's tectonic plates move apart or rift. Faulting due to divergence creates the rift system. The Narmada and Tapi are examples of a rift valley. The Chambal River also flows through a rift valley.

Source: NCERT, India: Physical Environment, Class 11, pg. 16

Q.32) Which of the following statements best explain the meaning of the term 'dhrians'?

- a) The coastal backwaters that are located in the Malabar region.
- b) A basin made up of mostly soft and unconsolidated deposits.
- c) A basin developed in an area of intense temperature and rainfall, characterized by heavy leaching.
- d) The moving or shifting sand dunes of the Thar desert.

Ans) d

Exp) Option d is the correct answer.

To the northwest of the Aravali hills, the Great Indian Desert (also known as Marusthali) is a land of undulating topography dotted with longitudinal dunes and barchans. In this desert, speedy winds force the sand dunes to move from one place to another along the direction of the wind. These moving or shifting sand dunes are locally known as dhrians and the blown-out depression is known as Dhand.

Option a is incorrect: The coastal backwaters located in the Malabar region are known as kayals.

Option b is incorrect: A basin made up of mostly soft and unconsolidated deposits in the region of Mizoram is mostly known as 'Molassis basin'.

Option c is incorrect: A basin developed in an area of intense temperature and rainfall, characterized by heavy leaching, is commonly known as laterite soil basin.

Source: <https://imp.center/i/paragraph-great-indian-desert-thar-desert-rajasthan-plains-1232/>

Q.33) Consider the following statements about the Himalayas:

1. Himalayas are the youngest fold mountains of India.
2. Marmolada glacier is one of the largest glaciers located in the Himalayas.
3. The longitudinal valleys present in the Himalayan regions are known as Duars.
4. The crustal thickness of the Himalayan range generally increases from the Indo Gangetic plains towards the Greater Himalayas.

Which of the statements given above are correct?

- a) 1 and 4 only
- b) 1 and 2 only
- c) 1, 2 and 3 only
- d) 3 and 4 only

Ans) a

Exp) Option a is the correct answer.

The Himalayas are the young-fold mountains consisting of several hill ranges, extending from the northwest of India to the East. They not only act as a physical barrier but also as a climatic, drainage and cultural divide.

Statement 1 is correct: Himalayas are the youngest fold mountains of India. They were formed due to collision between the Indo-Australian and the Eurasian plate. They are fold mountains which stretch over the northern borders of the Indian subcontinent.

Statement 2 is incorrect: Marmolada glacier is not located in the Himalayas. It is located in the Alps Mountain ranges. The prominent glaciers in the Himalayas are Baltoro and Siachin among others.

Statement 3 is incorrect: The longitudinal valleys present in the Himalayan regions are known as duns. Such as Jammu dun and Pathankot dun. However, duars are the alluvial floodplains in northeastern India that lie south of the outer foothills of the Himalayas and north of the Brahmaputra River basin.

Duars, also spelled **Dwars** or **Dooars**, region of northeastern India, at the foot of the east-central Himalayas. It is divided by the Sankosh River into Western and Eastern Duars.

Statement 4 is correct: The most distinctive feature of the Himalayas is the **crustal thickness**, which increases from about 35 to 40 km in the **Indus-Ganga-Brahmaputra Plains** to between 65 and 80 km over the **Greater Himalayas**

Source: NCERT, India: Physical Environment, Class 11, pg. 9-14

Q.34) Arrange the following Hills of the North-East India in the correct sequence of their location from North to South.

1. Mikir Hills
2. Mishmi Hills
3. Dafla Hills
4. Lushai Hills

Which of the options given below is correct?

- a) 1 – 2 – 3 – 4
- b) 4 – 2 – 3 – 1
- c) 2 – 3 – 1 – 4
- d) 3 – 2 – 4 – 1

Ans) c

Exp) Option c is the correct answer.

Correct order from North to South is: Mishmi – Dafla – Mikir – Lushai. Hence, option c is correct the answer.

Option 2: Mishmi Hills: These are located at the north-eastern tip of India, in north-eastern Arunachal Pradesh.

Option 3: Dafla Hills: These are located on the border of western Arunachal and Assam occupied by an independent tribe called Daphla.

Option 1: Mikir Hills: These are a group of hills located to the south of the Kaziranga National Park, Assam. The easternmost Meghalaya comprising the detached Mikir Hills is partly isolated being surrounded by three sides. Karbi plateau or Mikir Hills is known oldest landform in Assam.

Option 4: Lushai Hills: These are a mountain range in Mizoram and Manipur, India. The range is part of the Patkai range system.

Source: <https://www.google.com/maps>

Q.35) Consider the following statements regarding United Nations Security Council (UNSC):

1. Only P-5 (Permanent-5) members can preside over the proceedings of UNSC.
2. The ten non-permanent members of UNSC are elected on a regional basis for tenure of 2 years.
3. The non-permanent members are not entitled to vote on UNSC resolutions.

Which of the statements given above is/ are correct?

- a) 1 and 2 only
- b) 2 only
- c) 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

SFG 2023 | LEVEL 2 | Test #30 – Solutions |

UNSC is of the six principal organs of the United Nations. It is composed of 15 members, consisting of 5 permanent members (China, France, Russia, United Kingdom and United States) and 10 non-permanent members. The UNSC is empowered to investigate any situation threatening international peace.

Statement 1 is incorrect: Presidency rotates between all the permanent and non-permanent members after every month.

Statement 2 is correct: The non-permanent members are elected on a regional basis for a term of 2 years. India was also an elected member at UNSC during the years 2021-22 and held presidency twice.

Statement 3 is incorrect: Both permanent and non-permanent members are entitled to vote on all the substantive matters. A decision requires affirmative votes of 3/5th (i.e. 9) members. However, a negative vote (i.e. veto) by a permanent member prevents adoption of a proposal.

Knowledge Base: Recently, India abstained from voting on the following resolutions:

Resolution sponsored by Russia alleging Ukraine and USA carrying out militarily biological activities.

Resolution declaring Russia's annexation of four Ukrainian territories as invalid.

Source: <https://www.un.org/securitycouncil/content/voting-system>

<https://www.un.org/securitycouncil/content/current-members>

<https://www.un.org/securitycouncil/content/presidency>

Q.36) Which of the following pairs is/are correctly matched?

Types of Thrust	Located Between
1. Main Frontal Thrust (MFT)	Between Shiwalik Himalayas and Northern Plain
2. Main Central Thrust (MCT)	Between the Lesser Himalayas and the Shiwalik Himalayas
3. Main Boundary Thrust (MBT)	Between the Greater Himalayas and Lesser Himalayas

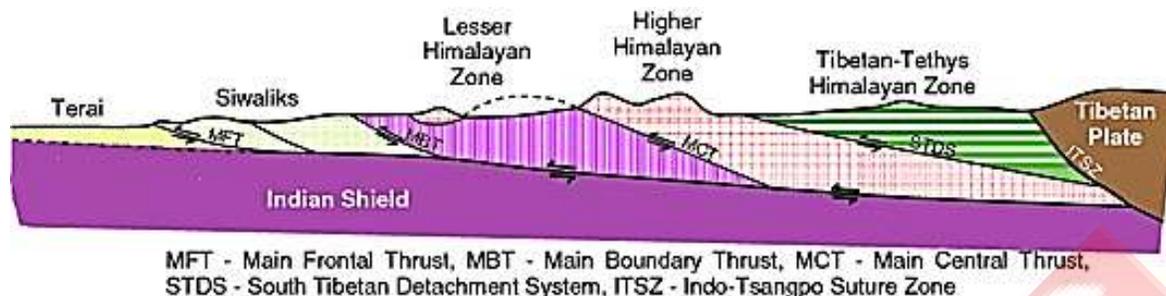

Select the correct answer using the code given below:

- a) 1 only
- b) 2 only
- c) 3 only
- d) 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

Types of Thrust	Located Between	
1) Main Frontal Thrust (MFT)	Between Shiwalik Himalayas and Northern Plain	Hence, Pair 1 is correct.
2) Main Central Thrust (MCT)	Between the Greater Himalayas and Lesser Himalayas	Hence, Pair 2 is incorrect.
3) Main Boundary Thrust (MBT)	Between the Lesser Himalayas and Shiwalik Himalayas	Hence, Pair 3 is incorrect.

Source: <http://reports.ias.ac.in/report/18600/structural-analysis-of-main-boundary-thrust-and-himalayan-frontal-thrust-around-dehra-dun-nw-himalaya-implications-of-neotectonics>

Q.37) Consider the following statements regarding the various rocks systems of India:

1. Archean rocks are only found in the Aravalli Mountains.
2. Papaghani series is related to the Cuddapah system of rocks.
3. Vindhyan rocks are largely devoid of metalliferous minerals.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 2 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

India's geographical land area can be classified into: Archaean System, Dharwar System, Cuddapah System, Vindhyan System, Gondwana System, Deccan Trap, Tertiary System and Quaternary System.

Statement 1 is incorrect: Archean rocks, also known as Pre-Cambrian rocks are the oldest rocks of the earth's crust. This period marks the development of first photosynthesis, the life support atmosphere. **The Archean rocks in India are found in Aravallis mountains, 2/3rd of the Deccan peninsula and some parts of north east. So, it is not limited to only Aravallis region.** These rocks have abundant metallic and non-metallic minerals such as iron, copper, manganese, bauxite, lead, zinc, gold, silver, tin, tungsten, mica, asbestos, graphite etc.

Statement 2 is correct: Cuddapah System rocks have been formed as a result of erosion and sedimentation of the rocks of Dharwar system, these are also sedimentary rocks. The rocks have been named after the district of Cuddapah in Andhra Pradesh where these are semi-circular in expansion. These are famous for sandstone, limestone, quartzite, slate, marble and asbestos. The Cuddapah rocks are also found in Rajasthan, Chhattisgarh, Delhi and the lesser Himalayas. **One of the important series of Cuddapah System is Papaghani series**, named after the river of same name in Andhra Pradesh.

Statement 3 is correct: Vindhyan System have been formed after the cuddapah rocks by the deposition of silt of river valleys and shallow oceans, these rocks are also sedimentary rocks. The rocks are largely **devoid of metalliferous minerals**, but provides large quantities of durable stones, ornamental stones, limestone, pure glass making sand etc. This system rocks are extensively distributed in India from Chittorgarh (Rajasthan) to Sasaram (Bihar). These rocks are found in the Vindhyas, e.g. the Malwa plateau, the Semari range in the Son valley, Bundelkhand etc. **This rock system is famous for house-building rocks.** The Sanchi Stupa, the Red Fort, the Jama Masjid etc are built with the red sandstone of this structure.

Q.38) With reference to the Western Himalayas, consider the following statements:

1. All the three ranges (Greater, Lesser and Shiwalik) of Himalayas are found in this region.
2. The Shiwalik Himalayas is locally known as Nagtibha in Uttarakhand.
3. Bhotiya is a tribe which lives in the upper reaches of Himalayas.
4. Marg are the summer grasslands found on the slopes of Lesser Himalayas.

Which of the statements given above are correct?

- a) 2 and 3 only
- b) 1, 3 and 4 only
- c) 2, 3, and 4 only
- d) 1, 2, 3 and 4

Ans) b

Exp) Option b is the correct answer.

Western Himalayas lies approximately between the Indus in the west and the Kali River in the east (880 km). These Himalayas spread across three states of Jammu and Kashmir, Himachal Pradesh and Uttarakhand.

Statement 1 is correct: All the three ranges of Himalayas are prominent in the region of Himachal and Uttarakhand Himalayas. These are the Great Himalayan range, the Lesser Himalayas and the Shiwalik range from the North to the South.

Statement 2 is incorrect: The Lesser Himalayas is locally known as Dhaoladhar in Himachal Pradesh and Nagtibha in Uttarakhand (Not Shiwalik Himalayas).

Statement 3 is correct: Bhotiyas are people of presumed Tibetan heritage that live along the Indo-Tibetan border in the upper reaches of the Great Himalayas. They were primarily traders and involved in the Indo-Tibetan trade. But when the trade stopped after 1962 due to Indo-China war, they were left without any job. The government later on recognised the tribe as Scheduled Tribe and offered them benefits in education and service industry.

Statement 4 is correct: Bahaks/Margs are the summer grasslands in Jammu and Kashmir. These are small grasslands on the slopes of Lesser Himalayan range. Whereas 'Bogyals' are the summer grasslands of Bhotias in the state of Uttarakhand in the higher reaches.

Source: 11th Geography-INDIA: PHYSICAL ENVIRONMENT + Chapter - 8 (STRUCTURE AND PHYSIOGRAPHY)

Q.39) Which of the following statements best describes the difference between the Eastern Ghats and the Western Ghats?

1. Eastern Ghats are comparatively more continuous than Western Ghats.
2. Eastern Ghats have a much higher level of biological diversity than Western Ghats.
3. Eastern Ghats are usually older than the Western Ghats.

Select the correct answer using the code given below:

- a) 1 only
- b) 3 only
- c) 1 and 2 only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

Ghats are two mountain ranges forming the eastern and western edges of the Deccan plateau of peninsular India. The two ranges run roughly parallel to the Bay of Bengal and Arabian Sea coasts, respectively, from which they are separated by strips of fairly level coastal land.

Statement 1 is incorrect: Western Ghats are comparatively higher in elevation and more continuous than the Eastern Ghats. Their average elevation is about 1,500 m with the height increasing from north to south. **Eastern Ghats comprising the discontinuous and low hills** are highly eroded by the rivers such as the Mahanadi, the Godavari, the Krishna, the Kaveri, etc.

Statement 2 is incorrect: Western Ghats has an exceptionally high level of biological diversity and endemism and is recognized as **one of the world's eight 'hottest hotspots' of biological diversity**. The forests of the site include some of the best representatives of non-equatorial tropical evergreen forests anywhere and are home to at least 325 globally threatened flora, fauna, bird, amphibian, reptile and fish species.

Statement 3 is correct: Eastern Ghats are older than the Western Ghats and have a complex geologic history. Eastern Ghats were formed during the breakup of the supercontinent Gondwana 600 - 700 million years ago, while the Western Ghats were formed more recently when the supercontinent Gondwana broke up about 150 million years ago. **The Western Ghats are on average several thousand feet higher than the Eastern Ghats primarily because they are hundreds of millions of years younger.**

Q.40) With respect to the terms 'Global North' and 'Global South', often seen in the news, consider the following statements:

1. Brandt line is a visual depiction of the North-South divide.
2. India showing Zambia how to convert cotton by-products into clean energy and jobs is an example of South-South cooperation.

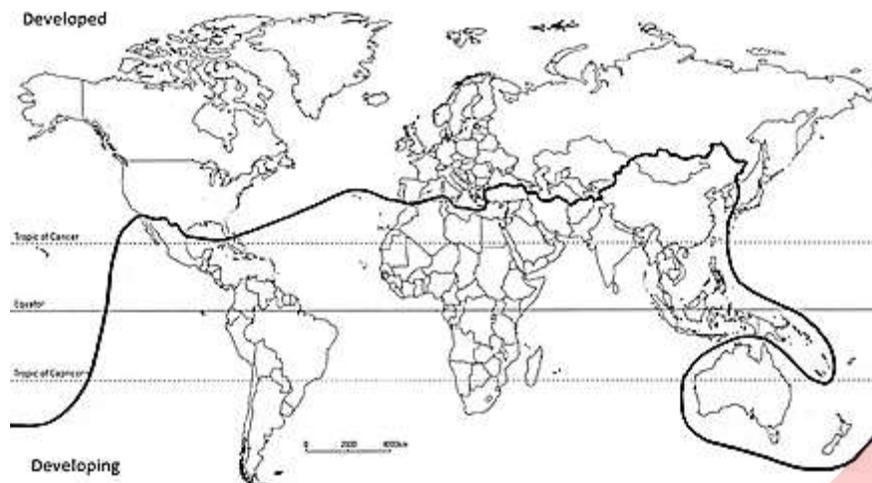

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: The Brandt line is used to present the North-South divide. This was proposed by former German Chancellor **Willy Brandt in 1980s**.

Statement 2 is correct: South-South Cooperation means **manifestation of solidarity among people and countries of Global South**. Hence, India showing Zambia how to convert cotton by-products into clean energy and jobs is an example of South-South Cooperation. Other examples can be India's developmental assistance to Madagascar, Sri Lanka etc.

Knowledge Base: The United Nations Office for South-South Cooperation promotes and facilitates South-South and triangular cooperation for development on a global and United Nations system-wide basis. The Office is supporting the countries of the Global South to fight the pandemic and its social and economic fallout through cooperation.

Source: <https://unctad.org/news/south-south-cooperation-offers-solutions-solidarity-global-challenges>

<https://www.un.org/en/observances/south-south-cooperation-day>

<https://www.google.com/url?sa=i&url=https%3A%2F%2Fwww.bisa.ac.uk%2Farticles%2Fbrandt-line-after-forty-years-more-north-south-relations-change-more-they-stay-same&psig=AOvVaw0yv6AeeOxH1LX2n6BN3LcJ&ust=1674377782022000&source=images&cd=vfe&ved=0CBAQjRxqFwoTCIjzl7ml2PwCFQAAAAAdAAAAABAR>)

Q.41) Which of the following cities are located to the North of Mumbai?

1. Nasik
2. Nagpur
3. Pune
4. Aurangabad

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2 and 4 only

Ans) d

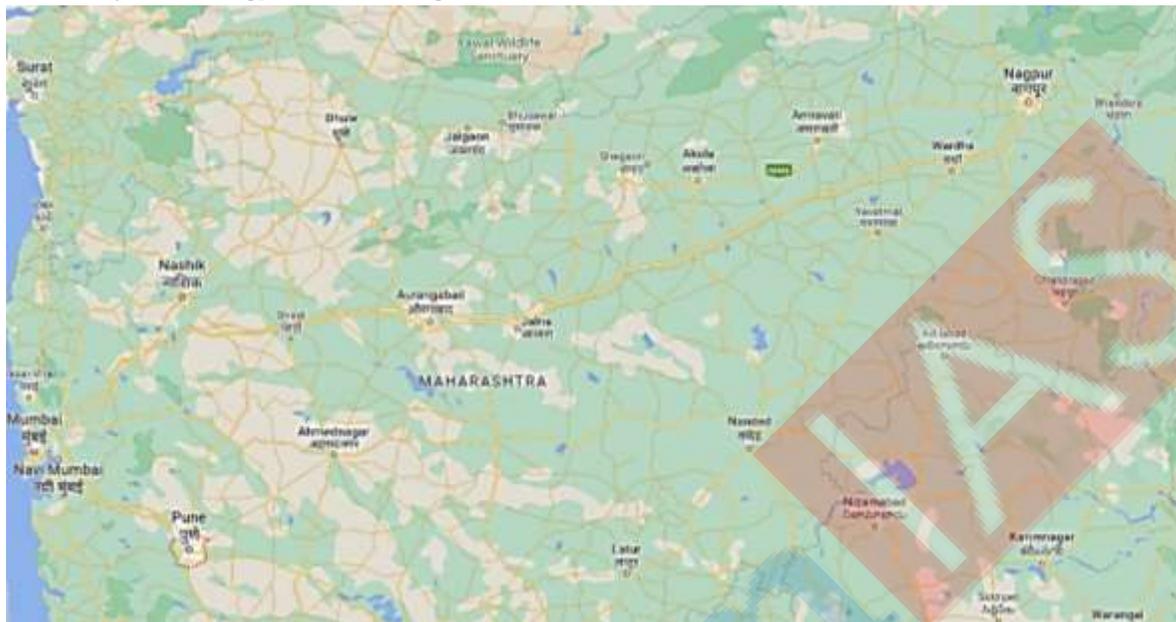

Exp) Option d is the correct answer.

Latitude is the measurement of distance north or south of the Equator. It is measured with 180 imaginary lines that form circles around Earth east-west, parallel to the Equator. Latitude of the followings cities are:

- 1) Mumbai - 19.0760° N
- 2) Nasik- 19.9975° N
- 3) Nagpur- 21.1458° N

- 4) Pune 18.5204° N
5) Aurangabad - 19.8762° N

Thus, only Nasik, Nagpur, and Aurangabad are cities located north of Mumbai.

Source: <https://www.google.com/maps/@18.8057217,79.2618272,7.03z>

Q.42) Consider the following pairs regarding different Mountain Passes:

Name of Passes	Connects
1. Aghil Pass	Ladakh with China
2. Pensi La	Kashmir Valley with Kargil.
3. Mangsha Dhura	Himachal with Ladakh.
4. Bomdila pass	Arunachal Pradesh with Myanmar.

Which of the above pairs are correctly matched?

- a) 1 and 2 only
b) 3 and 4 only
c) 1, 2 and 4 only
d) 1, 2 and 3 only

Ans) a

Exp) Option a is the correct answer.

Name of Passes	Connects	
Aghil Pass	Ladakh region with the Xinjiang Province of China.	Hence, Pair 1 is correct.
Pensi La	Connect Kashmir Valley and Kargil. It is known as the Gateway to Zaskar.	Hence, Pair 2 is correct.

SFG 2023 | LEVEL 2 | Test #30 – Solutions | Forum IAS

Mangsha Dhura	Uttarakhand with Tibet. It is used by pilgrims going to Kailash-Manasarovar. (Not Himachal with Ladakh)	Hence, Pair 3 is incorrect.
Bomdila pass	Arunachal Pradesh with Lhasa City (China). Not Arunachal Pradesh with Myanmar	Hence, Pair 4 is incorrect.

Source: DR khullar

Q.43) Which of the following hills/ranges are the part of the Satpura Range?

1. Mahadeo hill
2. Rajpipla hill
3. Maikala range
4. Rajmahal hill

Select the correct answer using the code given below:

- a) 1 and 4 only
- b) 2, 3 and 4 only
- c) 1, 2 and 3 only
- d) 1 and 3 only

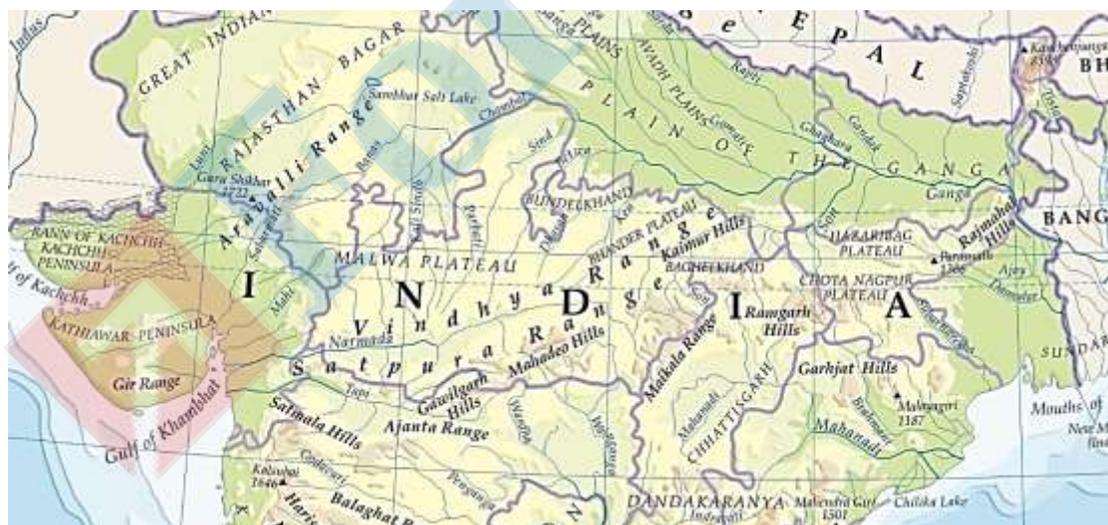

Ans) c

Exp) Option c is the correct answer.

Satpura Range is part of the Deccan plateau. The hills stretch for some 560 miles (900 km) across the widest part of peninsular India, through Maharashtra and Madhya Pradesh. The range forms the watershed between the Narmada (north) and Tapti (south) rivers.

Option 1, 2 and 3 are correct. The Satpura Range includes the **Mahadeo** Hills to the north, the **Maikala** Range to the east, and the **Rajpipla** Hills to the west.

Although it is economically poor, the Satpura Range contains some worked manganese and coal deposits in its south-eastern flanks. It is largely forested, dissected plateau country, and it contains valuable teak stands in the west.

Option 4 is incorrect. The Rajmahal Hills are not part of Satpura range. Rajmahal hills forms the northeastern edge of the Chotanagpur Plateau. These hills are mostly made of basalt and are covered by lava flows {Basaltic Lava}. They run in north-south direction and rise to average elevation of 400 m (highest mount is 567 m). These hills have been dissected into separate plateaus.

Source: DR Khullar chapter 3

Q.44) Duncan Passage is a strait in the Bay of Bengal that separates which of the following two Islands?

- North Andaman and Middle Andaman
- Middle Andaman and Southern Andaman
- Southern Andaman and Little Andaman
- Little Andaman and Car Nicobar

Ans) c

Exp) Option c is the correct answer.

Duncan Passage is about 48 km wide passage which separates **South Andaman** (Rutland Island) in the north from **Little Andaman** in the south. Hence, option c is correct answer.

Knowledge Base:

Duncan passage and Ten degree channel:

The Duncan passage is not similar to ten degree channel. Duncan passage separates two parts of the Andaman Island groups (South and Little Andaman), while the Ten degree channel separates the Andaman and the Nicobar groups.

Source: DR Khullar

Q.45) Consider the following statements regarding 'Carbon Border Tax (CBT)':

- It is a proposed tax or fees to be levied on import items by the European Union based on the quantity of carbon emitted during manufacturing of such products.
- India also imposes similar tax under the PAT (Perform, Achieve and Trade) scheme.
- As per UNCTAD, such a tax will widen income inequality between 'developed' and 'developing' countries.

Which of the statements given above is/ are correct?

- a) 1 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) c

Exp) Option c is the correct answer.

India, China, South Africa, Brazil and other countries have opposed the European Union's proposal to levy a Carbon Border Tax (CBT).

Statement 1 is correct: The CBT is a component of European Green Deal which aims to make Europe carbon neutral by 2050. It aims to levy import duty based on the quantity of carbon emitted in manufacturing of such products.

Statement 2 is incorrect: The Perform, Achieve and Trade (PAT) scheme does not provide for a levy of any carbon tax. This scheme aims at establishing a market mechanism to enhance the cost effectiveness through certification of excess energy saving which can be traded.

Statement 3 is correct: UNCTAD estimates that a CBAM at \$44 per tonne will reduce global carbon emissions by not more than 0.1 per cent but will have an adverse distributional impact because it will decrease global real income by \$3.4 billion, with developed countries income rising by \$2.5 billion while developing countries' incomes fall by \$5.9 billion. It may, thus, create more income inequality.

Source: <https://www.downtoearth.org.in/news/climate-change/eu-s-carbon-border-tax-is-it-regressive-and-protectionist-or-an-incentive-for-global-decarbonisation--86681>

Q.46) Which of the following statements regarding the process of formation of Aravalli's is correct?

- a) It is formed as a result of faulting in the ground surface due to endogenetic forces.
- b) It is formed because of gradual sedimentation bordered by two rigid masses.
- c) It is formed by magnetic intrusions and unwarping of crustal surface.
- d) It is formed due to folding of crustal rocks by compression due to endogenetic forces.

Ans) d

Exp) Option d is the correct answer.

The Aravalli's are eroded stub old, folded mountain ranges stretched for a distance of 800 km. from Himmat nagar in Gujarat to Delhi, spanning Haryana, Rajasthan, Gujarat, and Delhi.

Statement a is incorrect. The Block mountains, also known as fault block mountains, are the result of faulting caused by tensile and compressive forces motored by endogenetic forces coming from within the earth.

Statement b is incorrect. The Geosynclines, which are long narrow depressions of water are characterized by gradual sedimentation and generally bordered by two rigid masses which are called forelands.

Statement c is incorrect. The Dome mountains are originated by magnetic intrusions and up warping of the crustal surface Examples, normal domes, lava domes, batholithic domes, laccolithic domes, salt domes etc.

Statement d is correct. The Aravalli mountains are result of denudation and folding of crustal rocks by compressive forces generated by endogenetic forces coming from within the earth. They have now become relict folded mountains.

Source: Savindra Singh Physical Geography (chapter Mountain Building)
GC Leong (chapter-earth crust)

Q.47) Which of the following statements correctly describes Ferrell's Law?

- It describes the movement of cold ocean currents near the coasts providing relief to people.
- It states that any object in the northern hemisphere will deflect to its right due to earth's rotation.
- It describes the interval of the occurrence of La Nina and El Nino in the Indian Ocean.
- It shows the relationship between planet's distance from sun and amount of time it takes to revolve around the sun.

Ans) b

Exp) Option b is the correct answer.

Several laws effect the movement of wind and geographical systems in the planet and solar system. Ferrel's law is one among them.

Option b is correct - According to the Ferrel's Law, If a body moves in any direction on the earth's surface, there is a deflecting force arising from the earth's rotation, which deflects it to the right in the northern hemisphere and to the left in the southern hemisphere. It causes an apparent deflection of the path of an object that moves within a rotating coordinate system.

Source: <https://nios.ac.in/media/documents/316courseE/L-3%20PRESSURE%20AND%20WINDS.pdf>

Q.48) Which of the following are located on/found within Lakshadweep Islands?

- Barren Island
- Narcondam Island
- Baratang Islands
- Dhinodhar Hills

Select the correct answer using the code given below:

- 1, 2 and 3 only
- 2 and 3 only
- 4 only
- None of these

Ans) d

Exp) Option d is the correct answer.

Option 1 is incorrect: Barren Island is in the **Andaman and Nicobar islands**. It is India's only live volcano, erupting once again in 2017.

Option 2 is incorrect: Narcondam Island is classified as a dormant volcano by the Geological Survey of India. The Mountain house second tallest point in the **Andaman and Nicobar Islands**.

Option 3 is incorrect: Baratang Island lies 150 km from **Port Blair** in Andman Islands and has only mud volcano in India.

Option 4 is incorrect: Dhinodhar hills are located at the Kutch district of Gujarat.

Source: <http://www.walkthroughindia.com/offbeat/only-7-extinct-and-active-volcanoes-in-india/#:~:text=Only%20%20Extinct%20and%20Active%20Volcanoes%20in%20India,caves%20and%20mangrove%20forest.%203%20Narcondam%20Island.%20>

Q.49) Consider the following statements with reference to the Anticyclone:

- An anticyclone is an area of high pressure where air moves apart from centre and sinks.
- It typically indicates bad weather with high winds and excessive precipitation.
- The anticyclone compresses air with reducing humidity and leading to fewer clouds within the anticyclone.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: An anticyclone, commonly known as a high, is an area of high pressure where air moves apart from the centre of the anticyclone and sinks. Anticyclones are regions of relatively high pressure on horizontal surfaces, or high geo potential height on isobaric surfaces, around which air circulates clockwise in the Northern Hemisphere and counterclockwise in the Southern Hemisphere.

Statement 2 is incorrect: Anticyclones are often regions of clear skies. It typically indicates fair weather. Winds in an anticyclone blow clockwise in the Northern Hemisphere and counterclockwise in the Southern Hemisphere.

Statement 3 is correct: Air at the centre of an anticyclone is forced away from its area of high pressure and replaced by a downward blast of air from higher altitudes. The air compresses and heats up as it moves downward, reducing its humidity and leading to fewer clouds within the anticyclone. Although not as actively researched as cyclones, anticyclones are important because the clear, dry conditions usually associated with them may allow strong night-time radiates cooling and cold surface temperatures. The convectively stable air of anticyclones may allow air pollutants to concentrate near the Earth's surface.

Source: <https://sciencing.com/weather-occurs-during-high-pressure-system-23025.html>

<https://www.sciencedirect.com/topics/earth-and-planetary-sciences/anticyclone>

Q.50) India time and again demands for restoration of Generalized System of Preferences (GSP) by USA. Consider the following statements regarding GSP:

1. Gaining competitive edge over Bangladesh in exports to US.
2. Increase in export of steel and steel products to the US.
3. Increase in export of all textile and apparel products.

Which of the statements given above is/ are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 only
- d) 2 and 3 only

Ans) a

Exp) Option a is the correct answer.

GSP is the largest and oldest US trade preference program which promotes economic development by eliminating duties on the eligible products from the designated beneficiary countries. **In 2019, US withdrew GSP preference to India.**

Statement 1 is correct: In 2013, USA had revoked GSP status to Bangladesh on the issue of workers' rights. Restoration of GSP status to India will make Indian exports to US more competitive and helps **India gaining a competitive advantage over Bangladesh.**

Statement 2 is correct: Exporters of Indian steel are likely to get benefitted due to reduced tariff related barriers. This will **increase the export of steel and steel products.**

Statement 3 is incorrect: Certain textile products are excluded from GSP regime and are included in 'dutiable products not eligible for GSP'. Hence, **some of the textile products** shall not benefit irrespective of whether or not India enjoys GSP status.

Source: <https://foreignpolicy.com/2022/04/13/us-india-bangladesh-trade-gsp/>

<https://ustr.gov/issue-areas/trade-development/preference-programs/generalized-system-preferences-gsp/gsp-program-i-0>

Q.1) Which of the following statements are correct regarding the Indo-Brahm River theory of the evolution of the Himalayan rivers?

1. The Indo-Brahm River flowed from Assam to Punjab.
2. As per this theory, initially Yamuna was a tributary of the Indus River.
3. According to this theory, upheavals in the western Himalayas led to dismemberment of the Indo-Brahm River into three subsystems.

Select the correct answer using the code given below:

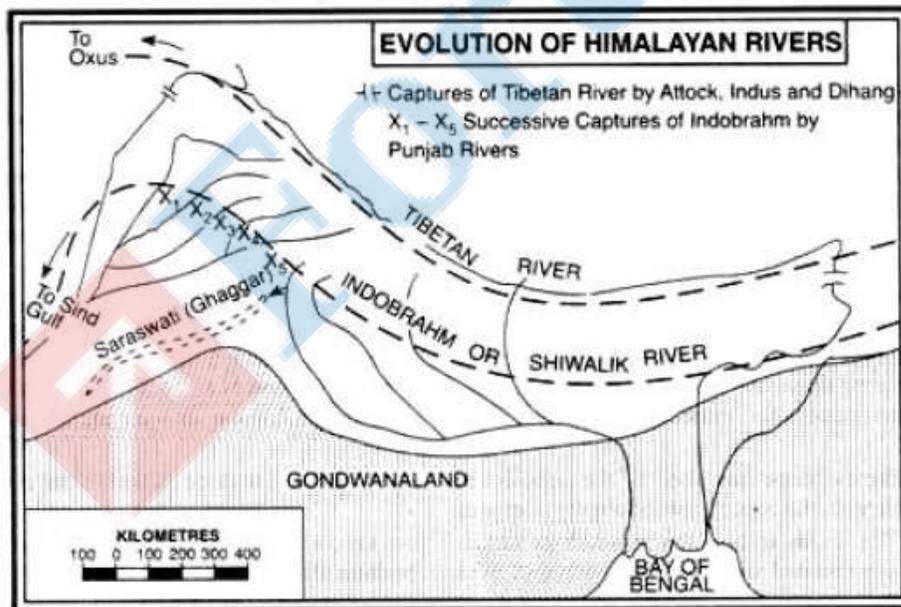

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Indo-Brahm River theory of evolution of the Himalayan rivers tried to explain complex features of the Himalayan rivers such as the longitudinal **courses** of the Indus, the Satluj and the Brahmaputra. It also explains presence of features like deep **gorges** cut by the rivers across the Himalayas and still **westerly flowing tributaries** in their upper reaches. Some geologists believe that there was a **mighty river named Siwalik or the Indo-Brahma**. It flowed northwest from Assam to Punjab from there, it took a southerly turn to join a gulf.

Statement 1 is correct: As per **Indo-Brahm River theory of evolution of the Himalayan rivers** a mighty river which flowed from Assam to Punjab and even beyond up to the Sind. **In the Eocene Epoch** the river flowed along the foot of the Himalayas first westward and then north-westward as far as north-western Punjab where it turned southward more or less along the course of the modern Indus and **emptied itself into the Arabian Sea**. The river came into being **due to earth movements which took place in the Tertiary period** and is believed to be the **successor of the Himalayan Sea**.

Statement 2 is correct: As per **Indo-Brahm River theory of evolution of the Himalayan rivers** it is supposed that the Yamuna was first a tributary of the Indus. During the **late Pleistocene and early Holocene** ages, it joined with the Sarswati somewhere near Suratgarh and **continued to flow as Ghaggar**

and finally joined the Indus. Later, it changed its course due to **tectonic disturbance along the Aravali axis and became the tributary of Ganga.**

Statement 3 is correct: As per **Indo-Brahm River theory of evolution of the Himalayan rivers**, the mighty **Indo-Brahm River** got dismembered into the following systems and subsystems:

- the Indus and the five tributaries of the Indus in Punjab
- the Gangs and its Himalayan tributaries
- the stretch of the Brahmaputra in Assam and its Himalayan tributaries

The dismemberment was the result of the following two events

- Upheavals in the western Himalayas** including the Potwar Plateau in the Pleistocene age and
- Headward erosion** by the tributaries of the Indo Brahma River.

As a result of the above-mentioned dismemberment of the Indo Brahma River, the Indus and its tributaries, the Gangs and its tributaries and the Brahmaputra and its tributaries came into being.

Source: India a comprehensive geography by D.R. Khullar, Chapter 4

Q.2) Consider the following statements regarding Indian Monsoon:

- During Summer, intense low pressure in the north-western part of the subcontinent helps in the northward shift in the position of the Intertropical Convergence Zone (ITCZ).
- The onset of monsoon in India denotes withdrawal of easterly jet stream from its position over the north Indian plains.
- The retreating southwest monsoon season is marked by a great fall in temperature.

Which of the statements given above is/are correct?

- 1 only
- 2 and 3 only
- 1 and 3 only
- 1 and 2 only

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: In the summer season, During April and May when the sun shines vertically over the Tropic of Cancer, the large landmass in the north of Indian ocean gets intensely heated. **This causes the formation of an intense low pressure in the northwestern part of the subcontinent. Since the pressure in the Indian Ocean in the south of the landmass is high as water gets heated slowly, the low pressure cell attracts the southeast trade winds across the Equator. These conditions help in the northward shift in the position of the ITCZ.** The southwest monsoon may thus, be seen as a continuation of the southeast trade winds deflected towards the Indian subcontinent after crossing the Equator. These winds cross the Equator between 40°E and 60°E longitudes.

Statement 2 is incorrect: **The shift in the position of the ITCZ is also related to the phenomenon of the withdrawal of the westerly jet stream (and not the easterly jet stream) from its position over the north Indian plain, south of the Himalayas.** The easterly jet stream sets in along 15°N latitude only after the western jet stream has withdrawn itself from the region. This easterly jet stream is held responsible for the burst of the monsoon in India.

Statement 3 is incorrect: The months of October and November are known for retreating monsoons. **The retreating southwest monsoon season is marked by clear skies and rise in temperature.** The land is still moist. Owing to the conditions of high temperature and humidity, the weather becomes rather oppressive. This is commonly known as the 'October heat'.

Source: <https://ncert.nic.in/textbook/pdf/kegy104.pdf>

Q.3) With reference to Indian soils, consider the following statements:

1. Laterite soils are rich in Volcanic ash content.
2. Peninsular soils have High content of Iron oxide.
3. Peaty soils have large amounts of organic material.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 only
- c) 2 and 3 only
- d) 1, 2, and 3

Ans) c

Exp) Option c is the correct answer.

Indian soils, as in other parts of the world, reflect a combination of factors that have contributed to their formation.

Option 1 is incorrect: India is not situated on an active volcanic belt or in proximity to any significant volcanic activity. The Deccan Plateau, which is a result of volcanic eruptions that occurred millions of years ago, is an exception. **However, the volcanic ash from these eruptions has been mostly weathered and eroded over time, leading to its minimal presence in Indian soils.** In contrast, countries like Japan, Indonesia, and Iceland have higher volcanic ash content in their soils due to their location along active volcanic belts.

Whereas Laterite soils are rich in **bauxite or ferric oxides**. They are very **poor** in lime, magnesia, **potash and nitrogen**.

Option 2 is correct: The **peninsular** region is primarily composed of ancient crystalline rocks such as granites, gneisses, and schists, which are rich in iron and other minerals. **These rocks, over time, have weathered to form soils that are rich in iron oxide.**

Option 3 is correct: Peaty and marshy soils are soils with **large amounts of organic matter** and considerable amounts of soluble salts. **The most humid regions have this type of soil. They are black, heavy and highly acidic.**

Q.4) Which of the following are classified as ‘Minor Forest Produce’ under the Forest Rights Act of 2006?

1. Bamboo
2. Medicinal plants and herbs
3. Tendu or Kendu leaves
4. Sandalwood

Select the correct answer from the code given below:

- a) 1, 2 and 3 only
- b) 1, 2 and 4 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) a

Exp) option a is the correct answer.

Minor Forest Produces provide both subsistence and cash income for people who live in or near forests. They form a major portion of their food, fruits, medicines and other consumption items and also provide cash income through sale.

Option 1 is correct: Bamboo was recognized as a Minor Forest Produce way back in 2006, now its selling rights have been given to villages. Bamboo was given the status of a minor forest produce (MFP) in the Forest Rights Act, 2006 (Scheduled Tribes and Traditional Forest Dwellers [Recognition of Forest Rights] Act).

The Indian Forest Act 1927 was amended in 2017 to remove bamboo for the category of trees. As a result, anyone can undertake cultivation on non-forest land without the need of a felling and transit permission.

Option 2 and 3 are correct: Section 2(i) of the said Act defines a Minor Forest Produce (MFP) as all non-timber forest produce of plant origin and includes bamboo, brushwood, stumps, canes, Tusser, cocoon, honey, waxes, Lac, tendu/kendu leaves, medicinal plants and herbs, roots, tuber and the like.

Option 4 is incorrect: Sandal wood is not declared as a minor forest produce under FRA, 2006

Source: <https://trifed.tribal.gov.in/program/non-timber#:~:text=Under%20Forest%20Rights%20Act%2C%202006,roots%2C%20tubers%20and%20the%20like.>

Q.5) With reference to features of Hoysala temple architecture, consider the following statements:

1. Multiple shrines were constructed around a central pillared hall.
2. The Hoysala temple followed the ground plan of Panchayatan style of temple making.
3. The main building material was soft soapstone.
4. Temple was built on an upraised platform called Jagati.

Which of the statements given above are correct?

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

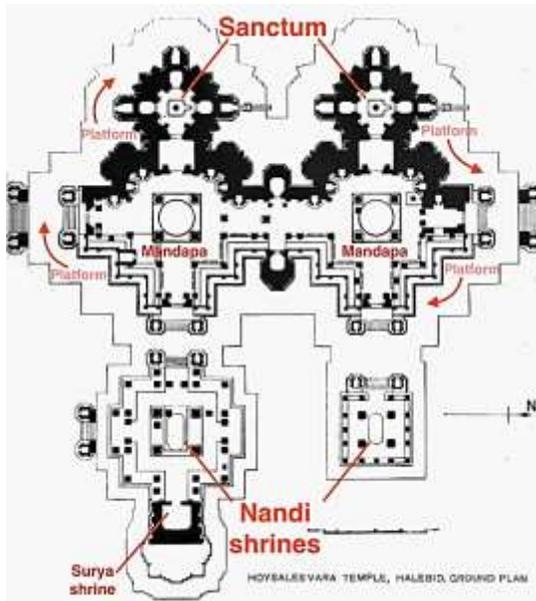

In the region of Karnataka near Mysore, the temples built under the Hoysala rulers developed a distinct style of their own known as the Hoysala School of art. It developed in the period from 1050-1300 A.D with the prominent seats being Belur, Halebid and Sringeri. For example, Chennakesava temple, Somanathapura, Hoyasaleswara temple at Halebid, Vijayanarayana temple at Belur.

Statement 1 is correct: Multiple shrines in Hoysala architecture were built around a central pillared hall.

Statement 2 is incorrect: The Hoysala temple follow Stellate plan. Unlike the crucified ground plan of the Panchayatan style, the shrines led out in the shape of an intricately designed star called Stellate plan.

Statement 3 is correct: soft soapstone or Chlorite schist was the main building material for Hoysala temples.

Statement 4 is correct: The temples were built on an upraised platform known as Jagati. It has around 1 metre height.

Knowledge Base: other features of hoysala temple art are:

- 1) Massive emphasis was laid on the decoration of the temple through sculptures. Both the interior and exterior walls, even the jewellery worn by the deities were intricately carved.
- 2) All the chambers had Shikharas which were interconnected by an arrangement of horizontal lines and mouldings. This resolved the tower into an orderly succession of tiers
- 3) The walls and stairs of the temple followed a zigzag pattern.

Source: Nitin Singhania, chapter 1

Q.6) In the context of recently published Forest (Conservation) Rules 2022, consider the following statements:

1. The rules allow private parties to cultivate plantations and sell them to the companies who need to meet compensatory afforestation targets.
2. The consent of Gram Sabha for diversion of forest land has been made mandatory.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Forest (Conservation) Rules 2022 were recently published by the Ministry of Environment, Forest and Climate Change under the Forest Conservation Act 1980.

Statement 1 is correct: The rules make a provision for private parties to cultivate plantations and sell them as land to companies who need to meet compensatory afforestation targets. Prior to the updated rules, state bodies would forward documents to the FAC (Forest Advisory Committee) that would also include information on the status of whether the forest rights of locals in the area were settled.

Statement 2 is incorrect: The consent of Gram Sabhas is no longer needed for the diversion of land. The new rules state that a project, once approved by the Forest Advisory Committee, will then be passed on to the State authorities who will collect the compensatory fund and land, and process it for final approval.

Previously consent of Gram Sabha, or the governing body in villages in the area, was required to give written consent to the diversion of the forest.

Source: <https://www.thehindu.com/sci-tech/energy-and-environment/national-commission-for-scheduled-tribes-position-on-new-forest-conservation-rules-will-be-same/article66330603.ece>
<https://blog.forumias.com/forest-conservation-rules-2022/>

Q.7) Consider the following pairs of waterfalls and their location:

Waterfall	Location
1. Kunchikal Waterfall	Karnataka
2. Dudhsagar Waterfall	Maharashtra
3. Jog Waterfall	Goa
4. Dhuandhar Waterfall	Madhya Pradesh

How many pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) All four pairs

Ans) b

Exp) Option b is the correct answer.

A waterfall is a point in a river or stream **where water flows over a vertical drop** or a series of steep drops. Waterfalls represent major interruptions in river flow. The Indian River system has some unique and picturesque waterfalls.

Pair 1 is correct: Kunchikal Waterfalls is in the Shimoga district of Karnataka. It is created by the Varahi River. It is India's highest waterfall with a height of 455 meters.

Pair 2 is incorrect: Dudhsagar waterfall is located in Goa (and not in Maharashtra). It gets water from the Mandovi river. This waterfall is also **known as the Sea of Milk**. It is surrounded by dense jungle, high peaks, and the greenery of the Western Ghats. During the Monsoon season, it becomes one of the most famous natural phenomena in Goa.

Pair 3 is incorrect: Jog Waterfall is located in the Shimoga District of Karnataka (and not in Goa). It gets its water from the **Sharavathi River**. It is the **second-highest plunge waterfall in India**. It is associated with the **Linganamakki Dam** across the Sharavati River. Due to its rich ecological surrounding region, Jog Falls is declared as one of the **UNESCO ecological hotspots** in the world. So, pair 3 is incorrectly matched.

Pair 4 is correct: Dhuandhar waterfall is in Jabalpur, Madhya Pradesh. It is formed on Narmada River. When the moonlight falls on the white marble rocks, they take on a silvery appearance. The Ropeway facility provides a magnificent view from the top.

Source: India a comprehensive geography by D.R. Khullar, Chapter 4

Q.8) Consider the following statements regarding ‘Bardosila’:

1. These are the evening thunderstorms of hot weather season in Assam.
2. These showers are useful for tea, jute and rice cultivation.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Due to the apparent northward movement of the Sun temperature start rising from March, toward the end of May a low-pressure trough is developed which extends from the Thar Desert in the northwest to the Chotanagpur plateau in the east. In the eastern and North-Eastern parts of the subcontinent, violent thunderstorms at a speed of about 60 km to 80 km per hour are experienced. Their direction is mainly from the North-West hence they are called the Norwesters.

Statement 1 is correct: The Norwesters occur in the month of Baisakh and thus are locally known as Kalbaisakhi in Bengal and **Bardosila in Assam**. These are the local Storms of Hot Weather Season.

Statement 2 is correct: Apart from its destructive effects of the local storms during hot weather, **they are also useful for the cultivation of tea, jute and rice.**

Source: <https://ncert.nic.in/ncerts/l/kegy104.pdf>

Q.9) Consider the following statements with reference to effects of soil erosion:

1. Soil erosion can cause water pollution in nearby waterbodies.
2. Soil erosion of the top layer reduces the ability for water to infiltrate deeper levels.
3. There is a greater chance of increased soil acidity due to soil erosion.

Which of the above given statements is/are correct?

- a) 1 only
- b) 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: **Soils erosion** from agricultural lands carry pesticides, heavy metals, and fertilizers which are washed into nearby waterbodies like streams and waterways. This **leads to water pollution** and damage to marine and freshwater habitats. Accumulated sediments can also cause clogging of water ways and raises the water level leading to flooding.

Statement 2 is correct: When the soil under the topsoil becomes compacted and stiff, **it reduces the ability for water to infiltrate in the deeper levels, keeping runoff at greater levels.** This further increases the risk of more serious erosion.

Statement 3 is correct: **When the structure of the soil becomes compromised, and organic matter is greatly reduced, there is a higher chance of increased soil acidity,** which will significantly impact the ability for plants and crops to grow.

Source: Indian Comprehensive Geography by D R Khullar – Chapter-7

<https://www.conserve-energy-future.com/causes-effects-solutions-of-soil-erosion.php>

Q.10) For the first time, Indian constitution was translated into which of the following script recently?

- a) Mahajani
- b) Modi
- c) Ol Chiki
- d) Khmer

Ans) c

Exp) Option c is the correct answer.

Recently for the first time Indian Constitution was Translated into Ol Chiki script. It is a script of Santhali language. An assistant professor in the Santali language at the Sidho-Kanho-Birsha University in Purulia, West Bengal, Sripati Tudu started this initiative. He wanted the document to be more accessible and available for a wider group that may not necessarily be familiar with languages in which a translation of the Constitution is available.

Santali (Santhali) was a mainly oral language until the development of Ol Chiki **by Pandit Raghunath Murmu in 1925**. Ol Chiki is alphabetic, sharing none of the syllabic properties of the other Indic scripts, and is now widely used to write Santali in India.

Knowledge Base:

Any Indian national can translate the Constitution in their own language. The department of Official Languages under the Union Ministry of Home Affairs oversees the implementation of the provisions of the Constitution relating to official languages and the provisions of the Official Languages Act, 1963. No permission is needed for translations. The individual also has the right to generate income by selling their translation of the Constitution.

Source: <https://blog.forumias.com/translated-into-ol-chiki-for-first-time-santals-get-to-read-indias-constitution-in-their-own-script/>

Q.11) Which of the following rivers flowing through India, originate outside India?

- 1. Satluj
- 2. Brahmaputra
- 3. Indus
- 4. Yamuna
- 5. Gandak

Select the correct answer using the code given below:

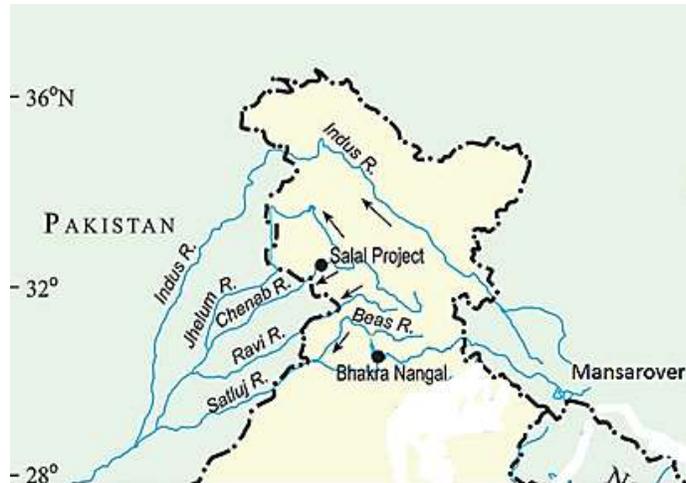

- a) 1, 2 and 4 only
- b) 2, 3 and 4 only
- c) 1, 2, 3 and 5 only
- d) 1, 2, and 5 only

Ans) c

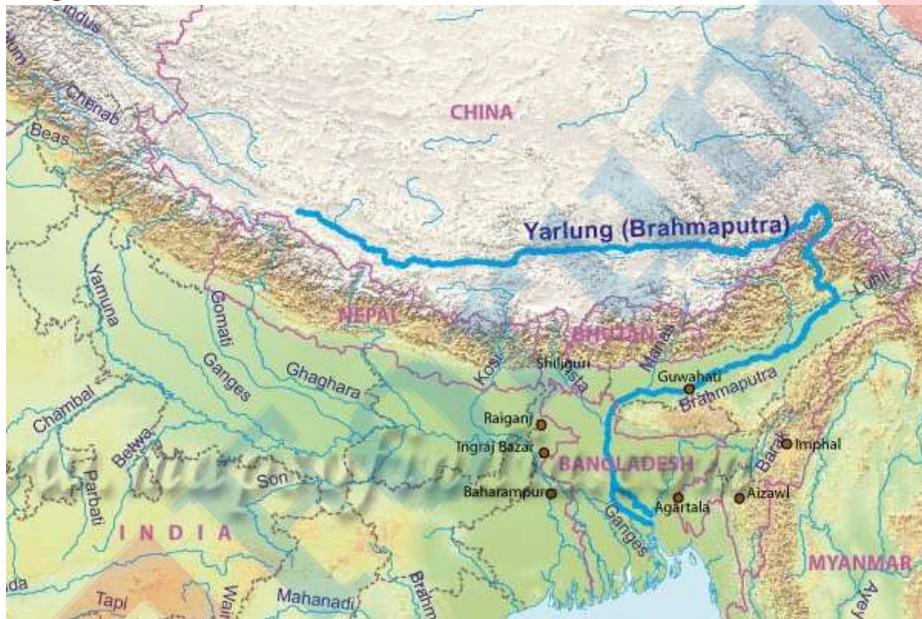

Exp) Option c is the correct answer.

The Himalayas are drained by many rivers. These rivers originate from the **snowy mountains of Himalayas** and flows. Due to **high atmospheric pressure** at Himalayas Mountain **water vapours freeze as ice and in the summer due to heat ice begin melting** as water and it flows from Himalayas to the downwards plain areas as rivers.

Option1 is correct: River Sutlej originates outside India, near Rakastal at Mount Kailash, Tibet plateau. It enters India through Shipki la Pass. The river Sutlej is known as **Langqen Zagbo inside Tibet/China**. The river is the **easternmost tributary of the Indus River**. The Sutlej River usually runs according to a **west to southwest** itinerary moving into India via the **Shipki La Pass** located in Himachal Pradesh.

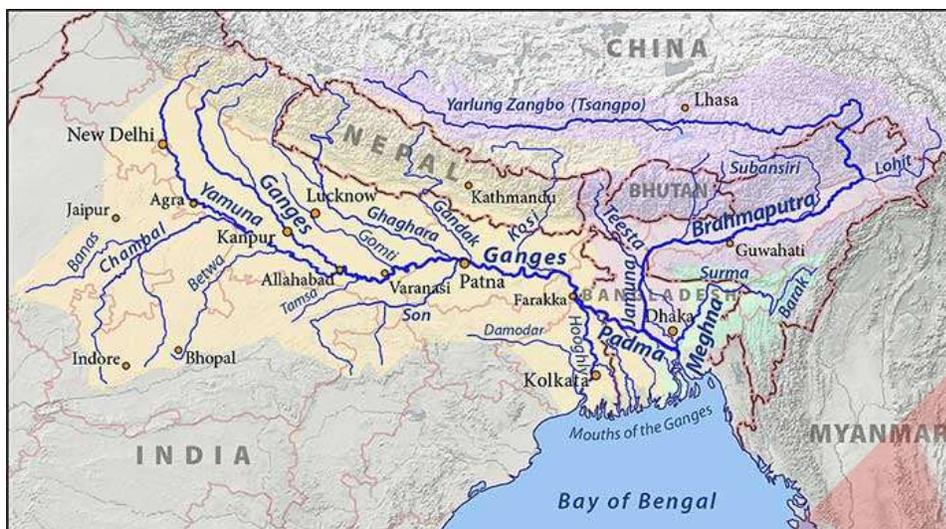

Option 2 is correct: The Brahmaputra is a trans-boundary river which originates from the Kailash ranges of Himalayas. After flowing through Tibet, it enters India through Arunachal Pradesh and flows through Assam and Bangladesh before it joins the Bay of Bengal. It is also known as the Yarlung Tsangpo in Tibet, the Siang/Dihang River in Arunachal Pradesh, Lohit and Brahmaputra in Assam, and Jamuna River in Bangladesh.

Option 3 is correct: The Indus is a transboundary river of Asia and a trans-Himalayan River of South and Central Asia. The Kailash range glaciers at Manasarovar Lake are the source of the Indus River. The Indus River has a length of around 2880 km, of which only 710 km are in the Indian state of Jammu & Kashmir. The Indus River known as Singhi Khamban or Lion's Mouth near its origin.

Option 4 is incorrect: The source of Yamuna lies in the Yamunotri Glacier on the southwestern slopes of Banderpooch peaks, which lie in the Mussoorie range of the Lower Himalayas, north of Haridwar in Uttarakhand. So, option 4 is incorrect.

Statement 5 is correct: Gandak River rises in the glacial of southern Tibet at altitude of 7,620 mt near Tibet Nepal border. Gandak River, also called **Narayani River**, is formed by the union of the Kali and Trisuli rivers. After merging from this junction to the Indian border the river is called the Narayani. **The Gandak River**, is one of the major rivers **left bank tributary of the Ganges** in India. Its total catchment area amounts to 46,300 km², **most of it in Nepal. In the Nepal Himalayas, it is notable for its deep canyon.**
Source: India a comprehensive geography by D.R. Khullar, Chapter 4

Q.12) Consider the following statements regarding the river Sukapaika:

1. It originates in Andhra Pradesh.
2. Recently, National Green Tribunal (NGT) ordered to revive and rejuvenate the river Sukapaika.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Sukapaika river located in Odisha is one of the several **distributaries of the Mahanadi River**. Sukapaika's riverbed has suffered **massive erosion** and the surface of the river is witnessing unusually **high growth of hyacinth**. The river which stopped flowing 70 years ago in Odisha's Cuttack district is set to be rejuvenated now.

Statement 1 is incorrect: **Sukapaika river** is one of the **distributaries of the river Mahanadi**. It originates from Ayathur Village in **Cuttack district of Odisha (and not in Andhra Pradesh)**. It branches away from the Mahanadi at Ayatpur village in Cuttack district and flows for about 40 kilometres before re-joining its parent river at Tarapur in the same district. In the process, it drains a large landmass comprising over hundreds of villages. So, statement 1 is incorrect.

Statement 2 is correct: **The National Green Tribunal (NGT) has directed** the Odisha government **to revive and rejuvenate a dead Sukapaika river in next six months** by earmarking a dedicated fund for the purpose. It is alleged that the river Sukapaika in Cuttack district became dead after its mouth was closed, restricting its free flow in the 1950s. The entire riverbed was **converted into a dumping ground for garbage and solid**

and liquid waste. Some petitioners had moved the tribunal seeking its revival. The Odisha Government has started working on revival plans following a recent direction by NGT.

Source : <https://www.thehindu.com/news/national/other-states/national-green-tribunal-directs-to-revive-sukapaika-river-in-odisha-in-next-six-months/article65958091.ece>

<https://www.thehindu.com/news/national/breathing-life-into-a-dead-river-in-odisha/article66045196.ece>

Q.13) Consider the following statements with reference to the Contour Ploughing:

1. In this practice, ploughing is done perpendicular to the slope.
2. It is helpful in water conservation.
3. It can lead to decreased usage of fertilizer.

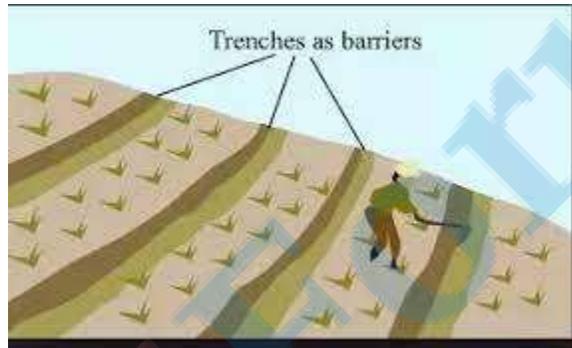

Which of the above given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: Contour ploughing is a farming practice where plowing and/or planting is done across a slope following its elevation contour lines. These contour lines create a water break which reduces the formation of rills and gullies during times of heavy precipitation, allowing more time for the water to settle into the soil. **In contour ploughing, the ruts made by the plow run perpendicular rather than parallel to the slopes, generally furrows that curve around the land and are level.**

Statement 2 is correct: Contour ploughing is a well-established agronomic measure that contributes to soil and water conservation. The soil is ploughed along the contour. This decreases the velocity of runoff and thus soil erosion by concentrating water in the downward furrows. Contour ploughing purposely builds a barrier against rainwater runoff which is collected in the furrows.

Statement 3 is correct: Contour ploughing has been proven to reduce fertilizer loss which would lead to less usage of fertiliser. Because contour cropping reduces fertility loss through erosion and leaching, it reduces the need for fertilizer application. Reduced demand for fertilizer means reduced production costs.

Source: Indian Comprehensive Geography by D R Khullar – Chapter-7

Q.14) Consider the following statements regarding the Cold Weather Season in India:

1. Weak temperate cyclones from the Mediterranean Sea cause rainfall in the north-western parts of India.
2. The cold winds coming from Turkmenistan bring cold wave along with frost and fog over the northwestern parts of India.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

The climatic conditions of India can best be described in terms of an annual cycle of seasons. The meteorologists recognise the following four seasons : (1) the cold weather season (2) the hot weather season (3) the southwest monsoon season (4) the retreating monsoon season.

Statement 1 is correct: Winter monsoons do not cause rainfall as they move from land to the sea. Key factors for this are- little humidity and anti-cyclonic circulation on land. So, most parts of India do not have rainfall in the winter season. However, there are some exceptions to it such as- in **north-western India, some weak temperate cyclones from the Mediterranean Sea cause rainfall in Punjab, Haryana, Delhi and western Uttar Pradesh. Although the amount is meagre, it is highly beneficial for rabi crops.**

Statement 2 is correct: One of the main reasons for the excessive cold in north India during cold weather season is that the cold winds coming from the **Caspian Sea and Turkmenistan** during February bring cold wave along with **frost and fog over the north-western parts of India.**

Source: <https://ncert.nic.in/textbook/pdf/kegy104.pdf>

Q.15) Consider the following Pairs:

Festivals/Fairs	Description
1. Byanjana Dwadashi	It is a vaishnavite festival celebrating variety of foods.
2. Medaram jatra	It is considered as Asia's largest tribal festival.
3. Minjar Mela	Held in Gujarat, this fair is associated with blooming of Cotton flowers.
4. Jagra fair	In this fair, songs are sung after invoking the deity of Mahasu

How many pairs given above are correctly matched?

- a) One pair only
- b) Two pairs only
- c) Three pairs only
- d) All four pairs

Ans) c

Exp) Option c is the correct answer.

Festivals and fairs form an intrinsic part of Indian culture being an outpouring medium of our beliefs and emotions.

Pair 1 is correct: Byanjana Dwadashi is celebrated by adherents of Vaishnavism sect within Hinduism. The festival celebrates a variety of food (Byanjana in Odia) on the 12th day (Dwadashi) of the Sukla Paksha or waxing phase of the moon. It is to commemorate an episode of the Mahabharata, where Yashoda observes that her son Krishna is pale and weak. She prepares a lot of delicacies and feeds him. Krishna and his friends – the Gopala Balakas or cowherd boys – also eat with him.

Pair 2 is correct: Telangana's Medaram Jatara, considered to be Asia's largest tribal fair celebrated over four days every two years at Medaram village of Mulugu district. It celebrates the valour of Adivasi icons Sammakka and Sarakka, who are considered to be protectors of the community.

Pair 3 is incorrect: Minjar Mela is held in Chamba, Himachal Pradesh. The inflorescence of the maize plant is called Minjar. When flowers bloom on the maize, Minjar Mela is also celebrated and in this fair, tourists from all over the country come from far and wide to take part.

Pair 4 is correct: In Jagra fairs, Bisu songs are sung after invoking the deity of Mahasu. This awakening of Mahasu Devta takes place in Himachal at Shimla, Kinnaur and Sirmaur; simultaneously in Uttarakhand. It is held when the kharif crop ripens in September.

<https://www.downtoearth.org.in/news/food/byanjana-dwadashi-how-a-500-year-old-festival-in-odisha-symbolises-community-food-security-and-balanced-diet-81632>

<https://indianexpress.com/article/cities/hyderabad/medaram-jatara-telangana-7776436/>

Q.16) Which of the following trees are the characteristic trees of the Tropical Evergreen forests of India?

1. Mahogany
2. Sandalwood
3. Babul

Select the correct answer using the code given below:

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1 only

Ans) d

Exp) option d is the correct answer.

Tropical Evergreen forests are one of the most dominant parts of Natural vegetation in India. They flourish in areas that have rainfall of over 200 cm.

Option 1 is correct: Mahogany and Rosewood trees are found in the **tropical evergreen forest**. The tropical evergreen forest is also called tropical rain forest. The Mahogany is a reddish-brown, straight-grained timber possessing 3 tropical hardwood species belonging to the genus Swietenia.

Option 2 is incorrect: Sandalwood is a dry deciduous forest species native to China, India, Indonesia, Australia, and the Philippines.

Option 3 is incorrect: Babul is found in tropical thorn forests predominantly in Rajasthan, south-western Punjab, western Haryana, Kutch and neighboring parts of Saurashtra.

Source: Khullar

Q.17) Consider the following statements regarding various local winds in India:

1. Kali Andhi are violent dust storms occurring in the northwestern parts of the Indo-Gangetic Plains.
2. Loo are the strong, cold and moist winds blowing during the night over the peninsular India.
3. Shamal are the hot and dry winds blowing over the coasts of Tamil Nadu during the summer season.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1 and 2 only

Ans) a

Exp) Option a is the correct answer.

Local winds occur on a small spatial scale. They also tend to be short-lived lasting typically several hours to a day. There are many such winds around the world, some of them cold, some warm, some wet, some dry. Few of the popular winds in India and the world are discussed below:

Statement 1 is correct: Black storms, locally called Kali Andhi are violent dust squalls that occur in the late-spring in the northwestern parts of the Indo-Gangetic Plain region of the Indian Subcontinent. They are usually brief, but they can block out the sun, drastically reduce visibility and cause property damage and injuries. They are a common precursor to the arrival of the monsoon in the northern plains. It is quite common in Punjab in the Cholistan and Thar deserts in Pakistan and Rajasthan in India.

Statement 2 is incorrect: A striking feature of the hot weather season is the 'loo'. These are strong, gusty, **hot, dry winds** blowing during the day over the **north and northwestern India**. Sometimes they even continue until late in the evening. Direct exposure to these winds may even prove to be fatal. Dust storms are very common during the month of May in northern India. These storms bring temporary relief as they lower the temperature and may bring light rain and cool breeze.

Statement 3 is incorrect: Shamal are the hot, dry and dusty wind from the north or northwest in Iraq, Iran, and the Arabian Peninsula. In June and July it blows almost continuously, but usually under 50 km (about 30 miles) per hour. The wind causes great dust storms, especially in July, when Baghdad may experience five or more such storms. The shamal is part of a widespread flow toward a low-pressure centre over Pakistan.

Source: <https://www.weatheronline.co.uk/reports/wind/The-Andhi.htm>

https://dbpedia.org/page/Black_storm

<https://www.britannica.com/science/shamal>

Q.18) Read the following paragraph about a soil type found in India:

“This soil is formed under conditions of high temperature and heavy rainfall with alternate wet and dry periods. This soil hardens greatly on losing moisture. The continuous stretch of this soil is found on the summits of Western Ghats at 1000 to 1500 m above mean sea level, Eastern Ghats, the Rajmahal Hills, Vindhyan, Satpuras and Malwa Plateau. It lacks fertility due to intensive leaching but when manured and irrigated, it is suitable for growing plantation crops like tea, coffee, rubber, cinchona, coconut and arecanut.”

Which of the following soil types is described in the above paragraph?

- a) Red Soil
- b) Black Soil
- c) Laterite Soil
- d) Alluvial Soil

Ans) c

Exp) option c is the correct answer.

Laterite soils are mostly the **end products of weathering**. They are formed under conditions of **high temperature and heavy rainfall with alternate wet and dry periods**. Heavy rainfall promotes **leaching**

(nutrients get washed away by water) of soil whereby lime and silica are leached away, and soil rich in oxides of iron and Aluminum compounds is left behind. They **harden greatly on losing moisture**. Laterite soils are red in color due to little clay and more gravel of red sandstones. The continuous stretch of laterite soil is found on the summits of Western Ghats at 1000 to 1500 m above mean sea level, Eastern Ghats, the Rajmahal Hills, Vindhyan, Satpuras and Malwa Plateau. They are well developed in south Maharashtra, parts of Karnataka etc. and are widely scattered in other regions. **Laterite soils lack fertility due to intensive leaching**. When manured and irrigated, some laterites are suitable for growing **plantation crops** like tea, coffee, rubber, cinchona, coconut, arecanut, etc. In some areas, these soils support **grazing grounds and scrub forests**.

Source: Khullar

Q.19) The intensity and the amount of Monsoon rainfall in India vary from one region to other. Consider the following statements in this regard:

1. The rain displays a declining trend from west to east over the west coast.
2. The rain increases from the southeast towards the northwest over the North Indian Plain.
3. In Rajasthan, the rainfall decreases from southeast towards the northwest.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 3 only
- c) 2 only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

The average annual rainfall in India is about 125 cm, but it has great spatial variations. The monsoon rainfall has a declining trend with increasing distance from the sea. Kolkata receives 119 cm during the southwest monsoon period, Patna 105 cm, Allahabad 76 cm and Delhi 56 cm.

Statement 1 is correct, but Statement 2 is incorrect: The rain which comes in spells, **displays a declining trend from west to east over the west coast, and from the southeast towards the northwest over the North Indian Plain** and the northern part of the Peninsula.

Monsoonal rainfall is largely governed by relief or topography. For instance the windward side of the Western Ghats register a rainfall of over 250 cm. Again, the heavy rainfall in the north-eastern states can be attributed to their hill ranges and the Eastern Himalayas.

Statement 3 is correct: South-eastern districts viz. Pratapgarh, Banswara, Jhalawar, Baran and Sirohi receive highest rainfall over other districts during all the months and seasons in Rajasthan. These districts get the rain when the Bengal branch of the south-west Monsoon current is trapped by the Aravallis.

https://imd.pune.gov.in/hydrology/rainfall%20variability%20page/rajasthan_final.pdf

Q.20) “The earlier capital city of this dynasty is believed to be the origin of the world-famous Kohinoor diamond. They built the first monument in the world using lime mortar and granite. They used grey granite materials to build tombs which displayed intricate stone works.”

Which of the following is referred to in the above paragraph?

- a) Qutb Shahi Dynasty
- b) Mamluk Dynasty of Delhi Sultanate
- c) Mughal Dynasty
- d) Bahmani Sultanate

Ans) a

Exp) Option a is the correct answer.

The Qutb Shahi dynasty **also called Golconda Sultanate** ruled the Deccan region in South India. **After the collapse of the Bahmani Sultanate, the Qutb Shahi dynasty** was established in 1512 AD by Sultan-Quli Qutb-ul-Mulk. The dynasty came to an **end in 1687 AD** when the Mughal ruler **Aurangzeb annexed Golconda** into the Mughal empire.

Option a is correct: Qutb Shahi Indo-Islamic architecture includes the **Char Minar, tombs of the Qutb Shahis and Golconda Fort**. Their **capital was Golconda (1519–1591)** and the **origin of the Kohinoor diamond has been traced to Golconda city** in Andhra Pradesh and it was mined from the **Royalaseema diamond mine** when it was under the rule of the **Kakatiya dynasty**.

Charminar is a ceremonial Gateway built by Qutb Shahi rulers in **1591 A.D to celebrate the foundation of Hyderabad** and it was the **first monument in the world constructed using lime mortar and granite**. Qutb Shahi rulers used **Grey granite material for constructing these tombs** and tombs displayed with intricately carved stonework.

Option b is incorrect: The Delhi Sultanate ruled India between **1206 and 1526 with Delhi** as its capital. Their rule saw the development of early Indo-Islamic architecture, the most prominent being the **Qutb Minar complex**, a group of monuments surrounding the **Qutb Minar**.

Option c is incorrect: **The Mughal emperor Shah Jahan** (reign 1628–58 AD). The use of the **double dome and parklike surroundings** were favourite devices of Shah Jahan period architecture. White marble was a favoured building material during his period. He constructed some of the famous monuments in India for instance **Red Fort, TajMahal etc.,**

Option d is incorrect: **The Bahmani Sultanate was founded in 1347 by Ala-ud-Din Bahman Shah**. It later split into five successor states that were collectively known as the Deccan sultanates. **The Gulbarga Fort, Haft Gumbaz, and Jama Masjid in Gulbarga, Bidar Fort and Madrasa Mahmud Gawan** in Bidar are some of their major architectural contributions.

Q.21) Which among the following factors determine the climate of India?

1. Distribution of land and water
2. Distance from the sea
3. Latitude
4. Altitude
5. Relief

Select the correct answer using the codes given below:

- a) 1, 2 and 4 only
- b) 3, 4 and 5 only
- c) 1, 2, 4 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) d

Exp) Option d is the correct answer.

India's climate is controlled by a number of factors. Some of the important factors are discussed here briefly as follows:

Option 1 is correct: Distribution of Land and Water- India is flanked by the Indian Ocean on three sides in the south and girdled by a high and continuous mountain-wall in the north. As compared to the landmass, water heats up or cools down slowly. This differential heating of land and sea creates different air pressure zones in different seasons in and around the Indian subcontinent. Difference in air pressure causes reversal in the direction of monsoon winds.

Option 2 is correct: Distance from the Sea- With a long coastline, large coastal areas have an equable climate. Areas in the interior of India are far away from the moderating influence of the sea. Such areas have extremes of climate. That is why, the people of Mumbai and the Konkan coast have hardly any idea of extremes of temperature and the seasonal rhythm of weather. On the other hand, the seasonal contrasts in weather at places in the interior of the country such as Delhi, Kanpur and Amritsar affect the entire sphere of life.

Option 3 is correct: Latitude play important role in determining the climate of India. The Tropic of Cancer passes through the central part of India in east-west direction. Thus, northern part of the India lies in sub-tropical and temperate zone and the part lying south of the Tropic of Cancer falls in the tropical zone. The tropical zone being nearer to the equator, experiences high temperatures throughout the year with small daily and annual range. Area north of the Tropic of Cancer being away from the equator, experiences extreme climate with high daily and annual range of temperature.

Option 4 is correct: Altitude- Temperature decreases with height. Due to thin air, places in the mountains are cooler than places on the plains. For example, Agra and Darjiling are located on the same latitude, but temperature of January in Agra is 16°C whereas it is only 4°C in Darjiling.

Option 5 is correct: Relief- The physiography or relief of India also affects the temperature, air pressure, direction and speed of wind and the amount and distribution of rainfall. The windward sides of Western Ghats and Assam receive high rainfall during June-September whereas the southern plateau remains dry due to its leeward situation along the Western Ghats.

<https://ncert.nic.in/textbook/pdf/kegy104.pdf>

Q.22) Which of the following rivers are tributaries of the Brahmaputra River?

1. Kameng
2. Tista
3. Barak
4. Subansiri
5. Manas

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 2, 4 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) c

Exp) Option c is the correct answer.

The Brahmaputra, one of the largest rivers of the world, has its origin in the Chemayungdung glacier of the Kailash range near the Manasarovar Lake. From here, it traverses eastward longitudinally in a dry and flat region of southern Tibet, where it is known as the Tsangpo, which means the purifier. The Rango Tsangpo is the major right-bank tributary of this river in Tibet. It emerges as a turbulent and dynamic river after carving out a deep gorge near Namcha Barwa under the name of Siang or Dihang. It enters India west of

Sadiya town in Arunachal Pradesh. With a total length of 2,900 km the Brahmaputra is one of the longest rivers of the world and passes through Tibet, India and Bangladesh.

Option 1, 2, 4 and 5 are correct: Streams merging with the Brahmaputra from the right are **Subansiri, Kameng, Belsiri, Dhansiri, Nyera Ama, Manas, Sankosh, Champaman, Gangadhar, Raidah, Dharla and Tista**. Those pouring in the main river from the **left are the Dibm, Burhi Dihing, Noa Dihing, Dikhu, Dhansiri and Kalang**. After receiving its **main left bank tributaries Dibang or Sikang and Lohit** it is known as the **Brahmaputra**.

Option 3 is incorrect: The **Barak River** rises from the **Manipur hills, south of Mao in Senapati district of Manipur** at an elevation of 2,331 m. It flows 900 kilometres through the **states of Manipur, Nagaland, Mizoram and Assam** in India. Further it enters Bangladesh and bifurcates into Surma river and Kushiya river which converges again to become Meghna River.

Map: Brahmaputra and its tributaries

Source: India a comprehensive geography by D.R. Khullar, Chapter 4

Q.23) Which among the following soils in India are poor in nitrogen content?

1. Black soil
2. Red and yellow soil
3. Arid soil
4. Laterite soil

Select the correct answer from the codes given below:

- a) 1 and 3 only
- b) 2 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

On the basis of genesis, colour, composition and location, the soils of India have been classified into multiple types. Few of them are discussed below:

Option 1 is correct: Black soil covers most of the Deccan Plateau which includes parts of Maharashtra, Madhya Pradesh, Gujarat, Andhra Pradesh and some parts of Tamil Nadu. In the upper reaches of the Godavari and the Krishna, and the north western part of the Deccan Plateau, the black soil is very deep. These soils are also known as the 'Regur Soil' or the 'Black Cotton Soil'. Chemically, the black soils are rich

in lime, iron, magnesia and alumina. They also contain potash. But **they lack in phosphorous, nitrogen and organic matter.** The colour of the soil ranges from deep black to grey.

Option 2 is correct: Red soil develops on crystalline igneous rocks in areas of low rainfall in the eastern and southern part of the Deccan Plateau. Red loamy soil is found along the piedmont zone of the Western Ghat. Yellow and red soils are also found in parts of Odisha and Chattisgarh and in the southern parts of the middle Ganga plain. The soil develops a reddish colour due to a wide diffusion of iron in crystalline and metamorphic rocks. It looks yellow when it occurs in a hydrated form. **These soils are generally poor in nitrogen, phosphorous and humus.**

Option 3 is correct: Arid soils range from red to brown in colour. They are generally sandy in structure and saline in nature. In some areas, the salt content is so high that common salt is obtained by evaporating the saline water. Due to the dry climate, high temperature and accelerated evaporation, they lack moisture and humus. **Nitrogen is insufficient and the phosphate content is normal.**

Option 4 is correct: The laterite soils develop in areas with high temperature and high rainfall. These are the result of intense leaching due to tropical rains. With rain, lime and silica are leached away, and soils rich in iron oxide and aluminium compound are left behind. Humus content of the soil is removed fast by bacteria that thrives well in high temperature. These soils are poor in organic matter, nitrogen, phosphate and calcium, while iron oxide and potash are in excess.

Source: <https://ncert.nic.in/ncerts/l/kegy106.pdf>

<http://viduketha.nsf.gov.lk:8585/slsipr/PR6943/PR6943-130.pdf>

Q.24) Arrange the following eastward flowing rivers of India from North to South.

1. Brahmani
2. Subarnarekha
3. Penner
4. Baitarani
5. Vaigai

Select the correct answer using the code given below:

- a) 2-4-1-3-5
- b) 2-1-4-5-3
- c) 2-1-4-3-5
- d) 1-2-4-3-5

Ans) a

Exp) Option a is the correct answer.

The important eastward flowing rivers of India from North to South are as follows:

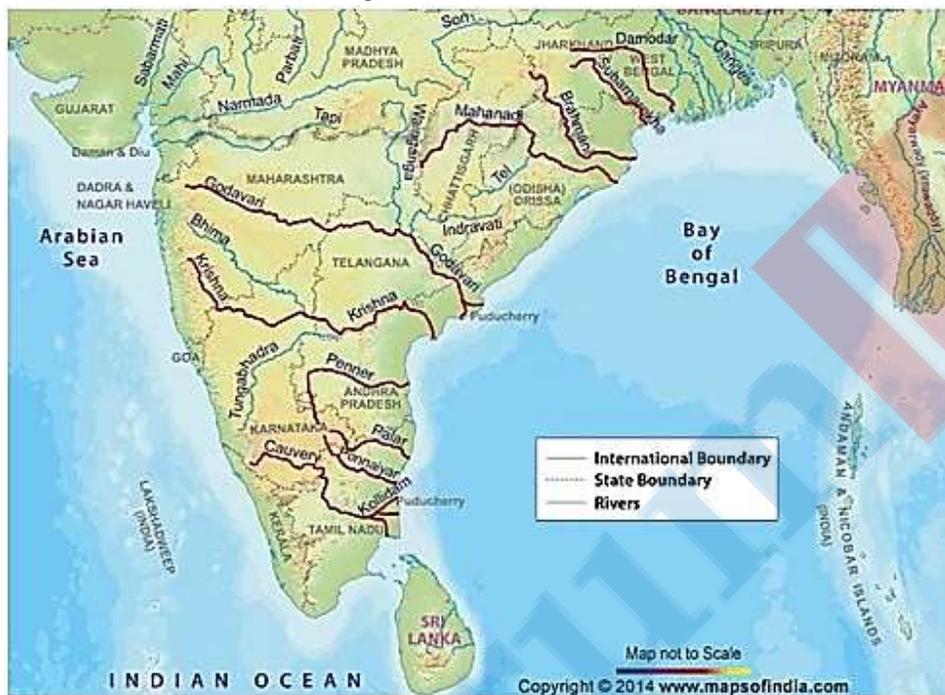

Option 2: The Subarnarekha originates from the **Ranchi Plateau in Jharkhand** forming the boundary between West Bengal and Odisha in its lower course. It joins the Bay of Bengal forming an estuary between the Ganga and Mahanadi deltas. Its total length is 395 km.

Option 4: The Baitarani is one of six major rivers of Odisha. **Venerated in popular epics and legends, the Baitarani River is a source of water for agricultural irrigation.** A major portion of the river basin lies within the state of Odisha, while a small patch of the upper reach lies in **Jharkhand state**. Due to **drainage into the Bay of Bengal**, its water becomes salty as it heads towards the end of the river.

Option 1: The Brahmani is a major seasonal river in the **Odisha state of eastern India**. The Brahmani is formed by the confluence of the Sankh and South Koel rivers **in southern Bihar state**, the Brahmani flows for 480 km. It winds generally south-southeast and then turns east to **join northern branches of the Mahanadi River**, which then empties into the Bay of Bengal.

Option 3: The Pennar (also known as Penna, Pinakini, Pennar, Penner, Penneru, Pennai) is one of the major rivers of the peninsula. The Pennar rises in the **Chennakesava hill of the Nandidurga range, in Chikkaballapura district of Karnataka** and flows towards the east eventually draining into the Bay of Bengal. The river's total length is 597 km.

Option 5: The **Vaigai** originates in **Varusanadu Hills of western Tamil Nadu**. It initially flows northeast through the Kambam and Varushanad valleys. In its central reaches the Vaigai flows eastward into the **Vaigai reservoir at Narasingapuram**. Later it bends to the southeast, passing Madurai on its **course to its mouth on Palk Strait**, which separates the south-eastern coast of India from Sri Lanka.

Map: Important eastward flowing rivers of India

Map: Major rivers of Odisha

Q.25) Recently the President of India laid the foundation for a 150 feet bronze statue for Lachit Barphukan in Assam. Which of the following statements are correct regarding Lachit Barphukan?

1. He was a military commander of the Ahom kingdom.
2. He was a contemporary of the Mughal emperor Akbar.
3. Lachit Divas is celebrated in Assam to commemorate the victory of Lachit Barphukan in the battle of Saraighat.

Select the correct answer using the code given below:

- a) 1 and 3 only
- b) 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The Ahom kingdom (1228–1826 AD) was a late mediaeval kingdom in the Brahmaputra Valley in Assam. It maintained its sovereignty for nearly 600 years having successfully resisted Mughal expansion in Northeast India.

Statement 1 is correct: Ahom king Chakradhwaj Singha appointed Lachit Borphukan as commander of the Ahom army in August 1667. **Lachit Barphukan** was known for his leadership in the **Battle of Saraighat**. The Battle of Saraighat was a **naval battle fought in 1671 between the Mughal Empire, and the Ahom Kingdom on the Brahmaputra River** at Saraighat, now in Guwahati, Assam, India.

Statement 2 is incorrect: Lachit Borphukan (1622–72) is not a contemporary of AKbar (1542–1605 AD). However he is a contemporary of Aurangzeb (1618–1707 AD). Borphukan was born on November 24, 1622 and died in 1672 shortly after the battle of Saraighat. **Aurangzeb** sent a large army, under the command of Raja Ram Singh, son of the Amber king Raja Jai Singh, to regain Guwahati. This invasion was successfully thwarted by Ahmos under Borphukan.

Statement 3 is correct: On 24 November each year, Lachit Divas is celebrated statewide in Assam to commemorate the heroism of Lachit Borphukan and the victory of the Assamese army at the Battle of Saraighat in 1671 against Mughals.

<https://www.indiatoday.in/india-today-insight/story/why-assam-celebrates-ahom-commander-lachit-borphukan-who-defeated-aurangzeb-s-army-1918732-2022-02-28>

Q.26) Consider the following statements about the Cloud Forest 25 (CF25) initiative, recently seen in the news:

1. It is a proposed initiative between 25 countries having temperate forests.
2. As a part of this initiative, India issued Cloud Forest Bond to ensure the protection of cloud forests.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

A recent study report, **Cloud Forest Assets Financing** a Valuable Nature-Based Solution released by Earth Security, a global nature-based asset management advisory firm has proposed that dedicated financial bonds can help capture economic value of cloud forests in 25 countries. It also suggested that Finance should be mobilised for cloud forest protection through payments schemes targeting 25 developing countries, public finance institutions, private sector.

Statement 1 is incorrect: It is a proposed initiative between 25 cloud forest range countries, i.e., forest ranges that are on top tropical mountains, which are largely covered in mist. These twenty-five countries are Indonesia, Tanzania, Democratic Republic of Congo, Colombia, Peru, Venezuela, Mexico, Papua New Guinea, Brazil, Ethiopia, Ecuador, Cameroon, Bolivia, China, Laos, Kenya, Malaysia, Angola, Uganda, Madagascar, Philippines, Gabon, Vietnam, Republic of Congo and Myanmar.

Statement 2 is incorrect: India did not issue such bond. The report Cloud Forest Assets Financing suggests creation of Cloud Forest Bonds which provide a way for these countries to improve their debt position and create new, long-term income streams from the services provided by nature. The bonds could be in the form of new bond issuances, debt-swaps, or results-based financing instruments, which could be tailored to the circumstances of each country. The bond would also help to ensure the protection of cloud forests, which are not currently protected areas, but should be treated as vital infrastructure.

Knowledge Base:

Cloud Forests are montane rainforests They refer to the vegetation of tropical mountainous regions where there is heavy rainfall and persistent condensation resulting from the cooling of the moisture being pushed upwards by the mountains. They are usually characterized by a persistent, frequent and seasonal low-lying layer of mist and cloud cover usually at the canopy level.

Cloud forest bonds will provide governments with financial actors like philanthropy, public finance and private investment to capture the economic value of the ecosystem services of the cloud forests. Such a tool will encourage carbon storage and provide funding to set up sovereign-level carbon finance schemes as well as payments for ecosystem services. The report proposes to mobilise financing for cloud forest protection through payments schemes under which hydropower projects and other industrial water users benefiting from cloud forests pay for this service.

Source: <https://www.downtoearth.org.in/news/forests/dedicated-financial-bonds-can-help-capture-economic-value-of-cloud-forests-in-25-countries-report-86978>

Q.27) Consider the following statements about the Machchhu river, recently seen in news:

1. It originates from Madla hills in the state of Gujarat.
2. It drains into the Gulf of Khambhat.
3. It flows through Morbi district of Gujarat, which is very famous for ceramic industry.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) c

Exp) Option c is the correct answer.

Recently, a suspension bridge collapsed over the river Machchu, in Gujarat's Morbi district, which killed almost 135 people.

Statement 1 is correct: The Machchhu river originates from Madla hills in the Surendranagar district of Gujarat. The suspension bridge, or Jhulta Pul, was built by the ruler of the princely state of Morbi, Sir Waghji Thakor, in 1877 on this river.

Statement 2 is incorrect: The river flows downstream and ends into the Great Rann of Kachchh and not into the Gulf of Khambat.

Statement 3 is correct: The river originates in the Surendranagar district and then flows through the district of Morbi. The Morbi district is famous for its ceramic industry. Around 70% of India's ceramics are produced in Morbi, and ceramic tiles manufactured here are exported to countries in the Middle East, East Asia, and Africa.

Source: <https://indianexpress.com/article/explained/morbi-tragedy-river-bridge-8240531/>

Q.28) Which among the following can be considered as factors responsible for foggy weather in some parts of India during winter season?

1. Western disturbances
2. High variability in the wind speed
3. Supply of moisture from water bodies like rivers
4. Presence of PM 2.5 (Particulate Matter 2.5) particles in the air

Select the correct answer using the codes given below:

- a) 2 and 3 only
- b) 1, 3 and 4 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) b

Exp) Option b is the correct answer.

'Advective' and 'Radiation', two different forms of fog in India generally form in the sub tropics, around latitude 25°. The former category of fog forms in the coastal areas due to constant moisture feed from the water bodies and the latter forms on a humid night with clear skies, after the passage of a Western Disturbance.

Factors responsible for fog in different regions in India:

Statement 1 is correct: Dense fog in Delhi and North India (from December till the end of January) is the most common feature of the winter season which leads to massive delays and cancellations of flights and trains. **The reason for fog in North India is entirely because of a weather system called Western Disturbance.** A Western Disturbance affecting the hills of Jammu and Kashmir may sometimes lead to a sudden reversal of winds from the normal dry and cool northwesterly to humid easterlies or southeasterlies which could cause widespread fog in the plains of North India.

Statement 2 is incorrect: Light variable or calm winds (speed below 5kmph) do not allow fog to lift and lead to further continuation of fog for a longer duration. Whereas high variability in the wind speed helps in clearing the foggy skies.

Statement 3 is correct: Fog in East India has also been very thick and dense causing major flight and rail delays. However, the reason for fog formation in this part of the country is primarily due to its proximity to water bodies (River Ganga) and slow wind speed.

Statement 4 is correct: Many studies in the past have identified PM2.5 (particulate matter or aerosol particles with a diameter of fewer than 2.5 micrometres) as a major pollutant, responsible for haze and fog formation over Indo-Gangetic plains including Delhi. The recent study explains that complex chemical reactions involving Hydrochloric Acid (HCl), which is directly emitted into the atmosphere from the burning of plastic waste and from a few industrial processes, are primarily responsible for high PM2.5 chloride and the subsequent haze and fog formation over Delhi during chilly winter nights.

Knowledge Base: In the hilly areas of the Northeast, characteristics of fog are completely different from what they are in the plains of East India. The terrain of Northeast India is a mix of everything, from hills and valleys to mountains, which is conducive for trapping fog for longer durations. **Northeast is well known for dense fog throughout the winter season due to persistent flow of moist air from River Brahmaputra.**

Source: <https://www.skymetweather.com/content/weather-news-and-analysis/reasons-behind-formation-of-fog-in-india/>

<https://www.outlookindia.com/national/explained-what-cause-fog-and-haze-in-delhi-in-the-winters-news-246908>

Q.29) Which of the following water bodies/drainage systems has a Centripetal Drainage pattern in India?

- All Streams from Vindhyan range
- Loktak Lake Manipur
- Rivers originating from Amarkantak hills
- Rivers of Indo-Gangetic plains.

Ans) b

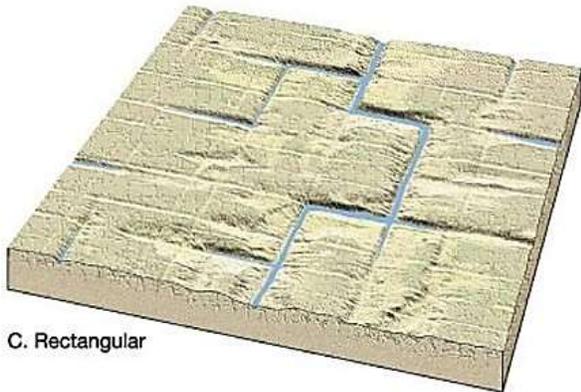

Exp) Option b is the correct answer.

The flow of water through well-defined channels is known as 'drainage' and the network of such channels is called a 'drainage system'. The Drainage pattern refers to the system of flow of surface water mainly through the forms of rivers and basins. It depends upon factors such as slope of land, geological structure, amount of volume of water and velocity of water.

In Centripetal Drainage Pattern, the streams converge from all sides in the low-lying basins, wherein, stream flows towards a central depression. It is similar to the radial drainage system, with the only exception that radial drainage flows out whereas the centripetal drainage flows in. **The Loktak lake in Manipur is a classic example of this type of drainage pattern.**

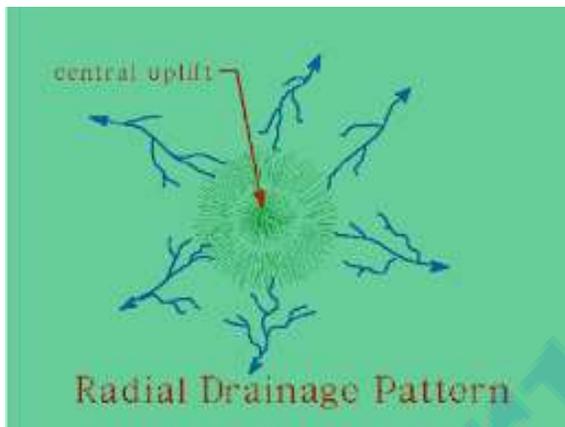

The streams of Ladakh, Tibet, and the Baghmata and its tributaries in Nepal also follow this pattern of drainage

Option a is incorrect: Streams from Vindhyan range follow a rectangular drainage pattern which is prevalent in the faulted area. It grows in a tightly packed rocky ground. The streams choose the path of least resistance and hence congregate in areas with the weakest exposed rock.

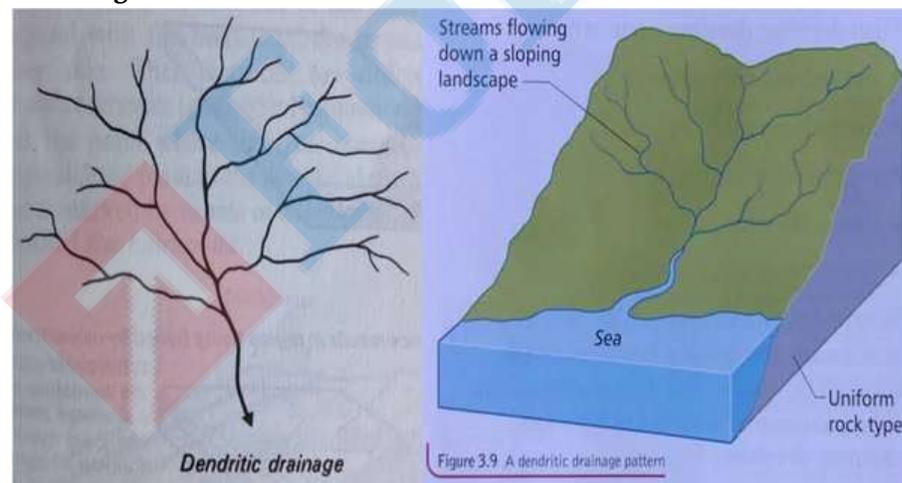

C. Rectangular

Option c is incorrect: Streams originating from the Amarkantak hills such as Narmada, Son and Mahanadi follow Radial drainage pattern. In this, the tributaries from a summit follow the slope downwards and drain down in all directions.

Option d is incorrect: Rivers of Indo-Gangetic plains follow Dendritic drainage pattern. It forms a branching structure similar to tree roots.

Source: NCERT, India-Physical Environment, Class 11, pg. 25

Q.30) With reference to the Mahakaleshwar temple in Madhya Pradesh, consider the following statements:

1. The temple is located on the bank of river Narmada.
2. Kalidasa's work Meghadutam describes this temple.
3. The present-day five-storeyed temple structure was built by Jai Singh I, king of Ajmer.
4. Of the 12 jyotirlinga sites, it is the only site where jyotirlinga faces south.

Which of the statement/s given above is/are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 2 and 4 only
- d) 2 only

Ans) c

Exp) Option c is the correct answer.

Recently the Prime Minister Narendra Modi inaugurated the first phase of the **Shri Mahakal Lok corridor in Madhya Pradesh's Ujjain on Tuesday**. After Vishwanath temple in Varanasi and the Kedarnath shrine in Uttarakhand, **Mahakal temple is the third 'jyotirlinga' site to see a major upliftment exercise**

Statement 1 is incorrect: The Mahakaleshwar temple is situated on the side of the river Shipra, tributary of river Chambal. It is located in the ancient city of Ujjain in the state of Madhya Pradesh, India. **Omkareshwar temple is located on the bank of river Narmada.** It is located at Khandwa district in Madhya Pradesh, India.

Statement 2 is correct: The Mahakal temple finds a mention in several ancient Indian poetic texts. In the **early part of the Meghadutam (Purva Megha) composed in the 4th century, Kalidasa** gives a description of the Mahakal temple. **It is described as one with a stone foundation, with the ceiling on wooden pillars.**

Statement 3 is incorrect: The present-day five-storeyed structure was built by the Maratha general Ranoji Shinde in 1734, in the Bhumija, Chalukya and Maratha styles of temple architecture. Jai Singh I (1611 – 1667) were not even alive during this period.

Statement 4 is correct: Of the 12 jyotirlinga sites in India, **Mahakal is the only jyotirlinga facing the south**, while all the others face east. Puranas say that Lord Shiva pierced the world as an endless pillar of light, called the **jyotirlinga (considered a manifestation of Shiva)**. Other important jyotirlinga sites include **Somnath and Nageshwar in Gujarat, Viswanath at Varanasi.**

Source: <https://indianexpress.com/article/explained/explained-culture/mahakal-temple-in-ujjain-why-it-holds-special-significance-in-hinduism-8202228/>
<https://shrimahakaleshwar.com/temple>

Q.31) Consider the following statements regarding the differences between peninsular and Himalayan drainage system:

1. Unlike Peninsular rivers, the Himalayan rivers are mostly perennial with relatively large catchment areas.
2. Compared to Peninsular rivers, the Himalayan rivers generally form larger deltas and have higher erosional activity.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

The Indian drainage system consists of a large number of small and big rivers. The rivers originate from the **lofty Himalayan ranges covered with glaciers** are named as the Himalayan rivers and rivers which originate in the **Peninsular Plateau and central highlands** are named as Peninsular rivers.

Statement 1 is correct: The Himalayan rivers have **large basins and catchment areas**. These rivers are perennial in nature meaning water flows throughout the year in these rivers. These rivers receive water **both from the monsoons and snowmelt**. The perennial nature of these rivers makes them **useful for irrigation**. These rivers have relatively **small basins and catchment areas**. The Peninsular rivers receive **water only from rainfall** and water flows in these rivets in the rainy season. Therefore, these rivers are **seasonal or non-perennial**.

Statement 2 is correct: The Himalayan rivers form big deltas at their mouths. The **Ganga, Brahmaputra delta is one of the largest in the world**. These rivers also bring large sediments due to **high erosional activity in the basin**. **Some of the Peninsular rivers, such as the Narmada and the Tapi form estuaries other rivers such as the Mahanadi, the Godavari, the Krishna and the Cauvery form deltas** but several small streams **originating from the Western Ghats** and flowing towards the west enter Arabian Sea without forming any delta. Peninsular rivers flow mostly in graded **valleys** and **have little erosional activity to perform**.

Source: India a comprehensive geography by D.R. Khullar, Chapter 4

Q.32) Which of the following factors can be considered responsible for soil erosion?

1. Mining Operations
2. Over irrigation
3. Overgrazing
4. Lack of Crop Rotation

Select the correct answer using the code given below:

- a) 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Soil erosion is the removal of soil by the forces of nature or man-made causes.

Option 1 is correct: Mining operations often require the clearing of large areas of land to access the resources beneath the surface. **When vegetation is removed, it exposes the soil to the elements, making it more susceptible to erosion.**

Option 2 is correct: Over-irrigation can **increase topsoil erosion** and can cause the contamination of downstream resources due to movements of water-soluble chemicals. Over-irrigation causes **sheet erosion** where the toper of soil gets eroded.

Option 3 is correct: Overgrazing leads to **loosen structure of the soil** and the soil is easily **washed away** by rain and wind. Moreover, soil is pulverized by the hoofs and teeth of animals, especially by sheep and goats and thus proves detrimental to top soil when heavy showers fall on it. Soil erosion due to overgrazing is common **in the Hilly areas** of Himachal Pradesh, Uttarakhand, Jammu and Kashmir and in the dry areas of Rajasthan, Madhya Pradesh, Maharashtra, Karnataka and Andhra Pradesh.

Option 4 is correct: Much of the **soil erosion in India is caused by faulty methods of agriculture**. The most outstanding are wrong ploughing, **lack of crop rotation** and practice of shifting cultivation. If the fields are ploughed along the slope, there is no obstruction to the flow of water and the water washes away the top soil easily.

Q.33) Which of the following options represents the usability (use) of rivers and river water?

1. Provision of various types of sediments and minerals
2. Provision of irrigation and drinking water facility
3. Enables hydroelectricity production
4. Provision of waterways navigation
5. Storage of carbon

Select the correct answer using the code given below:

- a) 1, 2, 3 and 4 only
- b) 2, 3 and 5 only
- c) 1, 2, 3 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) d

Exp) Option d is the correct answer.

The Rivers of India carry huge volumes of water per year, but it is unevenly distributed both in time and space. During the rainy season, much of the water is wasted in floods and flows down to the sea. We use river waters for a variety of purposes such as **irrigation, hydro-electric production, navigation** etc. **Large quantity of water is supplied to cities and villages for domestic consumption.** A large number of **industries also depend** upon water.

Option 1 is correct: Rivers and streams **transport water and sediment** downslope to lakes and oceans. This **natural processing, which sorts sediments and minerals** according to their physical properties, serves as a mechanism by which **potentially valuable earth deposits are concentrated to a point** where it is **economically feasible to extract them for human use.** These resources may be **metallic as in tin, gold and platinum placer deposits** or nonmetallic such as **deposits of sand and gravel.**

Option 2 is correct: Usability of Rivers Rivers are of great use for us because they comprise a great **source of freshwater for drinking purposes.** In fact, most of our requirements of freshwater are met by rivers. **The largest amount of river water is used for irrigation.** Almost **30 percent of the annual flow** of the Indian rivers is used for irrigation through **canals.**

Option 3 is correct: Large rivers have gem **waterpower potential.** The large rivers of **Himalayas Vindhyas, the Satpura, hills in the northeast, and Western and the Eastern Ghats** offer possibilities of large-scale waterpower development. The Himalayan rivers are mostly **perennial.** They however have issues of area for storage on account of **narrow valleys, high seismicity** of the region and vast alluvial plain with no variation of relief.

Option 4 is correct: The **Gangs and the Brahmaputra** in the north and north-eastern part of the country, the **Mahanadi, the Godavari and the Krishna** and the **lakes and tidal creeks** in coastal states possess some of the important and **useful waterways of the country.** In the past they were of great importance, which suffered a great deal with the advent of rail end roads.

Option 5 is correct: River ecosystems have **tremendous potential to store CO2,** however, with **changing climatic and anthropogenic activities,** these habitats are under threat, and river ecosystems are losing the very vital service of **storing carbon.** Unlike well documented terrestrial biodiversity, the **biodiversity in**

aquatic ecosystems is still unrecognized to some extent. They are also important as they provide **swimming, recreational facilities** to the visitors.

<http://www.waterencyclopedia.com/Mi-Oc/Mineral-Resources-from-Fresh-Water.html>

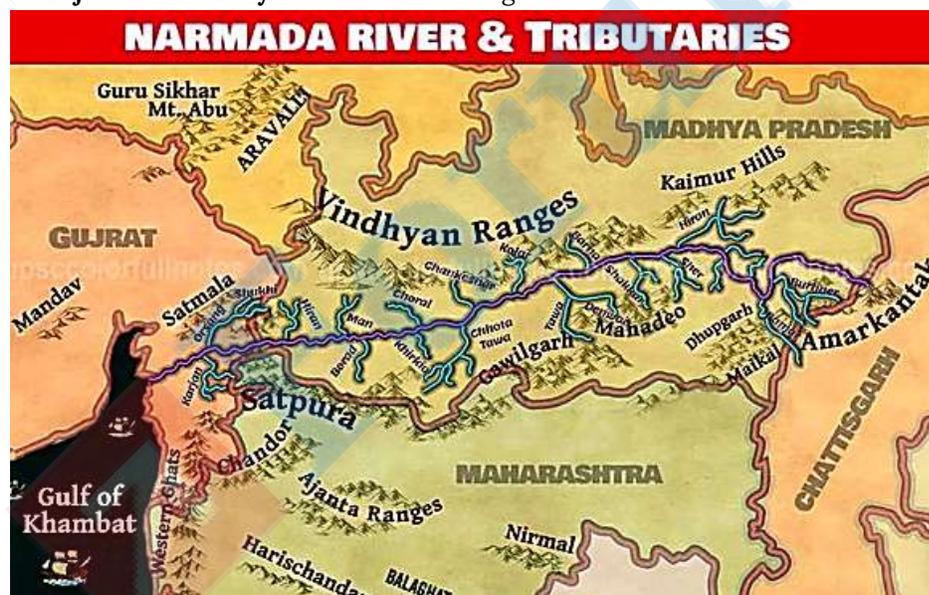

Q.34) Burhner, Banjar, Dudhi, Tawa, and Orsang rivers are tributaries of which of the following rivers?

- Krishna
- Godavari
- Tapi
- Narmada

Ans) d

Exp) Option d is the correct answer.

The Narmada is the largest of all the west-flowing rivers of the Peninsular India. It rises from the western flanks of the Amarkantak plateau in Shahdol district of Madhya Pradesh and flows westwards through a rift valley between the Vindhya Range on the north and the Satpura Range on the south. Its total length from its source in Amarkantak to its estuary in the Gulf of Khambhat is 1,310 km. It flows through Madhya Pradesh, Maharashtra and Gujarat. Tributaries and the main stem river drain the surrounding drainage basin of its surface water and groundwater, leading the water out into an ocean. Burhner, Banjar, Sher, Shakkar, Dudhi, Ganjaland and Tawa are the left bank and the Tendon, the Barn, the Kolar are right bank tributaries of the Narmada River. Sardar Sarovar Dam, Maheshwar Dam, Maan Dam, Indira Sagar Dam, Bargi Dam are important reservoirs on the river. It is also known as the Lifeline of Gujarat and Madhya Pradesh for its huge contribution to the states.

Map: Narmada River Flow

Q.35) With reference to freedom fighter Alluri Sitarama Raju, consider the following statements:

- In response to the passage of Forest Act 1882, he initiated a Rampa rebellion against the British.
- He was given a title of Manyam Veerudu in recognition of his multiple victories against British troops.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Prime Minister Narendra Modi unveiled a 30-foot-tall bronze statue of Alluri Sitharama Raju at Bhimavaram in Andhra Pradesh. Alluri Sitharama Raju **born in present-day Andhra Pradesh in 1897 or 1898.**

Statement 1 is correct: The British passed the **Forest Act, 1882** which banned the villagers from practising shifting cultivation and forcing them to raise particular types of crops. **Alluri Seetarama initiated the famous “Rampa Rebellion” or Manyam Rebellion in 1922-1924 against** the British in response to this act.

Statement 2 is correct: During 1924-26, **he fought multiple times with the British troops, always winning against them.** This gave him the title of **Manyam Veerudu or the Hero of Jungle.** The Britishers were focused on capturing and defeating him. He was **captured by the British deployed Assam rifle battalion.**

Source: <https://amritmahotsav.nic.in/unsung-heroes-detail.htm?50>

<https://indianexpress.com/article/explained/explained-who-was-alluri-sitharama-raju-pm-narendra-modi-statue-8007693/>

Q.36) Consider the following statements with reference to the features and characteristics of Mountain Soils:

1. Mountain soils are typically shallow, with a limited depth.
2. Mountain soils usually have a high organic matter content.
3. The nutrient content of mountain soil is always very high.
4. Mountain soils are generally acidic in nature.

Which of the above given statements are correct?

- a) 2, 3 and 4 only
- b) 1, 2 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

Mountain soils are found in mountainous regions and can belong to many known soil types.

Statement 1 is correct: Mountain soils tend to be shallow because they are formed from the weathering of the parent rock material and the accumulation of organic matter on steep slopes. Erosion also plays a significant role in limiting the depth of mountain soils.

Statement 2 is correct: Mountain soils often have a high organic matter content, especially in forested areas, where the accumulation of leaf litter and other plant debris contributes to the formation of humus-rich topsoil layers. The cool temperatures and high moisture content found in many mountain regions can slow down the decomposition of organic matter, leading to a build-up of organic material.

Statement 3 is incorrect: The nutrient content of mountain soils can vary greatly depending on factors such as the parent rock material, the slope, and the vegetation type. In general, nutrient availability tends to be lower in mountain soils due to the combination of steep slopes, high rainfall, and shallow soil depth, which can lead to increased leaching of nutrients and limited nutrient cycling.

Statement 4 is correct: Mountain soils are often acidic due to the weathering of parent rock material, which can release acidic components into the soil. Additionally, the high rainfall in many mountainous regions can lead to the leaching of basic cations, further contributing to soil acidity. The decomposition of organic matter, especially in forested areas, can also produce acidic compounds that contribute to soil acidity.

Q.37) With reference to the Indian geography, which of the following statements best describes the term 'Chos'?

- The high-altitude alpine grasslands in Uttarakhand
- Longitudinal valleys which are formed due to the collision between Eurasian and the Indian plate.
- Shifting sand dunes in eastern part of Marusthali
- Seasonal streams that erode parts of Punjab-Haryana plain adjoining the Shiwalik hills.

Ans) d

Exp) option d is the correct answer.

The southern slopes of Shiwalik range in Punjab and Himachal Pradesh are almost devoid of forest cover. The **northern part of Punjab-Haryana plain adjoining Shiwalik hills has been intensively eroded by numerous seasonal streams called chos.** The soil erosion by these streams has led to enormous gulying in the punjab plains.

Option a is incorrect Bugyals are alpine pasture lands, or meadows, in higher elevation range between 3,300 metres (10,800 ft) and 4,000 metres (13,000 ft) of the Himalayas in the Indian state of Uttarakhand, where they are called "nature's own gardens".

Option b is incorrect: Duns – the duns or duars are the valleys found in the Shiwalik range, these are open valleys between the Shivalik and the higher Himalayan foothills. These duns are longitudinal valleys which are formed due to folding which occurs when the Eurasian and the Indian plate collide with each other

Option c is incorrect: In the Thar Desert, the shifting sand dunes are locally known as Dhrian

Source: <https://www.egyankosh.ac.in/handle/123456789/80893>

Q.38) Increasing salinity has been a major problem of soils in various regions of India. In this context, which of the following practices can help to reduce the salinity levels in the soil?

- Application of Gypsum in upper layers of the soil.
- Adding rice straw and rice husk to the soil.
- Performing Deep tillage

Which of the statements given above is/are correct?

- 2 and 3 only
- 1 and 2 only
- 1 only
- 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Soil salinity is the amount of dissolved salts in the soil solution. The process of accumulating soluble salts in the soil is known as salinization. Salinity becomes a problem when enough salts accumulate in the root zone to negatively affect plant growth. Excess salts in the root zone hinder plant roots from withdrawing water from surrounding soil. This lowers the amount of water available to the plant, regardless of the amount of water actually in the root zone.

Option 1 is correct: liberal application of Gypsum in upper 15 cm thick soil to convert the alkalies into soluble compounds is a method that is predominantly employed to treat Soil Salinity. Gypsum is used to add large amounts Ca^{2+} ions that displace the Na^{+} ions from the exchange sites, and when flushed with clean water both salts and Na are removed from the soil (gypsum is used instead of limestone because of higher solubility and no increase in soil pH).

Option 2 is correct: The organic residues such as rice husks and rice straw can be added to the soil to promote formation of mild acid as a result of their decomposition and hence reduce the soil alkalinity and salinity.

Option 3 is incorrect: Deep tillage should be ignored on saline soils because it increases evaporation and could bring salts from the subsoil to the surface. To treat soil salinity, it is advisable to restrain from deep tillage/heavy machinery so that there is no transfer of soil salts to the root zone area, which induces salinization.

Source: Khullar and <https://eos.com/blog/soil-salinization/>

Q.39) Which among the following climate types is represented by the code 'BWh' as given in the Köppen climate classification?

- Tropical wet
- Subtropical dessert
- Tundra
- Humid subtropical

Ans) b

Exp) Option b is the correct answer.

The most widely used classification of climate is the empirical climate classification scheme developed by V. Koeppen. Koeppen identified a close relationship between the distribution of vegetation and climate. It is an empirical classification based on mean annual and mean monthly temperature and precipitation data. He introduced the use of capital and small letters to designate climatic groups and types. Koeppen's scheme is still popular and in use.

Major climate types according to Koeppen are as follows:

Group	Type	Letter Code	Characteristics
A-Tropical Humid Climate	Tropical wet	Af	No dry season
	Tropical monsoon	Am	Monsoonal, short dry season
	Tropical wet and dry	Aw	Winter dry season
B-Dry Climate	Subtropical steppe	BSh	Low-latitude semi arid or dry
	Subtropical desert	BWh	Low-latitude arid or dry
	Mid-latitude steppe	BSk	Mid-latitude semi arid or dry
	Mid-latitude desert	BWk	Mid-latitude arid or dry
C-Warm temperate (Mid-latitude) Climates	Humid subtropical	Cfa	No dry season, warm summer
	Mediterranean	Cs	Dry hot summer
	Marine west coast	Cfb	No dry season, warm and cool summer
D-Cold Snow-forest Climates	Humid continental	Df	No dry season, severe winter
	Subarctic	Dw	Winter dry and very severe
E-Cold Climates	Tundra	ET	No true summer
	Polar ice cap	EF	Perennial ice
H-Highland	Highland	H	Highland with snow cover

Thus, Hot desert climates are denoted as BWh and are typically found under the subtropical ridge in the lower middle latitudes or the subtropics, often between 20° and 33° north and south latitudes. In these locations, stable descending air and high pressure aloft clear clouds and create hot, arid conditions with intense sunshine.

<https://skybrary.aero/articles/hot-desert-climate-bwh>

Q.40) With reference to the United Nations Educational, Scientific and Cultural Organization (UNESCO)'s 2003 Convention for the Safeguarding of the Intangible Cultural Heritage, consider the following statements:

It aims to preserve the underwater archaeological heritage of a nation.

1. Recently India has been elected to the Intergovernmental committee of this convention.
2. This convention is a binding multilateral agreement.

Which of the statement/s given above is/are correct?

- a) 1 only
- b) 2 only
- c) 1 and 2 only
- d) 2 and 3 only

Ans) d

Exp) Option d is the correct answer.

The United Nations Educational, Scientific and Cultural Organization (UNESCO) is a specialised agency of the United Nations aimed at promoting world peace and security through international cooperation in education, arts, sciences and culture.

Statement 1 is incorrect: The aim of UNESCO's 2003 convention is to safeguard the intangible cultural heritage and to ensure respect for the intangible cultural heritage of the communities, groups and individuals concerned and also to provide for international cooperation and assistance. **UNESCO 2001 Convention aims to protect the underwater cultural heritage of a country.**

Statement 2 is correct: India has been elected to the Intergovernmental Committee of UNESCO's 2003 Convention for the Safeguarding of the Intangible Cultural Heritage (ICH) for the 2022-2026 cycle. India has served as a member of the ICH Committee twice – from 2006 to 2010 and from 2014 to 2018.

Statement 3 is correct: The 2003 convention is a binding multilateral agreement. In fact the 2003 Convention is the first binding multilateral instrument for the safeguarding of the intangible cultural heritage of a nation.

Source:

<https://indianexpress.com/article/india/india-elected-unesco-panel-intangible-cultural-heritage-8015585/>

<https://ich.unesco.org/en/legislation-00034#:~:text=The%202003%20Convention%2C%20which%20is,the%20cultural%20and%20natural%20heritage.>

Q.41) Consider the following statements about a soil type found in India:

1. The color of this soil has been attributed to the presence of titaniferous magnetite.
2. They have been formed due to solidification of lava spread over large areas during volcanic activity in Deccan Plateau.
3. They are very suitable for the cultivation of cotton.
4. "Self-Ploughing" is a remarkable feature of these soils.

Which of the following soil type has been described by the above statements?

- a) Alluvial Soil
- b) Black Soil
- c) Arid Soil
- d) Red Soil

Ans) b

Exp) Option b is the correct answer.

Black soil is characterized by a thick, dark-colored soil horizon rich in organic matter. The parent material for most of the black soil is the volcanic rocks that were formed in the Deccan Plateau (Deccan and the Rajmahal trap).

- 1) These are the regions of high temperature and low rainfall. It is, therefore, **a soil group typical to the dry and hot regions of the Peninsula.**
- 2) These soils are best suited for cotton crops. Hence these soils are called **regur and black cotton soils.**
- 3) **The black color is due to the presence of a small proportion of titaniferous magnetite or iron and black constituents of the parent rock.**
- 4) The black soil is highly **retentive to moisture.** It swells greatly on accumulating moisture. In the rainy season, the soil gets very sticky and hence ploughing and other agricultural activities demand more effort. But, in summer, as the moisture evaporates the soil shrinks and is seamed with broad and deep cracks. The lower layers can still retain moisture. The cracks permit **oxygenation** of the soil to sufficient depths. Remarkably self-ploughed by loosened particles falling from the ground into the cracks, the soil 'swallows' itself and retains soil moisture.

Source: Khullar

Q.42) Consider the following statements regarding the Soil Alkalinity:

1. It occurs when the pH value of the soils declines below 6.
2. In general, it results in a reduction of agricultural productivity.
3. Salt tolerant crops cannot be grown on alkaline soils.

Which of the statements given above is/are correct?

- a) 2 only
- b) 1 only
- c) 2 and 3 only
- d) 1 and 2 only

Ans) a

Exp) option a is the correct answer.

Statement 1 is incorrect: Alkaline soil is referred to by some gardeners as “sweet soil.” The pH level of alkaline soil is above 7, and it usually contains a great deal of sodium, calcium, and magnesium. Since alkaline soil is less soluble than acidic or neutral soil, availability of nutrients is often limited. It is due to this that stunted growth and nutrient deficiency are common.

Statement 2 is correct: As a result of soil alkalinity, **soil fertility is reduced.** Soil alkalinity or salinity is a condition that results from the accumulation of soluble salts in soil. An excessive accumulation of salts in the soil profile causes a decline in agricultural productivity. Soil salinity affects plants directly through the reduced osmotic potential of the soil solution and the toxicity of specific ions such as boron, chloride, and sodium.

Statement 3 is incorrect: Soil alkalinity limits the choice of crops to only salt tolerant crops. Those crops which are tolerant towards the salt levels in the soil can be grown in alkaline soils.

Source: Khullar, <https://omexcanada.com/blog/soil-ph>

Q.43) Consider the following statements about Alpine Forests in India:

1. In India, they are only found in the Eastern Ghats.
2. Silver fir, and junipers are the common vegetation that can be found in this type of forests.
3. They form more than 20 percent of the total Forest Area in India

Which of the statements given above is/are **incorrect**?

- a) 1 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) c

Exp) option c is the correct answer.

Statement 1 is incorrect: The Alpine forests occur **along the Himalayas at altitudes ranging between 2,900 to 3,500 m or even up-to 3800 m above sea level**, (But the average height of Eastern Ghats is only about 1,822 m) depending upon the location and the variety of species.

Statement 2 is correct: **Silver fir, junipers, pines and birches** are the common trees of these forests. However, they get progressively stunted as they approach the snow-line. Ultimately, through shrubs and scrubs, they merge into the Alpine grasslands. These are used extensively for grazing by nomadic tribes,

Statement 3 is incorrect: They form only 2.1 percent of the Total Forest Area in India.

Source) NCERT

Q.44) Consider the following pairs about the river confluences and the rivers which meet at these points:

River	Rivers
Confluences	
1. Dev Prayag	Alaknanda and Pindar Ganga
2. Vishnu Prayag	Dhaulti Ganga and Vishnu Ganga
3. Karna Prayag	Mandakini and Alaknanda
4. Rudra Prayag	Bhagirathi and Alaknanda

How many of the above pairs are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) All four pairs

Ans) a

Exp) Option a is the correct answer.

The Ganga is the most important river of India both from the point of view of its basin and cultural significance. It rises in the Gangotri glacier near Gaumukh (3,900 m) in the Uttarkashi district of Uttarakhand. Here, it is known as the Bhagirathi. It cuts through the Central and the Lesser Himalayas in narrow gorges.

Pair 1 is incorrect: At Devprayag, the Bhagirathi meets the Alaknanda. It is the last Prayag of the Alaknanda river, from here the confluence of Bhagirathi and Alaknanda is known as Ganga.

Pair 2 is correct: At Vishnu Prayag (also known as Joshimath), Dhauli Ganga and Vishnu Ganga meet. From here the confluence of these two rivers is known as Alaknanda.

Pair 3 is incorrect: At Karna Prayag, Alaknanda meets Pindar river that originates from the Pindar glacier, below the Nanda devi mountain range.

Pair 4 is incorrect: Mandakini meets Alaknanda at Rudra Prayag. The confluence is named after god Shiva, who is also known as Rudra.

Source: India: Physical Environment, Class 11, pg. 25

Q.45) With reference to the freedom fighters who are famously known as Chapekar brothers, consider the following statements:

1. They organised the 'Society for the Removal of Obstacles to the Hindu Religion' to overthrow British.
2. They were hanged by the British for their role in assassinating the British Plague Commissioner of Poona.
3. They were influenced by Tilak's idea of militant nationalism.
4. Tilak mentioned Chaphekar brothers as founders of the revolutionary movement in India.

Which of the statement/s given above is/are correct?

- a) 1, 2 and 3 only
- b) 1, 2 and 4 only
- c) 2, 3 and 4 only
- d) 3 only

Ans) a

Exp) Option a is the correct answer.

The Chapekar brothers, Damodar Hari Chapekar (1869 -1898), Balkrishna Hari Chapekar (1873 - 1899) and Vasudeo Hari Chapekar (1880- 1899) belonged to Maharashtra. and under the influence of Tilak engaged themselves in revolu-tionary activities

Statement 1 is correct: They organised a **society, known as the 'Society for the Removal of Obstacles to the Hindu Religion'**, for imparting **military training** to Indian youth for overthrow-ing the British.

Statement 2 is correct: In 1897 Damodar and Balkrishna attacked and killed Mr Rand, the British Plague Commissioner of Poona. Mr Rand had adopted policies to forcibly evacuate people from Poona during the plague epidemic in 1897. They were hanged for avenging the poor handling of plague in Pune in 1897 by British officers.

Statement 3 is correct: They were influenced by the Tilak's militant nationalism. During the 1890s, Tilak propagated a spirit of militant nationalism, including use of violence, through Ganapati and Shivaji festivals and his journals Kesari and Maharatta. Two of his disciples—the Chapekar brothers, Damodar and Balkrishna—murdered the Plague Commissioner of Poona, Rand.

Statement 4 is incorrect: Lala Lajpat Rai also known as the lion of Punjab mentioned Chapekar brothers as founders of the revolutionary movement in India.

Source: <https://amritmahotsav.nic.in/event-detail.htm?47074>

<https://timesofindia.indiatimes.com/city/pune/forgotten-heroes-will-come-alive-at-chapekar-wada/articleshow/6312610.cms>

Spectrum: The brief history of India - First Phase of Revolutionary Activities (1907-1917) (pg no 287)

Q.46) In India, Tropical Wet Evergreen forests are predominantly found in which of the following regions?

1. Western slopes of Western Ghats
2. Purvanchal Hills
3. Northwestern Rajasthan.
4. Andaman and Nicobar Islands.

Select the correct answer from the code given below:

- a) 1, 2, 3 and 4
- b) 1, 2 and 4 only
- c) 3 and 4 only
- d) 1 and 2 only

Ans) b

Exp) option b is the correct answer.

The tropical evergreen forests usually occur in areas receiving more than 200 cm of rainfall and having a temperature of 15 to 30 degrees Celsius.

Options 1, 2 and 4 are correct : The Tropical Wet Evergreen forests are found along the western side of the Western Ghats (500 to 1370 metres above sea level), some regions in the Purvanchal hills running from Northeast to Southwest direction and in the Andaman and Nicobar Islands.

Option 3 incorrect: Tropical thorn forests are found in arid and semi-arid regions of western Rajasthan. These extend from western Indo -Park border and gradually merge with the dry deciduous mixed forests of the Aravalli hills and the south-eastern plateau.

Source: Khullar

Q.47) This river originates in the Trimbak Plateau of Maharashtra. From its source, it flows eastwards and joined by a large number of tributaries namely Manjra, Penganga, Wardha, Wainganga, Indravati and Pranhita. It flows through Maharashtra, Andhra Pradesh, Telangana, Chhattisgarh and Odisha. It is the largest river system of the Peninsular India.

Which of the following rivers is described in the above paragraph?

- a) Mahanadi
- b) Godavari
- c) Krishna
- d) Kaveri

Ans) b

Exp) Option b is the correct answer.

The Godavari River has one of the largest basin areas of 3,12,812 sq km (9.5% of India) which is larger than even that of the Brahmaputra in Indian territory. The source of this river is in the **Trimbak Plateau of North Sahyadri near Nashik in Maharashtra** which is only 80 km from the shore of the Arabian Sea. 48.6 percent of its basin area lies in **Maharashtra**, 23.8 per cent in **Andhra Pradesh and Telangana**, 20.7 percent in **Madhya Pradesh and Chhattisgarh**, 5.5 per cent in **Odisha** and only 1.4 percent in **Karnataka**. The Godavari is the **largest river system of the Peninsular India** and is next only to the Ganga and the Indus Systems regarding sanctity, utility and is held in **reverence as Vridha Ganga or Dakshin Ganga**. Its total length is **1,465 kilometres**. From its source it flows eastwards in a narrow rocky bed unto Nashik, but the river valley opens out below this point. It has both left and right bank tributaries, but the **left bank tributaries are more in number and larger in size** than the right bank tributaries. The Manjra is the only important right bank tributary. **The Penganga, the Wardha, the Wainganga, the Indravati and the Sabari are important left bank tributaries**. Below Rajahmundry, the river divides itself into two main streams, the **Gautami Godavari on the east and the Vashishta Godavari on the west** and forms a **large delta before it pours into the Bay of Bengal**.

Source: India a comprehensive geography by D.R. Khullar, Chapter 4

Q.48) Consider the following pairs:

Region	Description
1. Khadar	Newer and younger deposits of the flood plains
2. Bhangar	Contains Kankar soil with calcareous deposits.
3. Bhabar	Smaller streams disappear underground here

Which of the pairs given above are correctly matched?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Great Northern Plains is made up of the soils brought down and deposited by the rivers flowing from the Himalayas in the North and the Great Indian plateau in the South. The plains are categorized in different regions based on their features.

Pair 1 is correct. The newer, younger deposits of the flood plains are called **khadar**. They are renewed almost every year and so are fertile, thus, ideal for intensive agriculture.

Pair 2 is correct. **Bhangar** is the largest part of northern plain and is composed of the oldest alluvial soil. They lie above the flood plains and resemble terraces. The soil of this region is locally known as **kankar** and is composed of **calcareous deposits**.

Pair 3 is correct. There is a strip of plain about 10–15 km broad along the outer slopes of the Siwaliks in Punjab, Haryana and Uttar Pradesh. This region is known as '**bhabar**'. This strip of bhabar is made of gravel and coarse sand. The **smaller streams disappear** under ground in the 'bhabar' region during the summer season and their water surfaces again after crossing the bhabar.

Source: <https://www.nios.ac.in/media/documents/316courseE/ch16.pdf>

Q.49) Most of the rivers originating from the Himalayas in Northern India flows towards east and nearly 77% of the drainage is oriented towards the Bay of Bengal. Which of the following is the most appropriate reason for this drainage system?

- The Indian plateau slopes towards eastern side due to upliftment of Delhi ridge.
- The perennial nature of river forces them to take longer course.
- The rivers have many tributaries creating eastward pressure.
- Coriolis force is high around Tropic of Cancer forcing most rivers to deflect rightward.

Ans) a

Exp) Option a is the correct answer.

The Himalayan drainage system has evolved through a long geological history. It mainly includes the Ganga, the Indus and the Brahmaputra River basins which drains into Bay of Bengal. The reason for the same is as follows:

Option a is correct – It is opined that in due course of time Indo- Brahma River was dismembered into three main drainage systems **The dismemberment was probably due to the Pleistocene upheaval in the western Himalayas, including the uplift of the Potwar Plateau (Delhi Ridge), which acted as the water divide between the Indus and Ganga drainage systems.** Likewise, the downthrusting of the Malda gap area between the Rajmahal hills and the Meghalaya plateau during the mid-pleistocene period, diverted the Ganga and the Brahmaputra systems to flow towards the Bay of Bengal

Option b is incorrect – **Although being Perennial is one of the condition but not necessary condition.** The Peninsular rivers like Godavari and Krishna are non-perennial but still drains in Bay of Bengal.

Option c is incorrect – **Both the east and west flowing rivers have tributaries.** For example River Narmada has several tributaries like Tawa, Heran, Banjar, Beda etc. Even Tapi river has tributaries like Purna, Girna etc. Similarly, east flowing rivers also has several tributaries. It is also not the reason for rivers to flow eastward.

Option d is incorrect – **It is not related to the drainage pattern of rivers. Drainage pattern evolves over ages and not due to mere deflection.** Coriolis force is least at equator and increases towards poles. It creates deflection to the right of moving object in Northern Hemisphere whereas the rivers have taken a left course. The option was meant to confuse the aspirant.

Source: India – Physical Environment – The Drainage System

Q.50) Consider the following statements regarding Attukal Pongala festival:

- It is a one-month long festival of Tamil Nadu dedicated to Goddess Bhadrakali.
- During the festival, a large congregation of women can be seen.
- A sacrificial offering known as Kuruthitharpanam is included in this event.

Which of the statements given above are correct?

- 1 and 2 only
- 2 and 3 only
- 1 and 3 only
- 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Attukal Pongala is a festival that is celebrated by women in Kerala's Thiruvananthapuram.

Statement 1 is incorrect: Celebrated at the Attukal Bhagavathy Temple in Thiruvananthapuram, Kerala, India, Attukal Pongala is a ten-day festival during which millions of women gather on a ninth day and

prepare a spiritual food made of rice in clay or earthen pots and offer it to the goddess of the temple. **This festival is dedicated to Attukal Bhagavathy, also known as Goddess Kannaki or Bhadrakali.**

Statement 2 is correct: Every year, women in large numbers gather at the Attukal Temple to celebrate and offer sweets in earthen pots to Attukal Devi. Interestingly, **it is one of the largest women-gathering festivals that is recorded around the world.**

Statement 3 is correct: Attukal Pongala Mahotsavam begins in the month of Kumbham as per Malayalam calendar. It is celebrated every year and falls in the month of February or March. During the 10-days festivities, **a sacrificial offering known as Kuruthitharpanam is included in the religious event.**

Source: <https://www.firstpost.com/india/attukal-pongala-2022-find-history-significance-and-why-the-festival-is-important-to-women-10377381.html>

<https://www.india-tours.com/fairs-and-festivals/attukal-pongala.html>

Q.1) Consider the following statements with reference to the Particularly Vulnerable Tribal Groups (PVTGs) in India:

1. The classification of certain tribes as PVTGs was first started during the First Five-year Plan.
2. Only those tribes whose population falls below 2500 can be listed as PVTGs.
3. The classification of PVTGs as a separate group was first done on the recommendations of Xaxa committee.

Which of the above given statements is/are **incorrect**?

- a) 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Particularly Vulnerable Tribal Groups (PVTGs) are more vulnerable among the tribal groups. Due to this factor, more developed and assertive tribal groups take a major chunk of the tribal development funds, because of which PVTGs need more funds directed for their development.

Statement 1 is incorrect: In 1975, the Government of India initiated to identify the most vulnerable tribal groups as a separate category called PVTGs and declared 52 such groups. In 1993 an additional 23 groups were added to the category, making it a total of 75 PVTGs.

Statement 2 is incorrect: There is no fixed population number below which only certain tribes would be listed as PVTGs. There are 12 PVTGs having a population above 50,000 and the remaining groups have a population of 1000 or less. The Government of India follows the following criteria for the **identification of PVTGs**.

- 1) Pre-agricultural level of technology
- 2) Low level of literacy
- 3) Economic backwardness
- 4) A declining or stagnant population

Statement 3 is incorrect: In 1973, the Dhebar Commission created Primitive Tribal Groups (PTGs) as a separate category, who are less developed among the tribal groups. In 2006, the Government of India renamed the PTGs as PVTGs.

Xaxa committee was appointed in 2013, under chairmanship of Prof. Virginius Xaxa. The Committee was mandated to examine the socio-economic, educational and health status of tribal communities and recommend appropriate interventional measures to improve the same.

Source : <https://vikaspedia.in/social-welfare/scheduled-tribes-welfare/particularly-vulnerable-tribal-groups>

<https://indianexpress.com/article/explained/state-of-denotified-tribes-house-panel-development-programme-7854312/>

Q.2) Which among the following best defines the term “Gross Reproduction Rate”?

- a) The average number of daughters, a group of women would have if she survived all her childbearing years.
- b) The average number of sons, a group of women would have if she survived all her childbearing years
- c) The average number of children, a group of women would have if she survived all her childbearing years
- d) The number of live births in a year per thousand of the population.

Ans) a

Exp) Option a is the correct answer.

The **gross reproduction rate (GRR)** is the average number of daughters a group of women would have if she survived all of her childbearing years, which is roughly to the age of 45, subject to the age-specific fertility rate and sex ratio at birth throughout that period.

- 1) It is often regarded as the extent to which the generation of daughters replaces the preceding generation of women and so on and so forth.
- 2) If the value is equal to one that indicates that women will replace themselves. If the value is more than one that indicates that the next generation of women will outnumber the current one.
- 3) If the value is less than one that indicates that the next generation of women will be less numerous than the current one.

Source: <https://unstats.un.org/unsd/demographic/products/dyb/DYBNat/NotesNatStatTab03.htm>

Q.3) Consider the following statements regarding the trends of migration as per Migration in India Report 2020-21:

1. Migration rate in rural areas is higher than that of the urban areas.
2. Migration rate of males is higher than the migration rate of female.
3. Intra-state migration is more pronounced than inter-state migration.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Migration is the **movement of people** away from their usual place of residence, across either **internal** (within country) or **international** (across countries) borders. Migration may be interpreted as a spontaneous effort to achieve a **better balance between population and resources**. Migration may be **permanent, temporary or seasonal**. **Migration in India 2020-21** report was released by the **Ministry of Statistics and Programme Implementation (MoSPI)**.

Statement 1 is incorrect: As per **Migration in India report**, the all-India migration rate was 28.9 per cent for July 2020-June 2021, with 26.5 percent migration rate in rural areas and 34.9 percent in urban areas.

Data depicts that the rate of migration is higher in urban areas compared to rural areas. So, statement 1 is incorrect.

Statement 2 is incorrect: As per Migration in India report, **females recorded a higher share of migration rate of 47.9 percent**, with 48 per cent in rural areas and 47.8 per cent in urban areas. The **migration rate for males was seen at 10.7 per cent**, with 5.9 per cent in rural areas and 22.5 per cent in urban areas. Among females, the highest level of migration rate was seen **for marriage**, while males mostly migrated due to **employment related reasons**. So, **statement 2 is incorrect**.

Statement 3 is correct: A significant share of migration took place within the same state. **92.6% of females and 65.6% of males had moved within the same state** while 7.2% of females and 31.4% of males moved to another state. 2.9% of males and 0.2% of females had moved to another country. **Overall, the intra-state migration was 87.5% and inter-state migration was 11.8%.**

Source: Class 11th NCERT Human Geography Chapter: The World Population Distribution, Density and Growth

<https://factly.in/data-plfs-migration-report-indicates-that-more-than-70-in-india-migrate-due-to-marriage/>

<https://pib.gov.in/PressReleasePage.aspx?PRID=1833854>

Q.4) Consider the following pairs of population trends and respective shape of pyramids:

Type of Pyramid Population trends

- | | |
|-------------------------|---|
| 1. Expansive pyramid | It represents situation of high fertility and high mortality in an area. |
| 2. Stationary pyramid | It indicates high mortality and very low life expectancy levels in an area. |
| 3. Constrictive pyramid | Exclusively associated with least developed countries. |

How many pairs given above is/are correctly matched?

- Only one pair
- Only two pairs
- All three pairs
- None of the pairs

Ans) a

Exp) Option a is the correct answer.

A population pyramid is popularly known as “age pyramid” or “age and sex pyramid”. It is a graphical representation of age structure or the distribution of population according to various age groups

Pair 1 is correctly matched: Expansive Pyramid: The population pyramid with broad base and with successive decline in the share of population of higher age groups is known as expansive pyramid. This pyramid **represents situation of high fertility, high mortality**, low life expectancy, higher population growth rates and low share of old age persons. It indicates expansion of population. Expansive age pyramids are common for developing countries mainly in Africa and Asia.

Pair 2 is incorrectly matched: Stationary Pyramid: A pyramid is described stationary when the share of population remains constant in different age groups over the period of time. **It represents situation of low fertility, low mortality and high life expectancy.** It indicates slow population growth or stable population. The stationary or near stationary population pyramid displays somewhat equal share of juvenile and adult age groups.

Pair 3 is incorrectly matched: Constrictive Pyramid: A pyramid with a narrow base is called constricted pyramid. It represents low fertility, low mortality, high life expectancy and ageing of population. **It is typically associated with very advanced countries which have a high level of literacy**, easy access to birth control measures and very good health and medical facilities.

Source: Class 11th NCERT Human Geography Chapter: Population Composition

http://wwjmr.com/upload/types-and-significance-of-population-pyramids_1523552342.pdf

Q.5) With reference to 'Southern Ocean', consider the following statements:

1. It is the only ocean that completely encircles the Earth.
2. It has no northern boundary and is fed by water from the other oceans.
3. It is known as 'Global sink' as it plays a vital role in absorbing and storing carbon from the atmosphere.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Southern Ocean, also known as the Antarctic Ocean, is the **fourth-largest ocean on Earth** and surrounds Antarctica. It is the body of water surrounding Antarctica and extending to the **southernmost tip of South America, Africa, and Australia**. It is known for its **strong winds and currents, as well as its cold temperatures and high levels of salinity**. The Southern Ocean is also home to a diverse array of marine life, including penguins, seals, and whales.

Statement 1 is correct: The Southern Ocean is the **only ocean that completely encircles our planet**, uninterrupted by any significant land mass. It comprises the southernmost waters of the world ocean, generally taken to be south of 60° S latitude and encircling Antarctica.

Southern Ocean

Statement 2 is correct: The Southern Ocean has **no clear northern boundary**, as it is **fed by water from the other oceans**. The currents that flow into the Southern Ocean from the other oceans help to mix the water and create the unique oceanography of the Southern Ocean.

Statement 3 is correct: The Southern Ocean is known for its high albedo capacity. **The Southern Ocean is known as the "Global sink"** as it plays a vital role in absorbing and storing carbon from the atmosphere, which helps to mitigate the impacts of climate change.

Source: <https://www.theguardian.com/australia-news/2022/sep/08/the-southern-ocean-absorbs-more-heat-than-any-other-ocean-on-earth-and-the-impacts-will-be-felt-for-generations>

<https://www.nationalgeographic.com/environment/article/theres-a-new-ocean-now-can-you-name-all-five-southern-ocean>

<https://www.sciencedirect.com/topics/earth-and-planetary-sciences/southern-ocean>

Q.6) Which of the following statements are correct regarding the Conurbation?

- a) It is a large urban area that resulted from the merging of originally separate towns or cities.
- b) It is a group of villages which is generally administered by a single authority.
- c) It is a residential area with substandard housing that is overcrowded, unhealthy and socially undesirable.
- d) It is a type of rural settlement which is fragmented into several units physically separated from each other.

Ans) a

Exp) Option a is the correct answer.

A conurbation is a **region comprising a number of metropolises, cities, large towns, and other urban areas.**

Statement a is correct: The term conurbation means a **large area of urban development that resulted from the merging of originally separate towns or cities.** Conurbations have a large **population** and provide **market access, employment opportunities and better social services.** Greater London, Manchester, Chicago and Tokyo are examples of Conurbation.

Statement c is incorrect: A slum is a residential area with substandard housing that is poorly serviced and/or overcrowded, and therefore unhealthy, unsafe, and socially undesirable.

Statement d is incorrect: Hamleted settlements are the settlements fragmented into several units physically separated from each other bearing a common name. These units are locally called panna, para, palli, nagla, dhani, etc. in various parts of the country. This segmentation of a large village is often motivated by social and ethnic factors. Such villages are more frequently found in the middle and lower Ganga plain, Chhattisgarh and lower valleys of the Himalayas.

Knowledge Base: Conurbation is a collection of townships, suburbs, satellite towns, and other areas that connect two or more megacities. It is the **outcome of the coalescence of several expanding towns or urban nuclei.** They are an **element of urban ecology**, as they are functionally intertwined with megacities and large cities.

Class 11th NCERT Human Geography Chapter: Human Settlement

Q.7) Athabasca Basin region of Canada, Chu-Sarysu basin in Kazakhstan and McArthur River basin in Canada are well known for their:

- a) uranium deposits
- b) automobile industries
- c) Mica deposits
- d) Food processing industries

Ans) a

Exp) Option a is the correct answer.

Uranium (chemical symbol U) is a naturally occurring radioactive element. Uranium has three primarily naturally occurring isotopes: U-238, U-235 and U-234. Uranium is used in nuclear power generation. Specifically, U-235 can be concentrated in a process called “enrichment,” making it “fissile” and suitable for use in nuclear reactors or weapons. Some important sites of Uranium deposits in the world are discussed below:

- 1) Canada’s Athabasca Basin hosts several of the highest-grade uranium deposits on the planet. Located primarily in the mining friendly jurisdiction of Saskatchewan, the Athabasca Basin covers an area of almost 100,000 square kilometers and hosts the world’s largest producing uranium mine, Cigar Lake.

2) Kazakhstan has 15% of the world's uranium resources and an expanding mining sector. Chu-Sarysu basin/ province of Kazakhstan has more than half the country's known resources.

3) The McArthur River mine is the world's largest high-grade uranium mine located in northern Saskatchewan, Canada. The mine was discovered in 1988 and has been in production since 1999.

Source: <https://www.epa.gov/radiation/radionuclide-basics-uranium>

<https://investorintel.com/energy-oil-gas-uranium/canadas-athabasca-basin-the-worlds-richest-uranium-play/>

Q.8) Which among the following criteria are to be met for a settlement to be qualified as a 'Census Town'?

1. The population must be greater than 10000.
2. Population density has to be greater than 400 persons per sq. Km.
3. At least 75% of the male main working population should be employed in non-agricultural sectors.

Select the correct answer using the codes given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 3 only
- d) 2 only

Ans) b

Exp) Option b is the correct answer.

A Census town is a settlement that fulfils the criteria of being considered a town for the purposes of census. The criteria for being classified a census town are:

- 1) Population greater than 5000. **(Option 1 is incorrect)**
- 2) Population density greater than 400 persons per sq. Km. **(Option 2 is correct)**
- 3) At least 75% of the male main working population should be employed in non-agricultural sectors. **(Option 3 is correct)**

The number of census towns trebled from 1,362 to 3,894 during 2001-2011, accounting for 30% of the total rise in urban population of the country.

Source: <https://forumias.com/portal/answered-what-is-a-census-town-how-can-it-boost-indias-urbanization-process-discuss/>

file:///C:/Users/thiru/Downloads/ORGI_circular002_2021%20(1).pdf

Q.9) Consider the following statements regarding Global Gender Gap Report 2022:

1. The report was released by the World Economic Forum.
2. As per the report, Iceland has become the first country in the world to have achieved full gender parity.
3. India was ranked among the top ten countries in the report.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The Global Gender Gap index "benchmarks the current state and evolution of gender parity across four key dimensions (Economic Participation and Opportunity, Educational Attainment, Health and Survival,

and Political Empowerment)”. According to the WEF it is the longest-standing index, which tracks progress towards closing these gaps over time since its inception in 2006.

Statement 1 is correct: The Global Gender Gap Report is released by the World Economic Forum (WEF). The 2022 report ranks India at 135 out of 146 countries. In 2021, India was ranked 140 out of 156 countries. North America is the most advanced region in terms of closing the gender gap in 2022. The population-weighted average score for the region is 76.9%, while Europe has the second-highest level of gender parity, currently standing at 76.6%.

Statement 2 is incorrect: According to the World Economic Forum’s Global Gender Gap Report 2022, it will take 132 years to reach gender parity– with only 68% of the gender gap closed. **Though no country has achieved total gender equality, Iceland remains in the number one position with a gender gap score of 90.8 percent.**

Statement 3 is incorrect: World Economic Forum (WEF) **ranked India at 135 out of 146 countries in its Global Gender Gap (GGG) Index for 2022.** India’s overall score has improved from 0.625 (in 2021) to 0.629, which is its seventh-highest score in the last 16 years.

Source: <https://investinginwomen.asia/knowledge/global-gender-gap-report-2022/>

<https://indianexpress.com/article/explained/explained-how-gender-equal-is-india-as-per-the-2022-global-gender-gap-index-8026983/>

<https://www.kiva.org/blog/gender-equality-around-the-world-where-and-when-will-it-be-reached#:~:text=Though%20no%20country%20has%20achieved,of%20women%20in%20the%20workforce.>

<https://www.weforum.org/agenda/2022/07/gender-equal-countries-gender-gap/>

Q.10) With reference to ‘Atlantic Meridional Overturning Circulation (AMOC)’, consider the following statements:

1. It is a large system of ocean current that carry warm water from the tropics into the North Atlantic.
 2. It is driven by the cumulative impact of Coriolis force and high-speed velocity wind in the higher latitudes of northern hemisphere.
 3. It is important for marine biodiversity as it carries nutrients necessary to sustain ocean life.
 4. The phenomenon of global warming is responsible for increasing speed of the circulation in recent years.
- Which of the statements given above is/are correct?

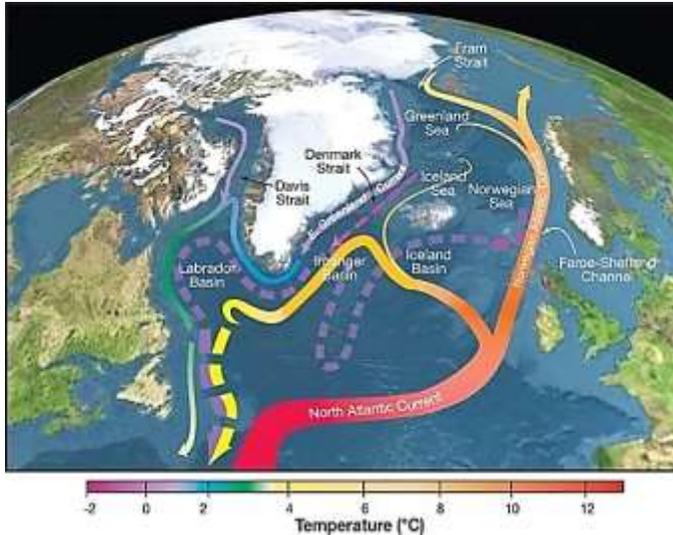

- a) 1 only
- b) 1 and 3 only
- c) 2, 3 and 4 only
- d) 3 and 4 only

Ans) b

Exp) Option b is the correct answer.

Recently, new study has suggested a link between **Atlantic Meridional Overturning Circulation (AMOC)** and the Indian Ocean and the rising temperatures in the Indian Ocean can help to boost the AMOC and delay slow down.

Statement 1 is correct: The Atlantic Meridional Overturning Circulation (AMOC) is a **large-scale ocean current system that carries warm water from the tropics northward** and cold water from the polar regions southward. It is an important component of the Earth’s climate system, as it helps to distribute heat around the planet and regulate global temperatures.

Atlantic Meridional Overturning Circulation (AMOC)

Statement 2 is incorrect: Atlantic Meridional Overturning Circulation (AMOC) is driven by **differences in the density of water in the Atlantic Ocean** (not by Coriolis force and high-speed winds), which are caused by differences in temperature and salinity. The warm water in the tropics is less dense than the cold water in the polar regions, so it sinks and flows northward. This creates a circulation pattern where warm water is transported northward and cold water is transported southward. This circulation pattern helps to distribute heat and regulate global temperatures.

Statement 3 is correct: Atlantic Meridional Overturning Circulation is important for marine biodiversity as it **helps to distribute nutrients throughout the ocean**, which are necessary to sustain marine life. The AMOC helps to **bring deep, nutrient-rich water to the surface, which can support the growth of phytoplankton and other marine organisms**. These organisms form the base of the marine food web, providing food for larger animals such as fish and whales. Additionally, the AMOC helps to regulate the ocean's temperature and pH, which can also have an impact on marine biodiversity.

Statement 4 is incorrect: The phenomenon of **global warming is actually thought to be one of the reasons for the decline of the Atlantic Meridional Overturning Circulation (AMOC)** in recent years. The warming of the ocean surface in the North Atlantic can reduce the density of the water, which can slow the circulation of the AMOC. Additionally, the melting of ice in the Arctic and Greenland can also contribute to a decline in the AMOC by adding freshwater to the ocean, which can further reduce the density of the water.

Source: <https://www.metoffice.gov.uk/weather/learn-about/weather/oceans/amoc>

<https://oceanservice.noaa.gov/facts/amoc.html>

<https://indianexpress.com/article/explained/explained-atlantic-ocean-current-system-slowing-implications-7445388/>

Q.11) Arrange the following types of coal in India in an ascending order based on the carbon content in them:

1. Lignite
2. Peat
3. Anthracite
4. Bituminous

Which one of the following options correctly describes the order?

- a) 1-2-3-4
- b) 2-1-3-4
- c) 1-2-4-3
- d) 2-1-4-3

Ans) d

Exp) Option d is the correct answer.

Coal is one of the most important primary fossil fuels, a solid carbon-rich material that is usually brown or black and most often occurs in stratified sedimentary deposits. India is rich in ancient coal fields like Gondwana coalfields (250 million years old) and tertiary coalfields (15–60 million years old).

Coal is found in a variety of forms depending on the degrees of compression and the depth and time of burial.

1) Option 2: Peat has less than 40 per cent carbon content. It is in the first stage of transformation from wood to coal. It has low calorific value and burns like wood.

2) Option 1: Lignite is often brown in colour. It carries 40 to 55 per cent carbon content. It is an intermediate stage which happens during the alteration of woody matter into coal. It has high moisture content, so it gives smoke when burnt. It is found in Rajasthan, Lakhimpur (Assam), and Tamil Nadu.

3) Option 3: Anthracite is the best quality of coal which carries 80 to 95 per cent carbon content. It ignites slowly with a blue flame. It has the highest calorific value. It is found in small quantities in Jammu and Kashmir.

4) Option 4: Bituminous carries 60 to 80 per cent of carbon content and a low level of moisture content. It is widely used and has high calorific value. It is found in Jharkhand, West Bengal, Odisha, Chhattisgarh and Madhya Pradesh.

Thus, the correct sequence of types of coal based on their carbon content is 2-1-4-3.

Source: NCERT- Contemporary India, Class 10

<https://www.indiatoday.in/education-today/gk-current-affairs/story/indian-coal-reserves-classification-of-coal-and-where-it-is-found-in-the-country-1338928-2018-09-13>

Q.12) Which one of the following options correctly describes the term “Demographic Window of opportunity”?

- a) It is a method used to calculate population changes between two consecutive years in a given area.
- b) It is a hypothetical demographic situation, where literacy rate among the country’s population reaches 100 percent.
- c) It is a demographic situation where the proportion of the working-age population is relatively high compared to the dependent population.
- d) It refers to a period, in a nation’s demographic evolution, when the proportion of dependent population is higher than working age population.

Ans) c

Exp) Option c is the correct answer.

Option a is incorrect: Demographic balancing equation is an equation that is used to calculate population changes from one year to the next in a given area, based on number of births, deaths, and migrations. The general form of the equation is a mass balance equation, in which end population = starting population ± natural increase ± net migration, where natural increase = births – deaths, and net migration = immigrants – emigrants.

Option c is correct: The demographic window of opportunity refers to a period of time in a country’s demographic transition where the **proportion of the working-age population is relatively high compared**

to the dependent population (children and the elderly). During this period, there is a potential for rapid economic growth and development, as the working-age population can support a larger number of dependents and there is a higher ratio of productive workers to non-productive dependents.

Source: <https://www.yourarticlelibrary.com/paragraphs/short-paragraph-on-demographic-window/39529>

<https://www.investopedia.com/terms/d/demographic-dividend.asp>

Q.13) Consider the following pairs of minerals and their largest producing state in India (as of 2020-21):

Minerals	Largest Producer
1. Iron Ore	Karnataka
2. Bauxite	Odisha
3. Manganese	Madhya Pradesh

Which of the above given pairs are correctly matched? Which of the above given pairs are correctly matched?

- 1 and 3 only
- 1 and 2 only
- 2 and 3 only
- 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Pair 1 is incorrect: Odisha is the leading producer of iron ore accounting for 51.1% of total production followed by Chhattisgarh (18.0%), Karnataka (16.9%), Jharkhand (10.4%) and remaining (3.32%) production was reported from Andhra Pradesh, Madhya Pradesh, Maharashtra and Rajasthan

Pair 2 is correct: Odisha with 76.3% contribution is the leading producer of bauxite followed by Gujarat (7.3%), Chhattisgarh (3.5%), Jharkhand (7.3%), Madhya Pradesh (3.1%), and Maharashtra (2.3%).

Pair 3 is correct: Madhya Pradesh is the largest producer of Manganese Ore contributing 34.3% in the total output of the country in 2020-21.

Source: https://mines.gov.in/writereaddata/UploadFile/Mines_AR_2021-22_English.pdf

<https://pib.gov.in/PressReleasePage.aspx?PRID=1806555>

Q.14) Consider the following statements with reference to Coffee Cultivation in India:

- Kerala is the largest producer of coffee in India.
- India produces both Arabica and Robusta varieties of coffee.

Which of the above given statements is/are correct?

- 1 only
- 2 only
- Both 1 and 2
- Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: Karnataka is the largest coffee-producing state in India. It accounts for about 70% of the total coffee production in India.

Statement 2 is correct: Arabica coffee is cultivated in tropical regions whereas Robusta is the most widely cultivated variety of coffee. Traditionally, India has been a noted producer of Arabica coffee but in the last decade Robusta beans are grown substantially.

Source: <https://yourstory.com/smbstory/dipp-awards-gi-certification-five-varieties-indian-coffee>
<https://ncert.nic.in/ncerts/l/jess104.pdf>

Q.15) With reference to 'Atal Tunnel', consider the following statements:

1. The tunnel runs under the 'Rohtang Pass' situated in Pir Panjal Ranges of the Himalayas.
2. It is constructed by National Highway Authority of India in collaboration with IIT, Roorkee.
3. It connects the cities of Manali in Himachal Pradesh and Leh in the Union Territory of Ladakh.
4. It is India's first tunnel with a fully integrated tunnel control system.

Which of the statements given above are correct:

- a) 1 and 3 only
- b) 2 and 4 only
- c) 2, 3 and 4 only
- d) 1, 2 and 3 only

Ans) a

Exp) Option a is the correct answer.

Recently, Atal Tunnel has officially been certified by the World Book of Records as the 'World's Longest Highway Tunnel above 10,000 Feet'.

Statement 1 is correct: Atal Tunnel runs under the 'Rohtang Pass' and shortens the distance between Solang Valley and Sissu by around 46 km. It is present on the Pir Panjal Range of Himalayas.

Statement 2 is incorrect: Atal Tunnel was built by the **Border Roads Organisation (BRO)**, which is an Indian government agency responsible for the **construction and maintenance of roads and bridges in the border areas of India**. The construction of the tunnel began in 2010 and was completed in October 2020, after 10 years of hard work.

Statement 3 is correct: Atal Tunnel connects the **valley of Lahaul-Spiti** in the Indian state of **Himachal Pradesh** with the rest of India. Specifically, it **connects the towns of Manali and Leh**, providing an all-weather road that is expected to provide a reliable connectivity to the region throughout the year, including during heavy snowfall. This is expected to provide a major boost to the economy and tourism of the region, and also enhance the strategic importance of the area.

Statement 4 is incorrect: Dr. Syama Prasad Mookerjee Tunnel is **India's first tunnel with a fully integrated tunnel control system**. It is located in **Jammu and Kashmir** and connects **Srinagar with the Kargil and Zojila passes**. This Tunnel was built by the Border Road Organization (BRO) and was inaugurated on May 3, 2021. It is considered a major engineering feat and is expected to provide a reliable year-round connectivity to the region.

Q.16) Consider the following statements regarding the Population distribution in the world:

1. As per the UN World Population Prospects 2022, global population growth rate is continuously increasing for the last five decades.
2. Europe has the highest population density among all the continents.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

World population reached **8 billion** people at the end of 2022 according to the **United Nations**. Patterns of **population distribution and density** help in understanding the demographic characteristics of any area. As per **United Nations (UN) World Population Prospects 2022**, world population is projected to reach 8.5 billion in 2030, and to increase further to 9.7 billion in 2050 and 10.4 billion by 2100.

Statement 1 is incorrect: According to UN, it took the global population 12 years to grow from 7 billion to 8 billion, it will take approximately 15 years until 2037, for it to reach 9 billion. **This indicates that overall growth rate of global population is slowing. The UN population report said the global population is growing at its slowest rate since 1950, having fallen under 1% in 2020.**

Statement 2 is incorrect: **Population density** is the ratio between the numbers of people to the size of land (**Density of Population = Population/Area**). It is usually **measured in persons per sq. km. Asia (and not Europe) is the most populated continent in the world.** Asia has a population of approximately 4.5 billion (**59.55% of the world's population**) in an area of 17,212,000 square miles. The continent's **population density is 246.11 per square mile.** Europe has a population of 743 million (9.73% of the global population) in an area of 3,930,000 square miles. **The population's density is 187.84 per square mile.** So, statement 2 is incorrect.

Source: <https://www.worldatlas.com/articles/continents-by-population-density.html>

Class 11th NCERT Human Geography Chapter: The World Population Distribution, Density and Growth
<https://www.un.org/en/global-issues/population>

Q.17) Consider the following pairs of Nuclear Reactors and the state in which they are located:

Nuclear Reactors	State
1. Rawatbhata	Karnataka
2. Kaiga	Rajasthan
3. Kakrapar	Gujarat
4. Kalpakkam	Tamil Nadu

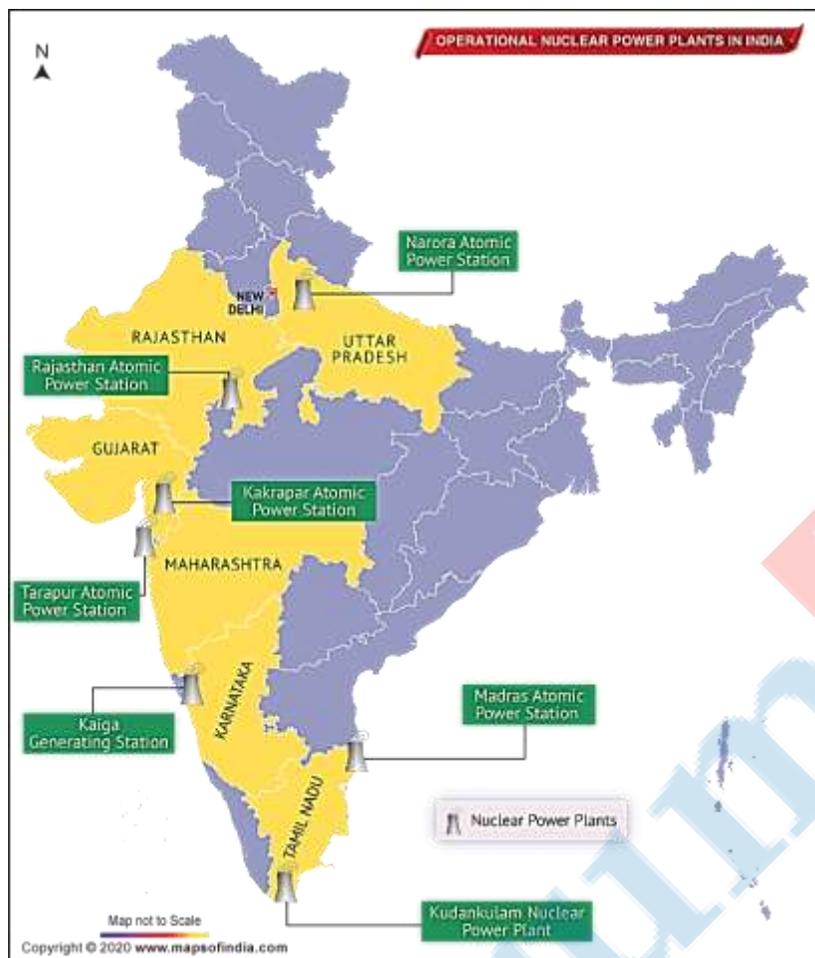

How many of the above given pairs are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) All the four pairs

Ans) b

Exp) Option b is the correct answer.

Presently, India has 22 operating reactors, with an installed capacity of 6780 MWe. Among these eighteen reactors are Pressurised Heavy Water Reactors (PHWRs) and four are Light Water Reactors (LWRs).

Pair 1 is incorrect: Rawatbhata Nuclear Power Plant is located near the town of Rawatbhata in the **Chittorgarh district of Rajasthan, India**. The plant has a total installed capacity of 1,180 MW, with six heavy water reactors in operation.

Pair 2 is incorrect: Kaiga Nuclear Power Plant is situated near the village of Kaiga, in the **Uttara Kannada district of Karnataka, India**. The plant has four operational pressurized heavy water reactors with a combined capacity of 880 MW.

Pair 3 is correct: Kakrapar Nuclear Power Plant is located in the state of **Gujarat, near the city of Surat, India**. The plant consists of two pressurized heavy water reactors with a total capacity of 1,400 MW.

Pair 4 is correct: Kalpakkam Nuclear Power Plant is located in the **Kancheepuram district of Tamil Nadu, near the town of Kalpakkam, India**. The plant has two pressurized heavy water reactors with a combined capacity of 470 MW and is also home to the Fast Breeder Test Reactor (FBTR).

<https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1897803>

Q.18) Consider the following statements with reference to Mediterranean agriculture:

1. It is usually characterized by the cultivation of crops adapted to hot dry summers and wet winters.
2. This type of agriculture can be found in Central Chile and Western Cape province of South Africa.

Which of the above given statements are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Mediterranean agriculture is not exclusive to the Mediterranean region but actually reflects a set of practices undertaken in the Mediterranean and climates similar to it. Under the most common climate classification system.

Statement 1 is correct: Mediterranean agriculture is characterized by the cultivation of crops adapted to hot, dry summers and mild, wet winters. In general, there is almost no precipitation or cloud cover during the summer months. Winter and spring months are when Mediterranean climate areas receive the vast majority of rain for the entire year.

Statement 2 is correct: The climate of Central Chile is of temperate Mediterranean type, with the amount of rainfall increasing considerably and progressively from north to south. **Similarly, the Western Cape province of South Africa has a Mediterranean climate with warm** to hot, dry, sunny summer weather and mild, rainy conditions in winter. Both places thus practice Mediterranean agriculture.

Source: <https://www.mdpi.com/2073-445X/12/3/716>

<https://www.cambridge.org/core/books/abs/agricultural-systems-of-the-world/mediterranean-agriculture/>

Q.19). Consider the following statements with respect to the Fertilizer industry in India:

1. Natural gas availability plays a key role in deciding the location of nitrogen-based fertilizer industry.
2. Rock Phosphate, a key component of fertilizer industry, is largely imported.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Fertilizers have played an essential role in agricultural production, providing vital nutrients for crops and registering increasing demands over the years. As an agrarian country, India is home to numerous small and marginal farmers and is often plagued by low productivity and low quality. Crops are mainly rainfed and cultivated on single piece of land over time, decreasing soil fertility in many regions. Thereby, increasing quantities of nitrogen fertilizers have been used in the country.

Statement 1 is correct. Urea/ Nitrogen Based industries are located near Natural gas source □ Natural Gas has Methane (CH₄), which when mixed with Oxygen, Nitrogen + heat in presence of catalysts produces Ammonia (NH₃), known as Haber process. This Ammonia (NH₃) can be used for making nitrogen-based fertilizers e.g. Urea. Therefore availability (and price) of Natural Gas, affects the location of Fertilizer industry.

Statement 2 is correct. Rock Phosphate is the key raw material for DAP and NPK fertilizers and India is 90% dependent on imports of it. **India imports Phosphorus** from Vietnam, Russian Federation, Kazakhstan, United Arab Emirates.

<https://irade.org/Final%20Report%20-%20Natural%20Gas%20-%20Fertilizer.pdf>

Q.20) With reference to the recent cyclonic events, consider the following pairs:

Cyclone	Location
1. Asani	Indian Ocean
2. Hinnamnor	West Pacific
3. Ian	North Atlantic
4. Bonnie	Mediterranean sea

How many pairs given above are correctly matched?

- Only one pair
- Only two pairs
- Only three pairs
- All four pairs

Ans) c

Exp) Option c is the correct answer.

Tropical cyclones are low pressure systems that form over warm tropical waters. They typically form when the sea-surface temperature is above 26.5°C.

Pair 1 is correctly matched: The severe **cyclonic storm Asani** was developed in **Bay of Bengal** and crossed the coast between Machilipatnam and Narasapur in Andhra Pradesh in May 2022.

Pair 2 is correctly matched: The **West Pacific** produced the only two category 5 storms that occurred globally in 2022. Both of these typhoons, **Hinnamnor** and Noru, occurred in 2022 during an active period from late August through September. Hinnamnor weakened as it approached South Korea but still made landfall as a category 2 typhoon and one of the strongest in history there. Noru caused severe damage to the Philippines and Southeast Asia.

Pair 3 is correctly matched: In **North Atlantic**, **Hurricane Ian** made landfall in southwestern Florida shortly after achieving a peak intensity of 155 mph, just shy of category 5 strength (≥ 157 mph).

Pair 4 is incorrectly matched: **Hurricanes Bonnie and Julia**, both formed in the Atlantic before crossing **Central America into the East Pacific**.

Source: <http://www.bom.gov.au/cyclone/tropical-cyclone-knowledge-centre/understanding/tc-info/>
<https://timesofindia.indiatimes.com/city/visakhapatnam/cyclone-asani-live-updates-may-10-2022/liveblog/91456588.cms>

<https://www.ncei.noaa.gov/access/monitoring/monthly-report/tropical-cyclones/202213>

Q.21) Consider the following statements with reference to Mixed Farming:

- This form of agriculture is highly predominant in less developed parts of the world.
- It is generally characterised by high capital expenditure on farm machinery.

Which of the statements given above is/are **incorrect**?

- 1 only
- 2 only
- Both 1 and 2
- Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Mixed farming is a type of farming which involves both the growing of crops and the raising of livestock. It is defined as a system of farming on a particular farm which includes crop production, raising livestock, poultry, fisheries, beekeeping etc., to sustain and satisfy as many needs of the farmer as possible.

Statement 1 is incorrect: This **Mixed farming form of agriculture is found in the highly developed parts of the world, e.g., North-western Europe, Eastern North America, parts of Eurasia** and the temperate latitudes of Southern continents. Mixed farms are moderate in size and usually the crops associated with it are wheat, barley, oats, rye, maize, fodder and root crops.

Statement 2 is correct: Mixed farming is characterised by high capital expenditure on farm machinery and building, extensive use of chemical fertilisers and green manures and also the skill and expertise of the farmers.

Source: <https://ncert.nic.in/ncerts/l/legy105.pdf>

<https://www.sciencedirect.com/topics/agricultural-and-biological-sciences/integrated-farming>

Q.22) Which of the following best describes the Quinary Sector of the economy?

- It is the part of the economy which is directly involved in mining of valuable metals.
- It comprises industries that produce and distribute capital goods.
- It is a part of economy which focusses exclusively on the technological innovations.
- It is the part of the economy where the top-level decisions are made.

Ans) d

Exp) Option d is the correct answer.

The Quinary sector is considered the highest level within the economic classification system. It is mainly focused on high-level decision-making and includes top executives, government officials, research scientists, and other key individuals who are responsible for shaping policies and strategies in various industries.

Option c is incorrect: The fourth sector of the economy, **the quaternary sector, consists of intellectual activities often associated with technological innovation.** It is sometimes called the knowledge economy.

Source: <https://www.thoughtco.com/sectors-of-the-economy-1435795>

Q.23) Consider the following pairs about various approaches related to human geography and their central ideas:

Approach	Central Idea
1. Environmental determinism	Environment determines the patterns of human culture and societal development.
2. Environmental Possibilism	Culture is defined by the decisions that humans make in response to the limitations posed by the environment.
3. Neo-determinism	Environment will have no impact on the development of human culture

How many of the above given pairs are correctly matched?

- Only one pair
- Only two pairs
- All the three pairs
- None of the above

Ans) b

Exp) Option b is the correct answer.

Human geography studies the inter-relationship between the **physical environment and socio-cultural environment created by human beings through mutual interaction** with each other. Human beings interact with their physical environment with the **help of technology**. **Technology indicates the level of cultural development of society**.

Statement 1 is correct: Environmental determinism is the belief that the **environment, most notably its physical factors such as landforms and climate, determines the patterns of human culture and societal development**. Environmental determinists believe that ecological, climatic, and geographical factors alone are responsible for human cultures and individual decisions. Also, social conditions have virtually no impact on cultural development.

Statement 2 is correct: Environmental possibilism states that the environment sets limitations for cultural development, but it does not wholly define culture. **Culture is instead defined by the opportunities and decisions that humans make in response to dealing with such limitations**. **Humans create possibilities with the resources obtained from the environment**. This utilizing scope of the environment by humans with developed technology shows possibilism (**Nature provides opportunities and human beings make use of these**).

Statement 3 is incorrect: Neo-determinism or stop and go determinism concept reflects a **middle path between the two ideas of environmental determinism and possibilism**. It means that **possibilities can be created within the limits which do not damage the environment** and there is no free run without accidents. The activities of man should be according to the laws of the environment, **otherwise, the environment also forces man to stop and adjust his activities**. For example, temperature rise due to greenhouse gases will lead to change in cultural sphere of temperate regions of Europe.

Source: Class 11th NCERT Human Geography Chapter: Human Geography Nature and Scope

Statement 1 & 2:

<https://old.amu.ac.in/emp/studym/100004166.pdf>

Statement 3:

<https://pcsstudies.com/human-geography-nature-and-scope/#:~:text=Neo%2Ddeterminism%20or,run%20without%20accidents.>

<https://www.sciencedirect.com/topics/earth-and-planetary-sciences/environmental-determinism>

Q.24) Consider the statements regarding Canal Irrigation in India:

1. It accounts for more than 20% of the total irrigation in the country.
2. Canal irrigation is mostly found in plain areas.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. A canal is an artificial channel that is constructed to carry water to the fields to perform irrigation. It is one of the most important sources of water irrigation. It accounts for **around 25% of total irrigation** in the country.

Statement 2 is correct. Canal irrigation is possible in areas that are extensive like plains and are **drained by perennial rivers**, such as the northern plains, coastal plains, deltas and broad valleys of the Indian

peninsula. The **plain areas of India are mostly canal irrigated**. States that follow canal irrigation system are Andhra Pradesh, Assam, Haryana, West Bengal, Punjab, Rajasthan, Bihar, Karnataka, Tamil Nadu and Uttar Pradesh.

Source: NCERT- Micro irrigation technician Class 11th – Page 32.

DR Khullar

Q.25) With reference to 'Flood Plain Zoning' in India, consider the following statements:

1. It is one of the most effective non-structural measures for flood management.
2. The flood plain areas are demarcated and regulated by the Ministry of Jal Shakti.
3. The Central Water Commission is the nodal agency for flood forecasting in India.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Despite huge losses to life and property in floods, only three states and one Union Territory (Manipur, Rajasthan, Uttarakhand, and Jammu & Kashmir) have enforced the law for floodplain zoning which aims to minimise the damage caused due to deluge. Experts have called for its immediate implementation in the country in view of frequent floods occurring due to climate change.

Statement 1 is correct: A flood plain is a generally flat area of land next to a river or stream. It stretches from the banks of the river to the outer edges of the valley. **Flood Plain Zoning has been recognized as an effective non-structural measure for flood management.**

Flood-plain zoning measures **aim at demarcating zones or areas likely to be affected by floods of different magnitude** or frequencies and probability levels, and specify the types of permissible developments in these zones, **so that whenever floods actually occur, the damage can be minimised.**

Statement 2 is incorrect: The **action for demarcation of flood plain areas and regulating the activities therein, is to be undertaken by respective state governments.** Ministry of Jal Shakti has continuously impressed upon the States the need to adopt flood plain zoning approach. A model draft bill for flood plain zoning legislation was also circulated by the Union Government to all the States. This bill envisages zoning of flood plain of a river according to flood frequencies and defines the type of use of flood plain. The states of Manipur, Rajasthan, Uttarakhand and erstwhile State of Jammu & Kashmir had enacted the legislation.

Statement 3 is correct: **The Central Water Commission is the nodal agency of the Government of India for flood forecasting.** In addition, the various State Governments have their own flood forecast stations to meet their respective particular needs.

Source:

<https://pib.gov.in/PressReleasePage.aspx?PRID=1805812#:~:text=Flood%2Dplain%20zoning%20measures%20aim,the%20damage%20can%20be%20minimised.https://www.outlookindia.com/national/flood-devastation-states-impervious-to-huge-losses-only-4-enforced-floodplain-zoning-law-news-221035>

file:///C:/Users/sahil/Downloads/Unit-6.pdf

Q.26) Consider the following pairs related to various agricultural revolutions happened in India:

List I (Revolution)	List II (Associated with)
1. Green Revolution	Fertilizer production
2. Golden Revolution	Honey and Horticulture
3. Silver Revolution	Cotton production

Which of the pairs given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Pair 1 is correct. The Green revolution in India was started in the 1960s to 1970s. This revolution **aimed to increase fertilizer production**. The Green revolution **focused on increasing the use of fertilizer** to boost the growth of higher-yielding seeds. Also, there were certain drawbacks in the green revolution which were rectified with the help of green revolution.

Pair 2 is correct. The period between 1991 to 2003 is known as the period of Golden Revolution in India. The Golden revolution is related to the **production of honey and horticulture**. It is a part of the important agricultural revolutions of India.

Pair 3 is incorrect. The Silver Revolution is related to egg and poultry production. It was started in 1969-1978 and medical sciences and innovation played an important role in this revolution. The scientists led the spectacular Silver Revolution by the hybrid of cocks and hens which resulted in increases in poultry production. Hence this statement is incorrect.

Source: <https://timesofagriculture.com/agriculture-revolutions-in-india/>

Q.27) Read the following paragraph about a major crop grown in India:

“This crop can be grown under semi-arid climatic conditions and over inferior soils. It is a rainfed kharif crop which requires temperature between 21°C to 27°C. It can be grown under varied climatic and soil conditions. But the yields are highest in old alluvial soil. Yield is usually high in southern states and declines towards central parts of the country.”

The above description is about which of the following crops?

- a) Pulses
- b) Wheat
- c) Maize
- d) Jowar

Ans) c

Exp) option c is the incorrect answer.

Maize is a food as well as fodder crop grown under semi-arid climatic conditions and over inferior soils. It is a rainfed **kharif crop** which requires temperature between 21°C to 27°C. Maize can be grown under varied climatic and soil conditions. But the yields are highest in old alluvial soil. It is sown all over India except eastern and north-eastern regions. Yield level of maize is higher than other coarse cereals. It is high in southern states and declines towards central parts. It is grown in **semi-arid regions** (25 – 75 cm) where rice and wheat production are not possible.

Source: <https://ncert.nic.in/ncerts/l/legy205.pdf> and https://farmer.gov.in/m_cropstaticsmaize.aspx

Q.28) Consider the following statements related to Wind energy:

1. Production of wind energy releases less Carbon dioxide than solar energy.
2. India stands 4th globally in the total Wind power installed capacity.
3. In India, Tamil Nadu has the highest installed capacity of wind energy.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) option d is the correct answer.

Statement 1 is correct. The production of wind energy is **more efficient than production of solar energy**. Wind turbines **release less CO₂** to the atmosphere compared to solar energy production. A wind turbine produces 4.64 grams of CO₂/1kWh while the solar panel produces 70 grams of CO₂/1kWh. Wind power consumes less energy and produces more energy compared to solar panels.

Statement 2 is correct. India stands **4th globally in Renewable Energy Installed Capacity** (including Large Hydro), **4th in Wind Power capacity** & 4th in Solar Power capacity (as per REN21 Renewables 2022 Global Status Report).

Statement 3 is correct. **Tamil Nadu's installed wind power** capacity stood at 9,867 megawatts (MW), the **highest among all states**. The key reason behind maximum installations happening in Tamil Nadu is the state having good wind sites because of its coastal vicinity resulting in higher installations.

Source:

[https://pib.gov.in/PressReleasePage.aspx?PRID=1885147#:~:text=India%20stands%204th%20globally%20Renewables%202022%20Global%20Status%20Report\).](https://pib.gov.in/PressReleasePage.aspx?PRID=1885147#:~:text=India%20stands%204th%20globally%20Renewables%202022%20Global%20Status%20Report).) &

Q.29) Industries using weight-losing raw materials are usually located near the regions where raw materials are located. In this context which of the following industries are based on weight losing raw materials?

1. Sugar mills
2. Pulp industry
3. Iron and steel industry
4. Copper smelting industries
5. Cotton industry

Select the correct answer using the code given below:

- a) 1, 3 and 4 only
- b) 1, 2, 3 and 4 only
- c) 2, 4 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) b

Exp) Option b is the correct answer.

Location of industries is influenced by several factors like access to raw materials, power, market, capital, transport and labour, etc. There is strong relationship between raw material and type of industry. It is economical to locate the manufacturing industries at a place where cost of production and delivery cost of

manufactured goods to consumers are the least. Industries using weight-losing raw materials are located in the regions where raw materials are located.

Option 1 is correct. The sugar mills in India are located in sugarcane growing areas. Sugar industry in India is based on sugarcane which is a heavy, low value, weight losing and perishable raw material. Also the sugarcane contains sucrose and once you cut the sugarcane, the sucrose content starts to decline.

Option 2 is correct. Wood is the primary raw material for this industry, it is a weight losing raw material. Pulp mills must be located near the forests because this minimises the difficulty of transporting the bulk logs as well as cost also.

Option 3 is correct. In iron and steel industries, iron ore and coal both are weight-losing raw materials. Therefore, an optimum location for iron and steel industries should be near raw material sources.

Option 4 is correct. Copper smelting industries are located near raw material sources as it is a weight losing industry. Location near raw materials helps to reduce cost of transportation.

Option 5 is incorrect. Cotton is a “pure” raw material which **does not lose weight** in the manufacturing process. so other factors, like, power to drive the looms, labour, capital or market may determine the location of the industry. Hence this option is incorrect.

Source: NCERT – Class 12th – Chapter 8th – Page No- 86-89

Q.30) Which one of the following statements is correct regarding ‘Nadabet’, a place in India recently seen in the news?

- It is a newly commissioned ‘nuclear power project’ site.
- It is designated as an exclusive ‘natural farming’ site.
- It is a new India-Pakistan border viewing site.
- It is a new container port on the western coast.

Ans) c

Exp) Option c is the correct answer.

Nadabet is located in **Banaskantha district of North Gujarat (Kutch region)**. Here, a new **India-Pakistan border viewing point** has been inaugurated. This place is also known as **‘Wagah of Gujarat’**. This is a part of **Seema Darshan Project**, which is a joint initiative of the **Tourism Department of the State of Gujarat and Border Security Force (BSF)**. Focus of the project is to **develop border-tourism**.

Knowledge Base:

- Major tourist attractions:** Retreat ceremony during sunset, T-junction pillar depicting the BSF in action, zero point (Indo-Pak Border) and real stunning MIG-27 that was used in 1971 Indo-Pak War.

Other attractions include adventure activities like paintball, rappelling, rock climbing, human bungee slingshot etc.

2) **Historical significance:** In this region, **during Indo-Pak War of 1971**, BSF not only stalled the enemy trying to invade from the west, but also captured 15 enemy posts. BSF had captured 1,038 sq. km of Pakistan territory, but returned it to Pakistan after **Shimla Agreement** was signed.

3) Note: Attari-Wagah Border is in Punjab.

Source: <https://indianexpress.com/article/explained/seema-darshan-project-india-pakistan-border-nadabet-gujarat-explained-7865503/>

<https://www.visitnadabet.com/>

Q.31) 'Cropping Intensity' increases in which of the following conditions?

- When a greater number of crops are cultivated in a particular area during a specific period.
- When crops with less maturity period are replaced by plantation crops
- When the investment per unit of land increases substantially.
- When large amounts of fertilizers and pesticides are used over a land area.

Ans) a

Exp) Option a is the correct answer.

Option a is correct: Cropping intensity refers to the number of crops grown on a piece of land during a certain period of time, usually a year. **By growing more crops in the same area during a specific time period, the intensity of cropping increases.** This can be achieved through multiple cropping systems or intercropping, where different crops are grown together or sequentially in the same field. It maximizes land use and increases productivity.

Q.32) Which of the following are the major regions of Iron and steel industries in world?

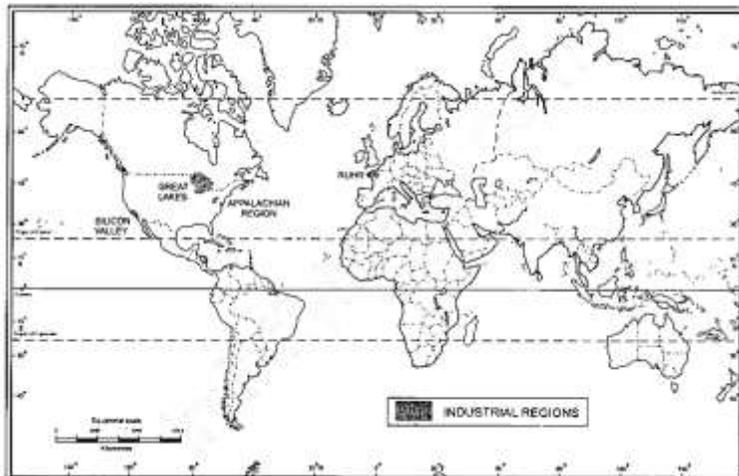

- Osaka-Kobe region
- Ruhr region
- Bokaro–Rourkela region
- Urengoy region

Select the correct answer using the code given below:

- 1 only
- 2 and 3 only
- 1, 2 and 3 only
- 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

Option 1 is correct. Osaka-Kobe Region – The great Tokyo-Yokohama and Osaka-Kobe –Heemeji iron steel plants are market-based steel plants of Japan. It is located in the southern part of Honshu Island. Its major centres include Yawata, Nagasaki, Mauji and Shimonoseki. The region produces about 35% of the country's steel and entirely based on imported raw material.

Option 2 is correct. Ruhr region – The heaviest concentration of German steel plants is in a single area of the Ruhr Basin, the largest steel producing region of Europe. The entire Ruhr region is characterized by coke plants and blast furnaces. The Ruhr basin has the largest and high-grade coking coal deposits of Western Europe. Iron ore and coal are both locally available. Major steel centres of Ruhr Basin are Essen, Dortmund etc.

Option 3 is correct. Bokaro – Rourkela region – In India, there is a crescent shaped region comprising parts of Chhattisgarh, Northern Odisha, Jharkhand and western West Bengal, which is extremely rich in high grade iron ore, good quality coking coal and other supplementing raw materials. The Rourkela Steel plant was set up in 1959 in the Sundargarh district of Odisha in collaboration with Germany.

Option 4 is incorrect. The world's second largest gas field is **Urengoy, Russia**, which was discovered there in 1966 and was estimated to have initial reserves as great as 8.1 tcm (286 tcf).

Source: <https://ncert.nic.in/ncerts/l/legy208.pdf> and

<https://old.amu.ac.in/emp/studym/100007950.pdf>

Q.33) Many people around the world still lack access to safe water. In this context, Falkenmark Indicator is used to measure which of the following?

- It gives relation between economic poverty and water poverty
- It measures water scarcity as the amount of renewable freshwater that is available per person per year.
- It suggests policies that are needed to improve water management in a region.
- It shows the relation between Soil PH and water quality.

Ans) b

Exp) Option b is the correct answer.

One of the most commonly used measures of water scarcity is the 'Falkenmark indicator' or 'water stress index'. This method defines water scarcity in terms of the total water resources that are available to the population of a region; measuring scarcity as the amount of renewable freshwater that is available for each person each year. If the amount of renewable water in a country is below 1,700 m³ per person per year, that country is said to be experiencing water stress; below 1,000 m³ it is said to be experiencing water scarcity; and below 500 m³, absolute water scarcity.

Option a is incorrect: Water Poverty Index (WPI) and not Falkenmark indicator is used to measure the relationship between economic poverty and water poverty.

Option c is incorrect: The sustainability index (SI) and not Falkenmark indicator identifies policies that preserve or improve the desired water management characteristics of the basin in the future.

Option d is incorrect: Soil Ph is not measured by Falkenmark indicator.

Source: <https://smartwatermagazine.com/blogs/cristina-novo/what-happening-indias-drinking-water>
<https://www.igi-global.com/dictionary/falkenmark-water-stress-indicator/79325>

Q.34) Consider the names of the shifting cultivation and the regions in which they are being practiced:

List I	List II
(Shifting cultivation)	(Regions)
1. Dipa	Bastar District (Chhattisgarh)
2. Kumari	Western Ghats
3. Valre	Jharkhand

Which of the above pairs is/are correctly matched?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

In shifting agriculture, after two or three years of producing vegetable and grain crops on cleared land, the migrants abandon it for another plot. Land is often cleared by slash-and-burn methods—trees, bushes and forests are cleared by slashing, and the remaining vegetation is burnt. The ashes add potash to the soil. Then the seeds are sown after the rains. In different regions it is known by different local names.

Pair 1 is correct. Deepa Shifting Cultivation –This shifting cultivation is practiced in Bastar district of Chhattisgarh and locally known as Deepa.

Pair 2 is correct. Kumari Shifting Cultivation– This cultivation is practiced in Western Ghats especially in hilly regions of Kerala. Western Ghats are mountain ranges that runs parallel to western coast of India.

Pair 3 is incorrect. Valre or waltre Shifting Cultivation–This shifting cultivation is practiced in Southeastern Rajasthan and not in Jharkhand. Hence this statement is incorrect.

Q.35) Which among the following Indian cities has received the ‘World Green City Award 2022’?

- a) Hyderabad
- b) Pune
- c) Indore
- d) Gandhinagar

Ans) a

Exp) Option a is the correct answer.

Recently, **Hyderabad** has received the ‘World Green City Award 2022’ for the initiative ‘**Green Garland to the State of Telangana.**’ The award is given by **International Association of Horticulture Producers (AIPH)**. These awards are designed to champion ambitious **nature-oriented approaches to city design and operation.**

Knowledge Base:

- 1) The award is given for the following **6 categories**- Living Green for (1) Biodiversity (2) Climate Change (3) Health and Well Being (4) Social Cohesion (5) Water (6) Economic Recovery and Inclusive Growth.
- 2) **Hyderabad was selected as best across all the 6 categories.**
- 3) About '**Green Garland to the State of Telangana**' initiative
 - a. This is a **massive plantation drive** and all government departments, public and private sectors participate in this.
 - b. **Establishment of a nursery in every gram panchayat.** The Panchayati Raj Act and Municipal Act were amended to implement this programme properly.
 - c. **Developing urban parks** right in the middle of the city is another feature.

Source: <https://aiph.org/green-city/green-city-awards/>

<https://www.livemint.com/news/india/this-south-indian-city-hyderabad-bags-world-green-city-award-2022-beats-paris-montreal-11665805880922.html>

Q.36) Which of the following options best describes the term Sub-Urbanization?

It is a situation in which-

- a) a country's urban population is considerably larger than expected according to that country's level of economic development.
- b) large numbers of people move from urban areas into surrounding countryside or rural areas.
- c) increasing influence of urban way of life in rural areas leading to deterioration of rural culture.
- d) outward growth of urban areas engulfs surrounding villages and towns into a larger urban agglomeration.

Ans) d

Exp) Option d is the correct answer.

Suburbanization is a term to describe the growth and spatial reorganization of contemporary city.

Option a is incorrect: Overurbanization is a concept used by urbanization and development scholars to describe a situation in which a country's urban population is considerably larger than expected on the basis of that country's level of economic development.

Option b is incorrect: Counter urbanisation and not sub-urbanisation is when large numbers of people move from urban areas into surrounding countryside or rural areas. This process is exact opposite of Urbanization. It is both a demographic (population driven) and social process, but has to a lesser extent also involved the movement of some businesses and economic activities.

Option c is incorrect: This is not related to Sub Urbanization and only highly highlights the negative impact of Urbanization process on Rural and tradition culture.

Option d is correct: Suburbanisation can be defined as the outward growth of urban development which may engulf surrounding villages and towns into a larger urban agglomeration. Indeed, the suburbs are the outlying areas of a city which are close enough to the city centre to be accessible by commuters. Essentially it is a part of urbanisation, in that it increases the proportion of people that live in towns and cities in comparison to those in rural areas. As suburbs grow they attract both people from rural areas AND people from Inner city and CBD areas, who are attracted by the greater amount of space within the suburb. Suburbanisation results in the physical spreading of a city into surrounding countryside areas, known as URBAN SPRAWL, and this puts pressure on greenfield sites and on nature.

[level/AQA/Year%2013/World%20Cities/Suburbanisation/Suburbanisation.htm](https://www.coolgeography.co.uk/A-level/AQA/Year%2013/World%20Cities/Suburbanisation/Suburbanisation.htm)

Q.37) Consider the following statements regarding the Capability Approach to Development:

1. It was pioneered by Amartya Sen.
2. Capability Approach holds that it is more important to focus on the 'means' than the 'ends'.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) option a is the correct answer.

Capability Approach marked a paradigm shift in the concerns for process of development from those related to economic growth to those of inclusion and equitable distribution.

Statement 1 is correct: The evolution of this framework dates back to Aristotle, Adam Smith and Karl Marx. However, Prof. Amartya Sen pioneered this approach and it was further developed by Martha Nussbaum and a several other scholars.

Statement 2 is incorrect: While valuing something, the capability approach emphasized that we should be clear whether we value it as an end or a means to achieve a valuable end. Because of the difference of people's ability in converting the means into ends, capability approach holds that it is more important to focus on the ends than the means. Means cannot be taken as reliable proxies of ends unless all people have the same capacity to convert those means to ends. Hence capability approach focuses on people's ends which are expressed in terms of 'beings' like being literate, being employed, being mobile etc.

Source: <https://egyankosh.ac.in/bitstream/123456789/48844/1/Block-4.pdf>

Q.38) The Kolkhoz Model became the predominant form of agricultural enterprise in the first half of twentieth century in the erstwhile Soviet Union. In this context, the term Kolkhoz model is best related to which of the following?

- a) Market Gardening and Horticulture
- b) Dairy Farming
- c) Mixed Farming
- d) Collective Farming

Ans) d

Exp) Option d is the correct answer.

The basic principle behind Kolkhoz model of farming is based on social ownership of the means of production and collective labour. Collective farming or the model of Kolkhoz was introduced in erstwhile Soviet Union to improve upon the inefficiency of the previous methods of agriculture and to boost agricultural production for self-sufficiency. In this model, the farmers used to pool in all their resources like land, livestock and labour. However, they were allowed to retain very small plots to grow crops in order to meet their daily requirements.

Source: NCERT Human Geography Chapter 5

Q.39) Consider the following pairs with respect to the different types of settlements:

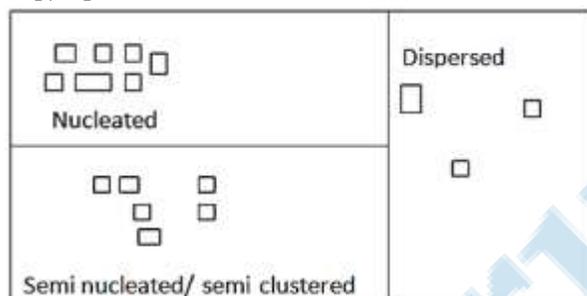

Type of settlement	Description
1. Clustered settlement	houses are closely built up
2. Semi clustered settlement	fragmentation of a large compact village
3. Hamleted settlement	A single isolated settlement in remote area

Which of the pairs given above are correct?

- 1 and 2 only
- 2 and 3 only
- 1 and 3 only
- 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Pair 1 is correct. The settlement in which the **houses are closely built up** and compact is known as clustered settlement. It is **found in fertile alluvial plains**. People live in compact villages for security reasons. The shape of clustered settlement normally varies from rectangular, radial, to linear.

Pair 2 is correct. Semi-clustered or fragmented settlements may result from tendency of **clustering in a restricted area of dispersed settlement**. More often such a pattern may also result from segregation or **fragmentation of a large compact village**. In this case, one or more sections of the village society choose or is forced to live a little away from the main cluster or village. In such cases, generally, the land-owning and dominant community occupies the central part of the main village, whereas **people of lower strata of society** and menial workers **settle on the outer flanks** of the village. Such settlements are widespread in the Gujarat plain and some parts of Rajasthan.

Pair 3 is incorrect. **Hamleted Settlement** is a fragmented settlement **divided into several units physically separated** from each other bearing a common name. These units are locally called panna, para, palli, nagla, dhani, etc. in various parts of the country. This segmentation of a large village is often motivated by social and ethnic factors. Such villages are more frequently found in the middle and lower Ganga plain, Chhattisgarh and lower valleys of the Himalayas.

Whereas dispersed settlement pattern in India appears in the form of **isolated huts or hamlets** of few huts **in remote jungles**, or on small hills.

Source: NCERT- Class 12th- Chapter 4th -Page No-33

Q.40) Which among the following Indian cities have earned the global recognition with their inclusion in the UNESCO's 'Global Network of Learning Cities (GNLC)' project?

1. Amravati
2. Warangal
3. Thrissur
4. Thanjavur
5. Nilambur

Choose the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 5 only
- c) 1, 4 and 5 only
- d) 2, 3, 4 and 5 only

Ans) b

Exp) Option b is the correct answer.

Options 2, 3 and 5 are correct: Warangal (Telangana), Thrissur and Nilambur (Kerala) have been included in the UNESCO's 'Global Network of Learning Cities' (GNLC) project.

About the cities:

City

Why a 'learning city'?

Warangal

- 1) Served as the capital of **Kakatiya dynasty** which was established in 1163.
- 2) It has also been chosen for Heritage City Development and Augmentation Yojana (**HRIDAY**) of Government of India.
- 3) It hosts **second biggest grain market of Asia**, located in Enumamula and emerging hub for IT sector activities.

Thrissur

- 1) Also known as '**cultural capital**' of Kerala.
- 2) It is a **major academic hub** and has institutions like Kerala Kalamandalam, Kerala Agricultural University Kerala University of Health Sciences etc.
- 3) Also regarded as a **banking town**, having headquarters of major banks like South Indian Bank, Catholic Syrian Bank, Dhanalakshmi Bank, Manappuram General Finance and Leasing.
- 4) It is also a **major Centre for gold jewelry**. About 70% of Kerala's jewelry is manufactured in Thrissur.

Nilambur

- 1) It is located close to **Nilgiri range of western ghats** on the banks of Chaliyar river (forms part of Nilgiri Biosphere Reserve).
- 2) The city is an **eco-tourism destination** in Kerala.
- 3) It is also known as '**teak town**' due to abundance of Nilambur teak.
- 4) The bank of Chaliyar river is known **for gold reserves**.
- 5) **Silent Valley National Park** is located in this city.
- 6) **Major economic activities- agriculture, handicrafts, eco-tourism** etc.

Knowledge Base:

- 1) The GNLC initiative was launched by UNESCO in 2013 with the goal of promoting **social cohesion, economic development and sustainability in urban areas**.

(Picture credit: The Hindu)

1) For GNLC status, cities with a population of 5 lakh and above are considered. Due to its potential, Nilambur has been the first town to be included in GNLC with less than 1 lakh population.

Source: <https://www.newindianexpress.com/states/kerala/2022/sep/08/nilambur-thrissur-in-unesco-list-of-learning-cities-2495917.html>

Q.41) Consider the following statements with reference to Mica:

- Mica can be found in all three major rocks varieties- igneous, sedimentary and metamorphic.
- Kodarma district of Jharkhand is famous worldwide for mica.
- India is the largest producer of mica in the world.

Which of the statements given above is/are correct?

- 1 and 2 only
- 2 and 3 only
- 1 only
- 1 and 3 only

Ans) a

Exp) option a is the correct answer.

Statement 1 is correct: Mica is a non-metallic mineral. Mica, any of a group of hydrous potassium, aluminum silicate minerals. It is a type of phyllosilicate, exhibiting a two-dimensional sheet or layer structure. Among the principal rock-forming minerals, micas are found in all three major rock varieties—igneous, sedimentary, and metamorphic.

Statement 2 is correct: Kodarma district of Jharkhand state has been famous worldwide for mica mining, especially for ruby mica. The district had the monopoly in producing mica for years and mica was exported to many countries worldwide. Mica is also found in the area of Dhab, Dhodhakola, Khalagthambi, Dibour, Bandarchua, etc.

Statement 3 is incorrect: The largest mica producer in the world in 2022 was China, producing an estimated 100,000 metric tons of mica. India ranked 6th with 16000 metric tonnes production.

Source: <https://businessranker.com/largest-producer-of-mica-in-the-world/27/>

NCERT Land and Economy chapter 7, <https://www.britannica.com/science/mica>

<https://koderma.nic.in/history/>

Q.42) Read the following Paragraph:

‘This country holds the largest oil reserves in the world. The majority of this oil is within the Orinoco Belt, which is at the southern end of the eastern Orinoco River Basin in the country. This belt has currently the largest deposit of petroleum in the world with estimates placing the capacity at more than 200 billion barrels.’

Which country is described in the above paragraph?

- a) Saudi Arabia
- b) Venezuela
- c) Canada
- d) United States of America

Ans) b

Exp) option b is the correct answer.

With more than 300 billion barrels of proven oil reserves in 2021, **Venezuela** holds the title of the largest oil reserves in the world. The majority of this oil is within the Orinoco Belt, which is at the southern end of the eastern Orinoco River Basin in the country. This belt is currently the largest deposit of petroleum in the world with estimates placing the capacity at more than 200 billion barrels!

When it comes to **oil production**, Venezuela sits much lower among other world leaders. This is because unlike many other countries on this list, Venezuelan crude oil is very heavy and requires large investments in technology, manpower, and refineries to extract.

Moreover, while it used to be one of the largest exporters in the world, an oil crash in 2015, political unrest, and subsequent issues have limited Venezuela's potential.

Source: <https://www.worldatlas.com/articles/the-world-s-largest-oil-reserves-by-country.html>

Q.43) Consider the following statements regarding distribution of coal in India:

1. Gondwana coal makes up more than 90 percent of both coal reserves and coal production in India.
2. There are no tertiary coal reserves in India.
3. Jharia is the largest coal field in India.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) option b is the correct answer.

The coal bearing strata of India are geologically classified into two main categories, viz., Gondwana coal fields & Tertiary coal field.

statement 1 is correct: Gondwana coal comprises about 98 percent of the total reserves and 99 percent of the production of coal in India. In this system there are 113 major coal fields found all over India. Gondwana coal is said to be about 250 million years old.

Statement 2 is incorrect: Tertiary Coals are found in the states of Assam, Meghalaya, Nagaland, Arunachal Pradesh, Himachal Pradesh, West Bengal, Rajasthan, Kerala and Jammu and Kashmir. Tamil Nadu and the Union Territory of Pondicherry also have Tertiary coal reserves.

Statement 3 is correct: Jharia is the largest coal field followed by Raniganj. Other important coal mining centres are Singrauli in Madhya Pradesh (part of Singrauli coal field lies in Uttar Pradesh), Korba in Chhattisgarh, Talcher and Rampur in Odisha, Chanda–Wardha, Kamptee and Bander in Maharashtra and Singareni in Telangana and Pandur in Andhra Pradesh.

Source: <https://old.amu.ac.in/emp/studym/100004773.pdf>

Q.44) Consider the following natural resource regions:

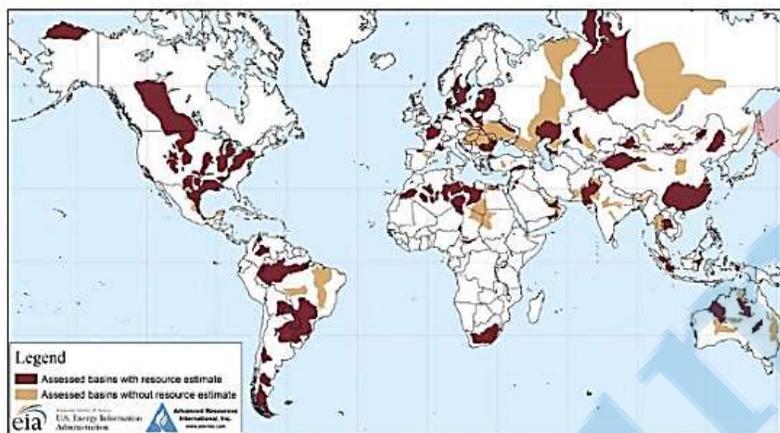

1. Troll field
2. Groningen
3. Hassi R'Mel

The above regions are famous for which of the following natural resources?

- a) Coal
- b) Manganese
- c) Natural Gas
- d) Diamond

Ans) c

Exp) option c is the correct answer.

1) Troll Fields – Troll is a natural gas and oil field in the Norwegian sector of the North Sea, one of the biggest in the North Sea, holding 40% of Norway's gas. It also possesses significant quantities of oil.

2) Groningen Gas field –It is a natural gas field in Groningen province in the northeastern part of the Netherlands. It is the largest natural gas field in Europe. This region of Groningen in the Netherland has a gas field that began operations in 1963.

3) Hassi R'Mel - In North Africa, the central basin of Algeria is the location of the Hassi R'Mel gas and condensate field, discovered in 1956 in a large anticline. The Hassi R'Mel Natural gas field recovered 82.32% of its total recoverable reserves, with peak production in 1999.

Source: <https://yearbook.enerdata.net/natural-gas/world-natural-gas-production-statistics.html>

Q.45) With reference to the territories in the news recently and the countries to which they belong, consider the following pairs:

Territories in News Countries

1. Transnistria Ethiopia
2. Nagorno-Karabakh Egypt
3. Falkland Islands Ukraine

Which of the pairs given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 3 only
- d) None of the above

Ans) d

Exp) Option d is the correct answer.

Pair 1 is incorrect: Transnistria – officially called the Pridnestrovian Moldavian Republic – is a narrow strip of land between **Moldova and western Ukraine**. It is an **unrecognized break-away state** that left Moldova after the collapse of the Soviet Union in 1990. It has de-facto independence, but it is **not recognized so by the UN**. Transnistria retains its independence largely due the military support provided by the Russian army stationed in the Transnistrian territory. It is internationally recognised as part of Moldova.

THE HINDU

Tensions in Transnistria

The small region wedged between Moldova to its west and Ukraine to its east risks being dragged into the ongoing conflict

TRANSNISTRIA FACTFILE	
<ul style="list-style-type: none"> Split from Moldova in 1991-92 war, amid collapse of the Soviet Union. Becomes a self-declared independent state not recognised internationally Referendum in 2006 saw 97.2% vote in favour of joining Russia Its a separatist region that permanently hosts estimated 1,500 Russian "peacekeeping" troops 	
<ul style="list-style-type: none"> Population: 4,70,000 Area: 4,000 sq km 	
RECENT DEVELOPMENTS	<p>Apr 25-27, 2022: Transnistria officials claim series of incidents:</p> <ul style="list-style-type: none"> Explosions hit state security HQ in Tiraspol. Separatist authorities blame Ukrainian "infiltrators" Blasts at Mayak radio centre damage Soviet-era masts used to broadcast Russian news Attack on military unit in village of Parcani, just outside Tiraspol Shots fired from Ukraine towards Kolbasna village, location of large Russian arms depot <p>Russia could use flare-up of tensions as pretext for invasion. If Russia reinforces Transnistria, it might then move on to Ukraine's key port city of Odesa</p>

Pair 2 is incorrect: Nagorno-Karabakh is a **landlocked, mountainous and forested region** within the boundaries of Azerbaijan. It is a disputed territory **internationally recognized as part of Azerbaijan** but mostly governed by the Republic of Artsakh, de facto independent state with an Armenian ethnic majority backed by neighbouring Armenia. It is located in the **South Caucasus region**, which straddles the border between Eastern Europe and Western Asia and spans the southern part of the Caucasus mountains. It is roughly made up of modern-day Armenia, Azerbaijan, and Georgia. The capital of Nagorno-Karabakh is Stepanakert.

Pair 3 is incorrect: Falkland Islands is an archipelago in the South Atlantic Ocean. The Islands have internal self-governance, and the UK takes responsibility for their defence and foreign affairs. The Government of Argentina has recently launched a campaign demanding negotiation with the UK to settle the territorial dispute over the Falkland Islands. The dispute has been continuing since the early 19th century. Both countries fought a war in 1982 over the dispute. The result was UK's victory. At present, Falkland Island continues to operate as a self-governing British Overseas Territory.

Q.46) Consider the following pairs regarding the different approaches to Human Development:

Approach	Description-
1. Income Approach	In it, the level of income reflects the level of economic freedom an individual enjoys.
2. Welfare Approach	It looks at human beings as beneficiaries or targets of all development activities.
3. Basic Needs Approach	It attempts to define the minimum resources needed for overall well being.

How many of the pairs given above are correctly matched?

- a) Only one pair.
- b) Only two pairs.
- c) All three pairs.
- d) None of the pairs.

Ans) c

Exp) option c is the correct answer.

There are many ways of looking at the problem of human development. Some of the important approaches are: (a) The income approach; (b) The welfare approach; (c) Minimum needs approach; and (d) Capabilities approach

Pair 1 is Correctly matched: In Income Approach, Human development is seen as being linked to income. The idea is that the level of income reflects the level of freedom an individual enjoys. Higher the level of income, the higher is the level of human development.

Pair 2 is correctly matched: Welfare approach looks at human beings as beneficiaries or targets of all development activities. The approach argues for higher government expenditure on education, health, social secondary and amenities. People are not participants in development but only passive recipients. The government is responsible for increasing levels of human development by maximising expenditure on welfare.

Pair 3 is correctly matched: Basic Needs approach was initially proposed by the International Labour Organisation (ILO). Six basic needs i.e.: health, education, food, water supply, sanitation, and housing were identified. The question of human choices is ignored and the emphasis is on the provision of basic needs of defined sections. It attempts to define the absolute minimum resources necessary for long term physical well being.

Source: NCERT Human Geography chapter 4 Human Development

Q.47) The Zabo or Ruza system is practiced largely in Phek district of Nagaland. In this context, is the Zabo or Ruza system related to which of the following?

- a) A water management system that includes rectangular-shaped stepwells to collect the subterranean seepage of an upstream reservoir or a lake.
- b) An indigenous farming system which combines forest, horticulture, agriculture, fishery and animal husbandry with soil and water conservation on one hill.
- c) An ecosystem-based strategy that focuses on long-term soil conservation through a combination of biological control, and habitat manipulation.
- d) An innovative farming technique that involves the growing of plants without soil.

Ans) b

Exp) Option b is the correct answer.

“The word “Zabo” means impoundment of water. “Zabo” is an indigenous farming system practiced largely in Phek district of Nagaland. Zabo is also known as “Dzüdü” or “Ruza” system in other parts of the district. It has a combination of forest, horticulture, agriculture, fishery and animal husbandry with well-founded soil and water conservation base on one hill. It has protected forest land towards the top of hill, water harvesting tanks in the middle and cattle yard and paddy fields beneath.

Rainwater that falls on forested hilltops is collected by channels that deposit the run-off water in pond-like structures created on the terraced hillsides. The channels also pass through cattle yards, collecting the dung and urine of animals, before ultimately meandering into paddy fields at the foot of the hill. Ponds created in the paddy field are then used to rear fish and foster the growth of medicinal plants.

Option a is incorrect. Jhalaras are typically rectangular-shaped stepwells that have tiered steps on three or four sides. These stepwells collect the subterranean seepage of an upstream reservoir or a lake. Jhalaras were built to ensure easy and regular supply of water for religious rites, royal ceremonies and community use.

Option c is incorrect. Integrated pest management, or IPM is an ecosystem-based strategy that focuses on long-term prevention of pests or their damage through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and use of resistant varieties. Pesticides are used only after monitoring indicates they are needed according to established guidelines, and treatments are made with the goal of removing only the target organism. Pest control materials are selected and applied in a manner that minimizes risks to human health, beneficial and nontarget organisms, and the environment.

Option d is incorrect. Hydroponics farming techniques involve the growing of plants without soil, nourishing the plants through specialized nutrients that are added to water.

Source: <https://focus.nagaland.gov.in/wp-content/uploads/2018/03/ZABO-SYSTEM-OF-FARMING.pdf>

Q.48) Consider the following pairs

Integrated Steel Plant	Location
1. Visvesvaraiya Iron and Steel Plant	Madhya Pradesh
2. Rourkela Steel Plant	Orissa
3. Durgapur Steel Plant	West Bengal

Which of the pairs given above is/are correctly matched?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The Steel Authority of India Limited (SAIL) has **five integrated steel plants** at **Bhilai** (Chhattisgarh), **Rourkela** (Odisha), **Durgapur** (West Bengal), **Bokaro** (Jharkhand) and **Burnpur** (West Bengal). It also has **three special and alloy steels plants** viz. Alloy Steels Plant at Durgapur (West Bengal), Salem Steel Plant at

Salem (Tamil Nadu) and **Visveswaraya Iron and Steel Plant at Bhadravati** (Karnataka). Some of the details are:

Pair 1 is incorrect: The **Visvesvaraiya Iron and Steel Works** is a **special steel** plant of SAIL at **Bhadravati, Karnataka**. Initially, it was called the **Mysore Iron and Steel Works**. It is located close to an iron ore producing area of Kemangundi in the Bababudan hills. Further, Limestone and manganese are also locally available. But this region has no coal. At the beginning, charcoal obtained by burning wood from nearby forests was used as fuel till 1951. Afterwards, electric furnaces were installed which use hydroelectricity from the Jog Falls hydel power project. **The Bhadravati River** supplies water to the plant. This plant produces specialised steels and alloys.

Pair 2 is correct. The **Rourkela Steel plant** is an **integrated steel plant** located in the **Sundargarh district of Odisha**. It was set up in 1959 in collaboration with Germany. The plant was located on the basis of proximity to raw materials, thus, minimising the cost of transporting weight losing raw material. This plant has a **unique locational advantage**, as it receives coal from Jharia (Jharkhand) and iron ore from **Sundargarh** and **Kendujhar**. **The Hirakud project** supplies power for the electric furnaces and water is obtained from the **Koel and Sankh rivers**.

Pair 3 is correct. **Durgapur Steel Plant** is an **integrated Steel Plant** in **West Bengal**. It was set up in collaboration with the government of the United Kingdom. It started production in 1962. This plant lies in **Raniganj** and **Jharia coal belt** and gets iron ore from **Noamundi**. It is on the main **Kolkata-Delhi railway route**. The Hydel power and water is obtained from the **Damodar Valley Corporation (DVC)** by this plant.

Q.49) Consider the following pairs:

Mineral/Rock - Mining Method

1. Coal: - Open cast Mining
2. Platinum - Shaft Mining
3. Marble - Quarrying

Which of the pairs given above is/are correctly matched?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

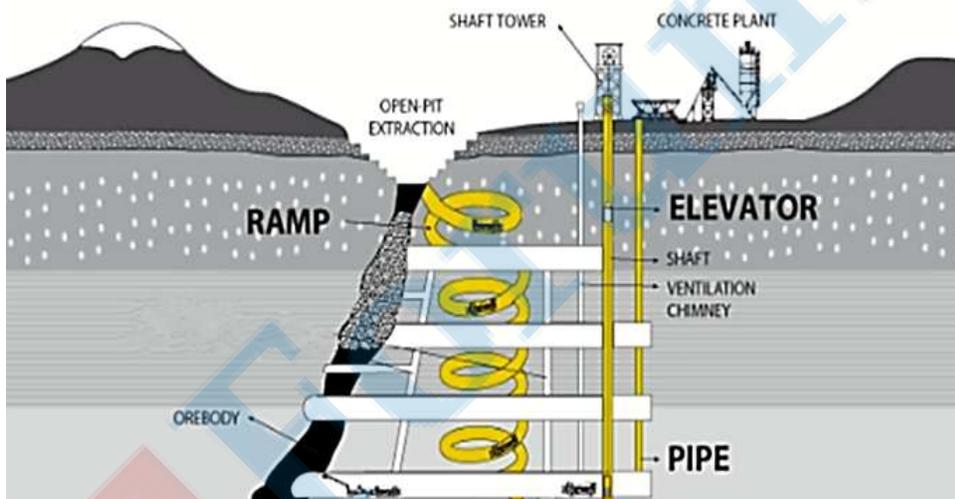

A naturally occurring substance that has a definite chemical composition is a **mineral**.

The process of taking out minerals from rocks buried under the earth's surface is called **mining**.

Pair 1 is correct: Minerals that lie at shallow depths are taken out by removing the surface layer; this is known as **open-cast mining**. Iron ore, bauxite, **coal** and copper etc are mined in this way.

Pair 2 is correct: Often the minerals are not found close to the surface of the Earth, but deeper down. In these cases, underground mining, also called shaft mining, is used. **Examples of shaft mining used for minerals like diamonds, gold and sometimes the platinum group metals (PGM).** Also, Deep bores, called **shafts**, have to be made to reach mineral deposits that lie at great depths. This is called **shaft mining**. Petroleum and natural gas occur far below the earth's surface. Deep wells are bored to take them out.

Pair 3 is correct: Minerals that lie near the surface are simply dug out, by the process known as **quarrying**. Marble, granite, and limestone are mines through quarries. Quarrying material for use in building materials was much more work.

Knowledge Base: Knowledge Base: Open-pit mining, also known as opencast mining, is a surface mining technique that extracts minerals from an open pit in the ground. Open-pit mining is the most common method used throughout the world for mineral mining and does not require extractive methods or tunnels. Quarrying is the process of removing rock, sand, gravel or other minerals from the ground in order to use them to produce materials for construction or other uses. So, a quarry is any such working on the surface of the earth where minerals are extracted. Quarries are also known by other names around the world: 'surface mine', 'pit', 'open pit' or 'opencast mine'.

Open Pit Mine	Quarry	Underground Mine with Shafts
Minerals are removed from a pit dug in the ground.	Minerals are removed from a shallow pit dug in the ground.	Minerals are removed through deep shafts dug in the ground.
Used where commercially useful minerals are found near the surface.	Generally, used for extracting building materials like dimension stone.	Used where the mineral occurs as veins in hard rock deep below the surface of the Earth.
Extracted using Earth moving machinery.	Extracted using Earth moving machinery.	Extracted using elevators that can carry minerals, extraction equipment as well as persons into the area where the mineral is available.

<https://www.nationalgeographic.org/encyclopedia/quarry/>

Q.50) Consider the following rivers and their respective location:

River	Location
1. Thamirabarani River	Andhra Pradesh and Telangana
2. Sukapaika River	Jammu and Kashmir
3. Bhogdoi River	Assam and Nagaland
4. Lukha River	Meghalaya

Which of the above-given pairs is/are correctly matched?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 4 only
- d) 3 and 4 only

Ans) d

Exp) Option d is the correct answer.

Pair 1 is incorrect: The Thamiraparani river is the only perennial (continuous flow of water) river in Tamil Nadu. This is the shortest river in the state, the Thamirabarani starts in Pothigai hills of the Western Ghats in the Ambasamudram taluk, flows through Tirunelveli and Thoothukudi districts and empties at Korkai into the Gulf of Mannar (Bay of Bengal). It thus originates and ends in the same state.

Pair 2 is incorrect: Sukapaika is one of the several distributaries of the mighty Mahanadi River in Odisha. It branches away from the Mahanadi at Ayatpur village in Cuttack district and flows for about 40 kilometres (km) before rejoining its parent river at Tarapur in the same district. Sukapaika river is an important system of the Mahanadi to control floodwater and maintain the flow in the river as well as the Bay of Bengal.

Pair 3 is correct: Bhogdoi river originates from Mokokchung in Nagaland where it is also known as Tsujenyong nullah and is the south bank tributary of the River Brahmaputra. It is an inter-state river (flowing between Assam and Nagaland) and joins Dhansiri river near its confluence with Brahmaputra.

Pair 4 is correct: The Lukha river is located in the southern part of east Jaintia Hills of Meghalaya where most of Meghalaya's rat-hole coal mines are located. It has become a victim of the unsustainable large-scale mining of coal and limestone, allegedly responsible for the pollution that turns the river its surreal winter hue. It **receives water from the Lunar River (Wah Lunar) and small streams draining from the Narpuh Reserve Forest** and the undulating hills of the area while flowing down.

SFG 2023 | LEVEL 2 | Test #33 – Solutions (CSAT) | 

Q.1) In a five-letter English word (which may or may not be a meaningful English word), there are two letters between M and G. Neither A nor N is at any end. A is second to the left of G. M is to the right of O. Which of the following words will be formed based on the given conditions?

- a) MANGO
- b) OMANG
- c) GONAD
- d) BOGAU

Ans) b

Exp) Option b is the correct answer.

From the given information, A is second to the left of G and there are two letters between M and G. Then we have two possibilities:

Case I: M A _ _ G

Case II: A _ G _ _ M

Case II can be eliminated because it forms a six-letter word, however, in the question we have been given a five-letter word. It is also given that M is to the right of O and neither A nor N is at an end. Hence, the final arrangement will be: **OMANG**

Based on the above condition, the word OMANG will be formed.

Q.2) In a queue, Sadiq is 14th from the front end and Joseph is 17th from the back end, while Jane is exactly in between Sadiq and Joseph. If Sadiq be ahead of Joseph and there are 48 persons in the queue, how many persons are between Sadiq and Jane?

- a) 5
- b) 6
- c) 7
- d) 8

Ans) d

Exp) Option d is the correct answer.

Sadiq's position from last = $(48 - 14) + 1 = 35$ th Number of persons between Sadiq and

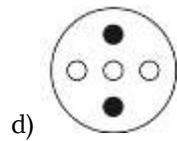

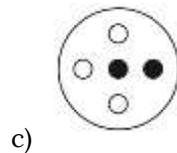

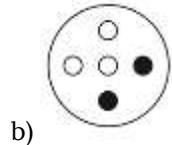

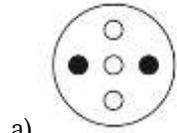

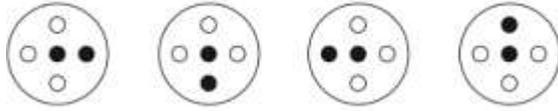

Joseph = $(35 - 17) - 1 = 17$

Since, Jane is in between Sadiq and Joseph, therefore position of Jane = $(35 + 17) / 2 = 26$ th

Therefore, Jane is at 9th position from both the boys.

Hence, the total number of persons between Sadiq and Jane = $(35 - 26) - 1 = 8$

Q.3) What comes next in the following sequence?

Ans) c

Exp) Option c is the correct answer.

The black dot on the outer side is moving 90° clockwise at each stage.

Q.4) Two statements are given below followed by a Question:

Statement 1: P is the brother of L, who is the daughter of Q, who is the sister of N.

Statement 2: M is the brother of K, who is the husband of L, who is the mother of G.

Question: How is Q related to G?

- Statement-1 alone is sufficient answer the Question.
- Statement-2 alone is sufficient to answer the Question.
- Both Statement 1 and Statement 2 are sufficient to answer the Question.
- Both Statement 1 and Statement 2 are not sufficient to answer the Question.

Ans) c

Exp) Option c is the correct answer.

From Statement 1:

Q is the sister of N.

L is the daughter of Q or Q is mother of L as Q is female

P is brother of L and L is daughter of Q. Thus, Q is the mother of P and L.

We can see that the statement 1 alone is not sufficient to answer the question of relationship between Q and G

From Statement 2:

SFG 2023 | LEVEL 2 | Test #33 – Solutions (CSAT) | ForumIAS

K is husband of L. And Thus, K is brother-in-law of P since P is brother of L
K also has a brother M. Thus, M is also brother-in-law of P.

Now L has a daughter G.

Now from statement 1 we know that Q is the mother of L,

Thus, Q is the grandmother of G

Clearly, both Statement 1 and Statement 2 together are sufficient to answer the Question, but neither Statement 1 alone nor Statement 2 alone is sufficient to answer the Question.

Q.5) Seven sportspersons namely Abhay, Brinda, Chandan, Deepa, Elizabeth, Fatimah, and Ganesh, are to be honored at the special luncheon. The sports persons are to be seated on the stage in a row. Abhay and Ganesh must be seated on the extreme right. Brinda must be seated at the center. Chandan and Deepa must be seated as far apart as possible.

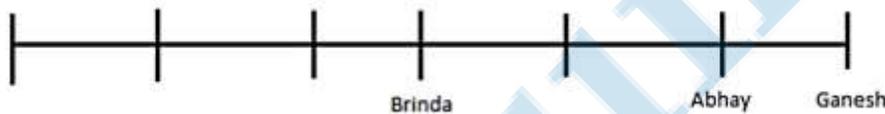

Who among the following cannot be seated at either end?

- Chandan
- Deepa
- Fatima
- Ganesh

Ans) c

Exp) Option c is the correct answer.

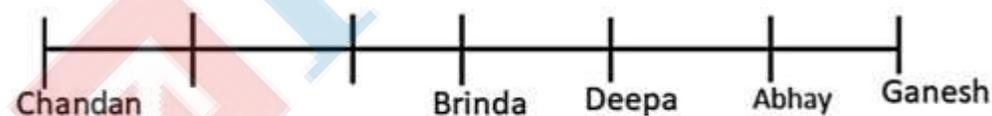

Abhay and Ganesh must be seated on the extreme right and Brinda must be seated at the centre.

Clearly, Abhay and Ganesh may interchange their seats and still satisfy the given condition, as shown below:

Chandan and Deepa must be seated as far apart as possible. Based on the above statements we get:

Again, Chandan and Deepa might interchange their seats and still satisfy the given condition. Clearly, Elizabeth and Fatima may sit in the empty seats in any order. So, they may occupy the empty seats in 2 ways. Chandan and Deepa might sit at the extreme left end. Fatima has to be in either of the two seats that are shown empty in the arrangement above. Hence, she cannot sit at either of the two ends.

Q.6) Shakuntala says, "If you reverse my age, then the reversed number represents my husband's age. He is senior to me and the difference between our ages is one-eleventh of the sum of our ages". What is the age of Shakuntala?

- a) 23
- b) 24
- c) 45
- d) 54

Ans) c

Exp) Option c is the correct answer.

Let x and y be the tens and unit's digits respectively of the numeral denoting the Shakuntala's age. Then, Shakuntala's age = $(10x + y)$ years. Husband's age = $(10y + x)$ years. As we know that difference between their ages is one-eleventh of their sum. So, we get,

$$(10y + x) - (10x + y) = (10y + x + 10x + y)/11$$

$$(9y - 9x) = (11x + 11y)/11 \quad 9y - 9x = x + y$$

$$10x = 8y$$

$$5x = 4y$$

Clearly, y should be a single-digit multiple of 5, which is 5. So, $x = 4$, $y = 5$.

Hence, Shakuntala's age = $10x + y = 45$ years.

Q.7) Find the next number in the given sequence: 16, 17, 21, 30, 46, ?

- a) 71
- b) 59
- c) 63
- d) 64

Ans) a

Exp) Option a is the correct answer.

The original series is 16, 17, 21, 30, 46, ?

Here we add perfect square (1, 4, 9, 16, and 25) to each term to get the next number. $16 + 1 = 17$

$$17 + 4 = 21$$

$$21 + 9 = 30$$

$$30 + 16 = 46$$

$$46 + 25 = 71$$

Thus, the next number in the series is 71.

Q.8) Ramesh says, "I have twice as many sisters as brothers". Sunita says, "We sisters have the same number of sisters as brothers". Assuming that Ramesh and Sunita are brother and sister, how many brothers and sisters does the family have?

- a) 3 brothers, 4 sisters
- b) 3 brothers, 6 sisters
- c) 5 brothers, 10 sisters
- d) 6 brothers, 3 sisters

Ans) a

Exp) Option a is the correct answer.

Let the number of brothers be "b"

and the number of sisters be "s".

SFG 2023 | LEVEL 2 | Test #33 – Solutions (CSAT) | 

Since Ramesh is a brother, he will not count himself when talking about the number of brothers. So, $s = 2(b - 1)$ {Twice as many sisters as brothers}

Now, Sunita is a sister, and she will not count herself when talking about the number of sisters.

Therefore, $s - 1 = b$ or $s = b + 1$

Solving the two equations,

$$b + 1 = 2b - 2$$

we get $s = 4$ and $b = 3$

Q.9) Select the number which can be placed at the sign of the question mark (?):

92K	5P	460U
67H	6M	402R
77T	7Y	?

- a) 329H
- b) 953N
- c) 593L
- d) 539D

Ans) d

Exp) Option d is the correct answer.

The following logic applies here:

In a row:

Third number = First number \times Second number

Each letter is increased by +5.

From the first row - 92K, 5P, 460U

Third number = $92 \times 5 = 460$

For letters: K, P, U

Increasing K by 5 positions in alphabetic order will give us P and Increasing P by 5 positions in alphabetic order will give us U

From the second row - 67H, 6M, 402R

Third number = $67 \times 6 = 402$

For letters: H, M, R

Increasing H by 5 positions in alphabetic order will give us M and Increasing M by 5 positions in alphabetic order will give us R

From the third row - 77T, 7Y, ?

Third number = $77 \times 7 = 539$

For letters: T, Y, ?

Increasing T by 5 positions in alphabetic order will give us Y and Increasing Y by 5 positions in alphabetic order will give us D (as the alphabet ends at Z, we start counting from the beginning)

Q.10) Names of 6 friends Ram, Om, Rohit, Animesh, and Kavita are written on 6 different faces of a cube. If 'Sita' is in between 'Ram' and 'Om', and 'Rohit' is opposite to 'Animesh', then which name must be on the face opposite to 'Kavita'?

- a) Om
- b) Animesh
- c) Ram
- d) Sita

Ans) d**Exp) Option d is the correct answer.**

Here it is clearly mentioned that Rohit is opposite to Animesh. Also, Sita is in between Ram and Aum, which means that Ram and Aum must be opposite to each other.

Now, we are left only with Kavita and Sita. So, they will be facing each other.

Thus, people facing each other should be:

Ram <> Aum

Rohit <> Animesh

Kavita < > Sita

Hence, option (d) is correct.

Q.11) In a college, a physics lecture is held every second day, a chemistry lecture is held every third day, an electronics lecture is held every fourth day, a humanities lecture is held every fifth day, and a mathematics lecture is held every sixth day. How many times all five lectures are held on the same day in a period of 250 days if they all were held together on the first day of college?

- a) 3
- b) 5
- c) 10
- d) 18

Ans) b**Exp) Option b is the correct answer.**

All five lectures will be held together during the days that are LCM of (2, 3, 4, 5 and 6) and its multiples.

LCM of (2, 3, 4, 5 and 6) = 60

Hence, the five lectures will be held together on 1st day, 61st day, 121st day, 181st day and 241st day, i.e., a total of 5 days in 250 days.

Q.12) If the seventh day of a month is three days earlier than Monday, what day will it be on the 20th day of the month?

- a) Thursday
- b) Wednesday
- c) Tuesday
- d) Saturday

Ans) a**Exp) Option a is the correct answer.**

The seventh day of the month is three days earlier than Monday, which is Friday. This means the month begins at Saturday that is 1st of the month is Saturday.

7th is Friday

8th is Saturday

9th is Sunday

And 10th is Monday

Thus, counting ahead we can find that

20th is Thursday.

We can also apply weekly logic and find that 21st would be Friday as 7th is Friday so 20th would be Thursday.

Q.13) Vijay is facing west. He turns 45° in the anti-clockwise direction and then another 180° in the same direction and then 270° in the clockwise direction. Which direction is he facing now?

- North East
- North West
- South East
- South West

Ans) b

Exp) Option b is the correct answer.

Total movement in Anti - Clockwise direction = $45 + 180 = 225$ degrees

Total movement in Clockwise direction = 270 degrees

The difference = $270 - 225 = 45$ degrees

(towards clock wise because the total degrees in clockwise is more than that of anti-clockwise direction)

So, 45 degrees in clockwise direction from the West will be: North-West.

Q.14) Consider the following two statements and conclusions that follow:

Statements:

- A few of my friends are Officers.
- All officers are rude.
- Some rude persons are kind hearted.

Conclusions:

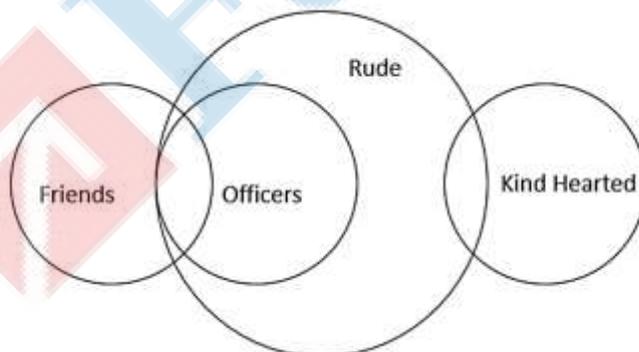

- A few of my friends are kind hearted.
- Some rude persons may not be officers.

Select the correct answer using code given below:

- Conclusion I follows
- Conclusion II follows
- Both Conclusion I and II follows
- Neither Conclusion I nor II follows.

Ans) b

Exp) Option b is the correct answer.

We can see that Conclusion I does not follow here as no connection has been made between friends and kind hearted.

However, we can see that Conclusion II follows as seen from the above figure that some rude persons may not be officers.

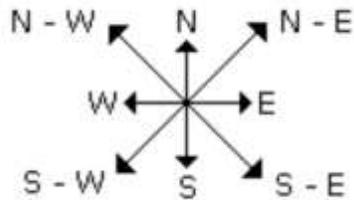

Q.15) If South-East becomes North, North-East becomes West and so on. What will West become?

- a) North-East
- b) North-West
- c) South-East
- d) South-West

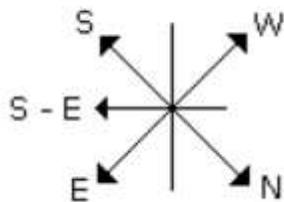

Ans) c

Exp) Option c is the correct answer

Standard directions are as followed:

However, if South-East becomes North, North-East becomes West

It is clear from the diagram that new name of West will become South-East.

Q.16) Pointing to a girl, Meera said, “Her father is the husband of my father’s only daughter who doesn’t have any brothers”. How is Meera related to the girl’s father’s mother?

- a) Mother
- b) Daughter
- c) Aunt
- d) Daughter in law

Ans) d

Exp) Option d is the correct answer

Since Meera has no brothers, she is her father’s only daughter.

So, the Husband of Meera’s father’s daughter – is Meera’s husband.

Thus, Meera’s husband is the girl’s father or the girl is Meera’s daughter.

The relationship between Meera and the Girl’s father (Meera’s husband) and mother (Meera’s mother-in-law) is Daughter-in-law.

Q.17) Five students Pawan, Qutub, Rohit, Saket and Tarun travel to five different locations Cuba, Kuwait, Dehradun, Bali and Haiti by different modes of transport, bus, train, airplane, car and boat from Mussoorie. The person who traveled to Dehradun did not travel by boat. Rohit went to Bali by car and Qutub went to Kuwait by airplane. Saket traveled by boat whereas Tarun traveled by train. Mussoorie is not connected by bus to Dehradun and Cuba.

Question: Where did Pawan travel to and by what mode?

- a) Haiti- Train
- b) Dehradun- Bus
- c) Haiti- Bus
- d) Chennai - Bus

Ans) c

Exp) Option c is the correct answer.

Step 1: Given, Rohit went to Bali by car and Qutub went to Kuwait by airplane.

Saket traveled by boat whereas Tarun traveled by train.

After these information, we are left with one person Pawan and one mode of transport that is bus, So, this is concluded that Pawan traveled by bus.

Step 2: Mussoorie is not connected by bus to Dehradun and Cuba.

So, it can be concluded that Pawan didn't travel to Dehradun and Cuba.

Given, Bali and Kuwait are already being traveled by Rohit and Qutub.

So, the only destination left for Pawan is Haiti

Peron	City	Mode
Rohit	Bali	Car
Qutub	Kuwait	Airplane
Saket		Boat
Traun		Train
Pawan	Haiti	Bus

Q.18) P, Q, R and S are four males. P is the eldest in the group but he is not the poorest, R is the richest but not the eldest, Q is elder than S but he is not elder than P or R, P is richer than Q but he is not richer than S. How the four persons can be arranged in decreasing order of their age and money?

- a) PQRS, RPSQ
- b) PRQS, RSPQ
- c) PRQS, RSQP
- d) PRSQ, RSPQ

Ans) b

Exp) Option b is the correct answer.

From the above information, the decreasing order of P Q R S agewise:

$P > R > Q > S$

From the above information, the decreasing order of P Q R S money-wise:

$R > S > P > Q$

Q.19) Shobhita wants to become a doctor, so she appears for the NEET exam. The NEET exam comprises six subjects: Physics, Chemistry, Biology, English, Hindi and one optional. She needs to get passing marks in all the six subjects to get admission to Medical College. She writes the exam and comes out of the centre with a sad face. Her father asks 'How did she perform?' Is there any way in which she can fail the

exam? She answered ‘Yes, she might fail’. Determine the number of ways in which Shobhita can fail the NEET exam?

- a) 76
- b) 63
- c) 78
- d) 84

Ans) b

Exp) Option b is the correct answer.

Shobhita will fail even if she fails in 1 subject or 2 subjects or 3 subjects or 4 subjects or 5 subjects or 6 subjects.

Total number of subjects = 6

Number of ways in which she will fail in one subject = $C(6,1)$

Number of ways in which she will fail in two subjects = $C(6,2)$

Number of ways in which she will fail in three subjects = $C(6,3)$

Number of ways in which she will fail in four subjects = $C(6,4)$

Number of ways in which she will fail in five subjects = $C(6,5)$

Number of ways in which she will fail in six subjects = $C(6,6)$

If she fails in either of the subjects, she will not pass the NEET exam. Hence the sum of all the above will give the number of ways in which she can fail the NEET exam.

$$\begin{aligned} \text{Number of ways in which Shobhita can fail the NEET exam} &= C(6,1) + C(6,2) + C(6,3) + C(6,4) + C(6,5) + C(6,6) \\ &= \frac{6!}{(5! \times 1!)} + \frac{6!}{(4! \times 2!)} + \frac{6!}{(3! \times 3!)} + \frac{6!}{(2! \times 4!)} + \frac{6!}{(1! \times 5!)} + \frac{6!}{(6! \times 0!)} \\ &= 63 \text{ ways} \end{aligned}$$

Q.20) Six movies A, B, C, D, E, F are to be released in a theatre everyday. Three of the movies will be released in the morning session before the Tea break whereas the other three will be released in the afternoon session after the tea break. Movie B should be released immediately before movie C and their release can't be separated by tea break, Movie D will be released either at first or at last. Movie C is to be released at fifth slot, Movie F is scheduled to be released immediately after D. Then which movie will be released at last?

- a) D
- b) A
- c) E
- d) Can't be determined.

Ans) d

Exp) Option d is the correct answer.

Step 1: Movie C is to be released at the fifth. Movie B should be released immediately before movie C and their release can't be separated by tea break, So movie B will be at 4th place.

Step 2: Movie D will be released either at first or at last. Movie F is scheduled to be released immediately after D. So D has to be at 1st place. And F will be at 2nd place

Sequence	Movie
1	D
2	F
3	

Tea break	Tea break
4	B
5	C
6	

There are two movies left A, E but we didn't have any specific information about others. So which movie got released at the end can't be known.

Q.21) 295 people visit the European Club. Members of European club, either love French cuisine or Russian cuisine or both. Consider two Statements and a Question

Statement-1: 198 club members love both French and Russian cuisine.

Statement-2: 58 club members love only Russian cuisine.

Question: Find the number of club members who love only French cuisine?

Question: Which one of the following is correct in respect of the statements and a question?

- Statement-1 alone is not sufficient to answer the Question.
- Statement-2 alone is not sufficient to answer the Question.
- Either Statement-1 or Statement-2 alone is sufficient to answer the Question
- Both Statement-1 and Statement-2 are required to answer the Question

Ans) d

Exp) Option d is the correct answer.

Given, 295 people visit the European Club. Members of European club, either love French cuisine or Russian cuisine or both.

$$n(F \cup R) = 295 \text{-----(1)}$$

Using Statement-1: 198 club members love both French and Russian cuisine.

$$n(F \cap R) = 198$$

$$\text{Formula for } n(F \cup R) = n(F) + n(R) + n(F \cap R) \text{-----(2)}$$

$$295 = n(F) + n(R) + 198$$

Question asks the number of club members who love only French cuisine, so in the above equation both $n(F)$ and $n(R)$ are unknown, so the question can't be answered using Statement one alone.

Using Statement-2: 58 club members love only Russian cuisine.

$$n(R) = 58 \text{-----(3)}$$

Here in equation 2 again, only $n(R)$ and $n(F \cup R)$ is known, so the question can't be answered using Statement -2 alone.

Using both statements and equation 1:

$$n(F \cup R) = 295$$

$$n(F \cap R) = 198$$

$$n(R) = 58$$

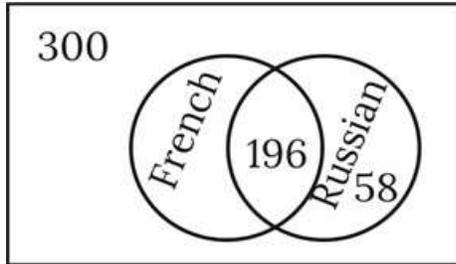

Put this in equation 2:

$$295 = n(F) + 58 + 198$$

$$n(F) = 39$$

The number of club members who love only French cuisine is 39.

Both Statement-1 and Statement-2 are required to answer the Question.

Q.22) A statement followed by Conclusion-1 and Conclusion-2 is given below. You have to take the Statement to be true even if it seems to be at variance from the commonly known facts. Read all Conclusions and then decide which of the given Conclusions logically follows/ follow from the **Statement**, disregarding the commonly known facts.

Statement: Some Cupcakes are almonds. Some almonds are cashews. All cashews are tea.

Conclusion-I: Certainly, some almonds are tea.

Conclusion-II: Some Cupcakes may not be cashews.

Question: which one of the following is correct?

- Only Conclusion-I
- Only Conclusion-II
- Both Conclusion-I and Conclusion-II
- Neither Conclusion-I nor Conclusion-II

Ans) c

Exp) Option c is the correct answer.

From Given Statement: Some Cupcakes are almonds, we draw Image 1 and 2.

From Some almonds are cashews, we draw Image 3 and 4

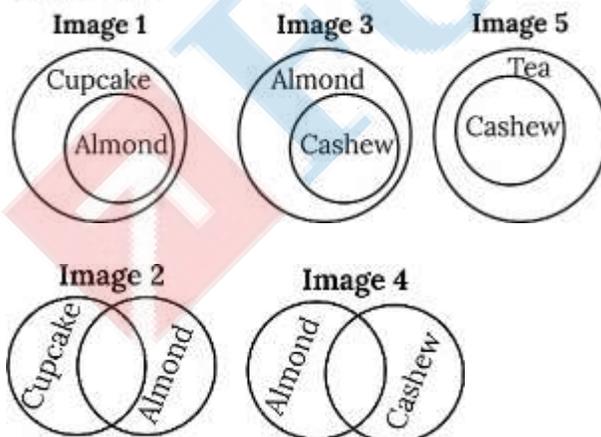

From All cashews are tea, we draw Image 5.

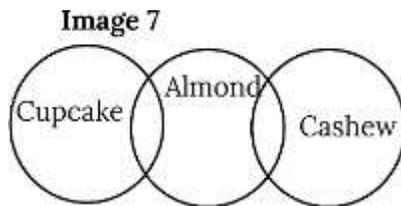

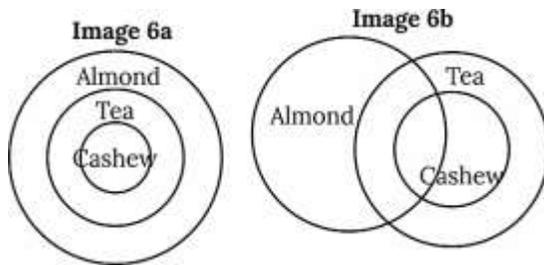

Conclusion: From Image 1, 2 and 5 we get Image 6a and 6b. Here it can be concluded that certainly some almonds are tea.

From Image 2 and 4 we get, Image7, from this we can conclude that Some Cupcakes may not be cashews.

Hence both Conclusion-I and Conclusion-II follows.

Statement 1

Q.23) A Statement followed by Conclusion -1 and Conclusion -2 is given below. You have to take the Statement to be true even if it seems to be at variance from the commonly known facts. Read all Conclusions and then decide which of the given Conclusions Logically follows/follow from the Statement, disregarding the commonly known facts.

Statement: Some rabbits are monkeys. All monkeys are camels. Some camels are wolves.

Conclusion -1: Certainly, some rabbits are wolves.

Conclusion -2: Certainly, some monkeys are wolves.

Question: which one of the following is correct?

- Only Conclusion-1
- Only Conclusion-2
- Both Conclusion-1 and Conclusion-2
- Neither Conclusion-1 nor Conclusion-2

Ans) d

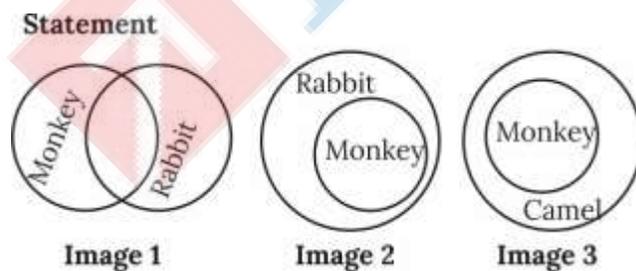

Exp) Option d is the correct answer.

Use the statement- Some rabbits Are monkeys. From this statement, we can draw image one and image two.

From the statement- All monkeys are camels, we draw image three.

From the statement, some camels are wolves, we draw images four and five.

From image one and three, the final image which we make is clear that certainly some rabbits are not wolves and certainly some monkeys are not wolves. Hence neither of the conclusion follows.

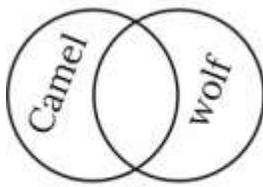

Image 4

From Image 1 & 3

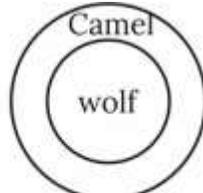

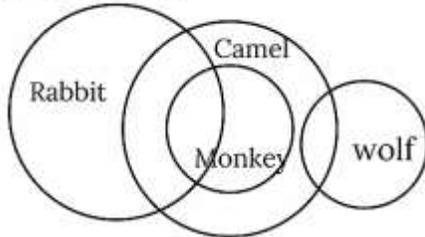

Image 5

Q.24) In the given expression what will be the next term?

M A A, Q E B, U I D, Y O H, _ _ _

- a) C U P
- b) M N Q
- c) J H U
- d) B U G

Ans) a

Exp) Option a is the correct answer.

First alphabet jumps three places. $M + 3 = Q$, $Q + 3 = U$, $U + 3 = Y$, So next term will be $Y + 3 = C$

Second alphabet is a series of vowels, A E I O, next term will be U.

Third alphabet in the given series moves ahead by a factor of two that is $A = 1$, $B = 1 \times 2 = 2$, $D = 2 \times 2 = 4$,

$H = 4 \times 2 = 8$, so next term will be $8 \times 2 = 16$ th alphabet, that is P

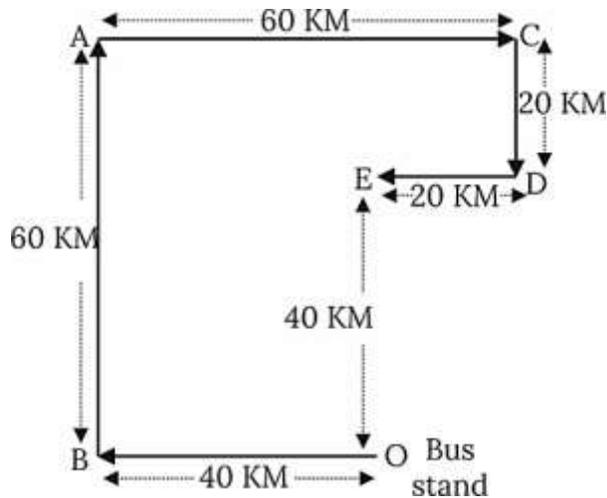

So, the next term is C U P

Q.25) A Volvo bus going towards Goa starts from the bus stand in the West direction. It travels for 40 km and then takes a right turn and moves for another 60 km. It again takes a right turn and moves for another 60 km. It again takes a right turn and moves for 20 km, there again it moves right for another 20 km. How far the bus has moved from its origin and what is its direction from the origin?

- a) 20 km, Northeast
- b) 40 km, North
- c) 50 km, Southwest
- d) 10 km North

Ans) b

Exp) Option b is the correct answer.

Q.26) Replace the incorrect term by the correct term in the given sequence where odd terms and even terms follow the same pattern.

4, 5, 9, 16, 20, 50, 43, 153, 90, 459

- a) 463
- b) 30
- c) 309
- d) 44

Ans) a

Exp) Option a is the correct answer.

The given expression comprises of two sequences:-

- 1) 4, 9, 20, 43, 90
- 2) 5, 16, 50, 153, 459

The first sequence is : $[(4 \times 2) + 1] = 9$, $[(9 \times 2) + 2] = 20$, $[(20 \times 2) + 3] = 43$, $[(43 \times 2) + 4] = 90$

So, in the 1st sequence, all terms are correct.

The second sequence is : $[(5 \times 3) + 1] = 16$, $[(16 \times 3) + 2] = 50$, $[(50 \times 3) + 3] = 153$, $[(153 \times 3) + 4] = 463$

In the second sequence in the question, last term (459) is incorrect, which will be replaced by 463.

Q.27) Following is a Matrix of certain entries, the entries follow a certain trend row wise. Choose the missing entry (?) accordingly.

6C	21E	4G
4B	8D	11F
8F	10H	14J
26E	59G	?

- a) 136P
- b) 150I
- c) 84I
- d) 95Q

Ans) b

Exp) Option b is the correct answer.

In the first column, $\{(4 \times 8) - 6\} = 26$,

$\{\text{position of B}(2) + \text{position of F}(6) - \text{position of C}(3)\} = 5$ th position alphabet (E)

Implies the rule for digits is : term in fourth row = (product of second row and third row) - first row.

For alphabet, term in fourth row = (sum of second row and third row) - first row

So, in the second column,

$\{(8 \times 10) - 21\} = 59$, $\{\text{position of D}(4) + \text{position of H}(8) - \text{position of E}(5)\} = 6$ th position alphabet (G)

So, in the third column,

$\{(14 \times 11) - 4\} = 150$, $\{\text{position of J}(10) + \text{position of F}(6) - \text{position of G}(7)\} = 9$ th position alphabet (I)

Q.28) You are given two identical Sequences in two rows:

Sequence-I	4	18	48	100	180	294
Sequence-II	0	A	B	C	D	E

Question: What is the entry in the place of D for the given Sequence-II?

- a) 36
- b) 64
- c) 48
- d) 100

Ans) c

Exp) Option c is the correct answer.

The first sequence follows the logic: $(n^3 - n^2)$, n begins with 2.

1st term $n = 2$, $(2^3 - 2^2) = 4$

2nd term, $n = 3$, $(3^3 - 3^2) = 18$

3rd term, $n = 4$, $(4^3 - 4^2) = 48$

5th term, $n = 5$, $(5^3 - 5^2) = 100$

6th term, $n = 6$, $(6^3 - 6^2) = 180$

7th term, $n = 7$, $(7^3 - 7^2) = 294$

Sequence-II is identical to Sequence -I, where n begins with 1, so $(1^3 - 1^2) = 0$

So D will be $(4^3 - 4^2) = 48$

Q.29) Six persons Bob, Derek, Cony, Mary, Juny, Klein are split in two groups of three each and made to stand in two rows, such that a man in one row is exactly facing a man in the other row. Mary is not at the end of any row and is to the right of Juny, who is facing Cony. Klein is to the left of Derek, who is facing Mary.

Which of the following groups of men are in the same row?

- a) Bob, Mary, Derek
- b) Cony, Derek, Klein
- c) Mary, Juny, Klein
- d) Bob, Derek, Cony

Ans) b

Exp) Option b is the correct answer.

Step 1: Mary is to the right of Juny, who is facing Cony.

So, Juny has to be at index three or index four so that Mary is to her right. Let's take row two and place Juny at index four. Then Mary will be at index five.

SFG 2023 | LEVEL 2 | Test #33 – Solutions (CSAT) | 

Step 2: Juny is facing Cony. So, Cony will be at index one in the first row.

Step 3: Derek is facing Mary, so Derek will be at index two in the first row.

Step 5: Klein is to the left of Derek. So, Klein will be at index three in the first row.

Step6: Now we are left with Bob, so he will be seated at index six in second row.

index	1	2	3
1st row	Cony	Derek	Klein

2nd row	Juny	Mary	Bob
index	4	5	6

Q.30) Consider two Statements and a Question:

Statement-1: Robin at present is 28 years younger to his uncle.

Statement-2: Robin's sister who was born in 1974, is 36 years younger to her uncle.

Question: In which year Robin was born?

Question: Which one of the following is correct in respect of the Statement and the Question?

- Statement-1 alone is sufficient to answer the question
- Statement -2 alone is sufficient to answer the question
- Either Statement-1 alone or Statement -2 alone is sufficient to answer the question
- Both Statement-1 and Statement -2 are required to answer the question.

Ans) d

Exp) Option d is the correct answer.

Statement-1: Robin at present is 28 years younger to his uncle.

Here we do not know the age of Robin's uncle or in what year he was born so we cannot know in which year Robin was born. Hence Statement -1 alone is not sufficient to answer the question.

Statement -2: Robin's sister who was born in 1974, is 36 years younger to her uncle.

This statement gives us the year of birth of Uncle, that is $1974 - 36 = 1938$ ----- (1)

But this again is not giving us the year in which Robin was born.

Hence Statement -2 alone is not sufficient to answer the question.

Using both statements:

We conclude that Robin is $(36 - 28) = 8$ years elder to his sister.

Hence year of birth of Robin = $1974 - 8 = 1966$

So, Both Statement-1 and Statement -2 are required to answer the question.

Q.31) Consider two Statements and a Question:

In a six floor apartment six people namely Rehman, Shikhar, Reshav, Piku, Qureshi and Shobhit reside in a certain manner.

Statement-1: Rehman resides on the fourth floor. Shikhar resides on a floor which is even. Reshav didn't stay on the top floor.

Statement -2: Reshav is two floors below Piku who is 3 floors above Shikhar.

Question : Who resides on the top floor?

Question: Which one of the following is correct in respect of the Statement and the Question?

- Statement-1 alone is sufficient to answer the question

SFG 2023 | LEVEL 2 | Test #33 – Solutions (CSAT) | 

- b) Statement -2 alone is sufficient to answer the question
 c) Both Statement-1 and Statement -2 are required to answer the question
 d) Neither Statement-1 nor Statement -2 is sufficient to answer the question.

Ans) d

Exp) Option d is the correct answer.

Given: In a six floor apartment, six people namely Rehman, Shikhar, Reshav, Piku, Qureshi and Shobhit reside in a certain manner.

Statement-1:

Step 1: Rehman resides on the fourth floor. So, he's on the 4th floor.

Shikhar resides on a floor which is even. so, Shikhar is at either two or six.

Reeshav didn't stay on the top floor. So Reeshav can be on any floor 3/5/1

We do not have information about other people's floor. So, we cannot find out with certainty on which floor Shikhar resides. Thus, who resides on the top floor can't be known. Hence statement one alone is not sufficient to answer the question.

Floor	Person
6	Shikhar
5	
4	Rehman
3	
2	Shikhar
1	

Statement : 2 Reeshav is two floors below Piku who is 3 floors above Shikhar.

Since Piku has to be three floors above Shikhar, so Shikhar will be at floor 1/2/3

If we place Shikhar at floor 1, Piku will be at floor 4

Reeshav is two floors below Piku, so Reeshav can be on floor 2 then. Still now we don't have clarity on who is on other floors. So, Statement 2 alone is not sufficient to answer the question.

Floor	Person
6	
5	
4	Piku
3	
2	Reshav
1	Shikhar

Using both Statement -1 and 2:

Step 1: Rehman stays on the fourth floor..

Step 2: Shikhar stays on a floor which is even. So he has to be on floor 2 or floor 6.

Step 3: Reeshav is two floors below Piku, who is 3 floors above Shikhar. So Shikhar can't be at floor 6, as then the condition that Piku is three floors above Shikhar will not be satisfied.

Hence, Shikhar has to be on floor two and Piku will be on floor 5th.

Step 4: Reeshav is two floors below Piku. So he is on Floor 3

Rank	Person
6	
5	Piku
4	Rehman
3	Reeshav
2	Shikhar
1	

Conclusion: Even using statement one and two, we cannot decide who stays on top floor so both statements are insufficient to answer the question.

Q.32) From China and Korea a set of 289 people visit Agra to see the Taj Mahal. Out of these tourists 73 are Chinese. All of them go to a multi cuisine restaurant to have their lunch, where 113 people declare that they love Chinese food. How many Koreans love Chinese food?

- a) 30
- b) 40
- c) 113 or more.
- d) 113 or less

Ans) d

Exp) Option d is the correct answer.

Given 289 people visit Agra. out of which 73 are Chinese. So $(289-73=216)$ are Koreans.

Given 113 people declare that they love Chinese food.

Case 1: If all of the 113 people are Koreans who love Chinese food. Then the maximum number of Koreans who love Chinese food is 113.

If all the Chinese love Chinese food then there will be $(113-73)$ equal to 40 people left. Then there will be 40 Koreans who love Chinese food. So, the minimum number of Koreans who love Chinese food is 40.

So Chinese food loving Koreans will range from 40 to 113.

Q.33) In English alphabet, first two letters takes jump of two places, next three letters takes jump of three places. Again, next two letter takes jump of two places and another next three letters take jump of three places and so on. The last letter takes a jump of seven places backwards. Which letter is at thirteenth from left end?

- a) P
- b) Q
- c) M
- d) N

Ans) a

Exp) Option a is the correct answer.

Let's write the alphabet:

AB CDE FG HIJ KL MNO PQ RST UV WXY Z

$A+2=C$, $B+2=D$, $C+3=F$, $D+3=G$, $E+3=H$, $F+2=H$, $G+2=I$, $H+3=K$, $I+3=L$, $J+3=M$

$K+2=M$, $L+2=N$, $M+3=P$. $N+3=Q$, $O+3=R$ $P+2=R$ $Q+2=S$ $R+3=U$, $S+3=V$, $T+3=W$ $U+2=W$, $V+2=X$
 $W+3=Z$, $X+3=A$, $Y+3=B$

The last letter takes jump of seven places, $z+7=F$

New series: CDFGHHIKLMMNPQRRSUVVWXXZAB

thirteenth from left end is P

Q.34) In a joint family of seven persons A, B, C, D, E, F, G there are two married couples. G is a housewife and her husband is a lawyer. B is the husband of C. A is an Engineer and is the grand daughter of G. D is the father in law of C who is a doctor and D is father of E who is a Professor. F is brother of A and son of B. Who is the lawyer in the family?

- a) G
- b) D
- c) F
- d) D

Ans) b

Exp) Option b is the correct answer.

Step 1: Use the statement: G is a housewife and her husband is a lawyer. A is an engineer and is the grand daughter of D. F is a brother of A. From this we get image 1.

Step 2: B is the husband of C. D is the father in law of C who is a doctor. And D is father of E who is a professor. from this we get Image 2. From which we can conclude that E is brother of F and D is father of B.

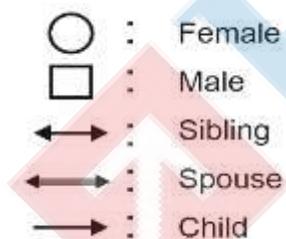

Step 3: F is son of B. From this we get Image 3.

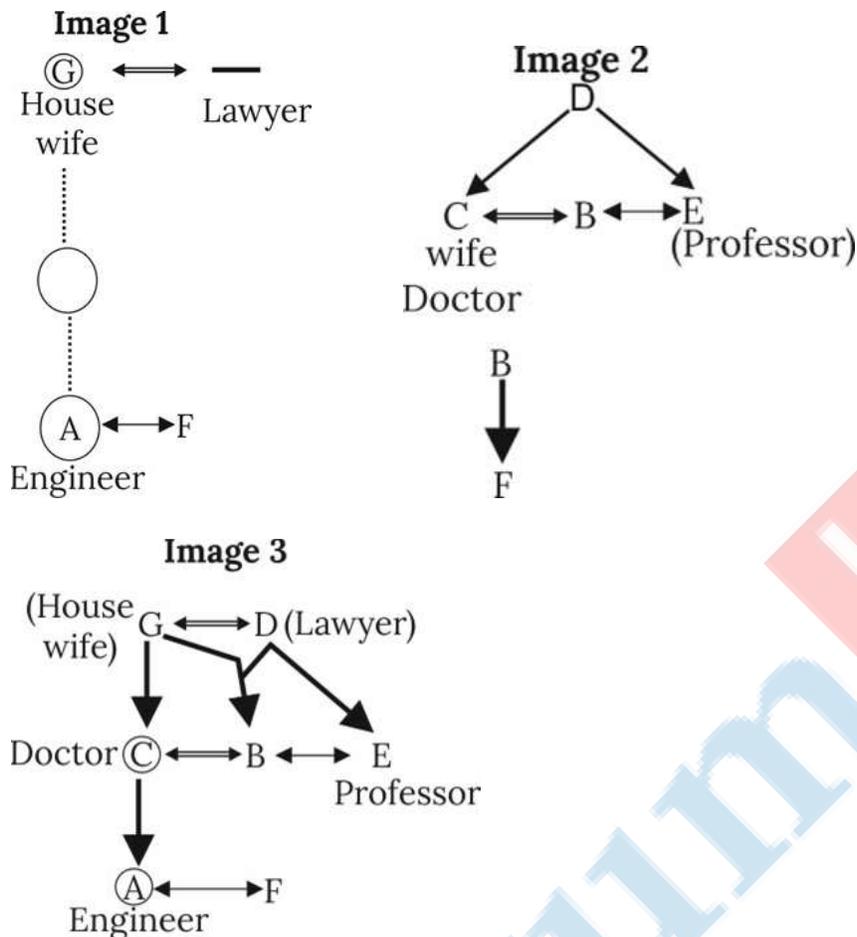

Now from Image 2 and 3 we get that : C is the mother of F.

From image 1 and 3 we get that since F and A are siblings , so B and C are parents of A and F.

From Image 1 and 2 we get that D is the husband of G, and G's husband was a lawyer, so D is a lawyer.

Codes:

Q.35) 6 friends Pandav, Rohan, Simmi, Tarun, Vishal and Pranav open their own companies. They opened their company in different year during six consecutive years. Pandav's company is older than Simi's. Rohan's company is older than that of Tarun and Vishal. Pranav's company is two years older than Tarun. Pandav's company was established either in the year 2002 or 2003. The first company was established in the year 2000. If Pranav's company is the oldest company, then which of the company is the youngest company ?

- Simi
- Tarun
- Rohan
- Can't be determined

Ans) d

Exp) Option d is the correct answer.

Step 1: Pranav's company is the oldest company. So, it was established in 2000.

Step 2: Pranav's company is two years older than Tarun. So, Tarun's company was established in 2002.

Step 3: Pandav's company was established either in the year 2002 or 2003. So now when Pranav's company was established in 2002, so Pandav's company was established in 2003.

Step 4: Rohan's company is older than that of Tarun and Vishal, so it has to be established in 2001.

Step 5: Pandav's company is older than Simi's. So, it can be established in 2004 or 2005.

Rohan's company is older than that of Tarun and Vishal. So it can be established in 2005 or 2004.

So which company is the youngest company can't be determined.

Year	Company's Owner
2000	Pranav
2001	Rohan
2002	Tarun
2003	Pandav
2004	
2005	

Q.36) Consider two Statements and a Question:

Statement-1: Two friends Mani and Sunny were talking about Hema's birthday. Mani says to Sunny that Hema's birthday was 6 months ago and the sum of digits of her birthday is the second smallest prime number.

Statement -2: Sunny replies that after three months from now Hema's birthday will be 9 months back and it had fallen on a Saturday.

Question : In which month is Hema's birthday ?

Question: Which one of the following is correct in respect of the Statement and the Question?

- Statement-1 alone is sufficient to answer the question
- Statement -2 alone is sufficient to answer the question
- Both Statement-1 and Statement -2 are required to answer the question
- Neither Statement-1 nor Statement -2 is sufficient to answer the question.

Ans) d

Exp) Option d is the correct answer.

Using statement 1: Hema's birthday was 6 months ago and the sum of digits of her birthday is the second smallest prime number (3)

So, the date of birth of Hema can be 03, 12. In which month they both are talking is not known, hence month of birth can't be known.

So, statement 1 alone is not sufficient to answer the question.

Using Statement 2: Three months from now Hema's birthday will be 9 months back and it had fallen on a Saturday.

Again, here in which month they both are talking is not known, hence month of birth can't be known.

So, statement 2 alone is not sufficient to answer the question.

Even using both the statements in which month they both are talking is not known, hence month of birth can't be known. So, Neither Statement-1 nor Statement -2 is sufficient to answer the question.

Q.37) In a certain code language DGJ is written as 37, MPS is written as 231, then how will be "VYB" written?

- 24
- 144
- 19
- 169

Ans) c

Exp) Option c is the correct answer.

$$D G J = 37, \text{ MPS} = 231$$

The logic is [(index of 1st alphabet x index of 3rd alphabet)-index of 2nd alphabet] = RHS(right hand side)

$$\{\text{Index of D}(4) \times \text{index of J}(10)\} - \text{index of G}(7) = 37$$

$$\{\text{Index of M}(13) \times \text{index of S}(19)\} - \text{index of P}(16) = 231$$

$$\{\text{Index of V}(22) \times \text{index of B}(2)\} - \text{index of Y}(25) = 44 - 25 = 19$$

Q.38) A, B, C, D, E and F not necessarily in that order are sitting in six chairs regularly placed around a round table. It is observed that:

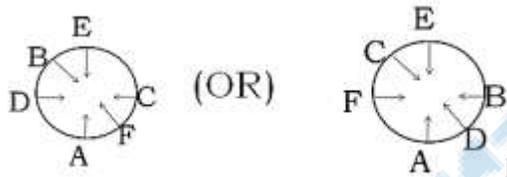

- A is between D and F
- C is opposite D
- D and E are not on neighbouring chairs

Which one of the following must be true?

- a) A is opposite B
- b) D is opposite E
- c) C and B are neighbours
- d) B and E are neighbours

Ans) d

Exp) Option d is the correct answer.

Fix the position of A and proceed according to the given conditions. There can be two cases as above in the figure. In both B and E are neighbours.

Q.39) Examine the following statements:

1. Either A & B got same marks or A got more marks than B
2. Either C & D got same marks or D got more marks than C
3. B got more marks than C

Which of the following conclusions can be drawn from the above statements?

- a) A got more marks than B
- b) B and D got same marks
- c) D got more marks than C
- d) A got more marks than C

Ans) d

Exp) Option d is the correct answer.

From S1: $A \geq B$

From S2: $D \geq C$

From S3: $B > C$

Now if B (who either got equal or less marks than A) got more marks than C, then A got more marks than C.

Q.40) Consider the following statements and conclusions:

Statement 1: All cups are books.

Statement 2: All books are shirts.

Conclusion A: Some cups are not shirts.

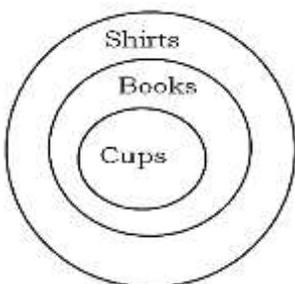

Conclusion B: Some shirts are cups.

Which of the conclusion given above is/are correct?

- a) Only conclusion A follows
- b) Only conclusion B follows
- c) Both Conclusion A and B follows
- d) Neither Conclusion (A) nor (B) follows

Ans) b

Exp) Option b is the correct answer.

Q.1) It is an archaeological site located on the banks of the river Ganga in Bihar's Saran district. It has a large pre-historic mound which is known for its continuous archaeological record from the Neolithic age to the reign of the Pal dynasty who ruled during the pre-medieval period.

Which of the following archaeological sites is described in the above passage?

- a) Chirand
- b) Utnur
- c) Kanispur
- d) Maski

Ans) a

Exp) Option a is the correct answer.

Chirand is an archaeological site in the **Saran district of Bihar, India**, situated on the northern bank of the Ganga River. It has a large pre-historic mound which is known for its continuous **archaeological record from the Neolithic age (about 2500–1345 BC) to the reign of the Pal dynasty who ruled during the pre-medieval period**. The excavations in Chirand have revealed stratified Neolithic, Chalcolithic, and Iron Age settlements, and transitions in human habitation patterns dating from 2500 BC to 30 AD.

Recently, it was in news due to threat of erosion and losing its existence as the water level in the river is rising due to heavy rains.

Option b is incorrect: Utnur is located in Telangana.

Option c is incorrect: Kanispur is located in Kashmir.

Option d is incorrect: Maski is located in Karnataka.

Source: <https://www.hindustantimes.com/cities/patna-news/famous-archaeological-site-in-bihar-faces-threat-of-erosion-101624801867323.html>

Q.2) Consider the following statements regarding the Early Vedic Period:

1. The practice of polygamy was present during the Early Vedic period.
2. The practice of widow remarriage was known to Early Vedic People.
3. Child marriage was widely practiced during the Early Vedic period.

Which of the statements given above is/are correct?

- a) 2 only
- b) 1 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Women had a respectable position in the early Vedic era. But the society was essentially patriarchal with a preference for male children and cattle. The birth of a son was preferred perhaps because of the martial nature of the society, which required male members for their clashes to establish dominance over the territories.

Statement 1 is correct: Monogamy was generally practiced in the Early Vedic period while **polygamy was prevalent among the royal and noble families**. Women were given opportunities as men for their spiritual and intellectual development. There were women poets like Apala, Viswavara, Ghosa and Lopamudra during the Rig Vedic period.

Statement 2 is correct: We also notice the practise of widow remarriage in the Rig-Veda/Early Vedic Period. The custom of sati was unknown. The wife occupied an honoured place and participated with her husband in religious ceremonies.

Statement 3 is incorrect: Though we notice the practice of levirate and widow remarriage in the Rig-Veda yet **there is no reference about pardah and child marriage.** The marriageable age in the period seemed to have been 16-17 years.

Source: History, Volume-1, Higher Secondary First Year, Tamil Nadu State Board

<https://www.arcjournals.org/pdfs/ijhsse/v2-i5/1.pdf>

<https://www.globalsecurity.org/military/world/pakistan/rig-vedic-period.htm#:~:text=Monogamy%20was%20generally,Rig%20Vedic%20period.>

Q.3) Which of the following statements is/are the features of Neolithic culture found in Kashmir?

1. Remains of the neolithic culture in Kashmir were found at the sites of Burzahom and Gufkral.
2. The practice of agriculture was known to the neolithic people of Kashmir.

Select the correct answer using the code below:

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

The sites of northern Neolithic culture are found in Kashmir. The Neolithic culture of Kashmir region was contemporary with the Harappan civilization. Recent research has placed the beginning of the Neolithic culture in this region around the late fourth millennium BCE.

Statement 1 is correct: In Kashmir, excavations at **Burzahom, Gufkral and Kanispur have revealed significant materials belonging to Neolithic culture.** Burzahom and Gufkral have also revealed Megalithic and Early Historic phases.

Statement 2 is correct: People of Burzahom mainly practiced hunting and fishing economy and they also practiced agriculture on a small scale. **The people of Gufkral practised both agriculture and animal husbandry.** The Neolithic people in Kashmir used not only polished tools of stone, but also numerous tools and weapons made of bone.

Source: Ancient India by RS Sharma pg 22

<https://egyankosh.ac.in/bitstream/123456789/64778/1/Unit4.pdf>

Q.4) Which of the following statements about Ajatashatru, the king of Magadha is/are correct?

1. He maintained a friendly relationship with the kingdom of Vaisali throughout his reign.
2. He was instrumental in convening the first Buddhist Council at Rajagriha.

Select the correct answer using the code given below:

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

The reign of Ajatasatru was remarkable for his military conquests. He fought against Kosala and Vaisali. He won a great success against a formidable confederacy led by the lichchvis of Vaisali. This had increased his power and prestige.

SFG 2023 | LEVEL 2 | Test #34 – Solutions | 

Statement 1 is incorrect: Ajatashatru did not have a friendly relationship with the kingdom of Vaisali. Despite his mother being a Lichchhavi princess, he did not hesitate to make war against Vaisali, which was ultimately destroyed after a 16-year-long conflict.

Statement 2 is correct: Ajatashatru is credited with convening the first Buddhist council at Rajagriha, which was presided over by the monk Mahakasyapa.

Source: Tamil Nadu History text book pg 50 ; Ancient India by RS Sharma pg 72

Q.5) Consider the following statements regarding James Webb Space Telescope:

1. It is a joint initiative of NASA, the European Space Agency (ESA) and the Canadian Space Agency.
2. It has observed, for the first time, the effect of gravitational lensing on a distant exploding star.
3. It revolves around the Sun, unlike Hubble Telescope which revolves around the Earth.
4. It is the first and the only telescope which is located at the Sun-Earth Lagrange-2 or L2 point.

Which of the options given above are correct?

- a) 1 and 3 only
- b) 2 and 4 only
- c) 1 and 2 only
- d) 3 and 4 only

Ans) a

Exp) Option a is the correct answer.

James Webb Space Telescope (JWT) is an **infrared observatory**, launched in 2021 at **1 million miles (or 1.5 million kilometers) away from the Earth**. Its aim is to complement and extend the discoveries of the Hubble Space Telescope. It **has longer wavelength and greatly improved sensitivity**. It is the **largest and the most power telescope** ever built.

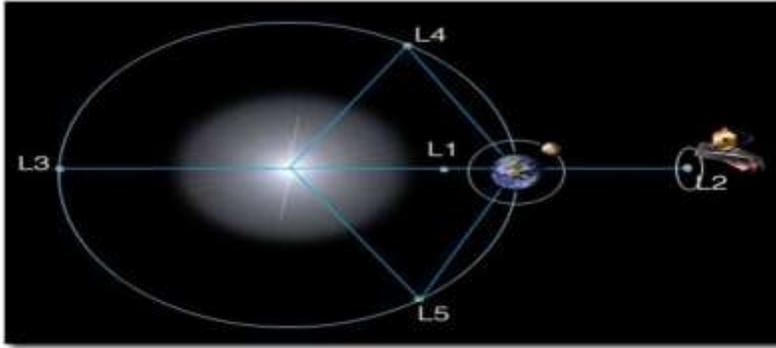

Statement 1 is correct: JWT is a joint initiative by **NASA, the European Space Agency and the Canadian Space Agency**.

Statement 2 is incorrect: Hubble Telescope is known to observe the effect of gravitational lensing on a distant exploding star, for the first time (2015). Other significant discoveries of Hubble Telescope include:

- 1) Helped **pin down the age for the universe** now known to be 13.8 billion years, roughly three times the age of Earth.
- 2) Helped determining the **rate at which universe is expanding**.
- 3) Discovered that **nearly every major galaxy has a black hole at its center**.
- 4) Created **3D map of dark matter**.

Statement 3 is correct: JWT will orbit around the Sun at the **Lagrange-2 (L2)**, which is 1.5 million kilometers away from the Earth. At this orbit, **the telescope is in line with the Earth as it revolves around the Sun**. Hubble Telescope revolves around the Earth at an altitude of approximately 535 kilometers.

Statement 4 is incorrect: **Lagrange point** or **liberation point**, in astronomy, a point in space at which a small body, under the gravitational influence of two large ones, will remain approximately at rest relative to them. **Apart from JWT, there are few other objects launched at L2. This includes NASA's- WMAP, Herschel Space Observatory** (Herschel was the largest infrared telescope launched, until JWT was launched in 2021) and **ESA's Planck** etc. The key feature of L2 orbit is that it lets the telescope stay in line with Earth as it moves around the Sun. This allows the satellite's large sunshield to protect the telescope from the light and heat of the Sun and Earth (and Moon). See picture below for the locations of different Lagrange points.

Q.6) Consider the following statements about agricultural practices followed by the people of Harappan Civilization:

1. Rice was the most important crop of the Harappan civilization.
2. Harappan people were unaware of the use of plough in the agriculture.
3. Evidence of multi-cropping has been found.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 3 only
- d) 1 and 2 only

Ans) c

Exp) Option c is the correct answer.

The Harappan civilization shared several cultural elements such as subsistence strategies with the early Harappan cultures. The Harappans ate a wide range of plant and animal products, including fish.

Statement 1 is incorrect: Wheat and barley were the two important crops of the Indus Valley Civilization. In some places, particularly Gujarat, they also cultivated some native millets. They fed local wild rice to their animals and probably began to cultivate it, **though rice does not become an important crop until post-Harappan times.**

Statement 2 is incorrect: Use of plough was observed during the Harappan age. Primitive ploughs were made of wood, and wood is a perishable material. Hence there is no possibility of finding an actual wooden plough from a Harappan site. However, a terracotta model of a plough has been discovered from Mohenjodaro. This shows that the Harappan people were aware of the plough. Apart from this, a ploughed field was also excavated in Kalibangan.

Statement 3 is correct: Archaeologists have found evidence of a ploughed field at Kalibangan (Rajasthan), associated with Early Harappan levels. **The field had two sets of furrows at right angles to each other, suggesting that two different crops were grown together.** Thus, providing evidences of multi-cropping during this period. The research also confirms that **Indus populations were the earliest people to use complex multi-cropping strategies across both seasons**, growing foods during summer and winter, which required different watering regimes.

Q.7) Consider the following statements regarding the tribal assemblies during Rig Vedic period:

1. 'Vidhata' were the earliest assemblies dealing with social, religious and military functions.
2. Women were not part of the 'Samiti' in the Rig Vedic period.
3. The king was elected by the tribal assembly called the 'Sabha'.

Which of the statements given above is/are correct?

- a) 1 only
- b) 3 only
- c) 1 and 2 only
- d) 2 and 3 only

Ans) a

Exp) Option a is the correct answer.

During the Rig Vedic period, **tribal elements in society were stronger and social divisions based on the collection of taxes or accumulation of landed property were absent.** The society was largely **egalitarian**. There was no evidence of feudalism in the Rig Vedic period. The administrative machinery of the Aryans in the Rig Vedic period functioned with the tribal chief (called Rajan). Several **tribal or kin-based assemblies** such as the Sabha, Samiti, Vidatha, and Gana are mentioned **in the Rig Veda**.

Statement 1 is correct: Vidatha mentioned in the Rig Veda was the earliest and **most important assembly**. It was an assembly meant for **social, religious and military functions**. **Vidatha is frequently associated with women**. They actively participated in the deliberations with men. The **vidatha included women and elders as participants**. The vidatha collectively worshiped deities such as **Agni and Indra**.

Statement 2 is incorrect: The **Samiti** assumed importance only towards the **end of the Rig-Vedic period**. Samiti was a **folk assembly** in which people of the tribe gathered **for transacting tribal business**. It discussed **philosophical issues** and was concerned with religious ceremonies and prayers. **Women were allowed to attend the samiti during the Rig Vedic Age**. **Rajan was elected by the Samiti**. The Rig Veda stated that one could not rule without a samiti. So, statement 2 is incorrect.

Statement 3 is incorrect: The term **Sabha denotes both the assembly and the assembly hall**. Women who attended this assembly were called Sabhavati. As per Rig-Veda, Sabha was a place for dicing **and gambling assembly**, along with **dancing, music, witchcraft, and magic**. It discussed **pastoral affairs and performed**

judicial and administrative functions and exercised judicial authority. They did not elect Rajan. He was elected by the tribal assembly called Samiti. So, statement 3 is incorrect.

Knowledge Base: The term **Gana** means Jana, which means **count**. A Gana was **an assembly or troop**. The leader of the gana is generally called **Ganapati**.

Q.8) Consider the following pairs of major urban cities of Indus Valley civilization (IVC) and their characteristic features.

Cities	Characteristic features
1. Rakhigarhi	Westernmost of the excavated IVC sites.
2. Banawali	Presence of a well-planned fortified township laid in a radial pattern
3. Lothal	Important trading center
4. Harappa	The largest Indus valley site in India.

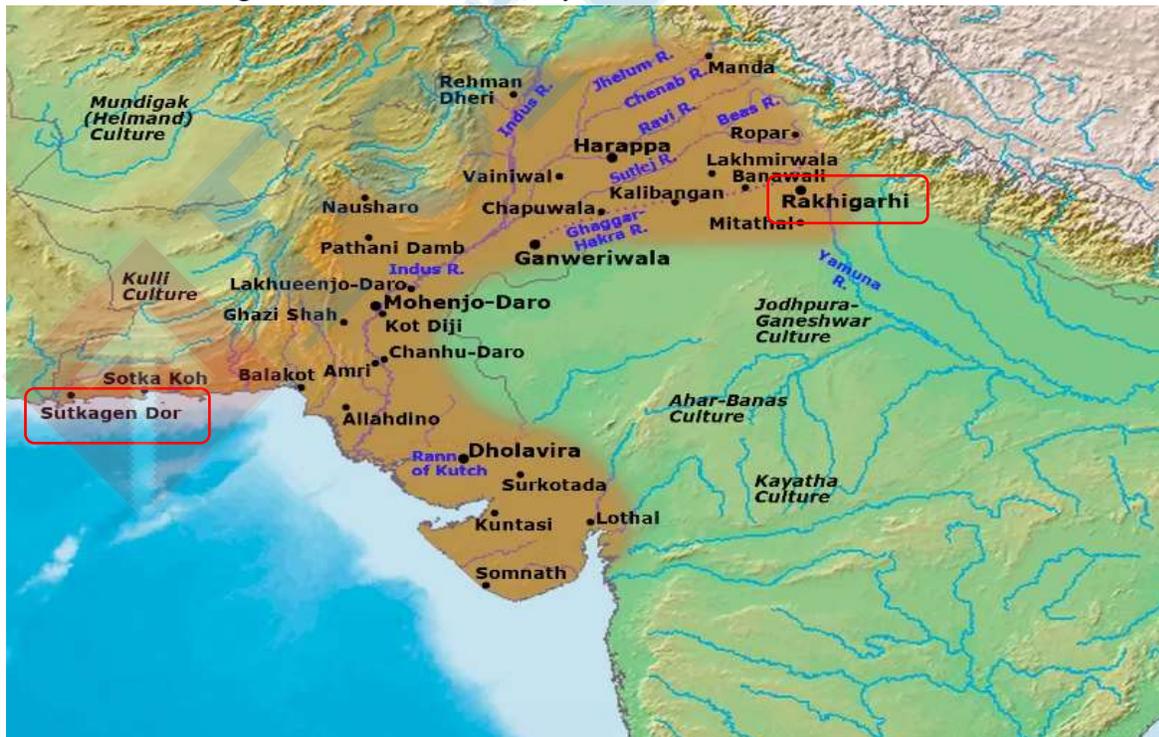

How many pairs given above are correctly matched?

- Only one pair
- Only two pairs
- Only three pairs
- All four pairs

Ans) b

Exp) Option b is the correct answer.

Pair 1 is incorrect: Rakhigarhi is the largest Harappan site located in India. **Sutkagendor is the westernmost among the excavated Indus valley sites.**

Pair 2 is correct: Banawali is a Harappan site located in the state of Haryana. It is marked by the presence of a well-planned fortified township laid in a radial pattern. The sophisticated red ware decorated with animal and floral designs comprising dish-on-stand, 'S'-shaped jar, perforated jar, vase, cooking handis, beaker, basin and goblet etc. have been excavated here.

Pair 3 is correct: Lothal was a thriving trade center in IVC, with its trade of beads, gems and ornaments reaching West Asia and Africa. Lothal was one of the southernmost sites of the ancient Indus Valley civilization. The city was inhabited during 3700 BCE and was a thriving trading port. **The dominant sight at Lothal is the massive dockyard which made this place an important site of international trade during the Harappan period.**

Pair 4 is incorrect: Rakhigarhi is the largest Harappan site in the India and not the Harappa. Harappa was the first excavated/ discovered site of the Indus Valley Civilization. It is located on the banks of the river Ravi. Important findings of this site are red sandstone male torso, granaries and bullock carts.

<https://haryanatourism.gov.in/Destination/ancient-site-of-banawali>

Q.9) In the context of the Age of the Buddha, consider the following statements.

1. The use of metallic money began during this age.
2. In republics during this period, real power lay in the hands of hereditary king.
3. The Indian legal and judicial system originated in this period.

Which of the statements given above is/are correct?

- a) 1, 2 and 3
- b) 1 and 3 only
- c) 1 and 2 only
- d) 3 only

Ans) b

Exp) Option b is the correct answer.

The age of the Buddha (6th century BCE) is characterized by the Northern Black Polished Ware phase and the origin of the second urbanization in India. Urbanization strengthened the state, increased trade, and promoted reading and writing. A rural base contributed to the beginning of crafts, commerce, and urbanization in the mid-Gangetic basin. Other features of this period were -

Statement 1 is correct. The picture of material life in north India, especially in eastern UP and Bihar, can be drawn on the Pali text. **This phase saw the beginning of metal money.** The use of burnt bricks and ring wells appeared in the middle of the NBPW (Northern Black Polished Ware) phase i.e., in the 3rd century BC.

Statement 2 is incorrect. The republican system of government existed either in the Indus basin or in the foothills of the Himalayas in eastern UP and Bihar. The republics in the Indus basin may have been the remnants of the Vedic tribes, although some monarchies may have been followed by republics. **In the republics, real power lay in the hands of tribal oligarchies.** In the republics of Shakyas and Lichchhavis, the ruling class belonged to the same clan and the same varna. Although in the case of the Lichchhavis of Vaishali, 7707 rajas sat in the assembly held in the mote hall, the brahmanas were not mentioned in this context.

Statement 3 is correct. The Indian legal and judicial system originated in this period. Formerly people were governed by the tribal law, which did not recognize any class distinction. But by now the tribal community has been clearly divided into 4 classes. Civil and criminal law was administered by the royal agents. Although the brahmanical law books took into account the social status of different Varna in framing their laws, they did not ignore the customs of the non-Vedic tribal groups.

Source: NCERT Ancient India Class XI – R S Sharma; Chapter 13

Q.10) Consider the following statements regarding the asteroid 'Ryugu':

1. This asteroid is found in the main asteroid belt, located between the orbits of Mars and Jupiter.
2. NASA launched a spacecraft 'Hayabusa2' to collect samples from the asteroid Ryugu.
3. It is identified as a 'potentially hazardous asteroid' by NASA.

Which of the statements given above is/ are correct?

- a) 1 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Asteroids are the rocky objects **revolving around the sun** and are too small to be called as planets. Most of the asteroids can be found orbiting the Sun between Mars and Jupiter within the main asteroid belt. Asteroids range in size from **Vesta – the largest at about 329 miles (530 kilometers) in diameter – to bodies that are less than 33 feet (10 meters) across**. Asteroid Ryugu is a small diamond-shape space rock. **Statement 1 is incorrect:** Ryugu orbits the Sun **between the orbits of the Earth and the Mars**. It does not lie in the main asteroid belt, which is located roughly between the orbits of the Mars and the Jupiter.

Statement 2 is incorrect: **Japanese Space Agency- JAXA launched the asteroid sample return mission Hayabusa2**. The sample reached the Earth in 2020, which according to scientists may hold answers to the origin of the Earth.

Statement 3 is correct: Ryugu, a near Earth asteroid, which means its **orbit is close to the Earth's orbit**. Hence, it is classified as a **"potentially hazardous"** object by the NASA. Though, the body **poses no imminent danger** to the Earth, the complex forces acting on asteroids as they loop around the sun make it difficult to accurately predict their trajectory more than a few decades into the future. For example, when it's exposed to the sun, an asteroid can release volatile compounds like water, and this outgassing can produce thrust that subtly changes its orbit.

Knowledge Base: NASA has also launched its mission- **OSIRIS Rex**, which is supposed to return samples from the **asteroid Bennu**. Bennu is also a near-Earth object. This is the **second such mission**, after the Hayabusa2 mission of JAXA.

Asteroids are classified into 3 categories:

- 1) **Near-Earth asteroids:** their orbits pass close by that of Earth. Asteroids which actually cross Earth's orbit are called as Earth-crossers.
- 2) **Main Asteroid Belts:** These objects revolve within the asteroid between Mars and Jupiter.
- 3) **Trojans:** These asteroids are located at the Lagrange points (L4 and L5), where gravitational pull between the sun and the planet are balanced.

Source: <https://www.wired.com/story/for-the-second-time-ever-an-asteroid-sample-returns-to-earth/>

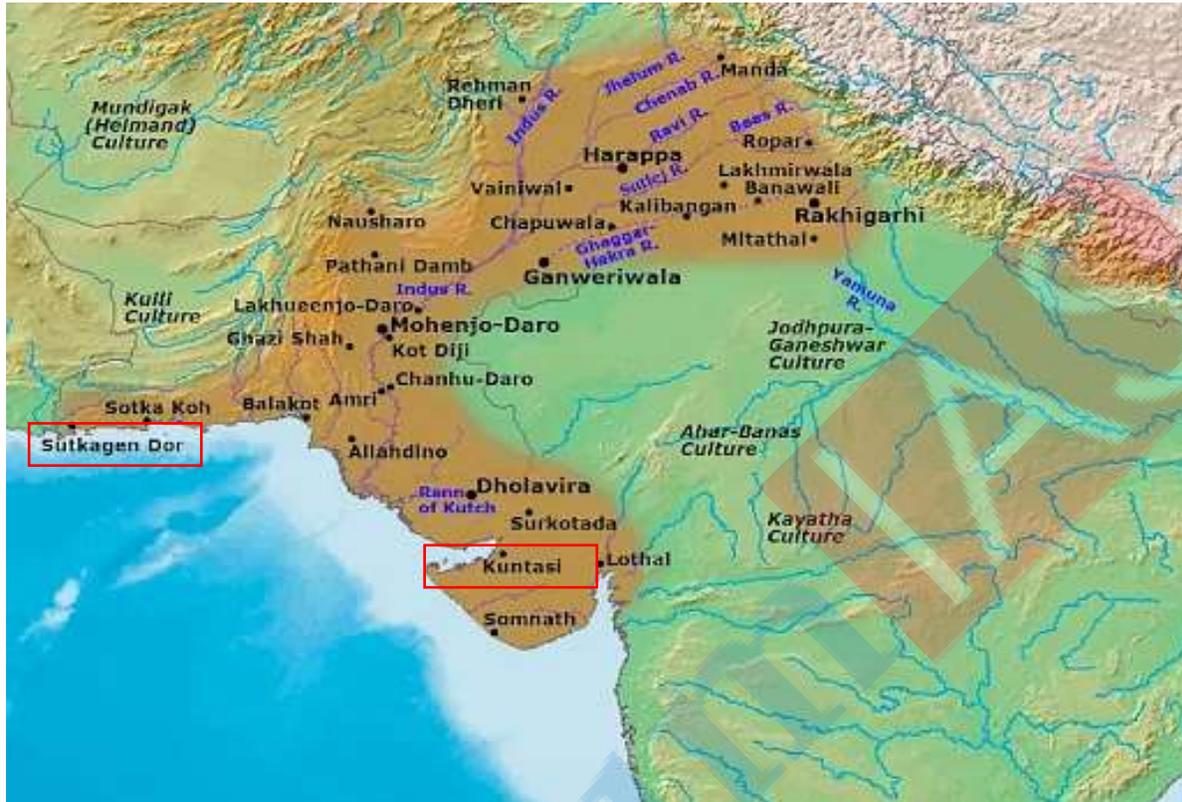

Q.11) Sutkagendor and Kuntasi are well known Harappan sites famous for which of the following?

- a) Copper mines
- b) Fire cult practices
- c) Gold mines
- d) Port facilities

Ans) d

Exp) Option d is the correct answer.

Harappa Civilization is known to be 4,700 years old civilization in the subcontinent, discovered in 1920. Ports and port cities played an important role in the economy of the Indus Valley Civilization:

Sutkagendor was one of the port cities of the Indus Valley Civilization. This Harappan site is located in the Makran district of Balochistan (Pakistan), on the banks of Dast river. As of now, it is the westernmost site of the Indus Valley Civilization that is known. Like most of the Harappan sites, Sutkagendor also has a citadel and defensive wall which is about 30 feet wide. **Archaeologists believe that this Harappan site would have been on the trade route from Lothal to Mesopotamia.**

Kuntasi is an archaeological site which is identified as a port belonging to the Indus Valley civilization. This site is located in Morbi District in Gujarat state and on the right bank of Phulki River.

Source: <https://www.indiatoday.in/magazine/heritage/story/19900331-excavations-throw-new-light-on-harappan-period-813812-1990-03-30>

Q.12) With reference to the history of ancient India, consider the following pairs.

Buddhist Councils	Significance
1. 1st Buddhist Council	Division of Buddhism into Mahasanghika and Sarvastivadins
2. 2nd Buddhist Council	Codified Sarvastivadin doctrines into Mahavibhasa.
3. 3rd Buddhist Council	Compilation of philosophical teachings of Buddha in Abhidhamma Pitaka

Which of the pairs given above are **incorrectly** matched?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Buddhist Councils marked important turning points in the early Buddhism. These councils resulted in sectarian clashes and resulted in the two major schools, Theravada and Mahayana. In total, 4 major Buddhist councils were convened.

Pair 1 is incorrect. The Division of Buddhism into Mahasanghika and Sarvastivadins was done in the 2nd Buddhist council.

According to tradition shortly after the death of the Buddha the first Buddhist Council was held in 483 BCE in the Saptaparni cave near Rajagriha. Mahakassapa presided over the assembly. All the teachings of the Buddha were divided into two Pitakas, namely: Vinaya Pitaka and Sutta Pitaka. The text of Vinaya Pitaka was established under the leadership of Upali and that of Sutta Pitaka was settled under the leadership of Ananda.

Pair 2 is incorrect. Codification of Sarvastivadin doctrines into Mahavibhassa was done in the 4th Buddhist Council.

The second Council was held at Vaishali in 383 BCE. The monks of Vaishali and Pataliputra had accepted certain rules which were declared as contrary to the teaching of the Buddha by the monks of Kaushambi and Avanti. The Council failed to bring about a compromise between the two opposing groups. **Hence the council ended in a permanent split in the Buddhist order into Sthaviravadins and Mahasangikas.** The former upheld the orthodox Vinaya Pitaka while the latter favoured the new rules and their further relaxation. Thus, the Buddhist order was split into two schools namely:

- 1) Sthaviravadins, and
- 2) Mahasangikas

The Sthaviravadins followed strict monastic life and rigid disciplinary laws as originally prescribed. The group which followed modified disciplinary rules was called the Mahasangikas.

Pair 3 is correct. The third Council was held at Pataliputra during the reign of Ashoka under the chairmanship of Moggaliputta Tissa. **In this Council the philosophical interpretations of the doctrines of the Buddha were collected into the third Pitaka called Abhidhamma Pitaka.** An attempt was made in this Council to free the Buddhist order from the dissidents and innovations. Heretical monks numbering sixty thousand were expelled from the order. The true canonical literature was defined and authoritatively settled to eliminate all disruptive tendencies.

Knowledge Base: The **fourth Council** was held during the reign of Kanishka in Kashmir. This council was a gathering of Hinayanists of north India. It compiled three commentaries (Vibhashas) of the three Pitakas. It decided certain controversial questions of differences that arose between the Sarvastivada teachers of Kashmir and Gandhara.

Mahayana developed after the fourth Buddhist Council. In opposition to the Hinayana group, which believed in orthodox teachings of the Buddha, those who accepted the new ideas belonged to the Mahayana sect. They made images of the Buddha and worshipped it as God. In the first century CE, during the period of Kanishka, some doctrinal changes were made.

Source: NIOS- Jainism, Buddhism and Ajivikas; Chapter 12

Q.13) Consider the following statements regarding religious beliefs and practices followed during the Indus Valley Civilisation (IVC):

1. Pipal tree was considered sacred by the people of the IVC.
2. Indra, Agni and Soma were the most important gods during the IVC.
3. People from the IVC had faith in the life after death.

Which of the statements given below is/are correct?

- a) 3 only
- b) 1 and 3 only
- c) 1 and 2 only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

The numerous seals and figurines discovered in the excavations carried out at various sites connected with the Harappan culture point out to the religious beliefs of the Indus Valley people. Few of the important religious beliefs and practices are discussed below:

Statement 1 is correct: The Harappans seem to have worshipped tree spirits, several seals depict the Pipal tree. In many cases a figure is shown looking through the branches. Scholars believe that this represents the tree-spirit. In many cases worshippers are shown standing in front of the tree. In many other cases a tiger or some other animal is shown in front of the tree.

Statement 2 is incorrect: Religion of the Indus Valley Civilization ("IVC") is a debated topic and remains a matter of speculation. If the Indus script is ever deciphered, this may provide clearer evidence. From the excavated archaeological sources, it was assumed that mother goddess and a male deity (believed to be proto-shiva) were the important gods of the IVC. Apart from them, Harappan people also worshipped animals and trees. **Indra, Agni, and Soma were the important gods during the Rigvedic period.**

Statement 3 is correct: The people of Indus Valley disposed of their dead either by burial or by cremation. They buried their dead together with household pottery, ornaments and other articles of daily use. Even when they cremated the dead, they preserved the ashes of the bodies in clay urns. Both these practices show that **people believed in life after death.**

Source: Ancient India by R.S. Sharma,

http://indiansaga.com/history/religion_indusvalley.html

Q.14) Consider the following statements regarding the Later Vedic period:

1. People used iron tools for agricultural purposes during this period.
2. A new type of assembly called 'Vidhata' became prominent and powerful during this period.
3. The institution of 'gotra' appeared during the Later Vedic period.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1, 2 and 3
- d) 1 only

Ans) a

Exp) Option a is the correct answer.

The Later Vedic culture is dated to the period between 1000 BCE and 700–600 BCE. The Painted Grey Ware Culture of the Iron Age, which has been identified by archaeologists at many excavated sites, is associated with the Later Vedic culture. This period witnessed political, social, economic complexity and developments.

Statement 1 is correct: Archaeology has shown that iron began to be used around 1000 BC which is also the period of Later Vedic literature. The northern and eastern parts of India, to which the Aryans later migrated, was covered with thick rain forests which could not be cleared by copper or stone tools used by Rigvedic people. **The use of iron tools now helped later-Vedic people clear the dense rain forests in a more effective manner. Large tracts of forestland could be converted into cultivable pieces in relatively less time.** The iron plough could turn the soil from deeper portions making it more fertile.

Statement 2 is incorrect: In the Early Vedic Age tribal polities were dominant. The king was elected by the assemblies. In the Later Vedic period the assemblies became less important, **and the power of the king increased. The influence of assembly called vidhata disappeared**, while samiti and sabha continued in the period. The development of large kingdoms reduced the power of the assemblies.

Statement 3 is correct: The institution of gotra (literally meaning-cow pen) appeared during the later Vedic period. People practiced gotra exogamy (marrying outside the gotra). Gotra signified descent from a common ancestor and marriages could not take place between couples belonging to the same Gotra.

Q.15) Consider the following statements regarding Semi-Automated Offside Technology:

1. This technology was used for the first time in FIFA World Cup 2022, held in Qatar.
2. The onsite referee is freed from referring an 'offside' call decision to the Video Assistant Referee (VAR) room.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

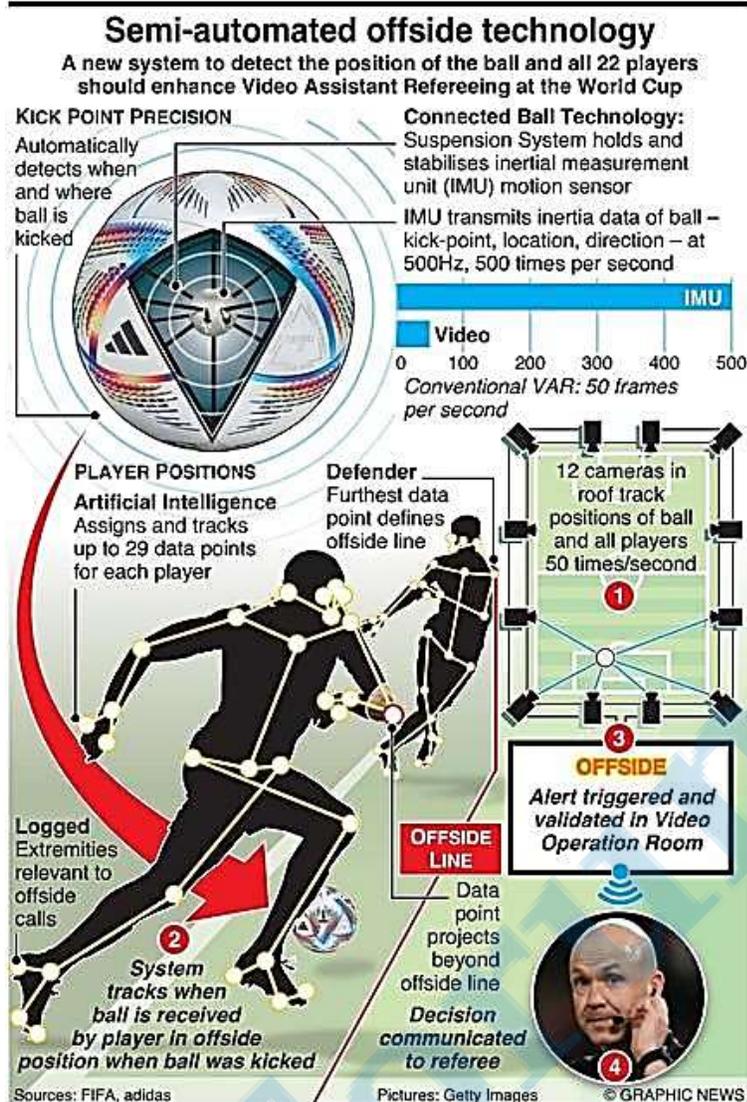

Exp) Option c is the correct answer.

In the sport of football, the **decisions pertaining to offside have remained a controversial issue**. With the help of Semi-Automated Offside Technology (SAOT) **refereeing decisions were made more objective**.

Statement 1 is correct: This technology was **used for the first time in FIFA World Cup 2022**. Periodic innovations had been made in the FIFA tournaments. For example, introduction of the **goal-line technology in 2014 (Brazil) and the Video Assistant Referee (VAR) in 2018 (Russia)**.

Statement 2 is correct: Earlier, the onsite referee had to refer a controversial 'offside' call decision to the VAR room. **In SAOT, alert automatically triggers to the VAR room**. This saves time by making quick and more accurate decisions.

Knowledge Base: SAOT in detail:

(Source: The Hindu)

Source: <https://sportstar.thehindu.com/football/fifa-world-cup/news/qatar-2022-new-features-semi-automatic-offside-technology-saot-in-soccer-world-cup/article66081895.ece>

Q.16) Which of the following is **incorrect** regarding the Mauryan polity and administration?

- The administration was highly centralized and there was royal absolutism in the empire.
- Princes from the royal family were appointed as the head of the provinces.
- The taking of Census was done during the Mauryan period.
- The state controlled almost all the economic activities under its realm.

Ans) a

Exp) Option a is the correct answer.

The ascendancy of the Mauryas had resulted in the triumph of monarchy in India. Other systems like republics and oligarchies that were prevalent in the pre-Mauryan India had collapsed. This marks the beginning of the centralized system in India.

Statement a is incorrect. There was no royal absolutism as Kautilya the foremost political theorist of ancient India supported the monarchical form of government, but he did not stand for royal absolutism. He advocated that the king should take the advice of his ministry in running the administration. Therefore, a council of ministers called Mantriparishad assisted the king in administration.

Statement b is correct. The Mauryan Empire was divided into four provinces with their capitals at Taxila, Ujjain, Suvarnagiri and Kalinga. **The provincial governors were mostly appointed from the members of royal family.** They were responsible the maintenance of law and order and collection of taxes for the empire.

Statement c is correct. The taking of Census was regular during the Mauryan period. The village officials were to number the people along with other details like their caste and occupation. They were also to count the animals in each house. The census in the towns was taken by municipal officials to track the movement of population both foreign and indigenous. The data collected were cross checked by the spies. The Census appears to be a permanent institution in the Mauryan administration.

Statement d is correct. **The economy was mostly state led and there was huge interference of royals in the economy. There were most than 27 officers for the economic purpose.** The state brought new land under cultivation with the aid of cultivators and Shudra laborers. State collected huge taxes from people to feed the large army. In times of emergency, peasants were compelled to raise more crops. Tolls were also levied on commodities brought to town for sale, and they were collected at the gate. Moreover, the state enjoyed monopoly in mining, sale of liquor, manufacture of arms, etc.

Tamil Nadu SCERT Higher Secondar First Year Volume I, Chapter 4: Emergence of State and Empire

Q.17) Consider the following statements regarding the Varna system during Vedic Age:

1. Upanayana ceremony was restricted to the Brahmins only.
2. First mention of Varna is found in Purusha Sukta hymn of Rigveda.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Varna means **to choose**, and it also means **colour**. The emergence of a **four-fold varna system** based on birth is a feature of later Vedic age. The **Dharmasutras and Dharmashastras** also contained rules about the ideal **occupations of the four categories or varnas**. **Brahmans, Kshatriyas, Vaishyas were known as Dwij meaning twice born**, 1st at time of birth and 2nd after Sanskar.

Statement 1 is incorrect: Upanayana is a **symbolic ceremony that marks an individual's entrance to Hinduism**. As per texts, the Upanayana ceremony was restricted to the **Trivarnikas or the upper castes of Brahmins, Kshatriyas and Vaisyas (and not only to Brahmins)**. Sudras were not allowed to undergo this Upanayana ceremony. So, statement 1 is incorrect.

Statement 2 is correct: The **first mention** of the Varna System can be seen in the hymn **Purush Sukta**. They are found in the Xth Mandala of **Rig Veda**, latest to be added to the text.

Q.18) Consider the following statements with respect to the ancient Vajji state:

1. It was ruled by not one but many rulers in the sangha form.
2. Women were usually not allowed to participate in public assemblies.
3. Local shrines were maintained in both towns and villages.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Vajji was one of the sixteen mahajanapadas of ancient India. It was a confederacy of eight or nine clans. The most powerful dynasty was that of the Lichchhavis with their capital at Vaishali.

Statement 1 is correct. Vajji was under a different form of government, known as **gana or sangha**. In a gana or a sangha there were **not one, but many rulers**. Sometimes, even thousands of men ruled together, each one was known as a raja. These rajas performed rituals together. Both **Buddha and Mahavira belonged to ganas or sanghas**.

Statement 2 is correct. Various rulers met in assemblies, and decided what had to be done and how, through discussion and debate. For example, if they were attacked by an enemy, they met to discuss what should be done to meet the threat. However, **women, dasas and kammakaras could not participate in these assemblies**. Some of the most vivid descriptions of life in the sanghas can be found in Buddhist books.

Statement 3 is correct. **Chaityas (local shrines)** were indeed **maintained in both towns and villages**. Wise saints who followed different beliefs were respected and allowed to enter and leave the country freely.

Knowledge Base:

Other features of Vajji state:

- 1) They held full and frequent public assemblies.
- 2) They followed established rules.
- 3) They respected, supported and listened to elders.
- 4) Vajji women were not held by force or captured.

History, NCERT VI, Chapter-6, Pg. 61-62

Q.19) With reference to Judiciary in Mauryan Empire, which of the following statements is/are correct?

1. The kantakasodhana courts were to clear the anti-social elements from the society.
2. The dharmasthiya courts mostly dealt with criminal laws relating to robbery and murder.
3. The penalties in the Mauryan administration were based on hierarchy of varnas.

Select the correct answer using the code given below:

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Mauryan administration is famous in history for its judicial system. The Mauryan legal system was based on idealism and not reformism. The king was the highest judicial officer. Gram Sabha was the lowest judicial unit. Above it were courts at sangrahan, dronamukha and janapada levels.

Statement 1 is correct. Kantakasodhana courts were presided over by three judges and three amatyas. **The main purpose of these courts was to clear the society of anti-social elements and various types of crimes, and it functioned more like the modern police,** and relied on a network of spies for information about such antisocial activities.

Statement 2 is incorrect. **The dharmasthiya courts mostly dealt with civil law relating to marriage, inheritance and other aspects of civil life.** The courts were presided over by three judges well versed in sacred laws and three **amatyas** (secretaries). Dharmasthiya also decided personal disputes such as those over stridhana (wife's wealth) and marriage.

Statement 3 is correct. The Mauryan legal system flowed from four sources: (i) dharma (following accepted principles); (ii) vyavahara (contemporary legal codes); (iii) charitra (customs); and (iv) rajasasana (the royal decree). **According to Arthashastra, penalties in the Mauryan period were based on varna hierarchies. It means that for the same kind of offence a Brahman was punished much less severely than a Shudra.**

Knowledge Base:

Kautilya mentions the existence of both civil and criminal courts. The chief justice of the Supreme Court at the capital was called Dharmasthikarin. There were also subordinate courts at the provincial capitals and districts under Amatyas. Different kinds of punishment such as fines, imprisonment, mutilation and death were given to the offenders.

Q.20) Consider the following statements regarding Generative Artificial Intelligence (Gen AI):

1. It can create a wide variety of data by learning patterns from existing data.
2. It is capable of producing content that mimics human creativity.
3. It can be helpful in upscaling of low-resolution images to high-resolution images.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The recent buzz around generative AI has been driven by the simplicity of new user interfaces for creating high-quality text, graphics and videos in a matter of seconds. The new wave of generative AI systems, such as ChatGPT, have the potential to transform entire industries.

Statement 1 is correct: Generative AI (GenAI) is a type of Artificial Intelligence that can create a wide variety of data, such as images, videos, audio, text, and 3D models. It does this by learning patterns from existing data, then using this knowledge to generate new and unique outputs.

Statement 2 is correct: **GenAI is capable of producing highly realistic and complex content that mimics human creativity,** making it a valuable tool for many industries such as gaming, entertainment, and product design. Recent breakthroughs in the field, such as GPT (Generative Pre-trained Transformer) and Midjourney, have significantly advanced the capabilities of GenAI. These advancements have opened up new possibilities for using GenAI to solve complex problems, create art, and even assist in scientific research.

Statement 3 is correct: With such significant benefits, Generative AI can be used for distinct purposes such as-

- 1) Generative AI avatars have been used to protect the identity of interviewees in news reports about the

persecution of LGBTQ people in Russia.

- 2) **It helps in intelligent upscaling of low-resolution images to high-resolution images.**
- 3) It enhances old images and old movies by upscaling them to 4K and beyond, which generates 60 frames per second instead of 23 or less, and removes noise, adds colors and makes it sharp.
- 4) Generative AI can render any computer-generated voice into one that truly sounds like human voice. And so on.

Source: <https://analyticsindiamag.com/pros-and-cons-of-generative-ai/#:~:text=While%20generative%20AI%20coding%20can,in%20unique%20and%20innovative%20ways.https://generativeai.net/>

Q.21) Consider the following pairs of Vedic name and present name of rivers:

Vedic name of the river	Present name of the river
1. Vitasta	Ravi
2. Purushni	Jhelum
3. Sutudri	Satluj
4. Drishdvati	Ghaggar

How many pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) All four pairs

Ans) b

Exp) Option b is the correct answer.

Rivers play a prominent part in the hymns of the Rigveda. The Vedic land is described as a **land of the seven rivers (Sapta sindhu)** flowing into the ocean. The **Nadisukta hymn** in the Rig Veda is a hymn of praise for rivers.

Pair 1 is incorrect: In Rigveda River Jhelum (and not Ravi) was called Vitasta (derived from the Sanskrit name Vyath). The present name Jhelum River has been adopted from the city of Jhelum. The name was brought to Kashmir by European travelers and found its way in official use. The **river** flows through Srinagar and Wular lake and enters Pakistan through a deep narrow gorge. So, pair 1 is incorrect.

Pair 2 is incorrect: The Ravi River was known as Purushni in the Vedic period. The river Ravi is a **transboundary river** that connects northwest India and East Pakistan. This is one of the six rivers of the **Indus basin**. The Ravi waters are **assigned to India under the Indus Waters Treaties**. So, pair 2 is incorrect.

Pair 3 is correct: Sutudri literally means that which **flows very fast**. Sutudri is a river of the Vedic times. It is the easternmost river flowing in Punjab. During post-Vedic period the name got changed to Satadru. **It has been identified with the modern Sutlej River.**

Pair 4 is correct: The River Ghaggar was known by the name Drishadvati in the Vedic period. It **was the main tributary of river Saraswati**. According to Manusmriti the Rishis composed the Vedas and other Sanskrit texts at the confluence of the Saraswati and Drishadvati rivers. The **main river Saraswati is represented by River Ghaggar** in present times.

Q.22) Consider the following statements with reference to the socio-economic conditions during the Mauryan Empire in ancient India:

1. There was a widespread use of metallic money for transactions.
2. The salaries of the officials were usually paid in cash.
3. Some artisans were exempt from payment of taxes because they rendered compulsory labour services to the State.

Which of the statements given above is/are correct?

- a) 3 only
- b) 2 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Mauryan economy was very developed for its time. The existence of a stable centralized government and the unity of the sub-continent made by the emperor resulted in a fairly advanced trade, which in turn led to improved socio-economic conditions.

Statement 1 is correct: An **important aspect of the urban economy** during Mauryan period was the **widespread use of metallic money for transactions** in cash. **Use of coinage** had become **prevalent in the 6th century BCE**, but now **due to development of commerce, coins** had become a **common occurrence**.

Statement 2 is correct: The cash was not only used in the trade even **the salaries of the government officials were paid in cash**. In fact costly salaries for soldiers and government officials ended up bankrupting the central treasury and became one of the key cause of downfall of the Mauryan Empire.

Statement 3 is correct: The **artisans** during the Mauryan period were **organized along guild lines**. Mauryan State **did not directly interfere with guilds, however** it did **take control of production and distribution** in some cases. The state did this **by directly employing some of the artisans** like armourers, shipbuilders, stone builders etc. **They were exempt from payment of taxes because they rendered compulsory labour services to the State**. Other artisans like spinners, weavers, miners etc. who worked for the State were taxed.

Q.23) Which of the following statements about Vedic texts are correct?

1. The Rigveda contains hymns dedicated to various gods and goddesses.
2. The Yajurveda contains instructions on performing rituals and sacrifices.
3. The Samaveda is mainly composed of musical chants used during religious ceremonies.
4. The Atharvaveda is a collection of spells, charms, and prayers to ward off evil and diseases.

Select the correct answer using the code given below:

- a) 2 and 4 only
- b) 1 and 3 only
- c) 1, 2 and 3 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

The Vedic literature is a collection of ancient texts that are considered to be the foundation of Hinduism. The word 'Veda' means knowledge or wisdom, and the Vedic literature is believed to contain the highest and most sacred knowledge that has been revealed to humanity.

Statement 1 is correct: The Rig Veda is the oldest of the four and consists of **1028 hymns or mantras**. These hymns were composed in Sanskrit and were primarily sung **in praise of various deities**, such as Agni, Indra, and Soma.

Statement 2 is correct: The Yajurveda consists of detailed **instructions** on the performance of **rituals and sacrifices**. It includes the **mantras and procedures** that were to be followed by the priests and the people who performed these rituals.

Statement 3 is correct: The Sama Veda is a collection of melodies and chants that were used during the performance of sacrifices. The Sama Veda is believed to be the origin of Indian classical music, as it contains the basic principles of melody, rhythm, and harmony.

Statement 4 is correct: The Atharvaveda is a collection of **spells, charms, prayers and incantations to ward off evils and diseases**.

Source: Tamil Nadu History textbook pg 28

Q.24) Which of the following factors contributed to the occurrence of the Iranian invasion of the Indian subcontinent in the 6th century BCE?

1. The presence of several small principalities that were unable to unify and mount a coordinated defense.
2. The wealth of Indian subcontinent made it an attractive target for plunder and conquest.
3. The existence of passes in the Hindukush mountains provided easy passage to the invading forces.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

During the first half of the sixth century B.C., north-west India was different from north-east India, where smaller principalities and republics merged with the Magadhan empire.

Statement 1 is correct: In north-west India, several small principalities like those of Kambojas, Gandharas, and Madras fought with each other, without any powerful kingdom to unite them into a single organized kingdom. **These small principalities could not offer stiff resistance to the invasion.** Unlike in North-east India, there was no strong empire like Magadha in North-west India to offer stiff resistance to Iranian Invasion.

Statement 2 is correct: The Indian subcontinent was known for its **rich resources, including gold, silver, and precious stones**. This made it an attractive **target for plunder and conquest**, and the Iranians were able to take advantage of this wealth.

Statement 3 is correct: The north-west region of India was also **accessible through the passes in the Hindukush mountains**. The pass could be easily crossed by the invading forces and was a significant factor in the success of the Iranian invasion of the Indian subcontinent.

Source: Ancient India by RS Sharma pg 75

Q.25) Which of the following statements best describes the term ‘Denisova,’ that was seen in the news recently?

- a) Ancient technique of water harvesting practiced in Mesopotamia.
- b) They are an extinct species of Hominid and a close relative to modern humans.
- c) Crater on the surface of the Mars where traces of water have been found.
- d) A new galaxy discovered by the Hubble telescope.

Ans) b

Exp) Option b is the correct answer.

The Nobel Prizes 2022 for medicine or physiology was awarded to Swedish geneticist Svante Paabo. He was given the award for his discoveries concerning the genomes of extinct hominins and human evolution.

Option b is correct: Svante Paabo also made the sensational discovery of a previously unknown hominin, Denisova. The Denisovans are an extinct species of Hominid and a close relative to modern humans. In 2008, a 40,000-year-old fragment from a finger bone was discovered in the Denisova cave in the southern part of Siberia. The bone contained exceptionally well-preserved DNA. The DNA sequence was unique when compared to all known sequences from Neanderthals and present-day humans. Comparisons with sequences from contemporary humans showed that **gene flow had also occurred between Denisova and Homo sapiens.**

Source: <https://www.nobelprize.org/prizes/medicine/2022/press-release/>
<https://www.livescience.com/denisovans-extinct-human-relative>

Q.26) Arrange the following events associated with ancient India in the correct chronological order:

1. Udayin laid the foundation of the new capital at Pataliputra
2. The Nanda dynasty was established by Mahapadma Nanda.
3. Shishunaga dynasty annexed the kingdom of Avanti.
4. Invasion of north-west India by Alexander the Great

Select the correct answer using the code given below:

- a) 1-2-3-4
- b) 2-1-3-4
- c) 1-3-2-4
- d) 2-3-1-4

Ans) c

Exp) Option c is the correct answer.

The correct Chronological order is

Event 1: The immediate successor of Ajatasatru was Udayin, a king of the Magadha empire who ruled from around 460 BCE to 440 BCE. **He laid the foundation of the new capital at pataliputra** situated at the confluence of the two river, the Ganges and the Son.

Event 3: The Shishunaga dynasty ruled over Magadha from 413 BCE to 345 BCE. **The founder of the dynasty, Shisunga, is said to have defeated the king of Avanti and made it a part of the Magadhan Empire.**

Event 2: Mahapadma Nanda conquered the Shishunaga dynasty in Magadha and established the Nanda dynasty in **345 BCE**. It lasted upto 321 BC. Mahapadma Nanda, is thought to have come from a low-caste background.

Event 4: The **invasion of north-west India by Alexander** the Great and the defeat of King Porus happened in **326 BCE**, which makes it the last event in the chronology.

Source: Tamil Nadu History text book pg 49-55

Q.27) With respect to women's condition in Ancient India, consider the following statements:

1. Women were not allowed to join Buddhist Sangha.
2. There was no female Upanishadic thinker in Ancient India.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

Statement 1 is incorrect. The rules made for the Buddhist sangha were written down in a book called the Vinaya Pitaka. **All men, women and children could join the sangha.** However, children had to take the permission of their parents and slaves of their masters. Those who worked for the king had to take his permission and debtors that of creditors. Women had to take their husbands' permission.

Statement 2 is incorrect. Most Upanishadic thinkers were men, especially brahmins and raja. **But there is mention of women thinkers, such as Gargi,** who was famous for her learning, and participated in debates held in royal courts.

Source: Class 6th History NCERT, Chapter 7 (Our Past), Page 68, Page 128, Page 70

Q.28) Which of the following was/were the causes for the fall of the Mauryan empire?

1. The enormous expenditure on the army and payment to bureaucracy created financial crisis for the empire.
2. Maurya's neglected the North West frontier.
3. Oppressive rule in the provinces.

Select the correct answer using the code given below:

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: During Mauryan age huge expenditure was done on maintaining army and bureaucracy. Moreover, Ashoka during his reign made large grants to the Buddhist monks which made the royal treasury empty. The Mauryan kings who succeeded Ashoka faced the financial crunch. In the last they had to melt the images of gold.

Statement 2 is correct: Ashoka was so busy in carrying out religious activities that he seldom paid attention to north-west frontier of Mauryan Empire. The Greeks took advantage of this and set up a kingdom in north Afghanistan which was known as Bactria. This was followed by a series of foreign invasion which weakened the empire.

Statement 3 is correct: The provincial rulers in Magadhan Empire were often corrupt and oppressive. This led to frequent rebellions against the empire. During the reign of Bindusara, the citizens of Taxila complained against the misrule of wicked bureaucrats. Although Bindusara and Ashoka took measures to control the bureaucrats, this failed to check the oppression in provinces.

Source: class 11th.ancient India by RS Sharma.

Q.29) Consider the following statements about the impact of Alexander's invasion on India.

1. It led to direct trade contacts between the India and Greeks.
2. It aided Chandragupta Maurya to expand his empire in the North-west region of the subcontinent.
3. It gave rise to a new school of art in the North-west called as Gandhara school of art.

Which of the above statements is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The invasion of Alexander the Great during the reign of Dhana Nanda is a watershed moment in the Indian history. It marked the beginning of the interaction between India and the West, which spanned many centuries to follow.

Statement 1 is correct: Alexander's invasion led to the establishment of Greek Satrapies in the north-western region of the Indian subcontinent. This led to **opening up of trade routes** with the West which facilitated the movement of Greek merchants and craftsman to India.

Statement 2 is correct: Alexander's death on his way back home led to a **void in the north-west**, facilitating the **accession of Chandragupta Maurya** to the throne of Magadha. It also helped him to **conquer the numerous small chiefdoms in the north-west** and bring the region under his empire.

Statement 3 is correct: Gandhara is the ancient name of a region in northwest Pakistan. In 330 B.C., Alexander the Great conquered this region and, together with the Indo-Greek kings that succeeded him, introduced classical traditions that became an important part of Gandhara school of art.

Q.30) Which of the following are the space missions related to the exploration of Mars?

1. Tianwen-1 Mission
2. Hope Mission
3. Beresheet 2 Mission
4. Cassini Mission

Which of the options given below is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1, 2, and 3 only
- d) 2, 3, and 4 only

Ans) a

Exp) Option a is the correct answer.

There are various mission to Mars by various countries. Some of the examples of the missions to Mars are as follows: Tianwen mission of china, Hope mission of UAE, MOM mission of India, Viking mission, Mars Pathfinder mission of USA, etc.

Statement 1 is correct: **Tianwen-I is China's first Mars mission, consisting of an orbiter and a rover named Zhurong.** It entered Mars orbit in February 2021 and Zhurong landed on May 14, 2021. Before Zhurong only NASA has successfully landed and operated spacecraft on Mars.

Statement 2 is correct: The **Hope Mars Mission**, also called the Emirates Mars Mission, is the **first uncrewed, interplanetary satellite spearheaded by the United Arab Emirates (UAE).** In fact, the Hope satellite is the first planetary science mission led by an Arab-Islamic country. The Hope spacecraft was launched successfully on July 19, 2020 aboard a Japanese rocket and arrived successfully in orbit around Mars on Feb. 9, 2021.

Statement 3 is incorrect: **Israel launched the Beresheet 2 mission, which aims to land an unmanned craft on the moon in 2024.** It is a private mission to the Moon by Israeli non-profit SpaceIL organisation.

Statement 4 is incorrect: **Cassini mission is a space-research mission by NASA, the European Space Agency, and the Italian Space Agency to send a space probe to study the planet Saturn. Cassini mission was launched in 1997, flying past Venus and Jupiter on its way to Saturn.** It arrived in orbit of saturn in 2004. Cassini was orbiting Saturn for 13 years, since 2004 to 2017.

Q.31) Consider the following statements regarding coins during the Northern Black Polished Ware (NBPW) culture:

1. The coins made of metal can be seen during this phase.
2. The coins were punch marked with marks of several natural figurines.
3. The coins were used for paying wages.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Northern Black Polished Ware (NBPW) is an urban Iron Age of the Indian Subcontinent, lasting c. 700–200 BCE. It developed beginning around 700 BCE, in the late Vedic period, and peaked from c. 500–300 BCE, coinciding with the emergence of 16 great states or Mahajanapada in Northern India, and the subsequent rise of the Mauryan Empire.

Statement 1 is correct: During NBPW phase, coins made of metal appear. The coins made during this period were largely made of silver (and not that of gold) along with a few made from copper.

Statement 2 is correct: The coins of this period are called as punch-marked coins as pieces of these metals were punched with certain marks such as hill, trees, fish, bull, elephant, crescent, etc. The earliest hordes of these coins have been largely found in eastern Uttar Pradesh and Magadha.

Statement 3 is correct: The Pali texts indicate plentiful use of money and show that wages and prices were paid in it. The use of money had become so universal that even the prices of dead mouse was estimated in it.

Source: Old NCERT, R. S Sharma, p.g. 80

Q.32) The Pali texts from the age of Buddha give descriptions about the three types of villages based on their typical characteristic features. In this context, consider the following pairs:

Type of village	Characteristics
1. Typical Village	It was inhabited by several castes and communities.
2. Suburban Village	It was a typical craft village which also served as a market.
3. Border villages	It was mainly inhabited by fowlers and hunters.

How many pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) All three pairs
- d) None of the above

Ans) c

Exp) Option c is the correct answer.

The Pali texts mention several villages and towns and the pattern in which people inhabited these places. The Pali texts particularly speak about three types of villages.

Pair 1 is correct: The Typical village was inhabited by several castes and communities. Its number seems to have been largest compared to the other two types of villages. These villages were generally headed by a village headman called Bhojakas.

Pair 2 is correct: The suburban villages were in the nature of craft villages, for instance a carpenters village laying in the vicinity of Varanasi is known as Suburban village. These villages served as market for other villages and linked the towns with the countryside.

Pair 3 is correct: The Border villages were situated on the limits of the countryside which merged into the forests. People living in these villages were mainly fowlers and hunters, who led a backward life.

Source: Old NCERT, R. S Sharma, p.g. 80–81

Q.33) With reference to administration in the Mauryan Empire, consider the following statements:

1. A well-knit system of espionage reported on the public, ministers, officers and foreign kings.
2. The Mauryan Empire was divided into districts called as 'Tirtha'.

Which of the statements given above is/ are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: The Mauryan empire was probably the first empire in Ancient India to employ a **vast and well trained network of spies to aid the king in smooth functioning and rule** over such a vast empire. There were spies to report on the **general mood of the public so that any rebellion may be nipped early on.** Spies also worked in the **households of officials and ministers as barber, cook, etc and reported any corruption or treason** to the king. Lastly spies were also **placed in the courts of foreign kings so that any attack or plot may be preempted.**

Statement 2 is incorrect: **Tirtha** were the **most important and high-ranking officials of the Mauryan empire** like the **Mantrin** (ministers like Sannidhatri, Samaharta, Dauvarika, etc), **Purohita** (royal/ chief priest), **Senapati** (army commander in chief), **Yuvaraja** (crown prince) etc. According to Arthashastra they were paid in cash (*pana* - coin).

Source: Old NCERT Class 11th, Ancient India by RS Sharma, Ch-14

Q.34) Consider the following statements with reference to Jorwe culture:

1. The Pravara–Godavari valleys is the nuclear zone of this Jorwe culture.
2. Daimabad is the largest excavated Jorwe site in the Tapi valley.
3. Traces of a mud fortification wall were found at the Jorwe culture.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Jorwe culture was a Chalcolithic archaeological culture which existed in large areas of what is now Maharashtra state in Western India, and also reached north into the Malwa region of Madhya Pradesh.

Statement 1 is correct. The Jorwe culture was first discovered at the site of Jorwe, and was later found to have extended over a large area, covering practically the **whole of modern Maharashtra**, except the coastal Konkan district. The **Pravara–Godavari valleys** seem to have been the **nuclear zone of this culture**. The peripheral zone extended up to the Tapi river in the north and the Krishna in the south. The main excavated sites are Daimabad, Inamgaon, Theur, Songaon, Chandoli, Bahal, Prakash, Jorwe, and Nevasa.

Statement 2 is incorrect. **Prakash is the largest Jorwe site in the Tapi valley, Daimabad is the largest Jorwe site in Godavari valley**, and Inamgaon in the largest Jorwe site in Bhima valley. All three settlements were 20 ha or more in size. These large sites represented permanent agricultural villages. Jorwe, Bahal, and Nevasa are medium-sized settlements. The average Jorwe culture settlements were, however, much smaller—usually 1–2 ha.

Statement 3 is correct. At Daimabad, there **were traces of a mud fortification wall with bastions**. The excavators identified the houses of a butcher, lime maker, potter, bead maker, and merchant. There was an elliptical structure with approach paths plastered with cow dung; clusters of pots seem to have contained offerings including copper objects, shaped stones, and tool hafts made of cattle bones. The artifacts included microliths, copper objects, beads, and terracotta figurines. There was also a terracotta cylinder seal depicting a horse-drawn cart or chariot.

Source: A History of Ancient and Early Medieval India: From the Stone Age to the 12th Century by Upinder Singh. Chapter 5.

Q.35) Global Lighthouse Network, recently seen in news, is an initiative of which of the following international organizations?

- a) World Bank
- b) World Economic Forum
- c) International Monetary Fund
- d) United Nations Industrial Development Organization (UNIDO)

Ans) b

Exp) Option b is the correct answer.

The **World Economic Forum** recently announced the **addition of three factories and industrial sites, from India, to its Global Lighthouse Network**. The three manufacturers from India to be added in the network include **Cipla, Dr Reddy's Labs and Mondelez**.

Option b is correct: The Global Lighthouse Network is a World Economic Forum's initiative in collaboration with McKinsey & Company. The World Economic Forum's Shaping the Future of Advanced Manufacturing and Value Chains platform has set up the Global Lighthouse Network. **Global Lighthouse Network is a community of over 100 manufacturers that are showing leadership in applying Fourth Industrial Revolution technologies** such as artificial intelligence, 3D-printing and big data analytics in **modern Industries**.

Q.36) Which of the following statements are correct regarding the Mesolithic Period in India?

1. The Mesolithic period is characterized by the use of microlith tools.
2. Hunting, gathering and fishing were the means of subsistence for people during this period.
3. Bagor archaeological site is an important Mesolithic site in India.

Select the correct answer using the code below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1, 2 and 3
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

The Mesolithic period, which lasted from around 10,000 B.C. to 6,000 B.C., marks the transition between the Paleolithic and Neolithic Ages. Mesolithic sites have been found in various places including Langhani in Gujarat, Adamgarh in Madhya Pradesh, and parts of Rajasthan, Uttar Pradesh, and Bihar.

Statement 1 is correct: Use of microliths was a characteristic feature of the Mesolithic period.

Microliths are tiny stone artifacts, often no more than five centimeters in size, that were found in Mesolithic sites. Microliths were used for various purposes, including hunting, fishing, and gathering.

Statement 2 is correct: The use of bow and arrow also began during this period. Along with hunting and fishing, the people of this period also engaged in some plant gathering. This is to indicate that hunting, gathering and fishing were the primary means of subsistence for people.

Statement 3 is correct: Bagor is a site of late Mesolithic settlement in Northwestern India. The archeological site of Bagor is one of the largest Mesolithic sites discovered in India and is spread across an area of about 10,000 square meters. At Bagor and Tilwara the Mesolithic culture is represented by different types of microliths including backed points and blades, backed blades/points and truncations as well as triangular and trapezoidal geometrics.

Q.37) Consider the following statements about town planning in the Indus Valley Civilization.

1. The technology of using baked bricks for construction was not known during this period.
2. The citadel was usually built on an upraised mud brick platform.
3. The roads and streets were generally laid out in an approximate grid pattern.

Which of the statements given above is/are correct?

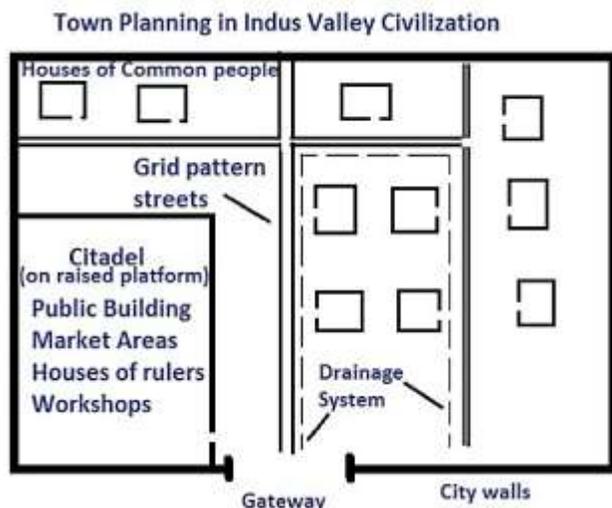

- a) 1, 2 and 3
- b) 1 and 3 only
- c) 2 only
- d) 2 and 3 only

Ans) d

Exp) Option d is the correct answer.

The most unique feature of the Harappan civilization was the development of urban centers. Harappa, Mohenjo-Daro, Dholavira, Lothal, etc. were some of the major towns during this period. The settlement is divided into two sections, one smaller but higher i.e., citadel and the other much larger but lower i.e., lower town.

Statement 1 is incorrect: The Harappans knew the art of brick making and used them extensively in their architectural setup. They used baked and unbaked bricks along with stones for construction. The houses were built of mud bricks while the drainages were built with burnt bricks. Bricks, whether sun-dried or baked, were of a standardized ratio, where the length and breadth were four times and twice the height respectively. Such bricks were used at all Harappan settlements.

Statement 2 is correct: The citadel was built on an upraised mud brick platform. Several buildings in the lower towns were also built on platforms which served as foundations for them. There was huge mobilization of labor for such building and platform constructions.

Statement 3 is correct: One of the most distinctive features of Harappan cities was the carefully planned drainage system. The roads and streets were laid out along an approximate “grid” pattern, intersecting at right angles. It implies that streets with drains were laid out first and then houses built along them.

Q.38) With reference to the Harappan script and seals, which of the following statement is **incorrect**?

- Harappan script has not been deciphered so far.
- Unlike Mesopotamian and Egyptian script, Harappan Script contained few words.
- Harappan Script were largely pictographic in nature.
- Harappan Script was developed from Mesopotamian and Egyptian Scripts.

Ans) d

Exp) Option d is the correct answer.

The Harappan invented the art of writing like the people of ancient Mesopotamia. Although the earliest specimen of Harappan script was noticed in 1853, but the complete script was discovered by 1923.

Statement a is correct: Harappan script has **not been deciphered till now**. Some try to connect the Harappan script with the Dravidian or Proto-Dravidian language, other connect with the Sanskrit language and still others with the Sumerian Language.

Statement b is correct: Unlike the Mesopotamians and Egyptian, the Harappans did **not write long inscriptions**. Most of the inscriptions were notably recorded on the seals **and contain only few words**. These seals may have been used by propertied people to mark and identify their private property.

Statement c is correct: The **Harappan scripts were mainly pictographic in nature and very few alphabets were used**. For instance, altogether, there are about 250-400 pictographs and in the form of letter and each letter stands for some sound, idea or object.

Statement d is incorrect: Attempts have been made to compare the **Harappan script with Egyptian and Mesopotamian script**. But, Harappan script is an indigenous product of the Indus Region, and it **does not show any connection** with the scripts developed in Western Asia.

Source: Ancient India, R.S. Sharma, Chapter the Harappan Civilisation

Q.39) Consider the following pairs of terms used in Vedic period and their meaning:

Term	Meaning
1. Goghna	Head of the village
2. Vrajapati	Officer in Charge of Pastoral Lands
3. Bhagadugha	Revenue collector

Which of the pairs given above is/ are correctly matched?

- a) 1 only
- b) 3 only
- c) 1 and 2 only
- d) 2 and 3 only

Ans) d

Exp) Option d is the correct answer.

Pair 1 is incorrect: According to the Vedas, a **guest** who is served beef as part of the hospitality ritual was referred as **Goghna** in a Hindu household. The **Gramini** was the officer appointed by the king to look after the administration of villages.

Pair 2 is correct: Vrajapati was in charge of pasture lands in the Rig Vedic administration. Vrajapati was an officer who enjoyed authority over a large stretch of land or pasture ground.

Pair 3 is correct: Bhagadugha refers to officials (revenue collectors) during Vedic age. He is mentioned in texts as the person **responsible for collection of royal shares in produce**.

Q.40) Consider the following statements regarding the Vikram-S rocket, that was recently seen in news:

- 1. It was developed and launched by Indian Space Research Organization (ISRO).
- 2. It is launched as a part of Gaganyaan mission
- 3. Vikram-S rocket is powered only by a solid-fuelled propulsion system.

Which of the statements given above is/are correct?

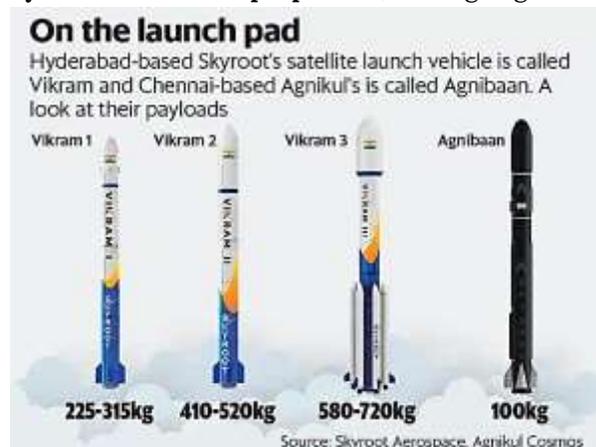

- a) 1 only
- b) 3 only
- c) 1 and 2 only
- d) 2, and 3 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: The Vikram-S rocket is developed by Hyderabad-based private space-tech start-up Skyroot Aerospace. Skyroot Aerospace have become the **first ever private space company in India to launch a rocket into space** and will open a new avenue for India's space sector. **It was Launched from Indian Space Research Organisation's (ISRO) launchpad in Sriharikota.**

Statement 2 is incorrect: This rocket is part of Mission Prarambh of Skyroot Aerospace, which is aimed at carrying three payloads into space. The payloads include Andhra Pradesh-based N Space Tech India, Chennai-based start-up Space Kidz and Armenian BazoomQ Space Research Lab. **Statement 3 is correct:** Vikram-S rocket is a single stage suborbital space launch vehicle. It is powered by the solid-fuelled propulsion, cutting edge avionics and all carbon fibre core structure.

Q.41) Consider the following statements about weights and measures during the Harappan Civilization:

1. Limestone and steatite were commonly used for making Weights.
2. The term 'adhaka' was used to denote the smallest unit of weight during the Harappan civilization.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Harrapans had developed proper weights and measures. Since, they were involved in commercial transactions, they needed standard measures.

Statement 1 is correct: During the Harappan period, exchanges were regulated by a precise system of weights. The weights were usually made of chert, limestone, steatite and were generally cubical, with no markings.

Statement 2 is incorrect: Āḍhaka is the Sanskrit name for a weight unit corresponding to '2.56 kilograms' used in Ayurvedic literature. **The Harappan's written language (if that is what the symbols found on Harappan seals are) has not been deciphered, so we do not know the names of the units used in the Indus valley civilization.**

NCERT, Themes in Indian History, pg. 15-16

<https://www.indica.today/long-reads/length-measurement-and-speed-of-light-in-ancient-india/>

Q.42) Consider the following statements with reference to Ashoka's policy towards Tribals:

1. Tribal people were encouraged to observe dhamma.
2. He promoted the policy of assimilation of tribals into mainstream society.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. Ashoka maintained **intimate contacts with the tribal people who were exhorted to observe dhamma.** Their contact with dhammamahamatras appointed by Ashoka enabled them to imbibe rudiments of higher culture prevalent in the gangetic basin.

Statement 2 is correct. Ashoka launched a **systematic and deliberate policy of acculturation of tribals.** As a result dhamma was preached and men started mingling with God. This implies that tribal and other people would take to the habits of a settled taxpaying, peasant society and develop respect for paternal power and royal authority and for monks, priests and officers who helped enforce his authority. Ashoka policy laid stress on giving up killing of animals. He claims that hunters and fishermen had given up killing and practiced dhamma. This means that they had taken to the sedentary agricultural life.

Q.43) Which of the following were the probable reasons behind the rise of Jainism and Buddhism in India?

1. Resentment by Kshatriyas against the domination of the priestly castes.
2. Ambitions of economically affluent Vaishyas to raise their social status.
3. Use of the languages of common people to spread their thoughts to the masses.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The primary cause for the rise of Jainism and Buddhism was the religious unrest in India in the 6th century B.C. The complex rituals and sacrifices advocated in the Later Vedic period were not acceptable to the common people. The sacrificial ceremonies were also found to be too expensive. The teachings of Upanishads, an alternative to the system of sacrifices, were highly philosophical in nature and therefore not easily understood by all.

Statement 1 is correct: The rigid caste system prevalent in India generated tensions in the society. Higher classes enjoyed certain privileges which were denied to the lower classes. **Owing to the suppression under the caste hierarchies, the Kshatriyas had resented against the domination of the priestly class, which also gave a way for the rise of these religions.** Also, both Buddha and Mahavira belonged to Kshatriya origin.

Statement 2 is correct: **The growth of trade led to the improvement in the economic conditions of the Vaisyas. As a result, they wanted to enhance their social status but the orthodox Varna system did not allow this.** Therefore, they began to extend support to Buddhism and Jainism. It was this merchant class that extended the chief support to these new religions, in the hope of climbing up the social ladder.

Statement 3 is correct: Both Buddhism and Jainism **used local languages** in spreading their thoughts and teachings to the common people. This led to popularization Jainism and Buddhism. **Buddhism used Pali whereas Jainism used Prakrit language.**

Source: TN History, Class 11.

Q.44) Maurya's were succeeded by which of the following native rulers?

1. Shungas in the northern region
2. Satvahanas in the Deccan and central India.
3. Shakas in north eastern region.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Option 1 is correct. Sunga dynasty succeeded the Mauryas in the Magadha region. Brihadratha, the last ruler of the Maurya Dynasty, was assassinated in 185 BCE. The commander-in-chief of his guard, Brahmin General Pusyamitra Sunga, killed Brihadratha and ascended the throne. He established the Sunga Dynasty, which prospered from approximately 187 to 78 BCE. Pusyamitra was succeeded after 36 years by his son, Agnimitra, beginning the dynasty of ten Sunga rulers overall. They conducted wars with both foreign and indigenous powers, including the Kalinga, the Satavahana Dynasty, and the Indo-Greek Kingdom.

Option 2 is correct. In the Deccan and in central India, the Satavahanas succeeded the Mauryas, although after a gap of about 100 years. The Satavahana rule is believed to have started around the third century BC, in 235 BC and lasted until the second century AD. Simuka was the founder of the Satavahana dynasty. Their capital cities varied at different times. Pratishthana (Paithan) and Amaravati were its capitals. Some experts believe their rule started in the first century BC only. They are referred to as Andhras in the Puranas. The Satavahana kingdom chiefly comprised of modern-day Andhra Pradesh, Telangana and Maharashtra. At times, their rule also included parts of Karnataka, Gujarat and Madhya Pradesh.

Option 3 is incorrect. After the decline of the Mauryan Empire, northwest India was constantly under attack from various **invaders from Central and West Asia**. The Indo-Greek rule lasted from about 180 BC till about 55 BC. The Sakas (also written Shakas), alternatively known as Indo-Scythians, invaded northwest India in the first century BC onwards. Shakas, established kingdoms in the north-western and western parts of the subcontinent. Rudradaman I was the most famous Shaka ruler. He ruled from 130 AD to 150 AD. His kingdom covered areas such as Konkan, the Narmada valley, Malwa, part of Gujarat and Kathiawar.

Q.45) Recently, the term 'Wright Mons' was seen in news. It is related to:

- a) first airplane model designed by Wright Brothers.
- b) comet look-like asteroid discovered in Kuiper Belt.
- c) mountainous feature found on Pluto.
- d) type of Crypto Ransomware appeared online.

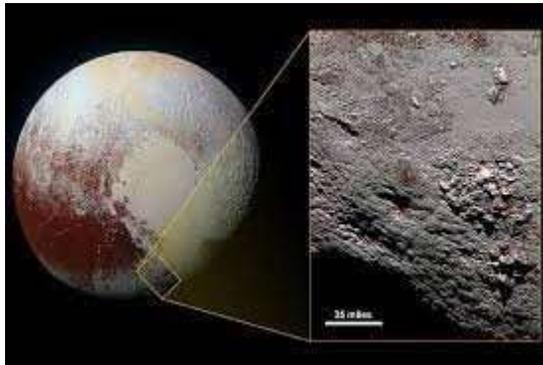

Ans) c

Exp) Option c is the correct answer.

The National Aeronautics and Space Administration's (NASA) **New Horizons probe** has reported new findings of Pluto. The probe reported that icy lava flows have recently (no more than a billion years ago) covered substantial tracts of its surface. The findings drew particular attention to a mountainous feature named Wright Mons.

Wright Mons is a **mountainous feature found on Pluto**. It was informally named by the New Horizons team in honour of the Wright brothers. It is about 150 km across its base and has a central depression (a hole) 40-50 km wide, with a floor at least as low as the surrounding terrain.

Scientists claim that Wright Mons is a volcano and cite the lack of impact craters as evidence that it is not likely to be older than 1-2 billion years.

Wright Mons

The volume of Wright Mons exceeds 20 thousand cubic kilometres. Although considerably less than the volume of Mars's biggest volcanoes, this is similar to the total volume of Hawaii's Mauna Loa, and much greater than the volume of its above sea-level portion.

Source: Pluto: 'Recent' volcanism raises puzzle – how can such a cold body power eruptions? -ForumIAS Blog

Q.46) Which of the following statements about the Shishunaga Dynasty is/are correct?

1. Shishunaga Dynasty was overthrown by Mauryans to establish their rule over Magadh region.
2. The second Buddhist Council was held during the reign of King Kalashoka of the Shishunaga dynasty.

Select the correct answer using the code given below:

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

The Shishunaga dynasty is considered to be one of the earliest ruling dynasties in ancient India.

Statement 1 is incorrect: The Shishunaga dynasty was overthrown by **Mahapadma Nanda**, who established the **Nanda dynasty** in Magadha. The Nanda dynasty was later overthrown by Chandragupta Maurya, who founded the Mauryan Empire.

Statement 2 is correct: The Buddhist council during the **reign of King Kalashoka**, who belonged to the Shishunaga dynasty, was held at Vaishali. This council is known as the Second Buddhist council and was convened to settle some disputes among the Buddhist monks.

Source: Tamil Nadu History text book pg 50 ; Ancient India by RS Sharma pg 72

Q.47) Which of the following statements is/are correct regarding the Chalcolithic Age?

1. The people of the Chalcolithic Age knew spinning and weaving and manufactured cloth.
2. The people of the Chalcolithic Age usually buried their dead within the surroundings of their houses.
3. Terracotta objects were completely absent in the Chalcolithic cultures.

Select the correct answer using the code below:

- a) 1 and 2 only
- b) 1 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The Chalcolithic Period in India is characterized by the use of both stone and copper tools and weapons. This period saw the emergence of agriculture and animal husbandry, leading to the rise of settled communities and the development of distinct cultures across different regions of the Indian subcontinent.

Statement 1 is correct: The people of the Chalcolithic Age **had a sophisticated knowledge of spinning and weaving**, as evidenced by the discovery of spindle whorls in Malwa and cotton, flax, and silk threads in Maharashtra. These discoveries suggest that the people of this period had developed advanced techniques for **manufacturing cloth**.

Statement 2 is correct: Disposal of the dead by burial was a common custom. Adults as well as children were usually buried in a north-south orientation; the head towards the north and the legs towards the south. **Adults, and also children, were buried in a pit which was dug into the house floor.** It is interesting to note that during the Jorwe period, in the case of adults, the portion below the ankle was purposely chopped off. These practices like **burying the dead within the precincts of the house** and chopping off the feet could possibly **suggest a belief in which the dead were restrained from turning into ghosts, who could become malevolent.**

Statement 3 is incorrect: **Terracotta objects are found at majority of chalcolithic sites.** These are in the form of human and animal figurines. **The stylized terracotta bulls (which are mostly miniature sized) found in the Chalcolithic levels at Kayatha**, some with a prominent hump, some with horns twisted backward, and some with the horns projecting forward horizontally, are of special interest. Considering the occurrence of numerous terracotta bull figurines at several of these Chalcolithic sites it can be suggested that bull was a sacred animal.

Source: Ancient India by RS Sharma pg 26-31

Q.48) Consider the following statements regarding the religious beliefs of Early Vedic period:

1. People used to worship forces of the nature.
2. The Doctrine of Karma emerged during this period.
3. The people did not perform any sacrifices for worship.
4. The Early Vedic people did not build temples for worship.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1, 2 and 4 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) b

Exp) Option b is the correct answer.

The Early Vedic Period or the **Rig Vedic period began in 1500 BC** and continued up to 1000 BC. The religion during this period was simple and people **worshiped the natural forces** of nature.

Statement 1 is correct: During Early Vedic period people worshiped the **forces of nature** such as the Sun, the Fire, the Wind, the Dawn, the Water, the rain god Indra, and Earth. Vedic **hymns were composed in praise of nature**. Rigveda mentions that thirty-three gods and goddesses were worshiped by the Aryans.

Statement 2 is correct: **The idea of Karma first appears in the oldest Hindu text the Rigveda.** In ancient texts karma referred simply to **ritual and sacrificial action**. Vedic religion had attached **profound importance to the Doctrine of Karma or Action**. In other words, a good soul who performed good deeds was rewarded whereas the evil soul was punished for evil deeds.

Statement 3 is incorrect: The Early Vedic people followed a **simple mode of worship**. Their religion primarily consisted of some **obligations and prayers**. They also performed certain **ritual sacrifices known as yajnas** to please their gods. Apart from **offering animal sacrifices, they offered fruits, milk, ghee, wine, grains, etc.** by throwing them into the **fire** as part of yajnas. The fire was considered sacred and believed to act as an intermediary between man and God. So, statement 3 is incorrect.

Statement 4 is correct: There is no reference found for temples in Vedas. **The Early Vedic people did not build any temples or shrines.** They also **did not worship any idols or images** of Gods. They performed sacrifices and nourished gods through sacrificial ceremonies. They only worshiped various manifestations of nature.

Source: Old XI NCERT of Ancient India

Q.49) Consider the following statements regarding fashion during the Indus Valley Civilisation (IVC):

1. It is believed that the Harappan people knew the art of making clothing from leather.
2. It is believed that Indigo and turmeric were used for dyeing cloths during the IVC.
3. Both men and women from the IVC used necklaces as a form of Jewellery.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: Small fragments of cloth preserved in the corrosion products of metal objects show that the Harappans wove a range of grades of cotton cloth. **The Harappans also probably knew the art of making clothing from leather.**

For ex, At Dholavira, marks are seen on the basal stone slab of the trough indicating use of ropes to lift the water from the well, probably with leather bags.

Statement 2 is correct: A good number of Dyeing facilities were found in the sites of Indus valley civilization. Their presence in the IVC sites indicates that cotton cloth was probably dyed a range of colors. A colored cloth, dyed red with madder, was also found in one of the IVC sites. **It is believed that indigo and turmeric were also used as dyes.**

Statement 3 is correct: Figurines and finds in graves show that Harappans of both sexes wore jewellery: hair fillets, bead **necklaces and bangles for men;** bangles, earrings, rings, anklets, belts made of strings of beads, pendants, chokers and **numerous necklaces for women,** as well as elaborate hairstyles and headdresses.

Q.50) With reference to the Shigella Bacteria, consider the following statements:

1. It is one of the leading causes of bacterial diarrhea worldwide.
2. There are currently no vaccines for infection caused by Shigella bacteria.
3. An outbreak of Shigella bacteria recently occurred in the State of Kerala.

Which of the statements given above is/are correct?

- a) 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Shigella is a genus of bacteria that causes an infection called shigellosis.

Statement 1 is correct: Shigella is a bacterium that belongs to the **Enterobacter family** – a group of bacteria that **reside in the intestine**, not all of which cause disease in humans. It mainly affects the intestine and results in diarrhoea, sometimes bloody, stomach pain, and fever. It is the **second leading cause of bacterial diarrheal worldwide** and the third leading cause of death in children less than 5 years old.

Statement 2 is correct: The cornerstone of shigella treatment is the maintenance of hydration and electrolyte balance. Antibiotics are also recommended for reducing illness duration and for preventing transmission. However, currently, there are **no vaccines available for shigellosis**.

Statement 3 is correct: The Kerala health department identified Shigella bacteria outbreak as the cause for the food poisoning incident in Kasaragod district of Kerala.

Knowledge Base:

- 1) Shigellosis is a food- and water-borne infection, and can happen when someone consumes contaminated food.
- 2) Shigellosis is primarily a disease of poor and crowded communities that **do not have adequate sanitation or safe water**.
- 3) The incubation period of shigellosis is typically 1–4 days.
- 4) The disease is easily **spread by direct or indirect contact** with the excrement of the patient. Shigella is generally transmitted through contaminated food or water, or through person-to-person contact.
- 5) There are four types of Shigella bacteria that affect humans – Shigella sonnei, Shigella flexneri, Shigella boydii, and Shigella dysenteriae. The fourth type causes the most severe disease because of the toxin it produces.

Q.1) Which of the following source(s) helps us to reconstruct the social and political conditions of the Shunga dynasty?

1. Malavikagnimitra of Kalidasa.
2. Mahabhasya of Patanjali
3. Ayodhya Inscription of Dhandeva

Select the correct answer from the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Our knowledge about the later Mauryas and Shunga rulers is based upon Puranas, Malavikagnimitra of Kalidasa, and Mahabhasya of Patanjali,

Option 1 is correct: Malavikagnimitra of Kalidasa refers to the conflict **between Pushyamitra and Yajnasena**, King of Vidarbha (the eastern Maharashtra area) and the victory of the Shungas. The Malavikagnimitra narrates the story of military encounter between prince Vasumitra and Yavana army on the banks of Sindhu.

Option 2 is correct: According to Patanjali's Mahabhasya, there were Greek incursions during the rule of the Sungas.

Option 3 is correct: The Ayodhya Inscription of Dhandeva provides information about the Shunga rule especially about Pushyamitra Shunga. It mentions that Pushyamitra Shunga performed two Ashwamedha Yagyas (Horse Sacrifices).

Q.2) Which of the following statements is correct about the Besnagar pillar inscription?

- a) It praises the military achievements of Gautamiputra Satakarni
- b) It describes the personality and achievements of Samudragupta
- c) It describes Ashoka's visit to the Rampurva village and his commitment to animal welfare
- d) It was erected by Heliodorus, a Greek ambassador to India, in the honor of the god Vasudeva

Ans) d

Exp) Option d is the correct answer.

Option a is incorrect: Nashik and Nanaghad inscriptions throws light on the reign of Gautamiputra Satakarni

Option b is incorrect: Allahabad pillar inscription describes the personality and achievements of Samudragupta

Option c is incorrect: The Rampurva bull, an Ashokan sculpture, has inscriptions in Brahmi script and Prakrit language, and is located in the Rampurva village in Bihar. The inscriptions describe Ashoka's visit to the village and his commitment to animal welfare.

Option d is correct: The Besnagar Garuḍadhvaja Pillar inscription is an ancient inscription found on a pillar at Besnagar, in the Vidisha district of Madhya Pradesh, India. The inscription is written in Prakrit language

SFG 2023 | LEVEL 2 | Test #35 – Solutions | ForumIAS

and Brahmi script and dates back to the 2nd century BCE. **The pillar was erected by Heliodorus, a Greek ambassador to India, in honor of the god Vasudeva, who is identified with the deity Krishna.**

Source: <https://www.indica.today/long-reads/besnagar-pillar-inscription-heliodorus/>

Q.3) Arrange the following events in a chronological order according to their occurrence in Indian history:

1. First Buddhist council
2. Alexander's invasion of India
3. Ashoka fought the Battle of Kalinga
4. Establishment of Nalanda university

Select the correct answer from the code given below:

- a) 1-2-3-4
- b) 2-1-3-4
- c) 2-4-1-3
- d) 4-1-3-2

Ans) a

Exp) Option a is the correct answer.

Option 1: First Buddhist Council was held soon after the Mahaparinirvan of the Buddha, **around 483 BC** under the patronage of King Ajatshatru and was presided by Mahakasyapa, a monk.

Option 2: **In 326 BC**, Alexander invaded India, after crossing the river Indus he advanced towards Taxila. He then challenged king Porus, ruler of the kingdom between the rivers Jhelum and Chenab.

Option 3: As per the 13th Major Rock Edict, **Ashoka fought this battle in the 8th year of his reign in 261BC**. It further mentions the bloodshed in this war, had a deep impact on Ashoka which ultimately changed his personality from a warrior to a saint as a result of which he gave up the policy of Digvijaya and adopted the policy of Dhammavijaya.

Option 4: Kumaragupta (Shakraditya) of the Gupta dynasty founded **Nalanda University in modern Bihar in the early 5th century AD**, and it flourished for 600 years until the 12th century.

Source: Ancient India by RS Sharma

Q.4) Which of the following statements regarding the rule of Indo-Greeks in ancient India are correct?

1. Their rule resulted in the development of a new art form known as Gandhara art.
2. They were the first rulers in India to issue gold coins that can be definitively attributed to the king.
3. Buddhism flourished under the rule of Indo-Greek kings.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Indo-Greek rule in India, which lasted from the 2nd century BCE to the 1st century CE, is significant for several reasons. One of the most notable legacies of the Indo-Greeks is the large number of coins they issued, which provide valuable insights into their reign and the history of the region.

Statement 1 is correct: A significant contribution of the Indo-Greeks was the introduction of Hellenistic art to the north-west frontier of India. This resulted in the development of new art form known as Gandhara art, which combined Greek and Indian artistic elements.

Statement 2 is correct: The Indo-Greeks were the first rulers in India to issue coins that can be definitively attributed to individual kings. Prior to their arrival, coins in India were punch-marked and could not be assigned with certainty to any dynasty.

Statement 3 is correct: Buddhism flourished under the Indo-Greek kings, and their rule, especially that of Menander, has been remembered as benevolent. Some historians even argue that, the Greek expansion into Indian territory may have been intended to protect Greek populations in India, and to protect the Buddhist faith from the religious persecutions of the Sungas

Q.5) With reference to the National Bioenergy Programme, consider the following statements:

1. It is a program to promote generation of green hydrogen from surplus biomass.
2. It aims to promote the manufacturing of pellets & briquettes for use in power generation.
3. It does not cover biomass from municipal solid waste.

Which of the statements given above is/ are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The Ministry of New and Renewable Energy (MNRE), Government of India has notified the National Bioenergy Programme on November 2, 2022. It focuses on the usage of surplus/ waste biomass produced in agriculture, industries and urban areas for creation of various forms of bioenergy. The Programme is scheduled to be implemented for the period from FY 2021-22 to 2025-26.

Statement 1 is incorrect: The National Bioenergy Programme (NBP) is an initiative by the government to promote creation of energy in various forms such as Biogas, BioCNG, (all chiefly containing methane - CH₄) etc. from surplus and waste biomass. It is not related to production of Green hydrogen. Hence this statement is **incorrect**.

The government initiative to promote production of green hydrogen is known as the National Green Hydrogen Mission.

Statement 2 is correct: One of the sub components of this program is the - **Biomass Programme (Scheme to Support Manufacturing of Briquettes & Pellets and Promotion of Biomass (non-bagasse) based cogeneration in Industries)** to support setting up of pellets and briquettes for use in power generation and non-bagasse based power generation projects. Hence this statement is **correct**.

This programme has two other sub components. (More information in the Knowledge Base section).

Statement 3 is correct: Although the scheme has a sub component to promote usage of urban waste to create energy, municipal solid waste is not covered under this scheme, and will not be used for this purpose. Hence this statement is **correct**.

Hence this statement is **correct**.

Knowledge Base:

Other sub components of the scheme:

- 1) **Waste to Energy Programme** (Programme on Energy from Urban, Industrial and Agricultural Wastes /Residues) to support the setting up of large Biogas, BioCNG and Power plants (excluding MSW to Power projects). IREDA is to be the implementing agency.
- 2) **Biogas Programme** to support setting up of family and medium size Biogas in rural areas.

Source: <https://pib.gov.in/PressReleaseframePage.aspx?PRID=1877159#:~:text=has%20notified%20the-,National%20Bioenergy%20Programme,-on%20November%202022>

Q.6) In the context of ancient Indian social structure, the term 'Anirvasita' refers to:

- Shudras living outside the village community.
- women who were prohibited from participating in Vedic rituals.
- the heterodox sects who rejected the authority of the Vedas and Brahmanical traditions.
- the artisan and craftsmen communities who were believed to be descendants of non-Aryan tribes.

Ans) a

Exp) Option a is the correct answer.

The Dharma Sutras made a distinction between different types of Shudras in ancient India. Sachudra meant cultured Shudra and asac-chudra meant uncultured Shudra. **Nirvasita Shudra lived in the village community and Anirvasita Shudra lived outside it.**

Source: <https://www.bbau.ac.in/Docs/FoundationCourse/TM/MPDC405/Block-2%20Ambedkar%20on%20women-1.pdf> https://www.mea.gov.in/Images/attach/amb/Volume_07.pdf

Q.7) Kanishka, one of the most important rulers of the Kushana dynasty, patronized which of the following personalities?

- Vasumitra
- Ashvaghosha
- Varahmihira
- Nagarjuna
- Charaka

Select the correct answer from the codes given below.

- 1, 2 and 3 only
- 3, 4 and 5 only
- 1, 2, 4 and 5 only
- 1, 2, 3, 4 and 5

Ans) c

Exp) Option c is the correct answer.

Kanishka was the most important ruler of the Kushana dynasty. He was the founder of the Saka era which starts from 78 A.D. He was not only a great conqueror but also a patron of religion and art. He patronized several jewels during his lifetime.

Option 1 is correct: Kanishka patronised Buddhist scholars like Vasumitra, Asvagosha and Nagarjuna. He convened the Fourth Buddhist Council to discuss matters relating to Buddhist theology and doctrine.

It was held at the Kundalavana monastery near Srinagar in Kashmir **under the presidentship of Vasumitra.** About 500 monks attended the Council. The Council prepared an authoritative commentary on the Tripitakas and the Mahayana doctrine was given final shape

Option 2 is correct: Asvagosha was a great philosopher, poet and dramatist. He was the author of Buddhacharita. He popularized the style of Sanskrit poetry known as kavya. He adorned the court of Kanishka.

Option 3 is incorrect: Varahmihira, an Indian Astronomer, was not contemporary of Kanishka. He was born in 505 AD. He is believed to be an author of Panch-Siddhantika ('Five Treaties'), a compendium of Greek, Roman, Egypt and Indian astronomy.

Option 4 is correct: Kanishka patronized Nagarjuna who came from south India. He was a great Buddhist philosopher and thinker who is believed to have given the concept of shunyata (emptiness).

Option 5 is correct: Kanishka also patronized a famous Indian physician, Charaka, who wrote Charak Samhita which is a comprehensive text on ancient Indian medicines. He is also known as the father of Ayurveda.

<https://www.britannica.com/biography/Varahamihira>

<https://www.britannica.com/biography/Nagarjuna>

Q.8) Consider the following statements about the polity and administration during the reign of Satavahanas:

1. They stopped the practice of donating revenue of a village to the Buddhist Sangha.
2. Gaulmika was the provincial governor appointed directly by the king.

Which of the statements given above is/are **incorrect**?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

In the Deccan, the Satavahanas established their independent rule after the decline of the Mauryas. Their rule lasted for about 450 years. They were also known as the Andhras. The founder of the Satavahana dynasty was Simuka. He was succeeded by Krishna, who extended the kingdom up to Nasik in the west. The greatest ruler of the Satavahana dynasty was Gautamiputra Satakarni. He ruled for a period of 24 years from 106 to 130 A.D.

Statement 1 is incorrect: One of the practices started by Satavahana rulers in the first century A.D. was that of **donating revenue of a village to, either a Brahmana or the Buddhist Sangha**. This practice became much more widespread under the Gupta rulers.

Statement 2 is incorrect: The Satavahanas retained some of the administrative units of Ashokan times. **But unlike Mauryan times, certain military and feudal elements are found in the administration of the Satavahanas. For instance, the senapati was appointed provincial governor.** It was probably done to keep the tribal people in the Deccan who were not completely brahmanised under strong military control. **The administration in the rural areas was placed in the hands of gaulmika (village headman)** who was also the head of a military regiment consisting of 9 chariots, 9 elephants, 25 horses and 45 foot soldiers.

Source: Old NCERT, R S Sharma, pg. 117.

Q.9) Consider the following statements about the Chedi dynasty of Kalinga:

1. King Simuka was the founder of the Chedi dynasty.
2. The Hatigumpha inscription in Udayagiri give information about this dynasty.
3. King Kharavela of Chedi dynasty was the contemporary of Satavahana king Satakarni I.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

Kalinga is known to be a powerful kingdom as early as the time of the Kurukshetra battle. The region was ruled by Nandas and later by the Mauryans as well.

Statement 1 is incorrect: Hatigumpha inscription mentions **Mahameghavahana as the founder of the Chedi dynasty of Kalinga** which came to be known as Mahameghavahana dynasty after his name. **King Simuka was the founder of Satavahana dynasty.**

Statement 2 is correct: **The third ruler of the Chedi dynasty was King Kharavela who flourished during the second half of the 1st century B.C. The Hatigumpha inscription in Udayagiri near Bhubaneswar furnishes detailed accounts about the Chedi dynasty.**

Statement 3 is correct: King Kharavela of Chedi dynasty was contemporary of Satavahana king Satakarni I. Evidence of this can be found in Hatigumpha inscription which mentions **“In the second year his rule king Kharavela invaded the territory of the Satavahana king Satakarni I and marching up to the river Krishna stormed the city of Asika.”**

Source: <https://odisha.gov.in/about-us/history>

Q.10) With reference to the Pradhan Mantri Bhartiya Janurvarak Pariyojana, consider the following statements:

1. Under this scheme, the subsidised fertilisers in the country are to be sold under a single brand name.
2. Only subsidised urea is included in its purview.
3. The farmer will now be subsidised for fertiliser cost only through Direct Benefit Transfer.

Which of the statements given above is/ are correct?

- a) 1 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) a

Exp) Option a is the correct answer.

The Ministry of Fertilisers & Chemicals recently announced on August 24, 2022 that it has been decided to implement One Nation One Fertiliser by introducing a “Single Brand for Fertilisers and Logo” under the fertiliser subsidy scheme named “Pradhan Mantri Bhartiya Janurvarak Pariyojna” (PMBJP).

Statement 1 is correct: Under the Pradhan Mantri Bhartiya Janurvarak Pariyojana or the One Nation One Fertiliser (ONOF) scheme, all the subsidised fertilisers in India will be sold under a single brand name - BHARAT. Hence this statement is **correct**.

Statement 2 is incorrect: All types of fertilisers which are subsidised fully or partly by the government and/ or whose maximum retail price is announced by the government like DiAmmonium Phosphate, Urea, Muriate of Potash, NPK, etc are included under this scheme. Hence this statement is incorrect as this scheme is not exclusively applicable to subsidised urea.

Statement 3 is incorrect: This scheme pertains to marketing and has no bearing on the method/ mechanism or calculation method of the subsidies on fertilisers. They shall continue to be administered as they are now. This means that the government will fix the MRP at which these fertilisers are to be sold to the farmers and not transfer the purchase cost to their accounts (this means no DBT for fertiliser subsidy). The subsidy will continue to go to the companies who are manufacturing the fertiliser. Hence this statement is **incorrect**.

Source: <https://indianexpress.com/article/explained/everyday-explainers/one-nation-one-fertiliser-scheme-explained-risks-challenges-drawbacks-811071/>

Q.11) Which of the following dynasties immediately succeeded the Sunga dynasty to rule over the Magadha Region?

- The Kanva dynasty
- The Nanda dynasty
- The Saka dynasty
- The Sisunaga dynasty

Ans) a

Exp) Option a is the correct answer.

Kanva dynasty, also called Kanvayanas, the successors of the Shungas in the North Indian kingdom of Magadha, who ruled about 72–28 BCE.

The last Sunga ruler, Devabhuti was murdered by his minister Vasudeva Kanva, who founded the Kanva dynasty. Hence, Kanvas ruled the mid-Gangetic valley after the fall of Sungas.

The Kanva dynasty ruled for 45 years.

Option b is incorrect: The Nanda dynasty ruled over Magadha during the the fifth century BCE. The Nandas overthrew the Shishunaga dynasty from the throne of Magadhan empire.

Option c is incorrect: The Saka Dynasty, also known as the Indo-Scythian Kingdom ruled parts of north-western India and Pakistan from around 2nd century BCE to the 4th century CE.

Option d is incorrect: The Sihshunaga Dynasty ruled the Magadha Kingdom in ancient India from **413 BCE to 345 BCE (before shunga dynasty)**. It is considered to be the third imperial dynasty of Magadha, following the Brihadratha and the Haryanka.

Source: Tamil Nadu History book, Pg. 74-75.

Q.12) With reference to ancient Indian history, 'Periplus of the Erythraean Sea' is best related to-

- Information regarding the social conditions of India during Vedic age.
- Account of Alexander's invasion of Indian subcontinent.
- Data on sea trade between India and Rome.
- Narration of society of North India during Gupta administration.

Ans) c

Exp) Option c is the correct answer.

Periplus of the Erythraean Sea is an anonymous work which gives us impartial and objective information on the Indo-Roman trade during **Early Historic period**. It informs us about the ports on India's coast-line, trade-centres in India, the trade-routes-connecting trade centres and ports, distance between centres, the list of items-of-trade, the annual volume of trade, the rates, types of ships etc.

In order to reconstruct the history of the **post-Mauryan period between c.200 BCE to 200 CE** a variety of sources are available, including both foreign as well as indigenous sources. Among the former, the most important is the **Periplus of the Erythraean Sea which gives rich data on sea trade between India and Rome.**

JAKO201630932413446.pdf (koreascience.or.kr)

Q.13) Consider the following statements with reference to the comparison between Mauryan Empire and Gupta Empire:

- The Mauryan administration was more centralized as compared to the Gupta administration.
- System of taxation in Gupta Empire was very elaborate and extensive as compared to that of Mauryan Empire.

3. Gupta dynasty ruled for a longer time period than Maurya dynasty.

Which of the statements given above is/are correct?

- a) 1, 2 and 3
- b) 1 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: In the Mauryan period, political authority was concentrated in the hands of the king. But, the Gupta administration was decentralized in nature. It means that feudatories i.e. local Kings and smaller chiefs ruled a large part of their empire.

Statement 2 is incorrect: It was Mauryans (not Guptas) who introduced very extensive tax system and imposed heavy taxes on the people. Guptas were more liberal in imposing taxes on citizens.

Statement 3 is correct: The Mauryan Empire, which formed around 321 B.C.E. and ended in 185 B.C.E. ruled around 136 years. Whereas Sri Gupta founded the Gupta Empire c. 240-280 CE, The Gupta Empire ended around 550 CE when it disintegrated into regional kingdoms after a series of weak rulers and invasions from the east, west, and north. So, Guptas ruled for more than 250 years. Hence, Guptas ruled for longer time period than Mauryans.

Q.14) The Allahabad Pillar inscription, often known as the Allahabad Prashasti, is one of the most important epigraphic pieces of evidence of the Imperial Guptas. Consider the following statements about the Allahabad Prashasti:

- 1. It provides information about Dakshinapatha expedition of Samudragupta
- 2. It gives information about the tributes received by Samudragupta from many kings of south - east Asia.
- 3. It is written in both prose and verse style.
- 4. It is composed by Ravikirti.

Which of the statements given above is/are correct?

- a) 1 only
- b) 3 and 4 only
- c) 1, 2 and 3 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

Allahabad Pillar inscription is engraved on an Asokan pillar. It is written in classical Sanskrit, using the Nagari script. It consists of 33 lines composed by **Harisena**, court poet of Samudragupta,.

Statement 1 is correct: Samudragupta was the greatest of the rulers of the Gupta dynasty. The Allahabad Pillar inscription provides a detailed account of his reign. It refers to three stages in his military campaign:

- 1) Against some rulers of North India
- 2) **His famous Dakshinapatha expedition against South Indian rulers**
- 3) A second campaign against some other rulers of North India.

Statement 2 is correct: According to the Allahabad inscription, **neighbouring five frontier kingdoms and nine republican states of Punjab and western India** were conquered by the Samudragupta. They agreed to pay tribute and taxes to Samudragupta and obey his orders without any fight. **The inscription adds that Samudragupta also received tributes from many kings of south - east Asia.**

Statement 3 is correct: Allahabad inscription is written in **mixed prose and verse style, which is called “Champu kavya style”**. The word 'Champu' means a combination of poetry and prose. The inscription is written in **Sanskrit language**.

Statement 4 is incorrect: **Ravikriti was the court poet of Pulakesin II, the Chalukya King. Harishena** was the court poet of Samudragupta. Allahabad Pillar Inscription (Prayag Prasasti) was **composed by Harishena**. It was composed in Sanskrit.

Q.15) Consider the following statements with reference to the Employee State Insurance (ESI) Scheme:

1. This scheme was started during the tenure of Prime Minister Jawahar Lal Nehru.
2. Under the scheme, medical care is provided to the retired employees as well.
3. Atal Beemit Vyakti Kalyan Yojana was launched under the ESI Scheme.

Which of the above-given statements is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The promulgation of the **Employees' State Insurance Act, 1948(ESI Act)**, by the Parliament was the **first major legislation on social Security for workers** in independent India.

Statement 1 is correct: The ESI Act 1948, encompasses certain health-related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. **The scheme was inaugurated in Kanpur on 24th February 1952 (ESIC Day) by then Honorable Prime Minister Pandit Jawahar Lal Nehru.**

Statement 2 is correct: Full medical care is provided under the ESI Scheme to an Insured person and his family members from the day he enters insurable employment. There is no ceiling on expenditure on the treatment of an Insured Person or his family member. **Medical care is also provided to retired and permanently disabled insured persons and their spouses on payment of a token annual premium.**

Statement 3 is correct: Atal Beemit Vyakti Kalyan Yojana (ABVKY) is a welfare measure for the employees covered under the **Employees' State Insurance (ESI) Act, 1948** in the form of cash compensation up to 90 days once in lifetime of the worker in the contingency of Insured Persons' (IPs') unemployment. The Scheme was introduced w.e.f. 01-07-2018 on pilot basis for a period of two years initially. The scheme was later extended for another one year i.e. from 1st July, 2020 to 30th June, 2021.

Source: <https://www.esic.gov.in/information-benefits>

Q.16) Which of the following information can be known from the coins of Samudragupta?

1. He was the follower of Buddhism
2. Played veena
3. Performed Ashvamedha Yajna
4. Marriage of Samudragupta to the Lichchavi princess Kumaradevi.

Select the correct answer from the options given below:

- a) 1 and 2 only
- b) 1, 3 and 4 only
- c) 2 and 3 only
- d) 2, 3 and 4 only

Ans) c

Exp) Option c is the correct answer.

Samudragupta was most probably the first Gupta king to issue coins (although this is the subject of some dispute). Gupta coinage started out imitating that of the Kushans, but very soon new types were introduced.

Statement 1 is incorrect: Samundragupta does not issued any coins from which we can infer such information. Moreover, the coins have the images of Lakshmi.

Statement 2 is correct: The **Lyrical type** of Samudragupta is also a very beautiful and unique design. On this coin, the king is shown seated at ease on a high-backed couch, playing a **string instrument** like a veena. The fact that the king wanted to publicize an image of himself as a musician is remarkable and a window into the value system of the Gupta state. Samudragupta is known to have been a great patron of the arts and was indeed an accomplished musician and poet.

Statement 3 is correct: The **Ashvamedha type** of Samudragupta is arguably the most beautiful Gupta coin. Sacrificial horse standing and Queen standing left, holding towel in left hand, flywhisk in right over her shoulder needle.

Statement 4 is incorrect: The King and Queen type memorializes the most important event of early Gupta history: the **marriage of Chandragupta I** to the Lichchavi princess Kumaradevi. This marriage greatly improved the fortunes of the young and ambitious king, allowing him to begin his campaign of expansion.

Knowledge Base:

Sceptre type ("Standard" type) - King standing left, sacrificing at altar left and holding the royal scepter. This coin is undoubtedly one of the first Gupta coins. It is quite clear that the Samudragupta coin is derived from Kushan coins.

Archer type - King standing left, holding an Indian long bow in his left hand and an arrow in his right. The archer type became the prototypical Gupta coin, but it is relatively rare for Samudragupta, even though he invented the type.

Q.17) Consider the following pairs regarding various terminologies used during Chola period and their meaning:

Important Terms : Meaning

1. Kadaiyyar : Landless labourers
2. Eccoru : Palace Guard
3. Valilar : Sword bearers
4. Nattar : Settlement of traders

Which of the pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) All four pairs

Ans) b

Exp) Option b is the correct answer.

Pair 1 is correct: In the Tamil region, large landowners were known as vellalar, ordinary ploughmen were known as uzhar, and **landless labourers were known as kadaiyyar and adimai.**

Pair 2 is incorrect: **Eccoru is a term referring to various supplies of cooked rice provided for officials.** This term was prevalent during the early Chola period but steadily declined over time.

Pair 3 is correct: Cholas maintained a well-organised army. The army consisted of three conventional divisions: infantry, cavalry (kudirai sevar) and the elephant corps (anaiyattal). **There were also bowmen (villaligal), sword-bearers (valilar) and spearmen (konduvar).** Two type of ranks in the army are also mentioned: the upper and the lower (perundanam and cirudanam).

Pair 4 is incorrect: **Nattar were the assembly of landholders of urs in nadu.** Nattar functioned as pillars of the state structure under the Cholas. They discharged many of the administrative, fiscal and judicial responsibilities of the state. They held hereditary land rights and were responsible for remitting the tax from the respective nadu to the state. **Whereas, Nagaram was a settlement of traders and not nattars.**

Q.18) Consider the following pairs:

Books	Authors
1. Harshacharita	Banabhatta
2. Raghuvamsha	Kalidasa
3. Panchasiddhantika	Vishakadutta

Which of the pairs given above is/are correctly matched?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

The Gupta and post Gupta period was marked by great progress in art, architecture and literature.

Pair 1 is correct. Harshacharita was written by Harshavardhana's court poet **Banabhatta**.

Pair 2 is correct. Kalidasa who lived in the court of **Chandragupta II** in the fifth century AD authored books like Meghadutam, Abhijnanashakuntalam, **Raghuvamsha**, Kumarasambhava and Ritusamhara.

Pair 3 is incorrect. Varahamihira was a great astronomer who has written a number of books on astronomy. His work **Panchasiddhantika** deals with five astronomical systems.

https://nios.ac.in/media/documents/SrSec315NEW/315_History_Eng/315_History_Eng_Lesson7.pdf

Q.19) Which of the following Gupta rulers was described as "equal to the gods: Dhanada (Kubera), Varuna (Sea-God), Indra and Antaka (Vama), who had no antagonist of equal power in the world"?

- a) Chandragupta I
- b) Samudragupta
- c) Chandragupta II
- d) Kumargupta

Ans) b

Exp) Option b is the correct answer.

The Gupta dynasty was established by **Shrighupta**, who probably belonged to the vaishya caste. His son **Ghatotkacha**, who carried the title of maharaja, appears to be some small king about whom nothing much is known.

Option a is incorrect: Chandra Gupta I, king of India (reigned 320 to 330 AD) and **founder of the Gupta empire**. He was the **grandson of Sri Gupta**, the first known ruler of the Gupta line.

Option b is correct: Samudragupta was one of the greatest rulers of the Guptas. The Allahabad Pillar inscription provides a detailed account of his reign. **The Allahabad Prasasti of Samudragupta describes him as "equal to the gods" like Dhanada (Kubera), Varuna (Sea-God), Indra and Antaka (Vama), who had no antagonist of equal power in the world.** dynasty.

Option c is incorrect: **Chandragupta II**, also known by his title **Vikramaditya**, as well as Chandragupta Vikramaditya, was the third ruler of the Gupta Empire in India, and was one of the most powerful emperors of the Gupta dynasty. Chandragupta continued the expansionist policy of **his father Samudragupta**, mainly through military conquest.

Option is incorrect: Kumaragupta was an emperor of the Gupta Empire of Ancient India. A **son of the Gupta emperor Chandragupta II**. He seems to have maintained control of his inherited territory, which extended from Gujarat in the west to Bengal region in the east.

Source: <https://egyankosh.ac.in/bitstream/123456789/20161/1/Unit-33.pdf>

Q.20) Consider the following statements with reference to the recent changes made in Beti Bachao Beti Padhao (BBBP) Scheme:

1. It aims to ensure at least 20% increment in enrollment of women at the secondary level in STEM (Science, Technology, Engineering, Mathematics).
2. One of the scheme's objective is also raising awareness about safe menstrual hygiene.
3. Mission Shakti has been launched to review the implementation of the BBBP scheme.
4. It now focuses on skilling of girls and women in non-traditional livelihoods.

Which of the above given statements are correct?

- a) 3 and 4 only
- b) 1, 2 and 3 only
- c) 2, 3 and 4 only
- d) 1, 2 and 4 only

Ans) c

Exp) Option c is the correct answer.

Beti Bachao Beti Padhao (BBBP) Scheme was launched by Prime Minister on January 22, 2015 to address the declining Child Sex Ratio (CSR) and related issues of women's empowerment over a life-cycle continuum.

Statement 1 is incorrect: Among the revised aims of the BBBP scheme is **ensuring 1% increment (not 20%) in enrolment of women at the secondary level particularly in STEM (Science, Technology, Engineering, Mathematics) subjects**. Another key aim is skilling of girls and women every year (mainly in non-traditional livelihoods).

Statement 2 is correct: **Raising awareness about safe menstrual hygiene** and promulgating elimination of child marriages has been added to the aims of the revised BBBP Scheme

Statement 3 is correct: **'Mission Shakti' was launched during the 15th Finance Commission period 2021-22 to 2025-26**. Mission Shakti is an integrated women empowerment programme is launched as an umbrella scheme for the safety, security and empowerment of women for implementation. A national committee headed by the Secretary of MW&CD, formed under the larger **Mission Shakti will review the implementation of the BBBP scheme with states and UTs**.

Statement 4 is correct: The Government has expanded the mandate of the 'Beti Bachao Beti Padhao' scheme, by inclusion of skilling of girls in non-traditional livelihood (NTL) options in its flagship program.

Knowledge Base:

Non-Traditional Livelihoods" (NTLs): sectors and jobs where participation of women is and has historically been conventionally low or absent. Like STEM (Science, Technology, Engineering, Mathematics) subjects due to gender-based categorization of the work, in the society.

Source: <https://www.thehindu.com/news/national/skilling-of-girls-in-non-traditional-livelihoods-included-in-beti-bachao-beti-padao-scheme/article65998460.ece>

Q.21) Consider the following pairs with reference to the famous kings of different dynasties during Sangam period:

Dynasty of Sangam Famous King
Period

- | | |
|-------------------|-----------------------------|
| 1. Chola dynasty | Simha Vishnu |
| 2. Chera dynasty | Senguttuvan |
| 3. Pandya dynasty | Arya Padai
Neduncheliyan |

How many pairs given above are correctly matched?

- Only one pair
- Only two pairs
- All three pairs
- None of the pairs

Ans) b

Exp) Option b is the correct answer.

South India was ruled by three dynasties the Cheras, Cholas and Pandyas during the Sangam Age,

Pair 1 is incorrect: Simha Vishnu was a ruler of the Pallava Dynasty.

Pair 2 is correct: Senguttuvan (Red Chera) was most important Chera ruler. He established the Kannagi or Pattini Cult. Kannagi became object of worship. He was the first King from South India to send an ambassador to China. Among his military achievements, his expedition to the Himalayas was remarkable. He defeated many north Indian monarchs.

Pair 3 is correct: King Arya Padai Neduncheliyan was the greatest ruler of the Pandyas. There were two Neduncheliyans. The 1st was **Arya Padai Kadantha Neduncheliyan** who executed Kovalan. It is said that the curse of the Kannagi, who was the wife of Kovalan, is the reason Madurai was burnt and destroyed. The other was **Talaiyalanganattu Cheruvenra Neduncheliyan** (He who won the **battle at Talaiyalanganam**). He wore this title after defeating his enemies at the Battle of Talaiyalanganam, which is located in the Tanjore district. By this victory, Neduncheliyan gained control over the entire Tamil Nadu.

As two pair are correctly matched. Hence, correct option is b.

Source: 11th class Tamil Nadu History + LESSON 8: SANGAM AGE

Q.22) With reference to Vakataka dynasty, consider the following statements:

- King Pravarasena was the founder of the Vakataka dynasty.
- Prabhavati, daughter of Chandragupta II, married to the Vakataka prince Rudrasena II.
- Riddhapur inscription is related to the Vakataka dynasty.
- Most of the region ruled by Vakatakas was taken over by the Chalukyas after its disintegration.

Which of the statements given above are correct?

- 1 and 2 only
- 3 and 4 only
- 2, 3 and 4 only
- 1, 2 and 4 only

Ans) c

Exp) Option c is the correct answer.

Vakataka dynasty, Indian ruling house originating in the central Deccan in the mid-3rd century CE, the empire of which is believed to have extended from Malwa and Gujarat in the north to the Tungabhadra in the south and from the Arabian Sea in the west to the Bay of Bengal in the east.

Statement 1 is incorrect: By the third century, the Satavahanas had collapsed and the Sakas were no longer the powerful force they had been. The stage was set in the Deccan for a local power to stake its claim. It is in this scenario that **Vindhyashakti (not Pravarasena)**, a Brahmin chieftain about whom not much is known, **founded the Vakataka empire. Pravarasena was the son of the Vindhyashakti.**

Statement 2 is correct: **Gupta King Chandragupta II gave his daughter Prabhavati in marriage to the Vakataka prince Rudrasena II.** The political importance of this marriage lies in the fact that the Vakatakas occupied a geographically strategic position in the Deccan. This alliance served a useful purpose when Chandragupta-II undertook his campaign in western India against the Sakas.

Statement 3 is correct: Some famous inscriptions of this dynasty are the **Poona copper plate** inscriptions and the **Riddhapur inscriptions** issued by **Queen Prabhavatigupta** (Wife of Vakataka King **Rudrasena II**)

Statement 4 is correct: The Vakataka dynasty disappeared soon after the death of King Harishena. **Most of the regions occupied by the Vakatakas had been taken over by the Chalukyas by 550 CE.**

Source: <https://www.firstpost.com/living/the-vakatakas-a-forgotten-empire-tracing-the-history-of-a-once-powerful-kingdom-that-mysteriously-faded-away-6814501.html>
Lucent.

Q.23) There were many educational institutions and universities set up in many cities during Gupta period. With reference to this, who laid the foundation of the Nalanda University?

- Samudragupta
- Chandragupta II
- Skandagupta
- Kumaragupta

Ans) d

Exp) Option d is the correct answer.

Kumaragupta was the son and successor of Chandragupta II. His reign was marked by general peace and prosperity. He issued a number of coins and his inscriptions are found all over the Gupta empire. He also **performed an asvamedha sacrifice.** Most importantly, **he laid the foundation of the Nalanda University** which emerged an institution of international reputation. At the end of his reign, a powerful wealthy tribe called the 'Pushyamitras' defeated the Gupta army. **Hence, option d is correct.**

Knowledge Base:

Samudragupta: The Allahabad Pillar inscription provides a detailed account of his reign. It refers to three stages in his military campaign: 1. Against some rulers of North India
2. His famous **Dakshinapatha expedition** against South Indian rulers. 3. A second campaign against some other rulers of North India. During **Dakshinapatha expedition, he did not destroy and annex those kingdoms.** Instead, he defeated the rulers but gave them back their kingdoms. He only insisted on them to acknowledge his suzerainty.

Chandragupta II: He is also known as Vikramaditya. The greatest of the military achievements of Chandragupta II was his **war against the Saka satraps** of western India. Rudrasimha III, the last ruler of the Saka satrap was defeated, dethroned and killed. The famous Chinese pilgrim. **Fahien** visited India during the reign of Chandragupta II.

Skandagupta: According to the inscription on his **Bhitari pillar**, Skandgupta restored Gupta supremacy across the subcontinent by defeating his enemies, who could have been rebels or foreign invaders. He repelled an invasion by the Indo-Hephthalites (known as Hunas in India).

SFG 2023 | LEVEL 2 | Test #35 – Solutions | ForumIAS

Q.24) Chandragupta II was known for his deep interest in art and culture and nine gems or Navratna adorned his court. With reference to Navratna, consider the following statements:

1. Kahapanka was mainly an Architect.
 2. Sanku was related to the field of Astrology.
 3. Dhanvantri was a Physician.
- Select the correct answer using the code given below.

- a) 1 and 2 only
- b) 3 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

Chandragupta-II was known for his deep interest in art and culture and nine gems or Navratna adorned his court.

Statement 1 is incorrect: Kahapanaka: Kahapanka was an **Astrologer (not Architect)**

Statement 2 is incorrect: Sanku: Sanku was in the field of **Architecture (not Astrologer)**.

Statement 3 is correct: Dhanvantri was a great Physician.

Knowledge Base:

Other Gems of Chandragupta II Court were-

Amarsimha: Amarsimha was a Sanskrit lexicographer and a poet. His **Amarkosha** is a vocabulary of Sanskrit roots.

Harisena: Harisena is known to have composed the **Prayag Prasasti or Allahabad Pillar Inscription**.

Kalidasa: Kalidasa is the immortal **poet and playwright** of India and a peerless genius whose works became famous worldwide in modern world.

Vararuchi: Vararuchi is the name of another gem of Chandragupta Vikramaditya who was a **grammarian and Sanskrit scholar**.

Vetalbhatta: Vetalbhatta was an author and probably a magician.

Q.25) Which of the following schemes are implemented by the Ministry of Agriculture and Farmers Welfare?

1. National Agriculture Market (eNAM) scheme.
2. Operation Greens.
3. National Mission on Edible Oils–Oil Palm (NMEO–OP).
4. The Rashtriya Gokul Mission (RGM).
5. New Agricultural Marketing Infrastructure Scheme
6. Paramparagat Krishi Vikas Yojana (PKVY)

Select the correct answer using the code given below:

- a) 1, 2, 3 and 6 only
- b) 1, 3, 5 and 6 only
- c) 1, 5 and 6 only
- d) 2, 4 and 5 only

Ans) b

Exp) Option b is the correct answer.

Option 1 is correct: National Agriculture Market (eNAM) scheme is being implemented by the Ministry of Agriculture and Farmers welfare. National Agriculture Market. (eNAM) is a pan-India electronic trading portal which networks the existing APMC mandis to create a unified national market.

Option 2 is incorrect: Operation Greens scheme is a component of Pradhan Mantri Kisan SAMPADA Yojana and it is being implemented by the Ministry of Food Processing Industries (MoFPI). Operation Green The scheme aims to reduce post-harvest losses of perishable products such as Tomatoes, Onion and Potato referred to as TOP crops. Recently the scheme extends to cover other perishable products such as Mango, Banana, Apple, Pineapple, Carrot, Cauliflower, Beans etc.

Option 3 is correct: The National Mission on Edible Oils – Oil Palm (NMEO-OP) is a new Centrally Sponsored Scheme being implemented by the Ministry of Agriculture and Farmers' Welfare. The scheme lays special focus on the Northeast region and the Andaman and Nicobar Islands to improve the domestic production of palm oil.

Option 4 is incorrect: The Rashtriya Gokul Mission (RGM) is implemented by the Ministry of Fisheries, Animal Husbandry and Dairying. The scheme aims to enhance productivity of bovines and increase milk production in a sustainable manner using advanced technologies.

Option 5 is correct: The New Agricultural Marketing Infrastructure (AMI) is being implemented by the Ministry of Agriculture and Farmers' Welfare. The scheme provides assistance for construction, renovation of godowns and warehouses in the rural areas to enhance the storage capacity for agricultural produce.

Option 6 is correct: Paramparagat Krishi Vikas Yojana is being implemented by the Ministry of Agriculture and Farmers' Welfare. It is a component of Soil Health Management (SHM) of the major project National Mission of Sustainable Agriculture (NMSA). The scheme aims at supporting and promoting organic farming which in turn results in improvement of soil health.

Q.26) Consider the following statements regarding the Chalukyas of Badami:

1. Chalukyas were the founders of Dravida style of temple architecture.
2. The Aihole Inscription mentions the victory of Harshavardhana over Pulakesin II of Chalukya dynasty.
3. Pattadakal is a UNESCO World Heritage site built by the Chalukyas of Badami.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Chalukyas set up their kingdom towards the **beginning of the sixth century A.D.** and ruled over an extensive area in the Deccan for about two centuries. **Pulakesin I** was the founder of the Chalukya dynasty. He established a small kingdom with **Vatapi or Badami** in Karnataka **as its capital. Pulakeshin II** was an important ruler belonging to the Chalukya dynasty. **Badami, Aihole and Pattadakal** were the centers of their art.

Statement 1 is incorrect: The earliest **Badami Chalukya** temples date back to around 450 A.D. in Aihole. Chalukyas were great patrons of the art. The **Vesara style (and not the Dravida style) of architecture was**

started by the Chalukyas of Badami. It was essentially a mixture of the Nagara and the Dravida styles. Pallavas were the founders of Dravida style of temple architecture. So, statement 1 is incorrect.

Statement 2 is incorrect: During the reign of Pulakesin II, Harshavardana attacked the kingdom. Pulakesin II emerged victorious. This information is derived from the Aihole Inscription, composed by the Jain poet Ravikirti. It has also been found in accounts of Hiuen Tsang. So, statement 2 is incorrect.

Statement 3 is correct: Pattadakal is a UNESCO World Heritage site built by the Chalukyas of Badami for royal commemoration and coronation. It was accorded World Heritage Status by UNESCO in 1987. It is a large complex of ten temples here – 4 in Nagara style and 6 in Dravida style. The Mallikarjuna and the Virupaksha temples at Pattadakal were built by two queens of Vikramaditya II, to commemorate the victory of the Chalukyas over the Pallavas.

Q.27) Which of the following foreign travellers visited India during the reign of Harshavardhana?

1. Hiuen-Tsang
2. Fa-Hien
3. Megasthenes

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 1 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

Travelers who came to India wrote their own accounts which deal with its unique focus areas. Some travelers wrote about the **affairs of the court** while some focused on **contemporary style of architecture and monuments** or **depicted the social and economic life**. Every such account presents a true picture of the then Indian Civilisation.

Option 1 is correct: Hiuen-Tsang (629 to 645 CE) visited India during the rule of Harshavardhana. **Huen Tsang or Xuanzang** was a **Chinese Buddhist traveler** who compiled his work in Journey **to the West**. He admired Harshavardhan for his deep devotion towards **Buddhism**. He returned with over six hundred **Mahayana and Hinayana** texts.

Option 2 is incorrect: Fa-Hien (405-411 CE) was a **Chinese Buddhist** monk. He visited India during the reign of **Vikramaditya (Chandragupta II)**. He also visited **Lumbini**, the birthplace of the Buddha. His voyage is described in his work **Record of Buddhist Kingdoms**. His book details the **religious and social life** of Indians at that time. He wrote about cities like **Taxila, Pataliputra, Mathura, and Kannauj**. So, statement 2 is incorrect.

Option 3 is incorrect: Megasthenes (302-298 BCE) was **Seleucus Nicator's ambassador** who visited the country during the reign of Chandragupta **Mauryan**. On his visit to India, he wrote a **book called INDICA** based on India. It gives details of soils, rivers, plants, animals, **administration and the social and religious life of India**. As per him **endogamy and hereditary** occupation were two major aspects of the Indian caste system. So, statement 4 is incorrect.

<https://ncert.nic.in/textbook/pdf/lehs201.pdf>

Q.28) Which of the following temple belongs to the period of Chalukyas of Badami?

1. Ravana Phadi Cave Temple
2. Chennakeshava Temple
3. Ladhkan Temple of Aihole
4. Kailasa Temple of Ellora

Select the correct answer using the code given below:

- a) 1 and 3 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) a

Exp) Option a is the correct answer.

The **Chalukyas of Badami** have made great contributions to Indian Art and Architecture. Building of **Stambha Mandapa (Navaranga) and Sukhanasi** (an external ornamented feature over the entrance to the garbhagriha or inner shrine) **along with the Garbhagriha** was a unique contribution of the Chalukyas. They built their temples using **red sandstone in Vesara style** (a mix of Nagara Dravida style). **Badami, Aihole and Pattadakal** were the centers of their art. Chalukyan architecture has a **small base design, horseshoe base, square Garbhagriha, inner pradakshina patha**. Some of these temples had flat roofs while some had sloping roofs.

Option 1 is correct: The Ravana Phadi Cave Temples is the earliest known monument built by the Badami branch of the Chalukyas. This rock-cut cave temple was built in the 6th century and is **dedicated to Shiva**. The interiors of Ravana Phadi are filled with carvings **depicting Hindu mythologies**. Sculptures of Shiva

along with Parvati and Lord Ganesha are present. It has a simple facade with two pillars at the entrance, flanked by a unique pair of dwarapala.

Option 2 is incorrect: Chennakeshava Temple is also referred to as **Keshava** or **Vijayanarayana temple of Belur**. It is a **12th-century Hindu temple in Karnataka**. The temple was commissioned by **Hoysala King Vishnuvardhana** in 1117 CE, on the banks of the Yagachi River in Belur, an early Hoysala Empire capital. The richly sculptured exterior of the temple narrates scenes from the **life of Vishnu and his reincarnations** and the epics, **Ramayana, and Mahabharata**. It also includes themes from **Shaivism and Shaktism** as well as from **Jainism and Buddhism**. So, option 2 is incorrect.

Option 3 is correct: The **Ladkhan temple of Aihole** belongs to the 5th century CE built by Chalukya dynasty. It was initially used as a **panchayat hall where Chalukya ruler Pulakesi I** performed horse sacrifices. Later it was turned into a temple – first **Surya Temple and then Shivalay**. Since it is early construction, the pillars are relatively carving free. The most beautiful part of the temple is the **lattice windows with intricate carvings** taking inspiration from northern temples.

Option 4 is incorrect: Kailasa Temple was built as a dedication to **Lord Shiva**. This Kailash temple was made by the **Rashtrakuta king, Krishna I** in the 8th Century A.D. The Kailasanatha temple (**Cave 16**) is one of the **34 cave temples** and monasteries known collectively as the **Ellora Caves**. This temple is considered as one among the most astonishing buildings in the history of architecture. So, option 4 is incorrect.

Q.29) Consider the following statements regarding the reign of Pallavas of Kanchipuram:

1. 'Ur' was a unit of administration during the Pallava period.
2. Kailasanathan temple at Kanchipuram was built by Pallavas in Dravidian style.
3. Bharavi and Dandin were the court poets of the Pallavas.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Pallavas established their authority over south Andhra Pradesh and north Tamil Nadu. They established the **capital as Kanchi/Kanchipuram**, which became an important **temple town and a center of trade and commerce**. The Pallavas rose to power during the reign of **Mahendravarman** and **Narasimhavarman I**. **Narasimhavarman I, also known as Mamalla**, expanded the empire. **The Shore Temple at Mamallapuram and the Kailasanatha temple** at Kanchipuram were built in **Narasimhavarman II period**.

Statement 1 is correct: **The inscriptions of the Pallavas mention a number of local assemblies. The Ur or village** was the **smallest administrative unit** in the Pallava Kingdom. It was **under the control of the village Sabha (village committees)**. They functioned through **subcommittees**, which looked after **irrigation, agricultural operations, making roads, local temples**, etc. The village Sabha remained almost **autonomous** in looking after the day to day administration of the village.

Statement 2 is correct: The Pallava rulers constructed **stone temples** in the seventh and eighth centuries **to house the images of gods**. The Pallavas also built many structural temples. **Kailasanathan Temple** was

built by the Pallavas during 650 AD– 705 AD. It is a **Dravidian style architecture temple**. Unlike the nagara temple, the Dravidian temple is **enclosed within a compound wall**. The front wall has an entrance gateway in its center, which is known as a **gopuram**.

Statement 3 is correct: Tamil bhakti literature in South India developed during Pallava's period. **Bharavi and Dandin** were court poets of Pallavas. **Bharavi wrote Kiratarjuniyam**. **Dandin composed Dashakumaracharita**. **Vaishnavite and Shaivite literature** flourished during this period. **Sanskrit was the chief language** among the royals and scholars. Some of the inscriptions are in a mix of **Tamil and Sanskrit**.

<https://ncert.nic.in/textbook/pdf/kefa106.pdf>

Q.30) With reference to Mission Saksham Anganwadi and Poshan 2.0 scheme, consider the following statements:

1. The Scheme seeks to address malnutrition in children up to age of 18 years, and pregnant and lactating mothers.
2. Raw ration like rice and dal will be provided as Take-Home Ration (THR) to the beneficiaries.
3. Ayush practices will be incorporated to address malnutrition.
4. Food items should compulsorily include millets for at least once a week.
5. It is a centrally sponsored scheme.

Which of the statements given above are correct?

- a) 1 and 3 only
- b) 3, 4 and 5 only
- c) 2, 3, 4 and 5 only
- d) 1, 2, 4 and 5 only

Ans) b

Exp) Option b is the correct answer.

SFG 2023 | LEVEL 2 | Test #35 – Solutions | 

Mission Saksham Anganwadi and Poshan 2.0 is an Integrated Nutrition Support Programme. Poshan 2.0 shall contribute to SDG 2 on Zero Hunger and SDG 4 on Quality Education.

Statement 1 is incorrect: Poshan 2.0 aims to address the situation of malnutrition among **children up to the age of 06 months to 6 years**, pregnant women and lactating mothers (PWLM) and for Adolescent Girls in the age group of 14 to 18 years in Aspirational Districts and North Eastern Region (NER).

Statement 2 is incorrect: Take-Home Ration (THR) **will not be given in the form of raw ration (Wheat, Rice, Dal etc.)**. Take Home Ration (THR) shall be prepared using locally available and culturally appropriate food ingredients. Take Home Ration must ensure dietary diversity and last mile delivery to the beneficiary. States can provide Hot Cooked Meals (HCM) also to the beneficiaries in lieu of THR but not the raw ration.

Statement 3 is correct: AYUSH practices will be integrated under Poshan 2.0 for wellness and nourishment. Using AYUSH formulations will help in addressing conditions like anaemia. The Science of AYUSH is a system that builds and promotes health and wellness and can address the requirements of nutrition by tapping into the country's indigenous traditional practices. AYUSH will promote campaigns of 'Yoga at Home, Yoga with Family' to practice yoga and stay healthy.

Statement 4 is correct: The food items for Take Home Ration (not raw ration) and Hot Cooked Meals (HCM) **should mandatorily include millets for at least once a week**.

Statement 5 is correct: **The scheme will be centrally-sponsored scheme**. Hence, will be implemented through the State Governments/ UT administrations based on a cost sharing ratio between the Central Government and the State Government.

Knowledge Base: other features include:

- 1) The '**Poshan Tracker**' application was rolled out. Technology under the Poshan Tracker will be used for identification of stunting, wasting, under-weight prevalence among children and last mile tracking of nutrition service delivery.
- 2) The Ministry of AYUSH shall extend technical support for scheme implementation.

Q.31) Which of the following rulers assumed the title of 'Rajamalla', which means 'the Sovereign of the Mallas'?

- a) Pulakesin II
- b) Narasimhavarman I
- c) Vikramaditya I
- d) Adityavarman

Ans) c

Exp) Option c is the correct answer.

Vikramaditya I (655–680 AD) was the son of Pulakesin II and succeeded his father on the Chalukya throne. He adopted the title '**Rajamalla**' which means '**the Sovereign of the Mallas**'. He also defeated the Cheras, Cholas and Pandyas. He re-established the kingdom and **forced the Pallavas to flee the capital, Vatapi**. His other titles indicative of his military power include **Rana-rasika (lover of war)**, **Anivarita (unopposed)**.

Source: Old XI NCERT of Ancient India

Q.32) In the context of history of India, terms "Maitrakas" and "Maukharies" refers to-

- a) names of the ruling dynasties of the Ancient India
- b) official currencies in circulation in Pushyabhuti's Kingdom
- c) units of measurement prevalent during the Gupta Period
- d) provincial level units of administration of the Huna Dynasty

Ans) a

Exp) Option a is the correct answer.

“Maitrakas” and “Maukharies” are names of dynasties in the post Gupta period.

Maitraka dynasty was the Indian dynasty that ruled in Gujarat and Saurashtra (Kathiawar) from the 5th to the 8th century CE. Its founder, Bhatarka, was a general who, taking advantage of the decay of the Gupta empire, established himself as ruler of Gujarat and Saurashtra with Valabhi (modern Vala) as his capital. Although the early Maitraka kings were loosely feudatory to the Guptas, they were in fact independent. Under the powerful Shiladitya I (c. late 6th century), the kingdom became very influential; its rule extended into the regions of Malwa and Rajasthan. Later, however, the Maitrakas suffered at the hands of the Chalukyas of the Deccan and of the emperor Harsha of Kannauj.

The Maukharis (554 CE - 606 CE) rose as a power after the downfall of the Gupta Empire (3rd to 6th century CE) in the 6th century CE in northern India. The core area of their kingdom was situated in what is now the state of Uttar Pradesh in India with the capital at Kanyakubja (modern-day Kannauj city). Although the Maukharis had long existed as a feudatory dynasty, for nearly half a century beginning 554 CE, they established a powerful kingdom vying with other regional powers for political supremacy in India. **Therefore, option a is the correct answer.**

Source: <https://www.britannica.com/topic/Maitraka-dynasty>

https://www.worldhistory.org/Maukhari_Dynasty/

Q.33) Consider the following statements regarding Chola Architecture:

1. A tall curving shikhara crowned by a large amalaka is a signature style of the Chola temple architecture.
2. Chola temple architecture largely followed star-like ground-plans and a profusion of decorative carvings.
3. The Brihadeeswarar temple at Tanjavur is a masterpiece of Chola architecture.

Which of the statements given above is/are correct?

- a) 3 only
- b) 1 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The great Cholas established a powerful monarchy in the 9th CE at Thanjavur and in its surroundings. They enjoyed a long, eventful rule lasting for four and a half centuries with great achievements in all fields of royal endeavour such as military conquest, efficient administration, cultural assimilation and promotion of art.

Statement 1 is incorrect: The style of the sculptures during the period between the ninth and eleventh centuries in Bengal (including Bangladesh) and Bihar is known as **the Pala style. The ninth century Siddheshvara Mahadeva temple in Barakar in Burdwan District, shows a tall curving shikhara crowned by a large amalaka and is an example of the early Pala style.**

Statement 2 is incorrect: The hybridisation and incorporation of several styles was the hallmark of Chalukyan architecture and not the Chola architecture. **Hoysala temples are sometimes called hybrid or vesara as their unique style seems neither completely dravida nor nagara, but somewhere in between. They are easily distinguishable from other medieval temples by their highly original star-like ground-plans and a profusion of decorative carvings.**

Statement 3 is correct: **The Brihadeeswarar temple at Tanjavur marks the greatest achievement of the Chola architects. It is known in the inscriptions as Dakshina Meru, the construction of this temple was**

SFG 2023 | LEVEL 2 | Test #35 – Solutions |

inaugurated by the Chola King, Rajaraja I. A massive colonnaded prakara with sub-shrines dedicated to the ashatadikpalas and a main entrance with gopura (known as Rajarajantiruvasal) encompasses the massive temple. The temple walls are embellished with expansive and exquisite mural paintings.

Q.34) Which of the following literary works are the creations of the Harshavardhana?

1. Kadambari
2. Priyadarsika
3. Rathnavali
4. Nagananda

Select the correct answer using the codes given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 2, 3 and 4 only
- d) 1, 3 and 4 only

Ans) c

Exp) Option c is the correct answer.

Harsha patronised literary and cultural activities. It is said the state spent a quarter of its revenue for such activities. Harsha gifted liberally for the promotion of education.

Option 1 is incorrect: Bana was a court poet of Harsha. He composed the following literary works:

- 1) Harshacharita
- 2) **Kadambari**

Option 2, 3 and 4 are correct: Whereas Harsha himself was a renowned litterateur; it is evident from the plays he wrote such as: **Priyadarsika, Rathnavali and Nagananda.**

Source: Tamil Nadu State Board- History, Volume-1

Q.35) Consider the following pairs with respect to the various schemes of the Government of India:

Schemes	Description
1. Raising and Accelerating MSME Performance (RAMP)	Supporting the COVID-19 related resilience and recovery in MSMEs.
2. Global Initiative of Academic Networks (GIAN) scheme	leveraging international scientists and entrepreneurs to engage with higher education in India.
3. Revitalizing Infrastructure and Systems in Education (RISE) Scheme	Joint research projects between Indian and globally ranked foreign institutions.

How many pairs given above are correctly matched?

- a) One pair only
- b) Two pairs only
- c) Three pairs only
- d) None of the pairs

Ans) b

Exp) Option b is the correct answer.

Pair 1 is correct: Raising and Accelerating MSME Performance (RAMP) is a World Bank assisted Central Sector Scheme. It aims to **support (COVID-19) Resilience and Recovery Interventions of the Ministry of Micro, Small and Medium Enterprises (MoMSME).**

Pair 2 is correct: Global Initiative of Academic Networks (GIAN) has been launched by the Union Ministry of Human Resource Development (HRD) in 2015. GIAN aims at tapping the talent pool of scientists and entrepreneurs, internationally to encourage their engagement with the institutes of Higher Education in India.

Pair 3 is incorrect: Under the RISE scheme, all the Educational Institutes that provide higher studies will get funds for infrastructural development from the central government at much lower cost. The Scheme for Promotion of Academic and Research Collaboration (SPARC) aims at research collaborations between Indian Institutions and the best institutions in the world from 28 selected nations to jointly solve problems of national and/or international relevance.

Q.36) Consider the following statements regarding the religious policy of Harshavardhana:

1. Harsha was a follower of the Mahayana school of Buddhism.
2. He summoned an assembly at Kanauj to highlight the teachings of Buddha.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Harshavardhana was one of the most important Indian emperors of the 7th Century. During the peak of his reign, Harshavardhana's empire extended from north India to the Narmada River in central India. His rule was renowned for peace, stability and prosperity, and attracted many artists and scholars from far and wide.

Statement 1 is correct: Harsha was a worshipper of Siva at least up to 631 CE. But he embraced Buddhism under the influence of his sister Rajyasri and the Buddhist monk Hieun Tsang. **He subscribed to the Mahayana school of thought.**

Statement 2 is correct: In the year 643 A.D., Harsha held a great religious assembly in his capital at Kanauj on the bank of the river Ganges. **The purpose of the assembly was to highlight the teachings of Buddha.**

On that occasion, Harsha also wanted to honour the Chinese Master of the Law, Hiuen Tsang. Harsha himself proposed the name of Hiuen Tsang to take the chair. The subject of discussion in the assembly related to Mahayana Buddhism.

Source: Tamil Nadu State Board- History, Volume-1

Q.37) He was a great Chola king who extended the influences of Chola empire upto the banks of the river Ganges in the north and across the Indian ocean. To commemorate his victory, he built a new capital called Gangaikonda Cholapuram. He assumed the titles Parakesari and Yuddhamalla.

Who among the following is described in the paragraph given above?

- a) Rajaraja Chola I
- b) Rajaraja Chola II
- c) Rajendra Chola I
- d) Rajendra Chola II

Ans) c

Exp) Option c is the correct answer.

The great Cholas established a powerful monarchy in the 9th CE at Thanjavur and in its surroundings. They enjoyed a long, eventful rule lasting for four and a half centuries with great achievements in all fields of royal endeavour such as military conquest, efficient administration, cultural assimilation and promotion of art.

Option a is incorrect: Rajaraja Chola I is considered as the greatest king of the Chola Empire who ruled between 985 and 1014 C.E. He laid the foundation for the growth of the Chola kingdom into an empire, by conquering the kingdoms of southern India and the Chola Empire expanded as far as Sri Lanka in the south, and Kalinga (Orissa) in the northeast. He streamlined the administrative system with the division of the country into various districts and by standardizing revenue collection through systematic land surveys. He built the magnificent Brihadisvara Temple in Thanjavur and through it enabled wealth distribution among his subjects.

Option b is incorrect: Rajaraja Chola II was not a great king like his predecessors, but he was successful in maintaining a vast Chola kingdom which included Madurai, Kongunadu, Thirunelveli, Nellore, Guntur, Vijayawada, Rajahmundry and Kalinga, given to him by his father. Northern Sri Lanka was also under his control. He succeeded his father Kulothunga II in 1150 A.D. His reign is considered as the start of downfall of the great Chola empire of South India.

Option c is correct: Rajendra Chola I was the great Chola king of South India who succeeded in 1014 C.E. as the Chola emperor. During his reign, he extended the influences of the Chola empire to the banks of the river Ganges in the north and across the Indian ocean. Rajendra's territories extended to coastal Burma, the Andaman and Nicobar Islands, Lakshadweep, Maldives, conquering the kings of Srivijaya (Sumatra, Java, and Malaya in South East Asia) and the Pegu islands with his fleet of ships. He defeated Mahipala, the Pala king of Bengal and Bihar. To commemorate his victory, he built a new capital called Gangaikonda Cholapuram. He also built a temple for Siva at Gangaikonda Cholapuram. He assumed titles Parakesari and Yuddhamalla.

Option d is incorrect: Rajendra Chola II is very well remembered for his role in "The Battle Of Koppam". He ruled between 1054-1063 A.D. He succeeded his brother Rajadhiraja Chola in 1054 A.D. He was successful in maintaining a vast empire which was given to him by his elder brother. No loss of territory was recorded during his reign.

Q.38) Vakatakas carved out a large kingdom in the western Deccan and were a dominant political force during their time. Vakatakas were the contemporaries of which of the following dynasties?

- Gupta Dynasty
- Gurjara-Pratihara Dynasty
- Maurya Dynasty
- Rastrakuta Dynasty

Ans) a

Exp) Option a is the correct answer.

In peninsular India, the **Vakatakas**, were a local power that **ruled over northern Maharashtra and Vidarbha**. Their history can be reconstructed on the basis of a large number of land grant charters issued to the brahmanas. This dynasty ruled south-western India **from 250-550 AD. Vakatakas were contemporaries of Guptas. Gupta King Chandragupta II gave his daughter Prabhavati in marriage to the Vakataka prince Rudrasena II.** The political importance of this marriage lies in the fact that the Vakatakas occupied a geographically strategic position in the Deccan. This alliance served a useful purpose when Chandragupta-II undertook his campaign in western India against the Sakas.

Source: 11th Class Tamil Nadu Ncert + Lesson 9: GUPTA EMPIRE

<https://www.financialexpress.com/india-news/capital-of-vakataka-dynasty-who-ruled-deccan-built-ajanta-caves-excavated-in-nagpur/1203151/#:~:text=The%20capital%20of%20the%20Vakataka,India%20from%20250%2D550%20A.D.>

Q.39) With reference to the ruler Parantaka I of the Chola Dynasty, consider the following statements:

- He defeated both the Pandyas and the Rashtrakutas.
- He took up the titles 'Madurai Kondan' and 'Kunjaramallan'.
- He took a keen interest in promotion of agriculture and local self-government.

Which of the statements given above is/are correct?

- 1 only
- 1 and 2 only
- 2 and 3 only
- 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Parantaka I (873 CE–955 CE) was a ruler of the **Chola kingdom** in Tamil Nadu. He was the son of Aditya I. He extended his boundary by conquering many parts of Southern India. He also extended his empire **up to Nellore in the north.**

Statement 1 is correct: Parantaka I captured the **Pandyan capital Madurai by defeating Rajasimhan II. kingdom.** He also won the **battle of Vallala** against **Rashtrakutas** in the Deccan. The best part of his reign was marked by increasing success and prosperity.

Statement 2 is correct: Parantaka I **assumed the title Madurai Kondan (Capturer of Madurai)** to commemorate his victory over the Pandya king. The **Uttaramerur inscriptions** speak about the stories of Parantaka I. He also took title of Panditavatsalan (fond of learned men), Kunjaramallan (the wrestler with elephants) and Surachulamani (the crest jewel of the heroes).

Statement 3 is correct: Parantaka I took a keen interest in the **internal administration** of his country. He laid out the rules for the **conduct of the village assemblies** in an inscription. He also introduced many **salutary reforms for the proper administration of local self-Government.** The **copper-plate inscriptions**

detail Parantaka I's **promotion of agricultural prosperity** by the **digging of numerous canals** all over the country.

Knowledge Base: The Vimana of the famous **Nataraja temple at Chidambaram** with a golden roof was provided by Parantaka I. He was devout and a **follower of lord Siva** (and not of lord Krishna). He was **religious but secular** and encouraged various faiths. He utilized the spoils of war to donate to numerous **temple charities**.

Q.40) Which of the following statements regarding the SMILE-75 initiative is correct?

- It aims to empower women of minority groups through educational, financial & digital literacy.
- It aims to provide micro-credit to street vendors.
- It aims to provide residential education to talented Schedule Caste students in private schools.
- It aims to provide alternate livelihood and rehabilitation to people involved in beggary.

Ans) d

Exp) Option d is the correct answer.

Statement a is incorrect: **Nayi Roshni (not SMILE-75)** is a scheme of the **Ministry of Minority Affairs for Leadership Development** among **women of minority groups**. Hence this statement is **incorrect**. This scheme plans to do so by providing such women with **education** (including adult education), as well as **training in digital skills** (using computers, internet, etc) as well as **financial literacy** (concepts like savings, insurance, investment, etc), so that they **feel more confidence** and are **empowered to take care of themselves** and improve their lives.

Statement b is incorrect: The **PM SVANidhi (Street Vendor's Atmanirbhar Nidhi) (not SMILE-75)** is a scheme for providing **micro-credit loans to street vendors**. Hence this statement is **incorrect**. It is a scheme of the **Ministry of Housing and Urban Affairs (MoHUA)** to provide **working capital loans (of up to Rs 10,000 for a 1-year term)** to street vendors registered with municipal bodies so that they may **resume their livelihood after the easing of lockdown** in later months of 2020.

Statement c is incorrect: The **SRESTHA Yojana (Scheme for Residential Education for Students in High Schools in Targeted Areas) (not SMILE-75)** is a scheme of **Ministry of Social Justice & Empowerment** to help in **socio-economic upliftment of meritorious students from Scheduled Caste**. Hence this statement is **incorrect**. This scheme aims to provide **residential education** to meritorious SC students in **reputed private schools, on government expense** (which they may have been otherwise unable to afford) in order to provide the them with the best education and opportunities to do better in life.

Statement d is correct: **SMILE-75 (Support for Marginalised Individuals for Livelihood & Enterprise)** is a scheme that aims to **remove the issue of beggary** from Indian cities. It provides **comprehensive rehabilitation including alternate livelihood for vulnerable and marginalised** people who have been **forced by life circumstances to resort to beggary**. This scheme has interventions like **housing, education, free medical facilities & skill development** to ensure that people do not have to beg in order to survive.

Knowledge Base:

- It is a Central Sector Scheme (100% Union funding) implemented by the Union Ministry of Social Justice & Empowerment.
- It was launched earlier in 2022 along with a scheme for upliftment and rehabilitation of Transgender people. However, it was relaunched in August this year as a part of "Azadi ka Amrit Mahotsav ", to celebrate 75 years of India's independence, hence the name SMILE-75.
- It will be launched in jurisdiction of 75 selected Municipal Corporations
- It will be a joint effort by Local Urban Bodies, Civil Society Organisations/Non-Government Organisations and experts on the phenomenon of beggary

- 5) Housing facilities will be provided in the form of 'Garima Grah' to ensure basic necessities like food, clothing, recreational facilities, etc are met.
- 6) The SMILE-75 scheme dovetails and converges many existing schemes of the government for the vulnerable and marginalised communities. To ensure rehabilitation, beneficiaries will be provided scholarships to attain meaningful education, skill development training in order to earn livelihood from alternate means, subsidised/ free medical facilities so that their healthcare expenses are taken care of, etc.
- 7) The SMILE-75 project has been provided with a budget of about 100 crores for a multi-year (not 1 year) period until 2025-26.

Q.41) Consider the following statements with reference to the ancient Chera Dynasty of South India:

1. The Pugalur inscription is related to the Chera dynasty.
2. Important seaports of Cheras were Puhar and Korkai.
3. Bow and arrow are engraved on most of the coins of Cheras.
4. Uraiyur was the capital of the Chera dynasty.

Which of the statements given above are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) a

Exp) Option a is the correct answer.

The Cheras ruled over parts of modern Kerala. Their capital was Vanji. Perum Sorru Udhiyan Cheralathan, Imayavaramban Nedum Cheralathan and Cheran Senguttuvan were the famous rulers of this dynasty.

Statement 1 is correct: The **Pugalur inscription** which mentions **three generations of Chera rulers**, provides information on Chera kings.

Statement 2 is incorrect: The important seaports of Cheras were **Tondi and Musiri**. While **Puhar** was the famous seaport of Cholas and **Korkai** was the capital, principal center of trade and important port of the Early Pandyan Kingdom.

Statement 3 is correct: Most of the **coins of Cheras had bow and arrow** engraved on them, which was the emblem of the Cheras.

Statement 4 is incorrect: Initially, the **capital of the Cholas** was **Uraiyur**. Later it was shifted to Puhar. **While capital of Cheras was Vanji or Kuravur/Karur**. As many as 11 Sangam poets hailed from this place. It can be identified with Karur on the banks of the Amaravati river (a tributary of the Kaveri), in Tiruchirapalli district.

A History of Ancient and Early Medieval India: From the Stone Age to the 12th Century by Upinder Singh

Q.42) Sangam literature is main source of history of ancient South India. In this reference, which of the following are the sources of Sangam Age?

1. Pattinappalai
2. Ettutogai
3. Mattavilasa Prahasana
4. Periyapuranam

Select the correct answer using the code given below.

- a) 1 and 2 only
- b) 1, 2 and 3 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) a

Exp) Option a is the correct answer.

The corpus of Sangam literature includes Tolkappiyam, Ettutogai, Pattuppattu, Pathinenkilkanakku– and the two epics Silappathigaram and Manimegalai.

Statement 1 is correct: **Pattinappalai** is a Tamil poem in the **ancient Sangam literature**. It contains 301 lines, of which 296 lines are about the port city of Kaveripoompattinam, the early Chola kingdom and the Chola king Karikalan.

Statement 2 is correct: The Eight Anthologies, known as **Ettuttokai** or "Eight Collections" in the literature, is a classical Tamil poetic work of **Sangam Literature**. The Eight Anthologies called Ettuthokai namely Aingurunooru, Nattrinai, Aganaooru, Purananooru, Kuruntogai, Kalittogai, Paripadal, Padirrupattu.

Statement 3 is incorrect: The **Pallavas** were staunch supporters of both the Sanskrit and Tamil languages. Kanchi, their capital, had remained an important centre for Sanskrit learning. **Mahendravarman I**, the Pallava monarch, wrote the **Mattavilasa Prahasana**. Pallava Dynasty emerged after the end of Sangam Era. Hence, **Mattavilasa Prahasana is not a Sangam Literature**.

Statement 4 is incorrect: **Periyapuranam** is a Tamil poetic account depicting the lives of the 63 Nayanars. It was compiled **during the 12th century** by **Sekkilhar**. It provides evidence of trade with West Asia. Whereas Sangal Era ended during 200AD. . Hence, **Periyapuranam is not a Sangam Literature**.

Q.43) Consider the following statements regarding the King Harshavardhana:

1. He was successful in establishing cordial relationship with China.
2. He played a crucial role in emancipation of the status of women by completely banning purdah and sati traditions.
3. Pataliputra and Kashi rose to prominence during Harsha's times.

Which of the statement/s given above is/are correct?

- a) 1 only
- b) 2 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) a

Exp) option a is the correct answer.

Harshavardhana was one of the most important Indian emperors of the 7th Century. During the peak of his reign, Harshavardhana's empire extended from north India to the Narmada River in central India. His rule

was renowned for peace, stability and prosperity, and attracted many artists and scholars from far and wide.

Statement 1 is correct: Harsha had cordial relations with China. The contemporary T'ang emperor, Tai Tsung, sent an embassy to Harsha's court in 643 and again in 647 CE. It highlights the nature of relationship between the two powers.

Statement 2 is incorrect: Harsha did not ban purdah system and sati tradition during his period. Rather position of women declined considerably during this period. Hieun Tsang's account provides information on the position of women and the marriage system during Harsha's times. **Women wore purdah.** Hieun Tsang, however, added that the purdah system was not followed among the higher class. He pointed out that Rajyasri did not wear purdah when listening to his discourse. **Sati was in practice.** Yasomatidevi, wife of Prabhakara Vardhana (Harsha's elder brother), immolated herself after the death of her husband.

Statement 3 is incorrect: Hieun Tsang, the Chinese pilgrim, spent nearly 13 years in India (630–643 CE). His book Si-Yu-Ki provides detailed information about the social, economic, religious and cultural conditions during the reign of Harsha. Hieun Tsang describes the structure, aesthetics and safety measures of the cities, towns and villages of India. In his view, India was the land of innumerable villages, numerous towns and big cities like China. **He pointed out that Pataliputra lost its prominence during Harsha's times and its place was taken by Kanauj.** The elegance of Kanauj with its lofty structures, beautiful gardens and the museum of rare collections is described.

Tamil Nadu State Board- History, Volume-1

Q.44) With reference to the trade and commerce in ancient Indian History, the terms like Barygaza, Supara and Kalyan are-

- Taxes and Customs
- Ports for transmarine commerce
- Interest charged by moneylenders
- Guild system of traders

Ans) b

Exp) Option b is the correct answer.

In context of Ancient Indian History, Barygaza, Supara and Kalyan were the **important ports of transmarine commerce** by third century BC.

- In the 3rd century, **Bharuch port in Gujarat** was mentioned as Barugaza. It was known to the Greeks and Romans as **Barygaza**, and probably had a settlement of Greek traders.
- Sopara** was an ancient port town and the capital of the ancient Aparanta. The ancient port of Sopara was the most important port in western India. The site of this ancient town is located near the present-day **Nala Sopara (near Mumbai)**. In ancient times, it was the largest township on India's west coast, trading with Mesopotamia, Egypt, Cochin, Arabia and Eastern Africa.
- Kalyan** was once famous as a **port in ancient times**. Records of its existence as a premier port in the region have been found in ancient Greek manuscripts. The corporation is governed by Bombay Provincial Municipal Corporation Act 1949.

Q.45) With reference to the NAMASTE Scheme, consider the following statements:

- It envisages the safety and dignity of sanitation workers in India.
- It is a Centrally Sponsored Scheme run by Ministry of Social Justice and Empowerment.
- National Safai Karamchhari Financial Development Corporation (NSKFDC) would be the implementing agency for NAMASTE.

Which of the statements given above are correct?

- 1 and 2 only
- 2 and 3 only
- 1 and 3 only
- 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Government recently launched the National Action for Mechanised Sanitation Ecosystem (NAMASTE) scheme to ensure occupational safety and alternate livelihood for people involved in manual scavenging and sewer maintenance work in India's urban areas.

Statement 1 is correct: – It envisages the **safety and dignity** of sanitation workers in urban India. It provides for creating an enabling ecosystem that recognises sanitation workers as one of the key contributors to operations and maintenance of sanitation infrastructure. In doing so, it provides **sustainable livelihood** and enhances their occupational safety. It focuses on **capacity building** and improved **access to safety gear** and machines.

Statement 2 is incorrect: Namaste is a **Central Sector Scheme (not centrally sponsored scheme)** of the Ministry of Social Justice and Empowerment (MoSJE) as a joint initiative of the MoSJE and the Ministry of Housing and Urban Affairs (MoHUA).

Statement 3 is correct: National Safai Karamchhari Financial Development Corporation (NSKFDC) would be implementing agency for NAMASTE. Skill Development and trainings of Safai Mitras is being taken up with

SFG 2023 | LEVEL 2 | Test #35 – Solutions | 

the support of the MoSJE through the National Safai Karamchari Finance Development Corporation (NSKFDC).

Q.46) Consider the following statements regarding the Uttaramerur inscription:

1. It is a 10th century inscription belonging to the reign of Parantaka Chola.
2. It records an order issued by the ruler regarding implementation of the famine relief measures.
3. It mentions a written constitution prescribing mode of elections for the village assemblies.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Uttaramerur, which has a 1,250-year history, is situated in Kancheepuram district, about 90 km from Chennai. The Pallava king Nandivarman II established it around 750 A.D. The Pallavas, the Cholas, the Pandyas, the Sambuvarayars, the Vijayanagara Rayas, and the Nayaks successively ruled it. The village has three important temples, the Sundara Varadaraja Perumal temple, the Subramanya temple, and the Kailasanatha temple.

Statement 1 is correct: Uttaramerur inscription, dated around 920 A.D. in the reign of Parantaka Chola [907-955 A.D.] is an outstanding document in the history of India. It mentions about written constitution of the village assembly.

Statement 2 is incorrect: Uttaramerur inscription gives astonishing details about the constitution of wards, the qualification of candidates standing for elections, the disqualification norms, the mode of election, the constitution of committees with elected members, the functions of those committees, the power to remove the wrongdoer, etc. A variety of secular transactions of the village, dealing with administrative, judicial, commercial, agricultural, transportation and irrigation regulations, as administered by the then village assembly are found in this inscription. **Thus, Uttaramerur inscription did not contain any order from the Chola ruler regarding famine relief measures to the subjects of the kingdom.**

Statement 3 is correct: Uttaramerur inscription testifies to the historical fact that nearly 1,100 years ago, a village had an elaborate and highly refined electoral system and even a written constitution prescribing the mode of elections. It gives a vivid picture of the efficient administration of the village society in the bygone ages. The details of this system of elective village democracy are inscribed on the walls of the village assembly (grama sabha mandapa), a rectangular structure made of granite slabs.

Source: <https://www.thehindu.com/news/national/tamil-nadu/Uttaramerur-model-of-democracy/article16566830.ece>

Q.47) Consider the following statements regarding polity and administration during the times of Harshavardhana:

1. Hiranya was the tax paid by farmers and merchants in cash.
2. Kuntala was an official who look after foreign relations.
3. Criminal law system during the reign of Harsha was generally harsher than that of the Guptas.
4. The empire of Harsha was divided into several provinces called as Vishayas.

Which of the statements given above is/are correct?

- a) 3 only
- b) 2 and 4 only
- c) 1 and 3 only
- d) 1, 3 and 4 only

Ans) c

Exp) Option c is the correct answer.

Harshavardhana was one of the most important Indian emperors of the 7th Century. During the peak of his reign, Harshavardhana's empire extended from north India to the Narmada River in central India. His rule was renowned for peace, stability and prosperity, and attracted many artists and scholars from far and wide.

Statement 1 is correct: Bhaga, Hiranya and Bali were the three kinds of tax collected during Harsha's reign. Bhaga was the land tax paid in kind. One-sixth of the produce was collected as land revenue. Hiranya was the tax paid by farmers and merchants in cash.

Statement 2 is incorrect: The ministerial administration during the reign of Harsha was the same as that of the imperial Guptas. The emperor was assisted by a council of ministers (Mantri Parishad) in his duties. The council played an important role in the selection of the king as well as framing the foreign policy of the empire. The prime minister was of the most important position in the council of ministers. Some of the key officials in Harsha's administration are as follows:

Avanti - Minister for Foreign Relations and War

Kuntala - Chief Cavalry Officer

Statement 3 is correct: Criminal law during the times of Harsha was more severe than that of the Gupta age. Mimamsakas were appointed to dispense justice. Banishment and the cutting of limbs of the body were the usual punishments. Trial by ordeal was in practice. Life imprisonment was the punishment for the violations of the laws and for plotting against the king.

Statement 4 is incorrect: The empire of Harsha was divided into several provinces. The actual number of such provinces is not known. **Each province was divided into Bhuktis. And each Bhukti was divided into several Vishayas.** They were like the districts. Each vishaya was further divided into Pathakas. Each such area was divided into several villages for the sake of administrative convenience.

Source: Tamil Nadu State Board- History, Volume-1

Q.48) With reference to social condition during Sangam period, consider the following statements:

1. There was no classification of people based on occupation in Southern India.
2. Lord Murugan was the chief deity of the Sangam age.
3. The practice of Sati was completely absent in Southern India during this time.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The word **Sangam** literally means **association**. Here, it implies an **association of Tamil poets**, flourished between the **3rd century B.C. and 3rd century A.D.** in South India (the area lying to the **south of river**

Krishna and Tungabhadra). The three chief Tamil kingdoms of this period were the **Cheras, the Cholas and the Pandyas**.

Statement 1 is incorrect: Famous poet **Tolkappiyam** refers to the **five-fold division of lands - Kurinji (hilly tracks), Mullai (pastoral), Marudam (agricultural), Neydal (coastal) and Palai (desert)**. The people living in these five divisions had their respective chief occupations as well as gods for worship. Tolkappiyam also refers to **four castes namely arasar (ruling class), anthanar (polity and religion), vanigar (carried on trade and commerce) and vellalar (agriculturist)**. So, occupation-based classification existed during the sangam age. So, statement 1 is incorrect.

Statement 2 is correct: The **primary deity of the Sangam period was Murugan**, who is hailed as **Tamil God**. The worship of Murugan has an ancient origin and the festivals relating to God Murugan were mentioned in the **Sangam literature**. Murugan was honoured with six abodes known as **Arupadai Veedu**. Other gods worshiped during the Sangam period were **Mayon (Vishnu), Vendan (Indiran), Varunan and Korravai**.

Statement 3 is incorrect: Sangam literature provides information about the **position of women** during the Sangam age. Along with males, **women poets like Avvaiyar, Nachchellaiyar, and Kakkaiyapadiyar flourished** in this period and contributed to Tamil. **The practice of Sati was also prevalent** in the higher strata of society. But it was **not obligatory** as there are **references to widows present** in society. However, their position was **miserable** as they were prohibited to decorate themselves. So, statement 3 is incorrect.
Source: Class XI TN Board Book on Ancient History

Q.49) With reference to the condition of women during Gupta period, consider the following statement:

1. The practice of sati was prevalent but mostly confined to the higher varnas.
2. The Women of the lower varnas were free to earn their livelihood.
3. Women from higher strata of society usually spoke Sanskrit.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Status of women continued to decline in Gupta period. The main reason for the subordination of women was their complete dependence on men for their livelihood.

Statement 1 is correct: **The practice of sati (self-immolation at the funeral pyre of the husband) gained approval** of the jurists. But it seems to have been **confined to the upper classes**. The first evidence of sati is found in an inscription (AD 510) at **Eran in Madhya Pradesh**.

Statement 2 is correct: Women of higher orders did not have access to independent sources of livelihood in pre-Gupta and Gupta times. However, **women of the two lower varnas were free to earn their livelihood gave them considerable freedom**, which was denied to women of the upper varnas.

Statement 3 is incorrect: Kalidasa who lived in the court of Chandragupta II in the fifth century AD. The notable feature of his works is that the **characters of higher caste speak in Sanskrit while those of lower caste and women speak in Prakrit**. So, we can deduce from the contemporary literature that Women used to speak in Prakrit. **This can also be established from the fact that women were not allowed to get formal education which was used to be in Sanskrit**.

Q.50) The WEST Initiative was recently launched in which of the following context?

- a) To increase English proficiency among the school going children.
- b) To attract tourism from the European nations to India.
- c) To strengthen India's strategic relations with the West Asian nations on the lines of Act East Policy.
- d) To facilitate scientifically inclined women researchers for pursuing research in basic or applied sciences.

Ans) d

Exp) Option d is the correct answer.

Women in Engineering, Science, and Technology (WEST), a new I-STEM (Indian Science Technology and Engineering facilities Map) initiative called "Women in Engineering, Science, and Technology (WEST)" has been launched by Government of India in September 2022.

The WEST programme will cater to women with a STEM background and empower them to contribute to the science, technology, and innovation ecosystem.

Through the WEST initiative, I-STEM shall provide a separate platform to scientifically inclined women researchers, scientists, and technologists **for pursuing research in basic or applied sciences in frontier areas of science and engineering. (Hence, Option d is correct)**

I-STEM is a national web portal for sharing research equipment/facilities and is the umbrella under which many programmes for promoting collaborations in R&D and technological innovation among and between academia and industry, especially start-ups, are underway.

Q.1) Palas, Pratiharas and Rashtrakutas were involved in the Tripartite Struggle. Which one of the following was the most important reason for the struggle?

- To gain control over the Raichur doab
- For exercising authority over the Bay of Bengal and maritime trade
- To gain control over the kannauj area of northern India
- For controlling the silk route in North-western India

Ans) c

Exp) Option c is the correct answer.

The Tripartite Struggle, also known as the Kannauj Triangle Wars, took place in the 8th and 9th centuries, between the three great Indian dynasties, the Palas, the Pratiharas, and the Rashtrakutas, **for control over the Kannauj area of northern India.** The Palas ruled India's eastern regions (Bengal region), while the Pratiharas oversaw India's western regions (Avanti-Jalaor region) and the Deccan area of India was dominated by the Rastrakutas. This war lasted for two centuries and was finally won by the Rajput Pratihara emperor Nagabhata II, who established the city as the capital of the Pratihara state, which ruled for nearly three centuries.

Q.2) Consider the following statements regarding Muhammad Bin Tughlaq:

- He Set up of a new department of Agriculture called Diwan-i-Amir Kohi.
- He built the Adilabad fort in Delhi.
- The famous Ramcharitmanas was written during his period.

Which of the statements given above is/are correct?

- 1 and 3 only
- 1 only
- 1 and 2 only
- 2 and 3 only

Ans) c

Exp) Option c is the correct answer.

Mohammad Bin Tughlaq/ Jauna Khan (c.1325–51 CE.) is considered an ill-fated idealist owing to his ambitious schemes and novel experiments, which ended in miserable failures because they were all far ahead of their time. Some of the reforms brought out by him are discussed below:

Statement 1 is correct: He set up a new department of Agriculture, Diwan-i-Amir Kohi. He launched a scheme by which takkavi loans (loans for cultivation) were given to the farmers to buy seed and to extend cultivation.

Statement 2 is correct: Adilabad Fort in Delhi was built in the 14th Century by Muhammad bin-Tughlaq and was a substantial part of the city of Jahanpanah. This is a fort that was built right near the Tughlaqabad Fort of Delhi. It is the fourth fort to have been built around Delhi.

Statement 3 is incorrect: Ramcharitmanas, is an epic poem in the Awadhi language, based on the Ramayana, and **composed by the 16th-century Indian bhakti poet Tulsidas. Tulsidas was a contemporary of Mughal Emperor Akbar. (Not Mohammad Bin Tughlaq)**

Q.3) Which of the following factors contributed to the decline of the Rastrakuta Empire?

1. Continuous struggle with the contemporary kingdoms
2. Rise of feudatories
3. Invasion of Rastrakuta Empire by Dantidurga .

Select the correct answer from the code given below:

- a) 2 only
- b) 1 only
- c) 1 and 2 only
- d) 2 and 3 only

Ans) c

Exp) Option c is the correct answer.

There were several reasons behind the sudden disintegration of the Rashtrakuta empire.

Statement 1 is correct: The **Rashtrakutas continuously engaged in the struggle with the Pratiharas**, the Chalukyas, the Pallavas, and the Palas who were relatively equally matched empires. These struggles posed great stress on the finances of the kingdom and weakened the military might of the Rashtrakuta dynasty.

Statement 2 is correct: The Rashtrakuta Empire was based on many small and big feudatories, and **these samantas took advantage of the bad situation of the kingdom to break away from the kingdom and found smaller kingdoms**. The Rashtrakuta dynasty came to an end when the last ruler, Kakka II (or Karka), was assassinated by Tailapa II, one of his samanthas.

Statement 3 is incorrect: Dantidurga was also referred to as Dantivarman or Dantiduga II. He was the founder of the Rashtrakuta dynasty. Invasions of Dantidurga is not a reason for the decline of Rashtrakutas.

Q.4) Which among the following crafts were popularized by the Turks during their rule in parts of Medieval India?

1. Use of superior mortar
2. Use of armour for the horse
3. Glass-making
4. Paper-making

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

The foundation of the Islamic rule in India was laid down by the Turks. It is believed that Turks came to India during the Slave Dynasty. The Turks popularised a number of crafts and techniques such as:

- 1) **Use of iron stirrup**
- 2) **Use of Armour both for the horse and rider.**
- 3) **Improvement of Rahat** (Persian wheel through which water could be lifted from a deeper level for irrigation)
- 4) **Papermaking, glassmaking, the spinning wheel, and an improved loom for weaving.**
- 5) **Use of superior mortar**, which enabled the Turks to erect magnificent buildings based on the arch and dome.

Q.5) With reference to recent technological advancement in the country, which one of the following statements correctly describe ‘Digital Embossing Technology’?

- It is a technology used to design semiconductors through digitally embossed printing process.
- It is a technology used in designing and developing Braille Maps for Visually challenged students.
- It is a method of creating a three-dimensional object layer-by-layer using a computer created design.
- It is a type of printing that involves storing digital information on the object through embossing technique.

Ans) b

Exp) Option b is the correct answer.

Digital Embossing Technology is a novel digital printing process, **enables the structuring of surfaces**. This means that the feel of the surface now also corresponds to the optical design. In digital embossing, a transparent medium is printed in a layer of uncured UV paint. The resulting physical and chemical reactions produce a deep structure. Digital embossing **eliminates the need for printing plates, molds, chemicals, and solvents, emitting no pollutants or waste** and reduces overall energy use.

Digital Embossing Technology has been introduced, designed and implemented for the **first time in India by National Atlas & Thematic Mapping Organisation (NATMO)**. Visually challenged students from all over the country will have access soon to Braille Maps designed and developed using Digital Embossing Technology. The maps produced using this technology are not only useful for high-speed production of the maps but can also produce Braille Maps that can be used by more people for years together.

Knowledge Base:

National Atlas & Thematic Mapping Organisation (NATMO): It was established in 1997. It is a subordinate department under the **Department of Science & Technology, Ministry of Science & Technology**.

Its functions include:

- Compilation of the National Atlas of India in Hindi, English and other regional languages
- Preparation of thematic maps based on socio-economic, physical, cultural, environmental, demographic and other issues.
- Preparation of maps/atlasses for visually impaired
- Digital mapping and training using Remote sensing, GPS and GIS technology.
- Training and Research & Development.

Source: Digital Embossing Technology and NATMO: Visually challenged students will have access to user-friendly durable Braille maps using advanced technology-ForumIAS Blog

Digital Embossing (adler-coatings.com)

Q.6) In the context of the medieval history of India, who was Santarakshita?

- A Purohit /Brahmin who helped manage religious affairs of the Pala rulers.
- Senapati of Pala empire who fought bravely against South Indian Chola invasions.
- A notable Buddhist scholar.
- The Pala ruler who defeated the Pratihara king Vatsaraja.

Ans) c

Exp) Option c is the correct answer.

The Pala empire was founded by Gopala, probably in AD 750 when he was elected king by the notable men of the area to end the anarchy prevailing there. For about a hundred years, from the middle of the eighth to the middle of the ninth century, the Pala rulers dominated eastern India.

The Pala rulers were great patrons of Buddhist learning and religion. The Santarakshita and Dipankara, notable Buddhist scholars from the Nalanda university were invited to Tibet by the Tibetan king Trisong

Detsen, who had closer contacts with the Pala rulers. As a result, many Tibetan Buddhists came to the universities of Nalanda and Vikramsila for study, and Buddhism flourished in Tibet.

Old NCERT, Satish Chandra, pg. 14

Q.7) Consider the following statements with reference to the Sultanate period in Medieval India:

1. There was no clear law of succession during this period.
2. Ulemas had no role in the nomination of successor ruler.
3. The military superiority of the ruler was the key factor in determining succession.

Which of the above-given statements is/are correct?

- a) 3 only
- b) 1 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The Delhi Sultanate, or the Sultanate of Delhi, was a Muslim empire based in Delhi that stretched over large parts of the Indian subcontinent during the period of Medieval India, for around 300 years (1206–1526)

Statement 1 is correct: There was no clear law of succession during the Sultanate period. All the sons had equal claim to the throne. Interestingly, the idea of primogeniture was fully acceptable neither to the Muslims nor to the Hindus. Iltutmish even nominated his daughter in preference to his sons.

Statement 2 is incorrect: Ulemas also played a crucial role in getting favorable public opinion for succession of ruler. Any nominations or successions were to be mostly accepted by the nobles.

Statement 3 is correct: Since there was no clear rule of succession during the sultanate rule, it was determined through a combination of factors, including heredity, military strength, and political alliances.

However, **military superiority remained the main factor in matters of succession.**

Q.8) Consider the following pair of various officials in the reign of Allaudin Khilji and their description:

Official	Description
1. Munhiyans	Secret Spies
2. Barids	Intelligence Officers
3. Diwan-i-Muskharaj	In charge of Religious Affairs
4. Ariz-i-Mumalik	In charge of Revenue

Which of the above given pairs are matched correctly?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1 and 4 only

Ans) a

Exp) Option a is the correct answer.

Allaudin introduced several reforms in administrative and military affairs during his rule.

Alauddin's measures to control the markets and price regulations were one of the most important policy initiatives of his reign. To ensure implementation, **each market was under the control of a superintendent called Shahna-i- Mandi who was assisted by an intelligence officer.**

Pairs 1 and 2 are correct: Alauddin received daily reports of the market from two other independent sources, **barids (intelligence officer) and munhiyans (secret spies).**

Pair 3 is incorrect: Alauddin established a separate revenue agency called as **Diwan-i-Muskharaj**. He also devised a scientific method for measuring land and calculating land revenue.

Pair 4 is incorrect: Alauddin kept a large and powerful standing army. **Ariz-i-Mumalik was in charge of military appointments.**

Q.9) Consider the following statements regarding the Turkish conquest of the Ganga valley during the 12th century:

1. Qutubuddin Aibak defeated Jaichandra in the battle of Chandwar near Kannauj.
2. The Buddhist monasteries, Nalanda and Vikramshila, were destroyed by Bakhtiyar Khalji.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Between 1192 and 1206, Turkish rule was extended over the Ganga Jamuna doab and its neighbouring area, Bihar and Bengal were also overrun by them.

Statement 1 is incorrect: Ghori (**not Qutubuddin Aibak**) defeated Jaichand in the battle of Chandwar near **Kannauj**. Ghori after returning to India from Ghazni in 1194, crossed the Jamuna with 50,000 cavalry and moved towards Kannauj. The Kannauj was ruled by the ruler Jaichandra. A battle was contested between the two at the Chandwar near Kannauj, where Jaichandra was defeated.

However, Qutubuddin Aibak was a trusted slave of Ghori, who ruled the upper doab region of India in the absence of Muizuddin who left India after the Battle of Tarain (against Prithviraj Chauhan).

Statement 2 is correct: Muhammad **Bakhtiyar Khalji** (general of Muhammad Ghori) conquered Bihar in 1197 CE and Bengal in 1202 CE and **destroyed the universities of Nalanda and Vikramshila**. Khalji thus became the viceroy of Bengal and Bihar.

Source: Old NCERT, Satish Chandra, pg. 71-73

Q.10) Consider the following statements regarding 'Smart Cities and Academia Towards Action & Research (SAAR) Program':

1. It is a joint initiative of Niti Aayog in collaboration with Urban Development Resource Centre.
2. The program will document various landmark projects undertaken by the Smart Cities Mission in India.
3. Under the SAAR program, the projects will be ranked with the parameters of accessibility and sustainability scores.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

Smart Cities Mission, Ministry of Housing and Urban Affairs (MoHUA) has launched the “Smart Cities and Academia Towards Action & Research (SAAR)” Program.

Statement 1 is incorrect.

Smart Cities and Academia Towards Action & Research (SAAR) Program is a joint initiative of **Ministry of Housing and Urban Affairs, National Institute of Urban Affairs (NIUA)** and leading Indian academic institutions of the country.

Statement 2 is correct.

Under the program, 15 premier architecture & planning institutes of the country will be working with Smart Cities to **document landmark projects undertaken by the Smart Cities Mission.**

The documents **will capture the learnings from best practices**, provide opportunities for engagement on urban development projects to students, and enable real-time information flow between urban practitioners and academia.

Statement 3 is incorrect.

The program is **not intended to provide any ranking to the projects** undertaken under Smart Cities Mission. The first activity envisaged under SAAR is to **prepare a compendium of 75 landmark urban projects in India under the Smart City Mission.**

The compendium **will act as the first point of reference for future research in the field** and will help disseminate learnings from projects under the Mission. It will also **act as a repository for Urban Projects** and contribute to the dissemination of best practices and peer-to-peer learning.

Q.11) Ziauddin Barani, one of the most famous historians, was a courtier of which of the following rulers?

- Mohammad Bin Tughlaq
- Muhammad Ghori
- Qutubuddin Aibak
- Iltutmish

Ans) a

Exp) Option a is the correct answer.

Zia-Ul-Barani (1283–1359)/ Ziauddin Barani was the most important political thinker of the Delhi Sultanate, particularly, during the reigns of Alauddin Khalji, Muhammad bin Tughlaq and Firoz Shah Tughlaq. He chronicled the reigns of eight sultans of Delhi, beginning with Ghiyās al-Dīn Balban (1266–87) and ending with Firūz Shāh (1351–88). **He was an influential courtier under Muḥammad bin Tughluq (1324–51), the ruler he served as an emissary and as a court advisor for 17 years.**

He represented and championed the idea of political expediency in Islamic history which he conveyed to the ruler by way of his nasihats (advice). He has often been criticized as a fundamentalist and a bigot for his emphasis on following the Shariat (laws of the Quran and the Prophet’s tradition) and his views on the Hindus, as compared to relatively liberal thinkers like Abul Fazl.

His major works include Fatawa-i-Jahandari (Edicts of World Rule), Tarikh-i-Feroze Shahi and many other nasihats.

Source: <https://egyankosh.ac.in/bitstream/123456789/84770/1/Unit-10.pdf>

Q.12) Consider the following statements regarding Mihir Bhoja:

1. He was one of the most successful and popular rulers of the Pratihara dynasty.
2. He was a devotee of Vishnu and adopted the title of 'Adivaraha.'
3. Karpuramanjari and Kavya Mimansa were the books written by him.

Which of the statements given above are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Pratiharas were also known as the Gurjara-Pratiharas, as they originated from the Gurjaras who were primarily pastoralists and fighters. The Gurjara-Pratiharas are known for their sculpture, their carved panels and the open pavilion style temples.

Statement 1 is correct: Mihir Bhoja (c.836–885 CE) Grandson of Nagabhata II, who had a long reign of over 46 years and proved to be the most successful and popular ruler of Pratiharas.

In the early years of his reign he was defeated by the Palas, Rashtrakutas and the Kalachuris, but he subsequently made a comeback. With the aid of feudatories such as the Chedis and the Guhilas, he won victories over the Palas and the Rashtrakutas.

Statement 2 is correct: Mihir Bhoja was a devotee of Vishnu and adopted the title of 'Adivaraha.'

Statement 3 is incorrect: Karpuramanjari and Kavya Mimansa were written by poet Rajashekhar. Pratihara ruler Mahendrapala's court was adorned by Rajashekhar, who was an eminent Sanskrit poet, dramatist and critic. Some of his important works are Vidhasalabhanjika, Bhrijika, Balaramayana etc.

Q.13) Consider the following statements regarding the Rashtrakuta Dynasty:

1. Due to the lack of royal patronage, Jainism declined completely during their rule.
2. During their rule, some women were allowed to participate in the administrative activities.
3. The Kailashnatha Temple at Ellora was built during the rule of Rashtrakutas.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The political history of the Deccan between c.753 and 975 CE was marked by the rise of the Rashtrakutas, who for a long time provided stability to the region.' Few aspects regarding their religious policy and administration are discussed below:

Statement 1 is incorrect: The Rashtrakuta kings presented an excellent example of religious tolerance and gave patronage to all the faiths such as Hinduism, Jainism, Buddhism, and Islam. Toleration was also shown between the members of the different sects. **Jainism continued to be a strong rival of Hinduism due to the generous patronage of the Rashtrakuta kings like Amoghavarsha I, Krishna II and Indra III** and the literary and religious activities of some famous monastic scholars. A great patron of Jainism, Amoghavarsha

I appointed a Jaina monk Gunabhadra as tutor to his heir-apparent Krishna II, extended patronage to many Jaina scholars and gave grants to several Jaina monasteries.

Statement 2 is correct: The condition of women seems to not have degraded during the rule of Rashtrakuta empire. **Women participated in religious and administrative activities with men. Ladies of the king's household also attended the court on festive occasions.** Princesses were also appointed to government posts, such as the Rashtrakuta princess Chandrobalabbe, a daughter of Amoghavarsha I, administered the Raichur doab for some time. According to Arab writers, in the Rashtrakuta Empire ladies did not veil their faces, which indicate towards the non-existence of the purdah system

Statement 3 is correct: The magnificent rock-cut Kailashnatha Temple at Ellora was built during the reign of the Rashtrakuta ruler Krishna I. The temple dedicated to Lord Shiva and is monolithic i.e. made of one single piece of rock.

Q.14) Consider the following statements regarding the Rashtrakuta king Amoghvarsha I:

1. He built a new capital city of the Rashtrakuta kingdom at Manyakheta.
2. Kavirajamarga, the earliest Kannada work on poetics, was written by him.
3. Because of his religious temperament and peace-loving nature, he is sometimes called the 'Ashoka of the South'.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The political history of the Deccan between c.753 and 975 CE was marked by the rise of the Rashtrakutas, who for a long time provided stability to the region.' Few aspects regarding one of the most notable kings of the Rashtrakuta i.e., Amoghvarsha I are discussed below:

Statement 1 is correct: Amoghvarsha I was one of the most famous of the Rashtrakutas, he built a new capital city, that of Manyakheta (modern Malkhed).

Statement 2 is correct: He was a patron of literature and was an accomplished scholar in Kannada and Sanskrit himself. **He wrote the Kavirajamarga – the earliest Kannada work on poetics** and the Prashnottara Ratnamalika in Sanskrit, which is considered as a writing of high merit and was later translated into the Tibetan language.

Statement 3 is correct: Because of his religious temperament, his interest in the arts and literature and his peace-loving nature, he is often compared to emperor Ashoka and called "Ashoka of the South" and is also compared to Gupta king Vikramaditya in giving patronage to men of letters.

Q.15) Recently, terms like 'Held to Maturity', 'Available for Sale' and 'Fair Value Through Profit and Loss account' were seen in news. They are related to-

- a) Fixed Deposit of Non-Resident Indian in Schedule Banks
- b) Insurance Products underwritten in whole or in part by a Public Limited Company.
- c) Registered Accounts of Foreign Portfolio Investors by SEBI
- d) Investment Portfolios of Indian Banks

Ans) d

Exp) Option d is the correct answer.

The Reserve Bank of India proposed a new investment category for banks—**fair value through profit and loss (FVTPL)** account. This is a part of its initiatives to align lenders investment portfolio regulations with the global accounting standards.

Currently, the **Investment Portfolios of Banks** at present are **classified under three categories: held to maturity (HTM), held for trading (HFT) and available for sale (AFS)**.

- 1) **Held to maturity (HTM):** RBI said debt instruments with fixed or determinable payments and fixed maturity, with the intent of holding till maturity, shall now be classified as HTM. Corporate bonds have also been allowed to be held under HTM, which was not the case earlier.
- 2) **Available for Sale:** Debt instruments held by a bank till maturity or sold before maturity would be eligible for AFS. Equity instruments will also be classified under AFS.
- 3) **Fair Value Through Profit and Loss account:** It will be the residual category where all investments that do not qualify for inclusion in HTM or AFS shall be categorized. This category can have investments such as securitisation receipts (SRs), mutual funds, alternate investment funds, equity shares, derivatives (including those undertaken for hedging), among others.

Source: FVTPL Account: Banks may get a new investment category -ForumIAS Blog

Q.16) With respect to Krishnadeva Raya of the Vijayanagara Empire, consider the following statements:

1. He was known as the 'Andhrakavita Pitamaha'.
2. He built a new town called Nagalapuram.
3. One of the famous scholars Tenali Rama was in his court.

Select the correct answer using the code given below:

- a) 1 only
- b) 2 and 3 only
- c) 3 only
- d) 1 and 2 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. Krishna Deva Raya, the greatest ruler of Vijayanagar, belonged to the Tuluva dynasty. He was a great patron of literature and arts and was **called Andhra Bhoja**.

Eight eminent scholars named Ashtadiggajas were in the palace of Krishna Deva Raya. One of the scholars, **Allasani Peddanna was the eldest and was called Andhrakavita Pitamaha**. His important works are **Manucharitam and Harikathasaram**.

Statement 2 is correct. Krishna Deva Raya **founded a new town named Nagalapuram**. The new town was near Vijayanagar. Famous Vitthalaswamy and Hazara Ramaswamy temples in Vijayanagara were also built by Krishnadeva Raya.

Statement 3 is correct. Eight eminent scholars named Ashtadiggajas were in the palace of Krishna Deva Raya they were- Allasani Peddanna, Nandi Thimmana, Madayyagari Mallana, Dhurjaty, Ayyalaraju Ramambhadru, Pingali Suranna, Ramarajabhushanudu, **Pandit Ramakrishna (he was called as Tenali Rama as he was from the village of Tenali)**. **Pingali Suranna and Tenali Ramakrishna were other important scholars**.

Knowledge Base: **Krishna Deva Raya** composed a Telugu literary work- **Amukthamalyadha** and Sanskrit literary work- **Jambavati Kalyanam and Ushaparinayam**.

Source: Tamil Nadu Board Textbook, Ch- 19, Pg- 212

Q.17) Consider the following statements regarding Karkota king Lalitaditya:

1. Kalhana's 'Rajatarangini' provides information about his rule.
2. He built the Martanda sun temple located near the city of Anantnag in the Kashmir Valley.
3. Hsuan Tsang visited Kashmir during the reign of this king.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Lalitaditya was a Kayastha and the fifth ruler of the Karkota dynasty of Kashmir. The Kashmir Valley was his kingdom but during his reign of 37 years, he expanded the empire from Central Asia to the Gangetic Plain. For his ambition and successful conquests, he has been called the Alexander of Kashmiri History.

Statement 1 is correct: A Sanskrit text titled 'Rajatarangini' by Kalhana is the primary source of information about Lalitaditya and the early years in the history of Kashmir. According to Kalhana, the Karkota dynasty of Kashmir was founded by King Durlabhavardana in 625 CE. King Lalitaditya was his great grandson. In the 8th century CE, the subcontinent was divided into small kingdoms that were at war with one another. This political condition was conducive for Lalitaditya to expand his empire, which he accomplished with strategy and valour.

Statement 2 is correct: Lalitaditya commissioned shrines of Vishnu, Shiva, Surya as well as statues and shrines dedicated to Buddha. **He built the Martanda sun temple located near the city of Anantnag in the Kashmir Valley of Jammu and Kashmir**. None of the temples or shrines built by Lalitaditya exist now, except for the ruins of the Martanda Sun Temple which serve as a reminder of this great Kashmiri king.

Statement 3 is incorrect: It was in 631 A.D that Hsuan Tsang reached Kashmir and was received by the king, **Durlabhavardhana of local Karkota Dynasty (not during King Lalithaditya, who attained power around 724 AD)** at the Buddhist monastery of Ushkar present day Baramullah. He travelled almost all the Buddhist monasteries of this land and recorded in his travel notes about 100 monasteries with 5000 thousand monks. Jayendra vihara has been most significant Vihar and it is widely believed that it is in this Vihar that this Chinese traveller has spent most of his times.

Q.18) Which of the following factors helped Kanauj becoming the political centre in the politics of early medieval north India?

1. Kanauj was secure as it was surrounded by hills from all sides.
2. Kanauj was surrounded by a large agrarian expanse to make plenty of land-grants.
3. Kanauj was well-connected by routes going towards east and towards south.

Select the correct answer using the code given below.

- a) 1 only
- b) 1 and 2 only
- c) 3 only
- d) 2 and 3 only

Ans) d

Exp) Option d is the correct answer.

Kanauj, earlier known as Kanyakubja or Mahodaya, situated in the Kanauj district of present Uttar Pradesh assumed a lot of significance in the politics of early medieval north India.

Statement 1 is incorrect: Located in the fertile plains of the Ganga-Yamuna doab, Kanauj stood on an elevated area that could be easily fortified. **Thus, even though it was situated in plains, due to its favourable location, it could be easily fortified and was secure.**

Statement 2 is correct: Besides, Kanauj was rooted in a large agrarian expanse in the western Ganges plains. Land-grants could be made in plenty from this area. Naturally, the area attracted many brahmanas who settled here and for subsequent centuries the brahmanas of Kanauj came to be widely esteemed in the royal courts throughout the country.

Statement 3 is correct: Kanauj was also well-connected by routes going towards east into the Ganges plains as well as with those going to south.

Due to all these factors, it rose to power and became an important nodal point in north. With this development we see a shift of focus from Pataliputra in south Bihar to Kanauj. The latter also came to constitute a central theme in the politics of post-Gupta north India.

NCERT History, Satish Chandra, Class 11

Q.19) With reference to Vijayanagara architecture, consider the following statements:

1. Construction of tall Raya Gopurams was an important feature of Vijayanagar temples.
2. Temple pillars of this architecture often had engravings of horses.
3. Lakshmi Narasimha temple in Hampi was built during the period of Krishna Deva Raya.

Which of the following statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct. The temple building activity further gained momentum during the Vijayanagar rule. The chief characteristics of the Vijayanagar architecture were **the construction of tall Raya Gopurams or gateways** and the Kalyanamandapam with carved pillars in the temple premises.

Statement 2 is correct. **Temple Pillars of Vijayanagara often depict charging horses or hippogriffs (Yali)** - horses standing on their legs with their forelegs raised and the riders on their backs. Horses on some of the pillars are between two and eight feet tall. The lines without hippogriffs are mostly rectangular, with mythical figures on either side.

Yalis have been the subject of South Indian temples since the 16th century, and they depict a **half-horse, half-lion, or half-elephant that may have served as a guardian or watchdog.**

Statement 3 is correct. The Lakshmi Narasimha temple was built in the year **1528 A.D.** It was constructed **during the rule of Krishna Deva Raya.** The temple is dedicated to Lord Narasimha, one of the ten avatars of Lord Vishnu, and Goddess Lakshmi. The Lakshmi Narasimha statue in temple, is one of the most imposing sculptures found in the ruined town of Hampi. It is the largest monolith statue in Hampi. The statue is located on the southern side of the Hemakuta group of temples that stand on the Hemakuta Hill.

Q.20) Which one of the following statements given below is correct regarding 'Africa 50'?

- It is an economic cooperation agreement between the governments of India, Japan and multiple African countries.
- It is a Comprehensive and Progressive Agreement for African Union between 50 countries of African Continent.
- It is an infrastructure investment platform founded by the African Development Bank and African states.
- It is a transatlantic agreement between African countries and South American countries to promote shared prosperity through economic partnership

Ans) c

Exp) Option c is the correct answer.

Option c is correct. Africa50 is an **infrastructure investment platform** that contributes to **Africa's economic growth** by developing and investing in bankable infrastructure projects, catalysing public sector capital, and mobilizing private sector funding, with differentiated financial returns and impact.

Currently, **Africa50 has 31 shareholders** comprising 28 African countries, the African Development Bank, the Central Bank of West African States (BCEAO), and Bank Al-Maghrib.

Power Grid Corporation of India Limited (POWERGRID) has signed a Joint Development Agreement with Africa50 to develop the Kenya Transmission Project. The Project aims to **develop power transmission lines** in Kenya under a public-private partnership framework.

Under the project, POWERGRID will provide **technical and operational know-how to the project**, while Africa50 will bring its **project development and finance expertise** and will act as a bridge between the Kenyan government and private investors.

Once completed, the project will be the **first Independent Power Transmission (IPT) in Kenya** and will set a **reference point in Africa as the first financing of transmission lines on a PPP basis.**

Source: POWERGRID and Africa50 in Joint Development Agreement, to pioneer Africa's first transmission PPP project in Kenya -ForumIAS Blog

Q.21) Arrange the following dynasties of the Delhi Sultanate in the chronological manner:

- First Ilbari dynasty
- Qutbi dynasty
- Tughlaq dynasty
- Khalji dynasty

Which one of the options given below correctly determines the chronology?

- 3-1-2-4
- 1-3-4-2
- 1-2-4-3
- 2-1-4-3

Ans) d

Exp) Option d is the correct answer.

Invasions by Mahmud of Ghazni and Mohd. Ghori into India ultimately resulted in the establishment of the Delhi Sultanate. Five different dynasties—the Slave, the Khalji, the Tughlaq, the Sayyids, and the Lodhi's are collectively referred to as the Delhi Sultanate. The rulers, termed as Sultans, were of Turkish and Afghan origin. The Sultanate's rule resulted in far-reaching changes in the Indian society, administration and cultural life. Some of the important dynasties of the Delhi Sultanate are discussed below in chronological manner:

- 1) Qutbi dynasty (c.1206–1211 CE) founded by Qutbuddin Aibak.** He was the founder of the Slave dynasty; considered by many scholars as the real founder of Muslim rule in India. He was a Turkish slave of Muhammad Ghori and played an important role in the expansion of the Turkish Sultanate in India after the Battle of Tarain.
- 2) First Ilbari dynasty (c.1211–1266 CE) founded by Iltutmish.** He belonged to the Ilbari tribe and hence his dynasty also known as the Ilbari dynasty. After becoming Sultan, he shifted his capital from Lahore to Delhi.
- 3) Khalji Dynasty (C. 1290–1320 CE):** Jalauddin Khalji (c.1290–1296 CE) laid the foundation of the Khalji dynasty.
- 4) Tughlaq Dynasty (C.1320–1414 Ce)/Dynasty of Qaraunah Turks:** Ghiyasuddin Tughlaq (c.1320–25 CE) was the founder of the Tughlaq dynasty and the first Sultan to take the title of Ghazi/ Slayer of Infidels.

Thus, based on the above explanation, correct chronology is option d i.e. 2-1-4-3

Source: Poonam Dahiya Ancient and Medieval India

Q.22) With reference to Pala ruler Dharmapala, consider the following statements:

- Khalimpur Copper Plate inscription provides information about the administrative system during his rule.
- He established the Vikramashila University in modern day Bihar.
- First phase of the tripartite struggle between the Palas, the Pratiharas, and the Rashtrakutas started during his reign.

Which of the above given statements is/are correct?

- 1 and 2 only
- 1 and 3 only
- 2 and 3 only
- 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Palas, Pratiharas, and Rashtrakutas engaged in a triangular contest for control of the Ganga-Yamuna doab and adjoining lands after the death of Harsha. The Palas emerged victorious and established their rule over eastern India from Pataliputra between the 9th and early 12th centuries.

Statement 1 is correct: Khalimpur Copper Plate Inscription issued by Dharmapala provides details about the administrative system during his period. It was issued by Dharmapala (775–810 CE) in the 32nd regnal year after his victory at Kannauj.

Statement 2 is correct: Vikramshila University is located in the present-day Bhagalpur district of Bihar. It was established by Dharmapala in response to a perceived decrease in the level of study at Nalanda.

Statement 3 is correct: The first phase of the tripartite struggle, which took place round about 790 AD, started with a clash between Dharmapala and Vatsaraja, the Pratihara king, resulting in the defeat of the former, and later on a common enemy from the Deccan, the Rastrakuta king Dhruva Dharavarsa, defeated both of them. Dhruva, however, could not consolidate his victory, as he had to return to the south to save his own kingdom.

Q.23) Consider the following statements regarding the Delhi Sultanate:

1. The process of urbanization lost its momentum due to constant warfare during the Sultanate era.
2. The practice of sati was prevalent during the Sultanate period.
3. Use of iron stirrup was popularized in India during the Sultanate period.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Invasions by Mahmud of Ghazni and Mohd. Ghori into India ultimately resulted in the establishment of the Delhi Sultanate. Five different dynasties—the Slave, the Khalji, the Tughlaq, the Sayyids, and the Lodhi's are collectively referred to as the Delhi Sultanate. The rulers, termed as Sultans, were of Turkish and Afghan origin. The Sultanate's rule resulted in far-reaching changes in the Indian society, administration and cultural life.

Statement 1 is incorrect: During the Sultanate period, the process of urbanisation gained momentum. A number of cities and towns had grown during this period. Lahore and Multan (in the north west), Broach, Cambay, and Anhilwara (in the west), Kara and Lakhnauti in the east, Daulatabad, Delhi, and Jaunpur were important among them. Delhi remained the largest city in the east. The growth of trade and commerce was described by contemporary writers.

Statement 2 is correct: There was little change in the structure of the Hindu society during this period. The subservient position of women also continued, and the practice of Sati was widely prevalent. Ibn Batuta had mentioned with horror the scene of a woman burning herself in the funeral pyre of her husband with great beating of drums.

Statement 3 is correct: The Turks popularised a number of crafts and techniques such as:

- 1) Use of iron stirrup
- 2) Use of armour both for the horse and rider.
- 3) Improvement of rahat (Persian wheel through which water could be lifted from a deeper level for irrigation)
- 4) Paper-making, glass-making, the spinning wheel, and an improved loom for weaving.
- 5) Use of superior mortar, which enabled the Turks to erect magnificent buildings based on the arch and dome.

Q.24) With reference to the reign of Rashtrakutas in the Deccan, the terms ‘Nad Gavundas’ or ‘Desa Gramakutas’ refers to:

- village elders who helped headman in performing his duties.
- Brahmins who helped king in performing his duty according to Dharmashastra.
- hereditary revenue officers.
- persons responsible for maintaining law and order in the town.

Ans) c

Exp) Option c is the correct answer.

While the Palas and the Pratiharas were ruling over north India, the Deccan was being ruled by the Rashtrakutas, a remarkable dynasty which produced a long line of warriors and able administrators. The kingdom was founded by Dantidurga. The administration of the kingdom was divided into three heads: rashtra, visaya and bhukti.

Option c is correct: The nad gavundas or desa gramakutas were the hereditary revenue officer in the Rashtrakutas period. They appear to have discharged the same functions as the deshmukhs and deshpandes of later times in Maharashtra. This development, along with the petty chieftainships in north India had an important bearing on society and politics. As the power of these hereditary elements grew, the **village committees became weaker**. The central ruler also found it difficult to assert direct authority over them and to control them. Hence, the whole system of the government became feudalised.

Option a is incorrect: Village elders who helped headman in performing his duties were known as grama mahajanas or grama mahattara.

Option b is incorrect: The purohits helped king in performing his duty of protecting Brahmanas according to Dharmashastra.

Option d is incorrect: Law and order in the towns and in areas in their immediate vicinity was the responsibility of the koshta pala or kotwalas.

Source: Old NCERT, Satish Chandra, pg. 24

Q.25) Consider the following statements regarding ‘UV-C Disinfection Technology’:

- The technology has been developed under the joint collaboration of Indo-U.S. Science and Technology Forum.
- It will help in deactivation of bacteria and other bio-aerosols with appropriate dosages using UV light.
- The technology cannot be used in an indoor environment due to higher amount of radiation discharge.

Which of the statements given above is/are correct?

- 1 and 2 only
- 2 only
- 1 and 3 only
- 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: UV-C Disinfection Technology has been developed by the **Council of Scientific & Industrial Research (CSIR)** and not by Indo-U.S. Science and Technology Forum. The technology is meant for the mitigation of airborne transmission of Covid-19.

Statement 2 is correct: UV-C deactivates viruses, bacteria, fungus and other bioaerosols etc with appropriate dosages using **254 nm UV light**.

Statement 3 is incorrect: The disinfection system can be used in **auditoriums, large conference rooms, classrooms, malls etc.** which provides a relatively safer environment for **indoor activities** in the current pandemic. It can also be used in buildings, transport vehicles, etc.

Source: UV-C Disinfection Technology: Union Minister says, CSIR's newly developed Disinfection technology is being installed to combat the pandemic in railway coaches, AC buses, closed spaces etc - ForumIAS Blog

<https://www.pib.gov.in/PressReleasePage.aspx?PRID=1790527>

Q.26) Consider the following statements with reference to the Dagh and Chehra system during the Sultanate period in Medieval India:

1. It was introduced by Allaudin Khilji.
2. Dagh referred to the branding of the horse for identification purposes.
3. Chehra referred to the description of soldiers.

Which of the above given statements is/are correct?

- a) 2 only
- b) 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: Alauddin Khilji was the first Sultan to have a large permanent standing army and paid them in cash from the royal treasury. He imported horses and according to historian Ferishta, he recruited 4,75,000 cavalymen. **Chehra and Dagh System was introduced by him.**

Statement 2 is correct: The system of Dagh was essentially branding horses. It meant to identify the quality of horses in the Imperial army. This allowed only good-quality horses to be part of the muster.

Statement 3 is correct: Chehra referred to physical description of troops. A "Chehra" or a "face" was a document or a record that contained information about the individual's ancestry, rank, and other personal details. These documents were maintained by the court officials.

Source: Ancient and Medieval India by Poonam Dahiya (Chapter-11 Delhi Sultanate)

Q.27) Consider the following statements regarding the contributions of Rajputs in the field of culture in Medieval India:

1. The Jain temple at Mount Abu was built by Chalukyan rulers of Gujarat.
2. Bhoj Shala was established as a centre of Sanskrit studies.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

After the break-up of the Pratihara kingdom, the medieval India saw the rise and dominance of Rajputas over central and northern India. The most important of these were the Gahadavalas of Kannauj, the Paramaras of Malwa, and the Chauhans of Ajmer. There were other smaller dynasties in different parts of the country, such as the Kalachuris in the area around modern Jabalpur, the Chandellas in Bundelkhand,

SFG 2023 | LEVEL 2 | Test #36 – Solutions | ForumIAS

the Chalukyas of Gujarat, the Tomars of Delhi, etc. They made significant contribution in the field of Indian culture.

Statement 1 is correct: The Jain temple at Mount Abu was built during Chalukya rule in Gujarat. It was built by **Vastupala**, the famous minister of the Chalukyan ruler Bhima in Gujarat, who was also a writer and a patron of scholars.

Statement 2 is correct: The Rajput rulers also patronized arts and letters. Many books and plays were written in Sanskrit during the period under their patronage. Ujjain and Dhara, the capitals of the Paramara rulers, were famous centres for Sanskrit learning. **Bhoj Shala** was established by Bhoja (c.1010–1055 CE), as a centre of **Sanskrit studies** and a temple of Sarasvati in present day Dhar (MP).

Source: Old NCERT, Satish Chandra, pg. 66–67

Q.28) He was an Arab merchant who visited India during the 9th century AD. He calls the Pala Kingdom as Ruhma and says that the Pala ruler was at war with his neighbors, the Pratiharas and the Rashtrakutas. The above passage refers to which of the following travelers?

- a) Al Masoodi
- b) Ibn Battuta
- c) Sulaiman
- d) Shihabuddin al-Umari

Ans) c

Exp) Option c is the correct answer.

Option a is incorrect: Al Masudi was an Arab, **who travelled India during 10th century**. Has given account of India in his book 'Muruj- ul-Zehab'. The book discusses India's political, economic and religious history.

Option b is incorrect: Ibn Battuta (1333 to 1342) was a Moroccan traveller. He visited India during the reign of Muhammad-Bin-Tughlaq. He has been appointed as judge by Tughlaq. His book 'The Travels' details about the much-mocked administrative reforms of Delhi Sultan Muhammad bin Tughluq.

Option c is correct: Pala's power is attested to by an Arab merchant, Sulaiman, who visited India in the middle of the ninth century and wrote an account of it. He calls the Pala Kingdom Ruhma, and says that the Pala ruler was at war with his neighbours, the Pratiharas and the Rashtrakutas, but his troops were more numerous than his adversaries. He tells us that it was customary for the Pala king to be accompanied by a force of 50,000 elephants, and that 10,000-15,000 men in his army were employed 'in fulling and washing clothes'. Even if these figures may be exaggerated, we can assume that the Palas had a large military force at their disposal. But we do not know whether they had a large standing army, or whether their forces consisted largely of feudal levies

Sulaiman also mentions Amoghavarsha as the fourth of the great monarchs of the world, the other three being the Khalif (Caliph) of Baghdad, the emperor of China, and the emperor of Rūm or Constantinople. The Rāshtrakūta kings kept on the best of terms with the Arabs of Sind, and enriched their subjects by encouraging commerce. Amoghavarsha possessed multitudes of horses and elephants, with immense wealth, and maintained a standing army regularly paid.

Option d is incorrect: Shihabuddin al-Umari from Damascus visited India during 14th century. He gives a vivid account of India in his book "Masalik albsar fi-mamalik al-amsar"

Q.29) Consider the following statements with reference to slaves during the reign of Iltutmish in Medieval India:

1. Bandagan were the special slaves appointed for military service.
2. Slaves could be promoted to the ruling class.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

During the reign of Sultan Shams-ud-Din Iltutmish (1211-1236), the third ruler of the Delhi Sultanate in India, slavery played a significant role.

Statement 1 is correct: The **Bandagans were special slaves purchased for military service by early sultans, especially Iltutmish.** They were carefully trained to maintain important political offices in the kingdom. They were totally dependent on the masters and the Sultan could trust them implicitly.

Statements 2 is correct: **The Sultans and the Muslim aristocracy in Medieval India usually gave a certain right and social status** to some of the slaves who perform well, and the slaves sometimes get the corresponding labour remuneration or even a larger amount of wealth. **The official slaves because of the close contact with the ruling class, the opportunity to be liberated and promoted, in the court,** their work will often be shared with a large number of servants and court servants.

Q.30) With reference to Munich security conference, consider the following statements:

1. The conference is an important forum for discussion and debate on security and foreign policy.
2. It is initiative of European Union to tackle Security challenges in Europe
3. This year's Munich Security Report had a special focus on Russia's Invasion of Ukraine.

Which of the above given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Munich Security Conference is attended by heads of state and government, foreign and defense ministers, military leaders, and experts from around the world. The conference provides a platform for leaders to engage in dialogue and discuss solutions to current and emerging security challenges facing the international community. "Turning the Tide. Unlearning Helplessness" is the conference motto and the title of Munich Security report.

Statement 1 is correct: The Munich Security Conference is an annual conference that provides a platform for leaders, policymakers, experts, and academics to discuss and debate security and foreign policy issues.

Statement 2 is incorrect: The Munich Security Conference is not a regional initiative of the European Union. It is an independent forum that brings together leaders and experts from around the world to discuss security challenges. The conference is typically held in February and takes place in Munich, Germany.

Statement 3 is correct: The Munich Security Report is an annual report that presents data, analyses, and maps related to current security policy issues. The annual report of 2023: Re:vision placed greater focus on Russia-Ukraine conflict.

Source: <https://securityconference.org/en/about-us/about-the-msc/>

Q.31) Which among the following can be considered as reasons for multiple invasions by Turks in India during medieval period?

1. Lack of a strong centralized nationwide power
2. Comparatively stronger Army of Turks
3. Geographical proximity of India to Turks
4. Rich wealth and resources of Indian subcontinent

Select the correct answer using the code given below:

- a) 1 and 3 only
- b) 2 and 4 only
- c) 1 and 2 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

There were several reasons for India being subjected to multiple invasions by Turks in medieval India.

Option 1 is correct: During the medieval period, India was divided into several small and weak kingdoms. The **lack of a strong centralized power made it difficult for Indian rulers to mount a united defense against foreign invaders**, making it easier for the Turks to conquer various regions.

Option 2 is correct: The **Indian armies were generally composed of infantry and elephants, which were slow and less effective compared to the fast-moving Turkish cavalry**. The Indian soldiers also lacked the advanced military equipment and training that the Turks had, making it difficult for them to withstand the Turkish invasions.

Option 3 is correct: India shares borders with the regions from where the Turks originated, such as Central Asia and Persia. **This geographical proximity made India an accessible target for invasions and conquests.**

Option 4 is correct: **India was known for its immense wealth, which attracted invaders seeking to acquire riches.** The fertile lands, abundant natural resources, and prosperous cities made India an attractive target for Turkish invaders.

Ancient and Medieval India by Poonam Dahiya (Chapter-11 Delhi Sultanate)

Q.32) Consider the following pairs of types of lands during the Delhi Sultanate:

Type of Land	Meaning
1. Khalisa	Lands assigned to officials as payment for their services.
2. Iqta	Land under the direct control of the Sultan.
3. Inam	Land assigned or granted to religious institutions.

Which of the above-given pairs is/are matched correctly?

- a) 2 only
- b) 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

During the Delhi Sultanate period, the administration of land and revenue collection was organized through several types of land classifications, such as Iqta, Khalisa, and Inam.

Pair 1 is incorrect: Khalisa lands were those directly under the control of the Sultan and his central administration. Revenue collected from Khalisa lands went directly to the royal treasury and was used to fund the central government's expenses, such as the salaries of officials, the upkeep of the royal court, and the maintenance of the royal army. The Khalisa lands were critical for ensuring the financial stability of the Sultanate and served as a primary source of income for the central government.

Pair 2 is incorrect: The Iqta system was a form of land grant or assignment given to nobles, military officers, and other officials in lieu of their services to the state. The grantee, known as the Iqtadar or Muqti, was responsible for maintaining law and order, providing military support, and collecting revenue in their assigned territory. The Iqtadar would keep a portion of the revenue to maintain their troops, administration, and personal expenses while sending the rest to the central government. The Iqta system served as a decentralized form of governance and revenue collection.

Pair 3 is correct: Inam lands were grants or endowments given to religious institutions, scholars, or individuals for their services to the state or for religious and charitable purposes. These lands were generally exempt from land revenue and other taxes. Inam grants could be given for various reasons, such as to reward loyalty, support religious institutions, or promote learning and culture. The Inam system allowed the Sultans to foster good relations with the religious and intellectual elite, ensuring their support for the regime.

Q.33) Consider the following statements with reference to the account of Abdur Razzak regarding the Vijayanagar kingdom:

1. He mentioned that Vijayanagar had multiple layers of fortifications.
2. He mentioned that the Vijayanagara Empire was rich in diamonds.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Abdur Razzak, a Persian ambassador and chronicler, visited the Vijayanagara Empire during the reign of Deva Raya II (1424-1446). His accounts provide valuable insights into the political, social, and cultural aspects of the Vijayanagara Empire

Statement 1 is correct: According to Razzak, **Vijayanagara had multiple layers of fortifications, with each layer having its gates, watchtowers, and walls.** These fortifications demonstrated the empire's focus on security and defense against external threats.

Statement 2 is correct: Razzak mentioned that the Vijayanagara Empire was rich in diamonds, with mines producing high-quality stones. These diamonds were an essential source of revenue for the empire and contributed to its overall wealth.

Q.34) Which of the following foreign travelers visited India during the Vijayanagara Empire?

1. Nicolo Conti
2. Abdur Razzaq
3. Domingo Paes

Select the correct answer using the code given below:

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Many foreign travelers visited the Vijayanagar Empire and gave a detailed account of its administration.

Option 1 is correct: The Italian traveller **Nicolo Conti visited Vijayanagara in 1420**. He gave an account of the construction and administration of the empire. He says that the Vijayanagara king is more powerful than all the other kings in India and gives the details as: ‘The circumference of the city is sixty miles, its walls carried up to the mountains, and enclose the valleys at their foot.... In this city there are estimated to be ninety thousand men fit to bear arms.’

Option 2 is correct: The Persian traveller **Abdur Razzaq visited Vijayanagara in the reign of Deva Raya II**. He gives a glowing account of the country with most part well cultivated, very fertile. The troops amount in number to eleven lakhs. He considers Vijayanagara to be one of the most splendid cities anywhere in the world which he had seen or heard of.

Option 3 is correct: Domingo Paes was a Portuguese traveller who visited the Vijayanagara Empire, located in the Deccan in southern India, around 1520.

Q.35) With reference to National Land Monetization Corporation, Consider the following statements:

1. It will be incorporated as a 100% Government of India owned entity.
2. NLMC will undertake monetization of surplus land and building assets of Central Public Sector Enterprises and other Government agencies.
3. The Ministry of Finance will set up the company and act as its administrative ministry.

Which of the following statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Indian government has given its approval to establish the National Land Monetization Corporation (NLMC) as a fully state-owned company with an objective to monetize excess land and building assets of Central Public Sector Enterprises (CPSEs) and other government agencies, which is in line with the 2021-22 budget announcement.

Statement 1 is correct: NLMC is incorporated as a 100% Government of India owned entity, NLMC will have an initial authorized share capital of ₹5,000 crore and subscribed share capital of ₹150 crore

Statement 2 is correct: Government has set up a National Land Monetisation Corporation (NLMC) to undertake monetization of surplus land and building assets of Central Public Sector Enterprises (CPSEs) and other Government agencies.

Statement 3 is correct: Department of Public Enterprise, Ministry of Finance, will set up the company and act as its administrative ministry.

Q.36) Arrange the following dynasties that ruled the Vijayanagar kingdom of India in the correct chronological order starting from the earliest:

1. Aravidu Dynasty
2. Tuluva Dynasty
3. Sangama Dynasty
4. Saluva Dynasty

Select the correct answer using the correct answer:

- a) 1-2-3-4
- b) 4-2-3-1
- c) 3-2-4-1
- d) 3-4-2-1

Ans) d

Exp) Option d is the correct answer.

The Vijayanagar kingdom, a prominent South Indian empire, was founded in 1336 and lasted until 1646. It was ruled by four main dynasties in chronological order:

- 1) Sangama Dynasty (1336–1485)
- 2) Saluva Dynasty (1485–1505)
- 3) Tuluva Dynasty (1505–1570)
- 4) Aravidu Dynasty (1570–1650)

Source: Ancient and Medieval India by Poonam Dahiya (Chapter-11 Delhi Sultanate)

Q.37) With reference to the condition of women in the Vijayanagar Empire, consider the following statements:

1. The Devadasi tradition, dancing girls associated with temples, was popular in the society.
2. During this period, the woman of the royal families often participated in public functions.
3. During this period, women enjoyed the right to property and had freedom to choose their own spouse.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct. The Devadasi tradition in the Vijayanagar Empire was very popular. As per the account of Domingo Paes, a Portuguese foreign traveller, the tradition of the **dancing girls attached to the temples** was very common in this empire. A Devadasi was considered a handmaiden of God who was married to the temple deity as a child and later she used to become a part of the temple establishment. These Devadasis were educated and trained in music and dance. It was interpreted by many historians from the account of Paes that these Devadasis used to hold a **very respectable place in society**. During religious rituals, the presence of these Devadasis was considered essential.

Statement 2 is correct: The woman of the palaces of the kings and the royal family often participated in public functions. The **kings and queens were experts in the fields of art, dance, music, poetry, administration, justice, mathematics** etc. Some were scholars. For example: Kampanaraya's wife Gangambike wrote 'Madhura Vijayam', Tirumalambike wrote 'Varadambika Parinaya', Ramabhandramba wrote 'Raghunathabhyudaya'. Honnamma was also a correspondent at the court of Devaraya 2, Tirumalamba Achyutaraya of Oda. Krishnadevaraya's queen Chennamba danced. **Queens were trained in dance and music, sword fighting wrestling.**

Statement 3 is incorrect: Vijayanagara society had a patriarchal family system. Thus, **there was neither the right to property nor the freedom to choose one's spouse**. Her property was the dowries received during the marriage. Only a childless widow got a share in her husband's property.

Source: <https://hospet.online/devadasi-preservers-of-art-in-vijayanagara-empire/#:~:text=Who%20is%20A%20Devadasi%3F,considered%20essential%20during%20religious%20rituals>.

Q.38) With reference to the Kalahasti Inscription, consider the following statements:

1. The Kalahasti inscription gives information about the coronation of King Achyuta Deva Rai of Tuluva Dynasty.
2. This inscription was written in Kannada language in the Devanagari script.
3. The exact date of the demise of Krishnadevaraya of Tuluva Dynasty is engraved on this inscription.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is correct answer.

Statement 1 is correct. The Kalahasti inscription was found at Sri Kalahasti Temple in the Chittor district of the Indian state of Andhra Pradesh. Kalahasti inscription has revealed that Achyuta Devaraya, who was the younger brother of Krishnadevaraya, was coronated as the fourth king of the Tuluva dynasty on 21st October 1529.

Statement 2 is correct. The Inscription which was found at the premises of Sri Kalahasti Temple in Andhra Pradesh was written in Kannada language and Devanagari script.

Statement 3 is incorrect. The exact date of death of Krishnadevaraya, the third king of the Tuluva dynasty, was engraved on the Honnenahalli inscription and not on the Kalahasti inscription.

Source: <https://telanganatoday.com/krishnadevaraya-died-on-oct-17-1529>

Q.39) Consider the following statements:

1. The Bahmani kingdom was founded by Ala-ud-din Hassan Bahman Shah.
2. Earlier the capital of the Bahamanis was Gulbarga, which was later moved to Bidar.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. Ala-ud-Din Hassan Bahman Shah, also known as Hassan Gangu, the Turkish governor, founded the Bahmani Kingdom in the year 1347. He had successfully revolted against Muhammad bin Tughlaq, the Sultan of Delhi.

Statement 2 is correct. Gulbarga served as the Bahmani Empire's capital from 1347 to 1425. In the year 1425, it was moved to Bidar.

Source: <https://www.historydiscussion.net/history-of-india/medieval-age/administration-of-india-under-the-bahmani-kingdom-indian-history/6589>

<https://www.jagranjosh.com/general-knowledge/bahmani-kingdom-13471527-ad-1411563177-1>

Q.40) Consider the following statements about Dugong, recently seen in news:

1. Recently, India's first ever dugong conservation reserve was notified in the Gulf of Mannar region.
2. Dugongs are listed as Endangered in the IUCN Red List of threatened species.
3. Dugongs can stay underwater for days, and they do not need to come to the surface for breathing.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

Dugongs are marine mammals that graze on seagrass meadows in the ocean. Dugongs (*Dugong dugon*) live in small groups in shallow waters. They're called sea cows: a term that reflects the ecological role they play, being oceanic herbivores that feed on seagrass in underwater meadows. They can grow up to 3.5 meters long, and weigh around 300 kg.

Statement 1 is correct: Recently, Tamil Nadu notified India's first ever dugong conservation reserve in the Palk Bay area of the Gulf of Mannar, which lies between Sri Lanka and the southern tip of India. In an order published in the state gazette on September 21, Tamil Nadu notified the Dugong Conservation Reserve and delineated the boundaries of the area which will come up off the coastal districts of Thanjavur and Pudukottai.

Statement 2 is incorrect: The animals are distributed across many parts of the Indo-Pacific, yet they are listed as Vulnerable in the IUCN Red List of Threatened Species due to their decreasing population worldwide. The species is already extinct in China. India's dugong population too is declining: there are just around 200 dugongs left, as per recent estimates.

Statement 3 is incorrect: These mammals can stay underwater for six minutes before surfacing. They sometimes breathe by "standing" on their tail with their heads above water. Hence, they cannot stay under water for more than 6 minutes without coming to the surface for breathing.

Source: <https://thewire.in/environment/tamil-nadu-indias-first-dugong-reserve-crucial>

<https://www.nationalgeographic.com/animals/mammals/facts/dugong#:~:text=These%20mammals%20can%20stay%20underwater,with%20their%20heads%20above%20water.>

Q.41) Consider the following statements about ‘Tarafdars’ in Bahamani Kingdom:

1. Tarafdars in the Bahamani Kingdom were the governors of the provinces.
2. They were sometimes appointed as the Ministers of the King.
3. They were responsible for collecting revenue in their provinces.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct. During Muhammad Shah I's reign, the Bahamani kingdom was divided into four Atrafs or provinces which were Gulbarga, Daulatabad, Bidar, and Berar, each with its own governor (tarafdar).

Statement 2 is correct. Each of these provinces appointed Tarafdars, who had great administrative and military authority. Tarafdars were sometimes appointed to serve as the king's ministers as well.

Statement 3 is correct. These Tarafdars organized their own provincial armies, collected revenues from their respective provinces, and appointed all civil and military officers concerning their provinces.

Source: <https://www.historydiscussion.net/history-of-india/medieval-age/administration-of-india-under-the-bahmani-kingdom-indian-history/6589>

Q.42) With reference to the Economic condition of Vijayanagar Empire, consider the following statements:

1. The gold coins issued by the rulers of the Vijayanagar Empire were known as Varahas.
2. The coins issued by Krishnadevaraya had the Hanuman symbol engraved on them.
3. Harihara I and Bukka I had the figures of Balkrishna and Venkatesh on the coins issued by them.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct. The rulers of the Vijayanagar Empire issued a large number of gold coins which were known as Pagodas or Varahas. Varaha was the most familiar symbol among the people of Vijayanagar as it is the Boar incarnation of Vishnu.

Statement 2 is incorrect. The skill of engravers was only added to coins under the Tuluva dynasty. The gold coins, pagodas and half-pagodas featuring "seated Balakrishna" were issued in different styles by Krishnadevaraya.

Statement 3 is incorrect. Bukka and Harihara-I minted gold coins from debased gold. They minted gold fanams and their fractions for medium-end transactions.

Because of the engraving style used by earlier kingdoms, including the Kadamba-Chalukyas, pagoda obverses frequently were misunderstood as depicting Hanuman. They featured a running warrior and a dagger symbol.

Source: https://www.forumancientcoins.com/india/vijayngr/vij_coinage.html

Q.43) Consider the following statements regarding Prithviraj Chauhan of Chahamana dynasty:

1. Chand Bardai and Jayanaka were the court poets during the reign of Prithviraj Chauhan.
2. Ajmer city was first established by Prithviraj Chauhan.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

The Chahamanas of Shakambhari, colloquially known as the Chauhans of Sambhar, ruled in parts of present-day Rajasthan and its neighbouring areas between 7th and 11th centuries CE. They were the most prominent ruling family of the Chahamana clan. The most famous of all Chauhans, is popularly known as Prithviraj Chauhan or Rai Pithora in the folk legends. Prithviraj Chauhan defeated Muhammad Ghori in the First Battle of Tarain in c.1191 CE. In 1192 CE.

Statement 1 is correct: Two great poems, Prithviraj Raso and Prithviraj Vijaya, were written by **court poets of Prithviraj Chauhan- Chand Bardai and Jayanaka respectively.**

Statement 2 is incorrect: Ajayaraja II (r. c. 1110–1135 CE) was an Indian king belonging to the Chahamana dynasty. He ruled the Sapadalaksha country, which included parts of present-day Rajasthan in north-western India. He defeated the Paramaras of Malwa, and also repulsed the Ghaznavid invasions after losing some part of his territory to them. **The establishment of the Ajmer city is attributed to him.**

https://dbpedia.org/page/Ajayaraja_II

Q.44) Consider the following statements regarding the Delhi Sultanate:

1. Iltutmish successfully prevented the Mongol attack on India by defeating them in the Battle of Kili.
2. The Mangol threat is an important reason for the establishment of a permanent standing army by Alauddin Khalji.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

The Mongol Empire launched several Mongol invasions into the Indian subcontinent from 1221 to 1327. The Mongols made Kashmir their vassal state. However, the campaigns against the Delhi Sultanate proved unsuccessful, in spite of constant Mongol incursions.

Statement 1 is incorrect: Alauddin Khalji was the sultan of Delhi during the Battle of Kili (not Iltutmish). **The Battle of Kili** was fought in 1299 between the Mongols of the Chagatai Khanate and the Delhi Sultanate. **The Mongols, led by Qutlugh Khwaja (prince of Mongols),** invaded India, intending to conquer Delhi. When they encamped at Kili near Delhi, **the Delhi Sultan Alauddin Khalji** led an army to check their advance. The Mongols withdrew after Qutlug was injured in the battle during Zafar Khan's execution.

Statement 2 is correct: Alauddin established a huge permanent standing army to satisfy his ambition of conquest and to protect the country from Mongol invasion. The northwestern frontier was fortified, and Ghazi Malik (Ghiyasuddin Tughlaq) was appointed to as the Warden of Marches to protect the frontier.

Q.45) Consider the following statements about the IUCN Green list, recently seen in news.

1. The IUCN Green List is the first global standard of good practices for area-based conservation.
2. Its objective is to provide a global benchmark to assess whether protected and conserved areas are achieving successful conservation outcomes.
3. It assesses the achievement of protected areas based on 17 management criteria.
4. Recently two Indian sites have been added to the list.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 3 and 4 only
- c) 1, 2 and 3 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

The IUCN Green List is a global campaign for successful nature conservation. At its heart is the Green List Sustainability Standard that provides a global benchmark for how to meet the environmental challenges of the 21st century.

Statement 1 is correct: Officially launched in November 2014 at the IUCN World Parks Congress in Sydney, the Green List is the first global standard of good practices for protected areas. The IUCN Green List offers locally relevant expert guidance, to help achieve fair and effective nature conservation results in the protected and conserved areas. It can help guarantee that wildlife and ecosystems can survive, thrive and bring value to communities everywhere.

Statement 2 is correct: Its objective is to provide a global benchmark to assess whether protected and conserved areas are achieving successful conservation outcomes through effective and equitable governance and management. It also aims to increase the number of natural areas delivering long-lasting conservation results for people and nature.

Statement 3 is correct: The IUCN Green List Standard is organised into four components of successful nature conservation in protected and conserved areas.

- 1) Good Governance
- 2) Sound Design and Planning
- 3) Effective Management
- 4) Successful Conservation Outcomes

There are total 17 criteria covering all the above 4 components.

Statement 4 is incorrect: Currently there are 61 Green listed sites globally. However, there are no Indian sites in this elite list. It has been observed that out of numerous protected/conserved areas that India has, only a handful of them meet the criteria for inclusion in the IUCN Green List.

SFG 2023 | LEVEL 2 | Test #36 – Solutions | ForumIAS

Q.46) With reference to the social life in the Vijayanagara Empire, consider the following statements:

1. Sati and prostitution were considered illegal and were banned by the rulers.
2. Muslims were employed in the administration and were allowed to build mosques.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. According to Nuniz, **polygamy was common in royal families. Sati was honoured and Nuniz described it. Prostitution was also practiced in the Vijayanagar Empire.** These events denote that condition of women was not improved during Vijayanagara Empire.

Statement 2 is correct. Borbosa speaks of the **freedom of religion that everyone enjoyed. Muslims were employed by the government and were free to build mosques and worship.**

This shows they were tolerant to other religions and respected them.

Knowledge Base:

- 1) Allasani Peddanna in his **Manucharitam mentions the existence of four castes in Vijayanagar society - Brahmins, Kshatriyas, Vaisyas and Sudras.**
- 2) **Nicolo Conti mentioned slavery, Dance, music, racing, gambling and fighting are some of the games that were played and practiced.**

Source: Tamil Nadu Board Textbook, Ch-19, Pg – 213 and 214

Q.47) Consider the following pairs of land categories during Vijayanagar Kingdom and their description:

Land Category	Description
1. Amaram	Lands given to officials
2. Manya	Villages directly under the Crown
3. Bhandaravada	Tax-free villages

Which of the above given pairs is/are matched correctly?

- a) 1 only
- b) 3 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) a

Exp) Option a is the correct answer.

During the Vijayanagara kingdom, land was classified into various categories for administrative purposes, revenue collection, and to ensure proper distribution of resources.

Pair 1 is correct: Amaram (Assigned land) were such lands that were given to military personnel, officials, or courtiers as a reward for their services to the kingdom. The recipients of such lands were expected to provide military services when required.

Pair 2 is incorrect: Manya lands were granted to Brahmins by the Vijayanagara kings as a reward for their services or contributions to the kingdom. These land grants were meant to support the livelihood

of the Brahmins, who played an essential role in religious, educational, and cultural affairs. The **revenue generated from Many lands was typically exempt from taxes, and the Brahmins were allowed to use this income for their sustenance and maintenance** of religious and educational institutions.

Pair 3 is incorrect: The Bhandarvada was a village directly under crown comprising the smallest category. A part of its income was utilised to maintain the Vijayanagar forts.

Ancient and Medieval India by Poonam Dahiya (Chapter-11 Delhi Sultanate)

Q.48) Consider the following statements regarding the Utpala Dynasty:

1. It ruled over the area of present-day Kashmir.
2. Avanti Varman was the founder of the Utpala Dynasty.
3. Their rule was marked by the complete absence of temple construction activities in their kingdom.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Much of the history of Kashmir and North-west India is deduced from the legendary and historical chronicle Rajatarangini (which means ‘the river of kings’). It was probably written in 12th century CE in Sanskrit by a Kashmiri Brahmana called Kalhana. In early 7th century, the Karkota dynasty rulers established their rule in Kashmir. The Utpala dynasty was established by ending the rule of the Karkota dynasty in 855 CE.

Statement 1 is correct: In the 9th and 10th centuries CE, the Kashmir region was ruled over by the Hindu Utpala dynasty.

Statement 2 is correct: Avanti Varman (c. 855–883 CE) was the founder of the Utpala dynasty and was known as a great administrator. He was credited with taking major innovative works in the field of irrigation. During his reign, the cities of Avantipur and Suyapur were founded, and many Hindu temples dedicated to both Vishnu and Shiva and Buddhist monasteries were built, notable of which is the Avantiswara and Avantiswami temples.

Statement 3 is incorrect: During the reign of Utpalas, several temples were constructed. Avantivarman established various temples and cities, including Avantipura, Surapura and the Avantiswami Temple, under the direction of chief minister Suyya. Samkaravarman built the Shiva temples of Samkaragaurisa and Sugandhesa as well as Samkarapura (modern-day Pattan).

Source: Poonam Dahiya Ancient and Medieval India

Q.49) With reference to the medieval Indian history, the term ‘Nanadesi’ is used to refer to:

- a) Spies appointed by the kings to keep an eye on the distractors.
- b) A privileged class of Brahmins who used to serve only the kings.
- c) Yogis approached by the people to free them from the bad spirits.
- d) Traders who formed guilds to protect their interests.

Ans) d

Exp) Option d is the correct answer.

In the context of medieval Indian history, there were many kinds of traders. These included the Banjaras. Several traders, especially horse traders, formed associations, with headmen who negotiated on their behalf with warriors who bought horses.

Since traders had to pass through many kingdoms and forests, they usually travelled in caravans and formed guilds to protect their interests. There were several such guilds in south India from the eighth century onwards – the most famous being the Manigramam and Nanadesi. These guilds traded extensively both within the peninsula and with Southeast Asia and China.

There were also communities like the Chettiers and the Marwari Oswal who went on to become the principal trading groups of the country. Gujarati traders, including the communities of Hindu Baniyas and Muslim Bohras, traded extensively with the ports of the Red Sea, Persian Gulf, East Africa, Southeast Asia and China. They sold textiles and spices in these ports and, in exchange, brought gold and ivory from Africa; and spices, tin, Chinese blue pottery and silver from Southeast Asia and China.

Q.50) What is the purpose of the Ombudsperson App launched by the Union Minister for Rural Development and Panchayati Raj?

- a) To register grievances related to Regional Rural banks.
- b) To ensure transparency in the implementation of PM Gram Sadak Yojana
- c) To monitor the progress and report any discrepancy related to Swachh Bharath Mission in Rural areas
- d) To ensure transparency and accountability in the implementation of MGNREGA

Ans) d

Exp) Option d is the correct answer.

The Ombudsperson App for Mahatma Gandhi NREGA has been launched by the Union Minister for Rural Development and Panchayati Raj to ensure transparency and accountability. The app has been developed to facilitate the reporting and categorization of grievances related to the implementation of the MGNREGA from various sources. The current process of complaint reporting, awards passing, and complaint disposal is in physical form. The app will enable easy tracking and timely passing of awards on each case, making the Ombudsperson's work hassle-free and more efficient.

Source: <https://pib.gov.in/PressReleasePage.aspx?PRID=1800847>

Q.1) With reference to the Maratha administration, Mamlatdar and Kamavisdar were:

- a) Representatives of Peshwa in districts
- b) Heads of small units of armed forces
- c) Ambassadors of Peshwa in foreign countries
- d) Officials in charge of coin minting press

Ans) a

Exp) Option a is the correct answer.

The Maratha administration was a three-tier system with a central government at Poona, provincial government and the district administration. The central secretariat called the Huzur Dajtar was the nerve centre of the country's administration. **Provinces under the Peshwas were of various sizes and larger ones were under provincial governors called Sarsubahdars.** The provinces were termed Subahs, Sarkars, or Prants. Next to the Sarsubahdar was the Mamlatdar whose duties were of diverse nature, namely looking after agriculture, industry, civil and criminal justice, police, local militia, revenue assessment of the districts and villages.

Option a is correct: The Mamlatdar and Kamvisdar were Peshwa's representatives in the districts. Deshmukhs and Deshpandes were district officers who were in charge of accounts and were to observe the activities of the Mamlatdars and Kamvisdars. It was a system of checks and balances.

Source: <https://www.historydiscussion.net/history-of-india/administrative-system-of-the-peshwas/5930>

Q.2) Which of the following statements indicate the significance of Babur's advent into India?

1. Introduction of gun and gunpowder in India for the first time.
2. Introduction of Char Bagh style of architecture in India.
3. Introduction of arch and dome in architecture of the subcontinent for the first time.
4. End of theocratic Rule in India by breaking the allegiance to the caliph and declaring himself "Padshah".
5. Strengthening of Trans-Asian Trade due to his control of Kabul and Kandhara.

Select the correct answer using the code given below:

- a) 1, 3, 4 and 5 only
- b) 2, 4 and 5 only
- c) 1, 2 and 5 only
- d) 1, 2, 3 and 4 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. Babur introduced a new mode of warfare which led to the popularisation of gunpowder, cavalry, and artillery in India. Gunpowder was **used earlier too in India by the Mongols in the 13th century**, but it was popularised by Babur to be used in large scale, especially during warfare.

Statement 2 is correct. Char-Baghs and symmetrical gardens with running water and fountains as a part of Architecture style was introduced by Babur.

Statement 3 is incorrect. Arch and Dome's architecture was adopted before the advent of **Babur, by the Turks after the invasion of Mahmud Ghori.**

Statement 4 is correct. In Indian History the Delhi Sultanate Period has been called a Theocracy simply because Islam was the proclaimed religion of the state and every ruler owed his allegiance to the Caliph, The Head of the Islamic World. **All the Muslim Rulers of this period use to call themselves Sultans or the representatives of the Khalifa. Babur was the first Muslim Ruler of India to do away with this practice. It enhanced the prestige of the crown. It was Babur who declared himself to be 'Padshah'.** He thus severed

all his connections from the Khalifa and made himself independent of all theocratic influence both in principle and practice. In this way we can say that Babur was the first Muslim Ruler who thought of laying the foundations of a secular state in Medieval India.

Statement 5 is correct. Babur's control of Kabul and Kandhar strengthened India's foreign trade since these two towns were the starting points for caravans for China and the Mediterranean Sea Ports.

Source: Poonam Dalal Ch-13, Pg 654 + UPSC PYQ 2015

Q.3) Consider the following statements about the Treaty of Purandar of 1665:

1. The treaty was signed between Jai Singh I, commander of the Mughal Empire, and Shivaji.
2. According to the treaty, Shivaji had to surrender majority of his forts that were under his control to the Mughals.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

In 1664, Shivaji attacked Surat, the major Mughal port in Arabian sea and his soldiers plundered the city. In retaliation, Aurangzeb dispatched an army under the command of the Rajput general Raja Jai Singh I to defeat Shivaji and annex Bijapur.

Statement 1 is correct: The Treaty of Purandar was signed on 11 June 1665, between Jai Singh I, commander of the Mughal Empire, and Shivaji. Shivaji was forced to sign the agreement after Jai Singh besieged Purandar fort. When Shivaji realised that war with the Mughal Empire would only cause damage to his empire with possibility of his men suffering heavy losses, he chose to enter the treaty instead of leaving his men under the Mughals.

Statement 2 is correct: According to the treaty, Out of 35 forts held by Shivaji, 23 forts with surrounding territory which yielded a revenue of four lakhs of huns every year were to be surrendered to the Mughals, while the remaining 12 forts with an annual income of one lakh of huns were to be left to Shivaji 'on condition -of service and loyalty to the throne'..

Q.4) With reference to policies adopted by Akbar, consider the following statements:

1. He abolished Pilgrimage tax and Jizya tax.
2. Watan Jagirs, which were assigned to Zamindars in their homeland, were non-hereditary and transferable.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct. Akbar's policy towards Rajputs was combined with broad religious tolerance. He abolished the pilgrim tax in 1563 CE and later abolished jizya in 1564 CE. He also put a prohibition on the forcible conversion of prisoners of war.

Statement 2 is incorrect. Many Rajput mansabdars were assigned their own territories as **Watan Jagir**. **Watan Jagir was hereditary and non-transferable**, and they rose to important positions in Mughal services

https://www.hansrajcollege.ac.in/hCPanel/uploads/elearning/elearning_document/AKBARS_RAJPUT_POLICY_Combined.pdf (Pg-3), Poonam Dalal Pg 667

Q.5) With reference to E-bill Processing System, consider the following statements:

1. The system was developed by the National Payment Corporation of India (NPCI).
2. The system enables users to use digital signatures for submitting their bills.
3. The system aims to eliminate physical interface between suppliers and government officials.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The Union Minister for Finance & Corporate Affairs launched the **E-Bill system for Central Government Ministries on the 46th Civil Accounts Day**. E-Bill Processing System is a way of transacting the bills digitally rather than the traditional use of paper.

Statement 1 is incorrect: The e-Bill system was developed by the **Public Financial Management System (PFMS) Division** (not by the National Payment Corporation of India) in the office of the Controller General of Accounts in the Department of Expenditure, **Ministry of Finance**.

Statement 2 is correct: It is true that the **E bill Processing system enables users to use digital signature** for submitting their bills. Under this system, vendors/suppliers can upload their bills online along with supporting documents from their place at any time through digital signature. Further the system provides for the facility of **e-sign using Aadhaar** for those who do not have digital signature.

Statement 3 is correct: One of the objectives of this system is to **eliminate physical interface between suppliers and government officials**. The new system aims to make the entire process of submission and processing of bills **completely paperless and transparent**. Thus, it is considered a major step in realizing the vision of Digital India and promoting ease of doing business.

Q.6) “He was the officer in-charge of the royal household and royal karkhanas. Only nobles who enjoyed the complete confidence of the emperor were appointed to this office. The maintenance of etiquette at the court, and the control of the royal bodyguard were also under his supervision.”

Which one of the following offices from Mughal administration is described above?

- a) Sadr-us Sudur
- b) Wazir
- c) Mir Bakshi
- d) Mir Saman

Ans) d

Exp) Option d is the correct answer.

The Mughals retained many features of the administrative system of the Sultanate and Sher Shah Suri's administration. The administration was highly centralised and the territories of the empire were divided into Jagir, Khalisa (income went directly to the royal exchequer), and Inam (lands allowed to learned and religious men). Few important positions from the Mughal central government are discussed below:

Option a is incorrect: The judicial department was headed by the chief qazi. This post was sometimes combined with that of the Sadr-us Sudur (Chief Sadar) who was the head of the ecclesiastical department. His chief duty was to protect the laws of the Shariat and he was also responsible for all charitable and religious endowments.

Option b is incorrect: The position of the wazir was revived under the Mughals under whom various heads of departments functioned. He was the principal link between the ruler and the administration.

Option c is incorrect: The head of the military administration was Mir Bakshi who was also considered as head of the nobility. Recommendations for appointment to mansabs or for promotions were made to the emperor after duly endorsed by him only. The Mir Bakshi was also the head of the intelligence and information agencies of the empire. He kept a strict watch over proper maintenance of the sanctioned size of armed contingents and war equipage by the mansabdars.

Option d is correct: **Mir Saman** was the officer in-charge of the royal household and royal karkhanas. He was responsible for all kinds of purchases, manufacturing of different articles for the use, and their storage for the royal household. Only nobles who enjoyed the complete confidence of the emperor were appointed to this office. The maintenance of etiquette at the court, the control of the royal body guard, etc., were all under his supervision.

Q.7) With reference to medieval India, arrange the following events in a chronological order:

1. Battle of Chausa
2. Battle of Chanderi
3. Battle of Haldighati
4. Battle of Dharmat

Which one of the following options given below is correct?

- a) 2-1-3-4
- b) 2-1-4-3
- c) 1-2-3-4
- d) 1-2-4-3

Ans) a

Exp) Option a is the correct answer.

- 1) Rana Sanga of Mewar enjoyed the support of a large number of Rajput chiefs such as Raja Medini Rai of Chanderi. Rana Sanga fought Babur at **Battle of Chanderi c.1528 CE** to help Medini Rai who was attacked by Babur.
- 2) In the **Battle of Chausa (near Buxar, c.1539 CE)**, Humayun was defeated, and Sher Khan adopted the title of Sher Shah. Humayun barely escaped with his life from the battlefield, swimming across the river with the help of a water carrier.
- 3) In the famous **Battle of Haldighati (c.1576 CE)**, Rana Pratap was defeated by the Mughal army led by Man Singh. The political struggle behind the battle was that by the fifteenth century, nearly all Rajput kingdoms had surrendered under the Mughal ruler, except Mewar who was unwilling to compromise on its independence.

4) Mughal Emperor Shah Jahan's sudden illness in c.1657 CE plunged the empire into a civil war (c.1657–59 CE) among his four sons. Two of his sons Aurangzeb and Murad agreed to partition the empire and both defeated Raja Jaswant Singh (ruler of Jodhpur) and Qasim Khan at **the Battle of Dharmat (in c.1658 CE)**.

So, the correct sequence of the battles is 2-1-3-4.

Source: <https://www.indiaonline.in/about/profile/history/wars/battle-of-haldighati>
Poonal Dahiya Ancient and Medieval India.

Q.8) With reference to the administration under Shivaji, consider the following statements:

1. The state provided loans to the cultivators during times of famine.
2. Chauth was the tax levied specifically on agriculture, whereas Sardeshmukhi was a tax levied on the merchants in the kingdom.
3. Mirasdars were the officers responsible for tax collection at provincial level.

Which of the above given statements is/are correct?

- a) 1 and 2 only
- b) 1 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) b

Exp) option b is the correct answer.

The revenue administration of Shivaji was humane and beneficent to the cultivators. The land was carefully surveyed and assessed. The state demand was fixed at 30% of the gross produce to be payable in cash or kind. Later, the tax was raised to 40%. The amount of money to be paid was fixed.

Statement 1 is correct: The government provided loans to the cultivators during times of famine, which they were expected to repay after the crisis was over. The purpose was to provide relief to the farmers and prevent them from falling into debt and becoming unable to pay taxes in the future.

Statement 2 is incorrect: Shivaji collected two taxes, Chauth and Sardeshmukhi, from the adjoining territories of his empire, the Mughal provinces and the territories of the Sultan of Bijapur. **Chauth was one-fourth of the revenue of the district conquered by the Marthas (not specifically on agriculture)**. Sardeshmukhi was an additional 10% of the revenue which Shivaji collected by virtue of his position as Sardeshmukh. **(Not specifically on merchants in the kingdom)**

Statement 3 is incorrect: The inhabitants in the rural areas were principally cultivators and were either Mirasdars or Upris. **“The Mirasdar belonged to the village,” held his land in heredity and could not be dispossessed of it so long as he continued to pay the rent. He could sell and transfer his fields and had the right to sit in the village council (they are not primarily involved in the tax collection at provincial level).** The Upri was an outsider, a mere tenant-at-will and cultivated the land so long as his lease continued.

Q.9) Which of the following statements is/are correct about the Third Anglo-Maratha War?

1. The Battle of Bhima Koregaon was associated with this war.
2. After this war, British abolished the Peshwai and most of the Peshwa's dominions were annexed by the British.
3. The Treaty of Salbai was signed at the end of the Third Anglo-Maratha war.

Select the correct answer from the code given below:

- a) 1 and 2 only
- b) 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Lord Hastings' imperialistic design of imposing British paramountcy led to the Third Anglo-Maratha War. The Pindaris, who were attached to Maratha armies as mercenaries, started plundering neighboring territories when they could not get regular employment. Lord Hastings took action against the Pindaris, which was seen as a transgression of the sovereignty of the Marathas, and the Maratha confederacy was once again united.

Statement 1 is correct: The Battle of Bhima Koregaon was part of the Third Anglo Maratha War. The British East India Company successfully defended and the troops of Peshwa ended up withdrawing from the battle. In contemporary caste-based society, the Mahars, who played a very important role in this battle, were considered untouchable. The Battle of Bhima Koregaon attained a legendary status among the Scheduled Castes of India. The people of Scheduled Caste saw this battle as a victory of Dalits over the oppression of the people from higher caste. In Koregaon, the British East India company installed an obelisk or Victory Pillar to commemorate those who fought for them. Dalits believed that this was a victory of the Mahar community against the caste injustices perpetrated by the Peshwas.

Statement 2 is correct: The British abolished the Peshwai (office of the Peshwa) and annexed all the Peshwa's dominions. But the jagirs of the fief holders were restored.

Statement 3 is incorrect: The Treaty of Salbai, which ended the First Anglo-Maratha War (not third Anglo-Maratha war), was signed on 17 May 1782 between the British East India Company and the Marathas.

Some important treaties that were signed during the 3rd Anglo Maratha war:

1) June 1817, Treaty of Poona, with Peshwa.

2) November 1817, Treaty of Gwalior, with Sindhia.

3) January 1818, Treaty of Mandasor, with Holkar

The Treaty of Poona was signed on 1 June 1817 between the East India Company and the Peshwa (ruler) of Pune, Baji Rao II. The treaty resulted in the British gaining control of the territory north of the Narmada River and south of the Tungabhadra River.

Q.10) With reference to 'Bamiyan Buddhas' sometimes seen in news, consider the following statements:

1. These Buddha statues are located in the Swat valley of Pakistan.
2. These Buddhas were once considered the tallest standing Buddhas in the world.
3. These Buddhas belong to the Early Vedic Period, dated back to the 11th Century BCE.
4. Greek, Indian and Iranian influence were visible in these sculptures of Buddha.

Which of the statements given above are correct?

- a) 1 and 4 only
- b) 2 and 3 only
- c) 2 and 4 only
- d) 1, 2 and 4 only

Ans) c

Exp) Option c is the correct answer.

Recently the Taliban has said it would protect the ancient Buddha statues in Mes Aynak, also the site of a copper mine where the Taliban are hoping for Chinese investment. It is in sharp contrast to earlier policy of the Taliban when they destroyed centuries-old Buddha statues in Bamiyan using artillery, explosives, and rockets.

Statement 1 is incorrect: Bamiyan Buddhas is located in Bamiyan valley of Afghanistan, not Swat valley of Pakistan. The Bamiyan valley is located in the Hindu Kush mountains and along the river Bamiyan. However, the Swat valley too is a famous buddhist centre and here also Talibans targeted and destroyed Buddhist statues in large numbers in 2007.

Statement 2 is correct: It is true that Bamiyan Buddhas were **once the tallest Standing Buddha in the world**. However, it had been destroyed by the Talibans using artillery and other explosives.

Statement 3 is incorrect: Bamiyan Buddhas does **not date back to 1st Century CE, rather it dates back to 5th Century CE**. Thus, it belongs to the Gupta period.

Statement 4 is correct: It is true that Bamiyan Buddhas marked by the features of Roman draperies, were great examples of a **confluence of Gupta (India), Sassanian (An empire ruled Iran) and Hellenistic (Greek features) artistic styles**.

Source: <https://indianexpress.com/article/explained/everyday-explainers/explained-what-were-the-bamiyan-buddhas-and-why-did-the-taliban-destroy-them-7844925/>

Q.11) With reference to the history of medieval India, which of the following events occurred during the reign of Mughal emperor Jahangir?

1. Grant of permission to the East India Company for its first factory at Surat.
2. Battle of Samugarh.
3. Introduction of Pietra Durra technique in the Mughal constructions.

Select the correct answer using the codes given below:

- a) 1 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Jahangir/ Salim (c.1605–1627 CE) was Jodha Bai and Akbar's eldest son, was named Salim after blessings of Sheikh Salim Chisti. He revolted against Akbar in c.1599 CE. After Akbar's death, he was crowned at Agra in c.1605 CE, and assumed the title of Nur-ud-din Muhammad Jahangir. Some of the important events during his reign are as follows:

Statement 1 is correct: The English East India Company was established on 31 December 1600 as per the Royal Charter issued by the Queen of England, Elizabeth I. The Company had sent Captain Hawkins to the court of the Mughal Emperor, Jahangir in 1608 to secure permission to establish a “factory” (store house of goods) at Surat. It was turned down initially. **However, in 1613, Jahangir permitted the East India Company to establish its first factory at Surat.**

Statement 2 is incorrect: The **Battle of Samugarh** (c.1658 CE) was fought between Aurangzeb and Dara (Son of Shah Jahan) in which, due to divided counsel and underestimation of Aurangzeb by Dara, Dara Shikoh lost the battle. This practically decided the issue of succession.

Statement 3 is correct: Art and Architecture during Jahangir's reign made a significant development. **The practice of putting up buildings in marble and decorating the walls with floral designs made of semi-precious stones (known as Pietra Durra) started during his reign.**

Q.12) Consider the following statements with reference to the provincial kingdom of Awadh:

1. The Provincial kingdom of Awadh was established by Saadat Khan Burhan ul Mulk.
2. In the kingdom of Awadh, Faizabad and Lucknow emerged as centres of cultural excellence.
3. Wajid Ali Shah was the last nawab of Awadh to rule before the British annexation of Awadh.

Which of the above given statements is/are correct?

- a) 2 only
- b) 1 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: The emergence of the **provincial kingdom of Awadh** was under governor **Saadat Khan Burhan ul Mulk**. Saadat Khan not only disciplined the local zamindars but also maintained a well-paid, armed and well-trained army.

Statement 2 is correct: Under the Nawabs of Awadh, **Faizabad, and then Lucknow** emerged as **centres of cultural excellence** comparable to Delhi in the spheres of arts, literature, and crafts. Regional architecture too reflected itself in the form of Imambarahs and certain other buildings. In fact, the evolution of the dance-form Kathak was the outcome of this cultural synthesis.

Statement 3 is correct: **Wajid Ali Shah (1822-1887) was the last Nawab of Awadh. He ruled from 1847 until 1856 when the British East India Company annexed the kingdom under the Doctrine of Lapse.** Governor-General Lord Dalhousie accused Wajid Ali Shah of misrule and maladministration, using these allegations as a pretext for the annexation.

Q.13) Which among the following books were written by the Mughal Emperor Babur?

1. Tuzuk-i-Babri
2. Masnavi
3. Nushkha-i- Dilkhusa
4. Padshahnama

Select the correct answer using the codes given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1, 3 and 4 only
- d) 1, 2 and 4 only

Ans) a

Exp) Option a is the correct answer.

1st Mughal emperor of India- Babur was deeply learned in Persian and Arabic and is regarded as one of the two most famous writers of his mother tongue, Turkish.

Statement 1 is correct: Babur wrote his memoir in Turki called Tuzuk-i-Babri/Babarnama (translated into Persian by Abdur Rahim Khan-i-Khana).

Statement 2 is correct: Babur is also author of the famous text- Masnavi , a book on Muslim law rules.

Statement 3 is incorrect: Waqyat-i-Alamgiri, Khulasat- ul-Tawarikh, Muntakhah-ul-Lubab, Nushkha-i-Dilkhusa (by bhimsen Burhanpuri) etc were works that were composed during the reign of Aurangzeb.

Statement 4 is incorrect: During Shah Jahan's reign, works of history like Padshahnama (written by abdul Hamid Lahori) Turkish-i-Shahjahani and Shah Jahan Nama were composed.

Poonam Dahiya Ancient and Medieval India

Q.14) Consider the following pairs regarding Anglo-Mysore Wars and their results:

War	Resulted in
1. First Anglo-Mysore War	Treaty of Madras
2. Second Anglo-Mysore War	Treaty of Madurai
3. Third Anglo-Mysore War	Treaty of Seringapatam
4. Fourth Anglo-Mysore War	Treaty of Mangalore

Which of the above-given pairs are matched correctly?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 3 and 4 only

Ans) a

Exp) Option a is the correct answer.

The Anglo-Mysore Wars were a series of four wars fought between the British East India Company and the Kingdom of Mysore in the Indian subcontinent.

Pair 1 is correct: The First Anglo-Mysore War (1767-1769) ended in a stalemate, with both sides signing the Treaty of Madras in 1769. Mysore, under the rule of Hyder Ali, maintained its territorial integrity and gained recognition as a significant power in the region.

Pair 2 is incorrect: Second Anglo-Mysore War (1780-1784) also ended in a stalemate, with the Treaty of Mangalore being signed in 1784. While Hyder Ali passed away during the conflict, his son Tipu Sultan continued to lead Mysore and maintained its territorial integrity.

Pair 3 is correct: Third Anglo-Mysore War (1790-1792) resulted in a British victory, with the Treaty of Seringapatam signed in 1792. Mysore, under the rule of Tipu Sultan, was forced to cede large territories to the British and their allies, significantly reducing the kingdom's power and influence.

Pair 4 is incorrect: Fourth Anglo-Mysore War (1798-1799) resulted in a decisive British victory and death of Tipu Sultan. There was **no treaty after the end of the fourth Anglo-Mysore war**. Tipu Sultan was killed during the Siege of Seringapatam in 1799, and the Kingdom of Mysore was subsequently divided between the British East India Company and their allies. This marked the end of the Mysore Kingdom's resistance against British expansion in southern India.

Source: Ancient and Medieval India by Poonam Dahiya; Chapter-14

Q.15) In context of international relations, which of the following statements is/are correct regarding 'Finlandisation'?

1. It refers to USA's policy to include Finland in the North Atlantic Treaty Organization (NATO).
2. It recognises people's will to create any government that they wish.

Select the correct answer using the code given below:

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: Finlandisation refers to the **policy of strict neutrality between Moscow (USSR) and the West** that Finland followed during the decades of the **Cold War**. During Cold war, Finland did not join NATO and European military powers, and this policy enabled Finland to resist pressure from Moscow to become part of the Soviet bloc or the Warsaw Pact.

Statement 2 is correct: It is true that **Finlandisation recognises people's will to create any government that they wish**. Finland by deciding its own foreign policy of whom it should align with or not to align with formed the government that their people wish to create. For instance, Finland did not join the USA sponsored Marshall Plan and developed their country in a way they wanted.

Q.16) With respect to the history of medieval India, which of the following Mughal emperors was called as the 'Zinda Pir'?

- a) Akbar
- b) Shahjahan
- c) Aurangzeb
- d) Jahangir

Ans) c

Exp) Option c is the correct answer.

In his private life, Aurangzeb was industrious, disciplined, was very simple in food, dressing, and did not at all consume wine. Aurangzeb was highly devoted to his religion and conducted prayers five times a day, strictly observing the Ramzan fasting. In fact, he earned money for his personal expenses by copying the Quran and selling those copies. Due to all these qualities, he was called Darvesh/ Zinda pir (a living saint).

Source: Poonam Dahiya Ancient and Medieval India

Q.17) With regard to Military Administration of Marathas, which of the following statements are correct?

1. The cavalry was maintained both by state and nobles.
2. They recruited only Hindus to the army and not Muslims.
3. Payments of salaries to the soldiers was made in cash.
4. The Marathas did not maintain navy.

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 2 and 4 only
- c) 1 and 3 only
- d) 1, 3 and 4 only

Ans) c

Exp) Option c is the correct answer.

Marathas, particularly during the times of Shivaji, set up a very efficient military system of administration. They maintained a big standing army. It is said that the army of Shivaji at the time of his death consisted of one lakh infantry, 40,000 cavalry and 1,260 elephants. In addition to these, the artillery also formed a part of the army.

Statement 1 is correct: Both the infantry and the cavalry were well organised. The cavalry was divided into two classes, the Bargirs and the Shiiedars. **The Bargirs were supplied arms by the States while the Shiiedars were maintained by the nobles.**

Statement 2 is incorrect: Shivaji tried to rise above religious consideration and **recruited both Hindus and Muslims** to his army. He believed in pure merit and made no distinction between the soldiers on the basis of religion. In fact, under him there was perfect **religious toleration**.

Statement 3 is correct: For better administration, Shivaji abolished the land-grants or jagir for military officers and instituted a system of salary or cash payment for their services.

Statement 4 is incorrect: The marathas maintained a navy. Sivaji had **400 ships of different kinds** and the navy was divided into two parts. Each part was commanded by two different officers. He also organized a **merchant navy**.

Q.18) Who among the following were the contemporaries of the Mughal Emperor Akbar?

1. Abul Fazl
2. Raja Todar Mal
3. Faqir Azio-Din
4. Tansen

Select the correct answer from the code given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 2 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Jalaluddin Akbar (1556-1605) was considered the greatest of all the Mughal emperors. He not only expanded but also consolidated his empire, making it the largest, strongest and richest kingdom of his time. He was the third emperor of the Mughal Empire, after Babur and Humayun. Akbar is also known for the extraordinary officials that were associated with his court. **Nine in numbers, they are called Akbar's Navratna.**

Option 1: Abul Fazl : Abu'l-Fazl ibn Mubarak, also known as Abul Fazl, Abu'l Fadl and Abu'l-Fadl 'Allami, was the grand vizier of the Mughal emperor Akbar, from his appointment in 1579 until his death in 1602. He was the author of the Akbarnama, the official history of Akbar's reign in three volumes, and a Persian translation of the Bible.

Option 2: Raja Todar Mal: Raja Todar Mal was the Finance Minister of the Mughal empire during Emperor Akbar's reign. He was also the Vakil-us-Sultanat and Joint Wazir. He was one of the premier nobles in the Mughal Empire and was a Mansabdar of 4000. He was one of the Navaratnas in Akbar's court.

Option 3: Faqir Azio-Din: He was a mystic, purported to be one of the legendary Navaratnas of Emperor Akbar's court. He is described as a mystic who gave religious advice to the Emperor on a wide range of topics.

Option 4: Tansen: He was a close confidant of Raja Ramchandra Singh, and they used to make music together. **Tansen's reputation brought him to the attention of the Mughal Emperor Akbar, who sent messengers to Raja Ramchandra Singh,** requesting Tansen to join the musicians at the Mughal court. Tansen initially refused to go, sought to retire instead into solitude, but Raja Ramchandra Singh, encouraged him to gain wider audience, and sent him along with gifts to Akbar.

Q.19) Which of the following are the objectives which mainly shaped the foreign policy of the Mughal empire?

1. To protect their empire from foreign invasions
2. To increase international trade and commerce
3. To reclaim their ancestral homeland in Central Asia.
4. To check the power of Afghan tribes living in the mountains between Punjab and Kabul.

Select the correct answer from the code given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

The Mughals' foreign policy was influenced by their interactions with the three great powers of the time: the Uzbek empire of Central Asia, the Safavid empire of Persia (Iran), and the Ottoman empire of Turkey.

Option 1 is correct. Safeguarding India from the invasions of foreign powers was the primary motive of the Mughal rulers. Foreign invasions weakened the strength of the Mughals and expedited their decline. More wealth had been lost as a result of the invasions of Nadir Shah and Ahmad Shah Abdali.

Option 2 is correct. One of the important objectives of the Mughals was to establish and improve trade relations with other countries. By establishing coastal ports on the Indian subcontinent in an effort to compete for trade in the Indian Ocean, the Mughal Empire began trading with countries in Europe, particularly Portugal, England, and the Netherlands. Muslim traders brought Chinese porcelain, paper, and gunpowder to Mughal India. Items of export were textiles, rice, tobacco and metals.

Option 3 is correct. One of the many objectives of the Mughals was **to reclaim the lost ancestral territory of Central Asia** as Fargana was the homeland of Babur. When he lost Fargana and Samarqand as a result of his defeat against the Uzbeks, he moved towards Kabul and annexed Kandhar and Kabul.

Option 4 is correct: Afghan tribes in the Northwest of the empire was a major threat to the Mughal empire. **To check the power of the Afghan tribes, that lived in the mountain region between Punjab and Kabul was an important objective of the Mughal foreign policy.**

Q.20) With reference to INS Visakhapatnam consider the following statements:

1. The ship is propelled by a Nuclear-powered engine.
2. This is India's first stealth guided missile destroyers under Project 15B.
3. The ship can effectively deal with threats above as well as below water.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Under the P-15B (Visakhapatnam Class), a total of four warships were planned (Visakhapatnam, Mormugao, Imphal, Surat) to be inducted. Recently INS Vishakaptnam was formally affiliated to the Visakhapatnam port.

Statement 1 is incorrect: The INS Visakhapatnam is propelled by diesel and gas engines, not nuclear-powered engines. The ship has four powerful Gas Turbines, in a Combined Gas and Gas (COGAG) configuration including **two gas turbines** and **two diesel engines**, capable of achieving speeds in excess of 30 knots (56 km/h).

Statement 2 is correct: INS Visakhapatnam is India's first among four stealth guided missile destroyers under Project 15B. It has 75 percent indigenous content. The ship equipment such as **Medium Range Surface to Air Missile Systems (MRSAM)**, Brahmos supersonic Surface to Surface Missiles, Torpedo Tubes and Launcher and Gun Mount were indigenously developed.

Statement 3 is correct: It is true that ships can deal with threats above as well as below water. The ship being equipped with Barak 8 long range **Surface to Air Missile** can aid in dealing threat above waters. On the other hand, weaponry such as anti-**submarine rockets**, Hull mounted Sonar Humsa NG, heavyweight **torpedo** tube launchers help in dealing with threats below water.

Q.21) Which of the following statements is/are correct about Sher Shah Suri?

1. He built Sarais for the convenience of the travellers.
2. He restored the Grand Trunk Road, from the river Indus in the west to Sonargaon in Bengal.
3. Malik Muhammad Jaisi completed his work Padmavat during the reign of Sher Shah Suri.

Select the correct answer using the code given below:

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Sher Shah Suri was also known as Farid Khan. He was the founder of the Sur Empire in India, which had its capital in modern-day Bihar.

Statement 1 is correct. For the convenience of travellers, Sher Shah built a sarai at a distance of every two kos (about eight km) on roads. The sarai was a fortified lodging where travellers could pass the night and also keep their goods in safe custody. Separate lodgings for Hindus and Muslims were provided in these sarais. Brahmans were appointed for providing bed and food to the Hindu travellers, and grain for their horses.

Statement 2 is correct. Sher Shah paid great attention to the fostering of trade and commerce and the improvement of communications in his kingdom. **Sher Shah restored the old imperial road called the Grand Trunk Road, from the river Indus in the west to Sonargaon in Bengal.** He also built a road from Agra to Jodhpur and Chittor, evidently linking up with the road to the Gujarat seaports. He built a third road from Lahore to Multan. Multan was at that time the staging point for caravans going to West and Central Asia.

Statement 3 is correct. Sher Shah also patronized the learned men. Some of the finest works in Hindi, such as the **Padmavat of Malik Muhammad Jaisi, were completed during his reign.**

Source: <https://www.historydiscussion.net/history-of-india/achievements-of-sher-shah-during-medieval-india-2/2780>

Q.22) Consider the following statements with reference to contributions/policies of Murshid Quli Khan in Bengal:

1. He converted large part of officers' jagir lands into Khalsa land in Bengal.
2. He began to collect the land revenue through Ijaradars.
3. He permitted some landholders to confiscate the lands of others to increase the size of the landholdings.

Which of the above statements is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Murshid Quli Khan became the Diwan of Bengal in 1700. He combined the office of Diwan and Nazim from 1716 till 1727 and established the rule of the Nawabs of Bengal. Murshid Quli Khan took several measures to streamline revenue administration in Bengal.

Statement 1 is correct. In 1722 he made a fresh revenue settlement that improved upon the settlements made earlier by Todar Mal and Shah Shuja. Murshid Quli Khan adopted a twofold plan for increasing the revenue, first, to turn all the **officers' jagirs in Bengal into Khalsa**, directly under the Crown collectors, and give the dispossessed officers **in exchange jagirs in the unsubdued province** of Orissa. Due to his strict policy the annual revenue collection increased. Thus, the **land assigned in jagir decreased and Khalisa land increased** thereby reducing the threat from the Imperial mansabdars whose power was crushed.

Statement 2 is correct. Secondly, he began to collect the land revenue through Ijaradars, by taking security bond from them. This was also known as **malzamini system**. The term malzamini, a derivation from the Persian mal, meaning property of any description which in the revenue practice of Bengal particularly signified rents from land, and zamin, meaning a surety or bondsman for the payment of rent or debt. Hence, he **changed Jagirdari system to the Mal Jasmani system**. In the second or third generation, those contractors came to be called zamindars and many of them were dignified with the title of Rajas and Maharajas. He thus created a new landed aristocracy in Bengal.

Statement 3 is correct. Bengal's agrarian relations were transformed due to Murshid Quli Khan's policy which **permitted some landholders to confiscate the lands of others** thereby increasing the size of the holdings. The extension of zamindaris was made possible **through military force, transfer and purchase**. All these methods were made legitimate by Murshid Quli Khan. It is clear that stress was laid on making the process of revenue collection **more organised and efficient** by introducing measurement for working out the jama and hasil. The Zamindars and ijaradars who did not delay payments and who had the support of the banking houses were given preference and were allowed to acquire large zamindaris. These measures improvised the revenue administration.

Q.23) With reference to the life of Dara Shikoh, consider the following statements:

1. The book Safinat-ul-Awliya was written by him.
2. Mulla Shah Badakhshi, a sufi saint, acted as his mentor.
3. He translated Bhagavad Gita from the Sanskrit language into the Persian language.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Dara Shikoh (also spelt as Dara Shukoh) was the son of Mughal emperor Shah Jahan and brother of Mughal emperor Aurangzeb.

Statement 1 is correct. Dara wrote his first book, **Safinat-ul-Awliya, at the age of twenty-five**. It is a brief account of the lives of the Prophet and his family, the Caliphs, and saints from the five main Sufi orders that were then popular in India.

Statement 2 is correct. Mulla Shah Badakhshi (1550–1635) was a Sufi of the Qadiri order. He was the spiritual successor of the Sufi saint Mian Mir of Lahore and acted as mentor to the Mughal Prince Dara Shikoh and his sister Jahanara Begum.

Statement 3 is correct. In 1657, Dara Shikoh translated 52 Upanishads and The Bhagavad Gita from Sanskrit into Persian, which is one of his most well-known achievements. Dara respected the scholarly individuals of other religions and not only read their literature but also discussed with them as well. The "Mukalima-i-dara Shikuh wa Baba Lal" portrays a spiritual conversation between Dara Shikoh and Baba Lal, later recognized as Lal Dayal the Hindu mystic from Punjab.

%20Begum.

Q.24) Arrange the following events in chronological order of their occurrence:

1. Nadir Shah's invasion
2. Battle of Buxar
3. Third Battle of Panipat
4. Death of Tipu Sultan

Select the correct answer using the code given below:

- a) 3-4-1-2
- b) 2-4-3-1
- c) 1-3-2-4
- d) 4-3-2-1

Ans) c

Exp) Option c is the correct answer.

- 1) **Event 1: Nadir Shah's invasion (1739):** Nadir Shah, the Persian ruler, invaded India and sacked Delhi, causing massive destruction and looting the Peacock Throne and Koh-i-Noor diamond.
- 2) **Event 3: Third Battle of Panipat (1761):** This battle was fought between the Maratha Empire and the Afghan forces led by Ahmad Shah Durrani, resulting in a decisive victory for the Afghans.
- 3) **Event 2: Battle of Buxar (1764):** This battle was fought between the British East India Company and the combined forces of the Mughal emperor, the Nawab of Bengal, and the Nawab of Awadh, leading to a significant victory for the British.
- 4) **Event 4: Death of Tipu Sultan (1799):** Tipu Sultan, the ruler of the Kingdom of Mysore, was killed during the Fourth Anglo-Mysore War when the British forces, led by Richard Wellesley, stormed his capital, Seringapatam.

Q.25) Which of the following statements best reflects the meaning of 'Principle of Reasonable Accommodation'?

- a) accommodating Socially and Educationally Backward Classes (SEBC) into judiciary gradually.
- b) limiting fundamental rights of a citizen for ensuring National security of country.
- c) positive discrimination against someone to enable them to gain equal opportunities.
- d) striking down only those provisions of law which are against the constitutional provisions.

Ans) c

Exp) Option c is the correct answer.

The Karnataka Government prohibited students from wearing head scarves inside classrooms. In this context the **Karnataka High court rejected** an argument in support of permitting Muslim girls wearing headscarves, which was based on the **principle of 'reasonable accommodation'**.

Option c is correct: The Principle of Accommodation **upholds positive discrimination** (positive action) against someone to enable them to gain equal opportunity. For example, the State providing additional support to **persons with disabilities** to facilitate their full and effective participation in society. The Principle promotes equality, enables the grant of positive rights and prevents discrimination based on disability, health condition or personal belief.

Further the **Rights of People with Disabilities Act, 2016**, defines 'reasonable accommodation' as "necessary and appropriate modification and adjustments, without imposing a disproportionate or undue burden in a particular case, to ensure to **persons with disabilities the enjoyment or exercise of rights equally with other.**

Reasonable accommodation should be provided, unless some **undue hardship** is caused by such accommodation. The petitioner in the Hijab case, argued that students(girls) should be allowed to wear head scarves as these are not causing any undue hardship to anyone. However, the Karnataka High court rejected this petition.

Source: <https://www.thehindu.com/news/national/explained-did-the-karnataka-high-courts-hijab-verdict-overlook-reasonable-accommodation/article65240144.ece>

Q.26) Surdas, a prominent Bhakti saint, was a contemporary of which of the following Mughal rulers?

- Aurangzeb
- Bahadur Shah I
- Akbar
- Shahjahan

Ans) c

Exp) Option c is the correct answer.

Surdas was contemporary of Akbar, the renowned Mughal ruler. Surdas was a blind bard, who spent most of the time in singing about Lord Krishna. He spent most of his lifetime in Agra and Mathura. He was born in 1478 and died in 1583 in Braj. [Akbar was born in 1542 and died in 1605. At the age of just 14 years (i.e., in 1556), he ascended the throne and became the emperor of the Mughal Empire.]

Surdas was a Vaishnava devotee and was also a revered poet and singer. His compositions glorified and captured his devotion towards lord Krishna. Most of his poems were written in the Braj language, while some were also written in other dialects of medieval Hindi, like Awadhi. He is famous for his works like Sur Sagar, Sur Saravali and many others works mostly written in the local languages.

Shahjahan born in 1592 and died in 1666.

Aurangzeb born in the year of 1618 and dies in 1707.

Bahadur Shah-I born in 1643 and died in 1712.

Source: Tamil Nadu Board, Higher secondary, History.

Q.27) Consider the following statements about popular women from the Mughal dynasty:

- Nur Jahan minted coins with her own name on them.
- Jahanara Begum received the title of 'Sahibat-al-Zaman' after the death of her mother.
- Mumtaz Mahal wrote the autobiography of Khwaja Muinuddin Chishti titled 'Munis al Arwah'.

Which of the statements given above are correct?

- 1 and 2 only
- 2 and 3 only
- 1 and 3 only
- 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

In the era of female suppression and patriarchal society, historical records show that Mughal kings were deeply invested in promoting female literacy, with free education and freedom of education prevalent in the land. Some women opted for religious education, while others became teachers, poets and authors to cultivate arts and culture.

Statement 1 is correct: Nur Jahan, the twentieth wife of Mughal emperor Jehangir, was a woman of remarkable strength and courage. She wielded such great power that she often presided the court alongside Jehangir and took part in matters of the state. **Nur Jahan was the Mughal empress who had coins minted with her name on them.** An ace marksman, she was also seen hunting tigers with her husband. Known for her shrewd planning and physical strength, Nur Jahan was able to rescue Jehangir from the clutches of rebel leader Mubarak Khan in 1626.

Statement 2 is correct: Jahanara Begum (1614–1681) was the eldest daughter of the Shah Jahan, the Mughal emperor of India (r. 1628–1658). Like her brother Dara Shikoh, the heir to the throne, she was profoundly spiritual, and they were initiated together into the Qadiriya order of Sufism. **Jahanara was an influential political figure, who received the title Sahibat al-Zaman ('Mistress of the Age') after her mother Mumtaz Mahal's death in 1631.** She actively participated in Sufism by extending her patronage to Sufi rituals, texts, and architecture, and encouraged women to engage in religious thought. **Jahanara authored 'Munis al arwah' (Confidant of spirits) which is the biography of Shaikh Muinuddin Chisti.**

Statement 3 is incorrect: 'Munis al arwah' was written by Jahanara and not by Mumtāz Mahal.

Arjumand Banu Begum, popularly known as Mumtāz Mahal (April, 1593 – 17 June 1631). She was married to Prince Khurram, popularly known as Shah Jahan. She regularly accompanied Shahjahan on his military and diplomatic campaigns but had never shown popular inclination towards politics. Hence, didn't play much active role in the court politics unlike, Nur Jahan.

Q.28) With respect to the Battle of Biligram, consider the following statements:

1. The battle was fought between Humayun and Sher Khan.
2. After this Battle, Sher Khan adopted the title of 'Sher Shah'.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct. The battle of Kannauj/Biligram was bitterly contested and it was **fought between Humayun and Sher Khan (Sher Shah Suri)**. Both the younger brothers of Humayun, Askari and Hindal, fought with Humayun.

Statement 2 is incorrect. In the **Battle of Chausa (1539) Sher Khan defeated Humayun and adopted the title of 'Sher Shah'**. Later in the **Battle of Kannauj after defeating again Humayun, he proclaimed himself as 'Emperor of Hindustan'**.

Source: Poonam Dalal Ch- 13 Pg. 657

Q.29) Which of the following factors contributed for the rise of the Marathas in India?

1. Rugged terrain of the region ruled by the Marathas.
2. Specialization of Maratha forces in the Guerrilla warfare.
3. Social unity created by the Bhakti movement.
4. Rise of Bijapur and Golkonda empires in the deccan.

Select the correct answer using the codes given below.

- a) 1 and 2 only
- b) 3 and 4 only
- c) 1, 2 and 3 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

The Marathas played a major role in the decline of Mughal power. Under the dynamic leadership of Shivaji, they posed a strong challenge to Mughal power during the 1670s. There are several reasons which gave way to the rise of the Maratha empire in India.

Statement 1 is correct: The region which the Marathas ruled consisted of a narrow strip of land called Konkan. Its precipitous mountains, inaccessible valleys and impregnable hill-forts were most favourable for military defence. This rugged terrain, hence prevented easy entrance of the Mughals or enemy army into the state.

Statement 2 is correct: The Marathas claimed long tradition of military prowess and prided themselves on their loyalty, courage, discipline, cunningness, and endurance. Marathas often avoided direct battles with the Mughals, who were equipped with strong cavalry and deadly cannons. Rather, they **used Guerrilla warfare as their strength**. They possessed the ability to plan and execute the surprise lightning attacks at night.

Statement 3 is correct: The intellectual and ideological framework for their rise was provided by the bhakti movement which got "crystallised into "Maharashtra dharma". This helped in providing the Marathas a cultural identity as well. The spread of the Bhakti movement inculcated the spirit of oneness among the Marathas. Tukaram, Ramdas, and Eknath were the leading lights of the movement. The hymns of the Bhakti saints were sung in Marathi and they created a bond among people across the society. This allowed Maratha rulers to prepare a unified force against the Mughals.

Statement 4 is incorrect: It was not the rise but degeneration of Bijapur and Golkonda empire, which prompted the Marathas to unite and fight together. Taking opportunity of political void in the Deccan, Shivaji rallied the Marathas who lay scattered in many parts of the Deccan under his leadership and built a mighty kingdom, with Raigarh as capital.

Source: Tamil Nadu Board, Higher secondary, History, pg. 225-226.

Q.30) With reference to Oil bonds, consider the following statements:

1. These bonds are promissory notes issued by the Union Government to Oil Marketing Companies (OMCs).
2. The issuance price of these bonds will not be reflected in budget documents as expenditure incurred by the Government.
3. These bonds can be used by commercial banks as Statutory Liquid Ratio (SLR) holdings.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The Union Finance Minister has recently said that the government cannot bring down taxes and oil prices because it has to pay for oil bonds issued by the previous Government.

Statement 1 is correct: It is true that **Oil bonds are promissory notes issued by the Government to Oil Marketing Companies** i.e by Oil bonds, the government promises OMCs a sum of money on maturity of these bonds.

A promissory note is a debt instrument that contains a **written promise by one party** (note's issuer) to pay another party (note's receiver) a definite sum of money, either on-demand or at a specified future date.

Statement 2 is correct: It is true that the issuance **price of these bonds will not be reflected in budget documents**. As the government **did not subsidise** these companies, these payouts did not show up in budget documents, until the repayment of the principal or interest components took place.

Thus, by issuing such oil bonds, the government is able to protect the consumers (from rising oil prices) without either ruining the profitability of the OMCs or running a huge budget deficit itself.

Statement 3 is incorrect: Oil bonds are considered less liquid as these bonds **cannot be qualified to be held by banks as Statutory Liquid Ratio (SLR)**. SLR is an amount that banks are required to maintain with themselves in the form of **government securities/cash/gold**.

Source: <https://indianexpress.com/article/explained/the-economics-of-oil-bonds-russia-ukraine-war-7871329/>

Q.31) Consider the following statements regarding the Mughal office of Mutasaddi:

1. Mutasaddi was directly appointed by the emperor.
2. He collected taxes on merchandise and maintained a customs house.
3. He was responsible for checking and inspecting the horses and soldiers maintained by the Mansabdars.

Which of the statements given above is/are correct?

- a) 2 and 3 only
- b) 2 only
- c) 1 and 2 only
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

The Mughals retained many features of the administrative system of the Sultanate and Sher Shah Suri's administration. The administration was highly centralised and the territories of the empire were divided into Jagir, Khalisa (income went directly to the royal exchequer), and Inam (lands allowed to learned and religious men).

Statement 1 is correct: The port administration was independent of the provincial authority. The governor of the port was called **Mutasaddi who was directly appointed by the emperor**.

Statement 2 is correct: The Mutasaddi collected taxes on merchandise and maintained a customs house. He also supervised the mint house at the port.

Statement 3 is incorrect: The Bakshi in the province performed the same functions as were performed by Mir Bakshi at the centre. He was appointed by the imperial court at the recommendation of Mir Bakshi. He was responsible for checking and inspecting the horses and soldiers maintained by the mansabdars in the suba.

Source: Poonam Dahiya Ancient and Medieval India.

Q.32) With reference to Maratha Confederacy, an alliance formed in the 18th century, consider the following statements:

1. Baji Rao I played an important role in organizing the Maratha Confederacy.
2. It is comprised of Bhonsle, Holkars and Scindia.
3. It was dissolved after the Third Anglo-Maratha War.

Which of the above given statements is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Bajirao I (1720-40), considered greatest of all the Peshwas, had started a confederacy of prominent Maratha chiefs to manage the rapidly expanding Maratha power, and to some extent appease the kshatriya section of the Marathas (Peshwas were brahmins) led by the senapati Dabodi. Under the arrangement of the Maratha confederacy, each prominent family under a chief was assigned a sphere of influence which he was supposed to conquer and rule, but in the name of the then Maratha king, Shahu.

Statement 1 is correct: Baji Rao I, who was the prime minister of the Maratha Empire under the Peshwa dynasty, played a major role in organizing the Maratha Confederacy. He forged alliances with various regional powers, including the Bhonsle, Holkars, and Scindias, to create a united front against the Mughal Empire and other rival powers.

Statement 2 is correct: The Maratha Confederacy comprised various regional powers, including the Bhonsle, Holkars, and Scindias, who came together under a loose umbrella organization. These regional powers had their own armies and territories but would cooperate with each other on matters of mutual interest and concern.

Statement 3 is correct: The Maratha Confederacy was dissolved after the Third Anglo-Maratha War.

Q.33) Consider the following statements regarding the Jagirdari system under the Mughal Empire:

1. It was a modified form of the Iqta system of the Delhi Sultanate.
2. Under this system, nobles were assigned revenue of a particular territory for their services to the state.
3. Mashrut Jagirs were given in lieu of salaries and were transferable every three to four years.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The Mughals retained many features of the administrative system of the Sultanate and Sher Shah Suri's administration. The administration was highly centralised and the territories of the empire were divided into Jagir, Khalisa (income went directly to the royal exchequer), and Inam (lands allowed to learned and religious men). Few aspects of the jagirdari system under the Mughals are discussed below:

Statement 1 is correct: Iqta of the Sultanate period in a modified form became Jagir under the Mughals. Iqtas were the lands assigned to officials instead of payment for their services.

Statement 2 is correct: The Jagirdari system is the system of assignment of revenue of a particular territory to the nobles for their services to the state and was an integral part of the Mansabdari system.

Statement 3 is incorrect: There were various types of jagirs such as-

- 1) Tankha Jagirs: Which were given in lieu of salaries and they were transferable every three to four years.
- 2) Mashrut Jagirs: These were given on certain conditions. It meant an increase of sawar rank for a temporary period. This was an emergency measure adopted in the time of crisis, that is, the permission to recruit more horsemen at the expense of the state.

Source: Poonam Dahiya Ancient and Medieval India.

Q.34) Which of the following statements is/are correct about Maratha Administration under Peshwas?

1. Kotwal was responsible for the maintenance of law and order in the urban areas.
2. Maratha military system under the Peshwas was modelled on the lines of Mughal military system.
3. The Maratha provinces were directly administered by provincial governors known as Raj Pramukhs.

Select the correct answer from the code below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) a

Exp) Option a is the correct answer.

The Peshwa was initially one of the Ashta Pradhan of Shivaji and the office was not hereditary. However, as the king's power declined, the Peshwas gained prominence. Balaji Vishwanath's leadership made the Peshwa office supreme and hereditary. They gradually took over the administration and religious leadership of the state.

Statement 1 is correct: The Kotwal was the chief officer in towns and cities during the Maratha period, responsible for maintaining law and order, regulating prices, settling civil disputes, and sending monthly accounts to the government.

Statement 2 is correct: The Maratha military system under the Peshwas was modelled on the Mughal military system. The mode of recruitment, payment of salaries, provisions for the families of the soldiers, and the importance given to the cavalry showed a strong resemblance to the Mughal military system.

Statement 3 is incorrect: During the Maratha Empire under the Peshwas, the provinces varied in size and were governed by **provincial governors known as Sarsubahdars**. The provinces were further divided into Subahs and Pranths.

Source: Tamil Nadu History Text book 11th std ch 15

Q.35) With reference to 'Parboiled rice', consider the following statements:

1. It is prepared by partially cooking the rice at the paddy stage.
2. It is possible to process all rice varieties into parboiled rice.
3. This rice will have higher resistance against fungi compared to raw rice.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Telangana Chief Minister staged a dharna demanding a **uniform paddy procurement policy**. The protest came in response to the Union government's decision to stop the purchase of excess parboiled rice. It must be noted here that Telangana is the major producer of parboiled rice.

Statement 1 is correct: Parboiled rice is cooked partially and then dehydrated and dried out for sale to consumers i.e, rice that has been **partially boiled at the paddy stage, before milling**. The Ministry of Food Affairs or Food Corporation of India (FCI) does not define what constitutes parboiled rice. On the other hand, **raw rice is produced by drying and milling paddy without steaming**.

Statement 2 is correct: It is true that **all rice varieties can be possibly processed into parboiled rice**, however ideal to process **long slender varieties** to prevent breakage during milling. Further **aromatic varieties** should not be parboiled because this process can reduce its aroma.

Statement 3 is correct: Parboiling will **increase rice's resistance against fungi** and insects; thus, it is true that **parboiled rice will have higher resistance against fungi** compared to raw rice.

Source: <https://indianexpress.com/article/explained/what-is-parboiled-rice-and-why-centre-wants-to-stop-purchasing-it-7873759/>

Q.36) Which among the following were the sources of the revenue for the Maratha administration?

- 1. Sale of forest produce
- 2. Royalty fees for minting of coins
- 3. Fines as punishment for Adultery
- 4. Tax on widow re-marriage

Select the correct answer using the code given below:

- a) 3 and 4 only
- b) 1 and 2 only
- c) 2, 3, and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Option 1 is correct: Land revenue was the main source of income. The Peshwas gave up the system of sharing the produce of the agricultural land followed under Shivaji's rule. Customs, excise duties and sale of forest produce also yielded much income.

Option 2 is correct: Goldsmiths were allowed to **mint coins on payment of royalty to the government and getting license for the purpose**.

Option 3 is correct: **Fines** were collected from persons suspected or found guilty of **adultery**.

Option 4 is correct: Further, miscellaneous **taxes** were also collected. It included

- 1) Tax on land, held by Deshmukhs and Deshpandes.
- 2) Tax on land kept for the village Mahars.
- 3) Tax on the lands irrigated by wells.
- 4) House tax from all except Brahmins and village officials.

5) Annual fee for the testing of weights and measures.

6) Tax on the re-marriage of widows.

7) Tax on sheep and buffaloes.

8) Pasture fee.

9) Tax on melon cultivation in riverbeds.

10) Succession duty.

11) Duty on the sale of horses, etc.

When the Maratha government was in financial difficulty, it levied on all land-holders

Kurja-Patti or Tasti -Patti, a tax equal to one year's income of the tax-payer.

Q.37) Which among the following options can be considered as the correct reasons for Nadir Shah's invasion of India?

1. Invitation from Nizam-ul-Mulk and Saadat Khan.

2. Mughal ruler Mohammad Shah provided asylum to the Afghan rebels.

3. Mughal emperor detained the envoy of Nadir Shah.

Select the correct answer using the code given below:

a) 1 and 2 only

b) 2 and 3 only

c) 1 and 3 only

d) 1, 2 and 3

Ans) d

Exp) option d is the correct answer.

Nadir Shah was the Emperor of Iran who rose from being the son of poor shepherd to a national hero by driving the Afghans out of Iran. There were several causes for Nadir Shah's invasion of India in 1739. Some of the key factors include:

1) **Mohammad Shah Rangeela suddenly withdrew his ambassador from the Persian court** and snapped all diplomatic ties with that country after Nadir Shah came to power in c.1736 CE.

2) **Nizam-ul-Mulk and Saadat Khan sent special messages to Nadir Shah inviting him to invade India. Hence, option 1 is correct.**

3) **Also, Rangeela gave shelter to some Afghan nobles who had escaped from Nadir Shah** when he had invaded Afghanistan. **Hence, option 2 is correct.**

4) **Nadir Shah sent three envoys to the Mughal court and his third envoy was detained by Rangeela,** which probably infuriated him. **Hence, option 3 is correct.**

Source: Ancient and Medieval India by Poonam Dahiya; Chapter-13

Q.38) Consider the following statements with reference to the Mughal ruler Muhammad Shah's reign in India:

1. He was the longest-serving ruler of the Mughal dynasty.

2. The autonomous states of Deccan and Awadh emerged under his reign.

Which of the above given statements is/are correct?

a) 1 only

b) 2 only

c) Both 1 and 2

d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: The longest-serving Mughal ruler was not **Mohammad Shah** as he ruled for 29 years. Instead, Emperor Akbar, who reigned from 1556 to 1605, ruled for 49 years. Similarly, Aurangzeb reign was of nearly 49 years, who ruled from 1658 to 1707. Mohammad Shah ruled from 1719 to 1748.

Statement 2 is correct: Several autonomous states emerged under **Mohammad Shah's** reign:

- 1) Nizam-ul-Mulk – Deccan
- 2) Saadat Khan – Awadh
- 3) Murshid Quli Khan – Bengal, Bihar, and Orissa

Later, the weakness of the empire was exposed when Nadir Shah not only invaded India but also imprisoned the Mughal Emperor and looted Delhi in c.1739 CE.

Source: Ancient and Medieval India by Poonam Dahiya; Chapter-13

Q.39) Consider the following statements about Malik Ambar, a popular name in the history of Medieval India:

1. He was one of the important ministers in the court of Mughal emperor Aurangzeb.
2. He developed, for the first time, a new system of land revenue called Zabti system.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

Malik Ambar (1546-13 May 1626) was a Siddi military leader, who served as the Peshwa (Prime Minister) of the Ahmednagar Sultanate in the Deccan region of India. **He was born in the mid-sixteenth century at Harar in Ethiopia and was known simply as "Chapu". He was sold by his poor parents to an Arab slave merchant.**

Statement 1 is incorrect: Malik Ambar never worked at the Mughal court. Rather, he identified threat posed by the Mughals to the Deccan and he acted as a major bone of contention in Mughal dream of expanding their rule in the south. **By virtue of his hard work and sheer brilliance he rose to the rank of military commander and later became regent of the Ahmednagar dynasty.**

Statement 2 is incorrect: Malik Ambar tried to improve the administration of the Nizam Shahi state by introducing Todar Mal's system of land revenue. He abolished the old system of giving land on contract (ijara) which was ruinous for the peasants and adopted the zabti system. The **Dahsala or Zabti System** was implemented during Akbar's reign in 1580-82 to address issues that arose as a result of fixing prices each year and revenue settlement for the previous year. **This system was primarily developed by Raja Todarmal, who was the finance minister during the Mughal Empire in India at the time.**

Q.40) Which of the following statements are correct in respect of "Hattis communities" of Himachal Pradesh?

1. Hattis are one of the Particularly Vulnerable Tribal Groups (PVTGs) of India.
2. People of this community do not follow the caste system.

3. Khumbli is a traditional council administering the local affairs of Hattis communities.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 only
- c) 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Hattis community was in news on account of Himachal Pradesh Government's assurance of Centre's decision to consider its request for inclusion of the Hatti community in the list of Scheduled Tribes in the state. This announcement came just before the State was about to witness a new Assembly election.

Statement 1 is incorrect: Hattis communities do not belong to Particularly Vulnerable Tribal Groups (PVTGs) of India. At present India has 75 PVTGs spread across 18 States and UT of Andaman & Nicobar Islands. It must be noted here that **Himachal Pradesh has no PVTGs** within its territory.

Statement 2 is incorrect: Hattis communities follow a rigid caste system, the Bhat and Khash are the upper castes, while the Badhuis are below them. Inter-caste marriages have traditionally been prohibited in Hattis communities.

Statement 3 is correct: It is true that Khumbli is a traditional council governing the local affairs of Hattis communities. Khumbli, is similar to the khaps of Haryana, which decide community matters. It is unfortunate that the Khumbli's power has remained unchallenged despite the establishment of the panchayati raj system.

Knowledge Base: **Parliament** has recently passed The Constitution (Scheduled Tribes) Order (Third Amendment) Bill, 2022 **to grant ST status to Hatti community** in Himachal Pradesh.

As per the **2011 Census**, there are over 700 recognised Scheduled Tribes in India. However, states/UTs like **Punjab, Chandigarh, Haryana, NCT of Delhi, and Puducherry have no listed STs at present.**

Source: <https://indianexpress.com/article/explained/explained-hattis-himachal-pradesh-st-status-7891780/>

Q.41) Consider the following statements with reference to the Third Battle of Panipat:

1. Ahmad Shah Abdali defeated the Mughals in the Third Battle of Panipat.
2. The result of battle paved the way for the rise of the British power in India.
3. Ahmad Shah Abdali was supported by Shuja-ud- Daula in this battle.

Which of the above given statements is/are correct?

- a) 1 and 2 only
- b) 3 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) d

Exp) Option d is the correct answer.

Statement 1 is incorrect: Third Battle of Panipat fought between the **Maratha Confederacy and the Durrani Empire (under Ahmad shah Abdali)** on January 14, 1761, resulted in a catastrophic defeat for the Marathas.

Statement 2 is correct: The **third battle of Panipat, 1761** is one of the decisive battles in the history of India. The defeat in the battle dealt a severe blow to the Marathas and the Mughal Empire and thereby **paved the way for the rise of the British power in India**. Abdali returned to his capital after the war and did not stay in India. He ordered the chiefs in India, which included Robert Clive of the East India Company to recognise the Mughal Shah Alam II as the Emperor.

Statement 3 is correct: **Shuja-ud-Daula was a prominent regional ruler of Awadh and had allied with the Durrani Empire (Afghans) against the Marathas**. He provided troops, artillery, and supplies to the Durrani army in the Third Battle of Panipat.

Source: Ancient and Medieval India by Poonam Dahiya; Chapter-14

Q.42) Which among the following was the main reason behind the construction of Buland Darwaza at Fatehpur Sikri?

- To commemorate Akbar's victory of Gujarat.
- To commemorate the victory of Malik Amber against the Mughals.
- To generate employment during the famine of 1784.
- To have a grand entry point to enter in the imperial city of 'Shahjahanabad'.

Ans) a

Exp) Option a is the correct answer.

Option a is correct: In c.1572 CE, Akbar advanced on Ahmedabad via Ajmer and defeated the Gujarat ruler Muzaffar Shah without any serious resistance. **It was in order to commemorate the victory of Gujarat that Akbar built the Buland Darwaza at Fatehpur Sikri.**

Option b is incorrect: **Bhadkal Gate** in Aurangabad, Maharashtra was constructed in 1612 by Murtaza Nizamshah's vajir Malik Ambar of Ahamadnagar. It was **built to commemorate the victory against the Mughals, so it is also famous as the 'Victory Gate'**. It is also a State Protected Monuments of Maharashtra.

Option c is incorrect: Identical in design to an ancient gate in Constantinople in Turkey, Rumi Darwaza was built in the 1780s by Nawaz Asaf-ud-Daula, an Awadhi nawab. Also referred to as Turkish Gate, the ornate structure is marked by an eight-faceted umbrella-like structure in its uppermost part. Now a symbol of Lucknow, **Rumi Darwaza** was earlier used as an entrance gate to the Old City, and soars to a height of 60 ft. **It was built to generate employment during the famine of 1784.**

Option d is incorrect: **Kashmere Gate or Kashmiri Gate is one of the many gateways constructed under the aegis of Shahjahan to enter his imperial city of 'Shahjahanabad'** -the Seventh city of Delhi. It is located towards the North of Red Fort (Lal Quila) in the locality today known as Kashmere gate after this historic gateway. It is the Northern gate to the historic walled city of Delhi. The gate is so named because it was at the start of a road that led to Kashmir.

Poonam Dahiya Ancient and Medieval India

Q.43) Consider the following statements with reference to the Martanda Varma, the ruler of Travancore in 18th century:

- He supported and increased the power of the Nayar aristocracy.
- He extended trade patronage to the Syrian Christians to limit European influence.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Martanda Varma, ruled Travancore (southern Kerala state of Venad) from c.1729 to 1758 CE, initiated many measures to strengthen his authority,

Statement 1 is incorrect: Martanda Varma, who ruled Travancore from 1729 to 1758, implemented reforms to reduce the power of the Nayar aristocracy. He established a strong centralized state by consolidating his power and reorganizing the administration and military, which eventually led to a diminished influence of the Nayar nobility.

Statement 2 is correct: Martanda Varma also sought to limit European influence in the region. One of the ways he did this was by extending trade patronage to the Syrian Christians, who were well-established traders in the region. This allowed Travancore to maintain a degree of independence from European powers, particularly the Dutch and the British, who were expanding their influence in India during the 18th century.

Source: Ancient and Medieval India by Poonam Dahiya; Chapter-14

Q.44) Consider the following statements regarding important events during the reign of Mughal Emperor Shah Jahan:

1. Siege of Hooghly against Portuguese was ordered by Shah Jahan
2. He expanded the Mughal empire in the north-eastern region till modern day Assam.
3. Illustrations of Persian versions of Mahabharata and Ramayana were produced in miniature form during Shah Jahan's reign.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 only
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

Statement 1 is the correct answer: In c.1632 CE, Shah Jahan ordered the Siege of Hooghly against Portuguese near Hooghly due to regular abuse of trading privilege by the Portuguese traders.

Statement 2 is incorrect: Aurangzeb could expand Mughal power in Assam in the north-east region. In c.1662 CE, Mir Jumla, Aurangzeb's ablest general and the governor of Bengal, led the expedition against the Ahoms.

Statement 3 is incorrect: Akbar commissioned the illustrations of several literary and religious texts. **Illustrations of Persian versions of Mahabharata and Ramayana were produced in miniature form.** Many other Indian fables became the miniature paintings in the art studio established by Akbar. Historical works such as the Akbar Nama also remained the main themes of Mughal paintings.

Source: Poonam Dahiya Ancient and Medieval India

Q.45) With reference to 'Agnipath scheme', consider the following statements:

1. The scheme is launched by the Ministry of Home Affairs.
2. The scheme applies to recruitment of both commissioned and non-commissioned posts in the Indian Army.
3. No soldiers recruited under this scheme will be eligible for benefits under the old pension scheme.

Which of the statements given above is/are **incorrect**?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The government has introduced **Agnipath scheme**, which is a short-term recruitment plan. Under the new policy, **males aged 18-21 years with 10+2 qualification**, will be enrolled on contractual basis for a period of **four years, including six months of training**.

Statement 1 is incorrect: Agnipath scheme is launched by the Ministry of Defence (not by Ministry of Home affairs). Earlier, the 'Tour of Duty' scheme (Agnipath scheme) was conceived in 2020 under the aegis of 'Department of Military Affairs' headed by then Chief of Defence Staff (CDS) **General Bipin Rawat**.

Statement 2 is incorrect: Currently, the scheme applies **only to recruitment of Non-commissioned posts in the Indian Army**. Commissioned officers are the army's highest ranked officers, and they are the group A or class-1 service officers.

Non-commissioned officers are officers working below the commissioned officers, their designation includes Sepoy, Naik, Havildar, Naib Subedar etc.

Statement 3 is incorrect: 75% of the soldiers recruited under this scheme will be released from service on completion of the four years and the **remaining (25%) will be re-enrolled for a period of 15 years** on fresh terms of service. These 25% of soldiers are **eligible for pension benefits under the old pension scheme** and other post-retirement benefits.

However, those **soldiers who were released from service upon completion of four years (called Agni Veers)** will be given a severance package called '**Seva Nidhi**', **an amount of Rs 10 lakh** – an individual contributing 30 percent of monthly emoluments and government supplementing with an equal amount. Hence it is evident these soldiers are **not eligible for pension benefits under the old pension scheme**.

Q.46) Which among the following foreign personalities/travelers visited India during the reign of Mughal Emperor Jahangir?

1. Sir Thomas Roe
2. William Hawkins
3. Nicolo Conti
4. François Bernier

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 3 and 4 only
- c) 1, 2 and 3 only
- d) 1 and 4 only

Ans) a

Exp) Option a is the correct answer.

The Mughal Emperor **Jahangir ruled India from 1605 to 1627**. During his reign, several foreign travellers visited India.

Option 1 is correct: An English diplomat, **Sir Thomas Roe was sent as an ambassador by King James I to the court of Jahangir in 1615**. He stayed in India for three years and documented his experiences in his journals, which provide valuable insights into the Mughal court and the political climate of the time.

Option 2 is correct: Captain **William Hawkins** visited Mughal Emperor Jahangir's court in **1608 CE, to negotiate certain concessions** for the English East India Company. He succeeded in securing permission to raise a settlement at Surat.

Option 3 is incorrect: **Niccolò de' Conti was an Italian merchant and explorer who visited India in the 15th century, well before the reign of Jahangir. Conti travelled across Asia between 1419 and 1444**, visiting countries like India, Persia, and Southeast Asia. His accounts of his travels provided valuable information on the cultures, customs, and geography of the regions he visited.

Option 4 is incorrect: **Francois Bernier was a French physician and traveller. Francois Bernier arrived in India in 1658**. He worked as a physician to Mughal prince Dara Shikoh, the eldest son of the Mughal emperor Shah Jahan. After Dara Shikoh's execution, he was attached to the court of the Mughal emperor Aurangzeb.

Source: Ancient and Medieval India by Poonam Dahiya; Chapter-13

Q.47) With respect to the Battle of Khanwa, consider the following statements:

1. In this battle, Afghan chief Mahmud Lodhi helped Rana Sanga.
2. Babur declared this battle as Jihad against the Hindus.
3. The Battle lasted for more than a year until it could come to any conclusion.
4. After this Battle, Babur assumed the title of Ghazi.

Which of the statements given above are correct?

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2 and 4 only

Ans) d

Exp) Option d is the correct answer.

The battle of Khanwa (near Agra) was fought in 1527 between Rana Sangha of Mewar and Babur.

Statement 1 is correct. In the battle, the Rajput forces of Rana Sanga, supplemented by the contingents of Hasan Khan Mewati and the **Afghan Mahmud Lodhi and Raja Medini Rai of Alwar**, fought against Babur.

Statement 2 is correct. In this Battle, Babur **declared the struggle with Rana Sanga as a Jihad (holy war) of the Muslims against the Hindus**. His speech infused a new vigour among his soldiers, and everyone swore off the holy Quran.

Statement 3 is incorrect. The battle, which lasted for **not more than 10 hours**, was bitterly contested and became an exceedingly brutal affair and Babur won this battle.

Statement 4 is correct. After winning the Battle of Khanwa, **Babur assumed the title of 'Ghazi'**. After winning the battle of Panipat (1526), he assumed the title of 'Emperor of Hindustan'.

Source: Poonam Dalal Ch 12 & 13 Pg- 623, 653 Tamil Nadu Board Ch-20, Pg-222,

Q.48) With reference to the Deccan policy of Mughals, consider the following:

1. Babur had no planned policy towards the Deccan.
2. Akbar wanted the rulers of the Deccan states to acknowledge his suzerainty.
3. The state of Ahmednagar was completely annexed to the Mughal empire during the rule of Shah Jahan.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Mughal Deccan policy started from Akbar's period as Babur and Humayun were only concerned with the consolidation of North India which was a logical step.

Statement 1 is correct. Babur was busy consolidating the Mughal rule in north India and hence could not pay any attention towards the south (deccan).

Statement 2 is correct. Akbar was the first among the Mughal emperors who planned to conquer the Deccan after completing his conquest in the North. His primary objective in conquering the Deccan was extension of the empire. Akbar was the first Mughal ruler who wanted to extend the Mughal suzerainty over the Deccan states.

Statement 3 is correct. The state of Ahmadnagar was completely annexed to the Mughal empire under Shah Jahan and Bijapur and Golkunda were forced to accept the suzerainty of the emperor.

Source: <https://www.historydiscussion.net/history-of-india/mughal-emperors/deccan-policy-of-the-mughal-emperors-indian-history/6622#:~:text=Aurangzeb's%20policy%20towards%20the%20Deccan,the%20Marathas%20in%20the%20Deccan.>

Medieval India by Satish Chandra Ch:14 The Deccan and South India

Q.49) Which of the following statements correctly describes the concept of Zawabit?

- a) It was a land revenue system during the reign of Sher Shah Suri.
- b) It was a new custom introduced by Balban involving kissing the Sultan's feet.
- c) It was a secular decree issued by Aurangzeb to supplement the existing legal system.
- d) It was a new religious policy promulgated by Akbar to promote religious harmony.

Ans) c

Exp) Option c is the correct answer.

Option a is incorrect: The land revenue administration was very well organized and revenue officers were called Amils while Qanungo were the officials in charge of maintaining revenue records. Sher Shah for the first time introduced a schedule of crop rates. He improved land revenue system by adopting **Zabti-i-harsal (land assessment every year)** and classified all cultivable lands into three heads (good, middle, bad).

Option b is incorrect: Balban introduced rigorous court discipline and new customs such as **Sijada** (prostration) and paibos (kissing the Sultan's feet) to prove his superiority over the nobles.

Option c is correct: It is believed that Aurangzeb issued secular decrees, called **Zawabit**. Zawabit supplemented the shara (Legal system in Islam), and were often modified in view of the conditions prevalent in India.

Option d is correct: In c.1582 CE, Akbar promulgated a new religion called **Din-i-Ilahi**/Tauhindi- Ilahi (Divine Monotheism), which believes in one God and in Sul-i- Kul/peace to all. It contained the good points of all religions and the basics were rational.

Q.50) With reference to 'SVANidhi se Samridhhi' program, consider the following statements:

1. The Quality Council of India (QCI) is the implementing partner of this program.
2. The program covers all the BPL (Below Poverty Line) families living in rural India.
3. The program envisages creating convergence among union ministries to enhance the welfare of targeted beneficiaries.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 3 only

Ans) b

Exp) Option b is the correct answer.

The Union Ministry of Housing and Urban Affairs (MoHUA) has launched '**SVANidhi se Samridhhi**' program in **additional 126 cities** across 14 States/ UTs in Phase 2 of the program. This programme was launched as an **additional program of PMSVANidhi**, in 2021 in 125 cities in Phase 1.

Statement 1 is correct: The Union Ministry of Housing and Urban Affairs (MoHUA) has launched 'SVANidhi se Samridhhi' program and Quality Council of India (QCI) is the implementing partner of this program.

Statement 2 is incorrect: SVANidhi se Samridhhi program does not cover rural areas. It aims to cover all Urban cities. The program aims to map the socio-economic profile of the PM SVANidhi beneficiaries and their families in Urban areas. PM SVANidhi aims to benefit over **50 lakh street vendors** who have been vending in urban areas.

Statement 3 is correct: The SVANidhi se Samridhhi program has two components, first one is to create a **central database of Street vendors and their families** on various socio-economic indicators.

Second is to create an inter-ministerial **convergence platform** between various **Union Ministries** to extend the safety net of welfare schemes to street vendor households, thus promoting welfare of street vendors.

Q.1) Consider the following statements regarding the Indo Islamic architecture in India:

1. Qutub Minar is a 14th century monument built entirely of red sandstone.
2. The Taj Mahal is a perfect symmetrical planned building entirely built using marble stone.
3. The tomb of Itimad-Ud-Daula in Agra is the first example of a tomb built on a riverbank in India.

How many statements given above are correct?

- a) Only one statement
- b) Only two statements
- c) All three statements
- d) None of the statements

Ans) a

Exp) Option a is the correct answer.

Islamic architecture is a term used for the building traditions in places in India. Though usually associated with religious buildings, Islamic architecture encompasses fortresses, palaces, tombs, public buildings such as schools, and smaller structures such as fountains, public baths, and domestic architecture. Few iconic examples of Islamic architecture are discussed below:

Statement 1 is incorrect: The Qutub Minar, built in the thirteenth century, is a 234-foot-high tapering tower divided into five storeys. The minar is a mix of polygonal and circular shapes. **It is largely built of red and buff sandstone with some use of marble in the upper storeys.** It is characterised by highly decorated balconies and bands of inscriptions intertwined with foliated designs.

Statement 2 is incorrect: The Taj Mahal is a perfect symmetrical planned building, with an emphasis of bilateral symmetry along a central axis on which the main features are placed. **The building material used is brick-in-lime mortar veneered with red sandstone and marble and inlay work of precious/semi-precious stones.** The mosque and the guest house in the Taj Mahal complex are built of red sandstone in contrast to the marble tomb in the centre. Both the buildings have a large platform over the terrace at their front. Both the mosque and the guest house are the identical structures.

Statement 3 is correct: The Tomb of Itimad-Ud-Daula was constructed by the Mughal queen Nur Jahan between 1622 and 1628 where her father Itimad Ud Daula (Mirza Ghiyas Beg) was buried. It was as a tribute to him, that Nur Jahan built the mausoleum after his death. **It is the first example of a tomb built on a riverbank in India.**

<http://adaagra.org.in/itimaduddaulah.aspx>

Q.2) The Shore temple, which is considered to be a part of popular Sapt Pagoda of Mahabalipuram, was built during the reign of?

- a) Narsimha Varman I
- b) Mahendra Varman I
- c) Mahendra Varman II
- d) Narsimha Varman II

Ans) d

Exp) Option d is the correct answer.

According to Marco Polo's travels, there were Seven Pagodas (Sapt Pagoda) in Mamallapuram, and the Shore Temple is believed to be one of them. The temple is said to be the final one in a sequence of seven temples constructed along this coastal region. In 2004, the occurrence of the tsunami exposed an ancient

temple that had collapsed and was built with granite blocks. It is speculated that the other six temples still exist underwater.

Shore temple, which is considered to be one of the most ancient and important in South India, is believed to have been constructed during the **reign of Rajasimha/Narasimhavarman II, a former king of the Pallava dynasty.**

Source : <https://www.tamilnadutourism.tn.gov.in/destinations/mamallapuram-shore-temple>

Q.3) Consider the following statements regarding Udayagiri and Khandagiri caves of Odisha:

1. They were built during the period of Meghavahana dynasty.
2. The caves were built on the Kumari Mountain range for the Jain monks.
3. Hathigumpha cave of Udayagiri bears the inscriptions of conquests of the King Kharavela.
4. The Yaksha and Yakshini of each Jain Tirthankar are carved on the walls of Ambika Gumpha of Khandagiri caves.

Which of the statements given above are correct?

- a) 2 and 4 only
- b) 1 and 3 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Udayagiri and Khandagiri caves are ancient rock cut caves that were first discovered by a young British Officer Andrew Sterling in the 19th century AD. Some important aspects of these caves are discussed below:

Statement 1 is correct: Udayagiri and Khandagiri caves were built somewhere around the 2nd century BC by King Kharavela of the Meghavahana dynasty. He was widely regarded as the most powerful king in the annals of history of Odisha.

Statement 2 is correct: The caves were built on the Kumari mountain range for the Jain monks. Out of the one hundred and seventeen caves that were built originally only thirty-three survive till this day. Eighteen caves are located in the Udaygiri hill and fifteen in the Khandagiri hill.

Statement 3 is correct: The major caves of the Udayagiri caves are

- 1) **Hathigumpha : or the elephant cave as its known bears the inscriptions of King Kharavela. The seventeen lines mention his many conquests and his way of governance.**
- 2) The Rani Gumpha : or the Queen cave ; is a double storeyed structure with beautiful carvings. Exquisite carvings apart, the cave is known for its acoustic characteristics.
- 3) The Ganesha Gumpha : the Ganesha Cave known for its carvings of Jain teerthankar's and other sculptures. The carving of Lord Ganesha and two elephants were added much later.
- 4) The Vyaghara Gumpha : or the Tiger cave is so called because the entrance is shaped like the head of the tiger and the door shaped like a tiger's throat

Statement 4 is correct: The major caves of Khandagiri are

- 1) Barabhuji Gumpha features the twelve armed Sasana Devi's facing each other along with Tirthankar sculptures.
- 2) Trushula Gumpha - One can find the twenty-four Jain Teerthankar's carved on the walls of the cave. The sculpture of Tirthankar Rishab Dev stands out.
- 3) **Ambika Gumpha - The Yaksha and Yakshini's of each Tirthankar is carved on the walls of the cave.**

Source: <https://odishatourism.gov.in/content/tourism/en/discover/attractions/temples-monuments/udaygiri-and-amp-khandagiri-caves-temple.html>

Q.4) This pottery was wheel-made with finely levigated clay, resulting in a hard and durable product, giving it a metallic look with a mirror-like shine achieved through burnishing after firing. It was rare and highly valued, used mainly by the elite or royal class from the 6th century BC to the 2nd century AD.

Which of the following options best suits the above description?

- a) Black and red ware
- b) Painted grey ware
- c) Northern Black polished ware
- d) Red Glazed ware

Ans) c

Exp) Option c is the correct answer.

The description provided in the question refers to the Northern Black Polished Ware (NBPW), which was created using a potter's wheel and mainly produced from the 6th century BC to the 2nd century AD. The NBPW was considered a rare and luxurious pottery, which was crafted with finely navigated clay. Due to its scarcity, it was mainly used by the elite or royal class in ancient times.

Northern Black Polished Ware (NBPW) is a type of ceramic pottery that was discovered in the northern part of India. It is characterized by its black color and polished or glazed (shiny) appearance. While the finds of NBPW are not limited only to the northern part of India, it has been found in many other places throughout India. The quality of NBPW is consistent wherever it is found, irrespective of shades and color. Source: NCERT CLASS 6 - OUR PAST, PART 1 – page 86

<https://timesofindia.indiatimes.com/city/raipur/rare-northern-black-polished-ware-of-2nd-century-bc-found-in-chhattisgarh-mud-fort/articleshow/47855476.cms>

https://asc.iitgn.ac.in/assets/publications/research_papers/NBPW_encyclopaedia_2021.pdf

Q.5) Consider the following statements with reference to “Virtual Private Network”:

1. It can establish a protected network connection when using public networks.
2. Recently CERT-In asked VPN service providers to maintain data such as the purpose for which the customers used their services.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

A VPN hides your IP address by letting the network redirect it through a specially configured remote server run by a VPN host. This means that if you surf online with a VPN, the VPN server becomes the source of your data. This means your Internet Service Provider (ISP) and other third parties cannot see which websites you visit or what data you send and receive online.

Statement 1 is correct: VPN stands for "Virtual Private Network" and describes the opportunity to **establish a protected network connection when using public networks**. VPNs encrypt your internet traffic and disguise your online identity. This makes it more difficult for third parties to track your activities online and steal data. The encryption takes place in real time.

Statement 2 is correct: CERT-In has asked VPN service providers to **maintain for five years or longer details** such as the validated names of their customers, the period for which they hired the service, the IP addresses allotted to these users, the email addresses, the IP addresses and the time stamps used at the time of registration of the customers. Cert-In also wants VPN service providers to **maintain data such as**

the purpose for which the customers used their services, their validated addresses and contact numbers, and the ownership pattern of the customers.

Source: <https://www.kaspersky.com/resource-center/definitions/what-is-a-vpn>

<https://indianexpress.com/article/explained/explained-why-vpn-providers-believe-new-rules-will-undermine-users-privacy-7905586/>

<https://timesofindia.indiatimes.com/gadgets-news/explainer-new-vpn-rules-why-vpn-companies-are-upset-and-what-they-mean-for-you/articleshow/92270798.cms>

Q.6) Consider the following pairs regarding various Martial Art forms in India:

Martial Art	Description
1. Sarit Sarak	Hand to hand combat
2. Thoda	Sword and Shield fighting
3. Pari Khanda	Archery
4. Kattu Varisai	Empty hand combat

How many pairs given above are correctly matched?

- Only one pair
- Only two pairs
- Only three pairs
- All four pairs

Ans) b

Exp) Option b is the correct answer.

Pair 1 is correctly matched: Sarit Sarak is a non-violent, **hand-to-hand combat style**. Their history may be traced back to the 17th century when the Manipuri monarchs successfully employed it to combat the British.

Pair 2 is incorrectly matched: Thoda is a martial art, sport, and cult that originated in Himachal Pradesh and is celebrated during the Baisakhi festival in April every year. The martial art primarily relies on **the skill of archery**, and it is believed to date back to the times of Mahabharata when bows and arrows were used in the epic battle in the valleys of Kullu and Manali.

Pair 3 is incorrectly matched: Pari-khanda is a martial art from Bihar that **involves sword and shield fighting**. Created by Rajputs, it is still practiced in many parts of Bihar and its techniques are also used in the Chhau dance. The name of this martial art comes from two words, Parte which means shield and Khanda which refers to sword, indicating the use of both sword and shield in this art.

Pair 4 is correctly matched: Kuttu Varisai, which means '**empty hand combat**,' was first described in Sangam literature (1st or 2nd century BC). Kuttu Varisai is mostly done in Tamil Nadu, while it is also popular in Sri Lanka's north-eastern region and Malaysia.

Q.7) The sculpture of Varaha or Boar avatar of Vishnu, rescuing the Goddess Earth, can be found in which of the following caves?

- Ajanta caves, Maharashtra
- Bagh caves, Madhya Pradesh
- Udayagiri caves, Madhya Pradesh
- Elephanta caves, Maharashtra

Ans) c

Exp) Option c is the correct answer.

Varaha means boar in Sanskrit and is the third incarnation of Lord Vishnu which is known for saving the earth from drowning in the cosmic waters and slaying of the demon Hiranyakashyap. There are several caves depicting this creation myth.

The sculpture is in rock-cut cave 5 at Udayagiri (Vidisha, Madhya Pradesh) which dates to the early 5th Century. This large-scale sculpture depicts the myth of Vishnu as Varaha, the Boar, rescuing the goddess Bhudevi, the earth, from the waters. At the back there are rows of figures of sages and divinities and two male musicians. On the sides of the panels there are images of the river goddesses Ganga and Yamuna with figures of attendants. Some interpretations claim that the scene represents the unification of northern India by the Guptas. **The similar sculpture can also be seen at caves at Aihole, Karnataka.**

Themes in Indian History, Chapter 4, pg. 104

Q.8) Consider the following statements about minting of coins in Ancient India:

1. The Indo-Greek were the first rulers in India to issue coins which were attributed to the Kings.
2. Earliest gold coins in India were issued by the Indo-Greeks.
3. The Kushans issued large scale gold coins with greater purity of Gold compared to the Guptas.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The first to invade India were the Greeks, who are called the Indo-Greeks or Bactrian Greeks. In the beginning of the 2nd century BC, the Indo-Greeks occupied a large part of north-western India, much larger than that conquered by the Alexander.

Statement 1 is correct: The Indo-Bactrian rule is important in the History of India because of the large number of coins issued by the Greeks. **The Indo-Greek were the first rulers in India to issue coins which were attributed to the Kings.** This is not possible in case of the earlier punch-marked coins, which cannot be attributed to a particular dynasty certainly.

SFG 2023 | LEVEL 2 | Test #38 – Solutions | ForumIAS

Statement 2 is correct: Metal coins were introduced during the age of Buddha. **However, the Indo Greek rulers were the first to issue gold coins in India**, which increased in number quite considerably under the Kushans.

Statement 3 is correct: The early Kushana kings issued numerous gold coins with higher gold content than is found in the Gupta coins. Most of the Kushana coins can be found west of the Indus, however several Kushana inscriptions found in the Gangetic valley explain the expanse of their kingdom in India.

Source: R S Sharma, Ancient India, pg. 104-106

Q.9) “He was a 12th century Indian mathematician and astronomer, who wrote the first ever work with full and systematic use of the decimal number system. He was a head of an astronomical observatory at Ujjain, the leading mathematical centre of ancient India. He developed understanding of division by zero by stating the concept of infinity. He authored one of the most popular ancient Indian work, Siddhanta-shiromani.” Which of the following personalities is discussed in the above paragraph?

- a) Bhaskara II
- b) Aryabhata
- c) Brahmagupta
- d) Varahamihira

Ans) a

Exp) Option a is the correct answer.

Bhāskara II, also called Bhāskarācārya or Bhaskara the Learned, (1114-1185, Bidur), the leading mathematician of the 12th century, who wrote the first work with full and systematic use of the decimal number system.

Bhāskara II was the lineal successor of the noted Indian mathematician Brahmagupta, as **head of an astronomical observatory at Ujjain, the leading mathematical centre of ancient India.** Evidently, he was the first to gain some understanding of the meaning of division by zero, for he specifically stated that the value of $3/0$ is an infinite quantity.

Some of his notable works include Lilavati, Siddhanta-Shiromani, Bijaganita, Karanakutuhala, etc.

Option b is incorrect: Aryabhata, also called Aryabhata I, (born 476, possibly Ashmaka or Kusumapura, India) was an astronomer and the earliest Indian mathematician whose work and history are available to modern scholars. Aryabhata discovered an approximation of pi, $62832/20000 = 3.1416$. He also correctly believed that the planets and the Moon shine by reflected sunlight and that the motion of the stars is due to Earth's rotation.

Option c is incorrect: Brahmagupta (598-670) was the foremost Indian mathematician of his time. He made advances in astronomy and most importantly in number systems including algorithms for square roots and the solution of quadratic equations. He headed an astronomical observatory at Ujjain before Bhaskara II.

Option d is incorrect: Varahamihira (505-587) was an Indian astrologer whose main work was treatise on mathematical astronomy which summarised earlier astronomical treatises. He discovered a version of Pascal's triangle and worked on magic squares.

Source: <https://www.britannica.com/biography/Bhaskara-II>

<https://www.britannica.com/biography/Aryabhata-I>

Q.10) Consider the following statement with reference to “Gas Based Power Plants”:

1. Recently, the Ministry of Environment has approved a gas-powered plant to be set up at Andaman and Nicobar Island.
2. There is no emission of Carbon Dioxide in these power plants.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: In 2021 National Coastal Zone Management Authority (NCZMA) recommended amending the Island Coastal Zone Regulation (ICRZ) rules to allow gas-based power plants within the Island Coastal Regulation Zone area, only in islands with geographical areas greater than 100 sq. km. **Recently, the Environment Ministry has approved an exemption to the laws governing the regulation of coastal zones and has paved the way for gas-powered plants to be set up at Andaman and Nicobar Islands.** The plant will come up in South Andaman district's Ferrargunj tehsil. It is to be developed by the National Thermal Power Corporation (NTPC).

Statement 2 is incorrect: Despite the improved air quality, natural gas plants significantly contribute to climate change. **Natural gas power plants produce considerable carbon dioxide, although less than coal plants do.**

Knowledge Base: **Natural gas power plants are cheap and quick to build. They also have very high thermodynamic efficiencies compared to other power plants.** Burning natural gas produces fewer pollutants like NO_x, SO_x and particulate matter than coal and oil. On the other hand, natural gas plants have significantly higher emissions than nuclear power plants.

Source:

https://energyeducation.ca/encyclopedia/Natural_gas_power_plant
page 64 in Epic Magazine of may

<https://timesofindia.indiatimes.com/india/gas-based-power-plants-to-be-allowed-in-coastal-regulation-zone-in-andaman-nicobar-islands/articleshow/87870352.cms>

Q.11) Consider the following statements about temple architectures in India.

1. Open ambulatory passageway along with intricate carvings on pillars, doorways and ceilings are key features of Vesara style of temple architecture.
2. Stellate plan can be seen in the Hoysala temple architecture.

Which of the statements given above is/ are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) None of the above

Ans) c

Exp) Option c is the correct answer.

Indian temples have symbolised the very ethos of life-style of people through the millennia. The panorama of Indian temple architecture may be seen across at extremely wide chronological and geographical horizon. The ancient texts on Indian temple architecture broadly classify them into three orders. The terms Nagara, Dravida and Vesara indicate a tendency to highlight typological features of temples and their geographical distribution

Statement 1 is correct: Vesara style of architecture combines both Nagara and Dravidian elements resulting in a hybridized style. It was conceptualized in the mid-seventh century A.D. by the

later Chalukya rulers. According to several historians, the Vesara style is said to have developed in today's Karnataka.

Some of its features are:

- 1) Emphasis on vimana and mandapa
- 2) **Open ambulatory passageway**
- 3) **The pillars, doorways and the ceilings were decorated with intricate carvings.**

Nagara

Dravida

Vesara

Statement 2 is correct: The Hoysaleswara temple (Lord of the Hoysalas) at Halebid in Karnataka was built in dark schist stone by the Hoysala king in 1150. **Hoysala temples are sometimes called hybrid or vesara** as their unique style seems neither completely dravida nor nagara, but somewhere in between.

Unlike the crucified ground plan of the Panchayatan style, the shrines in this temple architecture are led out in the shape of an intricately designed star, which is known as the Stellate plan.

They are easily distinguishable from other medieval temples by their highly original star-like ground-plans and a profusion of decorative carvings.

Nitin Singhania, Chapter 1, Indian Architecture.

Q.12) Consider the following statements about Shiva Nataraja sculpture found in South India:

1. The bronze representation of Shiva's Ananda Tandava first appeared in the Pallava period.
2. The bronze figurine of Shiva Nataraja performing cosmic dance signifies the cyclical creation and destruction of the universe.
3. The Siva Nataraja figurine was believed to have been developed using the lost wax technique.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Bronze sculptures and statuettes of Buddhist, Hindu and Jain icons have been discovered from many regions of India dating from the second century until the sixteenth century. Most of these were used for ritual worship and are characterised by exquisite beauty and aesthetic appeal.

Statement 1 is correct: Archeometric, iconographic and literary evidence show that the bronze representations of Shiva's Ananda tandava first appeared in the Pallava period between 7th century CE and mid-9th century CE. The later Chola craftsmen began experimenting with the greater tensile strength

of metal and thus began to produce figures that were flared and dynamic as opposed to the Pallava sculptures that were close-set and linear.

Hence, the famous Siva Nataraja figurine is attributed to the Chola dynasty.

Statement 2 is correct: The famous bronze figurine of Siva Nataraja performing cosmic dance signifies the cyclical creation and destruction of the universe. He is usually depicted with four arms carrying a Danda i.e., staff, Gaja i.e., an elephant symbol, a flame which signifies destruction and its counterpart, the Damru (drum), which signifies creation. His front right hand is in the Abhaya mudra, asking his devotees not to fear in his presence. He is shown wearing a snake ornament and dancing on Muyalaka the dwarf who signifies ignorance and evil.

Statement 3 is correct: The Chola period is well known for its metal sculpture. It is known for the high standard of aesthetic and technical skill achieved by their craftsmen during this period. **Metal sculptures both in the South and North India were made using the lost-wax process, during this period. Hence, the famous Siva Nataraja is believed to have been sculpted using lost wax process.**

Source: <https://indianculture.gov.in/artefacts-museums/siva-nataraja#:~:text=Metal%20sculptures%20both%20in%20the,North%20India%20produced%20hollow%20ones.>

Q.13) With respect to the Circus in India, which of the following statements is **not** correct?

- The first Indian circus called 'The Great Indian Circus' was set up by Vishnupant Chatre.
- Animal Welfare Board of India banned the use of elephants for circus performances in 2013.
- All wild animals are banned from being used in circus performances in India.
- India is the first country to ban the use of wild animals in Circus.

Ans) d

Exp) Option d is the correct answer.

Option a is correct : **The Great Indian Circus (1880) was created by Vishnupant Chatre from Maharashtra was the first Indian circus.** It also performed in Sri Lanka, Singapore, the Philippines, Indonesia, Japan, and China. In 1888, Keeleri Kunhikannan, a martial arts and gymnastics teacher, considered as 'The Father of The Indian Circus' opened a one-of-a-kind 'Circus Training Hall' in the Thalassery suburb of Chirakkara, Kerala.

Option b is correct. In 2013, Animal Welfare Board of India (AWBI), a statutory body under the Ministry of Environment and Forests, banned the registration of elephants for performing in circuses because of the cruelties and abuse subjected to the animals.

Option c is correct: In 1998, bears, monkeys, tigers, panthers, and tigers were banned from being forced to perform entertainment acts in India, but elephants were exempt from this law until 2013, and **after 2013 all wild animals are banned from being used in circuses.**

Option d is incorrect. Prior to **India**, several other countries including **Romania, Iran, the Netherlands, and the United Kingdom**, as well as a number of U.S. cities like Los Angeles, New York City, and Portland, Maine have already **instated similar legislation that bans the use of wild animals in circuses**, showing us that the world as a whole has been making giant strides toward a more humane future.

Source:

<https://www.thebridgechronicle.com/lifestyle/art-culture/world-circus-day-inspiring-journey-circus-india-48762>

Q.14) Hastayurveda is a treatise on elephants which considers various facts about wild and pet elephants. It was written by-

- a) Sahadeva
- b) Salihotra
- c) Palkapya
- d) Kashyapa

Ans) c

Exp) Option c is the correct answer.

Option a is incorrect. Prince Sahadeva had the responsibility of cows in the Palace of King Virata and he was the veterinarian of cows. Prince Sahadeva is regarded as the expounder of "**Gavayurveda**".

Option b is incorrect. Acharya Salihotra of the Northwestern part of India was regarded as the expounder of '**Asvayurveda**'.

Option c is correct. Hastayurveda is a Samhita written by Palkapya. It has been decided by historians that he lived during the 11th century. The present book available as a complete Samhita has been edited by Pandit Sivedutta Sarma. According to Palkapya, elephants are an important tool for the army as well as the civil work of a king. In Hastayurveda, one complete chapter has been mentioned to determine the importance of elephants, they have mentioned Vajra in war and also for different types of work. Only one Elephant can win over six thousand Horses.

Option d is incorrect. Kashyapa was a physician during the 7th century who compiled his Ayurvedic knowledge in a compendium which dealt with the diseases of women and children.

Q.15) Which of the following statements best describes the term "Gravitational Lensing"?

- a) It is a boundary of black holes, where the velocity needed to escape exceeds the speed of light.
- b) It is a phenomenon which distorts and magnifies the light coming from objects behind a large celestial object.
- c) It is a place where matter is compressed down to an infinitely tiny point, and all conceptions of time and space completely break down.
- d) It is the process by which an object entering an extremely strong gravitational field is stretched vertically and compressed horizontally.

Ans) b

Exp) option b is the correct answer

Gravitational lensing occurs when a massive celestial body – such as a galaxy cluster – causes a sufficient curvature of spacetime for the path of light around it to be visibly bent, as if by a lens. The body causing the light to curve is accordingly called a gravitational lens.

Statement a is incorrect. A black hole’s “surface,” is called as **event horizon**. It defines the boundary where the velocity needed to escape the black hole exceeds the speed of light, which is the speed limit of the cosmos. Matter and radiation fall in, but they can’t get out.

Statement b is correct. The phenomenon of **Gravitational Lensing** occurs when a huge amount of matter, such as a massive galaxy or cluster of galaxies, creates a gravitational field that distorts and magnifies the light from objects behind it, but in the same line of sight.

Statement c is incorrect. **Singularity** is a place where matter is compressed down to an infinitely tiny point, and all conceptions of time and space completely break down

Statement d is incorrect. **Spaghettification** is the process by which an object entering an extremely strong gravitational field, such as one surrounding a black hole, is stretched vertically and compressed horizontally.

Q.16) “This embroidery is practiced by Lambani tribe. It has a combination of colorful threads, design patterns, mirror works, stitching patterns, appliqué and patch work. It is done on 13 different colors of base fabric among which dark blue or red are commonly used and it uses 14 types of stitches.”

From the above given paragraph, identify the name of embroidery.

- Himroo
- Patola
- Toda
- Banjara

Ans) d

Exp) Option d is the correct answer.

Recently in September 2022, UNESCO has released a list of 50 exclusive and iconic heritage textile crafts of India under the title “Handmade for the 21st Century: Safeguarding Traditional Indian Textile”.

Option a is incorrect. **Himroo** is a fabric made of cotton and silk which came into existence in Aurangabad during the 14th century when king Mohammad Tughlaq was ruling. At that time, Muslims don’t have a like to wear silks which leads to the evolution of **Himroo - a fabric with a cotton base and silk weaving**. The word Himroo is originated from Persian word Hum-ruh which means 'similar'. Himroo fabric is **made similar to Kum-khwab, which was woven with pure gold and silver threads**.

Option b is incorrect. Patola is a double ikat woven sari, **usually made from silk, made in Patan, Gujarat, India**. The word patola is the plural form; the singular is patolu. They are very expensive, once worn only by those belonging to royal and aristocratic families.

Option c is incorrect. The Toda Embroidery, also locally known as **“Pukhoor”**, **is an artwork among the Toda pastoral people of Nilgiris, in Tamil Nadu, made exclusively by their women**. The embroidery, which has a fine finish, appears like a woven cloth but is made with the **use of red and black threads with a white cotton cloth background**. Both sides of the embroidered fabric are usable and the Toda people are proud of its heritage. Both men and women adorn themselves with the embroidered cloaks and shawls. The embroidery is usually made **on their cloaks called “Pootkhuly” which is draped by both women and men**.

Option d is correct. Banjara embroidery has a combination of vibrant color threads that makes the design more striking. The center of the designs is **embellished with mirror works**.

There are 14 types of stitches used in Banjara embroidery. **They are Kilan, Vele, Bakhya, Maki, Suryakanti Maki, Kans, Tera Dora, Kaudi, Relo, Gadri, Bhuriya, Pote, Jollya, Nakra**.

Lambani also known as Banjara or Banjara Lambanis are a class of nomadic people who migrated from the Indian states Rajasthan and North Gujarat and spread all over India before the arrival of Mughals. They used to travel from places to place in carts with all the things they owned. They are called as Gypsies of India.

Knowledge Base: **Lambani also known as Banjara or Banjara Lambanis are a class of nomadic people who migrated from the Indian states Rajasthan and North Gujarat and spread all over India before the arrival of Mughals.**

Source: <https://medium.com/direct-create/banjara-embroidery-from-bellary-5968f36af888>
<https://blog.forumias.com/unesco-launches-list-documenting-50-iconic-indian-heritage-textiles/>

Q.17) With respect to the Mehrauli Iron Pillar, consider the following statements:

1. It is situated in the center of the courtyard of Quwwat-ul-Islam Mosque.
2. This Iron Pillar is a great example of craftsmanship of metal workers of the Gupta period.
3. It was transported to its present location by the Mughals.

How many statements given above are correct?

- a) Only one statement
- b) Only two statements
- c) All three statements
- d) None of the statements

Ans) b

Exp) Option b is the correct answer.

Statement 1 is correct. The tapering 'Mehrauli Iron Pillar' situated in the **centre of the courtyard of Quwwat-ul-Islam Mosque**. It is made up of 99% pure malleable iron. It has not deteriorated much in its more than 1600 years of existence, despite consistently remaining exposed to the weathering agents.

Statement 2 is correct. According to a 4th century CE Sanskrit inscription, this pillar was erected as a dhvaj (standard) of Vishnu on the **Vishnupada hill in memory of a mighty king named Chandra identified with Chandragupta II (375-413 CE) of the Gupta dynasty.**

Statement 3 is incorrect. It was brought to its present location by **Anangpal, the Tomar king credited with founding Delhi.**

Source:

<https://indianculture.gov.in/photo-archives/iron-pillar>

Q.18) With reference to Aryabhata, consider the following statements:

1. Aryabhata was called as Asmakiya by Bhaskara I.
2. He was first to discover that the earth rotates on its axis.
3. He was the first astronomer to give a scientific explanation of eclipses.
4. He wrote Ganitasarasangraha, which deals with various mathematical problems.

How many statements given above are correct?

- a) Only one statement
- b) Only two statements
- c) Only three statements
- d) All four statements

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. Bhaskara I, wrote a commentary on **Aryabhatiya**, called the **Aryabhatiya the Ashmaka-tantra and called Aryabhata as Ashmakiya,**

Statement 2 is correct. He was first to discover that the earth rotates on its axis and also worked out the correct equation for calculating the orbit of a planet and gave extremely accurate estimate of the length of a year to 365.2586805 days.

Statement 3 is correct. He was the first astronomer to give a scientific explanation of eclipses as he established that they are not caused by some demons but by the moon coming between the earth and the sun. He also worked out how to ascertain which part of moon would be obscured during an eclipse.

Statement 4 is incorrect. Mahavira was a famous 9th century mathematician of Karnataka who lived in the court of the Rashtrakuta king Amoghvarsha, and wrote a book called the **Ganitasarasangraha, which deals with various mathematical problems**

Knowledge Base: .

More about Aryabhata:

- 1) He was the first to invent zero and to recommend the use of the decimal system.
- 2) He described the various properties of a circle and gave a very accurate value of pi (π), correct to 4 decimal places at 3.1416.
- 3) He also perfected the methods of solving indeterminate equations in integers problems.

<https://aryabhatacollege.ac.in/about-aryabhata.aspx?id=3>

Q.19) Which of the following is **incorrect** with reference to the Gupta Architecture?

- a) Guptas patronized Buddhist cave buildings along with Hindu temples.
- b) The use of mural paintings on the walls of the caves was a major feature in the Gupta period.
- c) The inscription on pillars as a symbol to commemorate battle victories was first introduced in this period.
- d) Udayagiri Caves in Madhya Pradesh were built during the Gupta period.

Ans) c

Exp) Option c is the correct answer

The emergence of the Gupta Empire in 4th century AD is often hailed as the “**Golden Age of India**”. Temple architecture reached its climax during this period. Similarly, Buddhist and Jain art also reached its peak during the Gupta Age.

Option a is correct: **Buddhist cave buildings** continued to be built under the patronage of Guptas and Vakatakas. While the earlier Gupta rulers were Buddhists and continued the traditions of Buddhist architecture, temple architecture came to the fore front under the patronage of the Hindu rulers of the later Gupta phase. They have been found at Ajanta and Bagh, of which Ajanta caves are best preserved.

Option b is correct: **During the Gupta period;** architectural development of the caves remained constant. However, the **use of mural paintings on the walls** of the caves **became an added feature**. Some of the finest examples of mural paintings can be found in the caves of Ajanta and Ellora.

Option c is incorrect: **During the reign of Ashoka,** the inscription on pillars as a **symbol of the State or to commemorate battle victories were introduced and assumed great significance.** (And not during the Gupta period.) He also used pillars to propagate imperial sermons as well. The pillars were usually made of chunar sandstone and comprised of Shaft and Capital. On top of it lay the capital, which was either lotus shaped or bell shaped. The bell-shaped capitals were influenced by the Iranian pillars, as was the highly polished and lustrous finish of the pillars. Above it, there was a circular or rectangular base known as the abacus on which an animal figure was placed.

Option d is correct: The early Gupta style is dated from 3rd century to 5th century CE. There are both cave and free-standing temples made under this style. One such Cave complex was discovered at **Udayagiri in Madhya Pradesh.** **Udayagiri Caves** is a group of 20 Gupta-era temples and monasteries carved out of a rocky hill. One cave here is dedicated to Jainism and rest to Hinduism.

Brahmi inscriptions on the caves indicate that the site was excavated during the rule of Gupta King, Chandragupta II.

Q.20) “Falkland Island” is often in the news for its territorial dispute. In this context, consider the following statements regarding the Island:

1. This Island is located to the west of Argentina in Pacific Ocean.
2. The islands are self-governing Overseas Territory of the United Kingdom.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: The **Falkland Islands**, also called The Malvinas, are an archipelago in the **South Atlantic Ocean**, located **east of Argentina**, west of South Georgia and north of Antarctica (Elephant Island).

Statement 2 is correct: The **Falkland Islands** are a **self-governing Overseas Territory of the United Kingdom** but have been the subject of a claim to sovereignty by Argentina since the early years of Argentina's independence from Spain. In 1982 the islands were invaded by Argentina, precipitating the two-month-long undeclared Falklands War between Argentina and the United Kingdom, which resulted in the defeat and withdrawal of Argentine forces.

Source:

https://www.cs.mcgill.ca/~rwest/wikispeedia/wpcd/wp/f/Falkland_Islands.htm

<https://www.wionews.com/world/uk-insists-falkland-islands-remain-british-as-argentina-walks-away-from-pact-568213>

Q.21) With reference to the history of ancient India, consider the following statements regarding Ochre Coloured Pottery Culture:

1. It is found only in Southern India dating to the Mesolithic period.
2. It is essentially a rural culture associated with agriculture and pastoralism.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

The term Ochre Coloured Pottery Culture (OCP) was coined by B.B. Lal after he excavated the site Hastinapur in the year 1951-52. Some important aspects of the ochre coloured pottery culture are discussed below:

Statement 1 is incorrect: Ochre Coloured Pottery culture is found in northern India dating to the Chalcolithic period (not Mesolithic period). The OCP pottery has red slip and appears ochre in colour (the ochre colour comes off when the pottery is touched) and hence, it is called Ochre Coloured Pottery. It has black painted designs. The OCP comes in the form of jars, storage jars, bowls, and basins.

Statement 2 is correct: The OCP culture dates to 2600- 1200 BCE and is found in the Indo- Gangetic plain and may have had some associations with early Vedic culture. **It is a rural culture and has evidence of the cultivation of rice, barley, and legumes. They also had pastoralism with evidence of cattle, sheep, goats, pigs, horses, and dogs.** The villages had wattle-and-daub houses. They used copper and terracotta ornaments. Animal figurines have also been found.

Source: Tamil Nadu Board Class 11 History textbook

https://www.lkouniv.ac.in/site/writereaddata/siteContent/202003291608408879anil_kumar_Ochre_Coloured_Pottery.pdf

Q.22) With reference to fortifications of Indus valley civilization, consider the following statements:

1. Dholavira was fortified with an imposing wall made of stone rubble set in mud mortar.
2. Sites of Kalibangan and Kot diji were surrounded by massive mud-brick fortifications.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

The Indus Valley period saw the construction of elaborate fortifications using mud, baked bricks, and stones. Town planning involved dividing settlements into a citadel and lower town, with the former often surrounded by a moat.

Statement 1 is correct: Dholavira in the Rann of Kutch was fortified with an **imposing wall made of stone rubble set in mud mortar**. This massive fortification wall and the remains of stone pillars in the citadel are very distinctive and are not witnessed at any other Harappan site.

Statement 2 is correct: Kot Diji (3300 BCE) was a fortified site with a **massive wall made of limestone rubble and mudbrick**, and the settlement consisted of a citadel complex and a lower residential area and Kalibangan (2920–2550 BCE) was also surrounded **by massive mud-brick fortifications**.

Source : <https://indianculture.gov.in/node/2730054>

Q.23) Consider the following statements regarding temple architecture in India:

1. Unlike the Dravida temples, the Nagara temples are always enclosed within a compound wall.
2. The shape of the vimana in Nagara style is like a stepped pyramid unlike the curving shikhara of Dravida style.
3. In North Indian temples, images of Mithunas are found at the entrance of garbhagriha, whereas in South Indian temples, sculptures of fierce Dvarapalas guarding the temples are found.
4. The idea of multiple shikharas rising together as a cluster was popular in both Dravida and Nagara temple styles.

How many statements given above are correct?

- a) Only one statement.
- b) Only two statements.
- c) Only three statements.
- d) All four statements.

Ans) a

Exp) Option a is the correct answer.

Two broad orders of temples in the country are known– Nagara in the north and Dravida in the south. At times, the Vesar style of temples as an independent style created through the selective mixing of the Nagara and Dravida orders is mentioned by some scholars.

Statement 1 is incorrect: Unlike the nagara temple, the dravida temple is enclosed within a compound wall. The front wall has an entrance gateway in its centre, which is known as a gopuram.

Statement 2 is incorrect: The shape of the main temple tower known as vimana in Dravida Style is like a stepped pyramid that rises up geometrically rather than the curving shikhara of North India. In the South Indian temple, the word 'shikhara' is used only for the crowning element at the top of the temple which is usually shaped like a small stupika or an octagonal cupola– this is equivalent to the amlak and kalasha of North Indian temples.

Statement 3 is correct: At the entrance to the North Indian temple's garbhagriha, it would be usual to find images such as mithunas and the river goddesses, Ganga and Yamuna, whereas in the south- sculptures of fierce dvarapalas or the door-keepers guarding the temple are found.

Statement 4 is incorrect: In Dravida temple architecture, subsidiary shrines are either incorporated within the main temple tower, or located as distinct, separate small shrines beside the main temple. The North Indian idea of multiple shikharas rising together as a cluster was not popular in South India. At some of the most sacred temples in South India, the main temple in which the garbhagriha is situated has, in fact, one of the smallest towers. This is because it is usually the oldest part of the temple. With the passage of time, the population and size of the town associated with that temple would have increased, and it would have become necessary to make a new boundary wall around the temple. This would have been taller than the last one, and its gopurams would have been even loftier.

Source: An introduction to fine arts, Class 11 NCERT- chapter- 6

Q.24) This method was used for decoration. It meant the use of geometrical vegetal ornamentation. It was characterized by a continuous stem which split regularly, producing a series of counterpoised, leafy, secondary stems. The secondary stems, in turn, split again or returned to merge with the main stem creating a decorative pattern.

The above passage describes which of the following methods of Architecture?

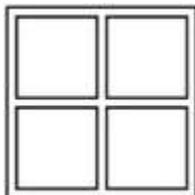

- a) Charbagh style
- b) Arabesque style
- c) Arcuate Style
- d) Trabeate Style

Ans) b

Exp) Option b is the correct answer

The Islamic rulers introduced the use of minars around the mosques and the mausoleums. Mortar was used as a cementing agent in their constructions.

Option a is incorrect: The Islamic rulers introduced the **Charbagh style of gardening**, in which a square block was divided into four adjacent identical gardens.

Charbagh Style

Option b is correct: **Arabesque method** was used for **the decoration**. Arabesque meant the use of geometrical vegetal ornamentation and was characterised by a **continuous stem** which split regularly, producing a series of counterpoised, leafy, secondary stems. **The secondary stems**, in turn, split again or returned to merge with the **main stem creating a decorative pattern**. The architecture of this period heavily used the principles of geometry from decorative pattern to imbuing a sense of symmetry.

Arabesque Design

Option c is incorrect: **Arcuate Style** was characterised by **the use of arches and domes**. The use of domes, generally hemispherical, on top of the mosques. Minars were present on the four corners of the mosques. Brick, lime plaster and mortar started to be used for constructions in this style of architecture.

Option d is incorrect: **Trabeate Style** was characterised by the **use of Lintel**. This style used shikhara on top of the temples. They were generally conical or curvilinear. Minars were absent in this method. Stone was the primary component of all constructions in trabeate style.

Source: Indian art and culture by nitin singhania pdf. Chapter name- Indian Architecture, Sculpture and Pottery. Page no.123 to 126.

Q.25) With reference to “Project 75 (India)”, consider the following statements:

1. Under the project, 6 conventional submarines will be constructed.
2. Shivalik class ship will be constructed under the project.
3. This project will help India to deter adversaries in Indo-Pacific region.

Which of the statements given above are correct?

- a) 2 and 3 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: Project-75(I) envisages indigenous construction of six modern conventional submarines (including associated shore support, Engineering Support Package, training and spares package) with contemporary equipment, weapons & sensors including Fuel-Cell based AIP (Air Independent Propulsion Plant), advanced torpedoes, modern missiles and state of the art countermeasure systems. This would provide a major boost to the indigenous design and construction capability of submarines in India, in addition to bringing in the latest submarine design and technologies as part of the project.

Statement 2 is incorrect: All six submarines constructed under Project 75 I are referred to as Kalvari Class of submarines. Project 17 Stealth Frigates involves with Shivalik Class of submarines (Shivalik, Sahyadri and Satpura). The term 'class' in the Kalavari Class refers to a series of warships constructed under Project 75 I which involves - INS Kalvari, INS Khanderi, Karanj, Vela, Vagir and Vagsheer submarines.

Statement 3 is correct: This Project 75 I will help reduce current dependence on imports and gradually ensure greater self-reliance in Submarine. It will protect Indo-Pacific considering the fact that there is rapid increase of nuclear submarine arsenal by China and to **protect the Indo-Pacific from future domination by the adversary.**

Q.26) Consider the following statements regarding the 'Dancing Girl' sculpture from the Indus Valley Civilisation:

1. The Lost Wax Technique was used for making the dancing girl from bronze.
2. The girl depicted in the sculpture is wearing unstitched fabric draped around the body.
3. The Dancing girl sculpture was discovered in Harappa.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1 and 2 only

Ans) a

Exp) Option a is the correct answer.

Sculptures are relatively smaller 3-dimensional works of art. The Harappan sculptors were extremely adept at handling three dimensional volumes. The most commonly found sculptures during the Indus Valley Civilisation were seals, bronze figures and potteries. The important aspects regarding one of the most renowned sculptures called as the dancing girl are discussed below:

Statement 1 is correct: The art of bronze-casting was practised on a wide scale during Indus Valley Civilisation. Their bronze statues were made using the ‘lost wax’ technique in which the wax figures were first covered with a coating of clay and allowed to dry. Then the wax was heated and the molten wax was drained out through a tiny hole made in the clay cover. The hollow mould thus created was filled with molten metal which took the original shape of the object. Once the metal cooled, the clay cover was completely removed. In bronze human as well as animal figures are found, the best example of the former being the statue of a girl popularly titled ‘Dancing Girl’.

Statement 2 is incorrect: Dancing girl was one of two bronze artworks found at the same site, and shows a more naturalistic pose than the other more formal piece. The figure depicts a naked girl wearing only ornaments, which include bangles in the left arm, and amulet and bracelet on the right arm. The tilted head, slightly bent knees and right arm resting on her hip suggest a dancing pose, hence the name.

Statement 3 is incorrect: The sculpture of the dancing girl was discovered by British archeologist Ernest Mackay in Mohenjo-daro (not in Harappa) in 1926.

Fine Arts NCERT, 11th standard

Q.27) In ancient Indian history, Faience was used to make beads, earrings, and tiny vessels. In this context which of the following options best describe the term “faience”?

- It is an alloy of copper and zinc renowned for its hardness and workability.
- It is a type of coarse iron which when fired assumes various colours depending on the base element.
- It is a type of ancient rock consisting of several minerals that have a precious bright royal blue colour.
- It is an artificially produced material from sand having shiny surface.

Ans) d

Exp) Option d is the correct answer.

Option a is incorrect: Brass is an alloy of copper and zinc. It is of historical and enduring importance because of its hardness and workability. The earliest brass, called calamine brass, dates to Neolithic times; it was probably made by reduction of mixtures of zinc ores and copper ores.

Option b is incorrect: Terra-cotta in literal terms is any kind of fired clay but, in general usage, a kind of object—e.g., vessel, figure, or structural form—**made from fairly coarse, porous clay that when fired assumes a colour ranging from dull ochre to red and usually is left unglazed.**

Option c is incorrect: Lapis lazuli is a rock, which means it’s an aggregate of several minerals. This ancient gem contains three minerals in varying amounts: lazurite, calcite, and pyrite. The rock can also contain lesser amounts of diopside, amphibole, feldspar, or mica. Lazurite is the ingredient responsible for producing the gem’s most prized color—bright royal blue.

Option d is correct: Unlike stone or shell, that are found naturally, faience is a material that is artificially produced. A gum was used to shape sand or powdered quartz into an object. The objects were then glazed, resulting in a shiny, glassy surface. The colours of the glaze were usually blue or sea green. Faience was used to make beads, bangles, earrings, and tiny vessels.

Source: <https://ncert.nic.in/textbook.php?fess1=3-10>

<https://www.gia.edu/lapis-lazuli>

Q.28) “It is one of the oldest martial arts in India practiced in parts of southern India. This art form includes armed and unarmed combat and physical exercises. It is not accompanied by any drumming or song. Its most important key is footwork. Though it is considered as art of self-defense, it is very well rooted in the traditional rituals and ceremonies.”

Which one of the following martial art forms is described in the above given paragraph?

- a) Silambam
- b) Gatka
- c) Mallakhamb
- d) Kalaripayattu

Ans) d

Exp) option d is the correct answer.

Option a is incorrect: Silambam is a popular variant of martial arts which is performed with the aid of some specific weapons, primarily with bamboo sticks. It is widely performed in the regions of Tamil Nadu (India) which is also the birthplace of the game, where it emerged in around 1000 years BCE. The Tamil Sangam literature has the early records of Silambam. The word Silambam etymologically means "staff/stick from the hills". The game is usually played on an even hard surface where the players use a bamboo stick with its length equivalent to their heights. Overall, there are 16 forms of footwork present in this martial art.

Option b is incorrect: Sikh martial art ‘Gatka’, based on stick-fight, developed as self-defensive style after fourteenth century in old Punjab. It is associated with the Sikh history and an integral part of vast arena of Sikh Shastar Vidiya (skills to use weapons). The sixth Guru, Sri Guru Hargobind Ji had promoted the flamboyant techniques of Shastar Vidiya, (Sikh Martial Art), among the Sikhs who passed on these skills through generations. The tenth Guru, Sri Guru Gobind Singh Ji was known as the greatest master of weaponry of his time.

Option c is incorrect: Sometimes referred to as the mother of all ancient Indian sports, mallakhamb’s exact origins are almost impossible to trace. References of some form of mallakhamb can be found in ancient Indian epics like the Ramayana, ancient Chandraketurah pottery dating back to the second to first century BCE and also accounts of Buddhist Chinese pilgrims to India. ‘Malla’ literally means wrestling and ‘khamb’ translates to pole. Together, mallakhamb means wrestling on a pole. Wrestlers and warriors used to use the pole as a training apparatus to perfect martial arts moves which they could later use on opponents in the ring or the battlefield.

Option d is correct: Kalariipayattu or Kalayari is an Indian form of martial art that originates in modern-day Kerala and dates back to the 3rd century BCE. It is practised in the most parts of the South India. This art form includes armed and unarmed combat and physical exercises. It is not accompanied by any drumming or song and the style of fighting is its most significant aspect. Kalaripayattu is noted for its high-flying acrobatics, graceful movements and employs the deadly weapons at ease. The Movements of Kalari are based on the mannerisms and fighting techniques of animals. Though it is considered as art of self-defense, it is very well rooted in the traditional rituals and ceremonies.

SFG 2023 | LEVEL 2 | Test #38 – Solutions | ForumIAS

Q.29) Consider the following pairs about Geographical Indication (GI) tagged artworks and the corresponding states/Union Territories:

GI tagged work of art	Origin state
1. Channapatna Toys.	Andhra Pradesh
2. Gamosa	Assam
3. Sozani Craft	Jammu and Kashmir
4. Muga Silk	West Bengal

How many pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) All the four pairs

Ans) b

Exp) Option b is the correct answer.

A GI or Geographical Indication is a name or a sign given to certain products that relate to a specific geographical location or origins like a region, town or country. Using Geographical Indications may be regarded as a certification that the particular product is produced as per traditional methods, has certain specific qualities, or has a particular reputation because of its geographical origin

Pair 1 is incorrect: Channapatna Toys are the toys made in Channapatna town of Karnataka. The ruler of Mysore, Tipu Sultan is attributed with introducing these wooden toys to the current town of Channapatna. Tipu Sultan is widely known as an admirer of art, particularly wooden artwork. He invited artists from Persia to train the local artists in the wooden toy making and then helped thrive this industry locally. It received GI tag in 2005.

Pair 2 is correct: Gamosa, a symbol of the culture and identity of Assam, has recently received the Geographical Indication (GI) tag from the central government. The handwoven rectangular fabric is made of cotton and features red borders, signifying the cultural heritage of the state. Gamosa is traditionally offered to elders and guests as a mark of respect and honour by Assamese.

Pair 3 is correct: One of the lesser known handicrafts from the valley of Kashmir is the Sozani craft, a delicate form of hand-embroidery that has been in practice for centuries. Traditionally, cotton, silk and woollen threads were used for the embroidery but now synthetic threads are also used. The threads are usually dyed in-house in various colours and then used to stitch the patterns (mostly floral and geometric) already traced on the fabric with the help of engraved wooden blocks. Sozani craft got its GI tag in 2008.

Pair 4 is incorrect: One of the best silk produced ever, the Muga of Assam, is not only unique by virtue of its golden lustre (which improves with every wash), softness and durability but also as one of the oldest weaving crafts of India. The silkworm from which the threads are drawn are found only in Assam. According to many historical accounts, the golden period of the silk was during the Ahom period when it was a thriving industry and became a part of Assamese culture. The silk is largely used to weave the state's traditional attire for women – mekhala chador. Assam's Muga Silk got its GI tag in 2007.

Q.30) Consider the following statement with reference to Stockholm Conference of 1972:

1. It led to the creation of the United Nations Environment Programme (UNEP).
2. Stockholm Declaration adopted during the conference condemned apartheid and colonialism.
3. The then Indian Prime Minister Indira Gandhi had attended the conference.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: The 1972 United Nations Conference on the Human Environment in Stockholm was the first world conference to make the environment a major issue. The participants adopted a series of principles for sound management of the environment including the **Stockholm Declaration** and Action Plan for the Human Environment and several resolutions. One of the major results of the Stockholm conference was the **creation of the United Nations Environment Programme (UNEP)**.

Statement 2 is correct: The conference agreed upon a Stockholm Declaration containing 26 principles concerning the environment and development, an Action Plan with 109 recommendations, and a Resolution. **Principles of the Stockholm Declaration** included that human **rights must be asserted**, and **apartheid and colonialism should be condemned**.

Statement 3 is correct: The then Indian Prime Minister Indira Gandhi had attended the 1972 conference and called for collective action to save the environment.

Knowledge Base:

The United Nations Conference on the Human Environment in Stockholm was held in 1972.

- 1) The theme of the conference was ‘Only One Earth’.
- 2) 122 countries participated in the conference.
- 3) Its aim was to Create a common governance framework for the planetary environment and natural resources.
- 4) The Stockholm Declaration contained 26 principles that marked the beginning of a dialogue between developed and developing countries.

Source:

<https://timesofindia.indiatimes.com/india/stockholm50-summit-to-recall-indias-contribution-to-environmentalism/articleshow/91905262.cms>

<https://www.un.org/en/conferences/environment/stockholm1972>

Q.31) “He is considered as one of the famous alchemists of ancient times. As per popular belief of his times, he was blessed with the power of changing base metals into gold and extraction of “Elixir of life”. He wrote books such as Rasaratnakara and Uttarantra. Four ayurvedic treatises have also been written by him in the later years when his interest shifted in organic chemistry and medicine.”

Which of the following personalities is described in the above-mentioned paragraph?

- a) Nagarjuna
- b) Sushruta
- c) Acharya Kanada
- d) Varahmihira

Ans) a

Exp) Option a is the correct answer.

In Ancient India, an important role in the development of chemistry was made by Ayurveda which used a variety of minerals. Science and technology in ancient and medieval India covered all the major branches of human knowledge and activities. In any, early civilization, metallurgy has remained an activity central to all civilizations from the Bronze Age and the Iron Age to all other civilizations that followed.

Option a is correct: One of the famous alchemist of ancient times was **Nagarjuna**. Born in Gujarat in 931 AD, Nagarjuna was blessed with this power of changing base metals into gold and extraction of “Elixir of life” as per the beliefs of the people. He wrote a treatise Rasaratnakara which mainly deals with preparation of liquids (mainly mercury). The book also emphasised on the survey of metallurgy and alchemy. He also wrote Uttarantra which is a supplement to Sushruta Samhita and deals with preparation of medicinal drugs. Four ayurvedic treatises have also been written by him in the later years when his interest shifted in organic chemistry and medicine. The contribution of Nagarjuna in the field of chemistry had been immense as the idea of transformation of metals seems to be taken by Arabs from the Indian books.

Option b is incorrect: **Sushruta** was ancient Indian surgeon known for his pioneering operations and techniques and for his influential treatise Sushruta-samhita, the main source of knowledge about surgery in ancient India. The Sushruta-samhita also provides details on toxicology, pediatrics, pharmacology, and other branches of the traditional system of Indian medicine known as Ayurveda.

Option c is incorrect: **Acharya Kanada** is revered as the “Father of Atomic Theory”. He has rendered Kanada Sutras which is considered as one of the greatest works in the field of physics. He is not only revered in Hinduism but also in Jainism and Buddhism, where his concepts are highly praised. He described the universe with six categories, which are Dravya, which is defined as a substance. Guna, which is defined as the quality. Karman, which is defined as a motion. Samanya, which is defined as Generic Species. Visesa, which is defined as a unique Trait, and Samavaya is defined as inherence.

Option d is incorrect: **Varahamihira** was one of the renowned Indian astronomer, mathematician, and astrologer. He was honored with a special decoration and status as one of the nine gems in the court of King Vikramaditya in Avanti (Ujjain). Varahamihir’s book “panchsiddhant” holds a prominent place in the realm of astronomy. He proposed that the moon and planets are lustrous not because of their own light but due to sunlight. In the “Bruhad Samhita” and “Bruhad Jatak,” he has revealed his discoveries in the domains of geography, constellation, science, botany and animal science. In his treatise on botanical science, Varamihir presents cures for various diseases afflicting plants and trees.

Art and Culture by Nitin Singhania, chapter 3

<https://www.journalijdr.com/significant-contribution-chemistry-ancient-indian-science-and-technology>

Q.32) The sculpture of the Descent of the Ganges, a giant open-air rock relief carved on two monolithic rock boulders, is found at which of the following sites?

- Mahabalipuram
- Badami caves
- Kanheri caves
- Bagh caves

Ans) a

Exp) Option a is the correct answer.

The **Descent of the Ganges**, known also known as **Arjuna's Penance** is a monument at **Mahabalipuram, on the Coromandel Coast of the Bay of Bengal**, in the Chengalpattu district of the state of Tamil Nadu. Measuring 96 by 43 feet (29 m × 13 m), the Descent of the Ganges is a giant open-air rock relief carved on two monolithic rock boulders. The legend depicted in the relief is the story of the descent of the sacred

river Ganges to earth from the heavens led by Bhagiratha. The waters of the Ganges are believed to possess supernatural powers.

Q.33) Consider the following description:

“This structure is located in Delhi. It was constructed in the early 12th century and is one of the earliest examples of Islamic architecture in India. Its construction was begun by Qutub-ud-din Aibak. It is notable for its striking blend of Islamic and Hindu architectural styles, as well as for its intricately carved pillars and arches. Its vast courtyard is surrounded by a cloister.”

Which among the following have been described above?

- Jamali-Kamali Mosque
- Jama Masjid
- Khirki Masjid
- Quwwat-ul-Islam Mosque

Ans) d

Exp) Option d is the correct answer.

Quwwat-ul-Islam Mosque is in Delhi, India. **It was constructed in the early 12th century** and is one of the earliest examples of Islamic architecture in India. The mosque was built by the Islamic conqueror Qutub-ud-din Aibak. The mosque's name, Quwwat-ul-Islam, means "Might of Islam" in Arabic. The mosque is notable for its striking blend of Islamic and Hindu architectural styles, as well as for its intricately carved pillars and arches. The mosque's vast courtyard is surrounded by a cloister. The Quwwat-ul-Islam Mosque is an important historical and cultural landmark in India, and it attracts many visitors each year. The Iron Pillar of 23ft height, situated in the courtyard of the Quwwat-ul-Islam (Might of Islam) Mosque is dated to the Gupta period with Sanskrit inscriptions from the 4th or 5th century. This pillar was taken from a Vishnu temple and placed at this site before the construction of the complex.

Option a is incorrect: Jamali-Kamali Mosque was built between 1528 and 1536 by Shaikh Fazl al-Allah, also known as Jalal Khan Jalali or Jamali. It is located in the Archaeological Village complex in Mehrauli, Delhi.

Option b is incorrect: Jama Masjid was built by the Mughal emperor Shah Jahan between 1650 and 1656. It is located in Old Delhi.

Option c is incorrect: **Khirki Masjid** was built between 1351-54 by Khan-i-Jahan Junan Shah, the prime minister of Feroz Shah Tughlaq. It is also located in Delhi.

Q.34) In the context of cultural history of India, which of the following best describes the term “Yavanika”?

- Bronze sculptures developed by the early cholas.
- A type of curtain used in the Indian theatres.
- Coins specially minted for religious affairs and donations.
- A type of pottery used to strain liquor.

Ans) b

Exp) Option b is the correct answer.

The Indo-Greeks contributed significantly to the development of Indian theatre. They introduced the use of the curtain during stage theatricals. **They introduced the concept of the Yavanika, which was a curtain that separated the stage from the audience and was used to signal the start and end of a performance.**

Source: NCERT, R S Sharma, pg. 111

Q.35) The term “Twin deficit Problem” is often seen in the news. In this context, which of the following statements best describes the term?

- it is a problem when there is a simultaneous rise in both fiscal and current account deficits.
- It is the difference between revenue deficit and grants for creation of capital assets.
- It is the borrowing requirements of the government, excluding interest payments.
- It is a problem when there is an increase in Revenue deficit and Capital account deficit.

Ans) a

Exp) Option a is the correct answer.

Option a is correct: Twin deficit refers to the situation when an economy suffers from both the fiscal deficit and the Current Account Deficit. Where the Fiscal deficit refers to a condition where a governments' expenditure exceeds the revenue it is getting. Such gaps between the expenditure and revenue are compensated by the market through loans, etc.

Further, Current account deficit (CAD) is when the value of a country's imports of goods and services is greater than its exports.

Option b is incorrect: Effective Revenue Deficit is the difference between revenue deficit and grants for creation of capital assets. The concept of effective revenue deficit has been suggested by the Rengarajan Committee on Public Expenditure. It is aimed to deduct the money used out of borrowing to finance capital expenditure.

Option c is incorrect: Primary Deficit indicates the borrowing requirements of the government, excluding interest payments. It is the amount by which the total expenditure of a government exceeds the total income. Note that the primary deficit does not include the interest payments made. Also, primary deficit shows the borrowing requirements needed for meeting the expenditure of the government.

Option d is incorrect: Twin deficit problem is not associated with rise in Capital account deficit and revenue deficit. A capital account deficit shows that more money is flowing out of the economy along with increase in its ownership of foreign assets and vice-versa in case of a surplus. Revenue Deficit is the excess of its total revenue expenditure to its total revenue receipts. Revenue Deficit is only related to revenue expenditure and revenue receipts of the government.

Q.36) Consider the following statements about the contributions of Brahmagupta to the field of science in Ancient India:

- In his work Brahmasphutasiddhanta, he gave the formula for calculating area of a cyclic quadrilateral.
- He identified that the Earth has the nature of attracting objects towards it.

Which of the statements given above is/are correct?

- 1 only
- 2 only
- Both 1 and 2
- Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Brahmagupta (598-670) was the foremost Indian mathematician of his time. He made advances in astronomy and most importantly in number systems including algorithms for square roots and the solution of quadratic equations.

Statement 1 is correct: In the Brahmasphutasiddhanta, Brahmagupta gave a remarkable formula for the area of a cyclic quadrilateral (a four-sided polygon whose vertices all reside on same circle) and for the lengths of the diagonals in terms of the sides.

Statement 2 is correct: Brahmagupta in AD 628, wrote that "bodies fall towards the earth as it is in the nature of the earth to attract bodies, just as it is in the nature of water to flow". Along with giving the concept of gravity he calculated the diameter of the Earth to be 7905 miles, thus forestalling modern scientists like Newton and Kepler by several centuries.

Source: <https://mathshistory.st-andrews.ac.uk/Biographies/Brahmagupta/>

<https://www.britannica.com/biography/Brahmagupta>

Q.37) “These group of caves were originally a Buddhist site which later dominated by the Shaivite faith. The sculptures in these caves are known for their remarkable qualities of surface smoothness, elongation and rhythmic movements. Some of the pristine sculptures in these caves are Maheshmurti and Ardhanarishwara.”

Which of the following caves is being discussed in the above paragraph?

- Ajanta caves
- Ellora caves
- Elephanta caves
- Udaigiri caves.

Ans) c

Exp) Option c is the correct answer.

The Elephanta Caves located near Mumbai, were originally a Buddhist site which was later dominated by the Shaivite faith. It is contemporary with Ellora, and its sculptures show slenderness in the body, with stark light and dark effects. **Elephanta sculptures are known for their remarkable qualities of surface smoothness, elongation and rhythmic movement.** Their composition is very complex.

The image of Maheshmurti at Elephanta dates back to the early sixth century CE. It is located in the main cave shrine. In the tradition of western Deccan sculpting, it is one of the best examples of qualitative achievement in sculpting images in rock cut caves. It is also known as Trimurthy.

Ardhanarishvara, literally translates into the half female god (Siva). For its artistic excellence, this image is arguably the second-best image, after the three headed Mahesh Murthy at Elephanta.

Source: <https://elephanta.co.in/ardhanarishvara-at-elephanta>

Class 11 NCERT, An Introduction to Indian art, Chapter 4.

Q.38) Arrange the following monuments in chronological order according to the year in which their construction was completed.

- Qutb Minar
- Alai Darwaza
- Ibadat khana at Fatehpur Sikri
- Bibi-Ka-Maqbara

Select the correct answer from the code given below:

- 1-2-3-4
- 2-1-3-4
- 1-2-4-3
- 2-1-4-3

Ans) a

Exp) Option a is the correct answer.

The correct chronological order will be 1-2-3-4

Option 1: Qutbu'd-Din Aibak laid the foundation of Minar in AD 1199 for the use of the mu'azzin (crier) to give calls for prayer and raised the first storey, to which were added **three more storeys by his successor and son-in-law, Shamsu'd-Din Iltutmish (AD 1211-36). In 1230, Iltutmish completed the construction of the Qutab Minar.**

Option 2: Alai Darwaza was built by Alauddin Khilji around 1311 as an entrance door to the Qutub Minar and Quwwat-ul-Islam Mosque. This door was over 14 meters tall and had arches of very pleasing proportions that were very accurate. It is also the entrance to Quwwat-ul-Islam Mosque from the Southern side. The door also contains a magnificent dome built on correct scientific lines.

Option 3: The Ibādat Khāna (House of Worship) was a meeting house built in 1575 CE by the Mughal Emperor Akbar (r. 1556–1605) at Fatehpur Sikri to gather spiritual leaders of different religious grounds so as to conduct a discussion on the teachings of the respective religious leaders.

Option 4: The Bibi-Ka-Maqbara is a beautiful mausoleum of Rabia-ul-Daurani alias Dilras Banu Begum, the wife of the Mughal Emperor Aurangzeb (1658-1707 A.D.). This mausoleum is believed to be constructed by **Prince Azam Shah in memory of his mother during 1651 to 1661 A.D**

Source: Art and Culture by Nitin Singhania.

Q.39) Consider the following statements about the Ellora Caves:

1. The famous sculpture depicting Ravana shaking the Kailasa Mountain is located in the Ellora caves.
2. Ellora caves are located in the gorge of the Waghora river.
3. More than half of the caves at Ellora belong to the Jain religion.

Which of the above given statements are **incorrect**?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Ajanta and Ellora are two monumental rock-cut cave complexes located in the Aurangabad district of Maharashtra. While separated by a distance of approximately 100 km, they are often mentioned together due to their similar aesthetic and cultural significance.

Statement 1 is correct: Some of the marvelous sculptures within the temple are that of dancing Nataraja; Shiva Parvati's wedding and **Ravana attempting to lift Mount Kailasa, the abode of Lord Shiva**, with his full might.

Statement 2 is incorrect: Ajanta Caves (Not Ellora) lie in the gorge of Waghora river.

Statement 3 is incorrect: The Ellora Caves are a complex of 34 caves. Out of these 34, 17 are Hindu caves (caves 13, 29, 14, and 15 are famous and are known as Ravan Ki Khai and Dashavatar caves, respectively), 12 are Buddhist caves (caves 1-12), and **5 are Jain caves (not more than half)**(caves 30-34, Jaina caves include Indra Sabha and Jagannath Sabha).

Q.40) The West Seti Hydro project, which India recently have decided to develop, is located in which Country?

- a) Nepal
- b) Bhutan

- c) Myanmar
d) Bangladesh

Ans) a

Exp) Option a is the correct answer.

India will be taking over an ambitious hydropower project in Nepal known as West Seti Dam Project nearly four years after China withdrew from it, ending a six-year engagement between 2012 and 2018.

Option a is correct: The Investment Board Nepal and India's state-owned NHPC Limited has sign a memorandum of understanding (MoU) to **develop the West Seti and Seti River-2 hydroelectric projects in western Nepal**. The estimated cost of the project, according to the Investment Board, is \$2.4 billion. The West Seti project, on the West Seti River in Nepal's northwestern Doti District, has been planned for or under development since 1994. These storage type projects on the Seti river are located in four districts of Bajhang, Doti, Dadeldhura and Achham.

Q.41) With reference to the Ashokan pillar at Sarnath (pillar with Lion Capital), consider the following statements:

1. Animals depicted on the abacus of the Sarnath pillar include a Tiger, a horse, a bull and an elephant.
2. The phrase 'Satyamev Jayate' was originally inscribed on the abacus of this pillar.

Which of the above given statements is/are **incorrect**?

- a) 1 only
b) 2 only
c) Both 1 and 2
d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

The Sarnath Pillar is a column of polished sandstone located in Sarnath, near Varanasi in the state of Uttar Pradesh. It was erected by Emperor Ashoka in the 3rd century BCE, as a part of his efforts to spread Buddhism across his empire. The pillar is known for its beautiful carvings and inscriptions, which provide important historical and cultural insights into the Mauryan period.

Statement 1 is incorrect: In the abacus of the Sarnath pillar, four animals are shown representing four directions – a galloping horse (west), a bull (east), an elephant (south) and a lion (north). The animals seem to follow each other turning the wheel of existence till eternity. **There is no Tiger on the abacus.**

Statement 2 is incorrect: The Mundaka Upanishad is an ancient Sanskrit Vedic text, embedded inside Atharva Veda. **The Mundaka Upanishad is the source of the phrase Satyameva Jayate, which is the national motto of India.** The phrase was not originally inscribed as a part of the Sarnath lion capital.

Q.42) With reference to schools of sculpture developed in Ancient India, consider the following statements:

1. While Mathura school is indigenously developed, Gandhara School had Greek influence.
2. While Mathura school mostly used white marble, Gandhara school used red sandstone.
3. While Gandhara school mainly had Buddhist influence, Mathura school had influence of Hinduism, Jainism and Buddhism.
4. While Gandhara school was patronized by Pala rulers, Mathura school was patronized by Satavahana rulers.

How many of the above given statements are correct?

- a) Only one statement
- b) Only two statements
- c) Only three statements
- d) All the four statements

Ans) b

Exp) Option b is the correct answer.

Three prominent schools of sculpture developed in this period at three different regions of India – centred at Gandhara, Mathura and Amaravati.

Statement 1 is correct: Gandhara School had heavy influence of Greek or Hellenistic sculpture, so it is also known as IndoGreek art. **Mathura School** and Amaravati School were developed indigenously and not influenced by external cultures.

Statement 2 is incorrect: Early Gandhara School used **bluish-grey sandstone** while the later period saw the use of mud and stucco. The sculptures of Mathura School were made using **spotted red sandstone**, but the sculptures of Amaravati School were made using **white marbles**.

Statement 3 is correct: Gandhara and Amaravati are mainly Buddhist imagery whereas Mathura school had influence of all three major religions of the time, i.e., Hinduism, Jainism and Buddhism.

Statement 4 is incorrect: Gandhara and Mathura were patronized by Kushana rulers whereas Amravati was patronized by Satavahana rulers.

Source: Indian Art and Culture by Nitin Singhania

Q.43) With reference to the seals found during Indus Valley Civilization (IVC), consider the following statements:

1. Animal and human figures were found on the seals.
2. These seals were used for commercial purposes.
3. Mathematical images have also been found on some seals.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The art of making glazed or unglazed porous earthenware, figures, and other decorative items from clay that has been dried and fired at temperatures of about 1000°C is known as terracotta, which is derived from the Latin terra cotta, or baked earth.

Statement 1 is correct. Terracotta seals from the sites of Indus Valley Civilisation (IVC) were found to bear on them the representation of an animal or human figure. There was a seal found in Mohenjodaro named the **Pashupati seal**. This seal looks like a human figure seated with its legs crossed. On the right side of the figure, an **elephant and a tiger** could be seen, and on the left a **rhinoceros** and a **buffalo**.

Statement 2 is correct. Seals were primarily used for **commercial purposes** and helped in communication. Discovery of various seals in **Mesopotamia** and various sites such as Lothal indicate that seals were extensively **used for trade**.

Statement 3 is correct. **Mathematical images** have also been found on some seals, which might have been used for **educational purposes** as well. Seals with symbol similar to 'Swastika' design have also been found.

Source: <https://www.dollsofindia.com/library/terracotta-art/>
Nitin singhaniya

Q.44) With reference to Ibadat Khana, consider the following statements:

1. The Ibadat Khana was built by the Mughal Emperor Humayun.
2. It was built for conducting religious discussions with theologians of different religions.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. The Mughal Emperor **Akbar (1542–1605 CE)** **built** the House of Worship, also known as the **Ibadat Khana**. It aims to conduct a discussion on the teachings of the different religious leaders.

Statement 2 is correct. Ibadat Khana was an assembly of **spiritual leaders (theologians) of different religions at one place to discuss** the teachings of their **respective religions**. Most of these religious discussions were held in the evenings on Thursdays.

Source : https://www.worldhistory.org/Ibadat_Khana/

Q.45) Recently, the term ‘over the ground worker’ was in the news. In this context, consider the following statements:

1. He/she is a terrorist or other criminal who acts alone rather than as part of a larger organization.
2. He/she can be detained under the provisions of the Public Safety Act.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: The term over-ground workers (OGWs) is used by the police and security forces for those who are reportedly sympathetic to militants and provide them logistical support in terms of food, shelter, money, and other logistical infrastructure.

Instead, **lone wolf** is a terrorist or other criminal who acts alone rather than as part of a larger organization.

Statement 2 is correct: Recently, the Jammu and Kashmir Police detained five over-ground workers (OGWs) of militants in the Ramban district under the provisions of the Public Safety Act. The Jammu & Kashmir Public Safety Act (PSA), 1978 is a preventive detention law, under which a person is taken into custody to prevent him or her from acting in any manner that is prejudicial to “the security of the state or the maintenance of the public order”. It is very similar to the National Security Act that is used by other state governments for preventive detention.

Source: <https://indianexpress.com/article/cities/jammu/jammu-kashmir-police-detain-militants-ramban-8220610/>

<https://jkhome.nic.in/pdf/PSA0001.pdf>

Q.46) With reference to Buddhist architecture, consider the following statements:

1. Chaitya is usually a prayer hall with a stupa placed at the centre of the hall.
2. Viharas are a place of residence for monks.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. In Buddhism, Chaityas refers to a prayer hall with a stupa in the centre. Chaityas are narrow and have high ceilings, unlike Viharas. Examples of common chaityas that have survived are rooted in Indian rock-cut architecture, such as the Bhaja Caves and the great Karla Caves.

Statement 2 is correct. Buddhists Viharas meant as a place of residence for monks and also a place for religious work and Buddhist learning. Viharas are small, centred halls that are occasionally joined by beds carved from stone.

Source: <https://www.india-a2z.com/buddhist-architecture-in-india.html>

Q.47) With reference to Sun Temples of India, consider the following pairs:

Sun Temple	State/UT
1. Konark	Odisha
2. Modhera	Chhattisgarh
3. Martand	Uttarakhand
4. Unnao Balaji	Madhya Pradesh
5. Surya Pahar	Assam

Which of the pairs given above are correctly matched?

- 1, 2 and 3 only
- 1, 3 and 5 only
- 1, 4 and 5 only
- 1, 2, 4 and 5 only

Ans) c

Exp) Option c is the correct answer.

Sun Temple	State/UT
1. Konark	Odisha
2. Modhera	Gujarat
3. Martand	Jammu & Kashmir
4. Unnao Balaji	Madhya Pradesh
5. Surya Pahar	Assam

- Sun Temple Konark:** It is a World Heritage Site located in the Indian state of Odisha. It is also considered as one of the Seven Wonders of India.
- Sun Temple Modhera:** In the Mehsana district of Gujarat, it is situated on the banks of the Pushpavati River.
- Sun Temple Martand:** It is situated in the Indian Union Territory of Jammu & Kashmir. Martand Sun Temple is listed as the site of national importance in the region.
- Unnao Balaji Sun Temple:** It is situated in the Datia district of the state of Madhya Pradesh. It is famous for its unique design and architecture.
- Surya Pahar Assam:** It is located in the Goalpara town of Assam and is considered as one of the least known archaeological site in the state.

<https://timesofindia.indiatimes.com/web-stories/religion/12-most-famous-sun-temples-in-india/photostory/81103884.cms>

Q.48) Which of the following statements is/are correct regarding the Didarganj Yakshi, also known as the Chauri-Bearer (flywhisk-bearer) statue?

- It is made of polished chunar sandstone.
- It was found on the banks of River Yamuna in Uttar Pradesh.
- It is believed that the sculpture belongs to the third century CE.

Select the correct answer using the code given below:

- 1 only
- 2 and 3 only
- 1 and 3 only
- 1 and 2 only

Ans) a

Exp) Option a is the correct answer.

Didarganj Yakshi sculpture has garnered and attracted interest from various spheres because it is a stunning combination of **Buddhist elements of art** with supposed Mauryan standards of beauty.

Option 1 is correct: Didarganj Yakshi stone sculpture, is 5'2" tall. It is supported by a pedestal and is made of **polished chunar sandstone**. It strikes the viewer as having superb craftsmanship and attention to detail.

Option 2 is incorrect: Didarganj Yakshi **sculptor was found in 1917 on the muddy banks of the river Ganga (and not river Yamuna) in Didarganj city of Bihar.**

Option 3 is incorrect: There are multiple views regarding the Chauri-bearer statue's dating and style. According to scholars, the sculpture dates to the **third century BCE** (not third century CE) and is frequently found in pieces of art from the Mauryan era. However, some scholars date it to a later period of the Kushanas and compare it to Mathura Yakshis from the second century CE.

Source: <https://indianculture.gov.in/snippets/didarganj-yakshi>

Q.49) Consider the following statements with reference to the Khajuraho temple complex:

1. The temples of Khajuraho were built by the Chandela Kings in the tenth century.
2. Khajuraho's temples are also known for their extensive erotic sculptures.
3. Temples at Khajuraho are devoted to both Hindu and Jain gods.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer

Khajuraho are a group of temples dating back to the period 950 A.D.-1050 A.D. The Temples of Khajuraho are a magnificent example of the Nagara style of temples as the temples.

Statement 1 is correct: The **temples of Khajuraho made by the Chandela Kings in the tenth century. The Lakshmana temple of Khajuraho**, dedicated to Vishnu, was built in **954** by the **Chandela king, Dhanga**. Khajuraho temples consists of a sanctum, a narrow ante-chamber (antarala), a transept (mahamandapa), additional halls (ardha mandapa), a mandapa or nave and an ambulatory passage (Pradakshina-path) which is lighted by large windows.

Statement 2 is correct: **Khajuraho's temples are also known for their extensive erotic sculptures.** The erotic expression is given equal importance in human experience as spiritual pursuit, and it is seen as part of a larger cosmic whole. Many Hindu temples therefore feature **mithun (embracing couple) sculptures** and it is considered auspicious. Usually, they are placed at the entrance of the temple or on an exterior wall or they may also be placed on the walls between the mandapa and the main shrine.

Statement 3 is correct: There are **many temples at Khajuraho**, most of them **devoted to Hindu gods**. There are **some Jain temples as well** as a **Chausanth Yogini temple**, which is of interest. The main Jain temples includes the Parshvanath Temple around 954 AD, the Ghantai Temple around 960 AD, and the Adinath Temple around 1027 AD. Kandariya Mahadeva is a Hindu temple which is the largest and tallest of the surviving temples at the temple site of Khajuraho.

Q.50) Consider the following statements with reference to Chief of Defence staff (CDS):

1. The serving Lieutenant General can be appointed as CDS.
2. He acts as the military advisor to the Prime Minister on key defence issues.
3. The Department of Defense is headed by the CDS.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 2 only
- d) 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

The Chief of Defence Staff (CDS) will be first among equals among service chiefs. However, in the list of protocol, the CDS will be higher than the service chiefs. The main task of the CDS will be to ensure 'jointmanship' among the three services. This will include powers to work on setting up few theatre commands as well as allocating military assets among the services to synergise their operations, they said.

Statement 1 is correct: The Ministry of Defence has issued a notification amending the rules of defence forces for the appointment of next Chief of Defence Staff (CDS). The amendment to the service rules of the Army, Navy and Air Force will make serving three-star officers and retired three- and four-star officers eligible for appointment as the next CDS. **As per the notification, the government may consider officers who are serving as Lieutenant General equivalent, General equivalent or officers who have retired in the rank of Lt Gen or Gen but have not attained the age of 62 years, for the post of CDS.**

Statement 2 is correct: The Cabinet Committee on Security (CCS) approved the creation of the chief of defence staff (CDS) who will be the single-point military adviser to the government as suggested by the Kargil Review Committee in 1999, **The CDS will also act as a single-point military adviser to the prime minister and defence minister on key defence and strategic issues.**

Statement 3 is incorrect: The Department of Military Affairs which will be created under the defense ministry will be headed by the CDS. He will function as the secretary of the department. **The Department of Defense is headed by the Defense secretary.**

Direction for the following five (5) items:

Read the following **four passages** and answer the items that follow the passages. Your answers to these items should be based on the passages only:

Passage 1

The labyrinthine nature of healthcare systems, as explored by a plethora of erudite scholars, demands a critical examination of the intricate interconnections between biomedical advancements, public health policy, and the ethical considerations that undergird healthcare delivery. At the heart of this convoluted nexus lies the persistent struggle to balance the imperatives of health equity with the exigencies of economic and technological progress. For instance, the rapid advancements in the field of personalized medicine, fueled by the ongoing genomics revolution, have engendered a paradigm shift in our understanding of diseases. While these innovations hold immense promise for the optimization of therapeutic interventions and the reduction of adverse drug reactions, they also raise crucial questions about the equitable distribution of cutting-edge healthcare technologies, as well as the potential exacerbation of existing health disparities. Simultaneously, the global proliferation of non-communicable diseases (NCDs), such as cardiovascular disease and diabetes, necessitates a reevaluation of the traditional models of healthcare delivery. The primacy of preventive care and the emphasis on health promotion strategies must be reconciled with the mounting pressures on healthcare systems to provide comprehensive, cost-effective care in the face of escalating healthcare expenditures and an aging population.

Q.1) On the basis of the passage given above, the following assumptions have been made:

1. Personalized medicine is transforming disease understanding and treatment.
2. Equitable distribution of advanced healthcare technologies is not possible.

Which of the above assumptions is/are valid?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: The passage states that personalized medicine, driven by the genomics revolution, is causing a paradigm shift in our understanding of diseases. This validates the given assumption.

Statement 2 is incorrect: The passage mentions that equitable distribution of advanced healthcare technologies raises "crucial questions," but it does not claim that it is not possible.

Q.2) What is the most logical and essential message of the above-given passage?

- a) Biomedical advancements are sufficient to address global health challenges.
- b) Non-communicable diseases can be effectively managed using existing healthcare models.
- c) The ethical considerations in healthcare delivery have little impact on policy decisions.
- d) Healthcare systems must navigate intricate interconnections and adapt to emerging trends.

Ans) d

Exp) Option d is the correct answer.

The passage emphasizes the complexity of healthcare systems and the need to critically examine the connections between biomedical advancements, public health policy, and ethical considerations. It also discusses the challenges of emerging trends, such as personalized medicine and the rise of non-communicable diseases, suggesting that healthcare systems must adapt to these trends.

Passage 2

Dowry deaths remain a persistent challenge in India despite efforts to prevent them. One of the major challenges is changing cultural attitudes towards dowry. The practice of dowry is deeply ingrained in Indian society and many families believe it is necessary for a successful marriage. Additionally, there is often a lack of support for women who are victims of dowry violence. Many women face stigma and shame if they report abuse or leave their husbands. Furthermore, dowry deaths are often covered up by families and authorities, making it difficult to prosecute those responsible. Another challenge is the ineffective implementation of laws and policies aimed at preventing dowry deaths. Police and judicial officials may be biased against women or may lack the zeal to investigate and prosecute cases.

Q.3) Which of the following statements best reflects the corollary to the passage given above?

- Community based education programs can eliminate dowry deaths.
- One stop centers should be made functional throughout India,
- Stringent laws should be enacted to punish those responsible for dowry deaths.
- Modernisation of the police force can reduce dowry related crimes.

Ans) b

Exp) Option b is the correct answer.

Option a will definitely help in **reducing** incidences of dowry deaths. But this can't eliminate it, as this alone is not the only reason, there are other reasons too. So option a is incorrect.

The passage states that 'Additionally, there is often a lack of support for women who are victims of dowry violence. Many women face stigma and shame if they report abuse or leave their husband'

So definitely One stop centers throughout India will help victims of dowry violence. Hence option b is correct.

In the passage it's stated that 'Another challenge is the ineffective **implementation** of laws and policies aimed at preventing dowry deaths', so implementation is the problem. So enacting new stringent laws is not the next step to prevent dowry deaths. Hence option c is incorrect.

The passage mentions that 'Police and judicial officials may be biased against women or may lack the zeal to investigate and prosecute cases', this implies that the next step should be **sensitisation** of police force, not the modernisation. Hence option d is incorrect.

Passage 3

Cow vigilantism, the act of individuals taking the law into their own hands to punish those who they believe have harmed cows, has become a controversial issue in India in recent years. While cow protection has long been an important aspect of Hindu culture, the rise of vigilantism has led to violent clashes between different religious groups and raised concerns about the rule of law and the safety of minority communities. In many cases, those accused of cow-related crimes are subjected to vigilante justice before being given a fair trial, leading to a breakdown in the criminal justice system. The issue has also become politicized, with some political parties and leaders using cow protection as a means of gaining support from certain communities.

Q.4) Which of the following statements best reflect the rational, plausible and practical implications that can be derived from the passage given above ?

- Vigilantism is defeating the criminal justice system in India.
- All the political parties utilize religion to fulfill their own political goals.
- Minorities in India are vulnerable to religious clashes.
- Cow protection is sacrosanct to Hindu religion.

Select the correct answer using the code given below:

- a) 2 and 4 only
- b) 1 and 3 only
- c) 1 and 2 and 3 only
- d) 3 and 4 only

Ans) b

Exp) Option b is the correct answer.

The passage states that ‘In many cases, those accused of cow-related crimes are subjected to vigilante justice before being given a fair trial, leading to a breakdown in the criminal justice system’ so this implies that Vigilantism is defeating the criminal justice system in India. Hence statement 1 is correct.

In the passage it’s mentioned that “some” political parties and leaders are using cow protection as a means of gaining support from certain communities. But from this we can’t imply that “all” political parties utilize religion to fulfill their goals Hence statement 2 is incorrect.

The passage states that ‘the rise of vigilantism has led to violent clashes between different religious groups and raised concerns about the rule of law and the safety of minority communities’. It implies that ‘Minorities in India are vulnerable to religious clashes’. Hence statement 3 is correct.

In the passage it’s mentioned that ‘cow protection has long been an important aspect of Hindu culture,’ but from this we can’t imply that it is sacrosanct. Hence statement 4 is incorrect.

Passage 4

Judicial activism refers to the practice of judges using their power to interpret the law in ways that promote social justice and protect individual rights. In India, judicial activism has been a significant force in promoting progressive social change and holding the government accountable for its actions. Some examples of judicial activism in India include the Supreme Court’s decisions to recognize the right to privacy as a fundamental right, strike down discriminatory laws, and order investigations into cases of corruption and human rights abuses. However, critics argue that judicial activism can undermine the separation of powers between the judiciary and the executive, as well as lead to an overly politicized judiciary. Despite these criticisms, judicial activism remains an important tool for promoting justice and ensuring accountability in India.

Q.5) Based on the passage above following assumptions have been made:

1. Judiciary is the one holding the government accountable.
2. India is not immune to human rights violations.
3. Separation of power between judiciary and executive is quite important.
4. Politicization of the judiciary is not good.

Which of the above is/are valid assumptions?

- a) 2 only
- b) 1, 3 and 4 only
- c) 3 and 4 only
- d) 1, 2, 3 and 4 only

Ans) a

Exp) Option a is the correct answer.

The passage states that ‘judicial activism has been a significant force in promoting progressive social change and holding the government accountable for its actions’, so definitely through judicial activism the government is being held accountable but it is “not the only one” holding the government

accountable. Statement 1 assumes that “judiciary is the one”, which is incorrect. Hence statement 1 is invalid assumption.

The passage mentions that through judicial activism, the judiciary has ordered investigations into human rights abuses. So it assumes that there are human rights violations in India. Hence statement 2 is a valid assumption.

The passage states that ‘critics argue that judicial activism can undermine the separation of powers between the judiciary and the executive, as well as lead to an overly politicized judiciary’, this is argument of certain people, this is not a stated fact or an assumption in any manner, hence statement 3 and 4 are invalid assumptions.

Q.6) In the Lok Sabha elections, there are only two candidates, X and Y, contesting from the Central Delhi seat. $\frac{3}{5}$ of the people promised to vote for X, and the rest promised to vote for Y. 15% of the people, who promised to vote for X, and 20% of the people, who promised to vote for Y, did not vote at all. If Y got 4800 votes, how much was the margin of victory for X?

- a) 4200
- b) 3000
- c) 2850
- d) 3800

Ans) c

Exp) Option c is the correct answer.

Let the total votes = v

People who promised to vote for X = $\frac{3}{5}$ of v

People who actually voted for X = $\frac{3}{5}$ of v – 15% of $(\frac{3}{5}$ of v) = $(\frac{51v}{100})$

People who promised to vote for Y = $\frac{2}{5}$ of v

People who actually voted for Y = $\frac{2}{5}$ of v – 20% of $(\frac{2}{5}$ of v) = $(\frac{32v}{100})$

Now according to the question, $(\frac{32v}{100}) = 4800$

Solving we get v = 15000

Margin of victory = $(\frac{51v}{100}) - (\frac{32v}{100}) = (\frac{19v}{100})$

Putting v = 15000, we get: Margin of victory = $(\frac{19v}{100}) = (\frac{19 \times 15000}{100}) = 2850$ votes

Q.7) A recipe requires 227 grams of ghee and 397 grams of flour. While making the recipe 227 grams of ghee is added, now if the chef accidentally pours in 595 grams of flour, how many more grams of ghee should be added?

- a) 340 gm
- b) 113 gm
- c) 104 gm
- d) 240 gm

Ans) b

Exp) Option b is the correct answer.

The ratio of ghee to flour in the original recipe is 227:397.

If the chef accidentally pours in 595 grams of flour,

we can use the ratio to find out how many grams of ghee should be added.

Since the ratio of ghee to flour is 227:397, for every 397 grams of flour, there should be 227 grams of ghee.

So for 595 grams of flour, there should be $(\frac{227}{397}) \times 595 = 340$ grams of ghee.

Since the chef has already added 227 grams of ghee,

they should add an additional $340 - 227 = 113$ grams of ghee to maintain the ratio in the recipe.

Q.8) What is the largest integer n such that 2^n is a factor of 20^8 ?

- a) 2
- b) 4
- c) 8
- d) 16

Ans) d

Exp) Option d is the correct answer.

To find the largest integer n such that 2^n is a factor of 20^8 , we need to first find the prime factorization of 20^8 :

$$20 = 2^2 * 5^1$$

Thus,

$$\Rightarrow 20^8 = (2^2 * 5^1)^8$$

$$\Rightarrow 20^8 = (2^{16} * 5^8)$$

Now, since we are looking for the largest integer n such that 2^n is a factor of 20^8 .

Since the maximum power of 2 in the prime factorization of 20^8 is 2^{16} , the largest value of n is 16.

Thus, the largest integer n would be 16 where 2^n is a factor of 20^8

Q.9) In a Printing competition three teams take part to print maximum numbers of pages. Consider the two statement and a question:

Statement-1: The first team and the third team print twice as much as the second team prints.

Statement-2: The second team and third team print three times as much as the first team prints.

Question: Which team wins the competition?

Which one of the following is correct in respect of the Statement and the Question?

- a) Statement-1 alone is sufficient to answer the Question.
- b) Statement-2 alone is sufficient to answer the Question.
- c) Both Statement-1 and Statement-2 are required to answer the Question.
- d) Neither Statement -1 alone nor Statement-2 alone is sufficient to answer the Question.

Ans) c

Exp) Option c is the correct answer.

Output of 1st team be A

Output of second team be B

Output of third team be C

Statement-1: The first team and the third team print twice as much as the second team prints.

$$A+C = 2B$$

This does not give us which team printed maximum.

So, Statement-1 alone is not sufficient to answer the Question.

Using Statement-2: The second team and third team print three times as much as the first team prints.

$$B + C = 3A$$

This does not give us which team printed maximum.

So, Statement-2 alone is not sufficient to answer the Question.

Using both Statements:

$$A+ C = 2B \text{ ---(1) and } B+C = 3A \text{---(2)}$$

$$C = 2B- A \text{ put this in equation (2)}$$

$$B+ 2B -A = 3 A \Rightarrow 3B = 4A \Rightarrow B = 4A/3 \text{---(3)}$$

Put this in equation (2)

$$C = 2(4A/3) -A = 8A/3 - A \Rightarrow C = 5A/3 \text{----(4)}$$

Now, $B = 4A/3$

$C = 5A/3$

So, the value of C is the highest. Hence C printed the maximum number of pages and won the competition.

Both Statement-1 and Statement-2 are required to answer the Question.

Q.10) N is a natural number. Consider the two Statements and a Question:

Statement-1: When N is divided by 100, the remainder obtained is 2.

Statement-2: Total number of factors of number N is odd.

Question: Is N a perfect square ?

Which one of the following is correct in respect of the Statement and the Question?

- a) Statement-1 alone is sufficient to answer the question
- b) Statement -2 alone is sufficient to answer the question
- c) Either Statement-1 alone or Statement -2 alone is sufficient to answer the question
- d) Neither Statement-1 alone nor Statement -2 alone is sufficient to answer the question

Ans) c

Exp) Option c is the correct answer.

Statement-1: When N is divided by 100, the remainder obtained is 2.

Implies the unit digit of the number is 2. So, in this condition N is not a square, because for no perfect square, the unit digit is 2.

Hence Statement-1 alone is sufficient to answer the question.

Statement-2: Total number of factors of number N is odd.

This is a rule in mathematics, that the number of factors of a perfect square is always odd and vice versa. Hence Statement -2 alone is sufficient to answer the question.

Conclusion: Either Statement-1 alone or Statement -2 alone is sufficient to answer the question.

Q.11) Seven friends, A, B, C, D, E, F, and G go to a cinema hall to watch a movie, all these friends sit in the first, second and third row in a certain manner:

At least two friends sit in each row.

There is at least one female in each row.

C a female doesn't sit with A, E and D.

F sits with only his best friend B.

A sits with his best friend in the first row.

G sits in the third row. And E is the brother of C.

How many females are there in the group?

- a) 3
- b) 4
- c) 5
- d) Can't be determined

Ans) d

Exp) Option d is the correct answer.

Step 1: A sits with his best friend in the first row and G sits in the third row.

Step 2: given F sits with only his best friend B. Implies the row in which F sits, no one else sits other than B. So, it has only two people on that row. Such a row left is 2nd.

Step 3: C a female doesn't sit with A, E and D. So, C can't sit in 1st row and given in row 2nd only two people sit, G can't sit in 2nd row too. So, she has to sit in 3rd row.

Hence E and D will be seated in 1st row.

Given, A sits with 'his' best friend, so A is a male.

F sits with 'his' best friend, so F again is a male.

Given, in each row a female sits so, B has to be a female ---(1)

Given, E is the brother of C, so in 1st row both A and E are male, so D has to be female.--(2)

Given C is a female --(3)

So now we know that for sure, C, and D are female. But we don't know about G. She can be a male or female. Hence number of female can't be determined.

Row	Person
1st	A, E, D
2nd	F, B
3rd	G, C

Q.12) In an apartment there are eleven floors plus the ground floor. 8 people get into the lift of the building on the ground floor. The lift doesn't stop on the first floor. The number of people who get down on the three floors are 1, 3 and 4 (not in the same order). These sets of 1, 3 and 4 people get down on different floors. Find the number of ways in which they can do so ?

- a) 62040
- b) 64000
- c) 50400
- d) 201600

Ans) d

Exp) Option d is the correct answer.

Total floors =11

Since they don't get down on 1st floor, so the total number of floors on which they can get down is 10.

We have to select three floors on which this set of people will get down: this can be done in $C(10,3)$ ways and these floors can be shuffled among themselves in $3!$ Ways. ---(1)

Total number of people =8

Choosing set of 4 people who will be getting down on one floor = $C(8,4)$ ---(2)

Remaining people = 4

Choosing set of 3 people who will be getting down on another floor = $C(4,3)$ ---(3)

Remaining people = 1

Choosing set of 1 people who will be getting down on another floor= $C(1,1)$ ---(4)

Now the number of ways in these set of people can get down on different floors=

product of (1), (2), (3), (4) = $C(10,3) \times 3! \times C(8,4) \times C(4,3) \times C(1,1) = 2,01,600$

Q.13) Following is a matrix of certain entries. The entries follow a certain trend row-wise. Choose the missing entry (?) accordingly.

17A	19C	16F
240K	240R	240C
7P	?	4D

- a) 16 F
- b) 11G

- c) 10 S
d) 48 E

Ans) b

Exp) Option b is the correct answer.

The second row digit is $(1st\ row)^2 - (3rd\ row)^2$

That is $(17)^2 - 7^2 = 240$

$(16)^2 - 4^2 = 240$

So, $(19)^2 - x^2 = 240$

$x = 11$

The difference between the two alphabets is consecutive prime numbers.

$A+2 = C, C+3 = F, F+5=K, K+7=R, R+11=C, C+13=P, P+17=G, G+23=D$

Q.14) For the given expression $(83)^{261}$, what will be the remainder when it will be divided by 17?

- a) 15
b) 9
c) 8
d) 2

Ans) d

Exp) Option d is the correct answer.

Expression : $\{(83)^{261}\}/17$

Step 1: Find the remainder for $83/17$. It's 15.

Step 2: $\{(15)^{261}\}/17 = \{(-2)^{261}\}/17$ (Since $15/17$ gives remainder -2)

Now break the power of 2: $\{(-2)^4\}^{65}/17 \times (-2)/17 \Rightarrow$ since $(-2)^4 = 16$,

So $\{(16)^{65}\}/17 \times (-2)/17 = (-1) \times (-2) = 2$. (Since $16/17$ will give remainder -1)

Note: for such types of questions the aim should be to break the expression in such a way that we get a convenient remainder of -1, -2 or -3.

Q.15) In the Blue Diamond motel, 42 friends were staying for a vacation. Few days later 13 more friends joined in. Due to the entry of 13 new friends, the expenses of the motel went up by Rs31 per day while the average expenditure per head diminished by Rs3. What was the original expenditure of the motel ?

- a) 583
b) 623
c) 633
d) 563

Ans) c

Exp) Option c is the correct answer.

Let the expenditure be Rs x per head, of the motel when 42 friends were staying.

Total expenditure = Rs $42x$ ---- (1)

When 13 new friends joined in,

(a) Total expenditure went up by Rs 31 per day, so new total expenditure = Rs $(42x + 31)$ ---- (2)

(b) Average expenditure diminished by Rs 3 per head., so new average expenditure = $(x-3)$

(c) New total expenditure = $(42+13)(x-3) = 55(x-3)$ ---- (3)

Equating (2) and (3)

$42x + 31 = 55(x-3)$

$X = 15.07$

Original expenditure of motel = $15.07 \times 42 = 633.23$

SFG 2023 | LEVEL 2 | Test #39 – Solutions (CSAT) | ForumIAS

Q.16) A company sells two types of products, A and B. In a week, they sold 60 units of product A at ₹80 each and 40 units of product B at ₹120 each. The following week, they sold 50% more units of product A and 25% fewer units of product B. What is the average cost of the products sold over the two weeks?

- a) ₹92.73
- b) ₹96.25
- c) ₹97.50
- d) ₹98.33

Ans) a

Exp) Option a is the correct answer.

Total revenue and units sold in the first week:

Product A: 60 units * ₹80 = ₹4800

Product B: 40 units * ₹120 = ₹4800

Total revenue: ₹4800 + ₹4800 = ₹9600

Total units sold: 60 + 40 = 100

Total revenue and units sold in the second week: (50% more of Product A and 25% less of Product B)

Product A: 60 units * 1.5 = 90 units; 90 units * ₹80 = ₹7200

Product B: 40 units * 0.75 = 30 units; 30 units * ₹120 = ₹3600

Total revenue: ₹7200 + ₹3600 = ₹10800

Total units sold: 90 + 30 = 120

Total revenue and units sold over the two weeks:

Total revenue: ₹9600 (week 1) + ₹10800 (week 2) = ₹20400

Total units sold: 100 (week 1) + 120 (week 2) = 220

The average cost of the products sold over the two weeks:

Average cost = Total revenue : Total units = ₹20400 : 220 = ₹92.73

Q.17) Three employees, Alok, Bhavesh, and Chetan started a project together with an effort of 10%, 30%, and 60% respectively. Chetan is the project lead and gets a 15% bonus from the project earnings. The remaining profit is shared among the three employees in the ratio of their efforts put into the project. If the total profit earned is Rs. 1,00,000, find out the difference between the total amount received by Bhavesh and Chetan.

- a) Rs. 40,500
- b) Rs. 64,000
- c) Rs. 74,000
- d) Rs. 90,000

Ans) a

Exp) Option a is the correct answer.

The total effort put in by all three employees is 10%+30%+60% = 100%

Chetan gets a 15% bonus from the project earnings, so the bonus amount received by Chetan = 15% × 1,00,000 = Rs. 15,000

The remaining profit is Rs. 1,00,000 - Rs. 15,000 = Rs. 85,000

The profit of Rs. 85,000 is shared among the three employees in the ratio of their efforts put in the project.

Ratio of their efforts put in the project = 10% : 30% : 60% = 1:3:6.

Amount received by Alok = (1/10) × 85,000 = Rs. 8,500

Amount received by Bhavesh = (3/10) × 85,000 = Rs. 25,500

Amount received by Chetan = (6/10) × 85,000 = Rs. 51,000

SFG 2023 | LEVEL 2 | Test #39 – Solutions (CSAT) | ForumIAS

The total amount received by Chetan is the sum of his bonus and his share of profit, which is Rs. 15,000 + Rs. 51,000 = Rs. 66,000

The difference between the amount received by Bhavesh and Chetan is Rs. 25,500 - Rs. 66,000 = Rs. -40,500

Therefore, Chetan received Rs. 40,500 more than Bhavesh.

Q.18) Reema decided to have a race on her bicycle. Reema rides at a constant speed of 10 km/h. She starts their race from point A, and the target is to reach point B, which is 60 km away. However, 30 minutes into the race, Reema realizes she left her water bottle at point A and decides to go back to get it. After retrieving the water bottle, she immediately resumes the race towards point B. How much time will it take for Reema to reach point B?

- a) 7.5 hours
- b) 6 hours
- c) 7 hours
- d) 6.5 hours

Ans) c

Exp) Option c is the correct answer.

- ⇒ Reema rides at a constant speed of 10 km/h.
- ⇒ In the first 30 minutes (or 0.5 hours) of the race, she covers a distance of $10 \text{ km/h} \times 0.5 \text{ h} = 5 \text{ km}$.
- ⇒ After going back to point A to retrieve her water bottle, she has to cover the initial 5 km again plus the remaining 60 km to reach point B. So in total, she has to cover a distance of $5 \text{ km} + 55 \text{ km} = 65 \text{ km}$.
- ⇒ At a constant speed of 10 km/h, it will take her $65 \text{ km} / (10 \text{ km/h}) = 6.5 \text{ hours}$ to reach point B from the moment she realizes she left the water bottle.
- ⇒ Adding the initial 30 minutes (or 0.5 hours) to this time, it will take Reema a total of $6.5 \text{ h} + 0.5 \text{ h} = 7 \text{ hours}$ to reach point B from the start of the race.

Q.19) What number should replace the question mark?

1, 2, 5, 10, 13, ?, 29

- a) 21
- b) 23
- c) 25
- d) 26

Ans) d

Exp) Option d is the correct answer.

The series is following the pattern of the digit multiplied by 2 and the next digit with addition of 3 consecutively to get the next numbers in the series. We can see it as follows:

- ⇒ $1 \times 2 = 2$
- ⇒ $2 + 3 = 5$
- ⇒ $5 \times 2 = 10$
- ⇒ $10 + 3 = 13$

Hence

- ⇒ $13 \times 2 = 26$
- ⇒ $26 + 3 = 29$

Passage 2

The vast, mysterious realm of the ocean harbors an astonishing variety of creatures, many of which exhibit unique characteristics that enable them to thrive in their underwater habitats. From the tiniest plankton to the largest whales, each species has adapted to its ecological niche, performing a role in the intricate web of marine life. In the depths, where sunlight barely penetrates, bioluminescent organisms create their own light, illuminating their surroundings and attracting prey. Others possess specialized sensory organs, detecting subtle changes in their environment to locate food or avoid predators. Coral reefs, often referred to as the rainforests of the sea, serve as vibrant hubs of biodiversity. A kaleidoscope of fish, invertebrates, and other marine species coexist in these fragile ecosystems, relying on one another for sustenance and protection. Symbiotic relationships, such as those between clownfish and sea anemones, exemplify the delicate balance and interdependence that exist in these underwater communities. As the tides ebb and flow, the ceaseless rhythms of the ocean shape and sustain the lives of its inhabitants, providing a complex tapestry of interconnected relationships in this fascinating underwater world.

Q.22) On the basis of the passage given above, the following assumptions have been made:

1. Adaptations in marine organisms are crucial for their survival.
2. The marine life is immune to environmental changes.

Which of the above assumptions is/are valid?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: This assumption is valid because the passage extensively discusses the variety and complexity of marine life. It mentions the different sizes and roles of marine species, from plankton to whales, and their adaptations to their ecological niches. Furthermore, the passage highlights the intricate web of marine life, the existence of coral reefs as vibrant hubs of biodiversity, and the delicate balance and interdependence of underwater communities. All of these points support the assumption that the ocean environment is diverse and complex.

Statement 2 is incorrect: This assumption is invalid because the passage does not address the topic of environmental changes or external threats, such as climate change or pollution. It focuses on describing the diversity, adaptations, and relationships within marine ecosystems. By not mentioning how marine life might be affected by external factors, it leaves room for the possibility that these organisms could be vulnerable to environmental changes or threats. The passage does not claim or imply that marine life is immune to such challenges.

Q.23) Which is the most logical corollary that can be drawn from the above passage?

- a) The various inhabitants of marine ecosystems thrive independently.
- b) The resiliency of marine ecosystems is solely dependent on the geographical location and depth of the habitat.
- c) There is limited variation in species and ecological relationships of marine organisms.
- d) The symbiotic interactions of marine species facilitate the flourishing of intricate underwater communities.

Ans) d

Exp) Option d is the correct answer.

The passage discusses the unique characteristics and adaptations of various marine species that enable them to survive in their underwater habitats. It also highlights the importance of symbiotic relationships, such as those between clownfish and sea anemones, which demonstrate the delicate balance and interdependence within underwater communities. These points together suggest that the adaptability and interdependence of marine life contribute to the rich and complex nature of ocean ecosystems.

Passage 3

In the crucible of rural India, a mélange of intricate social, economic, and political forces converge, forging an entwined tapestry of adversity and potential. The agrarian fulcrum upon which the nation's fortunes precariously hinge has been beleaguered by myriad challenges, including the burgeoning specter of climate change, the vicissitudes of market forces, and the pervasive dearth of technological innovation. These forces conspire to perpetuate a cycle of deprivation, with smallholder farmers ensnared in the quagmire of indebtedness and subsistence. To extricate the rural populace from this conundrum, it is incumbent upon policymakers to cultivate a paradigm shift, wherein the agricultural sector is reimagined as a dynamic engine of growth rather than a vestige of stagnation. This transformative vision necessitates the integration of modern agronomic practices, the establishment of robust value chains, and the revitalization of rural institutions that serve as custodians of social capital. Furthermore, the empowerment of rural women as agents of change, the promotion of sustainable resource management, and the prioritization of skill development are pivotal to fostering a more equitable and prosperous rural landscape. As the tectonic plates of India's socio-economic landscape undergo a seismic shift, it is imperative that the nation's rural underpinnings are fortified, lest the edifice of progress crumble under the weight of unfulfilled potential.

Q.24) What is the most logical and rational inference of the above passage?

- Rural India's prosperity is entirely dependent on the success of the agricultural sector.
- Policymakers must take transformative actions to unlock the potential of rural India.
- The agricultural sector should rely on traditional practices and institutions for sustainable production.
- Extending interest-free credit to women and farmers would aid in rural development.

Ans) b

Exp) Option b is the correct answer.

The passage discusses the various challenges faced by the rural agricultural sector in India and emphasizes the need for a paradigm shift in the way the agricultural sector is viewed. It suggests that policymakers should take transformative actions, such as modern agronomic practices, robust value chains, and revitalization of rural institutions, to unlock the potential of rural India.

Q.25) Which of the following measures are emphasized in the passage as essential for fostering a more equitable and prosperous rural landscape?

- Improvement in infrastructure
- Participative decision-making
- Credit-extension to Small enterprises

Select the correct answer using the code given below:

- 2 only
- 3 only
- 1 and 2 only
- 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The passage does mention the need for a transformative vision that includes the integration of modern agronomic practices, establishment of robust value chains, and revitalization of rural institutions. These elements can be linked to the "improvement in infrastructure", as they would require advancements in infrastructure to support such changes. Additionally, the passage emphasizes the empowerment of rural women and the revitalization of rural institutions, which can be associated with "participative decision-making". However, the passage does not explicitly mention credit-extension to small enterprises.

Passage 4

As a society, we tend to prioritize productivity above all else. The relentless pursuit of efficiency has become a badge of honor, a measure of our worth as individuals. We wake up early, work long hours, and sacrifice our personal lives in the name of progress. But at what cost? Are we really happier and healthier for it? The truth is that our obsession with productivity is not only misguided, but it's also unendurable. We cannot continue to push ourselves to the brink of exhaustion without paying a heavy price. We need to recognize that productivity is not the end goal, but rather a means to an end. It's a tool we use to achieve our goals, but it shouldn't come at the expense of our well-being. We need to shift our focus from doing more to doing better, from quantity to quality, from output to outcome. Only then can we truly thrive as individuals and as a society.

Q.26) Based on the passage following assumptions have been made:

1. Society values productivity more than personal well-being.
2. Doing better is more important than doing more.
3. Pursuing productivity is unsustainable.
4. The pursuit of productivity leads to exhaustion.

Which of the above assumptions is/are valid?

- a) 1, 2 and 3 only
- b) 2 and 4 only
- c) 1 and 3 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

The passage argues that society tends to prioritize productivity above all else, which implies that productivity is valued more highly than personal well-being. Hence Statement 1 is a valid assumption. Statement 2 is a suggestion as it's stated that 'We need to shift our focus from doing more to doing better'. Hence statement 2 is not a valid assumption.

In the passage it's stated that 'The truth is that our obsession with productivity is not only misguided, but it's also unendurable', hence it assumes that 'Pursuing productivity is unsustainable'. So statement 3 is a valid assumption.

The passage states that 'We cannot continue to push ourselves to the brink of exhaustion without paying a heavy price', it nowhere assumes that pursuit of productivity leads to exhaustion. Hence statement 4 is not a valid assumption.

Passage 5

Brexit, the UK's withdrawal from the European Union (EU), remains a contentious issue. One of the key issues at stake is the future of trade between the UK and the EU. The UK's decision to leave the EU has already had a significant impact on trade. The negotiations have been complex with disagreements over

issues such as the Irish border and access to the EU single market. UK had decided to leave the EU as the UK's contribution to the EU's budget was not proportionate to the benefits it got. The social welfare expenditure on the Britons was declining and the immigration from the EU had contributed to loss of jobs among Britons. As Brexit unfolds, the UK faces significant challenges in terms of economic growth and trade. The country's ability to negotiate favorable trade deals with other nations outside of the EU will be critical to its future success.

Q.27) Which one of the following is the most logical and rational inference that can be made from the above passage?

- a) The continuity of trade of UK with EU's single market is vital for UK's economy
- b) UK should finalize trade deals with nations outside EU for its economic revival.
- c) Stopping immigration from the EU will create more jobs for Britons.
- d) Greater proportion of the budget can be utilized for the social welfare of Britons.

Ans) a

Exp) Option a is the correct answer.

The passage emphasizes that 'One of the key issues at stake is the future of trade between the UK and the EU. The UK's decision to leave the EU has already had a significant impact on trade'. It implies that continuity of trade with the EU single market is vital for the UK's economy. So, this is the most logical and rational inference that can be made from the above passage. Hence option a is correct.

The passage mentions that 'The country's ability to negotiate favorable trade deals with other nations outside of the EU will be critical to its future success'. It nowhere indicates economic revival, hence option b is incorrect.

The passage states that the UK decided to leave the EU as immigration from the EU had contributed to loss of jobs for Britons, but it can't be inferred that 'Stopping immigration from the EU will create more jobs for Britons.' As creation of jobs depends on several other factors, hence option c is incorrect.

The passage mentions that 'the social welfare expenditure on Britons was declining' but it can't be inferred that 'Greater proportion of the budget can be utilized for the social welfare of Britons'. Hence option d is incorrect.

Passage 6

The high levels of non-performing assets (NPAs) in the Indian banking sector can be attributed to several factors. One significant reason is weak corporate governance, which has led to a lack of accountability and transparency in the management of companies. In addition, the economic slowdown has contributed to the problem, as many companies have been unable to repay their loans due to declining revenues. The lack of infrastructure and regulatory challenges have also played a role, as businesses have struggled to access capital and finance their operations. Another factor is the prevalence of fraud and corruption, which has led to loans being granted to unscrupulous borrowers who have no intention of repaying them. The consequences of this problem are significant, with banks struggling to lend and the economy suffering as a result. To address this issue, stricter regulations and better corporate governance practices are needed, along with greater transparency and accountability in the management of companies.

Q.28) Which one of the following statements best reflects the most logical, rational and practical suggestion implied by the passage given above?

- a) The Indian government should provide loans to companies to help them repay their existing debt.
- b) Regulatory agencies should be instituted for better monitoring of the banking sector.
- c) Adopting a zero tolerance policy against corruption will prevent loan frauds.
- d) Good corporate governance practices should be made mandatory for the banking sector.

Ans) d

Exp) Option d is the correct answer.

The passage mentions that ‘many companies have been unable to repay their loans due to declining revenues’, but providing them more loans can never be a viable solution to NPA. Hence option a is incorrect.

The passage stated that the lack of infrastructure and regulatory challenges have also played a role, but it does not mean that new regulatory agencies have to be instituted. It can also mean that existing regulatory institutions have failed to regulate the banking sector, so instituting regulatory agencies is not the most logical, rational and practical suggestion. Hence, option b is incorrect.

The passage mentions that ‘Another factor is the prevalence of fraud and corruption, which has led to loans being granted to unscrupulous borrowers who have no intention of repaying them’, it implies that corruption has led to wilful defaulters. So adopting a zero tolerance policy against corruption will prevent loan frauds, so this is a suggestion but not the most logical, rational and practical suggestion implied by the passage. Hence option c is incorrect.

The passage states that ‘One significant reason is weak corporate governance, which has led to a lack of accountability and transparency in the management of companies’, hence making good corporate governance practices mandatory will help in resolving many issues as it will prevent corruption too. So, this is the most logical, rational and practical suggestion implied by the passage. Hence option d is correct.

Passage 7

In the vast and unpredictable universe, there exists an intricate balance of forces that govern the motion of celestial bodies. From the smallest particles to the largest galaxies, everything is in constant motion, affected by gravity, electromagnetism, and other fundamental forces. Scientists have spent decades trying to understand these forces and their interplay, but the deeper they delve, the more complex the picture becomes. The universe is not a simple machine that can be understood with a few equations; rather, it is a living, breathing organism that defies easy explanation. Yet, in this chaos, there is also beauty. The swirling colors of a nebula, the graceful dance of a binary star system, and the mysterious dark matter that holds everything together - these are just a few of the wonders that await those who dare to explore the universe.

Q.29) Which of the following statements best reflects the crux of the passage given above?

- a) The universe is a complex gizmo that can be appreciated with intertwined explanations.
- b) The universe is a contrast of complex forces and alluring wonders.
- c) Decades of studies have not helped considerably to decode fundamental forces.
- d) Exploring the universe will expose you to magnificent mysteries.

Ans) b

Exp) Option b is the correct answer.

The passage states that ‘The universe is not a simple machine that can be understood with a few equations; rather, it is a living, breathing organism that defies easy explanation’, so option a is an aspect of the universe which is being discussed in the passage, but this is not the crux of the passage. Hence option a is incorrect.

The first half of the passage discusses the vastness and complexity of the universe, and the second half of the passage discusses the hidden beauties. So, option b rightly reflects the crux of the passage. Hence option b is correct.

SFG 2023 | LEVEL 2 | Test #39 – Solutions (CSAT) | 

In the passage it's mentioned that the deeper the scientist delves to understand the forces the more complex it becomes, but from this we can't conclude that studies have not helped to decode the fundamental forces. Hence option c is incorrect.

The last part of the passage mentions about the beauties hidden in the universe, so this is just one aspect being discussed, this is not the crux. Hence option d is incorrect.

Q.30) In a certain code language, if "ELEPHANT" is written as " GJGNJYPR", "COMPUTER" is written as "EMONWRGP", then in the same code language, "KNOWLEDGE" will be written as:

- MLQUNCFEG
- MJUQNGBIL
- NKUONGAIL
- MJUQNGAIL

Ans) a

Exp) Option a is the correct answer.

Alphabets and their positions

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26

ELEPHANT -> GJGNJYPR

COMPUTER -> EMONWRGP

It appears that a pattern is used where each letter in the given word is replaced by another letter in the alphabet based on its position (odd or even).

⇒ For odd-positioned letters, the replacement letter is two positions ahead of the alphabet.

⇒ And for even-positioned letters, the replacement letter is two positions behind the alphabet

- E(5) -> G(7)
- L(12) -> J(10)
- E(5) -> G(7)
- P(16) -> N(14)
- H(8) -> J(10)
- A(1) -> Y(25)
- N(14) -> P(16)
- T(20) -> R(18)

And

- C(3) -> E(5)
- O(15) -> M(13)
- M(13) -> O(15)
- P(16) -> N(14)
- U(21) -> W(23)
- T(20) -> R(18)
- E(5) -> G(7)
- R(18) -> P(16)

Now, if we apply the same pattern to the word "KNOWLEDGE":

- K(11) -> M(13)
- N(14) -> L(12)
- O(15) -> Q(17)
- W(23) -> U(21)
- L(12) -> N(14)

- 6) E(5) -> C(3)
 7) D(4) -> F(6)
 8) G(7) -> E(5)
 9) E(5) -> G(7)

So, in the same code language, "KNOWLEDGE" will be written as "MLQUNCFEG".

Q.31) Priya is Arjun's cousin. Shweta is sister-in-law of Akash who is not married. Anjali is the mother of Veer. Rohit is the brother of Akash. Rohit is Priya's uncle. Anjali is the grandmother of Arjun who is the son of Rohit. Shweta is the wife of Veer. How is Anjali related to Shweta?

- a) Aunt
 b) Sister
 c) Mother-in-law
 d) Mother

Ans) c

Exp) Option c is the correct answer.

Vertical lines denotes a generation change

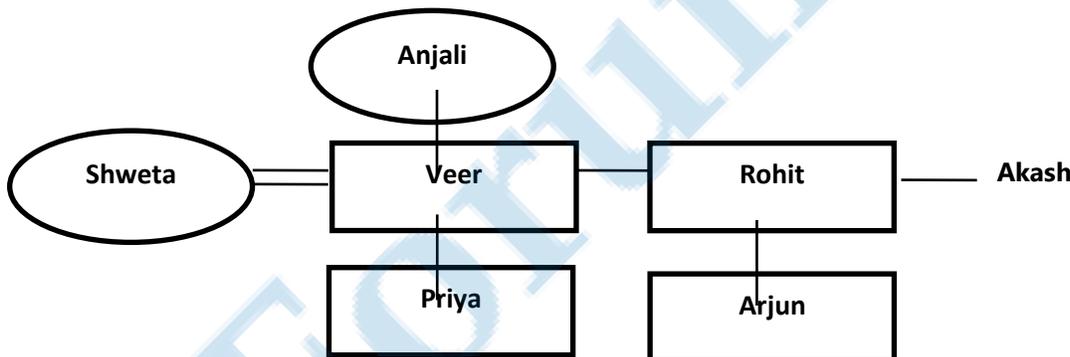

Horizontal lines denotes siblings

Oval represents female

rectangles represents male

and two horizontal line represent married couple

We can draw the following diagram from the given info:

This clearly shows Anjali is Mother-in-law of Shweta.

Q.32) The clock at Tower Chowk Bhopal is set right at 12 noon on Monday. It loses $\frac{1}{2}\%$ on the correct time in the first week but gains $\frac{1}{4}\%$ on the true time during the second week. What will be the time shown on Monday after two weeks ?

- a) 12:25:12
 b) 11:34:48
 c) 12:50:24
 d) 12:24:16

Ans) b

Exp) Option b is the correct answer.

In one week there are $24 \times 7 = 168$ hours.

So, the clock loses $\frac{1}{2}\%$ (0.5%) in the first 168 hours.

It gains $\frac{1}{4}\%$ (0.25%) in the next 168 hours.

So it loses $(0.50 - 0.25 = 0.25\%)$

So total time lost is 0.25% of $168 = 21/50$ hours = $(21/50) \times 60$ minutes = $25 + (1/5) = 25$ minutes 12 seconds.

The time shown on Monday after two weeks will be 25 minutes 12 seconds less than 12.

That is 11:34:48

Q.33) There are four inlets to Bhakra Nangal Dam. When the first three inlets are opened, the dam can be filled in 12 minutes. When the second, third and fourth inlets open it can be filled in 15 minutes. And when the first and fourth inlets are opened, the dam can be filled in 20 minutes. How much time will it take to fill up the dam when all the four inlets are opened?

- a) 10 minutes
- b) 12 minutes
- c) 8 minutes
- d) 30 minutes

Ans) a

Exp) Option a is the correct answer.

let the first inlet fills up the dam in A minutes. In 1 minute it fills $1/A$

Second inlet fills up in B minutes, In 1 minute it fills $1/B$

Third inlet in C minutes. In 1 minute it fills $1/C$

And fourth inlet in D minutes. In 1 minute it fills $1/D$

In 12 minutes the first three inlets fill the tank : so the capacity of tank filled in 1 minute = $1/12$

$$\Rightarrow (1/A) + (1/B) + (1/C) = 1/12 \text{ ----(1)}$$

In 15 minutes the second, third and fourth inlets fill the tank : so the capacity of tank filled in 1 minute = $1/15$

$$\Rightarrow (1/B) + (1/C) + (1/D) = 1/15 \text{ ----(2)}$$

In 20 minutes the first and fourth inlet fill the tank : so the capacity of tank filled in 1 minute = $1/20$

$$\Rightarrow (1/A) + (1/D) = 1/20 \text{ ----(3)}$$

Subtracting (1) and (2),

$$(1/A) - (1/D) = (1/12) - (1/15) = 1/60 \text{ ----(4)}$$

Solving (3) and (4),

We get $A = 30$ minutes, $D = 60$ minutes

Put the value of A in equation (1):

$$(1/30) + (1/B) + (1/C) = 1/12$$

$$(1/B) + (1/C) = (1/20) \text{ -----(5)}$$

Now using equation (3) and (4):

$$(1/A) + (1/B) + (1/C) + (1/D) = (1/20) + (1/20) = 1/10$$

Implies all of the four inlets opened together, in one minute fill $1/10$ of the tank.

So, all the four inlets opened together will fill the tank in 10 minutes.

Q.34) A solid metal sphere is melted and the smaller spheres of equal radii are formed. 10% of the volume of the sphere is lost in the process. The smaller spheres have a radius that is one by ninth the larger sphere. If 10 L of paint were needed to paint the larger sphere, how many liters are needed to paint all the smaller spheres ?

- a) 900
- b) 90
- c) 810
- d) 81

Ans) d

Exp) Option d is the correct answer.

Let radius of the larger sphere be R and that of smaller ones are r. Given, $r = R/9$ --- (1)

Volume of larger sphere = $(4/3) \pi(R^3)$ --- (2)

Volume of one smaller sphere = $(4/3) \pi(r^3) = (4/3) \pi (R/9)^3$ --- using equation (1)

Since 10% of volume is lost during melting:

Volume left = 90% of the larger sphere volume = $0.9[(4/3) \pi(R^3)]$

Number of smaller spheres possible = Volume left / volume of smaller sphere =

$\{0.9[(4/3) \pi(R^3)]\} / \{(4/3) \pi (R/9)^3\} = (9^3) \times 0.9$

Surface area of larger sphere = $4\pi(R^2)$

Surface area of one smaller sphere = $4\pi(R/9)^2 = \{4\pi(R^2)\}/81$

Surface area of all smaller spheres = Number of small spheres x Surface area of one smaller sphere

$(9^3) \times 0.9 \times \{4\pi(R^2)\}/81 = 8.1 \times (4\pi R^2)$

Ratio of surface area of smaller sphere and larger sphere = $\{8.1 \times (4\pi R^2)\}/4\pi(R^2) = 8.1$

Since 10 liters of paint were needed for larger sphere,

So 10×8.1 liters = 81 liter will be needed for smaller spheres.

Direction for the following six (6) items:

Read the following **four passages** and answer the items that follow the passages. Your answers to these items should be based on the passages only:

Passage 1

The study of ethics has been a fundamental aspect of philosophy for thousands of years, with various schools of thought offering different perspectives on how to determine right from wrong. However, despite the extensive intellectual history of ethics, it remains a deeply subjective and often divisive field. Different cultures and societies have their own ethical systems, and even within a single society, individuals may hold vastly different moral beliefs. In the modern world, this subjectivity has become more pronounced, with advances in technology and globalization making it increasingly difficult to reconcile different ethical frameworks. For instance, the rise of artificial intelligence has raised complex ethical questions, such as whether a machine can be held morally responsible for its actions. Similarly, the proliferation of social media and online platforms has given rise to new ethical dilemmas, such as how to balance freedom of speech with the need to prevent hate speech and misinformation.

Q.35) Which of the following statements best reflects the critical message conveyed by the passage?

- There can never be a single, objective standard of ethics that applies to all cultures and individuals.
- We continually grapple with new ethical dilemmas that arise as a result of technological and societal change.
- The subjective nature of ethics will create more divisions in society due to the simultaneous presence of different moral beliefs.
- The rise of technology and globalization has made ethical questions more complex and difficult to answer.

Ans) b

Exp) Option b is the correct answer.

The passage states that “Different cultures and societies have their own ethical systems, and even within a single society, individuals may hold vastly different moral beliefs.” So, this refers to the fact that there can’t be a single, objective standard of ethics that applies to all cultures and individuals. So, this is one

aspect of ethics which is being discussed in the passage. Thus, is not the critical message being conveyed. Hence option a is incorrect.

The passage discusses the subjectivity of ethics and how it has become more pronounced in the modern world due to technological and societal changes. The critical message being conveyed is that we must continually grapple with new ethical dilemmas that arise as a result of these changes, as stated in option b. This is because as technology and society evolve, new ethical questions will inevitably arise, and we must be prepared to address them in a thoughtful and nuanced way. Hence option b is correct.

In the passage it's mentioned that in the modern world subjectivity will become more pronounced. It does not mean that it will create more divisions in the society. Hence Option c is incorrect.

The passage states that 'In the modern world, this subjectivity has become more pronounced, with advances in technology and globalization making it increasingly difficult to reconcile different ethical frameworks', so this is one aspect of challenges being discussed, but this is not the critical message being conveyed. Hence option d is incorrect.

Passage 2

Despite its widespread acceptance around the world democracy is not without its issues. The primary challenge is the issue of political polarization. In many countries, political ideologies have become increasingly divided, with little room for compromise or dialogue. This has led to gridlock in government and a breakdown of trust between citizens and their representatives. Another issue is the problem of voter participation. While the right to vote is a fundamental aspect of democratic societies, many citizens choose not to participate in elections or are unable to do so due to logistical or legal barriers. This has led to concerns about the representativeness and legitimacy of democratic governments. Another challenge is to ensure that all voices are heard. This is particularly challenging in societies that are diverse in terms of race, ethnicity, religion, and socio-economic status. Despite these challenges democracy is the best form of government.

Q.36) Which of the following statements best sums up the passage ?

- a) Challenges to democracy do not threaten its survival.
- b) Lack of representativeness delegitimizes democracy.
- c) Dialogue and compromise are essential for democratic governance.
- d) Protecting ethno religious and socio-cultural diversities strengthens democracy.

Ans) c

Exp) Option c is the correct answer.

Though the passage mentions that Despite these challenges democracy is the best form of government. But this does not imply that challenges do not threaten its survival. Because the first line itself says that 'Despite its widespread acceptance around the world democracy is not without its issues'. Hence option a is incorrect.

In the passage it's mentioned that citizens not participating in vote has led to concerns about the representativeness and legitimacy of democratic governments', so this is one of the challenges being discussed, but this doesn't sum up the passage. Hence option b is incorrect.

The passage mentions as the primary challenge 'political ideologies have become increasingly divided, with little room for compromise or dialogue. This has led to gridlock in government and a breakdown of trust between citizens and their representatives', so it means that Dialogue and compromise are essential for democratic governance, as the adverse consequences are very broad, as gridlock implies the government becoming almost non functional and breakdown of trust means government becoming non representative of the people, which is at the core of democracy. Hence option c best sums up the passage. Hence option c is correct.

Option d is again the solution to one of the challenges being discussed, hence this again doesn't sum up the passage. Hence option d is incorrect.

Passage 3

The multifaceted nature of art movements, as recognized by numerous experts, demonstrates a complex interaction between aesthetic values and sociopolitical contexts. As each movement emerges, it often develops as a response to or a rejection of its predecessor. Consequently, these artistic revolutions mirror the evolution of societal values and the shifting cultural landscapes of their respective eras. Cubism, for example, emerged in the early 20th century as a groundbreaking departure from the traditional modes of artistic representation. By fragmenting and reassembling objects into abstract forms, artists such as Pablo Picasso and Georges Braque sought to challenge the conventional notions of perspective and three-dimensionality.

This radical shift in artistic expression can be seen as a reflection of societal upheavals and the rapid pace of modernization during this period. Similarly, the Dada movement, born amidst the chaos of World War I, rejected traditional artistic and cultural values, embracing irrationality, spontaneity, and anti-establishment sentiment. Dada artists like Marcel Duchamp and Max Ernst utilized unconventional materials and techniques to create provocative works that defied established norms and questioned the very nature of art itself. The study of art movements reveals not only the development of aesthetic principles but also the intricate relationship between art and the sociopolitical context in which it is created. By examining these movements, we gain a deeper understanding of the role that art plays in shaping and reflecting the cultural identity of a given time and place.

Q.37) What does the emergence of art movements primarily indicate, according to the passage?

- The personal preferences of individual artists
- The influence of aesthetic values and sociopolitical contexts
- The inherent unpredictability of artistic trends
- The role of economic factors in shaping artistic expression

Ans) b

Exp) Option b is the correct answer.

The passage states that the multifaceted nature of art movements demonstrates a complex interaction between aesthetic values and sociopolitical contexts. This implies that the emergence of art movements primarily indicates the influence of these factors.

Q.38) Consider the following assumptions:

- The artists involved in art movements are always aware of the sociopolitical context of their times.
- Artistic revolutions reflect the evolution of societal values and cultural landscapes.

Which of the above given assumptions is/are valid as per the passage?

- 1 only
- 2 only
- Both 1 and 2
- Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: The passage does not make this assumptions, and there is no evidence in the passage to support them. While some artists may be aware of the socio-political context, others may not be, and their work may be more focused on artistic expression than social commentary. There is universal statement that all artists are aware of the socio-political context.

Statement 2 is correct: The passage discusses how art movements, such as Cubism and Dadaism, emerged as responses or rejections to the artistic traditions and societal changes of their times. It also highlights how these movements reflect the cultural and social changes of their respective eras.

Q.39) What is the key idea that has been conveyed in the above given passage?

- The hierarchy of the art movements that have evolved over time
- The financial success of prominent artists
- The role of art in constructing the cultural identity
- The process of selecting appropriate materials and techniques for artistic expression

Ans) c

Exp) Option c is the correct answer.

The passage concludes that the study of art movements reveals not only the development of aesthetic principles but also the intricate relationship between art and the sociopolitical context in which it is created. By examining these movements, we gain a deeper understanding of the role that art plays in constructing and reflecting the cultural identity of a given time and place.

Passage 4

Socialization is the process by which human infants begin to acquire the skills necessary to perform as members of their society, and is thus the means by which social order is perpetuated. The institutionalization of social structures and norms creates a taken-for-granted world that is experienced as objective reality, despite its purely subjective origins. The cognitive and normative structures that make up this world are embedded in everyday experience and become naturalized through routine interactions and practices. However, this process of objectification is not complete or permanent, as the social world is subject to continual negotiation and interpretation. Through the ongoing production and reproduction of social reality, individuals and groups can exercise agency and shape the social structures and processes that govern their lives.

Q.40) Which one of the following statements best reflects the crux of the passage given above?

- Individuals' experiences and their perception of reality are shaped through socialization, which helps to maintain social order.
- Objective reality is important in any functioning society.
- The process of objectification of reality of the social world is permanent.
- Individuals and groups do not have agency in the ongoing reproduction of social reality.

Ans) a

Exp) Option a is the correct answer.

The passage argues that socialization is a crucial process by which human infants acquire the skills necessary to function as members of their society, and this process is necessary to perpetuate social order. The institutionalization of social structures and norms creates a world that is perceived as objective reality, despite its purely subjective origins. However, the process of objectification is not complete or permanent, and the social world is subject to negotiation and interpretation. Through the ongoing production and reproduction of social reality, individuals and groups can shape the social structures and processes that govern their lives. Therefore, the best summary of the passage is that socialization perpetuates social order by shaping individual experiences and understandings of reality.

SFG 2023 | LEVEL 2 | Test #40 – Solutions | ForumIAS

Q.1) With reference to the ‘Geographical Indication’ Tag (GI Tag) given to some crops in India, consider the following pairs:

Crops	States
1. Tandur Red gram	Telangana
2. Aattukombu Avara	Tamil Nadu
3. Raktsey Karpo Apricot	Ladakh
4. Kalanamak Rice	Uttar Pradesh

How many pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) All four pairs.

Ans) c

Exp) Option c is the correct answer.

Geographic Indication (GI) tags are facilitated by the **Geographical Indications of Goods (Registration and Protection) Act, 1999**. GI tags are issued under the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry. GI Tag is an acknowledgment of intellectual property and the first GI Tag in India was bestowed upon West Bengal’s Darjeeling Tea in 2003.

Pair 1 is correct: Tandur red gram is a local variety of pigeon pea which is mainly grown in **Tandur town and the nearby region of Telangana**. The fertile deep black soil and huge limestone deposits can be attributed to the specific quality traits of Tandur red gram. It contains about **22-24% protein**, which is almost **three times that of the protein content in cereals**. It was given GI tag in **December 2022**.

Pair 2 is incorrect: Geographic Indication tag for crop **Aattukombu Avara was given to Kerala (not Tamil Nadu)**. Besides Aattukombu Avara - Attappady Thuvara (red gram), Onattukara Ellu (sesame), Kanthaloor Vattavada Veluthuli (garlic), and Kodungallur Pottuvellari (snap melon) were other crops of Kerala which were given GI tag in FY 2023. With 6 products, Kerala Topped the list of states in the country with most GI tags in Financial Year 2023.

Pair 3 is correct: Ladakh got its first ever Geographical Indication (GI) Tag to its Raktsey Karpo Apricot. Apricot is the major fruit of Ladakh with large-scale cultivation in both Leh and Kargil Districts. Although Ladakh grows more than thirty types of Apricots, the **Raktsey Karpo variety is unique to the region**.

Pair 4 is correct: It is true that the **GI tag for Kalanamak rice was given to Uttar Pradesh in 2013** (Grown in 11 districts of the Terai region of northeastern Uttar Pradesh and in Nepal). Kalanamak is a traditional variety of paddy with a black husk and a strong fragrance, which is considered a gift from Lord Buddha to the people of the Sravasti when he visited this region after his enlightenment.

Recently the Indian Agriculture Research Institute (IARI) **has successfully developed two dwarf varieties of Kalanamak rice** and they were named Pusa Narendra Kalanamak 1638 and Pusa Narendra Kalanamak 1652.

Q.2) Which of the following works were written by Mahakavi Kalidasa?

1. Abhigyanashakuntalam
2. Vikramorvasiyam
3. Kumarasambhavam
4. Ritusamhara

Select the correct answer from the code given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Kālidāsa, who believed to be lived during 4th–5th century CE, was a Classical Sanskrit author who is often considered ancient India's greatest poet and playwright.

Options 1 and 2 are correct: Malavikagnimitra, Abhigyanashakuntalam, and Vikramorvasiyam were the three plays he had written. These three plays rose to such popularity that Kalidasa was recognised as one of the greatest poets.

Option 3 is correct: Raghuvamsa and Kumarasambhava are two of the epic poems written by Kalidasa.

Option 4 is correct: Ritusamhara and Meghaduta are two of Kalidasa's minor poems. In his representation of the eternal conflict between desire and duty, Kalidasa established a new benchmark.

Q.3) With reference to 'Kutiyattam', consider the following statements:

1. The performance involves both male as well as female members.
2. A large copper drum called Mizhavu is the only musical instrument used in the performance.
3. The performance narrates the story of Hindu epic Ramayanam.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Kutiyattam is being practised in the province of Kerala and is one of India's oldest living theatrical traditions. Originating more than 2,000 years ago, Kutiyattam represents a **synthesis of Sanskrit classicism and reflects the local traditions of Kerala**.

Statement 1 is correct: It is true that both **male as well as female members are involved in Kutiyattam dance**. While the **dance** can only be presented by the men of Chakiar caste, the **music** is played by men belonging to the Nambiar caste. The **female roles of the drama are enacted by the female members of the Nambiar caste**, however the **female members of the Chakiar caste are not allowed** to take part in this performance.

Statement 2 is incorrect: While a large copper drum called Mizhavu is the predominant musical instrument used in Kutiyattam, it is not the only music instrument. Other musical instruments used in this play are a **conch shell and a small drum played with a stick called cymbals**.

Statement 3 is correct: Kutiyattam is a sacred, spiritual dance form and has powerful bonds with the idea of sacrifice and religion. The performance displays a myriad of **emotions and expressions** that help to **re-live several scenes from well-known epics such as Ramayanam and Mahabharatam**. Neta abhinaya (eye expression) and hasta abhinaya (the language of gestures) are prominent features of this performance. Source: <https://www.esamskriti.com/e/Culture/Indian-Culture/Kutiyattam-is-India-colon-s-oldest-living-theatrical-art-form-1.aspx>

Q.4) Consider the following statements about Mohiniattam:

1. Traditionally, it is performed as a classical solo dance in Kerala.
2. The Tandava aspect is dominant in this dance form.
3. The footwork is characterized by intricate and thumping movements.

Which of the above given statements is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Mohiniattam or the Dance of an Enchantress ('Mohini' meaning beautiful woman and 'attam' means dance), is essentially a solo dance performance by women that was further developed by Vadivelu in 19th century and gained prominence under the rulers of Travancore in the present state of Kerala.

Statement 1 is correct: Traditionally, Mohiniattam is a **solo dance performance by women** which was developed by Vadivelu in the 19th century and gained prominence under the rulers of Travancore in **Kerala**.

Statement 2 is incorrect: The **Lasya aspect (beauty, grace) of dance is dominant** in a Mohiniattam recital. Hence, it is mainly performed by female dancers. Whereas Tandava is the divine dance performed by Lord Shiva. It is considered to be the source of the cosmic cycle of creation, preservation and dissolution.

Statement 3 is incorrect: There is a marked **absence of intricate and thumping footwork**, and the footwork is gentle.

Source: Indian Art and Culture by Nitin Singhania

Q.5) Consider the following statements with reference to "Dalai Lama":

1. Each Dalai Lama is believed as reincarnation of Maitreya by Tibetan Buddhists.
2. The Dalai Lama belongs to Gelug tradition of Tibetan Buddhism.
3. The 14th Dalai Lama was bestowed with Nobel Peace Prize in 1989.
4. Traditionally, Dalai Lama was responsible for governing Tibet.

Which of the statements given above are correct?

- a) 1, 2, 3, and 4
- b) 1, 3, and 4 only
- c) 1 and 2 only
- d) 2, 3, and 4 only

Ans) d

Exp) Option d is the correct answer.

Statement 1 is incorrect: The **Dalai Lamas are believed by Tibetan Buddhists to be reincarnation of Avalokiteshvara or Chenrezig, the Bodhisattva of Compassion** and the patron saint of Tibet. Bodhisattvas are realized beings, inspired by the wish to attain complete enlightenment, who have vowed to be reborn

in the world to help all living beings. **Maitreya is the Buddha of the future, who will be born to teach enlightenment in the next age.**

Statement 2 is correct: Tibetan Buddhism has four major schools: Nyingma (8th century), Kagyu (11th century), Sakya (1073), and Gelug (1409). **The Dalai Lama belongs to the Gelug tradition of Tibetan Buddhism, which is the largest and most influential tradition in Tibet.**

Statement 3 is correct: **Tenzin Gyatso is the fourteenth Dalai Lama of Tibetan Buddhism.** He was born in 1935 and recognised as the reincarnation of Thubten Gyatso at a young age. **In 1989 he received the Nobel Peace Prize for maintaining a policy of non violence with the Chinese government.**

Statement 4 is correct: **The Dalai Lama is the head monk of Tibetan Buddhism and traditionally has been responsible for the governing of Tibet,** until the Chinese government took control in 1959. Before 1959, his official residence was Potala Palace in Lhasa, the capital of Tibet.

Q.6) With reference to Ankiya Nat, consider the following statements:

1. Khol is the only musical instrument used in it.
2. It was started by Saint Chaitanya Mahaprabhu in the Assam region.
3. The use of a language called 'Brajavali' is one of the features of this performance.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 3 only

Ans) d

Exp) Option d is the correct answer.

During the period of Bhakti movement, folk theatre became a popular means for communicating faith to God, both for the performers as well as the audience. Ankiya Nat is one of such popular developed means to connect people with Lord Krishna.

Statement 1 is incorrect: The musical instruments used in it are the drum (khol) and, most importantly, the little cymbals (manjeera). There is also the mridanga (drum) made up of clay. Other percussion instruments are the dundubhi, bheri, gomukha, pataaha etc. There is also the use of stringed instruments like a simplified veena which resembles ektara.

Statement 2 is incorrect: Ankiya Nat was started by Saint **Shankardev (1449-1568) (not Chaitanya Prabhu) and his disciple Mahadeva in the 16th century A.D,** in the region of Assam.

Statement 3 is correct: Ankiya Nat was originally written in an Assamese-Maithili **mix language called Brajavali.** Unlike Sanskrit, Brajavali is the common language of people inhabited in the eastern parts of India. Thus, it is true that the **use of common language is one of the unique features of Ankiya Nat.**

<http://asomsatramahasabha.org/articles/ANKIYA%20NAT.pdf>

Q.7) With reference to the Haveli sangeet, consider the following statements:

1. It was associated with the Bhakti movement.
2. It is mainly practiced by followers of the Kabirpanthis.
3. Pandit Jasraj is associated with this form of music.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Haveli Sangeet genre of music developed mostly in Rajasthan and Gujarat but now is seen in many parts of the country.

Statement 1 is correct: Haveli Sangeet is associated with the **Bhakti movement**. It was originally meant to be **sung in the temple premises** but now are performed outside of the temple.

Statement 2 is incorrect: Haveli Sangeet is currently practiced by a community known as the **Pushtimarg Sampradaya** or the community that believes in Pushtimarg as the way to salvation.

Statement 3 is correct: Though Pandit Jasraj is an eminent classical vocalist of the Mewati gharana, **he has sung many songs belonging to Haveli Sangeet genre**. Jasraj's vocal range extends to three-and-a-half octaves and uses precise diction, a trademark of the Mewati gharana's style of khayal.

Knowledge Base: Pushtimarg also known as Vallabha sampradaya is a subtradition Vaishnavism. It was founded in the early 16th century by Vallabhacharya. It is focused on Krishna.

Q.8) With reference to cultural history of India, which of the following classical dance forms was traditionally performed in open air theatres?

- a) Kathakali
- b) Kuchipudi
- c) Bharatnatyam
- d) Mohiniyattam

Ans) a

Exp) Option a is the correct answer.

Kerala is the home of several traditional dance and drama forms, the most notable being Kathakali.

A Kathakali performance is traditionally held in open air on a stage covered with coarse mats, which is lit by a brass lamp. This makeshift open-air theater is provided by a temple courtyard or a family mansion. A pair of attendants holds up a patchwork quilt, which functions as a curtain. **The most important accessory to the performance is a brass oil lamp**, as its quivering wick greatly accentuates the various shades of expression on the painted faces of the actors.

Nitin Singhania + Chapter 7: INDIAN DANCE FORMS

Q.9) References to puppetry are found in which of the following literary sources?

1. Silappadikaram
2. Natyashastra
3. Arthashastra
4. Mahabharata

Select the correct answer using the code given below.

- a) 1, 3 and 4 only
- b) 2 and 3 only
- c) 1, 2 and 3 only
- d) 1, 2, 3 and 4

Ans) a

Exp) Option a is the correct answer.

Puppetry is one of the ancient forms of entertainment. This form of entertainment gives unrestricted freedom to the artist in design, colour and movement making it one of the most ingenious inventions of mankind.

Option 1 and 4 are correct: Puppetry has long been of interest in India, both for entertainment and educational purposes. **The excavation sites at Harappa and Mohenjo-daro have yielded puppets with sockets attached to them**, which suggest the presence of puppetry as an art form even during those days. The written reference to puppetry is found in the Tamil classic **Silappadikaram**, written around 1st and 2nd century BC and also in **Mahabharata**. Srimad Bhagavata (part of the epic Mahabharata) say that with three strings-Satta, Raja and Tama, the God manipulates each object in the universe as a **marionette** (a small figure of a person operated from above with strings by a puppeteer).

Option 2 is incorrect: Natyashastra, the masterly treatise on dramaturgy written sometime during 2nd century BC to 2nd century AD., **does not refer to the art of puppetry.**

Option 3 is correct: One of the earliest references to puppetry in India can be found in the Rig Veda, and then in Kautilya's **Arthashastra**, where performers from the Plabak and Kuhak tribes are described as professional puppeteers.

Nitin Singhania + Chapter 8: INDIAN PUPPETRY

Q.10) With reference to Indian Knowledge Systems initiative, consider the following statements:

1. It is an innovative cell under the Ministry of Ayush.
2. It will engage in spreading the rich heritage of our country.
3. It aims to create database of individuals and organizations who have contributed to Indian traditions.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2, and 3

Ans) c

Exp) Option c is the correct answer.

Indian Knowledge System grew over the ages with the contributions of teachers who helped students to evolve through inculcating human values, knowledge, and skills, he added.

Statement 1 is incorrect: The Indian Knowledge System (IKS) is a division and an innovative cell under Ministry of Education (MoE) at All India Council for Technical Education (AICTE), New Delhi. It was established in 2020.

Statements 2 and 3 are correct: Indian Knowledge System (IKS) seeks to promote interdisciplinary research on all aspects of IKS, preserve and disseminate IKS for further research and societal applications, actively engage for spreading the rich heritage of our country and traditional knowledge in the field of Arts and literature, Agriculture, Basic Sciences, Engineering & Technology, Architecture, Management, Economics, etc. **It will create database of individuals and organizations who have contributed to Indian traditions.** It will create portal for archival and dissemination of this rich knowledge and also create an open portal and keep it dynamic and live like wiki, in a PPP mode.

<https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1846801>

Q.11) In the context of Sri Guru Granth Sahib, which of the following terms best describes the term “Sikh Bhagats”?

- Original writings of baba Guru Nanak.
- Saints/poets of various sects whose teachings are included in the Guru Granth Sahib.
- Important disciples of the Sikh gurus.
- Poems that deal with universal peace and harmony.

Ans) b

Exp) Option b is the correct answer.

Sikh Bhagats were holy men of various sects whose teachings are included in the Sri Guru Granth Sahib.

Sri Guru Granth Sahib contains the teachings of thirteen Bhakti saints, called ‘Bhagats’, like Ramananda, Namadev, Ravidas, Parmanand, Sain, Surdas etc and two Muslim Bhagats–Kabir and Baba Farid. The word “Bhagat” means devotee, and comes from the Sanskrit word Bhakti, which means devotion and love.

Source: Indian Art and Culture by Nitin Singhania 2nd Edition, Chapter-11

<https://www.searchgurbani.com/bhagats#:~:text=Sikh%20Bhagats%20were,and%20Sufi%20saints.>

Q.12) Which of the following statements is/are correct about Chhau dance?

- It is a traditional tribal dance form performed in some eastern states of India.
- The dance form is known for its colorful masks, and vibrant costumes.
- It is believed to have originated as a form of temple worship.

Select the correct code from given below:

- 1 only
- 1 and 2 only
- 2 and 3 only
- 1, 2, and 3

Ans) b

Exp) Option b is the correct answer.

The word Chhau originates from ‘Chhaya’ meaning shadow. There are three main styles of Chhau dance – Saraikella Chhau in Jharkhand, Mayurbhanj Chhau in Odisha and Purulia Chhau in West Bengal. Of these, Mayurbhanj Chhau artists don’t wear masks. In 2010, UNESCO inscribed Chhau in the Representative List of Intangible Cultural Heritage of Humanity.

Statement 1 is correct: Chhau dance is a traditional tribal dance form that is primarily performed in the eastern states of India, such as Jharkhand, Odisha, and West Bengal.

Statement 2 is correct: Chhau dance is known for its acrobatic movements, **colorful masks, and vibrant costumes**. The dancers wear elaborate costumes and masks that represent various characters from Hindu mythology.

Statement 3 is incorrect: While Chhau dance is often performed during religious festivals, it is not believed to have originated as a form of worship. Instead, it is thought to have **originated as a martial art** that was later adapted into a dance form.

Source: Indian Art and Culture by Nitin Singhania

Q.13) Which among the following is/are the examples of shadow puppetry of India?

1. Kundhei
2. Tholu Bommalata
3. Pavakoothu

Select the correct answer using the codes given below:

- a) 2 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

Statement 1 is incorrect: The string puppets of Odisha are known as **Kundhei**. Made of light wood, the Odisha puppets have no legs but wear long flowing skirts. They have more joints and are, therefore, more versatile, articulate and easy to manipulate. The puppeteers often hold a wooden prop, triangular in shape, to which strings are attached for manipulation. The costumes of Kundhei resemble those worn by actors of the Jatra traditional theater. The music is drawn from the popular tunes of the region and is sometimes influenced by the music of Odissi dance.

Statement 2 is correct: **Tholu Bommalata, Andhra Pradesh's shadow puppets has the richest and strongest tradition**. The puppets are large in size and have jointed waist, shoulders, elbows and knees. They are coloured on both sides. Hence, these puppets throw coloured shadows on the screen. The music is dominantly influenced by the classical music of the region and the theme of the puppet plays are drawn from the Ramayana, Mahabharata and Puranas.

Statement 3 is incorrect: **Pavakoothu** is a traditional string Puppetry, came into existence during the 18th century due to the influence of Kathakali, the famous classical dance-drama of Kerala, on puppet performances. In Pavakoothu, the height of a puppet varies from one foot to two feet. The head and the arms are carved of wood and joined together with thick cloth, cut and stitched into a small bag. The manipulator puts his hand into the bag and moves the hands and head of the puppet.

Source: <https://cctindia.gov.in/puppet-forms/>

Q.14) With reference to Indian music, which among the following options correctly describe the term “Jatigan”?

- a) It is a form of Carnatic Music composed by combining the features of all ragas.
- b) It refers to scholarly compositions in Telegu and Tamil with a slow-moving music.
- c) It is mainly a dance form performed on brisk and attractive music.
- d) It is a type of music evolved to narrate the epics.

Ans) d

Exp) Option d is the correct answer.

Option a is incorrect: The Varnam is a musical form in Carnatic Music. Whereas musical forms like the Kirtana, Kriti, Javali, Tillana, etc. have their similar counterparts in Hindustani Music, the Varnam does not find a counterpart. The Varnam is a beautiful creation of musical craftsmanship of a high order, **combining in itself all the characteristic features of the raga in which it is composed.** This form is aptly called a Varnam, since many of the svara group patterns called ‘Varnas’ in ancient music, are dexterously interwoven in its texture.

Option b is incorrect: Padas are scholarly compositions in Telegu and Tamil. Though they are composed mainly as dance forms, they are also sung in concerts, on account of their musical excellence and aesthetic appeal. A padam also has the sections, pallavi, anupallavi and charana. **The music is slow-moving and dignified.** There is a natural flow of music and, sustained balance between the words and the music is maintained throughout. The theme is madhura bhakti, portrayed as bahir sringara and antar bhakti.

Option c is incorrect: The Tillana, corresponding to the Tarana of Hindustani music, is a short and crisp form. **It is mainly a dance form, but on account of its brisk and attractive music,** it sometimes finds a place in music concerts as a conclusion piece. It usually begins with jatis.

Option d is correct: During the late Vedic period 3000-1200 BC, a form of music called Samgana was prevalent which involved chanting of the verses set to musical patterns. **Various forms of music like Jatigan were evolved to narrate the epics.** Between 2nd to 7th AD a form of music called Prabandh Sangeet, which was written in Sanskrit, became very popular. This form gave way to a simpler form called Dhruvapad, which used Hindi as the medium.

Q.15) In the context of Indian history, consider the following statements regarding “Mangarh Massacre”:

1. The massacre is mainly related to the Bhil Tribe.
2. Govind Guru was associated with this event.
3. The event is also known as the Adivasi Jallianwala.

Which of the statements given above is/are correct?

- a) 2 only
- b) 1 and 2 only
- c) 1, 2, and 3
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

As a tribute to tribal freedom fighters who lost their lives, the government is exploring the possibility of declaring Mangarh Hillock, in Banswara District (Rajasthan), a monument of national importance. Mangarh is situated at Gujarat-Rajasthan border.

Statement 1 is correct: Mangarh Massacre refers to the killing of more than 1,500 Bhil tribals on 17th November 1913.

Statement 2 is correct: In 1903, Govind Guru set up his main dhuni on Mangarh Hill, situated in the middle of dense forests on the border of Banswara and Santrampur. Mobilised and trained by him, the Bhils placed a charter of 33 demands before the British by 1910 primarily relating to forced labour, high tax imposed on Bhils and harassment of the guru’s followers by the British and rulers of princely states.

The Bhils rejected the British’s attempt to placate them and refused to leave Mangarh Hill, vowing to declare freedom from British rule. Later, On 17 November 1913, the British Indian Army fired indiscriminately on Bhil protesters, and it is said that over 1,500 people, including women and children died in the tragedy.

Statement 3 is correct: Mangarh Massacre event is also known as the Adivasi Jallianwala.

Source: <https://www.firstpost.com/explainers/ativasi-jallianwala-bagh-the-mangarh-massacre-of-1913-that-pm-modi-spoke-of-in-rajasthan-11554721.html>

Q.16) With reference to tappa music, consider the following statements:

1. It is believed to be originated from the court of Lucknow's ruler Wajid Ali Shah.
2. Love story and a sense of loss are its central themes
3. It consists of the song uttered in fast note patterns.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Tappa is a form of Indian semi-classical vocal music. Its specialty is a rolling pace based on fast, subtle and knotty construction. Its tunes are melodious and sweet, and depict the emotional outbursts of a lover.

Statement 1 is incorrect: Tappa is a form of semi classical vocal music **believed to be originated from the folk songs of camel riders in the Punjab area.** Tappa, in Punjabi and Pashto language, is set in ragas generally used for the semi classical forms. It is characterized by jumpy and flashy tonal movements with rhythmic and rapid notes. While **Thumari** is believed to be developed during the 19th century at the **court of Lucknow's ruler Wajid Ali Shah.**

Statement 2 is correct: Tappa literally means 'jump' in Persian. They are essentially folklore of love and passion and are written in Punjabi. Love story and a sense of loss are central themes. Its beauty lies in the quick and intricate display of various permutations and combinations of notes.

Statement 3 is correct: The Tappa consists of the song uttered in fast note patterns. It is a difficult composition and needs much practice. Both the Thumri and Tappa require special training as do the Dhrupad and Khyal forms of singing.

Q.17) Consider the following pairs regarding folk music in India

Folk Music	State
1. Pankhida	Chhattisgarh
2. Mando	Rajasthan
3. Burrakatha	Bihar
4. Sana Lamok	Manipur

How many pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) All four pairs

Ans) a

Exp) Option a is the correct answer.

Pair 1 is incorrect: Pankhida is a folk music of Rajasthan. Sung by the peasants of Rajasthan while doing work in the fields, the peasants sing and speak while playing algoza and manjira. The literal meaning of the word 'Pankhida' is lover.

Pair 2 is incorrect: Goan regional music is a treasury of the traditional music of the Indian subcontinent. **Mando, the finest creation of Goan song** is a slow verse and refrain composition dealing with love, tragedy and both social injustice and political resistance during Portuguese presence in Goa.

Pair 3 is incorrect: Burrakatha is a highly dramatic form of ballad from Andhra Pradesh. A bottle shaped drum (tambura) is played by the main performer while reciting a story. The ballad singers, like stage actor, wear make up and a highly stylised costume.

Pair 4 is correct: Sana Lamok is a folk music of Manipur. Manipur's hills and valley—both are fond of music and dance. Sana Lamok is sung at the time of coronation ceremony by the Maaiba (priest). It may also be sung to welcome the king. It is sung to evoke the spirit of Pakhangba, the presiding deity. There is a belief that this song is potent with magical powers.

Q.18) With reference to the elements of Kathak, consider the following statements:

1. Ananda is the introductory item performed by dancer.
2. Thaata comprises of soft and varied movements of dancer.
3. Jugalbandi is a competitive play between the dancer and a tabla player.

Which of the above given statements is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Kathak is a traditional dance form of Uttar Pradesh that traces its origins from the Ras Leela of Brajbhoomi. The dance form is characterized by storytelling through gestures and music, as derived from the "Kathikas". During the Mughal era, it degenerated into a lascivious style and was influenced by Persian costumes and styles of dancing. However, in the 20th century, Lady Leela Sokhey revived the classical style of Kathak. An important feature of Kathak is the development of different gharanas as it is based on Hindustani style of music.

Statement 1 is correct: In a Kathak recital, **Ananda is the opening piece** that sets the stage for the rest of the performance. It is a **solo dance piece that serves as an introduction** to the dancer's skill, style, and interpretation of the music.

Statement 2 is correct: Thaata is an essential component of Kathak dance that showcases the dancer's grace, fluidity, and control. **It is a series of soft, varied movements** that emphasize the dancer's footwork and body posture.

Statement 3 is correct: Jugalbandi is an exciting element of Kathak dance that involves a playful and competitive exchange between the dancer and a tabla player. It is a form of musical dialogue in which the two artists try to outdo each other with their skills and creativity.

Q.19) With respect to the architecture of Qutb Shahi dynasty, consider the following statements:

1. The 'Charminar' was built by Quli Qutub Shah of Qutb Shahi dynasty.
2. Recently, the step wells at the Golconda fort got UNESCO's Asia-Pacific award.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. Charminar was built by Sultan Mohammed Quli Qutb Shah, of Qutb Shahi dynasty, in 1591. It is said that this square shaped structure with four pillars and intricate carvings was built in honour of his wife, Bhagmati. **Quli Qutub Shah also founded the city of Hyderabad.**

Statement 2 is correct. Recently, the step wells at the Qutb Shahi tombs of the **Golconda Fort were awarded UNESCO's Asia-Pacific award (2022) for cultural heritage conservation.** Step wells of Golconda Fort, Telangana is a **16th-century well.** This structure is made in the **Persian style.**

The award is categorized into 6 types of recognition: Award of Excellence, Award of Distinction, Award of Merit, Award for New Design in Heritage Contexts, and Special Recognition for Sustainable Development. The monument has bagged the Award of Distinction.

Q.20) Recently, the State Ranking Index for National Food Security Act was released. In this context, consider the following statements:

1. It was compiled and released by the Ministry of Agriculture.
2. It does not reflect the level of hunger or malnutrition in a particular state or union territory.
3. In the 1st edition of the index, Odisha secured the first rank among the General Category States.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 2 only

Ans) c

Exp) Option c is the correct answer.

The State Ranking Index for National Food Security Act (NFSA) is built on three key pillars, which cover end-to-end implementation of NFSA through TPDS. These pillars are- i) NFSA- coverage, targeting and provisions of the Act, ii) delivery platforms, and iii) nutrition initiatives.

Statement 1 is incorrect: The Ministry of Consumer Affairs, Food & Public Distribution released the first edition of the 'State Ranking Index for National Food Security Act (NFSA).

Statement 2 is correct: The State Ranking Index for National Food Security Act (NFSA) denotes only the efficiency of TPDS operations, **it does not reflect the level of hunger, if any or malnutrition, or both, in a particular state or union territory.** The current version of the Index measures the effectiveness of NFSA implementation majorly through operations and initiatives under TPDS. It does not cover programs and schemes implemented by other Ministries and Departments under NFSA.

Statement 3 is correct: Odisha has been adjudged the top ranked State followed by Uttar Pradesh at the 2nd spot and Andhra Pradesh at third amongst the General Category States in 'State Ranking Index for NFSA'. Among the Special Category states/UTs, Tripura stood first followed by Himachal Pradesh and Sikkim respectively. Further, among the 3 UTs where Direct Benefit Transfer (DBT)- Cash is operational, Dadra and Nagar Haveli & Daman and Diu is the top ranked UT.

IMPLEMENTING FOOD SECURITY		
How the 20 'general category' states ranked in terms of NFSA implementation		
TOP THREE		
Rank	State	Index score
1	Odisha	0.836
2	Uttar Pradesh	0.797
3	Andhra Pradesh	0.794
BOTTOM THREE		
18	Delhi	0.658
19	Chhattisgarh	0.654
20	Goa	0.631

Source: https://dfpd.gov.in/1sGbO2W68mUlunCgKmpnLF5WHm/NFSA_2022.pdf

Q.21) Consider the following statements about Natyashastra, an ancient Indian epic:

1. It is in the form of an informal discourse between the author and several other Munis (disciples) on questions related to Natya-Veda.
2. It is the first book on dramaturgy in India which prescribes rules of acting and theatre art.
3. It was composed by Sarangadeva.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

The Natyashastra combines the terms Natya, which alludes to techniques of dancer/actor, with “sastra,” that refers to science, resulting in a codified framework that is surprisingly secular in its setting. The work offers detailed descriptions of acting techniques, costumes, music, musical instruments, and so on.

Statement 1 is correct: Natyashastra takes form of an informal discourse between Bharata Muni and a number of other Munis who approached him with Natya Veda-related questions. In this book, Bharata explains topics like dramatic composition, play structure and stage construction, acting genres, body motions, make-up and costumes, the function and aims of an art director, musical scales, musical instruments, etc. Through several chapters and numerous poems.

Statement 2 is correct: Natyashastra is the first book on dramaturgy (the theory and practice of dramatic composition) in India. It contains the rules and prescriptions regarding performance, the theatre hall, acting, gestures, Rasa, stage direction, etc.

Statement 3 is incorrect: Natyashastra was written and compiled by Bharata Muni between 200 BC and 200 AD. It is believed to be the first work that clarified and elaborated on the subject of musicology. However, Sarangadeva was a 13th century musicologist who wrote the classic text on music, the Sangeet Ratnakara.

Q.22) Consider the following statements about Kathakali, an Indian Classical dance form:

1. Traditionally, Kathakali is performed by male dancers.
2. There is an elaborate use of facial makeup in this dance form.
3. The language used for Kathakali songs is Manipravalam, which is a mixture of Malayalam and Sanskrit.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

In the temples of Kerala, two forms of dance-drama, Ramanattam and Krishnattam, evolved under the patronage of feudal lords, narrating episodes from Ramayana and Mahabharata. These folk drama traditions latter became the source of Kathakali, which derived its name from the words ‘Katha’ meaning story and ‘Kali’ meaning drama.

Statement 1 is correct: Kathakali is traditionally an all-male troupe performance. Traditionally, kathakali is performed exclusively by men and young boys who play the parts of both males and females. It originated at a time when women were confined within the walls of a household.

Kathakali originated as part of the bhakti movement and is believed to have been performed by soldiers of the kingdom, as the plays were written by a prince himself. Since they were well-trained in the martial art of kalari, troupes that followed in their footsteps also implemented rigorous exercises as part of the training process. And thence started the practice of body massages using the feet (chavitty uzichil). This practice is believed to be one major reason why women were not welcome in exploring the art. However, there have been several female dancers who went on to break the glass ceilings and took the dance form to its new glory.

Statement 2 is correct: There is minimal use of props in the Kathakali recital. However, very elaborate facial make-up along with a head gear is used for different characters.

Statement 3 is correct: The language used for Kathakali songs is Manipravalam, i.e., a mixture of Malayalam and Sanskrit. Music is important to rightfully convey the entire drama to the viewers. Different compositions of music are used during performance to give depth to the drama.

Q.23) Consider the following statements about Sattriya dance, a classical dance form in India:

1. It was first introduced by Shankaracharya in the 5th century CE.
2. The dance is generally performed by bhokots, a group of male monks.
3. Musical instruments like Khol, Cymbals and Flutes are used during the performance of Sattriya dance.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 2 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Sattriya art form derives its name from the Vaishnava monasteries known as ‘Satras’, where it was primarily practised. It is inspired from Bhakti Movement.

Statement 1 is incorrect: Sattriya dance in modern form was introduced by the Vaishnava saint Shankaradeva (and not Shankaracharya) in the 15th century CE in Assam. The dance form was an amalgamation of various dance forms prevalent in Assam, mainly Ojapali and Devdasi.

Statement 2 is correct: The dance is generally performed in group by male monks known as ‘Bhokots’ as part of their daily rituals or even on festivals.

Statement 3 is correct: Khol (drum), Cymbals (Manjira) and flute form the major accompanying instruments of this dance form. It is based on a great coordination between rhythmic syllables, music and dance postures.

Source: Nitin Singhania, Chapter 6, Indian Dance

Q.24) With reference to Gombeyatta puppetry art in India, consider the following statements:

1. The string puppets of Karnataka are known as Gombeyatta.
2. These puppets are carved from a single piece of wood and look like large dolls that are colourfully dressed.
3. Episodes enacted in Gombeyatta are usually based on Prasangas of the Yakshagana plays.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) option b is the correct answer.

A puppet is one of the most remarkable and ingenious inventions of the man. Almost all types of puppets are found in India. Puppetry throughout the ages has held an important place in traditional entertainment. Like traditional theater, themes for puppet theater are mostly based on epics and legends. Puppets from different parts of the country have their own identity. Regional styles of painting and sculpture are reflected in them.

Statement 1 is correct: The string puppets of Karnataka are called Gombeyatta. They are styled and designed like the characters of Yakshagana, the traditional theater form of the region.

Statement 2 is incorrect: The Gombeyatta puppet figures are highly stylized and have joints at the legs, shoulders, elbows, hips and knees. These puppets are manipulated by five to seven strings tied to a prop. Some of the more complicated movements of the puppet are manipulated by two to three puppeteers at a time.

Whereas, **Kathputli puppets from Rajasthan are carved from a single piece of wood. These puppets are like large dolls that are colourfully dressed.** Their costumes and headgears are designed in the medieval Rajasthani style of dress, which is prevalent even today.

Statement 3 is correct: Episodes enacted in Gombeyatta are usually based on Prasangas of the Yakshagana plays. The music that accompanies is dramatic and beautifully blends folk and classical elements.

Source: <https://ccrtindia.gov.in/puppet-forms/>

Q.25) Recently, the term “POP-FAME” was in the news. In this context, which of the following statements best describes this term?

- It is a type of fuel developed from the Bacteria.
- It is scheme of Indian Government to facilitate penetration of E-vehicles.
- It is a term used for the artist, who in a short span of time garner huge popularity.
- It is a new type of organic fertilizer developed by Government under Brand name Pop-Fame.

Ans) a

Exp) Option a is the correct answer.

Option a is correct: US Scientists have developed a fuel named POP-FAME from bacteria. POP-FAME (Polycyclopropanated fatty acid methyl ester) is a new fuel molecule made up of seven sets of cyclopropane rings. **Cyclopropane is naturally produced by bacteria in a family called Streptomyces.** It has a three-carbon ring with each carbon atom combining with two other elements, mostly Hydrogen. **POP-FAME is found to have energy density over 50 megajoules (MJ), as compared to 32 MJ for petrol and 35 MJ for RP-1 (a kerosene-based rocket fuel); making it an ideal rocket fuel.**

Source: <https://www.space.com/bioengineered-bacteria-efficient-rocket-fuel>

Q.26) Which of the following statements are correct about the features of Bharatnatyam?

- In this dance form, equal emphasis is given on both the Tandava and Lasya aspects
- Dancers often perform with bent knees in this dance.
- Tharangam is the concluding stage of Bharatanatyam.

Select the correct answer using the code given below:

- 1 and 2 only
- 1 and 3 only
- 2 and 3 only
- 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Bharatnatyam is the oldest among all classical dance forms, and its name is derived from Bharata Muni and 'natyam', meaning dance in Tamil. The origins of Bharatnatyam can be traced back to the temple dancers or devadasis of Tamil Nadu, where it was known as 'Sadir' or 'Dashiattam'. Bharatnatyam was traditionally performed by solo female dancers but has become popular among male and group artists too. Rukmini Devi Arundale is known for giving global recognition to Bharatnatyam.

Statement 1 is correct: In this dance form, equal emphasis is given on **both the Tandava and Lasya** aspects of dance, with major emphasis on 'mudras'.

Statement 2 is correct: One of the striking features of Bharatanatyam is that performers mostly dance with their knees bent. This stance is called "Ardhamandala," which helps the performer maintain balance and execute intricate footwork.

Statement 3 is incorrect: Tharangam is not a concluding stage of Bharatanatyam. It is a solo element in Kuchipudi where the dancer balances a pot of water on their head while performing with their feet on the edges of a brass plate. **Thillana** is the concluding stage of the Bharatanatyam performance.

Q.27) Consider the following statements about Borgeets, a popular folk music in India:

1. Borgeets were written and composed by Shankardeva in Brajaboli.
2. They are secular songs, mostly portraying themes of struggle of people belonging to lower castes/varna.
3. They are often practiced in Sattras, the monasteries of Ekasarna Dharma.

Which of the statements given above is/are **incorrect**?

- a) 1 only
- b) 2 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

A Borgeet is a vaishnava devotional song, popular in Assam. In literal sense it means great song.

Statement 1 is correct: Borgeets were composed by Shankardev and Sri Madhavdev (Shankardeva's disciple) in 15th to 16th century. They were written in Brajaboli language.

Statement 2 is incorrect: Borgeets are Vaishnavite songs and are not secular songs. They express the religious sentiments of the poets reacting to different situations. They are lyrical songs with specific raga.

Statement 3 is correct: Borgeets are practiced in Sattras, the monasteries of Ekasarana Dharma. These are Vaishnavite monasteries in Assam. Sattriya dance is performed on these Borgeets composed by Shankardeva.

Q.28) Consider the following pairs:

Folk Dance Forms States

- | | |
|---------------|-------------|
| 1. Bihu | Assam |
| 2. Burrakatha | West Bengal |
| 3. Bhangra | Gujarat |
| 4. Ghoomar | Rajasthan |

How many of the above pairs are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) All four pairs

Ans) b

Exp) Option b is the correct answer.

Pair 1 is correctly matched: Bihu is a popular folk dance of Assam that is performed by both men and women in colorful traditional dresses. The dance is performed in groups and includes group formations, rapid hand movements, and brisk footwork. The dance is a celebration of joy and happiness.

Pair 2 is incorrectly matched: Burrakatha or Jangam Katha, is a form of dance narration from Andhra Pradesh, in which a single performer narrates stories from the puranas.

Pair 3 is incorrectly matched: Bhangra is the highly energetic folk dance of Punjab. Accompanied with infectious and catchy drumbeats, it is a popular form of celebration during festivities. Giddha is the female counterpart of the male Bhangra.

Pair 4 is correctly matched: Ghoomar is a traditional folk dance performed by the women of the Bhil tribe in Rajasthan. The dance is characterized by pirouetting movements that bring the flowing vibrancy of the multi-colored Ghaghra into prominence.

Q.29) Which of the following statements is correct about the community of people called 'Bauls', which is well known for its culture and traditions?

- Muslim folk musicians belonging to Western Rajasthan
- A tribal community of Odisha associated with Saura Paintings
- A community from Manipur associated with Thang-ta.
- A group of mystic musicians from Bengal region.

Ans) d

Exp) Option d is the correct answer.

Option a is incorrect. The **Manganiyars** are professional **Muslim folk musicians** belonging to Jaisalmer, Barmer, parts of Jalore, Bikaner and Jodhpur districts in **Western Rajasthan**. Belonging to the Muslim faith, but supported by the Patrons (Rajput's, members of a Hindu military caste claiming Kshatriya descent), the Manganiyars sing the praises both of the great **Sufi saints and of the God Krishna**.

Option b is incorrect. 'Bauls' are **not the tribal community of Odisha** associated with Saura Paintings. Saura paintings made by Saura tribe of Odisha and are similar to Warli paintings. It is essentially a wall mural painting and is ritualistic.

Option c is incorrect. Thang-ta is created by the **Meitei people of Manipur**, Thang-ta is an armed martial art that finds its mention in the most lethal combat forms. Sarit Sarak, on the other hand, is an unarmed art form that uses hand-to-hand combat.

Option d is correct. The Bauls are **mystic minstrels/ musician living** in rural **West Bengal**. Bauls belong to an **unorthodox devotional tradition, influenced by Hinduism, Buddhism, Bengali, Vaishnavism and Sufi Islam**, yet distinctly different from them. Bauls neither identify with any organized religion nor with the caste system, special deities, temples or sacred places. Their emphasis lies on the importance of a person's physical body as the place where God resides.

Source: <https://ich.unesco.org/en/RL/baul-songs-00107>

<https://www.mamekhan.com/manganiyar-musicians.html> + Nitin Singhania (Paintings + Matrial Art)

Q.30) In the context of Indian History, consider the following statement regarding "Pandurang Khankhoje":

- He was one of the founding members of the Ghadar Party in 1914.
- He had met Vladimir Lenin in Russia to seek support for the India's freedom cause.
- He was appointed as professor at the National School of Agriculture in Chapingo, near Mexico City.

Which of the statements given above are correct?

- 1 and 2 only
- 1 and 3 only
- 2 and 3 only
- 1, 2, and 3

Ans) d

Exp) Option d is the correct answer.

Pandurang Khankhoje was born in Wardha, Maharashtra, in the late 19th century, Pandurang Khankhoje came in contact with other revolutionaries early on. As a student, he was an ardent admirer of the French Revolution and of the American War of Independence. Closer to home, the Hindu reformer Swami

Dayanand and his Arya Samaj movement, which called for a spirit of reform and social change, became the hero to a young student group led by Khankhoje.

Statement 1 is correct: Pandurang Khankhoje was one of the founding members of the Ghadar Party, established by Indians living abroad in 1914, mostly belonging to Punjab. Its aim was to lead a revolutionary fight against the British in India.

Statement 2 is correct: Along with the Indian workers, militant action was planned by Pandurang Khankhoje in India, but the outbreak of the First World War halted these plans. **He then reached out to Bhikaji Cama in Paris, and met with Vladimir Lenin in Russia among other leaders, seeking support for the Indian cause.** However, as he was facing possible deportation from Europe and could not go to India, he sought shelter in Mexico.

Statement 3 is correct: Due to his prior friendship with Mexican revolutionaries, **he was appointed a professor at the National School of Agriculture in Chapingo, near Mexico City.** He researched corn, wheat, pulses and rubber, developing frost and drought-resistant varieties, and was part of efforts to bring in the Green Revolution in Mexico.

Source: <https://indianexpress.com/article/explained/explained-who-was-pandurang-khankhoje-ghadarite-revolutionary-and-a-hero-of-mexico-8105384/>

Q.31) Consider the following statements with reference to Sangam literature:

1. Akam and Puram were among the important themes of Sangam literature.
2. Tirukkural, a great work of Sangam literature, was written by Ilango Adigal.
3. Poets of the Sangam literature included both male and female.

Which of the above-given statements is/are **incorrect**?

- a) 1 and 2 only
- b) 2 only
- c) 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Sangam literature is the main source of the history of ancient South India, and it was compiled from the 3rd century BC to the 3rd century CE.

Statement 1 is correct: The poems belonging to the Sangam Literature are generally based on two main themes – Akam concerned with emotions and sentiments in the context of romantic love, sexual connection, and sensuality and Puram concerned with exploits and heroic achievements in the setting of battle and public life.

Statement 2 is incorrect: Thiruvalluvar, commonly known as Valluvar, was a celebrated Tamil poet and philosopher. He is best known as the author of the Tirukkural, a collection of couplets on ethics, political and economical matters, and love. Silappadikaram (story of an anklet) was written by Ilango-Adigal.

Statement 3 is correct: Poets of the Sangam literature include both male and female. Women poets like Avvaiyar, Nachchellaiyar, and Kakkaiyapadiyar flourished in this period and contribute to Tamil literature. For example, Abidhana Chintamani states that the first Avvaiyar lived during the Sangam period (c. 3rd century BCE) and is said to have had cordial relations with the Tamil chieftains Vēl Pāri and Athiyamān. She wrote 59 poems in the Purānāṅṁūru.

<https://egyankosh.ac.in/bitstream/123456789/64663/1/Unit1.pdf>

Q.32) With reference to the cultural history of India, consider the following statements about the plays in 'Classical Sanskrit Theatre':

1. One of the major characteristics of classical Sanskrit theatre is the usual absence of tragic ending.
2. The protagonist used to be a male who would generally win at the end of the play.
3. Masks were heavily used by the performers.
4. Vidusaka used to play the comic character.

Which of the statements given above are correct?

- a) 1, 2 and 3 only
- b) 3 and 4 only
- c) 1, 2 and 4 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

Sariputrprakarana by Ashvaghosha, an eminent philosopher, is considered the first example of classical Sanskrit drama. It was a nine act play. **Sudraka** was the first to introduce the essence of conflict in his play **Mricchakatika**. Apart from a hero and a heroine, this play features an antagonist for the first time. **Kalidasa** is perhaps the most popular among the Sanskrit playwrights. His three works **Malavikagnimitram**, **Vikramorvasi** and **Shakuntalam** - are some of the finest examples of classical Sanskrit drama.

Statement 1 and 2 are correct: Classical Sanskrit play was bound by some rigid conventions: They were generally four to seven-act plays. One of the major characteristics of Classical Sanskrit theatre is absence of tragedy, they never have a sad ending. It is a mixed composition, in which joy is mingled with sorrow. Love is the main theme of most of the dramas and vidushak is the constant companion of the hero in his love affairs. **The protagonist was male who would always achieve the object of his desire at the end.** The plays had well defined opening, progression, development, pause and conclusion in which the Hero does not die and wins in the end.

Statement 3 is incorrect: Sanskrit plays followed an almost ritualistic progression. **The play started with several pre-play rituals, also known as purva-raga**, most of which were performed behind the curtain. Following this, the **Sutradhar, who was the stage manager and director**, entered the stage with his assistants. Dressed in white, he would offer worship to the deity and seek his blessings. The **stages were two-storeyed**. While the upper floor was used for representing celestial sphere, the lower one represented the terrestrial sphere. Curtains were used to intensify the impact of play. **However, masks were not used.**

Statement 4 is correct: Vidusaka (Clown) who used to play the comic role was vital for vividness of dramatic performances. He is the noble and good-hearted, often a friend of hero. He questions the prevailing social norms through satire. The vidushaka is the privileged character **who has the license to mock the king, to ridicule those around him** and at the same time present wisdom and absolute truths without fear. **Traditionally, he spoke in Prakrit while others in Sanskrit.**

<https://www.culturopedia.com/sanskrit-or-classical-theatre/>

Q.33) Consider the following statements with reference to Allasani Peddana:

1. He is also known as Andhra kavita pitamaha.
2. He was one among the Ashtadiggajas (group of eight poets) in the court of Krishnadevaraya of Vijayanagara.
3. The famous text Manucharitra was written by Allasani Peddana.

Which of the above-given statements is/are correct?

- a) 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Allasani Peddana's works are known for their intricate language and complex themes.

Statement 1 is correct: Allasani Peddana (15th -16th centuries CE) was one of the earliest Telegu poets. He is known as **Andhra kavita pitamaha meaning father of poetry in Andhra.**

Statement 2 is correct: There were eight great poets in the court of Krishnadevaraya of Vijayanagara (1509-1530 AD). They were called Ashtadiggajas. Allsani Peddana was one among them. He has been given the title Sarvatomukhandhra Kavitaipitamaha.

Statement 3 is correct: Manucharitra written by Allasani Peddana is about the birth of Svarochisha Manu, the founder of mankind in the Svarochisha Manvantara. It is adapted from the Markandeya Purana. In this book, Peddana compares the birth of the son of Krishnadevaraya to the birth of Svarochisha Manu. Manucharitra's original title is Svarochishamanu Sambhavamu.

Q.34) With reference to the cultural history of India, consider the following statements about the Bommalattam puppetry:

1. This puppetry is famous in the state of Tamil Nādu.
2. It combines the techniques of both rod and string puppets.
3. Bommalattam puppets are largest and heaviest of all traditional Indian Puppets.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Puppetry in India can be broadly classified into four categories – **String Puppet, Shadow Puppet, Glove Puppet, and Rod Puppet.**

Statement 1 and 2 are correct: The stringed puppets of Tamil Nadu are known as Bommalattam. They combine the techniques of both rod and string puppets. A few puppets have jointed arms and hands, which are manipulated by rods. They are made of wood and the strings for manipulation are tied to an iron ring which the puppeteer wears like a crown on his head.

Statement 3 is correct: The Bommalattam puppets are the largest, heaviest and the most articulate of all traditional Indian marionettes. A puppet may be as big as 4.5 feet in height weighing about ten kilograms.

Nitin Singhania + Chapter 8: INDIAN PUPPETRY

Q.35) Consider the following statements with reference to the “Anang Tal Lake”:

1. Recently, it was declared as the Ramsar Wetland of International Importance.
2. It is situated near Leh in the Union Territory of Ladakh
3. The lake is considered to be built by the rulers of the Tomar Dynasty.

Which of the statements given above is/are correct?

- a) 1, 2 and 3
- b) 1 and 3 only
- c) 2 only
- d) 3 only

Ans) d

Exp) Option d is the correct answer.

Statements 1 and 2 are incorrect: The Ministry of Culture has declared **Anang Tal Lake as a monument of national importance** under Ancient Monuments and Archaeological Sites and Remains (AMASR) Act, 1958. Anang Tal Lake, dated back to 1060AD, **is situated to north of Jog Maya temple and northwest of Qutub Complex in South Delhi.**

Statement 3 is correct: Anang Tal Lake is ascribed to Anangpal II of Tomar Dynasty that ruled parts of present-day Haryana and Delhi between 8th and 12th century. Anangpal II was instrumental in populating Indraprastha and made Dhillikapuri (Delhi) as the capital of Tomar Dynasty. He built Lal Kot (later merged into Qila Rai Pithora by Prithviraj Chauhan) and also believed to bring Iron Pillar of Mehrauli from Udayagiri in Central India. He was succeeded by his grandson Prithviraj Chauhan, who was defeated by Ghurid forces in Battle of Tarain.

Source: <https://indianexpress.com/article/cities/delhi/anang-tal-lake-declared-monument-of-national-importance-8110070/>

<https://indianexpress.com/article/explained/tomar-king-anangpal-ii-legacy-delhi-7237182/>

Q.36) Consider the following statements with reference to the Paisachi language in India:

1. It shares some linguistic similarities with the Prakrit language.
2. Brihatkatha of Gunadhya is written in the Paisachi language.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: Paisachi is an extinct language that was spoken in ancient India. Paishachi or Paisaci is a largely unattested literary language of the middle kingdoms of India mentioned in Prakrit and Sanskrit grammars of antiquity. **It is generally grouped with the Prakrit, with which it shares some linguistic similarities**, but is still not considered a spoken Prakrit by the grammarians because it was purely a literary language.

Statement 2 is correct: Brihatkatha of Gunadhya is written in the Paisachi language. Brihatkatha is an ancient Indian epic reported to have been authored by Guhya in the poorly understood Paisachi language. The Brihatkatha existed in the sixth century CE, according to subsequent Sanskrit poets such as Dain, Subandhu.

Q.37) The usage of Grantha Script is primarily associated with which of the following present-day states?

- Rajasthan
- Tamil Nadu
- Assam
- West Bengal

Ans) b

Exp) Option b is the correct answer.

Grantha is the name applied to the script used in Tamil Nadu for writing the Sanskrit language.

Both Grantha and Tamil scripts appear alike in modern forms. The evolution of both scripts from Brahmi was also more or less similar. The development of Grantha script in Tamil Nadu may be divided into four periods. The archaic and ornamental, the transitional, the medieval and the modern. Archaic and ornamental variety is commonly known as Pallava Grantha. Mahendravarman's Tiruchirappalli rock cut cave and other cave temple inscriptions, Narasimhan's Mamallapuram, Kanchi Kailasanatha and Saluvankuppam temple inscriptions, Mutharaiyar's Senthalai inscriptions are examples of this variety.

Source: <https://www.tnarch.gov.in/epigraphy/inscriptions-grantha-script>

Q.38) Which of the following statements is/are correct regarding the crop “Mithila Makhana”?

- This crop was recently included under the Minimum Support Price (MSP) regime.
- This crop is a rich source of micronutrients such as Zinc and Iron.
- This crop is cultivated largely in dry lands.

Select the correct answer using the code given below:

- 1 only
- 1 and 3 only
- 2 only
- 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Mithila Makhana is also simply known as ‘makhn’. Its botanical name is ‘Euryale Ferox Salisb’ and it is a special variety of **aquatic fox nut**. It is believed that the food is famously consumed during **Kojagara Puja** by Maithil Brahmins, who celebrate it for newly-married couples.

Statement 1 is incorrect: Recently the **Government awarded Geographic Indication (GI) tag to Mithila Makhana** grown in Mithila region of Bihar.

Minimum Support Price (MSP) is a form of market intervention by the Government of India to insure agricultural producers against any sharp fall in farm prices. At present 22 crops and fair and remunerative price (FRP) for sugarcane are covered under MSP regime and **Mithila Makhana is not covered under MSP policy regime.**

Statement 2 is correct: It is true that Mithila Makhana is a rich source of micronutrients such as Zinc and Iron. Also, this crop is low in cholesterol, fat and sodium, and has low calorific value.

Statement 3 is incorrect: Mithila Makhana is an aquatic crop, and it cannot be cultivated in dry lands.

Mithila Makhana is a special variety of fox nut **grown in ponds on a leaf**. It is collected, washed and sun-dried for hours and then roasted in a pan at a high flame. In this process their outer shells are broken, and the white puff comes out.

Source: <https://indianexpress.com/article/lifestyle/food-wine/bihar-mithila-makhana-gi-tag-healthy-ingredient-snack-8105437/>

[https://vikaspedia.in/agriculture/market-information/minimum-support-price#:~:text=prices%20\(MSPs\)%20for,-22,-mandated%20crops%20and](https://vikaspedia.in/agriculture/market-information/minimum-support-price#:~:text=prices%20(MSPs)%20for,-22,-mandated%20crops%20and)

Q.39) Consider the following statements about the literature related to the Buddhism:

1. Anguttara Nikaya is a part of the Sutta Pitaka.
2. Buddhacharita was written by Ashvaghosha.
3. Dhammapada was written by king Harshavardhana.

Which of the statements given above is/are correct?

- a) 1, 2 and 3
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

The Buddha's teachings were delivered orally. He taught for 45 years, tailoring his lessons to the needs of the students. The teachings were learned by the Sangha, and group recitations were held at festivals and special occasions. In 483 BC, the teachings were rehearsed and validated in the First Council, after which they were separated into Three Pitakas.

Three Pitakas include Vinaya Pitaka, Sutta Pitaka and Abhidhamma Pitaka

The main teaching or Dhamma of Buddha is contained in the Sutta Pitaka. It is divided into five collections or Nikayas.

- 1) Digha Nikaya
- 2) Majjhima Nikaya
- 3) Samyutta Nikaya

4) Anguttara Nikaya (Hence, statement 1 is correct)

- 5) Khuddaka Nikaya

Statement 2 is correct: Buddhacharita: it is an epic poem composed in Sanskrit by Ashvaghosha in the early 2nd century AD. It is about the life of the Buddha.

Statement 3 is incorrect: Dhammapada is a part of the Khuddaka Nikaya of the Sutta Pitaka (not written by Harshavardhana). It contains a collection of the sayings of the Buddha in verse form.

Source: Indian Art & Culture by Nitin Singhania

Q.40) Recently, many cattle across India were killed due to Lumpy Skin Disease (LSD). Regarding this disease, consider the following statements:

1. It is caused by the Capripoxvirus.
2. This disease may cause a decrease in weight and milk yield in cattle.
3. It is a Zoonotic disease, which can easily spread from animals to humans.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2, and 3

Ans) a

Exp) Option a is the correct answer.

This is not the first time LSD has been detected in India. The disease has been endemic in most African countries, and since 2012 it has spread rapidly through the Middle East, Southeast Europe and West and Central Asia. Since 2019, several outbreaks of LSD have been reported in Asia.

Statement 1 is correct: According to a report by GAVI, the Global Alliance for Vaccines and Immunization, the **Lumpy Skin Disease (LSD) disease is caused by a virus called the Capripoxvirus** and is “an emerging threat to livestock worldwide”. It is genetically related to the goat pox and sheep pox virus family.

Statement 2 is correct: LSD infects cattle and water buffalo mainly through vectors such as blood-feeding insects. Signs of infection include the appearance of circular, firm nodes on the animal’s hide or skin that look similar to lumps. **Infected animals immediately start losing weight and may have fever and lesions in the mouth, along with a reduced milk yield.** Other symptoms include excessive nasal and salivary secretion. Pregnant cows and buffaloes often suffer miscarriage and in some cases, diseased animals can die due to it as well.

Statement 3 is incorrect: According to the World Organization for Animal Health (WOAH), of which India is a member, mortality rates of 1 to 5 per cent are considered usual. **The disease is not zoonotic, meaning it does not spread from animals to humans, and humans cannot get infected with it.** While the virus does not spread to humans, “milk produced by an infected animal will be fit for human consumption after boiling or pasteurization as these processes will kill the viruses, if any, in the milk”,

Source: <https://indianexpress.com/article/explained/explained-health/explained-what-is-lumpy-skin-disease-cattle-8070602/>

Q.41) “It was one of the earliest epic poems in Tamil, written in the 5th–6th century AD. It tells the story of young merchant Kovalan, his marriage to the virtuous Kannagi and his love for the courtesan Matavi.” Which of the following texts has been described in the above passage?

- Silappathikaram
- Amuktamalyada
- Ratnavali
- Kundalakesi

Ans) a

Exp) Option a is the correct answer.

Silappathikaram, also spelled Silappatikaram, the earliest epic poem in Tamil, written in the 5th–6th century AD by Ilango Adigal.

The Silappathikaram tells the story of the young merchant Kovalan and his wife Kannagi. It tells about Kovalan’s love for the courtesan Matavi, and his consequent ruin and exile in Mathurai. In Mathurai he is unjustly executed after trying to sell his wife’s anklet to a wicked goldsmith who had stolen the queen’s anklet and charged Kovalan with theft. Kannagi comes to Maturai, proves Kovalan’s innocence, then tears off one breast and throws it at the kingdom of Maturai, which goes up in flames. Such is the power of a faithful wife.

Option b is incorrect: Amuktamalyada is an epic poem in Telugu composed by Krishnadevaraya of the Vijayanagar Dynasty

Option c is incorrect: Harsha wrote three Sanskrit plays- Nagananda, Ratnavali, and Priyadarshika.

Option d is incorrect: Kundalakesi, also known as Kuntalakeciviruttam, is a Tamil epic authored by Nathakuthanaar about the 10th century.

Source: <https://www.britannica.com/topic/Silappathikaram>

Q.42) With respect to Khayal Music, consider the following statements:

- The origin of Khayal music is attributed to Amir Khusrau.
- Alap is given much more importance in Khyal music as compared to Dhrupad.
- The sultans of Jaunpur were patrons of the Khayal music.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 1 and 3 only
- d) 1 only

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. The word 'Khyal' is derived from Persian and means "idea or imagination". The origin of this style was **attributed to Amir Khusrau**. Generally, a Khyal composition is also referred to as a '**Bandish**'.

Statement 2 is incorrect. **Alap** is given **much less room in the Khyal** music as compared to Dhrupad. This is because there is more use of taan in the composition of Khyal music.

Statement 3 is correct. The **sultans of Jaunpur**—notably Mohammad Sharqi (1401–1440) and Hussain Sarqi (r. 1458–1499), who were contemporaries of the Mughal emperor Babur—were **patrons of musicians who developed khayal**.

Khayal grew in importance in seventeenth-century Jaipur and found a prolific champion in Sadarang (Niyamat Khan), a musician in the court of Muhammad Shah (r. 1719–1748) and a descendant of Tansen.

Source: <https://www.encyclopedia.com/international/encyclopedias-almanacs-transcripts-and-maps/khayal>

Q.43) With reference to various folk theatre traditions of India, consider the following pairs:

Folk theatres Features

- | | |
|--------------|--|
| 1. Bayalata | Marked by the complete absence of any religious themes. |
| 2. Jatra | Spreads the message of teachings of Lord Krishna |
| 3. Powada | Depicts the valour story of Maratha emperor Shivaji. |
| 4. Kuruvanji | A secular romantic play, which depicts the fate of a love-stuck heroine. |

How many pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) All four pairs

Ans) c

Exp) Option c is the correct answer.

Pair 1 is incorrect: Bayalata is an open-air theatre tradition of Karnataka that is performed during the worship of the local deity. **Bayalata narrates the love tale of Radha-Krishna**, thus the statement, marked by the **complete absence of religious themes, is not correct.**

There are generally five types of Bayalatas – Dasarata, Sannata, Doddata, Parijata and Yakshagana.. **Parijata and Yakshagana are narrated by a single Sutradhar** while the other three forms are performed in a chorus of three-four, aided by a Vidushaka (clown).

Pair 2 is correct: Jatra is a popular folk theatre of Eastern India. It is generally an open-air performance that was **initiated by Vaishnava saint Sri Chaitanya** to propagate the **teachings of Krishna**. Later, variants such as Rama Jatra, Shiv Jatra and Chandi Jatra also came into existence that narrated stories of Puranic legends. In the modern times, Jatra was used to narrate stories of secular, historical and even patriotic themes.

Pair 3 is correct: When **Shivaji killed his adversary Afzal Khan**, a play was written lauding the heroic deeds of Shivaji, which later came to be known as **Powada**. They are **operatic ballads depicting stories of valour and sung by the folk musicians** known as Gondhalis and Shahirs.

Powadas were also written to raise awareness on social issues such as female foeticide, dowry and corruption.

Pair 4 is correct: **Kuruvanji is a theatre tradition of Tamil Nadu** and it is characterised by classical Tamil poetry and songs. The first Kuruvanji was composed by Thirukutarajappa Kaviyar. **The basic theme revolves around the fate of a love-struck heroine**, and it is performed in a dance ballet form.

Thirukutrala Kuravanji is about a girl named Vasanthavalli who starts dreaming about Kutralanathar as her lover as her friends start talking to her about the glory of Kutralanathar. Vasanthavalli seeks advice from Kurathi, the fortune teller, who predicts her union with Kutralanathar.

Source: Nitin Singhania – Chapter 7 Folk Theatres

Q.44) In the context of cultural traditions of India, ‘Tumbi, Chikara and Onavillu’ are best related to which of the following?

- Handicrafts made using bamboo
- Folk musical instruments
- Bronze sculptures popular during the Chola period
- GI tagged toy traditions in India

Ans) b

Exp) Option b is the correct answer.

Tumbi, Chikara and Onavillu are folk musical instruments. Basically, they are Tata Vadya, i.e., Chordophones or the string instruments that function best when their sound is modified by hand.

Tumbi: The tumbi is a small, lightweight folk instrument with just one string from the northwestern Indian state of Punjab. It is used to play simple tunes with characteristic timbre.

Chikara: Chikara is a stringed instrument made of parchment, wood and steel. It is a local instrument found in Madhya Pradesh and Rajasthan. It is majorly used by the ‘Pradhan’ community for vocal accompaniment to songs and dance sequences in Madhya Pradesh. Moreover, it is used by the ‘Meo’ community of Alwar district of Rajasthan for vocal accompaniment.

Onavillu: An onavillu is a simple, short, bow-shaped musical instrument. Its name may come from Onam, a festival in Kerala where the instrument is used in dances, and villu, which means 'bow' in Malayalam. Although still regularly used in rural art forms, use of the onavillu is on the decline.

Knowledge Base:

Other types of folk chordophones are:

Ektara or Tun Tuna: It is a one-stringed instrument played by wandering monks.

Dotara: two-stringed instrument used by Bauls

Dilruba or Esraj: accompanying instrument used in Punjab and during Rabindra sangeet in eastern India.

Sarinda: Important tribal instrument and is used by Santhals in Eastern India and also used in Rajasthan and Assam. It is like Sarangi.

Source: Nitin Singhania, Chapter 5, Indian Music

<https://www.india-instruments.com/various-string-instrument-details/tumbi.html>

<https://indianculture.gov.in/musical-instruments/tat-vadya/chikara>

Q.45) Consider the following statements with reference to Small Modular Reactor:

1. These are coal based thermal plants which will be used for power production at Industrial level.
2. These reactors have less fuel requirement as compared to conventional reactors.
3. These reactors may produce radioactive waste.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

Given their smaller footprint, Small modular reactors (SMRs) can be sited on locations not suitable for larger nuclear power plants. Prefabricated units of SMRs can be manufactured and then shipped and installed on site, making them more affordable to build than large power reactors. SMRs offer savings in cost and construction time, and they can be deployed incrementally to match increasing energy demand.

Statement 1 is incorrect: Small modular reactors (SMRs) are advanced nuclear reactors that have a power capacity of up to 300 MW(e) per unit, which is about one-third of the generating capacity of traditional nuclear power reactors.

Statement 2 is correct: Small modular reactors (SMRs) have reduced fuel requirements. Power plants based on SMRs may require less frequent refuelling, every 3 to 7 years, in comparison to between 1 and 2 years for conventional plants. Some SMRs are designed to operate for up to 30 years without refuelling.

Statement 3 is correct: Small modular reactors, long touted as the future of nuclear energy, actually generate more radioactive waste than conventional nuclear power plants, according to research from Stanford and the University of British Columbia

Knowledge Base:

Recently, the International Atomic Energy Agency (IAEA) has established the Platform on SMRs and their Applications,

- 1) **It is a onestop shop** for countries to coordinate support related to all aspects of SMR development.
- 2) The IAEA is the world's centre for cooperation in the nuclear field. It was set up as the world's "Atoms for Peace" organization in 1957 within the United Nations family.

Source: [https://www.iaea.org/newscenter/news/what-are-small-modular-reactors-smrs#:~:text=Small%20modular%20reactors%20\(SMRs\)%20are,of%20traditional%20nuclear%20power%20reactors.](https://www.iaea.org/newscenter/news/what-are-small-modular-reactors-smrs#:~:text=Small%20modular%20reactors%20(SMRs)%20are,of%20traditional%20nuclear%20power%20reactors.)

<https://news.stanford.edu/2022/05/30/small-modular-reactors-produce-high-levels-nuclear-waste/>

Q.46) With respect to the Thomas Cup, consider the following statements:

1. It is an international tennis competition.
2. Recently, India bagged its first-ever Thomas Cup victory.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

The Thomas Cup competition was the idea of Sir George Alan Thomas, a highly successful English badminton player of the early 1900s.

Statement 1 is incorrect. Thomas Cup is an International Badminton Championship. The first tournament was planned in 1941-42 but delayed due to World War II and then it was **played in 1948-49**. Its final match was played at the Queen's Hall, Preston, England on 25th and 26th Feb 1949. **Malaya became the first Thomas Cup Champion.**

Statement 2 is correct. In May 2022, the Indian men's badminton team created history by clinching the Thomas Cup. India registered a 3-0 victory over 14-time champions Indonesia. The final match of the **Thomas Cup was held in Bangkok, Thailand. This is India's first-ever Thomas Cup victory in 73 years.** The men's badminton team was rewarded Rs 1 crore by India's Sports Ministry for their extraordinary performance.

Source: <https://www.nationalbadmintonmuseum.com/the-first-thomas-cup-final/>

<https://economictimes.indiatimes.com/magazines/panache/india-wins-thomas-cup-2022-pm-modi-anand-mahindra-call-it-historic-netizens-heap-praises-on-badminton-team/articleshow/91586418.cms?from=mdr>

Q.47) With reference to the Sangeet Natak Akademi, consider the following statements:

1. Sangeet Natak Akademi is an apex body in the field of performing arts.
2. P.V. Rajmanner was the first chairman of Sangeet Natak Academy.
3. The Akademi's fellowship (Akademi Ratna) does not carry any monetary rewards.
4. National School of Drama (NSD) was set up by Sangeet Natak Akademi.

Which of the statements given above are correct?

- a) 1 and 3 only
- b) 2, 3 and 4 only
- c) 1, 2 and 4 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

Sangeet Natak Akademi is India's national academy of music, dance and drama – is the first national academy of the arts set up by the Republic of India. It was created by a resolution of the (then) Ministry of Education, **Government of India, dated 31 May 1952, which was notified in the Gazette of India of June 1952.**

Statement 1 is correct. The Sangeet Natak Akademi is the apex body in the field of performing arts in the country, preserving and promoting the vast intangible heritage of India's diverse culture expressed in forms of music, dance and drama.

Statement 2 is correct. The Akademi became functional with the appointment of **its first Chairman, Dr P.V. Rajamannar**, and the formation of its all-India council of representatives, the General Council. The first President of India, Dr Rajendra Prasad, **inaugurated it on 28 January 1953 at a special function held in the Parliament House.**

Statement 3 is incorrect. The Akademi's fellowship (Akademi Ratna) carries a purse money of 3 Lakh Rupees and Akademi Awards (Akademi Puraskar) carry a purse money of 1 lakh Rupees. The award also carries a Tamrapatra and Angavastram.

Statement 4 is correct. National School of Drama (NSD) was set up in 1959 by Sangeet Natak Akademi for focused work on dramatics in India. In 1975, NSD became an independent entity under Ministry of Culture

Source: <https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1901819>

<https://indianculture.gov.in/MoCorganization/sangeet-natak-akademi>

Q.48) With reference to the differences and similarities between Hindustani and Carnatic music, consider the following statements:

1. Hindustani music has more Ragas than Carnatic music.
2. Unlike Carnatic music, time of performance plays an important role in Hindustani music.
3. Hindustani music has greater scope for improvisations than Carnatic music.
4. Hindustani music is vocal-centric, while both vocals and instruments are important in Carnatic music.

Which of the statements given above are correct?

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) b

Exp) Option b is the correct answer.

Indian classical music is classified into two broad divisions - Hindustani music and Carnatic music. While Hindustani music was practised in North India and is an indigenous form of music with Persian-Arabic influences, Carnatic music is indigenous to South India and remained free of any outside influence.

Statement 1 is incorrect: This statement is **incorrect** as Carnatic music has a **far greater variety and range of Ragas (around 72)** than the Ragas of Hindustani music (around 6 major ones).

Statement 2 is correct: Time has a very **important role** to play in the rendition of Hindustani music. The **rules** of Hindustani music **mandate** that **particular Ragas** are to be used at **particular times** of the **day** and in particular **seasons** of the year only. There are **no such rules** related to timing of performance in Carnatic music.

Statement 3 is correct: The **rules** of Hindustani music are **not rigid** and the **duration** of the **Ragas** are **short** as well, so there is **ample scope of improvisation** in Hindustani music and is **generally preferred** as well. On the other hand, the **rules of Carnatic** music are quite **rigid** and the **compositions**, called **Kriti**, have very **complex rules** and **long durations** with almost **no scope for improvisations**.

Statement 4 is correct: While **vocals** and **instruments** are used in **combination** in **both Hindustani** and **Carnatic** music, **vocals** are given **more importance** in **Hindustani** music, where vocals are at the **centre** of the **performance** and the **instruments** only provide **accompaniment and support**. In **Carnatic** music, both vocals and instruments are given **equal importance**.

Source: [https://www.thehindu.com/entertainment/music/the-charm-lies-in-the-difference-between-hindustani-and-](https://www.thehindu.com/entertainment/music/the-charm-lies-in-the-difference-between-hindustani-and-carnatic/article34841775.ece#:~:text=greater%20variety%20of%20composition%20in%20Carnatic%20music%3A)

[carnatic/article34841775.ece#:~:text=greater%20variety%20of%20composition%20in%20Carnatic%20music%3A](https://www.thehindu.com/entertainment/music/the-charm-lies-in-the-difference-between-hindustani-and-carnatic/article34841775.ece#:~:text=greater%20variety%20of%20composition%20in%20Carnatic%20music%3A)

Art & Culture by Nitin Singhania, 5th edition, Ch-5, Pg 5.18

Q.49) “It is a folk dance performed by the women in Rajasthan. The snake is the inspiration for the costumes and dance movements. A wind instrument ‘Been’ is associated with this dance form. It has been inscribed in the UNESCO List of the Intangible Cultural Heritage of Humanity.”

Which of the following dance forms is described in the above paragraph?

- Saraikella Chhau
- Charba
- Ghoomar
- Kalbelia

Ans) d

Exp) Option d is the correct answer.

Option a is incorrect: Saraikella Chhau in Jharkhand is a form of Chhau. It is a form of mask dance that uses vigorous martial movements to narrate mythological stories. In 2010, UNESCO inscribed Chhau in the Representative List of Intangible Cultural Heritage of Humanity.

Option b is incorrect: Charba is the popular folk dance of Himachal Pradesh. It is performed during the Dussehra festivities.

Option c is incorrect: Ghoomar or Gangore is a traditional folk dance performed by the women of the Bhil tribe in Rajasthan. It is characterised by the pirouetting movements of the women, which brings into prominence the multi-coloured vibrancies of the flowing Ghaghra.

Option d is correct: Kalbelia is a sensuous **folk dance** performed by the women of the **Kalbelia community of Rajasthan**. The **costumes and dance movement** are similar to that of the serpents. The most popular musical instrument of this dance form is ‘**Been**’ (**wind instrument** played by snake charmers). The UNESCO has **inscribed** Kalbelia folk songs and dances in the Representative **List of the Intangible Cultural Heritage of Humanity in 2010**.

Source: Indian Art and Culture by Nitin Singhania 2nd Edition – Chapter 6 – India Dance Forms.

Q.50) Recently, the Government of India launched “Paalan 1000 campaign”. In this context, which of the following statements best describes this campaign?

- It is an initiative to showcase the heritage of India to the world.
- It is an initiative of the Ministry of Agriculture to promote 1000 Farmer Producer Organizations in rural areas.
- It focuses on the cognitive development of children in the first 2 years of their life.
- It will focus on preserving 1000 monuments which are currently not protected under any scheme.

Ans) c

Exp) Option c is the correct answer.

Option c is correct: ‘Paalan 1000 - Journey of the First 1000 Days’, focuses on the cognitive developments of children in the first 2 years of its life. Paalan 1000 combines early years coaching for parents, families and other caregivers with services designed to meet families’ basic needs. Infants and toddlers are shaped by their experiences – and those experiences are shaped by their caregivers. Caregivers are crucial for a strong start in the first years of life. The programme is aligned to the mission of the Rashtriya Bal Swasthya Karyakram (RBSK), emphasizing responsive care and focusing interventions on the first 1000 days.

Q.1) Consider the following statements with respect to the paintings during Chalcolithic period:

1. Battle scenes and complex geometrical shapes are depicted in Chalcolithic paintings.
2. Paintings in Jogimara caves in Ramgarh hills belong to this period.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

The pre-historic paintings were generally executed on rocks and these rock engravings were called Petroglyphs. The first set of pre-historic paintings were discovered in Bhimbetka caves in Madhya Pradesh.

Statement 1 is correct. Most of the paintings concentrate on depicting battle scenes. There are many paintings of men riding horses and elephants. Other paintings from this period also have depictions of musical instruments like the harp. Some of the paintings have complex geometrical shapes like spirals, rhomboids and circles.

Statement 2 is correct. Some of the paintings from the later Chalcolithic period can be seen in the Jogimara caves in the Ramgarh hills in the Surguja district of Chhattisgarh. These are dated to be painted around 1000 BCE. Chhattisgarh is also home to a variety of caves in the district of Kanker like the shelter of Udkuda, Garagodi, Khairkheda, Gotitola, Kulgaon, etc.

Q.2) With reference to Navayana Buddhism, consider the following statements:

1. It prohibited the so-called shudras to become its members.
2. It rejected the teachings of Theravada, Mahayana and Vajrayana School of Buddhism.
3. It held that women were incapable of attaining salvation as they cannot lead ascetic life.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 2 only
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

In 1935, Dr Ambedkar announced his decision to renounce Hinduism and Ambedkar along with more than five lakh followers **embraced Buddhism in Nagpur's Deekshabhoomi in 1956**. Dr. Ambedkar called his version of Buddhism as **Navayana Buddhism**, and its followers are called neo-Buddhists.

Statement 1 is incorrect: Navayana Buddhism is considered one of the important Dalit movements of India in post-Independence India. **People belonging to Scheduled Castes and so-called shudras also referred to as Untouchables are predominant members** of Navayana Buddhism. Therefore, Navayana Buddhism **prohibited the so-called untouchables to become its members is not correct.**

Statement 2 is correct: It is true that Navayana Buddhism **rejected the teaching of traditional schools of Buddhism such as Hinayana, Mahayana and Vajrayana** buddhism. **Navayana means new wheel** and it **rejected** traditional Buddhist practices such as institution of monk after **renunciation**, ideas such as karma, rebirth in afterlife, samsara, meditation, nirvana and Four Noble Truths.

Statement 3 is incorrect: Navayana Buddhism **did not believe in after life and Nirvana (salvation)** and hence **women's capacity to attain salvation is not relevant** in Navayana Buddhism. Further Navayana Buddhism is open to both male and female members.

Q.3) Ajivika sect is considered as an important school of Shramana tradition. With respect to this sect, consider the following statements:

1. It was founded by Makkhali Gosala.
2. It believed in the doctrine of Niyati.
3. The authority of Vedas was rejected by Ajivikas.
4. It denied the existence of the soul.
5. Bindusara was one of the followers of Ajivika sect.

Which of the statements given above are correct?

- a) 1, 2, 3 and 4 only
- b) 2, 3, 4 and 5 only
- c) 1, 2, 3 and 5 only
- d) 1, 2 and 5 only

Ans) c

Exp) Option c is the correct answer.

Ajivika sect is from Shramana school tradition of school and belong to Nastika or Heterodox school of philosophy.

Statement 1 is correct. The Ajivika Sect was founded by Makkhali Gosala in 5th century BC. He was a contemporary of Siddhartha Gautama, the founder of Buddhism, and of Mahavira, the last and 24th Tirthankara of Jainism. Gosala is believed to have been an acquaintance of Mahavira.

Statement 2 is correct. The sect revolves around the Niyati (Fate) I.e. doctrine of absolute determinism. Ajivikas believe that what will happen is entirely pre-ordained or pre-decided and is based on cosmic principles. Hence there was no use of Karma.

Statement 3 is correct. Ajivikas rejected the authority of Vedas like Buddhism and Jainism.

Statement 4 is incorrect. Ajivikas believed in the existence of soul (atman) in every living being like Jainism. But they believed existence of soul in material form whereas Jainism propounds formless soul.

Statement 5 is correct. Ajivika sect reached its peak during the Mauryan period. The Mauryan king Bindusara (4th Century BC) was one of the followers of Ajivika sect.

Q.4) From the given passage identify the cave painting:

This cave painting belongs to a famous Jaina cave temple located in Tamil Nadu. The ceiling of the sanctum and ardha-mandapam of this cave temple contain beautiful paintings. The most important mural is the exquisite composition, Samava-saran, a lotus tank with a disciple collecting flowers and animals and fish frolicking.

Select the correct answer using the code given below:

- a) Armamalai cave Paintings
- b) Sittanavasal cave Paintings
- c) Badami cave Paintings
- d) Leepakshi Paintings

Ans) b

Exp) Option b is the correct answer.

Option a is incorrect. Armamalai Cave Paintings are situated in Vellore district of Tamil Nadu, these natural caves were converted into Jain temple in 8th century. The beautiful colourful paintings on the walls and roof depict the tales of Astathik Palakas (deities protecting eight corners) and Jainism.

Option b is correct. The Sittanavasal Caves or Arivar-koil, a Jaina cave temple. It is located in northwest of Pudukkottai town in Tamil Nadu. This Jaina cave temple is world famous primarily for its mural paintings. The ceiling of the sanctum and ardha-mandapam of this cave temple contain beautiful paintings. The most important mural is the exquisite composition, Samava-saran, a lotus tank with a disciple collecting flowers and animals and fish frolicking.

Option c is incorrect. Badami caves are located in Karnataka, they are one of the earliest surviving Hindu paintings. The murals belonging to 6-7th century AD are of different subjects and resemble the tradition of Ajanta and Bagh. The human subjects have a graceful and compassionate look in them and have big, half-closed eyes with protruding lips

Option d is incorrect. Leepakshi Paintings are located in Andhra Pradesh, these mural paintings were executed on Veerabhadra temple walls at Lepakshi in 16th Century. Made during the Vijaynagara period, they follow a religious theme, based on Ramayana, Mahabharata and incarnations of Vishnu. The paintings show a complete absence of primary colours, especially blue.

Q.5) In the context of astronomy, which of the following statements is correct about the Large Magellanic Cloud?

- a) It refers to a contracting mass of gas which represents an early stage in the formation of a star.
- b) It is a flat ring of icy small bodies that revolve around the Sun beyond the orbit of the planet Neptune
- c) It is an irregular galaxy that orbits around the Milky Way galaxy.
- d) It is a region around the sun over which the effect of the solar wind extends.

Ans) c

Exp) Option c is the correct answer.

Optio c is the correct: Magellanic Clouds are irregular galaxies. They are comprised of two irregular galaxies, the **Large Magellanic Cloud (LMC)** and the Small Magellanic Cloud (SMC), **which orbit the Milky Way once every 1,500 million years and each other once every 900 million years.** Scientists estimate the Small Magellanic Cloud contains around 3 billion stars, while the Large Magellanic Cloud houses some 30 billion stars. These companion galaxies were named for the Portuguese navigator Ferdinand Magellan, whose crew discovered them during the first voyage around the world (1519–22).

Option a is incorrect: Protostar is a contracting mass of gas which represents an early stage in the formation of a star, before nucleosynthesis has begun.

Option b is incorrect: Kuiper belt is a flat ring of icy small bodies that revolve around the Sun beyond the orbit of the planet Neptune. It was named for the Dutch American astronomer Gerard P. Kuiper and comprises hundreds of millions of objects—presumed to be leftovers from the formation of the outer planets—whose orbits lie close to the plane of the solar system.

Option d is incorrect: Heliosphere is the region around the sun over which the effect of the solar wind extends.

Source: <https://www.britannica.com/topic/Magellanic-Cloud>

Q.6) With reference to the Vaisheshika School of Philosophy, consider the following statements:

1. Kannad Kashyap is considered as the founder of this school of philosophy.
2. The school believes that the law of karma is the guiding principle of the universe.
3. It considers that logical thinking and real knowledge are techniques to achieve salvation.
4. It classifies all objects of experience into seven padārtha or categories.

Which of the statements given above are correct?

- a) 1, 2 and 4 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) a

Exp) Option a is the correct answer.

Orthodox school has six sub-schools of philosophy that were called the Shada Darshana. They are Vaishesika, Nyaya, Samkhya, Yoga, Purva Mimansa and Vedanta or Uttara Mimansa.

Statement 1 is correct. Maharshi Kanada Kashyap who also wrote the basic text governing the Vaisheshika school of philosophy is often considered the founder of this school.

Statement 2 is correct. Vaisheshika school believes that the laws of karma guide this universe, i.e. everything is based on the actions of human beings. It believes that we are rewarded or punished according to our actions.

Statement 3 is incorrect. Nyaya's philosophy is constantly stressed that real knowledge and systematic reasoning and thinking is the guiding principle to achieve salvation.

Vaisheshika school believed in salvation, but it was parallel to the creation and destruction of the universe, which was a cyclic process and was decided by the wishes of God. According to Vaisheshika darshana, **Guna-nasha forever is moksha.**

Statement 4 is correct. Vaisheshika school is a system of pluralistic realism, which emphasizes that reality consists in differences. It classifies all objects of experience into **seven padārtha or categories**. The seven categories are substance (dravya); quality (guna); action (karma); generality (sāmānya); particularity (vishesa); inherence (samavāya); and non-being (abhāvā).

<https://www.hindupedia.com/en/Darshana>

Q.7) With reference to the Mughal paintings, consider the following statements:

1. A formal artistic studio called Tasvir Khana was established by Akbar.
2. Daswant, Basawan and Kesu were famous painters in Shah Jahan's court.

3. Representation of flora and fauna as well as decorated margins are characteristics of Jahangir's paintings.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 3 only

Ans) c

Exp) Option c is the correct answer.

The paintings made in the Mughal period had a distinctive style as they were drawn from Persian antecedents. They **focused on hunting scenes, historical events and other court-related paintings**. Even though they made only miniature paintings, the illustrations in paintings are considered amongst the most unique paintings in the world.

Statement 1 is correct. An entire department devoted to the paintings and scribing of his documents was established by Akbar. He established a **formal artistic studio called Tasvir Khana** where the artists were hired on salary, and they developed their own styles.

Statement 2 is incorrect. Famous painters of Akbar's period include **Daswant, Basawan and Kesu**. Prominently illustrated manuscripts during Akbar's reign are **Tutinama, Hamzanama, Anvar-i-Suhaili and Gulistan of Sadi**.

Statement 3 is correct. The Mughal paintings **reached its zenith in the period of Jahangir**. He was a naturalist by nature and preferred **the paintings of flora and fauna, i.e. birds, animals, trees and flowers**. One of the unique trends that developed in this period was of decorated margins around the paintings.

Q.8) In the context of Mahayana Buddhism, which of the following best describes about 'Samyaksambuddha'?

- a) A Bodhisattva who is yet to be born.
- b) A Buddha who achieved enlightenment through Sravakayana.
- c) Someone who has attained enlightenment and has chosen to teach others how to reach this state.
- d) Enlightened Buddha who achieves nirvana without a teacher and chooses not to teach.

Ans) c

Exp) Option c is the correct answer.

Option a is incorrect. Maitreya is a future Buddha who will appear on Earth in the future, achieve complete enlightenment, and teach the pure dharma. He holds his raised hand in the gesture of exposition (vitarka mudra) and in his lowered hand displays a flask (kamandalu).

Option b is incorrect. A Buddha who achieved enlightenment through Śrāvakayāna is called a Śrāvakabuddha. Śrāvakayāna refers to the “vehicle of the sravakas” or “vehicle of the hearers”.

Option c is correct. In Buddhism, a **Samyaksambuddha is someone who has attained enlightenment (or a state of being fully awakened) and has chosen to teach others how to reach this state**. It is also known in Buddhism as nirvana – on his own without the assistance of a teacher. Siddhartha Gautama, better known simply as the Buddha, was considered a samyaksambuddha.

Option d is incorrect. Another type of enlightened buddha is the **pratyekabuddha, who also achieves nirvana without a teacher, but chooses not to teach**.

Source: NCERT Class 11 + <https://www.yogapedia.com/definition/11047/samyaksambuddha>

<https://www.exoticindiaart.com/blog/types-of-buddha-statues-their-meaning-and-importance/>

Q.9) Consider the following statements with respect to the Mysore School of Painting.

1. Under the rule of Raja Krishna Raja Wodeyar, the popularity of the Mysore School of Painting reached its zenith.
2. The use of gesso paste is an important feature of Mysore Painting.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Mysore paintings were patronised by the rulers of the Mysore province and continued in the British period too. The major theme of the Mysore paintings is the depiction of Hindu gods and goddesses.

Statement 1 is correct. Under the rule of **Raja Krishna Raja Wodeyar, the popularity of the Mysore School of Painting reached its highest point.** However, after the Raja expired in 1868, the artists started scattering and the school reached the point of total extinction. **Quite similar to the Tanjore Paintings, Mysore Paintings of India make use of thinner gold leaves** and require much more hard work. The most popular themes of these paintings include Hindu Gods and Goddesses and scenes from Hindu mythology.

Statement 2 is correct. A number of steps are involved in the process of producing a Mysore painting. They use the **'gesso paste', which is a mixture of zinc oxide and Arabic gum.** This gives a particular base to the painting that develops a sheen in the background.

Source: Nitin Singhania Pg 2.23 + <https://www.culturalindia.net/indian-art/paintings/mysore.html>

Q.10) Consider the following statements regarding Oncolytic Virotherapy, recently seen in news:

1. It helps in killing cancer cells while leaving nearby healthy cells and tissues intact.
2. Sometimes, the Natural Killer (NK) cells in the human body may limit the effectiveness of this therapy.

Which of the statements given above is/are correct?

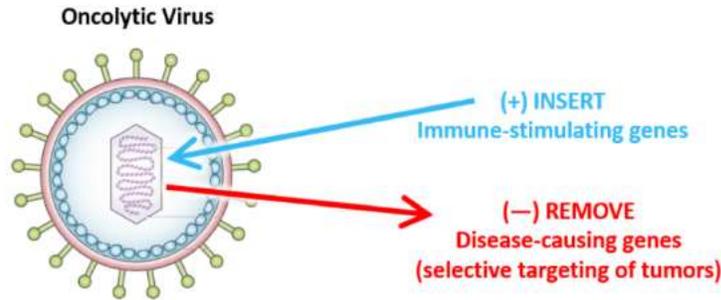

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Researchers in the US have developed a novel strategy in Oncolytic Virotherapy (OV) to improve a cancer therapy that can kill tumour cells while leaving nearby healthy tissues intact.

Statement 1 is correct: Oncolytic viruses can kill cancer cells while leaving nearby healthy cells and tissues intact. The oncolytic virus kills tumor cells and causes the release of danger signals, which help to generate an immune response.

Source: Cancerresearch

Statement 2 is correct: In oncolytic virotherapy, the treatment exerts its influence by activating an antitumor immune response made of immune cells such as Natural Killer (NK) cells. **However, sometimes those natural killers limit the oncolytic viruses** and so despite the exciting development in the OV field in recent years, there is room for improvement to tackle some limitations, including the relatively weak therapeutic activity and lack of means for effective systemic delivery.

Source: <https://blog.forumias.com/oncolytic-virotherapyov-next-gen-cancer-therapy-can-kill-tumours-without-harming-healthy-cells/>

Q.11) Consider the following pairs

School of Philosophy	Path of Salvation
1. Sankhya School	By performing rituals only
2. Yoga School	By meditation and physical application of yogic techniques
3. Nyaya School	By acquiring real knowledge

How many pairs given above are correctly matched?

- Only one pair
- Only two pairs
- All three pairs
- None of the pair

Ans) b

Exp) Option b is the correct answer.

Orthodox school has six sub-schools of philosophy that were called the Shada Darshana. They are Vaishesika, Nyaya, Samkhya, Yoga, Purva Mimansa and Vedanta or Uttara Mimansa.

Pair 1 is incorrect. Sankhya Philosophy is the oldest school of philosophy and was founded by Kapil Muni who is supposed to have written the Samkhya Sutra. It argued that salvation could be attained through the acquisition of knowledge.

The Mimamsa school argues that salvation is possible through performing rituals, but it is also necessary to understand the justification and reasoning behind Vedic rituals.

Pair 2 is correct. The Yoga school literally means the union of two major entities. They argue that human being can achieve salvation by combining meditation and physical application of yogic techniques. The origin of Yoga and the school have been expounded in the Yogasutra of Patanjali that is attributed tentatively to the 2nd century BCE.

Pair 3 is correct. Nyaya school of thought was supposed to be founded by Gautama who is also identified as the author of the Nyaya Sutra. It believe in the technique of logical thinking to achieve salvation. They argue that acquiring 'real knowledge' can only accrue salvation.

Source: Nitin Singhania Ch- 14

Q.12) With reference to ancient history of India, which of the following statements is/are correct in respect of Indo-Greek coins?

1. They had images of kings on one side and Indian/Greek deities on the other.
2. They were marked by the complete absence of Copper metals.
3. They had inscriptions in both Greek as well as Prakrit language.

Select the correct answer using the code given below:

- a) 1 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 3 only

Ans) c

Exp) Option c is the correct answer.

Following the decline of the Mauryan empire, several kingdoms came into existence in Northern India and the Indo Greek was one of those important kingdoms. The Indo-Greek or the Graeco-Indian Kingdom was **founded by Demetrius I, when he invaded India in 180BC. Menander I (reign 165 BC – 145 BC)** is one of the famous kings of Graeco- Indian kingdom.

Statement 1 is correct: The front of the **Indo Greek coins carried the image of the issuing monarch, and the back usually carried the figure of a deity** – Greek deities such as Zeus, Apollo, Poseidon and Indian deities. The Indo Greek kings such as **Pantaleon and Agathocles included Indian deities**, variously interpreted as Hindu deities or the Buddha into their coins.

Statement 2 is incorrect: Various metals such as **Copper, Gold, Silver and Nickel were used in Indo Greek coins**. Therefore, it is not true that Indo Greek coins were marked by the complete absence of copper metals.

Statement 3 is correct: It is true that Indo Greek coins had inscriptions in both **Greek and Prakrit language**, so these coins were bilingual. Further these coins had bilingual inscriptions- **Greek and kharosthi scripts**.

Q.13) Which of the following statements about the Sthanakavasi sect of Jainism are correct?

1. Ascetics of Sthanakavasi cover their mouths with strips of cloth.
2. The Sthanakavasi do not believe in idol-worship.
3. The Sthanakavasi sect emerged from the Lonka sect of Jainism.

Select the correct answer from the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Sthanakavasi sect is associated with the religion of Jainism. Jainism has two significant historical sub-traditions, namely the Digambaras and the Svetambaras. The Digambaras have various sub-sects, including Mula Sangh, Terapanthi, Taranpathi, and Bispanthi, while the Svetambaras have sub-sects such as the Sthanakavasi and Murtipujaka.

Statement 1 is correct: The ascetics of Sthanakvasi cover their mouths with strips of cloth and they do not use the cloth of yellow or any other color except white.

Statement 2 is correct: The Sthanakavasi do not believe in idol-worship at all. As such, they do not have temples but only sthanakas, that is, prayer halls, where they carry on their religious fasts, festivals, practices, prayers, discourses, etc.

Statement 3 is correct: The Sthanakavasi arose not directly from the Shwetambaras but as reformers of an older reforming sect, viz., the Lonka sect of Jainism. This Lonka sect was founded in about 1474 A.D. by Lonkashah, a rich and well-read merchant of Ahmedabad. The main principle of this sect was not to practice idol-worship. A Lonka sect layman, Viraji of Surat, received initiation as a Yati, i.e., an ascetic, and won great admiration on account of the strictness of his life. Many people of the Lonka sect joined this reformer and they took the name of Sthanakavasi, thereby intending to strictly follow on the principles of Lord Mahavir. Q.14) Which of the following cultural practices in India have been included under UNESCO's list of intangible cultural heritage?

1. Patola Silk Textile
2. Mudi yettu
3. Dashavatar
4. Yoga
5. Tolu Bommalatta
6. Durga Puja

Select the correct answer from the code given below:

- a) 1, 2 and 3 only
- b) 2, 4 and 6 only
- c) 1, 4 and 5 only
- d) 2, 5 and 6 only

Ans) b

Exp) Option b is the correct answer.

Intangible cultural heritage refers to the practices, expressions, knowledge, skills, and traditions that communities, groups, and individuals recognize as part of their cultural heritage. These can include oral

traditions, performing arts, social practices, rituals, festive events, knowledge and practices concerning nature, and traditional craftsmanship. UNESCO maintains a list of intangible cultural heritage elements that have been recognized for their cultural significance and are actively promoted for safeguarding and preservation.

Statement 1 is incorrect: Not included in the Intangible cultural heritage list. Patola silk textiles are unique to the Patan region of Gujarat and are produced using a complex process known as double ikat.

Statement 2 is correct: Mudiyettu, included in 2010: A traditional ritual theatre, Mudiyettu, is a folk dance and drama performed in the State of Kerala. It depicts the mythological tale of a battle between the Goddess Kali and the demon Darika

Statement 3 is incorrect: Not included in the Intangible cultural heritage list. Dashavatar is a traditional theatre form performed during the annual festival of the village deity in the temple premises. It has a history of eight hundred years and depicts the ten incarnations of Lord Vishnu

Statement 4 is correct: Yoga, included in 2016. It consists of a series of poses, meditation, controlled breathing, word chanting and other techniques to help a person build self-realisation.

Statement 5 is incorrect: Not included in the Intangible cultural heritage list. The Tolu Bommalatta is a form of shadow puppet theatre tradition in India, which is predominantly practiced by the Killekyata/Are Kapu community in the state of Andhra Pradesh.

Statement 6 is correct: Durga Puja, included in 2021 is a ten-day festival celebrated in autumn to honour the Goddess Durga and her victory over the demon Mahishasur. The festival starts with Mahalaya, and the main festivities begin on Shashti, Shaptami, Ashtami, and Nabami.

Knowledge Base: List of Intangible Cultural Heritage in India

- 1) Buddhist Chanting
- 2) Kalbelia
- 3) Chhau Dance
- 4) Koodiyattam
- 5) Kumbh Mela

Q.15) Recently, Kurki system of Punjab was seen in the news. With reference to the Kurki system, consider the following statements:

1. It means attachment of a farmer's land, pledged to a money lending entity, in case of loan default.
2. Kurki orders are executed under Section 60 of Civil Procedure Code, 1908.
3. Recently, the supreme court ordered a complete ban on the Kurki system due to its exploitative nature.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Statement 1 is correct: Kurki means attachment of a farmer's land, already pledged to the money lending institution or individual, in case of a loan default. Apart from banks, private moneylenders, commission agents also get these decrees against farmers from time to time.

Statement 2 is correct: Kurki orders are executed under Section 60 of Civil Procedure Code, 1908. **The land which is pledged by the farmer to the bank or money lender gets registered in their name.** In some cases, the land is auctioned as well. The process begins after the money lender moves court to get kurki orders in case the farmer is unable to pay back his loan. In kurki, attachment of farmer's land as well as his tractor can be done as per the Section 60.

Statement 3 is incorrect: As of now, Supreme Court has not put ban on the Kurki system. However, a plea filed in the Punjab and Haryana High Court in 2018 sought complete ban on kurki.

But, Punjab government in its affidavit stated that there was no need to ban kurki as relief was being given to farmers in terms of loan waiver, compensation etc. The court stated that Section 60 of Civil Procedure Code, 1908 – under which kurki takes place – was over 110 years old and needed complete revision.

Source: <https://indianexpress.com/article/explained/what-is-kurki-and-why-is-it-a-big-issue-in-punjab-8129733/>

Q.16) Which of the following statements are correct about the Varkari Sect?

1. The followers of the Varkari sect are devotees of Lord Vishnu in his manifestation as Vithoba.
2. The Varkari sect avoids the use of alcohol and tobacco.
3. Tukaram was associated with this sect.
4. An annual pilgrimage known as Vari is made to Pandharpur by Varkaris.

Select the correct answer from the code given below:

- a) 2 and 4 only
- b) 1 and 3 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

The word "Varkari" is derived from "vari" meaning occurrence or periodic schedule and "kari" meaning doer, signifying someone who regularly makes the pilgrimage to Pandharpur. The pilgrimage route follows the path of important poet saints of the bhakti movement in Maharashtra, who emphasized social equality, immediate experience of divinity, and religious poetry in vernacular languages accessible to non-elite communities.

Statement 1 is correct: The Varkari sect is a devotional movement in Maharashtra, India that is centered on the worship of Lord Vishnu in his manifestation as Vithoba.

Statement 2 is correct: The Varkari sect follows a strict moral code that includes the avoidance of alcohol and tobacco, among other things.

Statement 3 is correct: Prominent figures under this sect include Jnaneshvar (1275–1296), Namdev (1270–1350), Eknath (1533–1599), and **Tukaram (1598– 1650).**

Statement 4 is correct: The main center of worship for the Varkaris is the Vithoba temple in Pandharpur, Maharashtra, where they make an **annual pilgrimage known as the Vari.**

Q.17) Which of the following statements are correct about the Mimamsa school of philosophy?

1. Mimamsa focuses on the analysis of texts from Vedic Samhita and Brahmanas.
2. This School believed that reason and rationality should be applied to all aspects of life and there is no such thing as eternal truth.
3. According to this philosophy, salvation can be achieved by performing rituals.

Select the correct answer using the code given below:

- a) 1 and 3 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2, and 3

Ans) a

Exp) Option a is the correct answer.

The word 'Mimamsa' literally means the art of reasoning, interpretation and application. The texts that describe the Mimamsa philosophy in detail, are the Sutras of Jaimini, which were supposedly composed in the 3rd century BCE. Further inroads into the philosophy were made by two of their greatest proponents: Sabar Swami and Kumarila Bhatta.

Statement 1 is correct: Mimamsa school of philosophy is focused on the analysis of texts from **Samhita and Brahmana**, which are considered the most important Vedic texts.

Statement 2 is incorrect: Mimamsa school of philosophy believed in the existence of eternal truths, they argue that the **Vedas contain the eternal truth** and they are the repositories of all knowledge. If one has to attain religious merit, acquire heaven and salvation, they would have to fulfill all the duties which are prescribed by the Vedas.

Statement 3 is correct: Mimamsa school of philosophy focused on the performance of Vedic rituals as a means of attaining worldly prosperity and liberation from the cycle of birth and death. They argue that salvation is possible through performing rituals but it is also necessary to understand the justification and reasoning behind vedic rituals. It was necessary to understand this reasoning if one wanted to perform the rituals perfectly, which will allow them to attain salvation.

Q.18) With reference to Hinayana Buddhism, consider the following statements:

1. Hinayana Buddhism believes in individual salvation through the path of self-discipline and meditation.
2. One of the sub-sects of Hinayana is Sthaviravada or Theravada.
3. Being an old school, the Scholars of Hinayana predominantly used Sanskrit as a language to communicate.
4. Emperor Ashoka patronised Hinayana sect.

Which of the above given statements are correct?

- a) 3 and 4 only
- b) 1, 2, and 3 only
- c) 1, 2 and 4 only
- d) 1 and 4 only

Ans) c

Exp) Option c is the correct answer.

The Hinayana school is also known as the lesser vehicle, which is the school of the followers of the original preaching of the Buddha. This school is more orthodox and does not believe in idol or image worship of Buddha.

Statement 1 is correct: They believe in individual salvation and try to attain individual salvation through self-discipline and meditation. Ultimate aim of Hinayana is nirvana.

Statement 2 is correct: One of the sub-sects of Hinayana is Theravada, also known as Sthaviravada. The name Theravada means "the teaching of the elders" or "the way of the elders. The goal of Theravada Buddhism is individual liberation from suffering, and the ideal practitioner is the arhat. The monastic tradition is also a central aspect of Theravada Buddhism.

Statement 3 is incorrect: Hinayana Buddhism is an old school that predominantly used Pali language, not Sanskrit to interact with masses.

Statement 4 is correct: Emperor Ashoka patronized the Hinayana sect as the Mahayana school came into being much later. However, the Hinayana school in its original form is almost non-existent in the present age.

https://www.bbc.co.uk/religion/religions/buddhism/subdivisions/theravada_1.shtml#:~:text=up%20to%20us-,Theravada%20life,to%20full%2Dtime%20monastic%20life.

Q.19) Consider the following statements about Dashanam Sanyasis, one of the prominent sects under Hinduism:

1. They are associated with Advaita philosophy.
2. Disciples of Shankaracharya were the followers of this sect.
3. Aranya, Bharati and Giri are some of the sub-orders under Dashanam Sanyasis.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Sanyasi means one who abandons the desires of the world and the body. Dashnami sanyasis are Hindu Shaivite ascetic who belongs to one of the 10 orders (dashnami, "ten names"). They are also called "Dash Nam Sanyasi" as they are further divided into ten groups.

Statement 1 is correct: They are associated with Advaita Vedanta philosophy. Advaita Vedanta says that fundamental nature of reality is nothing but unlimited conscious existence. Whereas Vishishta Advaita says along with fundamental reality there is existence of Maya.

Statement 2 is correct: This sect was established by Adi Shankaracharya in 8th century CE. The disciples of Adi Shankaracharya were the followers of this sect.

Statement 3 is correct: The ten groups under Dashanam Sanyasi sect are Aranya, Ashrama, Bharati, Giri, Parvata, Puri, Sarasvati, Sagara, Tirtha, and Vana. Each of these orders is attached to one of four monasteries (mathas), established by Adi Shankaracharya, in the north, south, east, and west parts of India.

Q.20) Consider the following statements regarding the National Single Window System (NSWS):

1. It is a one-stop digital platform that allows investors to apply for various approvals required for commencing a business in the country.
2. It was launched by the Ministry of Environment, Forest and Climate Change
3. Jammu & Kashmir is the first Union Territory to get integrated with the NSWS.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: National Single Window System (NCWS) is a one-stop digital platform that aims at allowing investors to apply for various pre-operations approvals required for commencing a business in the country. The system aims to make the business registration process easier, allowing the beneficiary to get significant approvals online, without having to run to the government offices for approvals and can avail themselves of services with just a click.

Statement 2 is incorrect: The Union Ministry of Commerce and Industry (and not the Ministry of Environment, Forest and Climate Change) has launched the National Single Window System (NSWS) for investors and businesses.

Statement 3 is correct: Jammu & Kashmir is the first Union Territory to be onboarded the National Single Window System (NSWS). This marks a major leap in Ease of Doing Business (EoDB) in the Union Territory.

Q.21) Consider the following statements about Charvaka school of philosophy in India.

1. Charvaka school was founded by Jaimini.
2. They argued against the need to achieve salvation.
3. They did not consider ether as one of the five essential elements of universe.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Charvaka was a philosophical system of thought that emerged in India around 600 BCE and emphasised materialism to understand and live in the world. It was supposed to be one of the earliest schools that developed a philosophical theory. The philosophy is old enough to find mention in the Vedas and Brihadarankya Upanishad.

Statement 1 is incorrect: Charvaka school of philosophy was propounded by Brihaspati and not Jaimini. This school argues that there is no other world after this one, hence death is the end of a human being and pleasure should be the ultimate objective of life. This theory focuses to 'eat, drink and make merry'.

Statement 2 is correct: The Charvaka School was the main proponent of the materialistic view. They argued against the need to achieve salvation and denied the existence of brahma and God. They believed only in things that could be touched and be experienced by the human senses.

Statement 3 is correct: The Charvakas do not consider ‘ether’ as one of the five essential elements as it cannot be experienced through the perception. Hence, they say the universe consists of only four elements: fire, earth, water and air.

Source: Nitin Singhania, Chapter 14.

Q.22) With reference to the Vijayanagar Empire in India, what did the terms ‘Barkur gadyanas’ and ‘Bhatkal gadyanas’ refer to?

- Arms factories
- Places where coins are minted
- Small units of royal spies
- Naval units of the empire

Ans) b

Exp) Option b is the correct answer.

The Vijayanagara Empire (14th–17th century) issued large quantities of gold coins and other metals used in their coinage were pure silver and copper. The **earlier Vijayanagara coinage was produced in different mints and was called by different names such as Barkur gadyanas, Bhatkal gadyanas, etc.** The inscriptions on the coins were in Kannada or Sanskrit.

Source: Indian Art and Culture by Nitin Singhania Chapter-22

Q.23) Consider the following pairs of Indian festivals and states in which they are predominantly celebrated:

Festivals	:	State
1. Saga Dawa	:	Kerala
2. Losoong	:	Sikkim
3. Hornbill	:	Nagaland
4. Kang Chingba:		Manipur

Which of the pairs given above is/are correctly matched?

- 1 and 2 only
- 3 only
- 2, 3 and 4 only
- 1, 3 and 4 only

Ans) c

Exp) Option c is the correct answer.

Festivals and fairs form an intrinsic part of Indian culture being an outpouring medium of our beliefs and emotions. Each community has their own festivals and holy days.

Pair 1 is incorrect: Saga Dawa is also known as Buddha Purnima or Buddha Jayanti which is celebrated as the birth anniversary of Lord Buddha. In Sikkim, Buddha Purnima is known and celebrated as Saga Dawa (and not in Kerala). It falls in the month of April/ May every year.

Pair 2 is correct: Losoong festival is celebrated in honour of the Sikkimese New year. It is celebrated across the State of Sikkim during the month of December every year. It is the celebration of the harvest season by the farmers and other occupational communities. Traditionally, it is the festival of the Bhutia tribe but now-a-days even the Lepchas celebrate it with equal vigour and joy.

Pair 3 is correct: Hornbill festival is one of the major agricultural festivals celebrated in the State of Nagaland. It's a week-long festival that begins on 1st December every year. All the major Naga tribes attend this festival and congregate at the Kisama Heritage village.

Pair 4 is correct: The festival of Kang Chingba is one of the biggest Hindu festivals celebrated in the State of Manipur. It is mainly celebrated by Meitei community who follow Vaishnavism. It is like the 'Jagannath Puri Rath Yatra' and draws many antecedents from the same. The festival of Rath-Yatra/ Kang is celebrated with gaiety on the second day of the fourth lunar month of the Manipuri calendar Engen which falls in late June or early July and lasts for 10 days till Purna-Yatra/ Kanglen.. The festival includes a Rath Yatra, which re-enacts the journey of Lord Jagannath along with his brother Balabhadra and his sister Subhadra. However, due to cultural evolution in the region, there is a slight difference in the way how the festival is celebrated in Manipur from that in Odisha.

Q.24) Consider the following statements about the Lingayat Sect popular in India:

1. It is a religious tradition founded by Basaveshwara, popularly known as Basavanna.
2. This tradition believes in monotheism.
3. It promoted caste system to maintain the social order.
4. It rejected the authority of the Vedas.

Which of the statements given above are correct?

- a) 1 and 3 only
- b) 2 and 4 only
- c) 1, 2 and 4 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

The Lingayats/ Virshaivas are a Shaivite sect in Hinduism that emerged in the 12th Century AD in Karnataka during the reign of Kalachuri dynasty.

Statement 1 is correct: Lingayatism was founded by Basaveshwara, popularly known as Basavanna in the 12th century AD in Karnataka.

Statement 2 is correct: Lingayatism is a distinct Shaivite tradition which believes in monotheism through worship centered on Lord Shiva in the form of linga. The followers are called Virshaiva (heroes of Shiva) or the Lingayats (wearers of Shivalinga).

Statement 3 is incorrect: Lingayats opposed the caste system and other Hindu rituals. As they advocated a society where all people were considered equal, all skills and professions were similarly valued, and sincerity was enough to gain the love of God.

Statement 4 is correct: Lingayats reject the authority of vedas and all the elaborate Hindu rituals prescribed by the Hindu priests. They wanted a more egalitarian society and greater individual freedom.

Source: Nitin Singhania, appendix 2, Bhakti and Sufi movements.

Q.25) Which among the following statements best describes the term “smurfing”, often mentioned in the media?

- a) It is a money-laundering technique involving the structuring of large amounts of cash into multiple small transactions.
- b) It is a type of malware that downloads onto a computer disguised as a legitimate program.
- c) It is a gene editing technology which involves introduction of genes from foreign species.
- d) It is an unethical practice where an investor sells shares that he does not own at the time of a trade.

Ans) a

Exp) Option a is the correct answer.

Option a is correct: Smurfing is a money-laundering technique involving the structuring of large amounts of cash into multiple small transactions. Smurfs often spread these small transactions over many different accounts, to keep them under regulatory reporting limits and avoid detection. Smurfing is a form of structuring, in which criminals use small, cumulative transactions to remain below financial reporting requirements.

Option b is incorrect: A Trojan Horse Virus is a type of malware that downloads onto a computer disguised as a legitimate program.

Option d is incorrect: Short selling happens when an investor sells shares that he does not own at the time of a trade. In a short sale, a trader borrows shares from the owner with the help of a brokerage and sells it at market price with the hope that prices will fall. When prices drop, the short seller buys the shares and books a profit.

Source: <https://www.investopedia.com/terms/s/smurf.asp>

Q.26) “It is one of the biggest congregations in North East India as it has been dubbed as the ‘Mahakumbh of the East’. The festival falls in the month of June. During the festival, various agricultural work like digging, ploughing, sowing, and transplanting of crops are forbidden for some days. Widows, Brahmacharis and Brahmins avoid cooked food during these days.”

- a) Ambubachi Mela
- b) Losar Festival
- c) Hornbill Festival
- d) Bihu Festival

Ans) a

Exp) Option a is the correct answer.

Festivals and fairs forms an intrinsic part of Indian culture being an outpouring medium of our beliefs and emotions. Each community has their own festivals and holy days but that does not stop other religious groups from enjoying these festive days. India is a secular country and holidays are declared for a number of festivals belonging to different faiths and communities.

Option a is correct: Ambubachi Mela is held at Kamakhya temple of Guwahati in the State of Assam. Ambubachi Mela is one of the biggest congregations of eastern India. It is the most important festival of the Kamakhya temple and is celebrated in the month of June every year. It has been dubbed as the ‘Mahakumbh of the East’. The festival has been associated with fertility rituals and many devotees come to seek the blessing of a child from the Goddess. During the festival, the patron Goddess Kamakhya is said to be undergoing her annual menstrual cycle. Hence, the temple remains closed for three days. **“Ambubachi” means spoken with water and it also implies that the rains expected during this month make the earth fertile and ready for procreation. For some days, all agricultural work like digging, ploughing, sowing, and transplanting of crops are forbidden. Widows, Brahmacharis and Brahmins avoid cooked food during these days.**

Option b is incorrect: Losar Festival falls on the first day of the lunar calendar and is **quite popular in Arunachal Pradesh** (being mainly celebrated by **Monpa tribe** who practice agriculture and animal husbandry and follow Buddhism). Losar is a three day festival and is celebrated with a great pomp and show at Tawang.

Option c is incorrect: Hornbill Festival is one of the major festival celebrated in **Nagaland**. It is a **10 day festival** that begins on 1st December every year. All the major Naga tribes attend this festival and congregate at the Kisama Heritage Village. All the tribes showcase their talent and cultural vividness through costumes, weapons, bows and arrows and headgears of the clans. This is also a good opportunity to bring all the tribes together and for the younger generation.

Option d is incorrect: Bihu Festival is a set of three important **non-religious festivals of Assam** - Rongali or Bohag Bihu observed in April, Kongali or Kati Bihu observed in October, and Bhogali Bihu observed in January. **Rongali Bihu is the most important among the three and it coincides with Assamese New Year.** Songs and dances are the main attractions during Bihu. **Bohag Bihu** is one of the most popular festivals of Assam. The festival of Bihu is traditionally tied to the changing seasons and harvests. The celebrations range from one week to almost a month depending on the communities and tribes' decision.

Q.27) Which of the following statements is/are correct with reference to the Paitkar painting?

1. This form of painting has a cultural association with Ma Mansa.
2. A theme of Paitkar paintings is 'What happens to human life post death'.
3. Recently it has been given Geographical Indication (GI) Tag.

Select the correct answer using the code given below:

- a) 2 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Paitkar painting is a folk painting found in East India in the form of scrolls. The Paitkar Painting occurs in the bordering areas of Jharkhand, West Bengal and Orissa and considered as the old age tribal painting of India.

Statement 1 is correct: This form of painting has cultural association with Ma Mansa (Hindu Goddess of Snakes), one of the most popular goddesses in tribal household. These paintings are linked to the social and religious customs including giving alms and holding yajnas.

Statement 2 is correct: Common theme of Paitkar paintings is 'What happens to human life post death'. Although an ancient art, it is on the verge of extinction given the rate of its decline. Having a common subject of what happens to life after death. These paintings have been long used in for storytelling and in socio-religious customs.

Statement 3 is incorrect: The Paitkar painting has not been given GI tag yet.

Q.28) With reference to the Ancient Monuments and Archaeological Sites and Remains Act (or AMASR Act) of 1958, consider the following statements:

1. The AMASR Act only provides for denotification of a monument if it ceases to be of national importance.
2. The AMASR Act created a "prohibited area" 100 metres around every national monument where no construction is permitted.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

The Ancient Monuments and Archaeological Sites and Remains Act (or AMASR Act), 1958 is an act of the government of India that provides for the preservation of ancient and historical monuments. **It was passed in 1958. The Archaeological Survey of India functions under the provisions of this act.**

Statement 1 is correct: The AMASR Act only provides for denotification of a monument if it ceases to be of national importance. Recently, the ASI had admitted to a Parliamentary Committee about 24 missing monuments, and loss of another 26 to factors like urbanisation and submerging in dams.

Statement 2 is correct: The AMASR Act was substantially amended in 2010 to strengthen several of its provisions. The main features of the amendments were the creation of a “prohibited area” 100 metres around every national monument where no construction, public or private is permitted, “regulated area” 200 metres beyond the prohibited area, where any construction requires permission of a newly constituted National Monuments Authority. Given the unique nature of each monument, the Act also proposed heritage bye-laws for each monument to be prepared by an expert body.

Q.29) With reference to the paintings of India, consider the following statements about the “Apabhramsa School of Art”:

1. The themes of these paintings are mostly related to Jainism.
2. There is predominance of single figures in the paintings.
3. Human figures depicted in the paintings usually have fish-shaped bulging eyes and double chin.

Which of the statements given above is/are correct?

- a) 2 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Apabhramsa School of Art or Jain School of Art or simply known as Western Indian School of Art was a predominant school of art in western India during 11th to 15th century. It grew as a reaction to the great mural paintings of Ajanta along with **Pala school of art**. The main difference between Apabhramsa and Pala school of art was the difference of their patrons’ faith. The Apabhramsa school was patronized by Jain Solanki rulers of Gujarat and Rajasthan, so these paintings were dominated by Jain iconography, whereas Pala school was patronized by Buddhist rulers, so their paintings were dominated by Buddhist imagery.

Statement 1 is correct: The Apabhramsa School of Art traces its origin to Gujarat and Mewar region in Rajasthan. **The most common themes of these paintings were Jain** and in the later period the Vaishnava School appropriated them too. They brought in the concept of Gita Govinda and secular love into these paintings that were otherwise **dominated by the Jain iconography**. In the early Jain phase, the paintings were made on Palm leaf but in the later period they were made on paper. The colours used in the paintings had symbolic meaning and they usually used red, yellow and ochre. **In the later phase, they used bright and gold colours.**

Statement 2 is correct: The Apabhramsa school of paintings is characterized by **lonely single figures in the paintings, and one rarely finds group paintings.**

Statement 3 is correct: The features of **the Apabhramsa School of Art** is **fish-shaped bulging eyes, a pointed nose and a double chin.** They tried to begin the trend to make angular faces. The figures are usually stiff and even the ornamentation is carefully done. The female figurines have enlarged hips and breasts. The animal and bird figurines in the paintings are represented as toys. **The Kalpasutra and Kalakacharya-Katha are two heavily illustrated Jain text by Apabhramsa artist.** The Kalpasutra contains the biographies of the Jain Tirthankaras, notably Parshvanatha and Mahavira.

Q.30) Consider the following statements regarding E-Baal Nidan Portal:

1. It is established by the National Commission for Protection of Child Rights in 2015.
2. It is an online portal wherein any person can register a complaint reporting any violation committed against a child.
3. The progress of redressal of the complaint can be tracked by the complainant.

Which of the statements given above is/are correct?

- a) 3 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: E-Baal Nidan Portal is launched by National Commission for Protection of Child Rights- NCPCR in 2015.

Statements 2 and 3 are correct: It is an online portal with the Web Address, wherein any person can register a complaint reporting about any violation committed against a child and after such registration, the complainant will get a complaint registration number. Through this number, the progress of redressal of the complaint in the Commission can be tracked by the complainant. The registration form is prepared in such a way that all the aspects of a complaint can be enumerated and details can be provided by the complainant. The details that are included in the form are the date of incidence, place of incidence, information about the victim, the authority, the nature and category of complaint, what action was initiated, etc.

<https://pib.gov.in/Pressreleaseshare.aspx?PRID=1859646#:~:text=wherein%20any%20person%20can%20register%20a%20complaint%20reporting%20about%20any%20violation%20committed%20against%20a%20child%20and%20after%20such%20registration%20>

Q.31) With reference to the Antiquities and Art Treasures Act of 1972, consider the following statements:

1. No private person is allowed under the act to export even registered antiquities.
2. All articles, manuscripts, etc. inherited by a person, falling within the definition of the term 'antiquity', are required to be registered under the Act.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Antiquities and Art Treasures Act, 1972 was enacted for the effective control over the movable cultural property consisting of any type of art objects and antiquities. The Act is one step forward in controlling the export trade in Indian antiquities and preventing any smuggling and fraudulent dealings.

Statement 1 is correct: It is pertinent to note that **no private person is allowed under the Act to export antiquities**. It is **only lawful for the Central Government or any authority or agency authorized by the Central Government in this behalf**, to export antiquities. If any person exports or attempts to export any antiquity in contravention of the aforesaid provision of the Act, he shall be punishable with imprisonment for a term.

Statement 2 is incorrect: **Not all articles, manuscripts, records, sculptures, coins** etc. possessed/collected/ inherited by you which fall within the definition of the term 'antiquity', are **required to be registered under the Act**. The Central Government, from time to time, in its notification in the Official Gazette specifies those antiquities which are mandatorily required to be registered under the Act.

Q.32) Among the following, the beauty and exquisiteness of Mural Paintings can be seen in-

- 1. Bagh caves
- 2. Jogimara caves
- 3. Ellora caves

Select the correct answer using the code given below:

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Mural paintings are **painted on the walls or a solid structure**. These have existed in India since ancient times and can be dated between 10th century BC and 10th century AD.

The beauty and the exquisiteness of mural paintings can be seen in places like **Ajanta, Armamalai Cave, Ravan Chhaya Rock shelter, Bagh caves, Sittanavasal caves and Kailasanatha temple in Ellora**.

Option 1 is correct. **Bagh caves in Madhya Pradesh** with their exquisite work rank quite close to the actual Ajanta caves in terms of their design, execution and decoration. Cave no. 4, known as Rang Mahal, has beautiful **murals** on the walls depicting Buddhist and Jataka tales.

Option 2 is correct. **Jogimara** is an artificially carved-out cave located in the Surguja district of Chattisgarh. It has the Mural paintings of dancing couples and animals like elephants and fish. The paintings have a distinct red outline. Other colours like white, yellow and black are also used.

Option 3 is correct. The mural paintings in **the Ellora caves** are found in five caves, mostly limited to the Kailasa temple. Some prominent Ellora cave paintings are: Images of Goddess Lakshmi and Lord Vishnu, Lord Shiva with his followers, and Beautiful and gracious Apsaras.

Source: Nitin Singhania Ch-2

Q.33) With reference to Ajanta Paintings, consider the following statements:

1. Some of these paintings date back to the first century CE.
2. The mural painting of Bodhisattva Padmapani can be found only in Ajanta caves.
3. Chinese traveller Hiuen Tsang mentioned the marvel of Ajanta Paintings in his account.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 3 only

Ans) b

Exp) Option b is the correct answer.

Ajanta rock-cut caves carved out of granite cliffs are located in the gorge of **Waghora river near Ajanta village in the Aurangabad district of Maharashtra**. Ajanta caves houses one of the world-famous ancient paintings called Ajanta paintings.

Statement 1 is correct: The **Ajanta paintings belong to the period of first century CE to seventh century CE** and paintings reached their **zenith** during the **Gupta** period. Most of the paintings depict Buddhist subject. Ajanta paintings were accidentally discovered by a British hunting party headed by **Captain John Smith in 1819**.

Statement 2 is incorrect: Besides Ajanta caves the **mural paintings of Bodhisattva Padmapani are also found in Bagh caves**. Cave 4 or Rang Mahal (Palace of Colours) of Bagh caves houses a painting of the bodhisattva Padmapani which resembles Ajanta paintings.

Statement 3 is correct: **Hiuen Tsang, the Chinese traveller** mentioned the marvels of Ajanta paintings in his account of India around the **7th century**. However, he may have **never really visited the caves himself** and his writing is based on accounts heard from fellow travellers.

Q.34) With reference to the cultural history of Ancient India, which of the following statements is correct in respect of Ajnana sect?

- a) Salvation can be achieved by practising strict discipline.
- b) Salvation cannot be achieved by attaining knowledge about nature.
- c) Humans can achieve salvation faster by practising rituals.
- d) Surrendering oneself to God is the best means to achieve salvation.

Ans) b

Exp) Option b is the correct answer.

Shramana means one who performs acts of austerity and asceticism. It refers to several Indian religious movements parallel to Vedic religion. The various **Shramana schools include Jainism Buddhism, Ajivikas and Ajnanas and Charvakas**.

Option b is correct: Ajnana sect believed that it is impossible to attain knowledge about nature. Even if it is possible, it is useless for attaining salvation. Therefore, this sect believed that salvation cannot be achieved by **attaining knowledge about nature**.

The Ajnana sect was part of the **Sramana movement** and a **major rival of early Buddhism, Jainism and the Ajivika school**. Buddhist and Jain texts mentioned about the Ajnana sect and **Sanjaya Belatthiputta** was one of the major proponents of this school of thought.

Option a, c and d are incorrect: Ajnana sect does not believe in practising strict discipline nor surrendering oneself to god or practising rituals as a means for achieving salvation. In fact Ajanan sect did not propose any doctrine of their own, rather they were **specialised in refutation ie, they proved other religious doctrine as false** and Buddhism, Jainism and Ajivika school were their major rivalries.

Q.35) The term Kappaphycus alvarezii was recently seen in the news. Which among the following options best conveys its meaning?

- Newly discovered honeybee species endemic to the Western Ghats.
- An invasive species of seaweed native to IndoPacific region.
- A newly discovered species of jumping spider of the Tanzania genus in Asia
- A lethal fungus that poses extreme threat to the survival of some amphibian species.

Ans) b

Exp) Option b is the correct answer.

Option a is incorrect: A new species of endemic honeybee has been recently discovered in the Western Ghats. The new species has been named Apis karinjodian and given the common name Indian black honeybee.

Option b is correct: Kappaphycus alvarezii is seaweed (alga) which is native to the Indo-Pacific region. The International Union for Conservation of Nature lists it as one of the world's 100 most invasive species. It is one of the prime threats that killed the corals near Kurusadai which was deliberately introduced in Ramanathapuram for commercial cultivation some two decades ago.

Option c is incorrect: A spider researcher from Ahmedabad recently discovered a new species of jumping spider of the Tanzania genus on the outskirts of Rajkot. The new species, which the researchers have named after Indian biochemist Yellapragada Subbarao, is the first species of the Tanzania genus to be recorded anywhere in Asia.

Option d is incorrect: Batrachochytrium dendrobatidis (Bd) is a lethal fungus that causes chytridiomycosis – a deadly disease that is wiping out hundreds of amphibian species. The pathogen affects the keratin in the skin of amphibians and is spreading across Africa, killing out or driving to the verge of extinction hundreds of amphibian species.

Q.36) Consider the following pairs

Paintings	States
1. Pattachitra	Andhra Pradesh
2. Patua	West Bengal
3. Kalighat	Punjab
4. Kalamkari	Maharashtra

How many pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) All four pairs

Ans) a

Exp) Option a is the correct answer.

Folk painting is assuredly the oldest traditional art still being created in India. It may include handmade elements, may be decorative or utilitarian, learned formally or informally, it may also be self-taught.

Pair 1 is incorrect. The name **Pattachitra** comes from a Sanskrit word patta, which means canvas/cloth and chitra means picture is a traditional painting of **Odisha**. The themes of these paintings are inspired from Jagannath and Vaishnava cult, sometimes from Shakti and Shaiva cults. Pattachitra on palm leaf is known as talapattachitra.

Pair 2 is correct. **Patua is an art of Bengal which dates back around a thousand years.** It started out as a village tradition by painters telling Mangal Kavyas. These were painted on cloth and told religious stories; today they are painted with poster paints on sheets of paper sown together, usually used to comment on political and social issues.

Pair 3 is incorrect. **Kalighat is a painting of West Bengal (and not Punjab).** **Watercolors** were used on mill paper using brushes made of calf and squirrel hair. Originally, the paintings depicted religious note, especially Hindu Gods and Goddesses. Over time, these paintings were used to express social sentiments.

Pair 4 is incorrect. The main centers for **Kalamkari art are Srikalahasti and Machilipatnam in the state of Andhra Pradesh.** The pen used is made of sharp pointed bamboo, used to regulate the flow of colours. The base is cotton fabric while the colours used are vegetable dyes.

Source: Nitin Singhania Ch-2

Q.37) With reference to art and archaeological history of India, Tamasha paintings belong to which of the following schools of painting?

- a) Mewar school of painting
- b) Marwar school of painting
- c) Bundi school of painting
- d) Kishangarh school of painting

Ans) a

Exp) Option a is the correct answer.

Although in mediaeval India the Mughal paintings dominated the scene, many regional paintings emerged in Northern parts of India. These paintings are deeply rooted in the Indian traditions, taking inspiration from Indian epics, religious texts like the Puranas, love poems in Sanskrit and other Indian languages.

Option a is correct: Tamasha paintings is a school of Mewar paintings which show court ceremonial and city views in unprecedented details. Initially Mewari painting focuses on Sahibdin (one of the famous painters of Mewar paintings) depiction of **literary texts** – the Rasikapriya, the Ramayana and the Bhagavata Purana. After Sahibdin's death, the style of Mewari paintings changed to depict life at court in Mewar.

Option b is incorrect: Marwar School of Painting was practised in the Jodhpur and Bikaner region of Rajasthan. In this painting men and women wore colourful clothes. **Raja Man Singh (1803-1843)** patronised a series of paintings including the **Shiva Purana, Natacharitra, Durgacharitra, Panchtantra, etc.**

Option c is incorrect: Kishangarh style of painting was practised in Ajmer district of Rajasthan and it is considered a synthesis of Mughal and local style. The theme of this painting is a **love tale between Krishna and Radha**. The famous **Bani Thani painting belongs to the Kishangarh school of painting**.

Option d is incorrect: Bundi school of painting is dated back to 1625 AD and practised majorly in Bundi district of Rajasthan. **Life of Krishna forms a major theme in this school of painting**. Human faces were round with pointed noses in the paintings. Colour of the sky is painted in different colours and mostly a red ribbon is visible in the sky. A painting showing Bhairavi Ragini, in the Allahabad Museum is one of the earliest examples of Bundi painting.

Q.38) Consider the following statements with reference to Jainism:

1. Earliest record of Digambara beliefs is contained in the Suttapahuda of Kundakunda.
2. Digambara Jains believe that women cannot be tirthankaras.
3. Digambaras do not follow all the five constraints as espoused in Jainism.

Which of the above-given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The Jainism branched into several sects such as Digambara and Svetambara and various subsects.

Statements 1 is correct: The earliest record of Digambara beliefs is contained in the Prakrit Suttapahuda of Kundakunda. The Digambara School has two major sub-sects which is Mula Sangh known as the original community. The other one is Bispanthi, Terapanthi, and Taranpanthi known as the modern community.

Statements 2 is correct: Digambara Jains believe that women can not be tirthankaras and that Malli was a man. Whereas Svetambaras believe tirthankaras can be men or women, and say that Malli began her life as a princess.

Statement 3 is incorrect: Digambaras follow all the five constraints as espoused in Jainism, which are Ahimsa (non-violence), Satya (truthfulness), Asteya (non-stealing), Brahmacharya (celibacy) and Aparigraha (non-attachment to material possessions). These five principles are collectively known as the five vows or Mahavratas, which are observed by all Jains, including Digambaras.

Q.39) Consider the following pairs of UNESCO's intangible cultural heritages and the states to which they belong:

UNESCO intangible cultural heritage	States
1. Kutiyattam	Telangana
2. Ramlila	Uttar Pradesh
3. Kalbelia	Rajasthan

How many pairs given above are **incorrectly** matched?

- a) Only one pair
- b) Only two pairs
- c) All three pairs
- d) None of the pairs

Ans) a

Exp) Option a is the correct answer.

UNESCO established its lists of Intangible Cultural Heritage with the aim of ensuring the better protection of important intangible cultural heritages worldwide and to create awareness of their significance. India has 14 intangible cultural heritage elements on this prestigious list.

Pair 1 is incorrect: Kutiyattam is traditionally performed in Kerala and not Telangana. It is a combined dance drama conducted by the Chakyars (a subcaste among Hindus) who play the male roles whereas, the women of the Nambiar caste play the female roles. The performance lasts from 6 to 20 days. They are mainly enacted inside the temples based on themes of Hindu mythology.

Pair 2 is correct: Ramlila is a popular folk theatre in the region of Uttar Pradesh. It is an enactment of Ramayana using songs, dances and dialogues, mainly during the period before Dussehra. It is generally performed by male actors, who do the role of Sita as well. The play is staged annually over ten or more successive nights, during the auspicious period of "Sharad Navaratri".

Pair 3 is correct: Kalbelia dance is performed by the members of Kalbelia tribe in the State of Rajasthan. Kalbelia dance movements resembles that of a serpent. Traditionally, Kalbelia tribe was known for its frequent movement from one place to another and the occupation of catching snakes and trading snake venom. The songs are based on mythology and it involves composing lyrics spontaneously and improvising songs during performance.

Q.40) Consider the following statements regarding Rubber Board:

1. It is a statutory body constituted by the Government of India for the overall development of the rubber industry in the country.
2. It comes under the administrative control of the Ministry of Agriculture and Farmers' Welfare.
3. Chairman of the board is appointed by the central government.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: The Rubber Board is a statutory organization constituted under Section (4) of the Rubber Act, 1947.

Statement 2 is incorrect: The Rubber Board functions under the Ministry of Commerce & Industry of the Government of India (and not the Ministry of Agriculture and farmers' Welfare).

Statement 3 is correct: The Board has a chairman appointed by the Central Government. Chairman is the principal executive officer responsible for the proper functioning of the Board and implementation of its decisions and discharge of its duties under the Rubber Act.

Source:

Q.41) Consider the following statements with reference to the Madhubani paintings of India:

1. Traditionally, they were painted on walls having the base of cow dung and mud.
2. The paintings depict auspicious occasions like birth, marriage and festivals.
3. It is a three-dimensional painting with excellent use of shades.

Which of the above-given statements is/are correct?

- a) 1 and 2 only
- b) 1 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Madhubani paintings are a traditional folk-art form that originated in the Mithila region of Bihar, India.

Statement 1 is correct: Madhubani paintings have a common theme and are usually drawn from religious motifs of the Hindus, including Krishna, Rama, Durga, Lakshmi and Shiva. **Traditionally, these were painted on walls using rice paste and vegetable colours on a base of cow dung and mud. With time, the base changed to handmade paper, clothes and canvas, still natural colours were used.**

Statement 2 is correct: The paintings have a common theme and are usually drawn from religious motifs of the Hindus, including Krishna, Rama, Durga, Lakshmi and Shiva. The figures in the painting are symbolic, for example, fish depicts good luck and fertility.

The paintings are also **made depicting auspicious occasions like birth, marriage and festivals.** Flowers, trees, animals, etc. are used to fill any gaps in the painting.

Statement 3 is incorrect: Since there was **no shading, the paintings are two-dimensional.** Some of the common features of these paintings include double line border, bold use of colours, ornate floral patterns and exaggerated facial features.

Source: Indian Art and Culture by Nitin Singhania Chapter-2

Q.42) Consider the following statements with reference to the Wangala festival of Northeast India:

1. It is primarily celebrated by the Mishmi tribe of Arunachal Pradesh.
2. It is also known as the '100 Drum festival'.
3. Feathered head-gear is worn while celebrating the festival.

Which of the above-given statements is/are correct?

- a) 2 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

Wangala festival is held in the Asanang near Tura in the Garo Hills.

Statement 1 is incorrect: The dominant Garo Tribe primarily celebrates the Wangala festival in Meghalaya. The festival indicates the beginning of winter and is celebrated as a nod to the post-harvest season. The festival is celebrated in honour of 'Misi Saljong', a local deity who is considered to be generous.

Statement 2 is correct: Drums, flutes and other orchestra instruments are played to create a festive ambiance for the Wangala festival. **It is also known as the '100 Drum festival' as loud drum noises herald the beginning of the festival.**

Statement 3 is correct: Wangala Festival day is also set apart by the wonderful costumes worn by the participants. **An extraordinary feature is the feathered head-gear that is worn by everyone celebrating the festival and also reflects their clan colors.**

Source: Indian Art and Culture by Nitin Singhania Chapter-18

Q.43) Consider the following statements with reference to the coins in medieval period:

1. Mohammad bin Tughlaq introduced the Rupee, a form of bronze currency.
2. Mughal emperor Akbar issued both round and square coins.
3. Jahangir issued coins with Zodiac signs.

Which of the above given statements are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

India has a very rich history of numismatics since the Vedic period.

Statement 1 is incorrect: **Sher Shah Suri**, a 16th century ruler of Afghan lineage introduced the **Rupee**. It was a **silver currency**. At that moment one rupee was equal to four coins made of copper. The Indian currency is still called Rupee. **Rupya** was made of silver which weighed almost **11.34 grams** during that period.

Statement 2 is correct: **Akbar issued both round and square coins. In 1579, he issued gold coins called Ilahi coins to propagate his new religious creed 'Din-e-illahi'.** On this coin, it was written 'God is great, may his glory be glorified'. The value of an ilahi coin was equal to 10 rupees. Sahansah was the largest gold coin.

Statement 3 is correct. Jahangir showed the legend in a couplet in the coins. In some of his coins, he added the name of his beloved wife Noorjahan. **The most famous of his coins had images of Zodiac signs.**

Source: Indian Art and Culture by Nitin Singhania Chapter-23

Q.44) Consider the following pairs of Vaishnav Sects and their founders:

Sect	founder
1. Ramanandi Sampradaya	Dnyaneshwar
2. Brahma Sampradaya	Madhvacharya
3. Pushti Marg Sampradaya	Vallabhacharya

Which of the above given pairs is/are matched correctly?

- a) 2 only
- b) 3 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) d

Exp) Option d is the correct answer.

There are various sects that Vaisnavism branched into as it evolved and spread to other reign.

Pair 1 is incorrect: **Sant Dnyaneshwar was a 13th-century Indian Marathi saint, poet, philosopher and yogi of the Nath Shaiva and Varkari tradition. Ramanandi Sampradaya is associated with the teachings**

of the Advaita scholar Ramananda. This is the largest monastic group within Hinduism in Asia, and these Vaishnava monks are known as Ramanandis, Vairagis or Bairagis.

Pair 2 is correct: Brahma Sampradaya is associated with Lord Vishnu, the Para- Brahma or Universal Creator (not to be confused with the Brahma deity). The founder was Madhvacharya. Gaudiya Vaishnavism promoted by Chaitanya Mahaprabhu is associated with Brahma Sampradaya. The ISKCON belongs to this sampradaya.

Pair 3 is correct: Pushti marg Sampradaya is a Vaishnav sect founded by Vallabhacharya around 1500 AD. Their philosophy is that the ultimate truth is one & only one Brahm. The devotion is based on pure love for Lord Krishna. All followers are expected to do Seva to their personal icon of Krishna.

Source: Indian Art and Culture by Nitin Singhania Chapter-12

Q.45) Which of the following options best describes the meaning of “I-familia”, a term recently seen in news?

- A global database for identifying missing persons based on international DNA kinship matching.
- An online movement against the discrimination being faced by women in different fields.
- A group of animals that can emit electricity from their bodies in specific situations.
- A web portal launched by the government to receive complaints against the sexual harassment at workplace

Ans) a

Exp) Option a is the correct answer.

Option a is correct: The first of its kind, **I-Familia is a global database for identifying missing persons based on international DNA kinship matching.**

The result of cutting-edge scientific research, the database seeks to identify missing persons or unidentified human remains when direct comparison is not possible, by using DNA samples from family members instead.

Agencies such as INTERPOL can play a unique role through its global network when it comes to implementation. I-Familia helps to reunite loved ones or to bring closure to cases and allow families to rebuild their lives.

Source: <https://www.interpol.int/en/How-we-work/Forensics/I-Familia>

<https://www.clinicalprograms.com/blogs/what-is-a-family-medicine-residency>

Q.46) Consider the following statements with reference to the Warli paintings of India:

- These paintings have a close resemblance to the mural paintings of Bhimbetka.
- Only white pigment is used over the base of red-ochre color in these paintings.
- Intricate human and animal drawings are made with life-like details in these paintings.

Which of the above given statements are correct?

- 1 and 2 only
- 2 and 3 only
- 1 and 3 only
- 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The name of the Warli painting comes from the people who have been carrying the painting tradition that goes back to 2500-3000 BC. They are called the **Warlis, indigenous people that occupy mainly the Gujarat-Maharashtra border.**

Statement 1 is correct: Warli paintings have close resemblance to the mural paintings of Bhimbetka in Madhya Pradesh. These **ritualistic paintings** have a central motif of a chaukat or chauk, which is surrounded by scenes portraying fishing, hunting, farming, dances, animals, trees and festivals.

Statement 2 is correct: In Warli paintings, **the base is made of a mixture of mud, branches and cow dung that gives it a red ochre colour. For painting only white pigment is used, which is made of a mixture of gum and rice powder.** The wall paintings are usually done for auspicious occasions.

Statement 3 is incorrect: Traditionally, the paintings are done on the walls using very basic graphic vocabulary, including a triangle, a circle and a square. These shapes are inspired from nature, i.e. circle from sun or moon, triangle from conical shaped trees or mountains and square from sacred enclosure or piece of land. To represent a human or animal, two triangles are joined at the tip, with circles acting like their head.

Source: Indian Art and Culture by Nitin Singhania Chapter-2

Q.47) Consider the following statements with reference to Vajrayana Buddhism:

1. Vajrayana Buddhism was developed as a result of royal courts sponsoring both Buddhism and Shaivism.
2. The female deity Tara is the main deity of Vajrayana.
3. Followers of Vajrayana Buddhism strongly opposed Brahmanical rituals.

Which of the above-given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statements 1 and 2 are correct: Scholars have said that **Vajrayana school developed as a result of royal courts sponsoring both Buddhism and Shaivism**, i.e., they say, it was influenced by Hinduism. The main deity is lady called Tara.

Statement 3 is incorrect: Vajrayana Buddhism involved combining Brahmanical (Veda based) rituals with Buddhist philosophies. Vajrayana is based on Mahayana Buddhist philosophy. This school believes in Tantra's, Mantras and Yantras superiority due to being a faster vehicle to liberation containing many skillful methods of tantric ritual.

Source: Indian Art and Culture by Nitin Singhania Chapter-12

Q.48) Consider the following statements with reference to spread of Buddhism abroad from India:

1. Acharya Ateesha of the Vikramashila University helped in the spread of Buddhism to Tibet.
2. King Ashoka sent his daughter Sanghamitra to Sri Lanka to propogate Buddhism.
3. The presence of ancient silk route aided the spread of Buddhism abroad.

Which of the above given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) option d is the correct answer.

Statement 1 is correct: The head of the Vikramashila University was Acharya Ateesha, also known as Dipankara Shreejnana. He went to Tibet in the 11th century and gave a strong foundation to Buddhism in Tibet.

Statement 2 is correct: King Ashoka made great efforts to propagate Buddhism outside India. He sent his son Mahendra and daughter Sanghamitra to Sri Lanka to spread the message of the Buddha. The teachings of the Buddha were transmitted orally by the Srilankan people who had gone from India.

Statement 3 is correct: Many Chinese and Indian scholars travelled through ancient Silk routes to propagate the philosophy of Buddhism. People from all over the world came to visit the land of the Buddha. They stayed in India and collected Buddhist relics and manuscripts related to Buddhism and learnt about its sayings at the various educational centres.

Source: Indian Art and Culture by Nitin Singhanian Chapter-12

Q.49) Consider the following statements with reference to the Manjusha paintings of India:

1. This art form belongs to Kandhamal region of Odisha.
2. It is also known as Angika art.
3. Snake motifs are always present in these paintings.

Which of the above given statements is/are correct?

- a) 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: Manjusha art is folk art from Bhagalpur, Bihar, and dates back to the 7th century. It is also called scroll painting. The name Manjusha is also associated with an **elaborate story, a goddess and a festival celebrated in Bhagalpur.**

Statements 2 and 3 are correct: Manjusha paintings is also known as Angika art, where ‘ang’ refers to one of the Mahajanpada. Since snake motifs are always present, it is also called snake painting. These paintings are executed on boxes of jute and paper.

Source: Indian Art and Culture by Nitin Singhanian Chapter-2

Q.50) Consider the following statements regarding Disposable Email Addresses:

1. Disposable Email Addresses pose a severe threat to the privacy and data security of email users.
2. All personal details of the user and IP address are dissolved after the period of mailbox use is over.
3. These emails may not require sign-ups or verification to ensure that the person using the email address is real.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 3 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

A disposable email address (DEA) is a temporary email address that expires after a set period of time, or one which you can delete whenever you like. Like any regular email service, a disposable email address

allows you to click a link sent for email verification to check the legitimacy of the email address. That means you can use a disposable email address to comment or access premium content of any website that requires you to sign up. And your primary email address will still be clean, organized, and free from spam!

Statement 1 is incorrect: DEAs were developed to protect email users from spam, advertising mailings and malware as it's anonymous and free. Mostly we don't read the privacy policies of all the sites we sign up for. Many websites rent or sell their email lists to other businesses. So, we don't have any idea of where your personal address will end up in the future after you share it on websites you register with. Using a disposable or a temp mail address to register on websites, blogs, and forums keeps your real one hidden from hackers' eyes, **thereby improving email security.**

Statement 2 is correct: All personal details of the user, address, IP address are dissolved after the period of mailbox use is over. Temporary emails are being used to create profiles on social media networks, download files, and use it each time the users want to conceal their identity.

Statement 3 is correct: In case of DEAs, it's possible to get a new email address and receive email within seconds, with no sign-ups, no contact details required and certainly no verification that the person using the email address is "real." They are being increasingly used for illegitimate purposes.

Source: <https://www.newindianexpress.com/nation/2022/oct/28/disposable-emails-emerge-as-new-terror-tool-intel-agencies-on-alert-2512436.html>

Q.1) With reference to Pasteurisation, consider the following statements:

1. This process can only be used for non-packaged food items.
2. It can eliminate microorganisms present in the food to a certain extent.
3. It drastically alters the nutrition content of the food.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 only
- c) 2 and 3 only
- d) 1 and 2 only

Ans) b

Exp) Option b is the correct answer.

Pasteurization is a process, named after scientist Louis Pasteur, that applies heat to destroy pathogens in foods. The process was widely used in the dairy industry, in most milk processing plants, the milk is heated up to 161 degree Fahrenheit and rapidly cooled back to a 39 degree celsius.

Statement 1 is incorrect: Pasteurization is a process of food preservation in which **packaged and non-packaged foods** such as milk, fruit juices are treated with mild heat, usually to less than 100 °C (212 °F), to eliminate pathogens and extend shelf life.

Statement 2 is correct: Pasteurization kills pathogenic microorganisms and also a wide range of spoilage organisms are destroyed.

While sterilization destroys all the microorganisms and spores present in the food, in Pasteurization **the resistant microorganisms, a part of enzymes and bacteria spores survive**. This is the reason why Sterilized foods are perfectly preserved at room temperature but Pasteurized foods require refrigeration (3°C and 6°C), to delay the proliferation of microorganisms and spores present in the food.

Statement 3 is incorrect: Unlike Sterilisation, Pasteurization does not affect the nutrient content of food in significant ways, thus it drastically alters the nutrient content of food is not true. For instance the U.S. Food and Drug Administration states that there are **no significant differences in nutritional value between pasteurized and unpasteurized milk**.

With the exception of **decreasing riboflavin (vitamin B2)**, pasteurization does not significantly decrease the nutritional value of milk. It must be noted here that Pasteurized milk remains an excellent source of riboflavin (vitamin B2).

Source: <https://www.thehindubusinessline.com/portfolio/commodity-analysis/what-is-pasteurised-milk/article9973160.ece>

<https://www.terrafoodtech.com/en/sterilization-vs-pasteurization/>

Q.2) With reference to astronomical phenomena, how is Dark matter different from Dark energy?

1. The share of Dark energy in the total universe is greater than that of Dark matter.
2. While dark matter slows down the expansion of the universe, dark energy speeds it up.
3. While dark matter interacts with light, dark energy does not interact with light.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Recently, a highly sensitive experiment named LUX-ZEPLIN (LZ) has been used to detect dark matter in the universe in the USA.

Statement 1 is correct: Only 5% of the entire universe is observable/visible and the rest of 95% consists of dark matter and dark energy. **Dark energy** accounts for around **68%** of the total universe, while **dark matter accounts for 27%** of the total universe by volume. Thus, it is true that the **share of dark energy in the total universe is greater than that of dark matters.**

Statement 2 is correct: It is true that dark matter slows down the expansion of the universe, while dark energy speeds it up. Dark matter works like an **attractive force** – a kind of cosmic **cement that holds our universe together**. In contrast **dark energy is a repulsive force** – a sort of anti-gravity – that drives the universe's ever-accelerating expansion.

Statement 3 is incorrect: Both **dark matter and dark energy does not interact with the electromagnetic force**, which means that it does **not absorb, reflect or emit light**, making it extremely hard to detect.

Source: <https://www.thehindu.com/sci-tech/technology/the-search-for-dark-matter/article65628063.ece>

<https://www.discovermagazine.com/the-sciences/whats-the-difference-between-dark-matter-and-dark-energy#:~:text=slows%20down%20the-,expansion,-of%20the%20universe>

Q.3) Which of the following statements are correct in respect of 'Dry Ice'?

1. It can be used to preserve the food without altering its taste.
2. Dry ice pellets can be used to extinguish fires.
3. It is free of any ice burns as its temperature is lower compared to normal ice.
4. It is one of the common chemicals used for cloud seeding.

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 2 and 4 only
- c) 1, 2 and 4 only
- d) 2 and 3 only

Ans) c

Exp) Option c is the correct answer.

Dry ice is a solid form of carbon dioxide. It is commonly used for temporary refrigeration as CO₂ does not have a liquid state at normal atmospheric pressure and sublimates directly from the solid state to the gas state. It is colourless, odourless, non-flammable, and slightly acidic in nature.

Statement 1 is correct: It is true that dry ice can be used to **preserve the food quality without altering its taste/quality of foods**. Dry ice can be used to inhibit the growth of fungi and **bacteria** (thus preserving the quality of food) in food products by **displacing the oxygen** without altering the taste or quality of foods.

Statement 2 is correct: Tiny dry ice pellets can be used to fight fire by **both cooling fuel** and suffocating the fire by **excluding oxygen**. Without oxygen combustion won't take place and dry ice, by cutting off oxygen supply from fire, can act as an effective fire extinguisher.

Statement 3 is incorrect: Compared to normal ice (temperature of 0 degree celsius), the **temperature of dry ice is -78 degree celsius and it is extremely cold**. Therefore, **dry ice is more likely to result in ice burns** if not handled properly, thus dry ice is free of any ice burns is not true.

Statement 4 is correct: The most **common chemicals used for cloud seeding includes dry ice**, silver iodide, potassium iodide. Cloud seeding is the process of spreading either dry ice or more commonly, silver iodide aerosols, into the upper part of clouds to try to stimulate the precipitation process and form rain.

Source: <https://www.health.ny.gov/publications/7081/>

<https://agris.fao.org/agris-search/search.do?recordID=LV2005000502#:~:text=Conference-,Application,-of%20dry%20ice>

Q.4) Which of the following is a reason why aluminium is used for wrapping food items?

- Aluminium usually does not react with acid particles contained in the food.
- Poor heat conductivity of aluminium keeps the food inside aluminium wrap warm.
- Aluminium is incapable to react with water content of the food inside the wrap.
- It is possible to make a thin sheet out of aluminium metal owing to its malleable property.

Ans) d

Exp) Option d is the correct answer.

Option a is incorrect: Non metals generally do not react with acids but metals (including Aluminium) react with acids and produce hydrogen gas. Thus, Aluminum does not react with acid content of the food is not true.

Option b is incorrect: Aluminium is the good conductor of heat, thus aluminium is being used as food wraps owing to its poor thermal conductivity is not correct. The more **common metals, copper and aluminium have the highest thermal conductivity** while steel and bronze have the lowest.

Option c is incorrect: Aluminium will react readily with water or air to produce aluminium oxide, thus aluminium's inability to react with water content in food is not correct. But the produced **Aluminium Oxide is not reactive** which makes it best property for using aluminium as food wrapping material. The layer of aluminium oxide protects the rest of the aluminium in the wrap from oxidising and reacting with food.

Option d is correct: The property of metals by which they can be beaten into thin sheets is called malleability. While **metals** such as Iron, Silver and Aluminium show this property **non-metals** such as coal and pencil lead do not show this property. This property is one of the major reasons why Aluminium is used to wrap the food items.

Source: Science NCERT Class 8 - Chapter 4

Q.5) With reference to the voting rights in India, consider the following statements:

- As per the Representation of the People Act (RPA) of 1951, an individual in the lawful custody of the police cannot vote.
 - An individual under preventive custody can cast his/her vote by post.
- Which of the statements given above is/are correct?

- 1 only
- 2 only
- Both 1 and 2
- Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

If an individual is confined during a prison, whether under a sentence of imprisonment or transportation, then he is not eligible for voting.

Statement 1 is correct. Section 62 (5) of Representation of the People Act (RPA), 1951 deprives prisoners of their right to vote. An individual in the lawful custody of the police and those serving a sentence of imprisonment after conviction cannot vote. Undertrial prisoners are also excluded from participating in elections.

Statement 2 is correct. In the case of preventive custody, an individual can vote. In 2014, the ECI had said that the person under preventive custody had the proper to vote, but not under-trials and convicts. As per the provisions of sub-Section (5) of Section 62 of the Representation of the People Act, 1951 confers voting rights on the electors subjected to preventive detention. As per Rule 18 of the Conduct of Elections Rules, 1961, the electors under preventive detention are entitled to cast their votes by post.

Source: <https://www.legalserviceindia.com/legal/article-7582-all-about-vote-and-voting-rights-in-india.html>

<https://eci.gov.in/files/file/9411-protection-of-voting-rights-of-electors-subjected-to-preventive-detention-regarding/>

Q.6) Gypsum can be used in which of the following area(s)?

1. To treat Aluminium toxicity in the soil.
2. For setting fractured bones of humans
3. To extract petroleum from underground

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 only
- d) 1, 2 and 3

Ans) d

Exp) Option a is the correct answer.

Gypsum is a soft sulphate mineral composed of calcium sulphate dihydrate, with the chemical formula $\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$. **Gypsum is widely mined and is used as a fertiliser** and as the main constituent in many forms of plaster, blackboard or sidewalk chalk, and drywall.

Statement 1 is correct: One of the important applications of Gypsum lies in the field of Agriculture and **it is true that gypsum helps in treating aluminium toxicity**. Gypsum gives nutrients to plants by providing sulphur and calcium, calcium helps in the absorption of nutrients in the roots, and sulphur improves crop yield.

Gypsum has the ability to reduce pH level of the soil which means **adding gypsum will improve the acidic content of the soil**.

Statement 2 is correct: On heating gypsum at 373 K, it loses water molecules and becomes calcium sulphate hemihydrate ($\text{CaSO}_4 \cdot \frac{1}{2}\text{H}_2\text{O}$) and this is called **Plaster of Paris**. Doctors use this as a plaster for **supporting fractured bones in the right position**.

Statement 3 is correct: In Hydraulic fracturing, a fluid is pumped down a well at pressure to **create small fractures (cracks) in gas-bearing rock formations to release trapped petroleum**. Gypsum is one of the chemicals used for this purpose, thus it is true that **Gypsum is used to extract petroleum from underground**.

Source: <https://ncert.nic.in/ncerts/l/jesc102.pdf> (pg no 32)

<https://www.dmp.wa.gov.au/Petroleum/Chemicals-used-in-hydraulic-25615.aspx#:~:text=During-,hydraulic,-fracturing%2C%20fluid%20is>

Q.7) With reference to 'Fullerene', consider the following statements:

1. They are a class of molecules composed entirely of carbon.
2. They possess high tensile strength and high electrical conductivity.
3. They can be instrumental in fighting the menace of Antibacterial resistance.

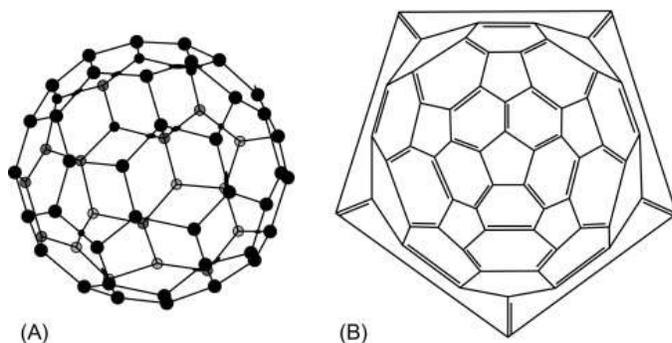

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

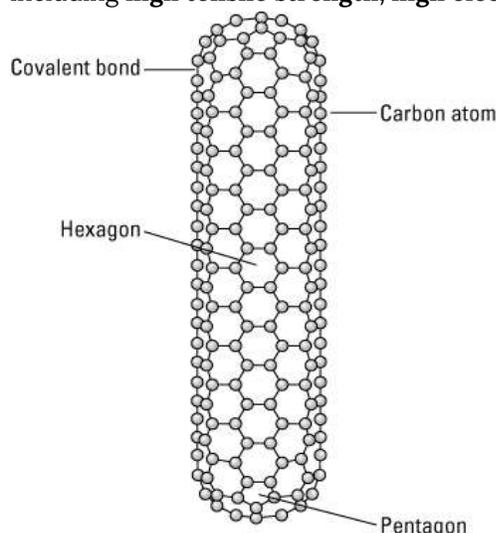

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: Fullerene molecules are made of carbon atoms, and their shapes are as hollow sphere, ellipsoid, or tube. Spherical fullerenes are also referred to as buckyballs.

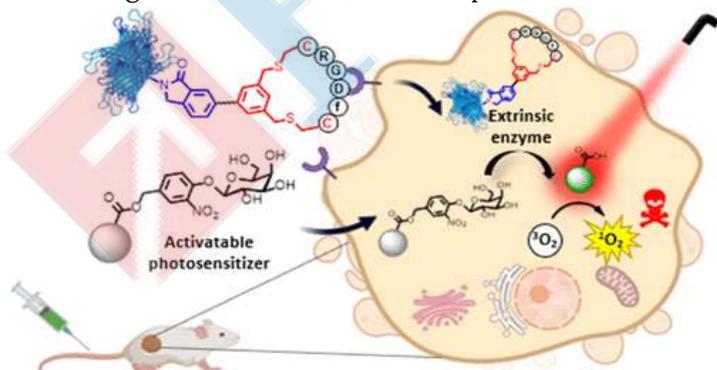

Statement 2 is correct: Their unique molecular structure results in extraordinary macroscopic properties, including **high tensile strength, high electrical conductivity, high ductility, and high heat conductivity.**

Statement 3 is correct: **Antimicrobial photodynamic inactivation (aPDI)** is a newly emerged treatment approach that can effectively **address** the issue of **multidrug resistance resulting from the overuse of antibiotics.** Fullerenes can be used as promising photosensitizers (PSs) for aPDI due to the advantages, good photostability and wide antibacterial spectrum.

PSs can be directly injected or coated to the infected site, aPDI will not cause damage to the entire body like antibiotics do and thus can be repetitively applied to achieve higher bactericidal efficiency while minimising the side effects inflicted on patients.

Source:

<https://www.sciencedirect.com/topics/engineering/fullerene#:~:text=of%20molecules%20composed-entirely,-of%20carbon.%20The>

<https://www.frontiersin.org/articles/10.3389/fmicb.2022.957698/full>

Q.8) With reference to Trans fats, consider the following statements:

1. Other than those made by humans, trans fats do not exist in nature.
2. Trans fats in oils can extend the shelf life of oil.
3. Trans fats increase the overall cholesterol level of humans while reducing the good cholesterols.
4. At present, India has no regulation that regulates the level of trans fats in any food products.

Which of the statements given above are correct?

- a) 1 and 4 only
- b) 2 and 3 only
- c) 2 and 4 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

As per the World Health Organisation (WHO), approximately 5.4 lakh deaths take place each year globally because of intake of industrially produced trans fatty acids. Trans fats are the most harmful type of fats which can have much more adverse effects on a human body than any other dietary constituent.

Statement 1 is incorrect: Trans fats occur in nature too, although large amounts of Trans fats are produced artificially. Artificial TFAs are formed when hydrogen is made to react with the oil to produce fats resembling pure ghee/butter. The **natural sources of Trans fats are meats and dairy products.**

Statement 2 is correct: It is true that **Trans Fats containing oils can be preserved longer** which means they have longer shelf life. Also, trans fats give the food the **desired shape and texture** and can easily substitute pure ghee. Further trans fats are comparatively cheaper and thus add to profits of companies.

Statement 3 is correct: It is true that **Trans fats not only raise total cholesterol levels but also reduce the good cholesterol (HDL) levels.** This makes humans who consume trans fats more prone to cardiovascular diseases as good cholesterol helps in protecting humans from heart disease.

Statement 4 is incorrect: The Food Safety and Standards Authority of India (FSSAI) **has capped the amount of trans fatty acids (TFA) in oils and fats to 3% for 2021 and 2% by 2022**, thus India has no regulation regarding level of trans fats in any food products is not correct. In **2011, India first passed** a regulation that set a TFA limit of 10% in oils and fats, which was further reduced to 5% in 2015.

Source: [https://www.thehindu.com/sci-tech/health/fssai-slashes-limit-for-trans-fat-levels-in-foods/article61751294.ece#:~:text=The%20Food%20Safety%20and%20Standards,and%20Restriction%20on%20Sales\)%20Regulations.](https://www.thehindu.com/sci-tech/health/fssai-slashes-limit-for-trans-fat-levels-in-foods/article61751294.ece#:~:text=The%20Food%20Safety%20and%20Standards,and%20Restriction%20on%20Sales)%20Regulations.)

<https://indianexpress.com/article/health-wellness/how-do-trans-fats-damage-your-heart-vessels-why-is-who-worried-about-5-billion-people-exposed-to-them-8401204/#:~:text=in%20milk%20and-,meat,-sourced%20from%20them>

Q.9) With reference to Food irradiation, consider the following statements:

1. It is the process of ionising food using rays emanating from radioactive material.
2. Irradiated foods can be stored for years without refrigeration.
3. Early ripening of fruits is one of the applications of food irradiation.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 3 only

Ans) a

Exp) Option a is the correct answer.

Food irradiation is the application of ionising radiation to food to improve the safety and extend the shelf life of foods by reducing or eliminating microorganisms and insects. **Irradiation does not make foods radioactive, compromise nutritional quality, or noticeably change the taste, texture, or appearance of food.**

Statement 1 is correct: It is true that **food irradiation is the process of ionising foods with either Gamma rays or X rays.** Gamma rays are emitted from **radioactive forms of the element cobalt (Cobalt 60)** and hence it is true that it uses radioactive rays to ionise food.

Also irradiation technique uses X rays and **electron beams** (similar to X-rays) to ionise food. Electron beam is a stream of high-energy electrons propelled from an electron accelerator into food.

Statement 2 is correct: Irradiation can be used to sterilise foods, which can then be **stored for years without refrigeration.** Sterilised foods are useful in hospitals for patients with severely impaired immune systems, such as patients with AIDS or undergoing chemotherapy.

Statement 3 is incorrect: Irradiation actually **delays ripening of** fruits. Thus, irradiation is used to delay ripening of fruit to increase longevity, not to fasten the process of ripening. Other applications of food irradiation are as follows;

- 1) **Prevention of Foodborne Illness** by effectively eliminating organisms that cause foodborne illness, such as Salmonella and Escherichia coli (E. coli).
- 2) **Preservation of foods** by destroying or inactivating organisms that cause spoilage and decomposition and extend the shelf life of foods. Irradiation also decreases the need for other pest-control practices that may harm the fruit.

Source: <https://www.fda.gov/food/buy-store-serve-safe-food/food-irradiation-what-you-need-know>

Q.10) What is the correct sequence of occurrence of the following cities in South-East Asia as one proceeds from East to West direction?

1. Hanoi
2. Naypyidaw
3. Manila
4. Kuala Lumpur

Select the correct answer using the code given below:

- a) 3-2-1-4
- b) 3-1-4-2
- c) 1-3-4-2
- d) 1-4-3-2

Ans) b

Exp) Option b is the correct answer.

Correct arrangement of South East Asian countries from East to West is-

Manila (120.9842° E)- **Bandar Seri Begawan**(114°56'32"E)- **Jakarta** (106.8456° E) **Hanoi** (105.8342° E)- **Phnom Penh**(104.9282° E)- **Singapore**(103.8198° E)- **Vientiane**(102.6331° E)- **Kuala Lumpur**(101.6841° E)- **Bangkok**(100.5018° E)- **Naypyidaw**(96° 6' 0" E).

Source: <https://asean.org/about-asean/>

Q.11) With reference to the application of noble gases, consider the following pairs:

Noble gases	Applications
1. Helium	Radiation therapy
2. Neon	Cryogenic refrigeration
3. Argon	To improve fuel efficiency of cars.
4. Radon	Breathing mixture for sea divers

How many pairs given above are correctly matched?

- only one pair
- only two pairs
- only three pairs
- all four pairs

Ans) c

Exp) Option c is the correct answer.

The noble gases also called as inert gases are a class of chemical elements with similar properties. Under standard conditions, they all are **odourless, colourless, monatomic gases with very low chemical**

reactivity. The six naturally occurring noble gases are helium (He), neon (Ne), argon (Ar), krypton (Kr), xenon (Xe), and the radioactive radon (Rn).

Pair 1 is correct: Radiation therapy (also called radiotherapy) is a cancer treatment that uses high doses of radiation to kill cancer cells and shrink tumours. Due to the favourable physical and biological properties of helium, **helium ion beams are increasingly considered a promising alternative to proton beams for radiation therapy.**

Pair 2 is correct: Neon in its liquid form is used as a cryogenic refrigerant, meaning that it is a fluid that is used in the process of cooling objects below 150 K. Neon's cooling capacity is very high and it has 40 times the cooling capacity (per volume) of liquid helium and over 3 times that of liquid hydrogen. It is the second-lightest noble gas, with helium being the first.

Pair 3 is correct: Argon is known as a powerful insulator and is often used in luxury car tires which means it can help keep the air in the tire cooler. An overall lower tire temperature results in improved fuel economy because there is less energy wasted as heat.

Pair 4 is incorrect: Radon is a naturally occurring radioactive gas (thus cannot be used as a breathing mixture) which may be found in high concentrations in indoor environments, such as homes and workplaces. Helium is used in the production of breathing mixtures for professional divers.

Source: <https://ro-journal.biomedcentral.com/articles/10.1186/s13014-017-0944-3#:~:text=Due%20to%20their%20favorable%20physical,proton%20beams%20for%20radiation%20therapy.>

<https://chemistrytalk.org/neon-element/#:~:text=Neon%E2%80%99s%20Cooling-,Capacity,-In%20its%20liquid>

Q.12) With reference to various food preservation methods, consider the following statements:

1. Canning is a method of food preservation which involves using the sugar in crystallised form to preserve foods.
2. Drying may include preserving food by keeping it in a place where there is no sunlight.
3. Vacuum packing removes air from the package to eliminate bacteria inside the package.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Food Preservation involves preventing the growth of bacteria, fungi and other microorganisms as well as retarding oxidation of fats to reduce rancidity. Food Preservation ensures that the quality, edibility and the nutritive value of the food remains intact.

Statement 1 is incorrect: Canning and bottling means sealing cooked food in sterile bottles and cans. The container is boiled and this kills or weakens bacteria. Foods are cooked for various lengths or time. Once the can or bottle is opened the food is again at risk of spoilage. Canning is different from preserving food using sugars. Sugar is used in syrup form to preserve fruits or in crystallised form if the material to be preserved is cooked in the sugar till crystallisation takes place like candied peel and ginger.

Statement 2 is correct: Drying is the oldest method of food preservation. This method reduces water activity which prevents bacterial growth. Sun and wind are both used for drying. Also, **Shade drying (drying**

under shaded area) is used for **foods which lose their colour when exposed to direct sunlight for drying**. Generally, herbs, green and red chillies, okra and beans etc. are dried under shaded area

Statement 3 is correct: Vacuum packing creates a vacuum by making **bags and bottles airtight**. Since there is **no oxygen in the created vacuum, bacteria die**. Usually, this method is used to preserve dry fruits.

Source: <http://ecoursesonline.iasri.res.in/mod/page/view.php?id=111462#:~:text=Use%20of%20Heat-,Canning,-Canning%20is%20the>

<https://www.provac.com/blogs/news/food-preservation-with-vacuum-how-it-works#:~:text=technique%20that%20involves-,removing,-air%20from%20the>

Q.13) Which of the following statements can be an application of evaporative cooling?

1. Sweating of Body.
2. Water in Earthen Pot.
3. Formation of dew.
4. Air cooler used in home.

Choose the correct option using the codes given below:

- a) 1, 2, and 3 only
- b) 1 and 4 only
- c) 1, 2 and 4 only
- d) 2, 3, and 4 only

Ans) c

Exp) Option c is the correct answer.

The phenomenon of **change of liquid into vapours** at any temperature below its boiling point is called evaporation. In an open vessel, the liquid keeps on evaporating. The particles of liquid absorb energy from the surrounding to regain the energy lost during evaporation. This absorption of energy from the surroundings make the surroundings cold.

Option 1 is correct: Sweating or Perspiration is the natural way of cooling our body and maintaining the core temperature. Perspiration is essentially evaporation. Our sweat glands produce sweat. This sweat then takes up the heat from our skin to reduce our body temperature.

Option 2 is correct: Earthen pots are capable of cooling water lower than room temperature. The prime reason behind such a cooling effect is that the **earthen pots have minute pores** from where water seeps out. **This seeping water absorbs the heat from the water inside the pot and evaporates.** Thus, it reduces the temperature of the water inside the pot making it cooler and more soothing to drink during the summer season.

Option 3 is incorrect: Dew is the moisture that forms as a result of condensation. Condensation is the process a material undergoes as it changes from a gas to a liquid. **Dew is the result of water changing from a vapor to a liquid.** Dew forms as temperatures drop and objects cool down.

Option 4 is correct: Air cooler is more effective on dry days. The principle behind working of air cooler is evaporative cooling. By passing outdoor air over water-saturated pads, the water in the pads evaporate, reducing the air temperature by 15°- to 40°F-before it is directed into the home.

Source: Page 10,chapter 1 - MATTER IN OUR SURROUNDINGS of 9th ncert

<https://education.nationalgeographic.org/resource/dew/>

Q.14) Consider the following statement with reference to Hardness of Water:

1. The hardness of water is due to the presence of calcium and magnesium salts.
2. A common indicator of hard water is a lack of lather when water is used with soap.
3. The resin beads with salt ions are used to remove the hardness of water.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2, and 3

Ans) d

Exp) Option d is the correct answer.

Statements 1 and 2 are correct: Hard water contains a high rate of mineral content, which is formed when water penetrates through deposits of limestone and chalk. **Hard water contains a large percentage of calcium and magnesium carbonates** and this is what makes the water hard. **One of the most common indicators of hard water is a lack of lather when water is used with soap.**

Statement 3 is correct: **Water hardness is a big concern and an effective solution is using a water softener, which helps remove calcium from the water.** There are different water softeners available in the market and they are regarded as ion exchange systems. In such systems, **hardness ions are exchanged for salt (sodium or potassium) ions.** The exchange is done within the resin tank of the water softener. **Small resin beads are covered with salt ions. In the water softening process, the water flows through the resin beads, and the hard water reacts with salt ions, which consist mainly of sodium ions. This results in removal of hardness in water.**

Source: Page 76, chapter 4- Carbon and its Compounds of 10th NCERT

<https://www.kent.co.in/blog/remove-calcium-and-magnesium-in-hard-water-with-water-softener/>

Q.15) Consider the following statements with respect to the China-Indian Ocean Region Forum:

1. It was organised by Indian Ocean Rim Association.
2. The forum was attended by representatives from 19 countries including India.
3. At the forum it was proposed to establish a marine disaster prevention and mitigation cooperation mechanism.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 3 only

Ans) d

Exp) Option d is the correct answer.

Recently in December 2022, China has convened the first “China-Indian Ocean Region Forum” in the southwestern Chinese city of Kunming.

Statement 1 is incorrect. It was organised by China International Development Cooperation Agency (CIDCA)

Statement 2 is incorrect. “China-Indian Ocean Region Forum” was not attended by India. The forum was attended by “high-level representatives” and “senior officials” from 19 countries: Indonesia, Pakistan,

Myanmar, Sri Lanka, Bangladesh, Maldives, Nepal, Afghanistan, Iran, Oman, South Africa, Kenya, Mozambique, Tanzania, Seychelles, Madagascar, Mauritius, Djibouti, and Australia.

Statement 3 is correct. Outcome of the forum was that the forum issued a “Joint Press Statement” that noted China’s proposal to establish a marine disaster prevention and mitigation cooperation mechanism between China and countries in the Indian Ocean region.

Source: <https://blog.forumias.com/china-indian-ocean-region-forum-explained-chinas-moves-in-the-indian-ocean/>

Q.16) Consider the following statements:

1. Carbon-14 isotopes are used as the standard reference for measuring atomic masses.
2. The positively charged ions are called anions.
3. The molecular mass of a substance is the sum of the atomic masses of all atoms in a molecule.

Which of the statements given above is/are correct?

- a) 2 and 3 only
- b) 1 and 3 only
- c) 3 only
- d) None of the above

Ans) c

Exp) Option c is the correct answer.

Statement 1 is incorrect: The atomic mass of an element is the average mass of the atoms of an element measured in atomic mass unit (amu, also known as daltons, D). The atomic mass is a weighted average of all of the isotopes of that element, in which the mass of each isotope is multiplied by the abundance of that particular isotope. In 1961 for a universally accepted atomic mass unit, **carbon-12 isotope was chosen as the standard reference for measuring atomic masses.** One atomic mass unit is a mass unit equal to exactly one-twelfth (1/12th) the mass of one atom of carbon-12. The relative atomic masses of all elements have been found with respect to an atom of carbon-12.

Statement 2 is incorrect: The charged particle in a compound is known as ions. Ions may consist of a single charged atom or a group of atoms that have a net charge on them. An ion can be negatively or positively charged. **A negatively charged ion is called an ‘anion’ and the positively charged ion, a ‘cation’.**

Statement 3 is correct: The molecular mass of a substance is the sum of the atomic masses of all atoms in a molecule. It is therefore the relative mass of a molecule expressed in atomic mass units (u).

Source: Page 30, 31, 34 of chapter 3 ATOMS AND MOLECULES 9t NCERT

https://www.angelo.edu/faculty/kboudrea/periodic/structure_mass.htm#:~:text=The%20atomic%20mass%20of%20an,abundance%20of%20that%20particular%20isotope.

Q.17) With reference to various types of reactions, consider the following statements:

1. Burning of coal is an example of Combination reaction.
2. In displacement reaction, one reactant is displaced by another reactant.
3. In decomposition reaction, two reactants react to form a single product.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 only
- d) 1, 2, and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: A reaction in which a single product is formed from two or more reactants is known as a combination reaction. The examples of combination reactions are:

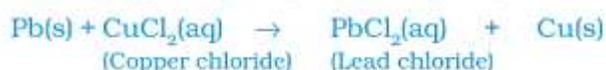

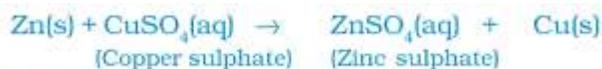

(i) Burning of coal

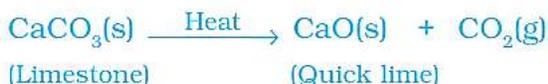

(ii) Formation of water from $\text{H}_2\text{(g)}$ and $\text{O}_2\text{(g)}$

Statement 2 is correct: When one reactant is displaced by another reactant it is called as displacement reaction. Zinc and lead are more reactive elements than copper. They displace copper from its compounds.

Statement 3 is incorrect: In decomposition reaction, a single reactant breaks down to give simpler products. Decomposition of calcium carbonate to calcium oxide and carbon dioxide on heating is an important decomposition reaction used in various industries. Calcium oxide is called lime or quick lime. It has many uses – one is in the manufacture of cement. When a decomposition reaction is carried out by heating, it is called thermal decomposition.

Source: Page 6, chapter 1- Chemical Reactions and Equations of 10th NCERT.

Q.18) Consider the following statements with reference to Redox reaction:

1. It is a type of chemical reaction that involves a transfer of electrons between two species.
2. In redox reaction, if a substance gains hydrogen during a reaction it is said to be oxidized.
3. The reaction of copper oxide with hydrogen gas is an example of Redox reaction.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2, and 3

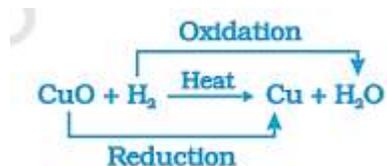

Ans) b

Exp) Option b is the correct answer.

Statement 1 is correct: An oxidation–reduction (redox) reaction is a type of chemical reaction that involves a transfer of electrons between two species. An oxidation–reduction reaction is any chemical reaction in which the oxidation number of a molecule, atom, or ion changes by gaining or losing an electron. Redox reactions are common and vital to some of the basic functions of life, including photosynthesis, respiration, combustion, and corrosion or rusting.

Statement 2 is incorrect: If a substance gains oxygen or loses hydrogen during a reaction, it is oxidised. If a substance loses oxygen or gains hydrogen during a reaction, it is reduced.

Statement 3 is correct: The reaction of Copper oxide with Hydrogen gas is an example of Redox reaction.

Some other examples of redox reactions are:

Source: Page 12, chapter 1- Chemical Reactions and Equations of 10th NCERT.

[https://chem.libretexts.org/Bookshelves/Analytical_Chemistry/Supplemental_Modules_\(Analytical_Chemistry\)/Electrochemistry/Redox_Chemistry/Oxidation-Reduction_Reactions](https://chem.libretexts.org/Bookshelves/Analytical_Chemistry/Supplemental_Modules_(Analytical_Chemistry)/Electrochemistry/Redox_Chemistry/Oxidation-Reduction_Reactions)

Q.19) The term ‘Rancidity’ is often heard in day-to-day life. In this context, which of the following statements best describes the term ‘Rancidity’?

- It is a condition of Hyper-acidity in the stomach of human body.
- It is a condition where environmental factors like moisture attack and destroy the metals.
- It is a condition formed when electricity is passed through an aqueous solution of brine.
- It is a condition that is produced by the oxidation of fat and oils present in foods.

Ans) d

Exp) Option d is the correct answer.

Rancidity, condition produced by aerial oxidation of unsaturated fat present in foods and other products, marked by unpleasant odour or flavour. When a fatty substance is exposed to air, its unsaturated components are converted into hydroperoxides, which break down into volatile aldehydes, esters, alcohols, ketones, and hydrocarbons, some of which have disagreeable odours.

Option a is incorrect: When there is an excessive amount of hydrochloric acid in the stomach, the condition is known as Hyperacidity.

Option b is incorrect: When a metal is attacked by substances around it such as moisture, acids, etc., it is said to corrode and this process is called corrosion. The black coating on silver and the green coating on copper are other examples of corrosion.

Option c is incorrect: When electricity is passed through an aqueous solution of sodium chloride (called brine), it decomposes to form sodium hydroxide.

Option d is correct: When fats and oils in food are oxidised, they become rancid and their smell and taste change. Thus, it is a condition that is produced by the oxidation of fat and oils present in foods. Usually substances which prevent oxidation (antioxidants) are added to foods containing fats and oil. Keeping food in air tight containers helps to slow down oxidation.

Source: Page 13, chapter 1- Chemical Reactions and Equations of 10th NCERT.

Q.20) With reference to the International Counter Ransomware Initiative (CRI), consider the following statements:

- It is a recent initiative of the Financial Action Task Force (FATF).
- India is not a member of CRI.
- It seeks to enhance international cooperation to combat the growth of ransomware

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 3 only
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

Recently, the members of the International Counter Ransomware Initiative (CRI) met in Washington, DC.

Statement 1 is incorrect. International Counter Ransomware Initiative (CRI) is an international counter-ransomware virtual event with over 30 countries and the European Union, with the goal of accelerating cooperation to counter ransomware. It has nothing to do with Financial Action Task Force.

Statement 2 is incorrect. India is member of International Counter Ransomware Initiative (CRI). The other members of the International Counter Ransomware Initiative (CRI)– Australia, Austria, Belgium, Brazil, Bulgaria, Canada, Croatia, Czech Republic, Dominican Republic, Estonia, France, Germany, Ireland, Israel, Italy, Japan, Kenya, Lithuania, Mexico, the Netherlands, New Zealand, Nigeria, Norway, Poland, Republic of Korea, Romania, Singapore, South Africa, Spain, Sweden, Switzerland, United Arab Emirates, United Kingdom, United States, and Ukraine, and the European Union.

Statement 3 is correct. The Counter Ransomware Initiative seeks to enhance international cooperation to combat the growth of ransomware. It also aims to:

- 1) build cross-border resilience
- 2) collectively disrupt and defend against malicious cyber actors.

Source: <https://www.whitehouse.gov/briefing-room/statements-releases/2022/11/01/international-counter-ransomware-initiative-2022-joint-statement/>

Q.21) Consider the following statements with reference to the reaction of acid with metals:

- 1. When acid reacts with Metals, it generally produces salt and release hydrogen gas.
- 2. Different metals have different reactivities with water and dilute acids.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Acids take part in reactions in which salts are produced. In these reactions, the hydrogen ions in the acids are replaced by metal ions or ammonium ions.

Statement 1 is correct: When acid reacts with Metals, it produces salt and release hydrogen gas. It is a displacement reaction in which an element displaces another element in a compound. The hydrogen in acids is displaced by the metals to produce hydrogen gas.

Acid + Metal → Salt + Hydrogen gas

Statement 2 is correct: Different metals have different reactivities with water and dilute acids. A list of common metals arranged in order of their decreasing reactivity is known as an activity series. Metals above hydrogen in the Activity series can displace hydrogen from dilute acids.

Metals	Reactivity
Potassium	Reacts with water
Sodium	
Lithium	
Barium	
Strontium	
Calcium	Reacts with Acids
Magnesium	
Aluminium	
Zinc	
Manganese	
Chromium	
Iron	
Cadmium	
Cobalt	
Nickel	
Tin	Included for Comparison
Lead	
Hydrogen	
Antimony	
Bismuth	
Copper	
Mercury	
Silver	
Gold	
Platinum	

Source: Page 19, chapter 2 - Acids, Bases and Salts of 10th NCERT.

https://chem.libretexts.org/Bookshelves/Introductory_Chemistry/Introductory_Chemistry/14%3A_Acids_and_Bases/14.05%3A_Reactions_of_Acids_and_Bases

Q.22) With reference to Tooth Decay, consider the following statement:

1. It is the decay of tooth enamel, which is the hardest part in Human body.
2. The tooth decay starts only when the mouth is having Ph value of above 7.
3. It occurs when acid is produced in the mouth by the bacteria.
4. To avoid tooth decay, one could use toothpaste which is generally basic in nature.

Which of the statements given above are correct?

- a) 1 and 4 only
- b) 1, 3, and 4 only
- c) 1, 2, 3, and 4
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

Tooth decay is damage to a tooth's surface, or enamel. It happens when bacteria in your mouth make acids that attack the enamel. Tooth decay can lead to cavities (dental caries), which are holes in your teeth. If tooth decay is not treated, it can cause pain, infection, and even tooth loss.

Statement 1 is correct and 2 is incorrect: Tooth decay starts when the pH of the mouth is lower than 5.5.

Tooth enamel, made up of calcium hydroxyapatite (a crystalline form of calcium phosphate) **is the hardest**

substance in the body. It does not dissolve in water, but is corroded when the pH in the mouth is below 5.5.

Statement 3 is correct: Bacteria present in the mouth produce acids by degradation of sugar and food particles remaining in the mouth after eating.

Statement 4 is correct: The best way to prevent tooth decay is to clean the mouth after eating food. **Using toothpastes, which are generally basic, for cleaning the teeth can neutralise the excess acid and prevent tooth decay.**

Source: page 27, chapter 2- Acids, Bases and Salts of 10th NCERT.

Q.23) Bleaching powder is a solid combination of chlorine and slaked lime. In this context, what are the applications of the Bleaching powder?

1. It can be used to kill the germs in water.
2. It can be used as an oxidising agent in chemical industries.
3. It can be used to whiten Wood Pulp in the paper industry.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2, and 3

Ans) d

Exp) Option d is the correct answer.

Chlorine gas is used for the manufacture of bleaching powder. Bleaching powder is produced by the action of chlorine on dry slaked lime $[Ca(OH)_2]$. Bleaching powder is represented as $CaOCl_2$, though the actual composition is quite complex.

Formula - $Ca(OH)_2 + Cl_2 \rightarrow CaOCl_2 + H_2O$

Statement 1 is correct: Bleaching powder is **used to kill the germs in water.**

Statement 2 is correct: Bleaching powder is **used as an oxidising agent in many chemical industries.**

Statement 3 is correct: Bleaching powder is used for bleaching cotton and linen in the textile industry, **for bleaching or whiten wood pulp in paper factories and** for bleaching washed clothes in laundry.

Source: Page 30, chapter 2- Acids, Bases and Salts of 10th NCERT.

Q.24) Consider the following statements with reference to the properties of Ionic compounds:

1. They are generally brittle in nature.
2. These compounds have low melting and boiling points.
3. These compounds usually do not conduct electricity in solid state but conduct electricity in the molten state.
4. Ionic compounds are generally soluble in water.

Which of the statements given above are correct?

- a) 1, 2, and 4 only
- b) 1 and 4 only
- c) 1, 3, and 4 only
- d) 2, and 3 only

Ans) c

Exp) Option c is the correct answer.

Ionic compounds usually form when a metal reacts with a nonmetal, where the metallic atoms lose an electron or electrons, becoming cations (positively charged ions), and the nonmetallic atoms gain an electron or electrons, becoming anions (negatively charged ions). Once the ions form, if they are in close proximity, their opposite charges attract, forming an ionic compound. The properties of ionic compounds are as follows:

Statement 1 is correct: Ionic compounds are solids and are somewhat hard because of the strong force of attraction between the positive and negative ions. **These compounds are generally brittle and break into pieces when pressure is applied.**

Statement 2 is incorrect: Melting and Boiling points: Ionic compounds have high melting and boiling points. This is because a considerable amount of energy is required to break the strong inter-ionic attraction.

Statement 3 is correct: The conduction of electricity through a solution involves the movement of charged particles. A solution of an ionic compound in water contains ions, which move to the opposite electrodes when electricity is passed through the solution. **Ionic compounds in the solid state do not conduct electricity because movement of ions in the solid is not possible due to their rigid structure. But ionic compounds conduct electricity in the molten state.** This is possible in the molten state since the electrostatic forces of attraction between the oppositely charged ions are overcome due to the heat. Thus, the ions move freely and conduct electricity.

Statement 4 is correct: Ionic compounds are generally soluble in water and insoluble in solvents such as kerosene, petrol, etc.

Source: Page 49, chapter 3- Metals and Non-metals of 10th NCERT.

<https://www.britannica.com/science/ionic-compound>

Q.25) Which of the following statements with reference to 'Maarg Portal' is correct?

It is a-

- platform to monitor details about every plant under all plantation project of National Highway Authority of India.
- portal to address Indian requirements of map based contents like satellite Images and theme-oriented services.
- one-stop platform to facilitate mentorship for startups
- platform to provide education through online mode.

Ans) c

Exp) Option c is the correct answer.

Option a is incorrect. The National Highways Authority of India (NHAI), a public sector undertaking under the Ministry of Road Transport and Highways, has developed a mobile App called 'Harit Path' to monitor location, growth, species details, maintenance activities, targets and achievements of each of its field units for each and every plant under all plantation projects.

Option b is incorrect. Bhuvan is designed, developed, deployed and managed by a small team of scientists within ISRO. It is being widely, used by the Government, public, NGOs and Academia. Bhuvan is developed with a clear focus of addressing Indian requirements of map based contents like satellite Images and theme-oriented services to enable planning, monitoring and evaluation of stakeholder's activities in governance and development.

Option c is correct. The MAARG Portal by Startup India is a one stop mentorship platform to facilitate mentorship for startups across diverse sectors, functions, stages, geographies, and backgrounds. Startups can connect with academicians, industry experts, successful founders, seasoned investors, and other experts to get personalized advice on growth strategy, seek clarity, and get practical advice.

Option d is incorrect. DIKSHA is the platform for providing quality e-content for school education in States/UTs and QR coded Energized Textbooks for all grades (one nation, one digital platform). DIKSHA complies with World Wide Web Consortium (W3C) Web Content Accessibility Guidelines (WCAG) 2.0 level AA.

Source: <https://maarg.startupindia.gov.in/about-us>

<https://pib.gov.in/newsite/PrintRelease.aspx?relid=137293>

Q.26) Which of the following statements regarding RADAR and its application is/are correct?

1. The RADAR system operates by transmitting electromagnetic waves and detecting the reflected signal.
2. RADAR cannot be used to measure Speed of a Vehicle
3. RADAR is also used to detect buried artifacts.

Select the correct answer using the code below:

- a) 1 and 3 only
- b) 1, 2 and 3
- c) 3 only
- d) 1 and 2 only

Ans) a

Exp) Option a is the correct answer.

RADAR stands for Radio Detection and Ranging and is used for sensing, detecting and locating objects in the environment. RADAR has a wide range of applications such as aircraft anti-collision systems, air and terrestrial traffic control, surveillance systems, air-defence systems, meteorological monitoring, antimissile systems, RADAR astronomy, marine RADARs for ships, guided missile target locating system, remote sensing, geological observations, and measurement of height and depths

Statement 1 is correct: RADAR (Radio Detection and Ranging) works by transmitting radio waves and then detecting the reflected signals to determine the location, speed, and other characteristics of objects in its vicinity.

Statement 2 is incorrect: RADAR is commonly used by law enforcement agencies to measure the speed of vehicles for traffic enforcement purposes. Hence statement 2 is wrong.

Statement 3 is correct: Archaeologists use ground penetrating RADARs for detecting buried artifacts. Geologist also use it for studying the position of the earth for earthquake detection.

Modern RADAR systems are equipped with advanced signal processing techniques that allow them to extract a **vast amount of information from the reflected signal, beyond just range detection**. For instance, Doppler RADARs can detect the velocity of moving objects, while Synthetic Aperture RADAR (SAR) can create high-resolution images of the terrain even in adverse weather conditions etc.

Source:

https://www.researchgate.net/publication/316696944_RADAR_and_its_applications/link/5e6328324585153fb3c836ac/download

Q.27) Which of the following statements best defines the 'Escape Velocity'?

- a) The minimum velocity required for a planet to enter the orbit of Sun
- b) The minimum velocity required for an object to leave the gravitational influence of a planet
- c) The maximum velocity required for an object to escape the Planet magnetic field
- d) The maximum velocity required for a satellite to enter the orbit of the Planet.

Ans) b

Exp) Option b is the correct answer.

Escape velocity is the minimum speed required for an object to escape the gravitational pull of a planet or other celestial body and enter into space. At this speed, the object will continue to move away from the planet indefinitely, assuming there is no other force acting on it. It is important in space exploration and satellite launches.

A spacecraft leaving the surface of Earth, for example, needs to be going about 11 kilometers (7 miles) per second, or over 40,000 kilometers per hour (Approx 25,000 miles per hour), to enter orbit.

Knowledge Base:

The escape velocity of a planet or other celestial body depends on its mass and radius. It is given by the formula:

$$v = \sqrt{2GM/r}$$

where v is the escape velocity, G is the gravitational constant, M is the mass of the planet, and r is the distance from the centre of the planet to the object.

Source: https://www.nasa.gov/audience/foreducators/k-4/features/F_Escape_Velocity.html

Q.28) Which of the following statements best defines the term "reverberation"?

- The persistence of sound in a closed space after the original sound has ceased.
- Repetition of a sound received at the source caused by reflection of sound.
- The bending of sound waves around an obstacle
- The decrease in sound intensity as it travels through a medium.

Ans) a

Exp) Option a is the correct answer.

Option a is correct: Reverberation is the persistence of sound waves in an enclosed space after the original sound source has stopped. When sound waves hit a surface, they can be reflected back and forth between surfaces, causing them to linger in the space for a longer period of time. This creates a prolonged sound that gradually fades away.

Option b is incorrect: The repetition of a sound wave received at the source caused by reflection is known as an **echo**. The reflected sound creates a delay between the original sound and the echoed sound, which is more noticeable when the distance between the source and the reflective surface is greater.

Option c is incorrect: The bending of sound waves around an obstacle is known as **diffraction**. When sound waves encounter an obstacle, such as a doorway or a corner, they can bend and spread out, allowing the sound to "diffuse" or spread around the obstacle.

Option d is incorrect: The decrease in sound intensity as it travels through a medium is known as **attenuation**. Attenuation occurs because sound waves transfer energy to the particles in the medium they are traveling through, causing them to vibrate and dissipate the energy of the sound wave.

Knowledge Base: Reverberation is a phenomenon commonly experienced in enclosed spaces such as concert halls, churches, and auditoriums. It can be caused by a variety of factors including the size and shape of the room, the materials used in the construction of the walls and floors, and the amount of sound-absorbing materials present. Reverberation can affect the clarity and quality of sound in a space and is often managed through the use of acoustic treatments such as sound-absorbing panels or diffusers.

Source: https://www.acousticalsurfaces.com/acoustic_IOI/reverberation.htm

Q.29) Which of the following statements explains why an astronaut in a spaceship orbiting the Earth feels weightlessness?

- The gravitational pull of the Earth on the astronaut is balanced by the centripetal force of the astronaut's orbital motion.
- The spacecraft and the astronaut inside it are falling towards the Earth at the same rate as the Earth is curving away from them.

3. There is no solid surface for the astronaut to push against, so there is no opposing force to create a feeling of weight.

Select the correct answer using the code given below:

- a) 1 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Weightlessness is essentially free fall, where gravity is the only force acting on the astronaut and their spaceship. Spaceships are able to stay in orbit because they are traveling so quickly in the forward direction that they end up orbiting around the Earth in a circular pattern, despite being pulled towards Earth.

Statement 1 is incorrect: It is true that the gravitational pull of the Earth on the astronaut is balanced by the centripetal force of the astronaut's orbital motion, **but this only explains why the astronaut does not fall back to the Earth. It does not explain why the astronaut feels weightless.**

Statement 2 is correct: Spacecraft and the astronaut inside it are falling towards the Earth at the same rate as the Earth is curving away from them. This creates a feeling of weightlessness because the astronaut and the spacecraft are essentially in freefall, with no opposing force to create a sensation of weight.

Statement 3 is correct: The absence of a solid surface to push against means that there is no reaction force pushing back on the astronaut's body, which creates a sensation of weightlessness.

Source:

[https://sitn.hms.harvard.edu/flash/2018/free-falling-the-science-of-weightlessness/#:~:text=\(B\)%20An%20astronaut%20orbiting%20the,than%20crashing%20into%20the%20Earth.](https://sitn.hms.harvard.edu/flash/2018/free-falling-the-science-of-weightlessness/#:~:text=(B)%20An%20astronaut%20orbiting%20the,than%20crashing%20into%20the%20Earth.)

Q.30) The Prime Minister recently paid tribute to Subramania Bharathiyar. Which of the following statements are correct regarding Subramania Bharathiyar?

- 1. He was a poet, freedom fighter and a member of Indian National Congress.
- 2. 'Sudesa Geethangal' is his best-known poem.
- 3. He became the first ever poet whose works were nationalised by the state government.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Prime Minister Narendra Modi paid tributes to Subramania Bharathiyar, one of the most influential Tamil literary figures and also a freedom fighter, on his birth anniversary.

Statement 1 is correct. Subramania Bharathiyar was born on this day in 1882. He was a poet, freedom fighter, and activist from Tamil Nadu and played a proactive role as a member of the Indian National Congress.

Statement 2 is correct. Subramania Bharathiyar is best known for his poem Sudesa Geethangal, written in 1908. His contributions to modern Tamil literature earned him the title of 'Mahakavi Bharathiar.'

Statement 3 is correct. In 1949, Subramania Bharathiyar became the first ever poet whose works were nationalised by the state government.

Knowledge Base:

More about Subramania Bharathiyar

- 1) Owing to his revolutionary patriotic fervour, he was forced to live in exile from 1910 to 1919 in Pondicherry (now Puducherry), then a French colony.
- 2) Bharathi was a vocal critic of the caste system and he had himself taken off his sacred thread. He also condemned certain shastras that denigrated women and championed the cause of social justice by preaching equality of humankind.

Source: <https://www.google.com/amp/s/www.outlookindia.com/national/pm-modi-pays-tributes-to-tamil-poet-mahakavi-bharathiar-who-was-subramania-bharathi--news-244060/amp>

Q.31) Which of the following fields can have potential application of LASER technology?

1. Military operations
2. Medicine
3. Communication
4. Art and Entertainment
5. General-purpose illumination

Select the correct answer using the code given below:

- a) 1, 2, 3 and 4 only
- b) 1, 3, 4 and 5 only
- c) 2, 3, 4 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) d

Exp) Option d is the correct answer.

The potential applications of LASER technology are diverse and varied. While it is well-known that LASERS have been used in **military operations, medicine, and communication**, Lasers have also found their way into the realm of art and entertainment and are used in light shows, CD and DVD technology, and **special effects in movies**.

Statement 1 is correct : The probability of intercepting a laser signal is very low due to its narrow beam divergence and coherent optical beam, making the laser a suitable candidate for secure **military tactical operations**.

Statement 2 is correct : Lasers were first used for medical applications in 1961 for treatment of skin discoloration and detached retinas. Presently lasers are being widely used for numerous medical applications. These include surgery, ophthalmology, dermatology, angioplasty, cancer treatment, urology, cosmetic applications such as laser hair removal, tattoo removal and liposuction etc.

Statement 3: Laser light is used in optical fiber communications to send information over large distances with low loss. Laser light is used in underwater communication networks. Also, lasers are used in space communication, radars and satellites.

Statement 4: Lasers are typically bright, bold, and beautiful by nature, which is why they stand out over typical lighting fixtures. Not to mention, lasers aren't limited to projecting a specific gobo or effect, they're extremely versatile. Making them capable of virtually any event. Commonly referred to as "Laser Projectors" or "Laser Light Projectors", these entertainment lasers are sophisticated devices that are controlled using dedicated laser control hardware from either a PC or lighting console, allowing you to project all types of laser light effects

Statement 5 is correct: LASER technology is still in its early stages of development for general purpose lighting but has the potential to offer significant benefits in terms of energy efficiency, color rendering, and design flexibility.

Much Research shows that laser-based lighting, although still a growing technology, can push the limits of solid-state lighting in terms of efficiency at high currents thanks to low droop and optical management of the emitted light.

Q.32) With reference to the Geographic Information System (GIS), consider the following statements:

1. It is a computer-based system to record, store and analyse data related to positions on Earth's surfaces.
2. It can be helpful in city administration and property tax assessment.
3. It is among the cheapest way of data aggregation and assessment for efficient decision making.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

A geographic information system (GIS) consists of integrated computer hardware and software that store, manage, analyse, edit, output, and visualize geographic data. GIS technology integrates common database operations such as query and statistical analysis with the unique visualization and geographic analysis benefits offered by maps.

Statement 1 is correct: A geographic information system (GIS) is a computer based system for capturing, storing, checking, and displaying data related to positions on Earth's surface. GIS can show many different kinds of data on one map, such as streets, buildings, and vegetation. This enables people to more easily see, analyse, and understand patterns and relationships.

Statement 2 is correct: GIS aids in the monitoring of property tax revenue and city administration by establishing a platform that spatially interconnects all property- related data, such as the number of storeys in each building, the total structured area of each building, individual plot areas, locality details, and municipal colony boundaries, etc. For example, Pune city has its own GIS portal for tax administration. There are several other cities in India which have gone high tech to manage property taxes in respective civil administration.

Statement 3 is incorrect: Information from GIS is very accurate and provides users with better assessment and predictions. With the availability of detailed and specific data, decision making has improved. **However, GIS technology is very costly technology to install. The GIS setup is complex and additional cost is imputed on training and dataset upgradation.**

Source: <https://education.nationalgeographic.org/resource/geographic-information-system-gis/>

<https://analyticsindiamag.com/how-smart-cities-are-tackling-property-tax-evasion-via-gis/>

https://www.researchgate.net/publication/333510563_Merits_and_Demerits_of_GIS_and_Geostatistical_Techniques

Q.33) With reference to the Hyperspectral Imaging technology, consider the following statements:

1. It is a technology that captures hundreds of images at different wavelengths of the same object or spatial area.
2. It can improve the monitoring of pollutants in the atmosphere.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Hyperspectral imaging samples a wide variety of bandwidths in the light spectrum to provide a rich dataset and detect objects of interest not visible to single-bandwidth imaging sensors.

Statement 1 is correct: Hyperspectral imaging is a growing area in remote sensing in which an imaging spectrometer collects hundreds of images at different wavelengths for the same spatial area/ object. It captures and analyses the image of an object from literally hundreds of narrow, adjacent wavelength bands, and across a wider range of wavelengths than visible to the naked eye.

Statement 2 is correct: Hyperspectral imagery has the potential to significantly improve the ease of monitoring pollutants in the atmosphere. This includes the study and monitoring of particulate matter or greenhouse gasses such as **carbon monoxide, carbon dioxide, nitrous oxide and methane** in the atmosphere over time.

Knowledge Base: **Modern digital cameras can sense energy in limited portions of the electromagnetic spectrum. Whereas, hyperspectral imaging has capability to generate large data and identify unique spectral signatures or fingerprints that each material or substance has,** and classify them accordingly into different types of land cover such as crops, forests, grasslands, and bodies of water which can help administration in better land management and urban planning.

Source: <https://timesofindia.indiatimes.com/blogs/voices/seeing-the-unseen-hyperspectral-imagery-the-technology-and-its-applications/>

<https://www.sciencedirect.com/topics/earth-and-planetary-sciences/hyperspectral-imaging>

Q.34) Which of the following animals can produce infrasonic sound?

1. Whales
2. Elephants
3. Bats
4. Rhinoceros
5. Dolphins

Select the correct answer from the codes given below:

- a) 1, 2 and 3 only
- b) 1, 2 and 4 only
- c) 2, 3 and 5 only
- d) 1, 4 and 5 only

Ans) b

Exp) Option b is the correct answer.

The audible range of sound for human beings extends from about 20 Hz to 20000 Hz. The sound of frequencies below 20 Hz are called as infrasonic sound or infrasound. Whereas sound of frequencies above

20000 Hz are called as ultrasonic frequencies or ultrasound. Hence, both infrasonic and ultrasonic sounds are inaudible to man.

Option 1 is correct: Whale can vocalize and hear very low-pitched, or infrasonic sound, using which they can travel great distances and scatter to large areas in water. With infrasonic sound, whales can communicate with each other over geographic areas as large as an ocean basin.

Option 2 is correct: Elephants can produce and can communicate using very low frequency sounds, with pitches below the range of human hearing. These low-frequency infrasound can travel several kilometres and provide elephants with a "private" communication channel that plays an important role in elephants' complex social life.

Option 3 is incorrect: Bats do not produce infrasound, rather they use ultrasonic waves (>20000 Hz) for communication and navigation.

Option 4 is correct: Rhinoceros can produce infrasonic sounds of frequency as low as 5 Hz for communication.

Option 5 is incorrect: Dolphins also do not produce infrasound; they use ultrasonic waves for communication and navigation under the water.

Q.35) Consider the following statements with respect to the Veer Baal Diwas which was announced recently by the Prime Minister.

1. It is to be commemorated on 26th December every year.
2. It is commemorated to honour martyrdom of Guru Govind Singh.
3. The Battle of Chamkaur was an important event in history to commemorate this day.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The Prime Minister, Shri Narendra Modi participated in a historic programme marking 'Veer Bal Diwas' at Major Dhyan Chand National Stadium in Delhi. During the programme, the Prime Minister attended a 'Shabad Kirtan' performed by about three hundred Baal Kirtanis.

Statement 1 is correct. On 9th January 2022, the day of the Prakash Purab of Sri Guru Gobind Singh Ji, the Prime Minister had announced that 26th December would be observed as 'Veer Bal Diwas'.

Statement 2 is incorrect. It is celebrated to mark the martyrdom of **sons of Sri Guru Gobind Singh - Sahibzadas Baba Zorawar Singh Ji and Baba Fateh Singh Ji.**

Statement 3 is correct. On the morning of 7 December 1705, the day of the fateful battle of Chamkaur, Baba Zorawar Singh ji, along with Baba Fateh Singh ji and their grandmother, was taken into custody by Jani Khan and Mani Khan Ranghar, the officials at Morinda. They were then threatened with death, but they remained undaunted. On 12 December 1705, Baba Zorawar Singh ji and Baba Fateh Singh ji were martyred by sealing alive in a wall.

Q.36) What happens when table salt (Sodium Chloride) is mixed with water?

- The boiling point of water decreases.
- The pH of the resultant solution increases.
- The surface tension of the resultant solution increases.
- The density of the resultant solution decreases.

Ans) c

Exp) Option c is the correct answer.

Water (H₂O) consists of the elements hydrogen (H) and oxygen (O) in a 2-to-1 molar ratio. This means that there are two H atoms for every O atom in water. It is a polar covalent compound. Table salt (sodium chloride, or NaCl) is an ionic compound, meaning that the bond it forms results from the donation of an electron from one atom (Na) to another (Cl), rather than from the electron sharing seen in covalent bonds. When table salt is placed in water, the slightly electropositive sodium portion is attracted to the slightly electronegative oxygen portion of water molecules. At the same time, the slightly electronegative chlorine portion of NaCl is attracted to the slightly electropositive hydrogen portion of water.

Statement a is incorrect: When the salts are dissolved in water, the intermolecular attraction between salt-water molecule is greater than water-water attraction. Hence, when water is heated at 100-degree Celsius (i.e., at its boiling point), the salt molecules make it difficult for the water molecules to evaporate due to greater attractive force. **Therefore, the boiling point of the resultant solution increases.**

Statement b is incorrect: When Sodium Chloride is added to water it breaks down into ions of sodium and chloride. Neither of them reacts to water so adding it to water will only change the volume, not the pH. In order for a type of salt to affect the pH it has to react with water to release or bind the hydrogen atoms from the water. No chemical reaction takes place when salt is added to water.

Statement c is correct: Surface Tension is the property of the surface of a liquid that allows it to resist an external force, due to the cohesive nature of its molecules. When salt is added to the water the intermolecular attraction in the solution increases (as intermolecular attraction between salt-water molecules is greater than the water-water molecules), **hence the property of intermolecular cohesion increases thus increasing the surface tension of the resultant solution.**

Statement d is incorrect: As we know, density of a substance is mass per unit volume, and when salt is added to water the density of the solution increases (and not decreases). The Dead Sea is much denser than the Red sea, because the salinity of the Dead sea is much higher than the Red sea.

Source: <https://sciencing.com/happens-salt-added-water-5208174.html>

Q.37) Which of the following statements best describes the reason why satellites are usually launched from the eastern coast of a country?

- To minimise the impact of pollution caused by rocket propulsion.
- The area near eastern coast is less affected by the stratospheric winds.
- It provides an initial boost to rockets due to rotational velocity of the Earth.
- Due to less density of population in the Eastern coasts of a country.

Ans) c

Exp) Option c is the correct answer.

The choice of the perfect launch site for spacecraft, quite predictably, involves the study and analysis of many different parameters. One of the primary concerns of space engineers and scientists is to ensure that the satellite in question gets as much natural 'push' as possible during its initial ascent.

Option c is correct: As the Earth rotates from west to east, launching a rocket from the east coast gives an additional boost to the rocket, due to the rotational speed of Earth. This initial boost aids in reducing cost of rockets used to launch satellites.

Another reason is that if something goes wrong during the ascent, the debris will fall into an ocean instead of a densely populated area. Additionally, most launch sites are located near the equator because rockets launched from these sites get an additional natural boost that helps save on fuel and boosters.

Option a is incorrect: Launching of rockets from the eastern coast has nothing to do with the impact of pollution caused during the rocket ignition and propulsion. Pollution will anyway occur.

Option b is incorrect: The stratospheric winds blow a few kilometres above the surface of the Earth. They blow uniformly over a latitude. Hence, they do not necessarily/significantly favour the launching from the Eastern Coast.

Option d is incorrect: Eastern coasts all over the world do not necessarily have less population. For example, eastern coast of the China is densely populated. Hence, it is not one of the possible reasons.

Source: <https://www.scienceabc.com/eyeopeners/why-are-rockets-launched-from-areas-near-the-equator.html>

Q.38) With reference to the ‘Total Solar Eclipse’, consider the following statements:

1. ‘Ring of fire’ is a unique characteristic of Total Solar Eclipse.
2. Total Solar Eclipse are rare as compared to Total Lunar Eclipse
3. Total Solar Eclipse provides an opportunity for scientists to study the corona of the Sun.

Which of the statements given above are correct?

- a) 2 and 3 only
- b) 1 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) a

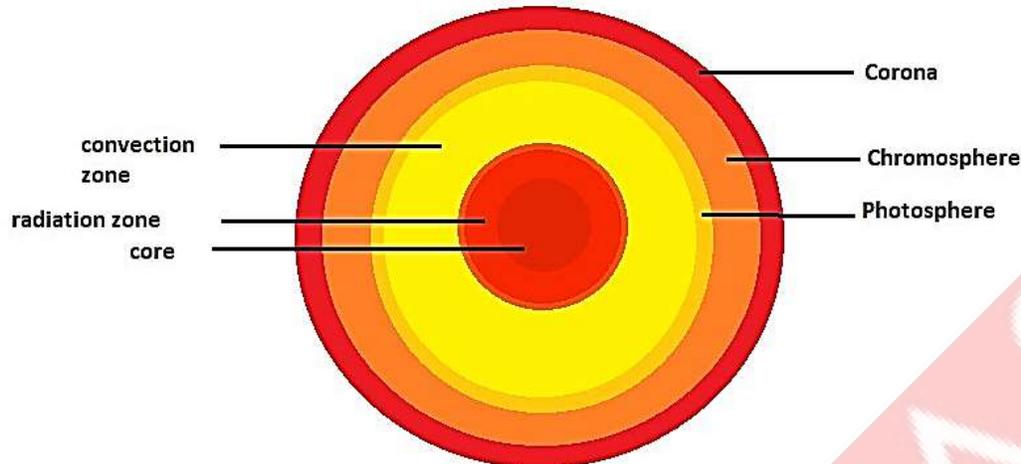

Exp) Option a is the correct answer.

A solar eclipse occurs when the **moon is positioned between Earth and the Sun** and casts a shadow over Earth. Sometimes the Moon only blocks part of the Sun’s light. This is called a partial solar eclipse. There are various types of solar eclipse – **Total Solar Eclipse, Annular solar, Partial solar eclipse and Hybrid solar eclipse.** **When Moon blocks all of the Sun’s light. This is called a total solar eclipse.**

Statement 1 is incorrect: ‘Ring of fire’ is a characteristic of Annular Solar Eclipse (Not Total Solar Eclipse). The Annular solar eclipse occurs when the moon passes between the sun and Earth when it is near its farthest point from Earth. At this distance, the moon appears smaller than the sun and **doesn't cover the entire face of the sun. Instead, a ring of light is created around the moon, which is popularly known as ‘Ring of Fire’.**

Statement 2 is correct: Lunar eclipses are more frequently visible because during a lunar eclipse, Earth casts a much bigger shadow on the Moon than the Moon casts during a solar eclipse on Earth. **The reason solar eclipses are so rare is that the umbra of the Moon rarely hits the surface of the Earth.** Even during a total solar eclipse, a small area on Earth is covered by the umbra. **Hence, Total Solar Eclipse are rare as compared to Total Lunar Eclipse.**

Statement 3 is correct: Total darkness during the Total Solar Eclipse is very crucial for scientists who study the Sun’s atmosphere, called the **corona. The corona is very dim. It’s usually hard to see because the Sun is so much brighter.** But, when the Moon blocks the Sun’s light during an eclipse, all scientists can see the light from the corona for their study.

SOLAR ECLIPSE

Things to know about this astronomical event

TYPES OF SOLAR ECLIPSE

TOTAL
The Moon completely blocks off the Sun's rays and casts a shadow over the Earth.

ANNULAR
The Moon covers the Sun fully but due to its relatively small size the outer ring of the Sun is completely visible from Earth. This is also known as the Ring of Fire.

PARTIAL
The Moon covers a part of the Sun and casts only the outer part of its shadow, the penumbra, on Earth.

HYBRID: A rare form of solar eclipse which changes from an annular to a total solar eclipse, and vice versa, along its path. During a Hybrid Solar Eclipse you could see any of the three forms of eclipses, depending on exactly where you stand.

WHAT IS A SOLAR ECLIPSE?
During a Solar eclipse the Sun, Moon and Earth are in a straight line and the Moon comes between the Sun and Earth. This blocks the rays of the Sun from reaching the Earth causing a solar eclipse.

FACT
A solar eclipse usually occurs around two weeks prior or after a lunar eclipse.

Q.39) Which of the following is/are the preventive measures taken so that the trains don't topple when moving along a curved track?

1. The curved railway tracks are slightly inclined.
2. The shape of wheel is made slightly conical.

Select the correct answer using the code given below.

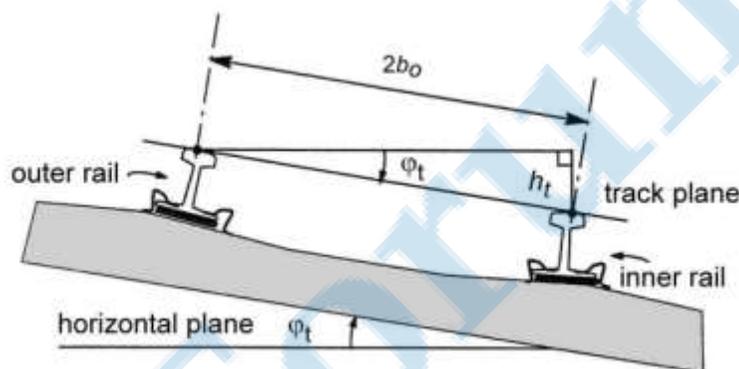

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

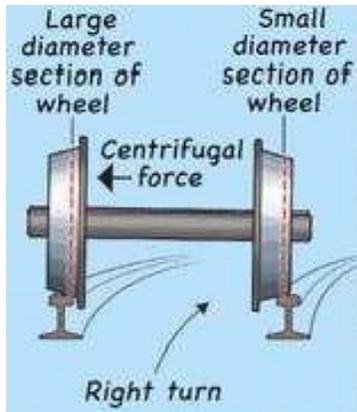

Exp) Option c is the correct answer.

Toppling implies that an object or an item will effortlessly fall over. Trains can topple on curved surfaces if tracks are made without using proper engineering.

Statement 1 is correct: The reason for trains don't topple when moving along a curved tracks because railway tracks are banked. The outer rail is positioned at a slightly higher level than the inner one. This is the reason why tracks are often inclined. The forces acting on the train in such a case are its weight, acting straight downward and the normal reaction force exerted by the tracks. Because of the inclination (due to the embankment) the normal force (reaction of the weight) exerted from the ground has a horizontal component. As long as this equals the centripetal force of the curve at that point, the train does not fall sideways.

Statement 2 is correct: The wheels on each side of a train car are connected with a metal rod called an axle. This axle keeps the two train wheels moving together, **both wheel turning at the same speed when the train is moving.** This construction is great for straight tracks. But when a train needs to go around a bend the fact that both wheels are always rotating at the same rate can become a problem. **The outside of a curve is slightly longer than the inside, so the wheel on the outside rail actually needs to cover more distance than the wheel on the inside rail. To help the wheels stay on the track their shape is usually slightly conical.** This means that the inside of the wheel has a larger circumference than the outside of the wheel. As a result when a train is turning it is momentarily running on wheels that are effectively two different sizes. As the outside wheel's circumference becomes larger it is able to travel a greater distance even though it rotates at the same rate as the smaller inside wheel.

Q.40) What is 'Erra Matti Dibbalu', which was recently seen in news?

- It is a rare red sand dune seen in Andhra Pradesh.
- It is a newly discovered species of Indian beetle
- It is a sedimentary cave from the state of Meghalaya
- It is a living roots bridge found in North East India

Ans) a

Exp) Option a is the correct answer.

Locals in Vishakhapatnam have taken up the initiative to preserve one of their heritages, Erra Matti Dibbalu, a notified National Geo-heritage monument.

Option a is correct. Erra Matti Dibbalu are rare red sand dunes and carry with them millions of years of geological processes. The dissected and stabilized coastal red sediment mounds are located between Vishakhapatnam and Bhimuniapatnam.

Option b is incorrect. 'Omorgus Khandesh', a newly discovered Indian beetle: It can help forensic science. The beetle is important for forensic science as it helps detect the time of death of an animal or human.

Option c is incorrect. Mawmluh Cave in Meghalaya, locally known as Krem Mawmluh, has been listed as UNESCO's one of the 'First 100 IUGS (International Union of Geological Sciences) Geological Sites' in the world.

Option d is incorrect. Jing kieng jri, the living root bridges are one of Meghalaya's most beautiful tangible heritage sites. These sites have recently been added to the tentative UNESCO world heritage site list. They are made of intertwined roots which are a sort of magic, but they aren't imaginary. They are majorly made by Khasi tribes.

Q.41) A rainbow is a meteorological and optical phenomenon that is caused by reflection, refraction and dispersion of light in water droplets resulting in a spectrum of light appearing in the sky. Consider the following statements with reference to the rainbow:

1. The shape of rainbow is always semi-circular or arc shaped.
2. Rainbows formed by sea spray are usually smaller than rainbows formed by rain.
3. When a 'double rainbow' is seen, the secondary rainbow has the same order of the colors as primary rainbow.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

A rainbow is a **multicolored arc in the sky which appears when sunlight hits water droplets.**

Statement 1 is incorrect: Rainbows appear semi-circular over level ground at sunrise or sunset, when the sun is exactly on the horizon, the majority of the time a smaller segment of an arc is seen. **A full rainbow is actually a complete circle, but from the ground we see only part of it. From an airplane, in the right conditions, one can see an entire circular rainbow. Hence, the shape of rainbow is circular but we can see only part of it from ground.**

Statement 2 is correct: The radius of a rainbow is determined by the water droplets' refractive index. A refractive index is the measure of how much a ray of light refracts (bends) as it passes from one medium to another—from air to water, for example. **A droplet with a high refractive index will help produce a rainbow with a smaller radius. Saltwater has a higher refractive index than freshwater. This is the reason that rainbows formed by sea spray are smaller than rainbows formed by rain.**

Statement 3 is incorrect: Sometimes, a viewer may see a "double rainbow". In this phenomenon, **a fainter secondary rainbow appears above the primary one but has opposite order of the colors as primary rainbow.** The primary rainbow is caused from one reflection inside the water droplet. The secondary rainbow is caused by a second reflection inside the droplet, and this "re-reflected" light exits the drop at a different angle. This is why the secondary rainbow appears above the primary rainbow. **The secondary rainbow will have the order of the colors reversed, too, with red on the bottom and violet on the top.**

Knowledge Base: The position of the sun and the raindrops in relation to the observer need to be just right for a rainbow to form: 1. **The sun needs to be behind the viewer.** 2. The sun needs to be low in the sky, at an **angle of less than 42°** above the horizon. The lower the sun in the sky the more of an arc of a rainbow the viewer will see. 3. **Rain, fog or some other source of water droplets must be in front of the viewer**

Q.42) With reference to the telescope, consider the following statements:

1. Reflecting telescope is made from mirrors while refracting telescope is made from lenses.
2. Unlike Refracting telescope, reflecting telescope always creates chromatic aberration.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

A **telescope** is a tool that astronomers use to see faraway objects.

Statement 1 is correct: A telescope made with lenses is called a **refracting telescope** and a telescope that uses mirrors is called a **reflecting telescope**. **Refracting telescopes** utilize specialized lenses that make them a favorite for deep space objects like galaxies and nebulae. In contrast, **reflecting telescopes** are more popular with larger and brighter objects like the Moon and planets because they use mirrors that provide more sensitivity to all wavelengths.

Statement 2 is incorrect: The main advantage of reflection (by a mirror) over refraction (by a lens) is that all colours of light are reflected equally, so the images do not suffer from chromatic aberration.

Chromatic aberrations occur in the case of lenses and the mirrors are free from the chromatic aberrations. Hence, refracting telescope creates chromatic aberration, not reflecting telescope.

Knowledge Base: To see far away, there is need a big powerful lens in refracting telescope. **Unfortunately, a big lens is very heavy.** Unlike a lens, a mirror can be very thin. **A bigger mirror does not also have to be thicker.** Light is concentrated by bouncing off of the mirror. So, the mirror just has to have the right curved shape. It is much easier to make a large, near-perfect mirror than to make a large, near-perfect lens. **Hence, refracting telescope is heavier than reflecting telescope.**

Source:

<https://spaceplace.nasa.gov/telescopes/en/#:~:text=The%20shape%20of%20the%20mirror,we%20look%20into%20a%20telescope.&text=A%20telescope%20is%20a%20tool,light%20from%20the%20night%20sky.>

Q.43) Which of the following principles/laws of physics make it possible for a plane to fly in the air?

1. Bernoulli's Principle
2. Newton's Third Law of Motion
3. Faraday's law

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

An aircraft in straight and level flight is acted upon by **four forces: lift, gravity, thrust and drag**. The opposing forces balance each other: Lift equals gravity, and thrust equals drag. Thrust is the force that moves an airplane forward through the air. Thrust is created by a propeller or a jet engine. Drag is created by the air resistance.

Option 1 is correct: As the wing moves through the air, the air flowing over the top of the wing moves faster than the air flowing below the wing. This creates an area of lower pressure on the top of the wing. Higher pressure remains below the wing and is able to lift the wing into the air. **This principle is known as Bernoulli's principle. It helps in lift of Plane.**

Option 2 is correct: Newton's Third Law of Motion also works to the creation of lift. The law states that for every action, there is an equal and opposite reaction. As the air flows around the wing, it gets deflected downward. The equal and opposite reaction then is that the wind pushes the wing upward. It's the combination of both the lower pressure air flowing above the wing and this equal and opposite reaction that enables a wing to generate lift.

Option 3 is incorrect: Faraday's law of induction, in physics, a quantitative relationship expressing that a changing magnetic field induces a voltage in a circuit, developed on the basis of experimental observations made in 1831 by the English scientist Michael Faraday.

Q.44) Consider the following statements regarding the phenomenon of electroplating:

1. Depositing a layer of a conductive material on the surface of another conductive material by means of electricity is known as electroplating.
2. Iron objects are sometimes electroplated with zinc to prevent rusting of iron.
3. Electroplating is used in the making of jewellery.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: The process of depositing a layer of any desired metal on another material by means of electricity is called electroplating. It is one of the most common applications of chemical effects of electric current.

Statement 2 is correct: Iron is used in bridges and automobiles to provide strength. However, iron tends to corrode and rust. So, a coating of zinc is deposited on iron to protect it from corrosion and formation of rust.

Statement 3 is correct: Commonly, jewellers use electroplating because it helps improve the durability of the jewellery. With this method, objects are less likely to tarnish over time. Jewellery makers do the electroplating of silver and gold on less expensive metals. These ornaments have the appearance of silver or gold but are much less expensive.

Source: <https://blog.prv-engineering.co.uk/electroplating-process-applications/>
<https://ncert.nic.in/ncerts/l/hesc114.pdf>

Q.45) With reference to the Gamma-ray bursts, consider the following statements:

1. They are the strongest and brightest explosions in the universe.
2. It is thought to be generated during the formation of black holes.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Gamma-ray bursts (GRBs) are immensely energetic explosions that have been observed in distant galaxies (still not seen in Milky Way Galaxy). They are the most energetic and luminous electromagnetic events since the Big Bang.

Statements 1 and 2 are correct. Gamma-ray bursts (GRB) are the **strongest and brightest explosions** in the universe. They are thought to be generated during the formation of black holes.

Knowledge Base:

More about gamma-ray bursts

- 1) So far, gamma-ray bursts have only been detected in distant galaxies. However, it is possible for one to occur in our Milky Way galaxy.
- 2) The photons emitted from gamma-ray bursts all oscillate in the same direction, but for some reason, the direction changes over time.
- 3) Burst and Transient Source Experiment (BATSE), which discovered roughly one new gamma-ray burst per day. BATSE found that gamma-ray bursts **were distributed evenly across the sky**, meaning they were occurring everywhere in the cosmos. BATSE also showed that there were two types of gamma-ray bursts with distinct signatures: those that lasted 2 to 30 seconds, and those that flashed for less than 2 seconds.

Source: <https://www.space.com/gamma-ray-burst.html>

Q.46) Consider the following statements regarding quantum physics:

1. Quantum objects may have both particle-like properties and wave-like properties.
2. According to quantum mechanics, it is possible for a particle to exist in two different locations at the same point of time.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: One of the most important principles underlying quantum physics is that of wave-particle duality. **Quantum objects have both particle-like properties (such as mass, charge, and energy) and wave-like properties (such as wavelength and frequency).**

Statement 2 is correct: The principle of quantum superposition states simply that a quantum particle can exist in two distinct locations at the same time. According to this theory, quantum particle can exist simultaneously in multiple states, unless the operation of measurement is made.

Source: <https://www.futurelearn.com/info/courses/frontier-physics-future-technologies/0/steps/240867#:~:text=One%20of%20the%20most%20important,light%20traveling%20through%20a%20prism.>

<https://becominghuman.ai/quantum-superposition-and-what-that-means-to-quantum-computation-3fbb5a711b9a>

Q.47) Consider the following statements regarding the Diodes:

1. Diode is an electronic component made of semiconductor material that allows conduction of current primarily in one direction.
2. Light Emitting Diodes (LEDs) are also known as Photodiodes.
3. Silicon and germanium are commonly used in the making of diodes.

Which of the statements given above are correct?

- a) 1 and 3 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: An electronic component made of semiconductor material that allows conduction of current in only one direction is termed as a Diode. It is a two-terminal device normally formed by fusing p and n-type semiconductor materials each having majority and minority carriers.

Statement 2 is incorrect: LEDs and photo diodes are not same. The working of a photodiode is completely reversed to that of an LED. **While an LED converts electrical energy into light (emits light), a photodiode converts light to electrical energy.** It is used to measure the intensity of light with high accuracy. Photodiodes are reverse biased.

Statement 3 is correct: The commonly used semiconductor materials for making the diodes are silicon, germanium, and gallium arsenide. Of the three, germanium was one of the earliest semiconductor

materials used. Germanium has four valence electrons, which are electrons located on the outer shell of the atom.

Source: <https://electronicsdesk.com/diode.html>

<https://learn.sparkfun.com/tutorials/diodes/real-diode-characteristics>

<https://ncert.nic.in/ncerts/l/leph206.pdf>

Q.48) Consider the following statements regarding single phase and three phase power supply:

1. Residential homes are usually served by a single-phase power supply, while commercial and industrial facilities usually use a three-phase supply.
2. Three phase power is more efficient and transmits more power compared to the single-phase power.
3. In India, the maximum voltage that can be reached in both types of supplies is 230 Volts.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

In electricity, the phase refers to the distribution of a load. Single-phase power is a two-wire alternating current (ac) power circuit. Typically, there is one power wire—the phase wire—and one neutral wire, with current flowing between the power wire (through the load) and the neutral wire. Three-phase power is a three-wire ac power circuit with each phase ac signal 120 electrical degrees apart.

Statement 1 is correct: Residential homes are usually served by a single-phase power supply, while commercial and industrial facilities usually use a three-phase supply. One key difference between single-phase vs. three-phase is that a three-phase power supply better accommodates higher loads. Single-phase power supplies are most commonly used when typical loads are lighting or heating, rather than large electric motors.

Statement 2 is correct: Compared to the single-phase power, three-phase power supplies are more efficient. A three-phase power supply can transmit three times as much power as a single-phase power supply, while only needing one additional wire (that is, three wires instead of two).

Statement 3 is incorrect: In India a single-phase supply is a 230V supply through two wires (one called phase and another neutral) and 3-phase supply is 415 V supply through 4 wires and in the house, the line can be divided to give 230V (by selection any one phase and another neutral) at an individual point. The basic difference between the two is that a three-phase connection can handle heavy load while a single-phase cannot.

Source: <https://www.fluke.com/en-us/learn/blog/power-quality/single-phase-vs-three-phase-power>

<https://www.bijlibachao.com/electricity-bill/what-are-single-phase-and-three-phase-connections-and-how-to-choose-between-the-two.html>

Q.49) Which of the following vitamins are fat-soluble?

1. Vitamin C
2. Vitamin D
3. Vitamin A
4. Vitamin K

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 3 and 4 only
- d) 1, 2, 3, and 4

Ans) b

Exp) Option b is the correct answer.

Vitamins are nutrients that the body needs in small amounts to stay healthy and work the way it should. A vitamin that can dissolve in fats and oils. They are absorbed into the body in different ways and excreted from the body at different rates. Fat-soluble vitamins are absorbed along with fats in the diet and are stored in the body's fatty tissue and in the liver. Vitamins A, D, E, and K are fat-soluble.

Option 1 is incorrect: Vitamin C is a water (not fat) soluble vitamin. This means that it is **dissolved** in the **watery components** of our **tissues and fluids** for **immediate use** and is **not stored**. So, it **needs** to be regularly **replenished**. It gets **excreted with urine**.

Vitamin C is central to **iron absorption and collagen synthesis**. It aids in **wound healing** and **bone formation** while improving **overall immune function**. It is found in foods such as Indian gooseberry (amla), lemons, lime, pineapple, oranges, watermelon, green peppers, tomatoes, cabbage, turnip, carrots, green mint, guava, etc. A **deficiency** of Vitamin C leads to diseases like **Scurvy**, etc.

Option 2 is correct: Vitamin D is a fat soluble vitamin. It aids in the **development of teeth and bone** by encouraging the **absorption and metabolism of phosphorus and calcium**. Vitamin D occurs **naturally only in animal foods** such as **liver, butter, fatty fish** (fish containing high levels of cholesterol or fatty acids as glycerides), and **egg yolks**. A **deficiency** of Vitamin D leads to diseases like **Rickets** in children and **osteomalacia and osteoporosis** in adults.

Option 3 is correct: Vitamin A is a fat soluble vitamin. It is also known as **carotenoids and retinoids**. Vitamin A is integral to **bone formation, tooth formation, and vision**. It contributes to **immune and cellular function** while keeping the **intestines working properly**. It occurs **naturally** only in foods of **animal origin**, such as **liver, butter, whole milk**, and **egg yolks**, but the **body converts** certain carotenoids, especially **β -carotene**, to **vitamin A**. **Carotenoids** are present in **dark-green, leafy vegetables** and in **yellow and orange vegetables and fruits** like carrots, tomatoes, pumpkin, etc. A **deficiency** of Vitamin A leads to diseases like **Night Blindness**, etc.

Option 4 is correct: Vitamin K is a fat soluble vitamin. It is central to **blood clotting (helps create blood clotting factors like prothrombin, etc)** and also keeps **bones healthy**. Vitamin K1, (phylloquinone) is synthesized by plants, whereas vitamin K2 homologs (menaquinones) are synthesized by bacteria. The **human body can obtain** vitamin K from **dietary sources** as well as through **synthesis by the gut microflora**. **Larger amounts** of vitamin K are present in **dark-green leafy vegetables**; **lower levels** are found in **cereals, dairy products, meats, and fruits**. A **deficiency** of Vitamin K causes **excessive blood loss** upon **wounding** due to **inability to form blood clots**.

Knowledge Base:

- 1) Fat-soluble vitamins are dissolved in fats.
- 2) They are absorbed by fat globules that travel through the small intestines and distributed through the body in the bloodstream.
- 3) Unlike water-soluble vitamins, excess fat-soluble vitamins are stored in the liver and fatty (adipose) tissues for future use.
- 4) They are found most abundantly in high-fat foods and are better absorbed if eaten with fat.

5) Vitamin B Complex (B1, B2, B3, B5, B6, B7, B9, B12) are also water soluble. They are responsible for a variety of important functions in the body (Important for prelims - read more here <https://ncert.nic.in/textbook/pdf/iehp111.pdf> Pg 4,5)

Source: <https://ncert.nic.in/textbook/pdf/iehp111.pdf>

<https://www.ncbi.nlm.nih.gov/books/NBK218749/#:~:text=Vitamins%20A%2C%20D%2C%20E%2C,similar%20to%20that%20of%20fats.>

Q.50) SHREYAS is a programme basket comprising the initiatives of three Central Ministries. Which of the following is the objective of the SHREYAS scheme:

- to provide industry apprenticeship to general graduates
- to provide scholarship to meritorious minority community students
- to promote enrollment of girl child in the age group of 14-18 at secondary stage
- to enhance access to secondary education and to improve its quality

Ans) a

Exp) Option a is the correct answer.

Option a is correct. The Minister for Human Resources Development launched the Scheme for Higher Education Youth in Apprenticeship and Skills (SHREYAS) for providing industry apprenticeship opportunities to the general graduates exiting in April 2019 through the National Apprenticeship Promotional Scheme (NAPS).

Option b is incorrect. Merit Cum Means based Scholarship for Professional and Technical Courses aims to provide financial assistance to the poor and meritorious students belonging to minority communities to enable them to pursue professional and technical courses.

Option c is incorrect. The Centrally Sponsored Scheme - National Scheme of Incentives to Girls for Secondary Education was launched in May 2008. It aims to promote enrollment of girl child in the age group of 14-18 at secondary stage, especially those who passed Class VIII and to encourage the secondary education of such girls.

Option d is incorrect. Rashtriya Madhyamik Shiksha Abhiyan (RMSA) was launched in March, 2009 with the objective to enhance access to secondary education and to improve its quality.

Source: <https://pib.gov.in/newsite/PrintRelease.aspx?relid=188989>

<https://vikaspedia.in/education/policies-and-schemes/scholarships/post-matric-scholarship/cbse-merit-scholarship-schemes>

Q.1) Consider the following statements with reference to Prokaryotic Cells and Eukaryotic cells:

1. Unlike Prokaryotic cells, the Eukaryotic cells have a well-defined Nucleus.
2. Unlike Eukaryotic cells, Prokaryotic cells are characterized by the absence of Mitochondria.
3. Vacuoles are present in both Eukaryotic and Prokaryotic cells.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 only
- c) 2 and 3 only
- d) 1, 2 and 3

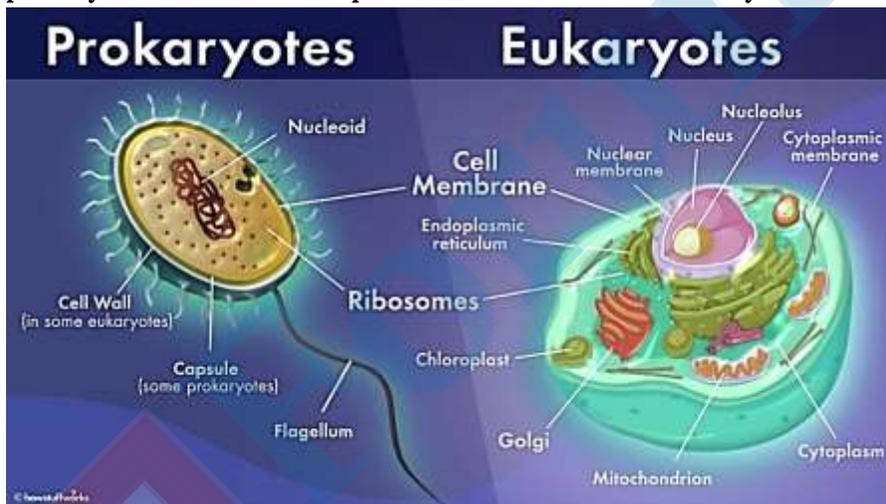

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: Prokaryotes have a cell wall surrounding the cell membrane except in mycoplasma. The fluid matrix filling the cell is the cytoplasm. **There is no well-defined nucleus. In addition to well defined nucleus, eukaryotic cells include other membrane-bound structures called organelles.**

Statement 2 is correct: Mitochondria is known as the powerhouses of the cell. They are responsible for energy production. **Prokaryotes lack mitochondria** and instead produce their ATP on their cell surface membrane. Prokaryotes do not have mitochondria. **Mitochondria are only found in eukaryotic cells.** This is also true of other membrane-bound structures like the nucleus and the Golgi apparatus.

Statement 3 is correct: The vacuole is the membrane-bound space found in the cytoplasm. It contains water, sap, excretory product and other materials not useful for the cell. **The vacuoles present in prokaryotes are smaller compared to the ones found in eukaryotic cells due to the smaller cell size.**

Source: Chapter 8- CELL: STRUCTURE AND FUNCTIONS of 11th NCERT

<https://www.technologynetworks.com/cell-science/articles/prokaryotes-vs-eukaryotes-what-are-the-key-differences-336095>

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5354521/#:~:text=Mitochondria%2C%20for%20exampl%2C%20are%20organelles,on%20their%20cell%20surface%20membrane.>

Q.2) Consider the following statements with reference to Acquired Immunity:

1. The immunity that is present at the time of birth of an individual is known as Acquired Immunity.
2. It is non-pathogen specific in nature as it attacks every antigen encountered by the body.
3. T Cells and B Cells are involved in the acquired immune response.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 3 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: Acquired (adaptive or specific) immunity is not present at birth. It is learned. The learning process starts when a person's immune system encounters foreign invaders and recognizes nonself substances (antigens). Then, the components of acquired immunity learn the best way to attack each antigen and begin to develop a memory for that antigen.

The immunity that is present at the time of birth of an individual is known as innate immunity. Also called non-specific immunity, it is inherited or passed genetically from parents to children. It also provides the first line of defense to the body.

Statement 2 is incorrect: Acquired immunity is also called specific immunity because it tailors its attack to a specific antigen previously encountered. Its hallmarks are its ability to learn, adapt, and remember.

Statement 3 is correct: Acquired immunity takes time to develop after first exposure to a new antigen. The **T and B lymphocytes (T and B Cells) are involved in the acquired or antigen-specific immune response** given that they are the only cells in the organism able to recognize and respond specifically to each antigenic epitope. The B Cells have the ability to transform into plasmocytes and are responsible for producing antibodies (Abs). Thus, humoral immunity depends on the B Cells while cell immunity depends on the T Cells.

Source: Page 135, Chapter 7-Human Health and Disease of 12th biology NCERT

<https://www.msmanuals.com/en-in/home/immune-disorders/biology-of-the-immune-system/acquired-immunity>

Q.3) Consider the following pairs with reference to important nutrients and their role in plant growth and survival:

Important Nutrients	Role
1. Calcium	Provide structural support to cell walls
2. Magnesium	Helps in the maintenance of ribosome structure
3. Potassium	Helps to maintain the anion-cation balance in cells

Which of the pairs given above are correctly matched?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Plants absorb water, gases, mineral, nutrients, etc. from their surroundings. Green plants for the synthesis of their organic food need inorganic substances (elements) which are obtained from soil in the form of minerals.

Pair 1 is correctly matched: The primary function of **calcium** in plant growth is to **provide structural support to cell walls**. Calcium also serves as a secondary messenger when plants are physically or biochemically stressed. **Calcium is involved in selective permeability of cell membranes; it activates certain enzymes required for development of stem and root apex** and as calcium pectate in the middle lamella of the cell wall.

Pair 2 is correctly matched: Magnesium maintains ribosome structure. Magnesium is involved in photosynthesis. It serves as an activator for many enzymes required in plant growth processes and stabilizes the nucleic acids.

Pair 3 is correctly matched: Potassium is absorbed as potassium ion (K⁺). In plants, this is required in more abundant quantities in the meristematic tissues, buds, leaves and root tips. **Potassium helps to maintain an anion-cation balance in cells** and is involved in protein synthesis, opening and closing of stomata, activation of enzymes and in the maintenance of the turgidity of cells.

Source: Page 146, chapter 7- Plant Growth and Mineral Nutrition of Maharashtra state 12th SCERT.

https://extension.msstate.edu/sites/default/files/publications/information-sheets/is1039_web.pdf

<https://ncert.nic.in/ncerts/l/kebo112.pdf> (page 197)

Q.4) Consider the following pair with reference to various cell organelle and their functions:

Cell Organelle	Functions
1. Ribosomes	Involved in protein synthesis.
2. Endoplasmic reticulum	Acts as suicide bags of the cell by digesting macromolecules like carbohydrates.
3. Nucleus	Stores the cell's DNA (deoxyribonucleic acid).

How many of the above given pairs are correctly matched?

- Only one pair
- Only two pairs
- All the three pairs
- None of the pairs

Ans) b

Exp) Option b is the correct answer.

Statement 1 is correct: Ribosomes are the protein factories of the cell. Composed of two subunits, they can be found floating freely in the cell's cytoplasm or embedded within the endoplasmic reticulum. Using the templates and instructions provided by two different types of RNA, ribosomes synthesize a variety of proteins that are essential to the survival of the cell.

Statement 2 is incorrect: The endoplasmic reticulum (ER) is a membranous organelle that shares part of its membrane with that of the nucleus. Some portions of the ER, known as the rough ER, are studded with ribosomes and are involved with protein manufacture. The rest of the organelle is referred to as the smooth ER and serves to produce vital lipids (fats)

Lysosomes are called suicide bags of the cell. A lysosome has three main functions: the breakdown/digestion of macromolecules (carbohydrates, lipids, proteins, and nucleic acids), cell membrane repairs, and responses against foreign substances such as bacteria, viruses and other antigens.

Statement 3 is correct: Nucleus, also known as the cell's "command center," is a large organelle that stores the cell's DNA (deoxyribonucleic acid). The nucleus controls all of the cell's activities, such as growth and metabolism, using the DNA's genetic information. Within the nucleus is a smaller structure called the

nucleolus, which houses the RNA (ribonucleic acid). RNA helps convey the DNA's orders to the rest of the cell and serves as a template for protein synthesis.

Q.5) Consider the following statements regarding Just Energy Transition Partnership (JETP):

1. It aims to bridge the gap between developed and developing nations in moving towards clean energy.
2. India is one of the founding members of the JETP.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) option a is the correct answer.

Statement 1 is correct: Just Energy Transition Partnerships aims to bridge the gap between developed and developing nations in moving towards clean energy. South Africa, Indonesia, and Vietnam are the first three countries to receive funding.

Statement 2 is incorrect: India has not yet joined the JETP. Recently, G7 countries have asked India to join Just Energy Transition Partnership (JETP) that will help finance rapid deployment of clean energy projects in India and possibly reduce the country's dependence on coal. India has not responded to the partnership offer as yet.

Source: <https://www.iisd.org/articles/insight/just-energy-transition-partnerships#:~:text=The%20first%20such%20JETP%20emerged,Indonesia%2C%20Vietnam%2C%20and%20Senegal.>

Q.6) Which of the following diseases are caused by Viruses?

1. Chickenpox.
2. Filariasis.
3. Malaria.
4. Measles.

Select the correct answer from the code given below:

- a) 1 and 4 only
- b) 1, 3 and 4 only
- c) 1, 2 and 3 only
- d) 1, 2, 3 and 4

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: Chickenpox is a highly contagious disease caused by the varicella-zoster virus (VZV). It can cause an itchy, blister-like rash among other symptoms. The rash first appears on the chest, back, and face, and then spreads over the entire body.

Statement 2 is incorrect: Lymphatic filariasis, considered globally as a neglected tropical disease (NTD), is a parasitic disease caused by microscopic, thread-like worms. Adult worms only live in the human lymph system. The lymph system maintains the body's fluid balance and fights infections. Lymphatic filariasis is spread from person to person by mosquitoes.

Statement 3 is incorrect: Malaria is an acute febrile illness caused by protozoa of the genus Plasmodium, which are spread to people through the bites of infected female Anopheles mosquitoes. It is preventable and curable. Malaria is not contagious and cannot spread from one person to another through direct contact. Five species of parasites can cause malaria in humans and 2 of these Plasmodium falciparum and Plasmodium vivax – pose the greatest threat.

Statement 4 is correct: Measles is caused by a virus in the paramyxovirus family and it is normally passed through direct contact and through the air. The virus infects the respiratory tract, then spreads throughout the body. Measles is a human disease and is not known to occur in animals.

Source:

<https://www.who.int/news-room/fact-sheets/detail/measles>

Q.7) Blood contains cells like Red Blood Cells (RBC) and White Blood Cells (WBC). In this context, consider the following statements regarding RBC and WBC:

1. Unlike RBC, the WBC does not contain haemoglobin.
2. During normal circumstances, the number of WBCs in the human body are much higher than the number of RBCs.
3. In most of the mammals, RBC are devoid of nucleus whereas the WBC are nucleated.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) c

Exp) Option c is the correct answer.

Blood is a special connective tissue consisting of a fluid matrix, plasma, and formed elements

Statement 1 is correct: White blood cell, also called leukocyte, a cellular component of the blood that lacks haemoglobin. White blood cells contain a nucleus, is capable of motility, and defends the body against infection and disease by ingesting foreign materials and cellular debris. They also fight against diseases and infections by destroying infectious agents and cancer cells, or by producing antibodies. Whereas Erythrocytes or red blood cells (RBC) contain hemoglobin.

Statement 2 is incorrect: Red blood cells (RBC) are the most abundant of all the cells in blood. A healthy adult man has, on an average, **5 millions to 5.5 millions of RBCs mm⁻³ of blood.** White blood cells (WBC) are relatively lesser in number which averages **6000–8000 mm⁻³ of blood.**

Statement 3 is correct: RBCs are formed in the red bone marrow in the adults. **RBCs are devoid of nucleus in most of the mammals** and are biconcave in shape. **White blood cells (WBC) are nucleated** and are generally short lived.

Source: Page 194, chapter15 - BODY FLUIDS AND CIRCULATION of 11th class NCERT.

<https://ncert.nic.in/ncerts/l/kebo118.pdf> (Page 279)

Q.8) Natural selection is a mechanism of evolution. In this context, consider the following statements regarding Natural Selection:

1. The individuals with adaptive traits are more likely to survive and reproduce in natural selection.
2. Natural selection can lead to speciation, where one species gives rise to a new and distinctly different species.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Natural selection is the process through which populations of living organisms adapt and change. Individuals in a population are naturally variable, meaning that they are all different in some ways. This variation means that some individuals have traits better suited to the environment than others.

Statement 1 is correct: Natural selection is the process through which populations of living organisms adapt and change. Individuals in a population are naturally variable, meaning that they are all different in some ways. This variation means that some individuals have traits better suited to the environment than others. **Individuals with adaptive traits—traits that give them some advantage—are more likely to survive and reproduce.** These individuals then pass the adaptive traits on to their offspring. Over time, these advantageous traits become more common in the population.

Statement 2 is correct: Natural selection can lead to speciation, where one species gives rise to a new and distinctly different species. It is one of the processes that drives evolution and helps to explain the diversity of life on Earth.

Source: Page118, chapter 6 – EVOLUTION of 12th NCERT

<https://education.nationalgeographic.org/resource/natural-selection/>

<https://www.nhm.ac.uk/discover/what-is-natural-selection.html#:~:text=Natural%20selection%20is%20a%20mechanism,change%20and%20diverge%20over%20time.>

Q.9) Consider the following statements with reference to Phloem and Xylem in plants:

1. Unlike in the phloem, the movement of nutrients in the xylem is unidirectional in nature.
2. Xylem mainly contains living tissues whereas phloem contains only dead tissues.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Both the xylem and phloem are complex permanent tissues. But they perform different roles in plants. The xylem facilitates the transportation of water from roots to the other part of the plant. Whereas the phloem aids the translocation of photosynthesized food material from the source to the other parts.

Statement 1 is correct: The xylem flow is unidirectional and occurs only from roots to the upper plant body. In contrast, the phloem carries the food material in a bidirectional manner from up to down and vice versa

Statement 2 is incorrect:

All tissues in the xylem except the xylem parenchyma are dead. Their cytoplasm is highly reduced and they only perform the function of conduction. The xylem tissues also lack cell organelles. Phloem is the living tissue.

Source: Page 95 chapter 5- Life Processes of 10th NCERT

Page 120, chapter 6- Plant Water Relation of Maharashtra state 12th SCERT.

<https://www.britannica.com/science/xylem>

Q.10) Consider the following statements regarding River Cities Alliance:

1. It is an international initiative launched by the United Nations Environment Programme.
2. It aims to provide a platform to discuss and exchange information on aspects that are vital for sustainable management of urban rivers.
3. Any river city in India is allowed to join this alliance.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 2 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect and Statement 2 is correct: River Cities Alliance (RCA) is a joint initiative of the Ministry of Jal Shakti and the Ministry of Housing and Urban Affairs. The RCA has been launched with the objective to provide the member cities **with a platform to discuss and exchange information on aspects that are vital for sustainable management of urban rivers**, sharing best practices and supporting innovation.

Statement 3 is correct: The Alliance is open to all river cities of India. Any river city can join the Alliance at any time. State Governments are implementing Action Plans for restoration of water quality of the identified polluted river stretches. The implementation is being monitored regularly at State level by Chief Secretary of the respective State/UT and at Central level by the Central Monitoring Committee under the Chairmanship of Secretary, Ministry of Jal Shakti.

Knowledge Base: The River Cities Alliance has been launched initially with 30 cities namely Dehradun, Rishikesh, Haridwar, Srinagar, Varanasi, Kanpur, Prayagraj, Farrukhabad, Mirzapur, Mathura, Bijnor, Ayodhya, Patna, Bhagalpur, Begusarai, Munger, Sahibganj, Rajmahal, Howrah, Jangipur, Hugli-Chinsurah, Behrampore, Maheshtala, Aurangabad, Chennai, Bhubaneswar, Hyderabad, Pune, Udaipur and Vijaywada.

Q.11) With reference to Humoral Immunity and Cell Mediated Immunity, consider the following statements:

1. Humoral immunity and Cell-Mediated immunity are two forms of innate immunity.
2. Unlike Cell Mediated immunity, Humoral immunity relies on antibodies to fight pathogens.

Which of the statements given above is/are correct?

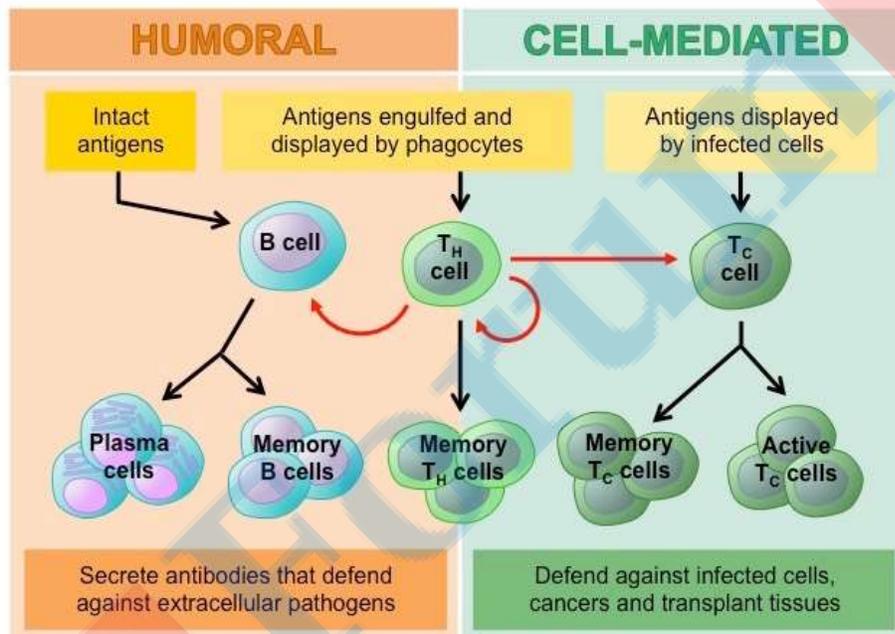

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1, nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: Humoral immunity and cell-mediated immunity are two forms of Acquired immune responses that allow the human body to protect itself against dangerous agents including bacteria, viruses, and poisons, in a targeted manner. While there is some overlap between these immune response arms - both rely on lymphoid cell functions - there are also some significant differences.

Statement 2 is correct: Humoral immunity-When foreign material - antigens - is recognized in the body, the body responds with an antibody-mediated reaction. **Cell-mediated immunity, unlike humoral immunity, does not rely on antibodies to perform adaptive immunological activities. Mature T cells, macrophages, and the production of cytokines in response to an antigen are the main drivers of cell-mediated immunity.**

Source: Page 135, Chapter 7-Human Health and Disease of 12th biology NCERT
<https://www.news-medical.net/health/Humoral-vs-Cell-mediated-Immunity.aspx>

Q.12) With reference to placenta, which of the following statements is **incorrect**?

- a) It is a temporary organ that is formed during pregnancy.
- b) It also acts as an exocrine gland.
- c) It facilitates supply of oxygen and nutrients to the embryo.
- d) It is connected to the embryo through an umbilical cord.

Ans) b

Exp) Option b is the correct answer.

Option a is correct. The placenta is a temporary endocrine organ that develops during pregnancy, which produces hormones important in the maintenance of a healthy pregnancy.

Option b is incorrect. Placenta acts as an endocrine tissue (not exocrine) and produces several important hormones during pregnancy like human chorionic gonadotropin (hCG), human placental lactogen (hPL), estrogens, progesterones, etc. These hormones work together to control the growth and development of the placenta and the foetus.

Option c is correct. The placenta facilitates the supply of oxygen and nutrients to the embryo and also the removal of carbon dioxide and excretory/waste materials produced by the embryo.

Option d is correct. The placenta is connected to the embryo through an umbilical cord which helps in the transport of substances to and from the embryo.

Source: Biology, NCERT XII, Chapter-3, Pg. 53

<https://academic.oup.com/bjaed/article/15/2/84/248526>

Q.13) Why it is more challenging to develop antiviral medicines than antibacterial medicines?

- Viruses can replicate on their own whereas bacteria must need a host to replicate.
- It is very difficult to kill viruses without harming the host cells.
- Unlike bacteria, viruses have double-stranded DNA genomes
- Unlike bacteria, Viruses do not mutate frequently.

Ans) b

Exp) Option b is the correct answer.

Option a is incorrect: Unlike bacteria, viruses cannot replicate independently outside a host cell. To replicate, viruses enter a host cell and hijack its machinery.

Once inside, some viruses lie dormant, some replicate slowly and leak from cells over a prolonged period, and others make so many copies that the host cell bursts and dies. The newly replicated virus particles then disperse and infect new host cells.

Option b is correct: An antiviral treatment that intervenes in the viral “life” cycle during these events could be successful. **The problem is that if it targets a replication process that is also important to the host cell, it is likely to be toxic to the human host as well.**

Killing viruses is easy. Keeping host cells alive while you do it is the hard part. Successful antivirals target and disrupt a process or structure unique to the virus, thereby preventing viral replication while minimizing harm to the patient. The more dependent the virus is on the host cell, the fewer targets there are to hit with an antiviral. Unfortunately, most viruses offer few points of unique difference that can be targeted.

Option c is incorrect: Most bacteria have a haploid genome, a single chromosome consisting of a circular, **double stranded DNA molecule.**

Option d is incorrect: Both Bacteria and viruses mutate over time and develop resistance over their respective drugs and treatments.

Source: <https://theprint.in/health/why-there-are-so-many-antibiotics-and-so-few-antivirals-in-the-world/422299/>

<https://www.ncbi.nlm.nih.gov/books/NBK209704/>

Q.14) With reference to the effect of various factors on photosynthesis, consider the following statements:

- An increase in the Carbon Dioxide levels in the atmosphere can lead to an increase in the rate of photosynthesis.
- Increase in the temperature always increases the rate of photosynthesis.
- Increase in the amount of chlorophyll in the leaves can increase the rate of photosynthesis

Which of the above given statements is/are correct?

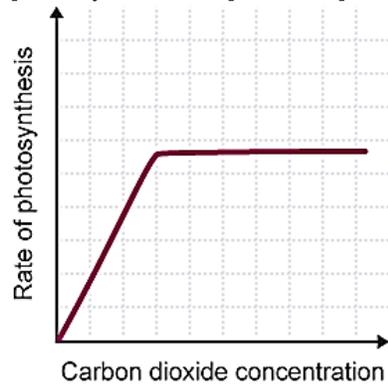

- a) 1 and 2 only
- b) 1 only
- c) 1 and 3 only
- d) 3 only

Ans) c

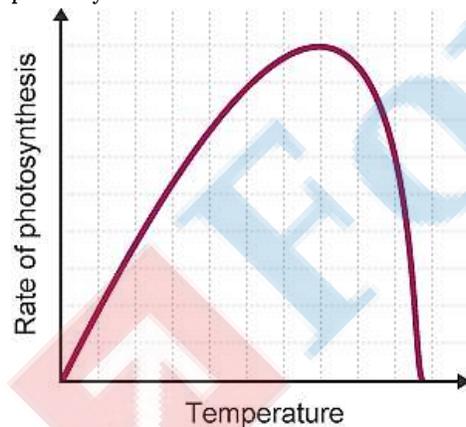

Exp) Option c is the correct answer.

Photosynthesis is the process by which plants convert light energy into chemical energy in the form of glucose. The rate of photosynthesis is influenced by several factors such as:

Statement 1 is correct: An increase in the concentration of CO₂ can lead to an increase in the rate of photosynthesis as plants require carbon dioxide as one of the raw materials to produce glucose.

Statement 2 is incorrect: Photosynthesis is a biochemical process that is temperature dependent. A moderate increase in temperature can enhance the rate of photosynthesis up to a certain limit. Beyond that limit, the enzymes involved in the process start to denature, leading to a decrease in the rate of photosynthesis.

Statement 3 is correct: Chlorophyll is the primary pigment in plants that absorbs light energy during photosynthesis. An increase in the amount of chlorophyll can increase the rate of photosynthesis as it can absorb more light energy.

Source: <https://www.bbc.co.uk/bitesize/guides/zs4mk2p/revision/2>

Q.15) Which of the following statements best describes the term Roche Limit, that has been often mentioned in the news?

- a) It refers to the maximum mass theoretically possible for a stable white dwarf star.

- b) It is the distance from a planet within which accretion of material into large moons is prevented by planetary tides.
- c) It is the boundary between heliosphere and interstellar space.
- d) It refers to lowest velocity which a body must have to escape the gravitational attraction of a particular planet.

Ans) b

Exp) Option b is the correct answer.

Option a is incorrect: Chandrasekhar limit, in astrophysics, is the maximum mass theoretically possible for a stable white dwarf star. This limiting value was named for the Indian-born astrophysicist Subrahmanyan Chandrasekhar, who formulated it in 1930. Using Albert Einstein's special theory of relativity and the principles of quantum physics, Chandrasekhar showed that it is impossible for a white dwarf star, which is supported solely by a degenerate gas of electrons, to be stable if its mass is greater than 1.44 times the mass of the Sun. If such a star does not completely exhaust its thermonuclear fuel, then this limiting mass may be slightly larger.

Option b is correct: The Roche limit is the distance from a planet within which accretion of material into large moons is prevented by planetary tides. Material in orbit outside the Roche limit would be aggregating to become natural satellites. The rings of other planets lie within the Roche limit. **The rings of Saturn lie inside Saturn's Roche limit** and may be the debris of a demolished moon. The limit was first calculated by the French astronomer Édouard Roche (1820–83). Artificial satellites are too small to develop substantial tidal stresses. If the satellite and the primary body are of similar composition, the theoretical limit is about $2\frac{1}{2}$ times the radius of the larger body.

Option c is incorrect: The heliopause is the final known boundary between the heliosphere and the interstellar space.

Option d is incorrect: Escape velocity is the lowest velocity which a body must have in order to escape the gravitational attraction of a particular planet or other object.

Source: <https://www.britannica.com/science/Chandrasekhar-limit>

<https://www.britannica.com/science/Roche-limit>

<https://www.britannica.com/science/Poissons-spot>

<https://www.britannica.com/science/Casimir-effect>

Q.16) Consider the following statements:

Assertion (A): Organ transplant fails if the donor organ does not match the recipient's blood.

Reason (R): The immune system identifies foreign cells and attacks them.

Which of the options given below is correct based on the above given statements?

- a) Both A and R are true and R is the correct explanation of A.
- b) Both A and R are true but R is not the correct explanation of A.
- c) A is true but R is false.
- d) A is false but R is true.

Ans) a

Exp) Option a is the correct answer.

Assertion is correct: Organ **transplant fails** if the donor organ does not match the recipient's blood and tissue. Human organs cannot be transplanted from any given donor. Tissue matching, **blood group matching is essential** before undertaking any transplant, otherwise the grafts would be rejected sooner or later.

Reason is correct and also explains Assertion: Without matching of tissues and blood for transplanting the immune system will **distinguish between self and non-self-cells**. In this way immune system is able to identify cells belonging to the body and **foreign cells** that need to be **attacked**.

Source: <https://www.philoid.com/epub/ncert/12/287/lebo108>

Q.17) What is the possible blood group of a child if one parent has blood group A and the other has blood group B?

1. Blood group AB
2. Blood group A
3. Blood group B
4. Blood group O

Select the correct answer from the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

		FATHER'S BLOOD TYPE				
		A	B	AB	O	
MOTHER'S BLOOD TYPE	A	A or O	A, B, AB, or O	A, B, or AB	A or O	CHILD'S BLOOD TYPE
	B	A, B, AB, or O	B or O	A, B, or AB	B or O	
	AB	A, B, or AB	A, B, or AB	A, B, or AB	A or B	
	O	A or O	B or O	A or B	O	

Blood groups are determined by the presence or absence of antigens on the surface of red blood cells. The ABO blood group system has four types: A, B, AB, and O. Blood group A has antigen A, blood group B has antigen B, blood group AB has both antigens A and B, and blood group O has neither antigen A nor B. When parents with blood group A and B have a child, there is a 25% chance that the child will have blood group AB, which means the child will inherit one A allele from one parent and one B allele from the other parent. The other 75% of the time, the child will have either blood group A, blood group B, or blood group O, depending on the alleles inherited from the parents.

Therefore, the child can have either A or B or O or AB as the blood group.

Source: <https://www.britannica.com/science/blood-group/Blood-groups-and-genetic-linkage>
<https://www.ncbi.nlm.nih.gov/books/NBK2269/>

Q.18) With reference to difference between Plant Cell and Animal cell, consider the following statements:

1. Plant cells have a cell wall made up of cellulose while animal cells lack a cell wall.
2. In general, chloroplasts are found only in animal cells.
3. Unlike in plant cells, Lysosomes are completely absent in animal cells.

Which of the above given statements is/are correct?

- a) 1 and 2 only
- b) 1 only
- c) 2 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

Both plant and animal cells are eukaryotic, so they contain membrane-bound organelles like the nucleus and mitochondria. However, plant cells and animal cells do not look exactly the same or have all of the same organelles, since they each have different needs. Plant cells have a cell wall, chloroplasts for photosynthesis, and larger vacuoles, while animal cells have centrioles and lysosomes.

Statement 1 is correct: Plant cells have a cell wall made up of cellulose, which provides them with a rigid structure and helps to maintain the shape of the cell. Animal cells, on the other hand, do not have a cell wall.

Statement 2 is incorrect: Chloroplasts are found only in plant cells and are responsible for photosynthesis, which is the process by which plants make their own food. Animal cells do not have chloroplasts.

In general, we can say that chloroplasts are not found in Animal cells. However, there are very few exemptions for this. For example, a small number of sea slugs are able to incorporate carbon from CO₂ by performing photosynthesis using sequestered chloroplasts from the macroalgae in their diet. These sea slugs use the stolen chloroplasts (also known as kleptoplasts) to produce metabolites, such as sugars and fatty acids, which can then be transported from the slug's digestive gland to other tissues in the body.

Statement 3 is incorrect: Lysosomes are organelles that are found in animal cells that contain digestive enzymes. They are responsible for breaking down waste materials and recycling cellular components. Lysosomes are rarely found in plant cells.

<https://a-z-animals.com/blog/plant-cells-vs-animal-cells-10-key-differences-explained/>

Q.19) Which of the followings are considered as macro nutrients for plants?

1. Nitrogen
2. Calcium
3. Phosphorous
4. Iron
5. Magnesium
6. Zinc

Select the correct answer from the codes given below.

- a) 1, 2, 3 and 4 only
- b) 2, 3, 5 and 6 only
- c) 1, 2, 3 and 5 only
- d) 1, 3, 4 and 5 only

Ans) c

Exp) Option c is the correct answer.

Plant nutrition is an important factor, which directly affects the growth, yield and quality of a crop. Soil contains many mineral nutrients, organic material and water, which are absorbed by plants. If any of these nutrients are deficient or not available in the soil, it affects crop development, and a plant shows deficiency symptoms.

Nutrients required for plants can be classified according to their requirement and importance in plant life. They can be classified into basic nutrients, macro-nutrients and micro-nutrients.

Macro-nutrients are those nutrients which are required in large quantity by plants. They are further classified into two types:

- 1) Primary nutrients: These consist of **Nitrogen, Phosphorus and Potassium**. These nutrients are supplied through fertilisers.
- 2) Secondary nutrients: They include **Calcium, Magnesium and Sulphur**.

Option 1 is correct: Nitrogen is essential for plant development, since it plays a fundamental role in energy metabolism and protein synthesis.

Option 2 is correct: Calcium serves as a constituent of cell walls and membranes and thus contributes to the structure of cells and the upholding of physical barriers against pathogens.

Option 3 is correct: Phosphorus is a vital component of ATP, the "energy unit" of plants.

Option 5 is correct: Magnesium is the central core of the chlorophyll molecule in plant tissue. Thus, if Mg is deficient, the shortage of chlorophyll results in poor and stunted plant growth. Magnesium also helps to activate specific enzyme systems.

Option 4 and 6 are incorrect: Micro-nutrients on the other hand, are also known as minor or trace elements. They include **Iron (Fe)**, Manganese (Mn), Copper (Cu), **Zinc (Zn)**, Chlorine (Cl), Boron (B) Molybdenum (Mo) and Nickel (Ni).

Q.20) Consider the following statements regarding Volatile Organic Compounds (VOCs):

1. These are compounds that have a high vapor pressure and low water solubility.
2. They comprise of carbon-containing chemicals released by petrol and diesel vehicles.
3. Some VOCs are also released by the Plants to attract the pollinators.
4. Benzene is an example of the Volatile Organic Compounds.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: Volatile organic compounds are compounds that have a high vapor pressure and low water solubility. Many VOCs are human-made chemicals that are used and produced in the manufacture of paints, pharmaceuticals, and refrigerants.

Statement 2 is correct: VOCs are carbon-containing chemicals released by petrol and diesel vehicles. They impact air quality and human health.

Statement 3 is correct: VOCs can have a natural origin as well. Plants emit these chemicals to attract pollinators, defend themselves from pests and predators and adapt to environmental stress.

Statement 4 is correct: Benzene belongs to a class of chemicals called volatile organic compounds, so called because they evaporate in the air. Benzene is made from coal and petroleum sources and is present in gasoline.

Source: <https://www.downtoearth.org.in/news/pollution/electric-vehicles-can-lower-emissions-of-volatile-organic-compounds-in-india-by-2030-study-81488>

[https://www.epa.gov/indoor-air-quality-iaq/what-are-volatile-organic-compounds-vocs#:~:text=Air%20Quality%20\(IAQ\)-,What%20are%20volatile%20organic%20compounds%20\(VOCs\)%3F,paints%2C%20pharmaceuticals%2C%20and%20refrigerants.](https://www.epa.gov/indoor-air-quality-iaq/what-are-volatile-organic-compounds-vocs#:~:text=Air%20Quality%20(IAQ)-,What%20are%20volatile%20organic%20compounds%20(VOCs)%3F,paints%2C%20pharmaceuticals%2C%20and%20refrigerants.)

,What%20are%20volatile%20organic%20compounds%20(VOCs)%3F,paints%2C%20pharmaceuticals%2C%20and%20refrigerants.

Q.21) Why do mitochondria are known as the powerhouse of the cell?

- It destroys worn out cellular organelles and organic debris.
- It produces the adenosine triphosphate (ATP) which is known as energy currency of the cell.
- It is responsible for packaging and transporting essential plant proteins.
- It acts as a site for protein synthesis in the cell.

Ans) b

Exp) Option b is the correct answer.

Mitochondrion is a membrane-bound organelle which is found in the cytoplasm of almost all the eukaryotic cells (cells with clearly defined nuclei). **Mitochondria are known as the powerhouse of the cell because it is responsible for the extracting energy from food through cellular respiration. The energy is released in the form of adenosine triphosphate (ATP). It is an energy currency of the cell.** The body uses energy stored in ATP for making new chemical compounds and for mechanical work.

Option a is incorrect: Lysosomes destroy the worn-out cellular organelles and organic debris..

Option c is incorrect: The Golgi apparatus, or Golgi complex, functions as a factory in which proteins received from the Endoplasmic Reticulum are further processed and sorted for transport to their eventual destinations.

Option d is incorrect: Ribosomes are the sites in which protein synthesis takes place.

Source: <https://ncert.nic.in/textbook/pdf/iesc105.pdf>

Q.22) Which of the following statements is correct about the Hardy-Weinberg equilibrium?

It states that:

- if an equilibrium is disturbed by changing the conditions, the position of equilibrium shifts to counteract the changes to re-establish an equilibrium.
- it is impossible to measure or calculate exactly, both the position and the momentum of a particle.
- genetic variation in a population will remain constant from one generation to the next in the absence of disturbing factors.
- Organs that are frequently used by organisms become more efficient and organs that are less used are lost in the succeeding generations.

Ans) c

Exp) Option c is the correct answer.

The Hardy-Weinberg equilibrium is a principle stating that the genetic variation in a population will remain constant from one generation to the next in the absence of disturbing factors. When mating is random in a large population with no disruptive circumstances, the law predicts that both genotype and allele frequencies will remain constant because they are in equilibrium.

The Hardy-Weinberg equilibrium can be disturbed by a number of forces, including mutations, natural selection, nonrandom mating, genetic drift, and gene flow. For instance, mutations disrupt the equilibrium of allele frequencies by introducing new alleles into a population.

Option a is incorrect: Le Châtelier's principle (and not Hardy Weinberg's) states that if a dynamic equilibrium is disturbed by changing the conditions, the position of equilibrium shifts to counteract the change to re-establish an equilibrium.

Option b is incorrect: Heisenberg's uncertainty principle states that it is impossible to measure or calculate exactly, both the position and the momentum of an object.

Option d is incorrect: Lamarck theory of evolution states that, the organs which are used frequently by the organism develop and the characteristics/organs that are used seldom are lost in the succeeding generations. For eg., a giraffe stretches its neck to eat leaves, a "nervous fluid" would flow in its neck and it enlarges. The organs which the organisms have stopped using would shrink with time. As the organisms adapted to their surroundings, they became increasingly complex from the simpler forms.

Source: <http://www.nature.com/scitable/definition/hardy-weinberg-equilibrium-122>

Q.23) Consider the following statements about Auto-Immune Diseases, often seen in news:

1. Auto-immune diseases are conditions in which one's own immune system mistakenly attacks the healthy cells of the body.
2. Rheumatoid Arthritis and Type 1 diabetes are some of the examples of autoimmune diseases.
3. Almost all auto-immune diseases can be permanently cured, at the current level of technology.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

In higher vertebrates, the memory based acquired immunity has evolved based on the ability to differentiate foreign organisms (pathogens) from the body cells. In case of the attack from foreign material, the immune system gets activated and attacks the foreign material. However, due to factors like genetics and several other unknown reasons body's immune system can attack itself as well.

Statement 1 is correct: Body's immune system when mistakenly attacks the own healthy cells, then the condition is known as Auto-immune disease/disorder. The exact cause of autoimmune disorders is unknown. One theory is that some microorganisms (such as bacteria or viruses) or drugs may trigger changes that confuse the immune system. Genetics also may have a bigger role to play in this.

Statement 2 is correct: There are more than 80 types of autoimmune diseases. They can affect almost any part of your body. Some of the commonly known auto-immune diseases are, Rheumatoid Arthritis, Type 1 diabetes, Celiac disease, etc.

Statement 3 is incorrect: Auto-immune diseases in general cannot be cured completely. However, the condition can be controlled in many cases. The overactive immune response can be tamed down to bring down the inflammation.

Source: <https://www.betterhealth.vic.gov.au/health/conditionsandtreatments/autoimmune-disorders#:~:text=Autoimmune%20disorders%20in%20general%20cannot,corticosteroids%20%E2%80%93%20to%20reduce%20inflammation.>

<https://www.niehs.nih.gov/health/topics/conditions/autoimmune/index.cfm>

Q.24) Consider the following statements about Plasma fluid in blood:

1. Plasma is the liquid component of blood, which constitute more than half of its total content.
2. Plasma plays an important role in blood coagulation and maintenance of osmotic balance in the blood.
3. Plasma plays an important role in the immune system of the human beings.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Plasma can be defined as an extracellular and liquid portion of blood, which is transparent and pale yellow or straw-coloured.

Statement 1 is correct: Plasma is a straw coloured, viscous fluid constituting nearly 55 per cent of the blood. Thus, plasma is the liquid portion of the blood. About 55% of our blood is plasma, and the remaining 45% are red blood cells, white blood cells and platelets that are suspended in the plasma.

Statement 2 is correct: Plasma is about 92% water, and the remaining portion is contributed by various proteins. Some of the major proteins are: fibrinogen, globulins and albumins. **Fibrinogens are needed for clotting or coagulation of blood. Globulins primarily are involved in defence mechanisms of the body and the albumins help in osmotic balance.** Hence, plasma helps in coagulation of blood and in maintaining the osmotic balance in the blood.

Statement 3 is correct: Immunoglobulins and antibodies in plasma play an important role in the body's defense against bacteria, viruses, fungi, and parasites. Antibodies are naturally produced by plasma cells within the human body to mediate an adaptive immune response against invading pathogens. There are five predominant antibodies produced (IgG, IgM, IgA, IgD, and IgE), each specialized to execute certain functions. Antibodies are hence, produced primarily to mediate the immune response towards foreign pathogens, as part of the adaptive immune response.

Source: <https://ncert.nic.in/ncerts/l/kebo118.pdf>

<https://www.ncbi.nlm.nih.gov/books/NBK546670/#:-:text=Antibodies%20are%20naturally%20produced%20by,specialized%20to%20execute%20certain%20functions.>

Q.25) Omorgus Khandesh, recently seen in news, is a species of which of the following?

- Fish
- Shrimp
- Butterfly
- Beetle

Ans) d

Exp) Option d is the correct answer.

A new beetle species called Omorgus Khandesh has been recently discovered in India. The beetle is important for forensic science as it helps detect the time of death of an animal or human.

Omorgus Khandesh is necrophagous and is, therefore, also called a keratin beetle. During the decomposition of a body, blowflies are amongst the first ones to arrive in the early stages. Meanwhile, the final successional stage is with the arrival of the keratin feeders, thus their importance in forensic science.

Source: <https://www.downtoearth.org.in/news/wildlife-biodiversity/meet-omorgus-khandesh-a-newly-discovered-indian-beetle-it-can-help-forensic-science-87718>

Q.26) Consider the following statements about plastids, an essential cell organelle:

- Plastids are found in all the eukaryotic cells.
- Plastids are the only cell organelle to have their own biosynthetic machinery for making RNA.

Which of the statements given above is/are correct?

- 1 only
- 2 only
- Both 1 and 2
- Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

The plastids are double-membrane organelles that contain the pigments used in photosynthesis and manufacture and store the important chemical compounds used by the cells.

Statement 1 is incorrect: Eukaryotes are organisms whose cells contain a nucleus and other membrane-bound organelles. There is a wide range of eukaryotic organisms, including all animals, plants, fungi, and protists, as well as most algae. **Plastids are found in all plant cells and in euglenoids and not in animal cells. Hence, all the eukaryotes do not contain plastids.**

Statement 2 is incorrect: It is widely accepted that mitochondria and plastids evolved from bacteria that were engulfed by nucleated ancestral cells. As a relic of this evolutionary past, **both types of organelles (not only plastids) contain their own genomes, as well as their own biosynthetic machinery for making RNA and organelle proteins.**

Knowledge Base: Three different types of plastids are recognised on the basis of their pigments or colouration.

- 1) **Chromoplasts**–These are coloured plastids containing variously coloured pigments such as yellow, red, pink, violet colours of flowers, fruits, leaves, etc. In chromoplasts, fat soluble pigments like carotene, xanthophylls and others are present.
- 2) **Leucoplasts**–These are colourless plastids. They are usually involved in the storage of various kinds of reserve food materials and are named accordingly, as Amyloplasts (storage of starch), Aleuroplasts (storage of protein) and Elaioplasts or Lipoplast (storage of oil).
- 3) **Chloroplasts**–These are the green plastids, universally found in all the green parts of the plant, especially the green leaves. It contains large quantities of green pigments, called chlorophyll. Chlorophyll is a collection of four pigments, chlorophyll a, chlorophyll b and the yellow pigments–carotenoids and xanthophylls.

Source: <https://ncert.nic.in/ncerts/l/kebo108.pdf>

<https://www.ncbi.nlm.nih.gov/books/NBK26924/#:~:text=It%20is%20widely%20accepted%20that,make%20RNA%20and%20organelle%20proteins.>

Q.27) Consider the following statements about the functions of the blood and blood circulation in the human body:

1. The blood transports oxygen from the lungs to various cells of the body.
2. Hormones produced by endocrinal glands are transported to the target tissues by the blood stream.
3. The blood can carry various nutrients, minerals and proteins across the body.
4. Blood transports waste generated by cells of body to the excretory organs like Kidney.

Which of the statements given above are correct?

- a) 1 and 3 only
- b) 2 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Complex organisms use special fluids within their bodies to transport materials like oxygen, nutrients, sugar, salts and proteins. Blood is the most commonly used body fluid by most of the higher organisms including humans for this purpose. Another body fluid, lymph, also helps in the transport of certain substances.

Statement 1 is correct: **Blood is a special connective tissue consisting of a fluid matrix, plasma, and formed elements. The blood transports oxygen from the lungs to the cells of the body, where it is needed for metabolism.** The carbon dioxide produced during metabolism is carried back to the lungs by the blood, where it is then exhaled (breathed out).

Statement 2 is correct: **Hormones produced by the endocrinal glands are transported from the place of origin to the target cells through the blood stream.** Endocrine glands secrete hormones into the

bloodstream. The hormones dissolve in plasma and travel the circulatory pathways through various body tissues. When they reach target tissues, hormones effect the target tissues this is because, only those target cells have receptors for that particular hormone.

Statement 3 is correct: The blood carries nutrients such as vitamins, minerals, sugars, fats and proteins around the body. Digested nutrients are absorbed into the blood through capillaries in the small intestine. They are then moved to the cells around the body where they are needed.

Statement 4 is correct: Waste generated by cells of body is transported via blood to specific body organs who can get rid of them like, the liver, the kidneys and the intestines.

For example, excess water is filtered out by the kidneys and toxins are removed from the blood by the liver.

Source: <https://ncert.nic.in/ncerts/l/kebo118.pdf>

<https://www.blood.co.uk/news-and-campaigns/the-donor/latest-stories/functions-of-blood-transport-around-the-body/>

<https://www.betterhealth.vic.gov.au/health/conditionsandtreatments/hormonal-endocrine-system#:~:text=Summary&text=Endocrine%20glands%20secrete%20hormones%20straight,still%20bein%20investigated%20and%20understood.>

Q.28) Consider the following pairs of disorders caused due to deficiency of specific vitamins in body:

Vitamin Deficiency : Disorder

1. Vitamin A : Night Blindness
2. Vitamin B1 : Rickets
3. Vitamin C : Pellagra
4. Vitamin D : Beri Beri

How many pairs given above are correctly matched?

- a) Only one pair
- b) Only two pairs
- c) Only three pairs
- d) All the four pairs

Ans) a

Exp) Option a is the correct answer.

Vitamins are organic substances that we require in adequate quantities for good health. Our body, however, cannot synthesise them. Therefore, we need to consume their natural sources such as fruits and vegetables. Vitamins are divided into two groups–fat soluble vitamins (Vitamins A, D, E, and K) and water–soluble vitamins (Vitamins of B group and Vitamin C). Each vitamin has a specific function and its deficiency leads to a particular deficiency disease.

Pair 1 is correct: Deficiency of Vitamin A can lead to night blindness. It may also lead to irregular growth of teeth.

Pair 2 is incorrect: Vitamin B1 deficiency may cause Beri Beri. Rickets occur due to deficiency of vitamin D.

Pair 3 is incorrect: Deficiency of Vitamin C leads to Scurvy (swelling of gums, may lead to bleeding). Pellagra is caused by deficiency of Vitamin B3 (Niacin).

Pair 4 is incorrect: Rickets occur due to deficiency of vitamin D. Whereas, Vitamin B1 deficiency may cause Beri Beri.

Vitamin/Mineral	Deficiency disease/disorder	Symptoms
Vitamin A	Loss of vision	Poor vision, loss of vision in darkness (night), sometimes complete loss of vision
Vitamin B1	Beriberi	Weak muscles and very little energy to work
Vitamin C	Scurvy	Bleeding gums, wounds take longer time to heal
Vitamin D	Rickets	Bones become soft and bent
Calcium	Bone and tooth decay	Weak bones, tooth decay
Iodine	Goiter	Glands in the neck appear swollen, mental disability in children
Iron	Anaemia	Weakness

Source: <https://ncert.nic.in/textbook/pdf/fesc102.pdf>

Q.29) Consider the following statements regarding vegetative propagation in plants:

1. It is a mode of asexual reproduction in plants.
2. The new offspring produced by vegetative propagation is genetically identical to its parent plant.
3. New varieties can be easily developed in plants using vegetative propagation.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: Vegetative propagation is also called asexual propagation'. The vegetative parts of a plant like leaf, stem, root or their modified forms are used for propagation. Most of the horticultural crops are commercially propagated by vegetative or asexual method of propagation.

Statement 2 is correct: Merits of asexual propagation are discussed below.

- 1) Many fruit and ornamental plants that do not produce seeds are multiplied by this method.
- 2) **Plants propagated by asexual propagation are true-to-type genetically.**
- 3) By top working (using budding and grafting), old and economically low productive fruit plants can be converted into superior ones.
- 4) Advantages offered by rootstocks and scion can be exploited through asexual method.
- 5) Maturity is uniform and the plant gives quality yield.
- 6) Plants propagated by asexual method are small in size, so spraying of chemicals and harvesting are easy.
- 7) This method enables noble plant production, e.g., different colours of flowers in a single rose plant and different types of mangoes in one mango plant can be produced through asexual method only.

Statement 3 is incorrect: Demerits of asexual propagation are discussed below:

- 1) **By vegetative propagation, new varieties cannot be developed.**
- 2) It requires specialised skills, so it is an expensive method of propagation.

- 3) The life span of asexually propagated plants is short as compared to sexually propagated ones.
 4) These plants are more prone to biotic and abiotic stresses.

Source: <https://ncert.nic.in/vocational/pdf/kegr103.pdf>

Q.30) Consider the following statements regarding anti-microbial peptides:

1. They do not occur naturally and can only be produced artificially.
2. They play an important role in the immunity of the host against bacteria.
3. They also help the immune system in fighting against some of the viruses.

Which of the statements given above is/are correct?

- a) 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

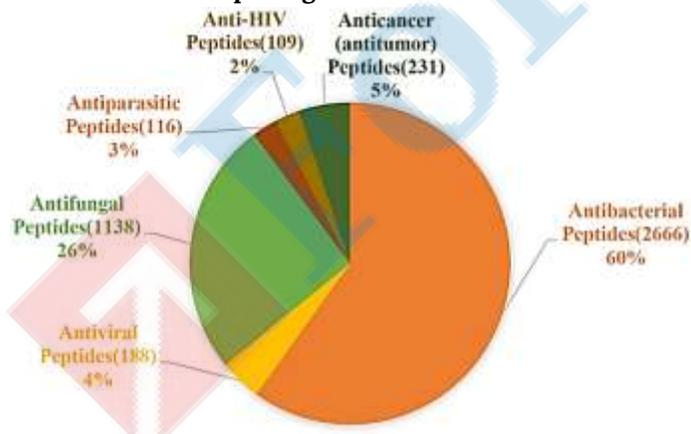

Ans) c

Exp) Option c is the correct answer.

The management of bacterial infections is becoming a major clinical challenge due to the rapid evolution of antibiotic resistant bacteria. As an excellent candidate to overcome antibiotic resistance, antimicrobial peptides (AMPs) that are produced from the synthetic and natural sources demonstrate a broad - spectrum antimicrobial activity with the high specificity and low toxicity.

Statement 1 is incorrect: Antimicrobial peptides (AMPs) are a class of small peptides that widely exist in nature and they are an important part of the innate immune system of different organisms. AMPs have a wide range of inhibitory effects against bacteria, fungi, parasites and viruses. Antimicrobial peptides are an abundant and diverse group of molecules that are produced by many tissues and cell types in a variety of invertebrate, plant and animal species.

Statement 2 is correct: Antimicrobial peptides (AMPs) are the small molecular peptides that play a crucial role in the innate immunity of the host against a broad range of microorganisms, including bacteria, fungi, parasites and viruses. **Antibacterial peptides account for a large part of AMPs and have a broad inhibitory effect on common pathogenic bacteria.**

Statement 3 is correct: Antiviral peptides, a type of anti-microbial peptides, show a strong killing effect on viruses mainly by (1) inhibiting virus attachment and virus cell membrane fusion, (2) destroying the virus envelope, or (3) inhibiting virus replication.

Source: <https://www.frontiersin.org/articles/10.3389/fmicb.2020.582779/full>

<https://www.nature.com/articles/nrmicro1098>

<https://mmrjournal.biomedcentral.com/articles/10.1186/s40779-021-00343-2>

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7596191/>

Q.31) It is a type of neurotransmitter. It is made in brain and acts as a chemical messenger between nerve cells in brain and the rest of the body. It also acts as a hormone and plays a role in the “fight-or-flight” syndrome. It is known as the “feel-good” hormone giving one a sense of pleasure.

Which of the following hormones is described in above passage?

- a) Dopamine
- b) Oxytocin
- c) Progesterone
- d) Melatonin

Ans) a

Exp) Option a is the correct answer.

Option a is correct: Dopamine is a type of monoamine **neurotransmitter**. It's made in brain and acts as a **chemical messenger** between nerve cells in brain and the rest of the body. Dopamine also **acts as a hormone** made by adrenal gland, a small hat-shaped gland located on top of each of your kidneys. Dopamine is also a neurohormone released by the **hypothalamus in human brain**.

As a hormone, dopamine is released into bloodstream. It plays a small role in the “**fight-or-flight syndrome**”. The fight-or-flight response refers to body's response to a perceived or real stressful situation, such as needing to escape danger. Dopamine is known as the “feel-good” hormone. It gives you a sense of pleasure.

Option b is incorrect: **Oxytocin** is a natural hormone that **stimulates uterine contractions** in childbirth and lactation after childbirth. It also affects aspects of human behavior and the male and female reproductive systems.

Option c is incorrect: In women or people assigned female at birth (AFAB), **progesterone supports menstruation and helps maintain the early stages of a pregnancy**. Too little progesterone can cause complications with pregnancy or produce side effects similar to menopause.

Option d is incorrect: **Melatonin** is a hormone that brain produces in **response to darkness**. It helps with the timing of body's circadian rhythms (24-hour internal clock) and with sleep. Being exposed to light at night can block melatonin production.

Knowledge Base: Dopamine agonists are drugs that mimic the natural neurotransmitter dopamine. Dopamine agonists bind to and activate the dopamine receptors on nerve cells in brain, causing nerve cells to react in the same way as they would to natural dopamine. Dopamine agonists are used to treat Parkinson's disease, depression, restless legs syndrome, attention deficit hyperactivity disorder, low sex drive and hyperprolactinemia.

Source: <https://my.clevelandclinic.org/health/articles/22581-dopamine>

<https://my.clevelandclinic.org/health/body/24562-progesterone>

<https://my.clevelandclinic.org/health/articles/22618-oxytocin>

<https://www.nccih.nih.gov/health/melatonin-what-you-need-to-know>

Q.32) Consider the following statements regarding Deoxyribonucleic acid (DNA) and Ribonucleic acid (RNA):

1. While DNA stores genetic information, RNA acts as a template for protein synthesis.
2. Unlike DNA, RNA is more stable under alkaline conditions.
3. As compared to RNA, DNA is more susceptible to damage from Ultraviolet rays.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 3 only
- d) 1 and 3 only

Ans) d

Exp) Option d is the correct answer.

DNA stands for deoxyribonucleic acid, while RNA is ribonucleic acid. Although DNA and RNA both carry genetic information, there are quite a few differences between them.

Statement 1 is correct: DNA replicates and stores genetic information. Whereas RNA acts as a template for protein synthesis. DNA is a blueprint for all genetic information contained within an organism. RNA converts the genetic information contained within DNA to a format used to build proteins, and then moves it to ribosomal protein factories.

Statement 2 is incorrect: Due to its deoxyribose sugar, which contains one less oxygen-containing hydroxyl group, DNA is a more stable molecule than RNA, which is useful for a molecule which has the task of keeping genetic information safe. RNA, containing a ribose sugar, is more reactive than DNA and is not stable in alkaline condition.

Statement 3 is correct: DNA is vulnerable to damage by ultraviolet rays. whereas RNA is more resistant to damage from UV light than DNA. Presence of uracil makes RNA more resistant to UV rays. Uracil (U) is one of the four nucleotide bases in RNA.

Source: <https://www.geeksforgeeks.org/difference-between-dna-and-rna/>

<https://www.technologynetworks.com/genomics/lists/what-are-the-key-differences-between-dna-and-rna-296719#:~:text=Due%20to%20its%20deoxyribose%20sugar,not%20stable%20in%20alkaline%20conditions.>

Q.33) Hydroponic farming is the technique of growing plants using a water-based nutrient solution rather than soil. In this context, which among the following crops **cannot** be grown in a hydroponic system?

1. Sweet potatoes
2. Corn
3. Pumpkin
4. Tomatoes
5. Leaf lettuce

Select the correct answer using the codes given below:

- a) 3 and 5 only
- b) 1, 2 and 3 only
- c) 2, 4 and 5 only
- d) 1, 2, 3 and 4 only

Ans) b

Exp) Option b is the correct answer.

Hydroponic farming has become a foundation of sustainable agriculture since it is both efficient as well as environmentally safe. However, following crops cannot be grown in the hydroponic systems:

Option 1 is correct: Sweet potatoes and potatoes need a lot of **room to grow**, and their roots must be allowed to spread out. Potatoes and sweet potatoes are starchy crops; thus, they will require more nutrition as compared to other vegetables. Since potatoes require components found in soil, such as nitrogen, potassium, and phosphorus, a lack of soil is also a concern. Therefore, **sweet potatoes cannot be grown in hydroponic system.**

Option 2 is correct: Corn cannot be grown in a hydroponic system. Corn has deep roots that require a lot of sunlight to grow. Its roots can reach a depth of 60 inches. Another issue to consider is that maize is generally produced in fields with full sunlight. The LED, or Light Emitting Diode, would not have the same effect in a hydroponic farming arrangement.

Option 3 is correct: Pumpkins and other gourds are usually cultivated on the ground and **need a lot of room to spread out**. Thus, they **cannot be grown in a hydroponic system**. They are particularly challenging to cultivate in a hydroponic system due to their huge size. Pumpkins also require pollination from bees, which might be difficult in a confined environment.

Option 4 and 5 are incorrect. Most common crops grown hydroponically are tomatoes, leaf lettuce, peppers, strawberries, watercress, celery etc.

Source: <https://ag.umass.edu/greenhouse-floriculture/fact-sheets/hydroponic-systems#:~:text=background%20is%20required,->

,Crops,supported%20in%20the%20nutrient%20solution.

Q.34) Consider the following statements regarding retrovirus:

1. It uses RNA (Ribonucleic acid) as its genomic material.
2. Retrovirus can be transmitted between humans through infected blood.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: A retrovirus is a virus that uses RNA, instead of DNA, as its genomic material. Upon infection with a retrovirus, a cell converts the retroviral RNA into DNA, which in turn is inserted into the DNA of the host cell. The cell then produces more retroviruses, which infect other cells. Many retroviruses are associated with diseases, including AIDS and some forms of cancer.

Statement 2 is correct: Retroviruses are a family of viruses that are grouped together based on how they are structured and how they replicate within a host. Besides human immunodeficiency virus (HIV), the virus that causes AIDS, there two other retroviruses that can cause human illness. One is called human T-lymphotropic virus type 1 (HTLV-1) and the other is called human T-lymphotropic virus type 2 (HTLV-II). Both of **these viruses are transmitted between people through sexual contact, infected blood or tissue exposure, or during pregnancy or childbirth from an infected person to their child.**

Source: <https://www.health.state.mn.us/diseases/retrovirus/index.html>

<https://www.genome.gov/genetics-glossary/Retrovirus>

<https://www.bioexplorer.net/diseases-caused-by-protozoa.html/>

<https://ncert.nic.in/textbook.php?lebo1=7-13>

Q.35) Consider the following statements regarding the yellow band disease in corals:

1. Unlike the effects of coral bleaching, the impact of yellow band disease cannot be reversed.
2. The disease was first observed recently in the Great Barrier Reefs of Australia.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Recently, it is reported that a rapidly spreading disease, commonly known as yellow band disease, is killing corals over vast stretches of the sea floor of Thailand. Scientists believe overfishing, pollution and rising water temperatures because of climate change may be making the reefs more vulnerable to yellow-band disease.

Statement 1 is correct: Scientists believe overfishing, pollution and rising water temperatures because of climate change may be making the reefs more vulnerable to yellow-band disease. **The impact of the yellow band disease cannot be reversed, unlike the effects of coral bleaching.**

Statement 2 is incorrect: It was first spotted decades ago and has caused widespread damage to the reefs in the Caribbean (thus, first occurrence is not from Australia). Over 600 acres of the sea is reported to have been infected due to this disease.

Source: https://oceanservice.noaa.gov/education/tutorial_corals/media/supp_coral10b.html

<https://www.thehindu.com/sci-tech/energy-and-environment/watch-why-are-corals-in-thailand-getting-destroyed/article66396891.ece>

<https://www.hindustantimes.com/world-news/it-just-dies-what-is-the-yellow-band-disease-ravaging-thailand-s-coral-reefs-101672205686483.html>

Q.36) Involuntary muscles are defined as those muscles whose movement cannot be controlled at will. In this context, which among the following are examples of involuntary muscles?

1. Pectoral muscle
2. Cardiac muscle
3. Hamstrings
4. Smooth muscle
5. Biceps

Select the correct answer using the codes given below:

- a) 2 and 4 only
- b) 1, 2 and 4 only
- c) 1, 3, 4 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) a

Exp) Option a is the correct answer.

Voluntary muscles are those whose movement can be controlled at will or conscious control, while involuntary muscles are those whose movement cannot be controlled at will or without conscious control or that work involuntarily, i.e., automatic.

Option 1 is incorrect: Pectoral muscles are the muscles that connect the front of the human chest with the bones of the upper arm and shoulder. Pectoral muscles are **not considered as involuntary muscles.**

Option 2 is correct: Cardiac muscle is an involuntary striated muscle that is present on the wall of the heart and undergoes contractions and relaxations at regular intervals.

Option 3 is incorrect: Hamstrings which are a group of three muscles which predominantly act to flex the knee. Hamstrings muscles are **not considered as involuntary muscles.**

Option 4 is correct: Smooth muscle is an involuntary nonstriated muscle that consists of single-unit or unitary muscle and multiunit muscles. Smooth muscle lines the wall of various internal organs like the intestinal tract, urinary tract, and blood vessels.

Few examples of voluntary muscles are:

Option 5 is incorrect: The biceps are located on the front of the upper arm and provide arm flexion, while the triceps are found on the back of the upper arm and are responsible for arm extension. Biceps muscles are **not considered as involuntary muscles**.

Source: <https://www.biologyonline.com/dictionary/involuntary-muscle#:~:text=Pectoral%20muscles%2C%20hamstrings%2C%20biceps%2C,are%20involuntary%20muscles.>

<https://www.healthline.com/nutrition/biceps-vs-triceps#bottom-line>

Q.37) Consider the following pairs:

Diseases	Pathogens that cause the disease
1. Kyasanur Forest disease	Virus
2. Leishmaniasis	Fungi
3. Brucellosis	Protozoa
4. Typhoid	Bacteria

Which of the pairs given above is/are correctly matched?

- a) 1 only
- b) 1 and 4 only
- c) 2, 3 and 4 only
- d) 1 and 3 only

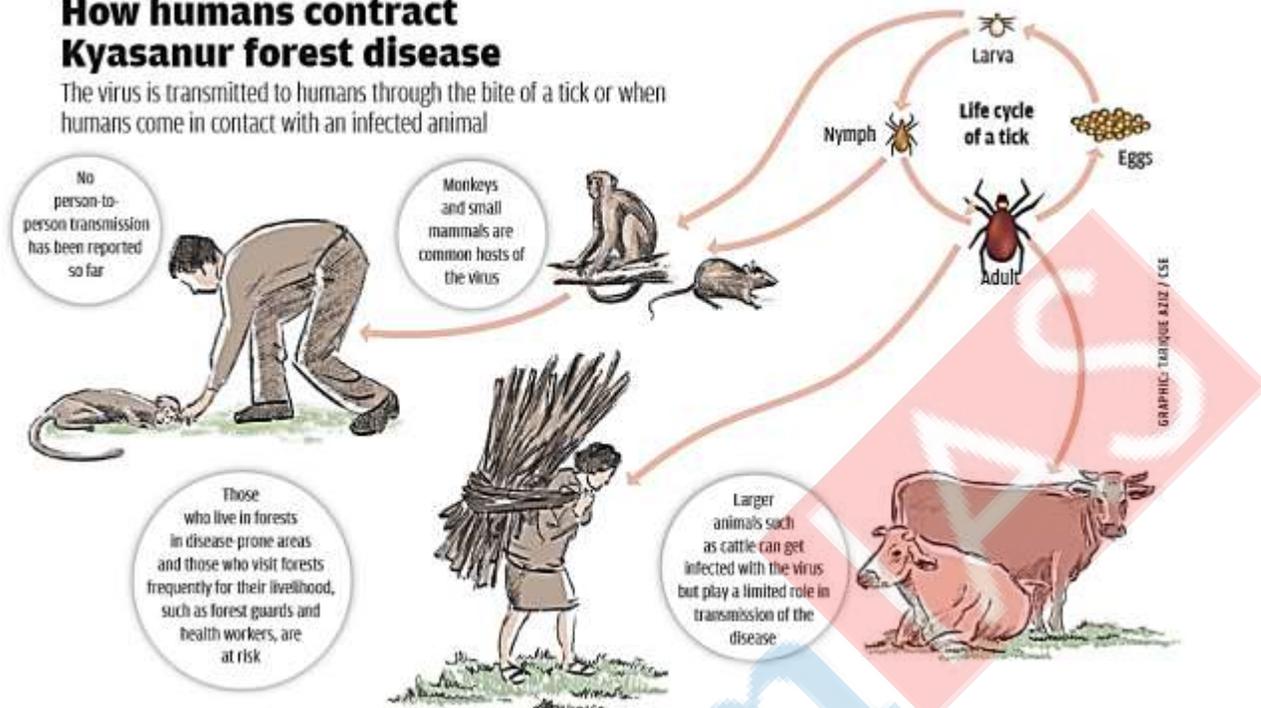

Ans) b

Exp) Option b is the correct answer.

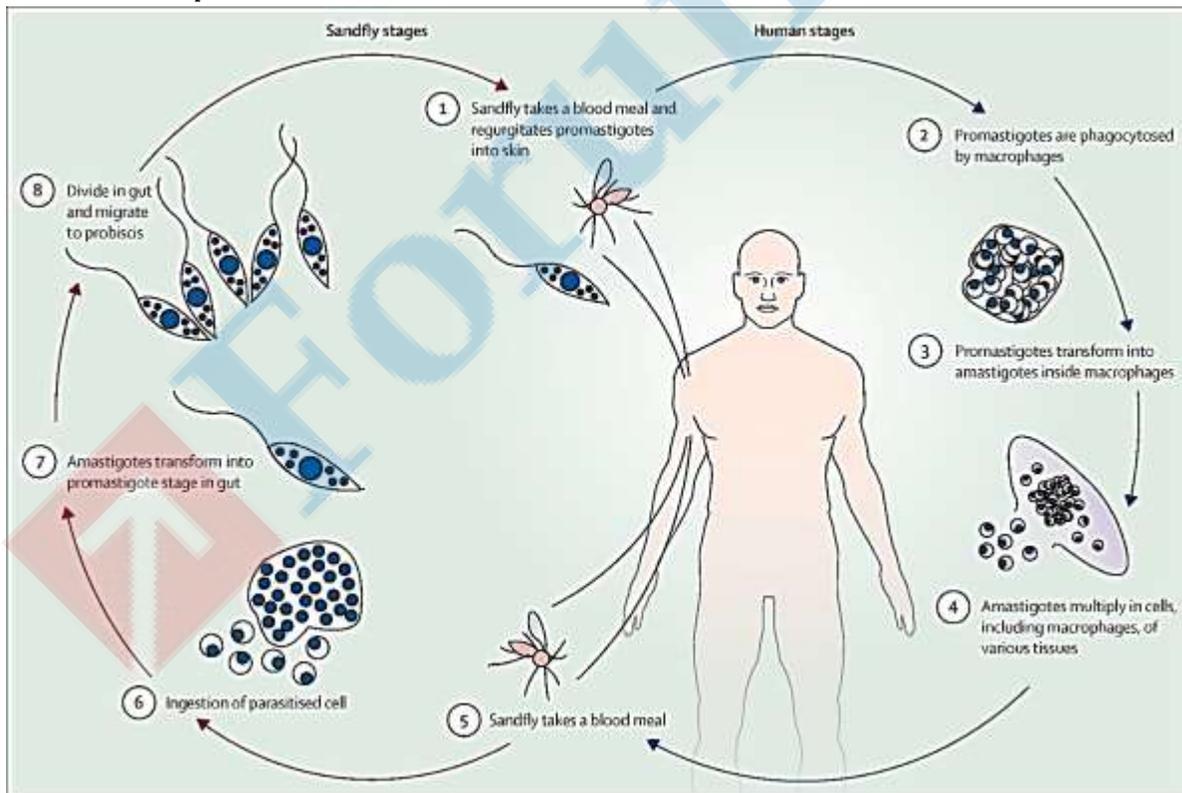

Pair 1 is correct: Kyasanur Forest disease (KFD) is caused by Kyasanur Forest disease **virus** (KFDV), a member of the virus family Flavivirida. Hard ticks are the reservoir of the KFD virus and once infected, remain so for life.

How humans contract Kyasanur forest disease

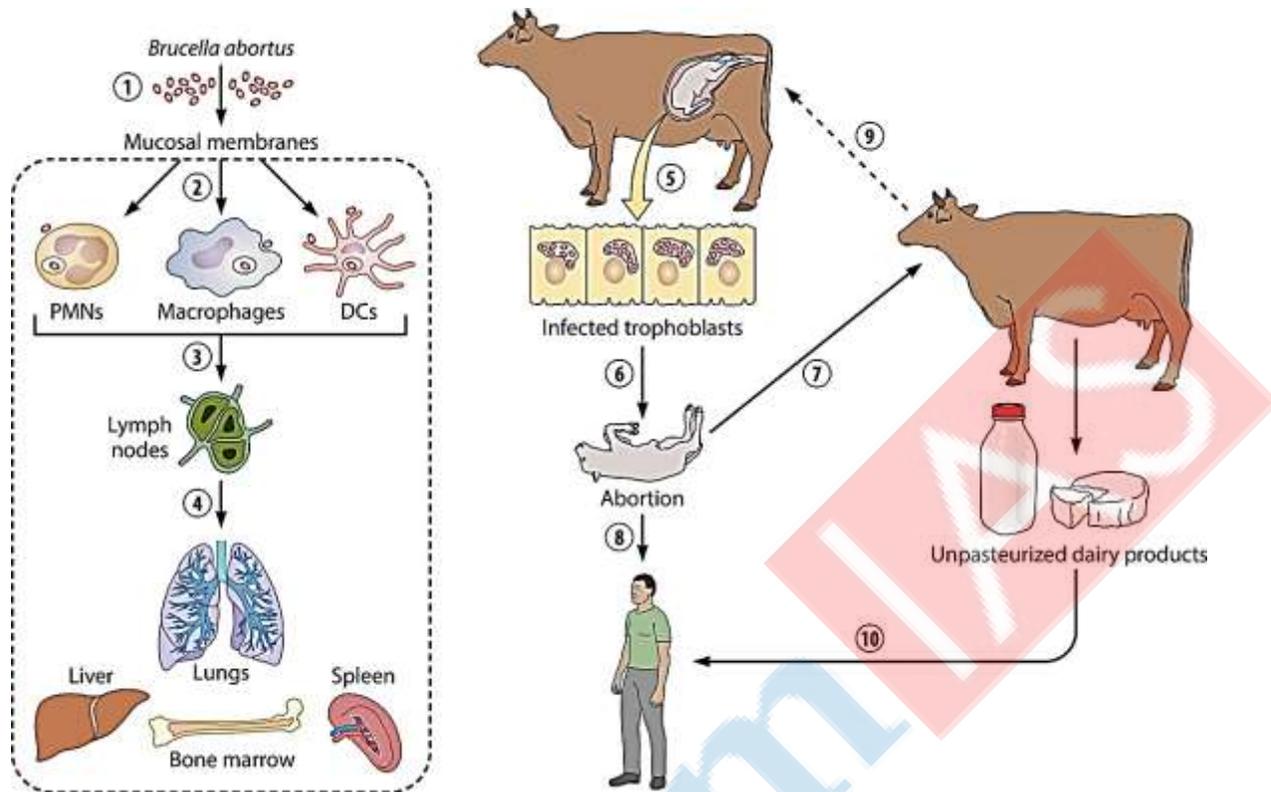

The virus is transmitted to humans through the bite of a tick or when humans come in contact with an infected animal

Pair 2 is incorrect: Leishmaniasis is caused by **protozoan** parasites which are transmitted by the bite of infected female phlebotomine sandflies.

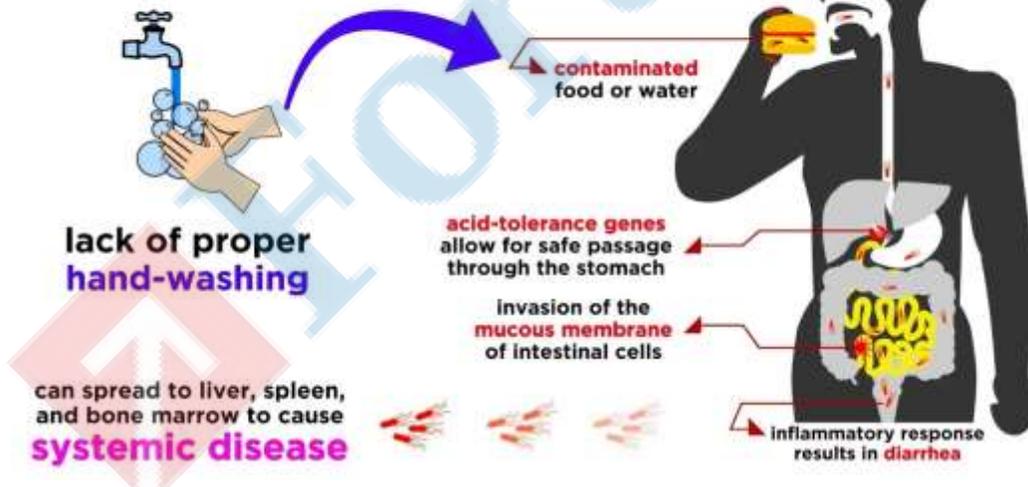

Pair 3 is incorrect: Brucellosis is a **bacterial infection** that spreads from animals to people. Most commonly, people are infected by eating raw or unpasteurized dairy products. Sometimes, the bacteria that cause brucellosis can spread through the air or through direct contact with infected animals.

Pair 4 is correct: Typhoid fever is caused by *Salmonella typhi* bacteria. Typhoid fever is rare in developed countries. It is still a serious health threat in the developing world, especially for children.

fecal-oral route

Q.38) Consider the following statements regarding Protein, one of the essential macronutrients of body:

1. Protein is made up of building blocks called amino acids.
2. Main function of the proteins is to provide energy for the human body.
3. Kwashiorkor disease can be caused by severe protein malnutrition.

Which of the statements given above is/are correct?

- a) 3 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: Proteins are **made up of building blocks** called **amino acids**. There are about 20 different amino acids that link together in different combinations. The body uses them to make new proteins, such as muscle and bone, and other compounds such as enzymes and hormones.

Statement 2 is incorrect: Proteins are large, complex molecules that play many critical roles in the body. They do most of the work in cells and are required for the structure, function, and regulation of the body's tissues and organs. **Protein is not usually used for energy.** However, if the body is not getting enough calories from other nutrients or from the fat stored in the body, protein is broken down into **ketone bodies** to be used for energy.

Statement 3 is correct: Kwashiorkor is one of the two main types of severe protein-energy undernutrition. People with kwashiorkor are especially deficient in protein, as well as some key micronutrients. Severe protein deficiency causes fluid retention in the tissues (edema), which distinguishes kwashiorkor from other forms of malnutrition. People with kwashiorkor may look emaciated in their limbs but swollen in their hands and feet, face and belly.

Source: <https://www.britannica.com/science/protein>

[https://my.clevelandclinic.org/health/diseases/23099-](https://my.clevelandclinic.org/health/diseases/23099-kwashiorkor#:~:text=Kwashiorkor%20is%20one%20of%20the,from%20other%20forms%20of%20malnutrition.)

[kwashiorkor#:~:text=Kwashiorkor%20is%20one%20of%20the,from%20other%20forms%20of%20malnutrition.](https://my.clevelandclinic.org/health/diseases/23099-kwashiorkor#:~:text=Kwashiorkor%20is%20one%20of%20the,from%20other%20forms%20of%20malnutrition.)

<https://medlineplus.gov/genetics/understanding/howgeneswork/protein/#:~:text=Proteins%20are%20large%2C%20complex%20molecules,the%20body's%20tissues%20and%20organs.>

Q.39) Consider the following statements regarding Polyclonal Antibodies:

1. These are a complex mixture of several antibodies that are usually produced by different B-cell clones of an animal.
2. These antibodies are more sensitive to changes in pH compared to monoclonal antibodies.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: Polyclonal antibodies (pAbs) are a complex mixture of several antibodies that are usually produced by different B-cell clones of an animal. These antibodies recognize and bind to many different epitopes of a single antigen and hence can form lattices with the antigens.

Statement 2 is incorrect: One of the major advantages of pAbs is that they are highly stable and tolerant of pH or buffer changes. Whereas, monoclonal antibodies are more sensitive to pH and buffer conditions.

Knowledge Base: A Monoclonal antibody represents antibody from a single antibody producing B cell and therefore only binds with one unique epitope.

Source: <https://www.news-medical.net/life-sciences/Polyclonal-Antibodies.aspx>

<https://www.pacificimmunology.com/resources/antibody-introduction/polyclonal-vs-monoclonal-antibodies/>

Q.40) Muscat ministerial manifesto, recently seen in news, is related to which of the following issues?

- Addressing the issue of Antimicrobial Resistance
- Helping countries to develop disaster resilience
- Promoting sustainable urban growth
- Eliminating the barriers in international trade

Ans) a

Exp) Option a is the correct answer.

Recently, the World Antimicrobial Awareness Week 2022 concluded with the Muscat Ministerial Manifesto on AMR being agreed upon at the Third Global High-level Ministerial Conference on Antimicrobial Resistance (AMR).

The Muscat Ministerial Manifesto on AMR, which has been agreed upon at the conference, outlines three global targets:

- Reducing the total amount of antimicrobials used in agrifood systems by at least 30 per cent-50 per cent by 2030.
- Preserving critically important antimicrobials for human medicine and ending the use of medically important antimicrobials for growth promotion in animals.
- Ensuring that 'Access' group antibiotics (a category of antibiotics that are affordable, safe and have a low AMR risk) represent at least 60 per cent of overall antibiotic consumption in humans by 2030.
- Through the Manifesto, the countries also committed to revise and effectively implement National Action Plans (NAP) for AMR and strengthen surveillance systems. The manifesto also calls upon the Quadripartite organisations to provide guidance and technical support for implementation of the targets.

Source: <https://www.downtoearth.org.in/news/health/world-antimicrobial-awareness-week-2022-ends-with-muscat-ministerial-manifesto-on-amr-86219>

Q.41) Which of the following organs can help in the process of excretion from human body?

- Lungs
- Kidney
- Liver
- Skin
- Large intestine

Select the correct answer using the codes given below:

- 4 and 5 only
- 1, 3 and 5 only
- 1, 2, 3 and 4 only
- 1, 2, 3, 4 and 5

Ans) d

Exp) Option d is the correct answer.

Excretion is the process of removing wastes and excess water from the body. It is an essential process in all living things, and it is one of the major ways the human body maintains homeostasis. It also helps prevent damage to the body. Organs involved in the process of excretion in the human body are discussed below:

Option 1 is correct: The **lungs** are part of the respiratory system, but they are also important organs of excretion. They are responsible for the **excretion of gaseous waste** from the body. The main waste gas excreted by the lungs is carbon dioxide, which is a waste product of cellular respiration in cells throughout the body.

Option 2 is correct: The paired **kidneys** are often considered the main organs of excretion. The primary function of the kidneys is the **elimination of excess water** and wastes from the bloodstream by the production of the liquid waste known as urine.

Option 3 is correct: The **liver** has numerous major functions, including secreting bile for digestion of lipids, synthesizing many proteins and other compounds, storing glycogen and other substances, and secreting endocrine hormones. In addition to all of these functions, the liver is a very **important organ of excretion**. The liver breaks down many substances in the blood, including **toxins**. For example, the liver transforms ammonia – a poisonous by-product of protein catabolism – into urea, which is filtered from the blood by the kidneys and excreted in urine.

Option 4 is correct: The **skin** is part of the integumentary system, but it also plays a role in **excretion** through the production of **sweat** by sweat glands in the dermis.

Option 5 is correct: The **large intestine** (or colon) is the last structure to process food, taking the undigestible matter from the small intestine, absorbing water from it and leaving the waste product called feces. Feces are expelled from the body through the rectum and the anus.

Source: <https://humanbiology.pressbooks.tru.ca/chapter/18-2-organs-of-excretion/>

[https://medlineplus.gov/ency/imagepages/8832.htm#:~:text=The%20large%20intestine%20\(or%20colon,the%20rectum%20and%20the%20anus.](https://medlineplus.gov/ency/imagepages/8832.htm#:~:text=The%20large%20intestine%20(or%20colon,the%20rectum%20and%20the%20anus.)

Q.42) Consider the following statements with reference to warm-blooded and cold-blooded animals:

1. Warm-blooded animals usually maintain a constant body temperature while cold-blooded animals have fluctuating body temperature.
2. Warm-blooded animals usually have lower metabolic rates than cold-blooded animals.
3. Cold-blooded animals are generally more limited in their activity levels than warm-blooded animals.

Which of the above-given statements is/are correct?

- a) 2 only
- b) 3 only
- c) 1 and 3 only
- d) 1 and 2 only

Ans) c

Exp) Option c is the correct answer.

Warm-blooded animals are known as endotherms while Cold-blooded animals are known as ectotherms.

Statement 1 is correct: **Warm-blooded animals, such as mammals and birds, maintain a constant body temperature** regardless of the surrounding environment. They achieve this through a combination of metabolic processes, insulation (fur, feathers, or blubber), and behavioral adaptations. These animals can generate heat internally when the environment is cold and dissipate heat when it is warm. **Cold-blooded animals, including reptiles, amphibians, fish, and most invertebrates, have body temperatures that fluctuate with the surrounding environment.** They rely on external sources of heat, such as sunlight or

warm surfaces, to warm up, and seek shade or cool environments to cool down. They also exhibit behavioral adaptations to help regulate their body temperature.

Statement 2 is incorrect: Warm-blooded animals typically have higher metabolic rates, which allows them to generate heat internally. They need more energy to maintain their constant body temperature, so they generally consume more food and have a higher calorie intake than cold-blooded animals. **Cold-blooded animals have lower metabolic rates and do not need as much energy to survive.** Their metabolism is highly dependent on their body temperature; when they are cold, their metabolism slows down, and they become less active. Conversely, as their body temperature rises, so does their metabolism and activity levels.

Statement 3 is correct: Due to their constant body temperature, Warm-blooded animals can remain active over a wide range of environmental conditions. This allows them to inhabit various climates and regions, including extreme environments such as the Arctic or the desert. They can also remain active during the day and night. **Cold-blooded animals are more limited in their activity levels, as their performance is highly dependent on their body temperature.** They may become sluggish or inactive when temperatures are too low or too high. This can restrict their ability to inhabit extreme environments or be active during certain times of the day or year.

Source: https://www.washingtonpost.com/lifestyle/kidspost/ever-wondered-about-warm-blooded-and-cold-blooded-animals/2015/11/27/575d30ca-6c57-11e5-aa5b-f78a98956699_story.html

Q.43) Cuscuta, Indian paintbrush and Giant Padma are the examples of:

- Insect species
- Aquatic animals
- Parasitic plants
- Bird species

Ans) c

Exp) Option c is the correct answer.

Cuscuta, Indian paintbrush, and Giant padma are considered parasitic because they obtain nutrients and water from other plants rather than producing their own through photosynthesis. Cuscuta, also known as dodder, has thread-like stems that wrap around and parasitize other plants to obtain water and nutrients. Indian paintbrush, a genus of flowering plants, has specialized roots that tap into the roots of other plants to obtain nutrients. Rafflesia arnoldii or the Giant Rafflesia is an endoparasite, meaning it lives entirely within the tissues of its host plant, typically a vine in the genus Tetrastigma. Rafflesia lacks leaves, stems, and roots, and instead forms thread-like structures called mycelium, which penetrate the host's tissue to absorb nutrients. It is entirely dependent on its host for sustenance, as it cannot photosynthesize.

Knowledge Base:

Cuscuta:

Giant Padma:**Indian paintbrush:**

Source: <https://www.frontiersin.org/articles/10.3389/fpls.2015.00045/full>
<https://www.kew.org/plants/rafflesia-arnoldii>
<https://www.fs.usda.gov/wildflowers/plant-of-the-week/Castilleja-coccinea.shtml>

Q.44) Which among the following statements best describes the term ‘adaptive radiation’?

- The process by which a single ancestral species diversifies into a variety of differently adapted species.
- The process by which unrelated species evolve to acquire similar traits due to similar environments.
- The process by which different species converge to acquire the same ecological niche.
- The process by which a large number of species become extinct due to environmental changes.

Ans) a

Exp) Option a is the correct answer.

Option a is correct: Adaptive radiation is the process by which a single ancestral species diversifies into a variety of differently adapted species, in order to exploit different ecological niches. This occurs when a group of organisms colonizes a new environment with many unoccupied ecological niches, and through natural selection, they evolve into different forms to exploit those niches. As the new species adapt to different ecological conditions and develop different traits, they become increasingly distinct from one another, eventually evolving into completely different species. Adaptive radiation can occur over relatively short time scales, such as a few thousand years, or over longer time scales, such as millions of years. **One classic example of adaptive radiation is the evolution of Darwin's finches in the Galapagos Islands.** These finches diversified over time, developing different beak shapes and sizes to exploit different food sources on different islands. This process of adaptive radiation helped to create the diversity of bird species that we see today.

Option b and c are incorrect: In evolutionary biology, convergent evolution is defined as the process whereby distantly related organisms independently evolve similar traits to adapt to similar necessities.

Thus, Convergent evolution occurs when species occupy similar ecological niches and adapt in similar ways in response to similar selective pressures.

Option d is incorrect: Adaptive radiation is not the process by which a large number of species becomes extinct due to environmental change. It is during Extinction when species are diminished because of environmental forces.

<https://www.britannica.com/science/adaptive-radiation>

<https://www.biologyonline.com/tutorials/adaptive-radiation>

Q.45) This sanctuary is a proposed Tiger Reserve situated in Nuapada District of Odisha and it shares a common border with Chhattisgarh. It is situated on a plateau inhabited mainly by Gond, Bhunjia and Paharia tribes. This Sanctuary hosts a range of wildlife species including such as tigers, swamp deer, leopards, gaurs, sloth bear, barking deer etc.

Which of the following wildlife sanctuaries is identified with the description above?

- Coringa Wildlife Sanctuary
- Govind Wildlife Sanctuary
- Chinnar Wildlife Sanctuary
- Sunabeda wildlife sanctuary

Ans) d

Exp) Option d is the correct answer.

Option a is incorrect: Coringa Sanctuary, named after a tiny village coringa in East Godavari District of Andhra Pradesh a part of Godavari Mangroves was declared as a wildlife sanctuary by Govt. of Andhra Pradesh to conserve the mangrove vegetation of the estuary, extending in an area of about 235.Sq. Kms.

Option b is incorrect: The Govind Wildlife Sanctuary or Govind Pashu Vihar National Park and Sanctuary are located in the Uttarkashi district of Uttarakhand. Established in 1955, the sanctuary covers an area of 958 sq km and includes mountains like Swargarohini, Black Peak, and Bandarpunch. The altitude at the park ranges from the average elevation of 1400mts to an astonishing 6323mts and consists of Chirpine, scrub tropical Euphorbia scrub and oak species.

Option c is incorrect: Chinnar Wildlife Sanctuary in Kerala is home to the Great Grizzled Squirrel of India. Numbering less than 200, they are among the most endangered species on the planet. It provides a home to Panthers, Indian Elephants, Common Langur, Bonnet Macaque etc. A paradise for bird lovers, the Chinnar Wildlife Sanctuary is also famous for preserving a diverse range of birds. These include Black Eagle, Yellow-throated Bulbuls, Grey Heron, Serpent Eagle etc. The Chinnar Wildlife Sanctuary has mainly Dry Deciduous Forests, Wet Grasslands, High Sholas, Dry Thorny Scrub Forests, and Riparian Forests.

Option d is correct: Sunabeda wildlife sanctuary is a Proposed Tiger Reserve situated in Nuapada District of Odisha and it is sharing common border with Chhattisgarh. It also forms the catchment area of the Jonk River. It hosts a range of wildlife species including Indian mammals such as tigers, swamp deer, leopards, gaurs, sloth bear, barking deer etc. It is situated on a plateau inhabited mainly by Gond, Bhunjia and Paharia. The Plateau is the source of the river Jonk and Sundar.

Q.46) Which among the following can be the cause of cancer?

1. Tobacco consumption
2. Exposure to human papillomavirus
3. Exposure to gamma rays

Select the correct answer using the code given below:

- a) 1 only
- b) 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Cancer is a disease in which some of the body's cells grow uncontrollably and spread to other parts of the body. Following options can be the cause of cancer:

Option 1 is correct: Tobacco consumption: Tobacco use, including smoking and chewing tobacco, is a major risk factor for many types of cancer, including lung cancer, throat cancer, and mouth cancer.

Option 2 is correct: Exposure to certain viruses (HPV): Human papillomavirus (HPV) is a virus that can cause cervical cancer, as well as other types of cancer, such as anal, penile, and throat cancer.

Option 3 is correct: Exposure to gamma rays: Exposure to high levels of radiation, such as gamma rays, can **damage DNA and increase the risk of cancer**. This can occur in people who work in certain industries, such as nuclear power plants or radiology, as well as people who have received radiation therapy for cancer treatment.

Source: <https://www.cdc.gov/vitalsigns/cancerandtobacco/index.html>

<https://www.cancer.gov/about-cancer/causes-prevention/risk/infectious-agents/hpv-and-cancer>

<https://www.cancer.org/healthy/cancer-causes/radiation-exposure/x-rays-gamma-rays/do-xrays-and-gamma-rays-cause-cancer.html>

Q.47) Which of the following types of reproduction methods/processes can be observed in animals?

1. Internal fertilization
2. External fertilization
3. Budding

Select the correct answer using the code given below:

- a) 2 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Option 1 is correct: Internal fertilization: This type of reproduction occurs when the male deposits sperm inside the female's body, where it fertilizes the female's eggs. **Internal fertilization is common in many types of animals, including mammals, reptiles, and birds.**

Option 2 is correct: External fertilization: This type of reproduction occurs when the female releases eggs into the environment, and the male fertilizes them with sperm. **External fertilization is common in many aquatic animals, such as fish and amphibians.**

Option 3 is correct: Budding: This type of reproduction occurs when a new individual grows on the body of an existing individual and then detaches to become a separate organism. **Budding is observed in some invertebrates, such as corals, hydras and sponges.**

Source: <https://opentextbc.ca/biology/chapter/24-2-fertilization/>
<https://opentextbc.ca/biology/chapter/13-1-how-animals-reproduce/>

Q.48) Which of the following are the functions of the Cell Membrane?

1. It allows the movement of nutrients into the cell.
2. It allows the movement of toxic substances out of the cell.
3. It provides interaction of one cell with another cell.
4. It provides structural support to the cell.

Select the correct answer using the codes given below:

- a) 1 and 2 only
- b) 2 and 4 only
- c) 1 and 3 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

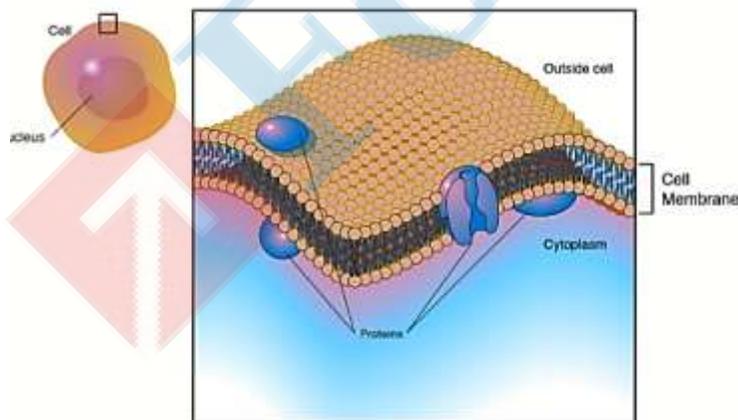

The basic components of a cell are cell membrane, cytoplasm and nucleus. The cytoplasm and nucleus are enclosed within the cell membrane, also called the plasma membrane.

The plasma membrane, or the cell membrane, provides protection for a cell. It also provides a fixed environment inside the cell, and that membrane has several different functions.

Statements 1 and 2 are correct. One of the functions of cell membrane is to **transport nutrients into the cell** and also to **transport toxic substances out of the cell.**

Statement 3 is correct. The cell membrane, also called the plasma membrane, is found in all cells and separates the interior of the cell from the outside environment. Plasma membrane, have proteins on it which interact with other cells. And those proteins which stick outside of the plasma membrane will **allow for one cell to interact with another cell.**

Statement 4 is correct. The cell membrane also provides some **structural support** for a cell. Cell membrane also helps in maintaining the shape of the cell.

Source: <https://www.genome.gov/genetics-glossary/Cell-Membrane#:~:text=The%20cell%20membrane%2C%20also%20called,entering%20and%20exiting%20the%20cell.>

<https://ncert.nic.in/textbook/pdf/hesc108.pdf> Pg No. 93

Q.49) Which of the following statements is **incorrect** regarding ‘Darwinian Theory of Evolution’?

- The existing living forms share a varying degree of similarities with life forms that existed millions of years ago.
- The organisms with disadvantageous variants are eliminated from nature during the struggle of existence.
- The population of species in the absence of environmental checks tends to increase very fast.
- New species arise due to sudden changes after catastrophic event.

Ans) d

Exp) Option d is the correct answer.

Various theories about the mechanism of evolution have been proposed which includes Lamarck's theory of “Inheritance of acquired characters”; De Vries' theory of ‘mutation’ and Darwin's theory of Natural selection.

Statement a is correct. Charles Darwin emphasizing on **gradual evolution of life forms** concluded that existing living forms share **similarities to varying degrees** not only among themselves but also with **life forms that existed millions of years ago**. Many such life forms do not exist anymore as there had been extinctions of different life forms in the years gone by just as new forms of life arose at different periods of history of earth.

Statement b is correct. According to Darwin, organisms produce more offspring than can survive because environmental resources are limited. During **struggle for existence**, organisms with **advantageous variations** are protected and allowed to reproduce while the **disadvantageous variants** are eliminated from nature. This is what was termed natural selection by Darwin.

Statement c is correct. The idea of Darwin's evolution by natural selection is based on another fact that every species, in the absence of **environmental checks** tends to increase in **geometrical manner**. If a population of a given species doubles in one year and if there are no checks on its increase, it will increase four times the next year and so on.

Statement d is incorrect. Darwin defined evolution as “descent with modification,” the idea that species change **over long time**, give rise to new species, and share a common ancestor. **New species is not a result of sudden change according to Darwin.**

Whereas, **Hugo de Vries** in his **mutation theory** of evolution believed new species rise by **sudden changes** called mutations rather than by gradual processes. According to him it was mutation and not natural selection which is the primary factor in evolution.

Source: <https://egyankosh.ac.in/bitstream/123456789/7517/1/Unit-2.pdf>

<https://ncert.nic.in/textbook/pdf/lebo107.pdf>

<https://nios.ac.in/media/documents/srsec314newE/PDFBIO.EL1.pdf>

Q.50) In the context of India's security market, which of the following statements is correct about the short selling?

It occurs when-

- both buying and selling of stocks are done within one day, irrespective of the prices of stocks.
- an investor borrows a security and sells it on the open market, planning to buy it back later for less money.
- An investor purchases securities at lower prices and sale when prices start increasing.
- companies reinvest the profits instead of improving operations and sharing dividends with investors.

Ans) b

Exp) Option b is the correct answer.

Short selling is an investment or trading strategy that speculates on the decline in a stock or other security's price. **Short selling occurs when an investor borrows a security and sells it on the open market, planning to buy it back later for less money.** Short sellers bet on, and profit from, a drop in a security's price. This can be contrasted with long investors who want the price to go up. Short selling has a high risk/reward ratio: It can offer big profits, but losses can mount quickly and infinitely due to margin calls.

Option d is incorrect: Growth investing is applied when a company continues to grow profits as the focus is on growth of the capital. Companies reinvest the profits instead of improving operations and enticing investors with dividends.

Knowledge Base:

According to the trend following strategy, purchase at booming prices and sale when prices start showing a downward trend. There are many mathematical factors and calculations to be used for determining stock moves and to understand how to analyse stock market trends in a better way.

Source: <https://www.investopedia.com/terms/s/shortselling.asp>

<https://www.motilaloswal.com/blog-details/8-ridiculously-powerful-stock-market-trading-strategies-for-beginners/19975>

Q.1) Which of the following statements about the applications of stem cells are correct?

1. They can be used to test the drugs for safety and quality.
2. They can be used to treat genetic diseases.
3. They can be used in tissue engineering.
4. They can be used to create lab grown cultured meat.

Select the correct answer from the code given below:

- a) 1, 2, and 4 only
- b) 2, 3, and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Stem cells are undifferentiated cells that have the intrinsic capacity to self-renew, that is, to divide and develop into different types of cells. Since its discovery in the 1960s, stem cell technology has harnessed the power of stem cells to solve problems in the field of medicine.

Statement 1 is correct: Stem cells can be used **to test the safety and effectiveness of new drugs**. This can help speed up the drug discovery process and reduce the need for animal testing.

Statement 2 is correct: Stem cell transplantation (SCT) is used to cure or greatly ameliorate a wide variety of genetic diseases, ranging from inherent defects of haemopoietic cell production or function to metabolic diseases.

Statement 3 is correct: **Stem cells can be used to create new tissues and organs for transplant. This is known as tissue engineering.** Researchers are working on developing techniques to grow replacement organs, such as kidneys and liver, from a patient's own stem cells.

Statement 4 is correct: **The stem cell technology is used to develop lab-grown meat.** This refers to meat that is comprised of animal cells but grown outside of the animal in controlled laboratory settings. To produce cultured meat, stem cells are isolated via simple biopsy from a living animal – chosen based on the meat being produced – and then cultured in vitro, without harming the animal.

Source: <https://www.hindustantimes.com/lifestyle/health/treatment-of-genetic-disorders-here-s-how-stem-cells-can-treat-genetic-diseases-101679382563350.html>

Q.2) Recently, the Site-Directed Nucleases (SDN) technology was in the news. In this context, consider the following statements:

1. Zinc-Finger Nucleases (ZFNs) is a technique that is used in SDN technology.
2. In all types of SDN technologies (SDN-1, 2 and 3), foreign genetic material is inserted to make changes in DNA.
3. Recently, the Union Ministry of Environment, Forest and Climate Change has exempted crops derived from SDN1 and SDN2 from biosafety assessment requirements.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

A decade ago, scientists in Germany and the US discovered a technique which allowed them to ‘cut’ DNA strands and edit genes. For agriculture scientists this process allowed them to bring about desired changes in the genome by using site directed nuclease (SDN) or sequence specific nuclease (SSN). Nuclease is an enzyme which cleaves through nucleic acid – the building block of genetic material.

Statement 1 is correct: Site-directed nucleases (SDNs) are a type of genetic engineering tool that can be used to make precise changes to the DNA sequence of a cell or organism. There are several **different techniques for using SDNs**, including:

- 1) **Zinc Finger Nucleases (ZFNs):** ZFNs are engineered proteins that can recognize and bind to specific DNA sequences. When combined with a nuclease, they can cut the DNA at that specific site. ZFNs are widely used in research and have been used to create genetically modified organisms.
- 2) **Transcription Activator-Like Effector Nucleases (TALENs):** TALENs are similar to ZFNs, but use a different type of DNA-binding protein. TALENs are also widely used in research and have been used to create genetically modified organisms.
- 3) **Clustered Regularly Interspaced Short Palindromic Repeats (CRISPR) and CRISPR-associated (Cas) proteins:** CRISPR-Cas systems are a type of bacterial immune system that can be used to target and cut specific DNA sequences. CRISPR-Cas systems have revolutionized genetic engineering and are now widely used in research and industry.

Statement 2 is incorrect: Depending on the nature of the edit that is carried out, the site-directed nucleases (SDN) technology is divided into three categories SDN 1, SDN 2 and SDN 3. SDN1 introduces changes in the host genome’s DNA through small insertions /deletions without introduction of foreign genetic material. In the case of SDN 2, the edit involves using a small DNA template to generate specific changes. **Both SDN1 and SDN2 processes do not involve alien genetic material** and the end result is indistinguishable from conventionally bred crop varieties. On the other hand, **SDN3 process involves larger DNA elements or full length genes of foreign origin** which makes it similar to Genetically modified organisms (GMO) development

Statement 3 is correct: Recently, the Ministry of Environment, Forests and Climate Change has relaxed the rules regarding the GM crops made from the SDN1 and SDN2 technologies. The notification states that **“SDN1 and SDN2 genome-edited products free from exogenous introduced DNA be exempted from biosafety assessment”** in pursuance of rule 20 of the Manufacture, Use, Import, Export and Storage of Hazardous Microorganisms/Genetically engineered Organisms or Cells Rules 1989.

Source: <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4970358/>

<https://pib.gov.in/PressReleasePage.aspx?PRID=1871153>

Q.3) With reference to “Chimeric Antigen Receptor (CAR) T-cell therapy”, consider the following statements:

1. A patient’s own cells cannot be used in the CAR T-cell therapy.
2. In this, T cells are genetically altered in a lab to enable them to locate and destroy cancer cells more effectively.

3. The therapy can help in treating diseases like leukemia and lymphomas.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

Currently available CAR T-cell therapies are customized for each individual patient. They are made by collecting T cells from the patient and re-engineering them in the laboratory to produce proteins on their surface called chimeric antigen receptors, or CARs. The CARs recognize and bind to specific proteins, or antigens, on the surface of cancer cells.

Statement 1 is incorrect: Unlike chemotherapy or immunotherapy which involve taking drugs, **CAR T-cell therapies use a patient's own cells.** They are modified in the laboratory to activate T-cells and target tumor cells.

Statement 2 is correct: CAR T cell therapy is a type of cancer immunotherapy treatment that uses immune cells called T cells that are genetically altered in a lab to enable them in locating in destroying cancer cells more effectively.

Statement 3 is correct: CAR T treatment can be very effective against some types of cancer, even when other treatments are not working. Since 2017, **six CAR T-cell therapies have been approved by the Food and Drug Administration (FDA).** CAR T-cell therapies are approved for the treatment of blood cancers, including **lymphomas**, some forms of **leukemia**, and, most recently, multiple myeloma.

Source: <https://www.cancer.gov/about-cancer/treatment/research/car-t-cells>

<https://www.ncbi.nlm.nih.gov/books/NBK537294/>

<https://www.cancer.org/treatment/treatments-and-side-effects/treatment-types/immunotherapy/car-t-cell1.html>

Q.4) Consider the following statements with reference to “Molecular Motors”:

1. They are a class of proteins that convert chemical energy into mechanical work.
2. These motors utilize the energy from the hydrolysis of Adenosine triphosphate (ATP) to generate force.
3. Myosins and kinesins are two important examples of molecular motors.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Molecular motors, an important class of molecular machines, harness various energy sources to generate unidirectional mechanical motion.

Statements 1 is correct: Molecular motors are a class of proteins that convert chemical energy into mechanical work, enabling various cellular processes such as muscle contraction, vesicle trafficking, and chromosome segregation.

Statement 2 is correct: These motors utilize the energy from ATP hydrolysis to generate force and movement along cytoskeletal filaments such as microtubules and actin filaments.

Statement 3 is correct: There are three major classes of molecular motors: myosins, kinesins, and dyneins, each with distinct structures and functions. For example, myosins are responsible for muscle contraction, while kinesins and dyneins play roles in intracellular transport and cell division.

Source:

<https://www.ncbi.nlm.nih.gov/books/NBK26888/#:~:text=Perhaps%20the%20most%20fascinating%20proteins,to%20move%20steadily%20along%20it.>

<https://pubs.acs.org/doi/10.1021/acs.chemrev.9b00819>

Q.5) Consider the following statements with reference to the Hallmark Unique Identification Number (HUID):

1. It has been introduced by the Ministry of Statistics and Programme Implementation.
2. It is a 6-digit Alphanumeric code.
3. One cannot sell gold jewelry without the HUID.

Which of the above-given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

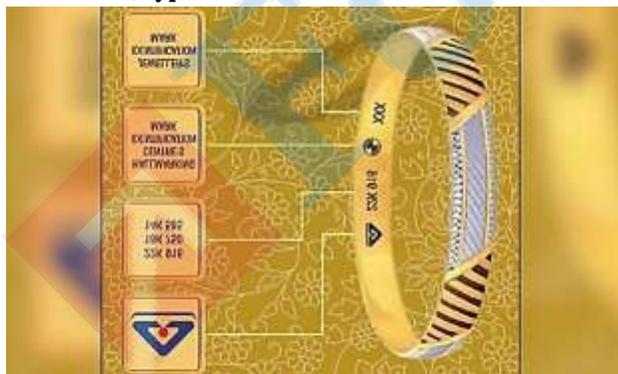

Ans) b

Exp) Option b is the correct answer.

Recently, the Bureau of India Standards (BIS) has prohibited the sale of hallmarked gold jewelry or gold artifacts without the Hallmark Unique Identification Number (HUID).

Statement 1 is incorrect: The Hallmark Unique Identification Number (HUID) is the **initiative of the Bureau of India Standards (BIS) which is the National Standards Body of India under the Department of Consumer Affairs, Ministry of Consumer Affairs, Food & Public Distribution, Government of India.**

Statement 2 is correct: HUID is a six-digit alphanumeric code and forms the part of hallmark which would now consist of 3 marks viz, BIS logo, purity of the article and six-digit alphanumeric HUID. It provides **information of the jeweller** who got the article hallmarked, **their registration number, purity of the article, type of article as well as details of hallmarking centre** which test and hallmark the article.

Statement 3 is correct: The sale of hallmarked gold jewelry or gold artefacts without 6 digit alphanumeric HUID is not be permitted after 31st March 2023 in order to safeguard and protect the consumers and enhance their confidence in purchase of hallmarked gold jewelry with traceability and assurance of quality.

Knowledge Base: As per BIS Rules, 2018, **in case Hallmarked jewelry bought by the consumer is found to be of lesser purity than that marked on jewelry, then the buyer/customer shall be entitled for**

compensation which shall be two times the amount of difference calculated on the basis of shortage of purity for the weight of such article sold and the testing charges.

Source:

<https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1904262#:~:text=It%20is%20further%20clarified%20that,traceability%20and%20assurance%20of%20quality.>

Q.6) Consider the following statements with reference to the term “Micro-LED”:

1. Only organic materials are used for the manufacturing of Micro-LEDs.
2. The LED used in this technology is self-illuminating.
3. They have brighter and better color reproduction than OLED display technology.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Micro LED is a display technology that uses arrays of tiny LEDs as pixels in a display. These LEDs are much smaller than the ones used in traditional LED displays, which allows for higher resolution, finer image fidelity and more compact displays.

Statement 1 is incorrect: Micro LED differs from OLED in the makeup of the LED materials. The O in OLED stands for organic and refers to the organic materials used in light producing part of the pixel stack.

MicroLED technology changes this to an inorganic Gallium Nitride (GaN) material, which is typically found in regular LED lighting.

Statements 2 and 3 are correct: Micro-LEDs are self-illuminating diodes that have brighter and better color reproduction than Organic Light Emitting Diode (OLED) display technology.

Micro LED TVs can be made up of a number of smaller panels that attach together to form a bigger screen like a Destructicon from Transformers. One can buy a couple of modules to make a smaller TV, and then add more if you move into a bigger house with more space for a TV.

Q.7) With regard to difference between analog and digital data transmission, which of the following statements **is incorrect?**

- a) Analog transmission uses a continuous signal to transfer messages whereas Digital transmission transfers messages discretely.
- b) Analog transmission uses analog signal whose amplitude varies with time, whereas digital transmission uses digital signal whose amplitude is either of two levels i.e., 0 or 1
- c) Analog transmission can broadcast large number of channels simultaneously whereas Digital transmission can broadcast only a single channel at a time.
- d) In analog transmission separating out noise and signal is not possible whereas it is possible in digital communication.

Ans) c

Exp) Option c is the correct answer.

In analog communication the data is transferred with the help of analog signal in between transmitter and receiver. Any type of data is transferred in analog signal. Any data is converted into electric form first and after that it is passed through communication channel. In digital communication digital signal is used rather than analog signal for communication in between the source and destination. They digital signal consists of discrete values rather than continuous values.

Statement a is correct: Analog transmission uses a **continuous signal** varying in amplitude, phase, or another property that is in proportion to a specific characteristic of a variable. Digital transmission transfers messages **discretely**. These messages are represented by a sequence of pulses via a line code.

Statement b is correct: Analog communication uses analog signal whose amplitude varies continuously with time **from 0 to 100**. Digital communication uses digital signal whose amplitude is of two levels **either Low i.e., 0 or either High i.e., 1**.

Statement c is incorrect: In analog communication **only limited number of channels** can be broadcasted simultaneously whereas Digital transmission can broadcast **large number of channels** simultaneously.

Statement d is correct: Separating out noise and signal in **analog communication is not possible, while** separating out noise and signal in digital communication is possible.

Knowledge Base: In analog communication **noise immunity is poor**, while in digital communication noise immunity is **good**.

In analog communication coding is not possible. In digital **communication coding is possible**. Different coding techniques can be used to detect and correct errors.

Source: <http://www.differencebetween.net/technology/difference-between-analog-and-digital-transmission/#:~:text=%20Difference%20Between%20Analog%20and%20Digital%20Transmission%20,fi>

<https://www.geeksforgeeks.org/difference-between-analog-communication-and-digital-communication/>

Q.8) Consider the following statements with reference to the applications of Geospatial Technology:

1. It can be used in industries for supply chain management.
2. It can be used by insurance companies for risk-based assessments.
3. It can be utilized in agriculture to analyze soil data.
4. It can be used for tracking geographical spread of diseases.

Which of the statements given above are correct?

- a) 3 only
- b) 3 and 4 only
- c) 1, 2 and 4 only
- d) 1, 2, 3, and 4

Ans) d

Exp) Option d is the correct answer.

Geospatial technologies is a term used to describe the range of modern tools contributing to the geographic mapping and analysis of the Earth and human societies

Statement 1 is correct: Geospatial Technology is used in Supply Chain Management

When a business is trying to keep track of its inventory and supply needs, they need to have the necessary tools for tracking how and when supply replenishment will arrive. When a business can keep track of inventory and shipments with geospatial technology, the supply chain grows, efficiency improves, and business costs are reduced.

Statement 2 is correct: Geospatial technology is used by insurance companies as a predictive model for risk-based assessments. If a certain location has a track record of things like frequent traffic accidents, high crime rates, etc., insurance companies can determine that may be a maximum risk area and define insurance policies specifically designed for that location.

Statement 3 is correct: Geospatial technology is currently being utilized to analyze soil data in order to determine which crops may grow in specific locations. It also helps farmers create more efficient harvesting procedures. Food production has soared and environmental standards have improved with the help of geospatial data.

Statement 4 is correct: Geospatial technologies are also incredibly important for tracking geographical spread of a disease. This can be demonstrated by the COVID-19 global pandemic. Without geospatial technology, the disease would not have been able to be effectively tracked around the world. Geospatial information was used to monitor the outbreak. The COVID-19 dashboard created by Johns Hopkins University is a great example.

Knowledge Base:

Some of the most **common geospatial technologies include:**

- 1) **Remote Sensing:** The geospatial technology used to study objects or surfaces at faraway distances using the images and data collected from space or airborne camera and sensor platforms.
- 2) **Geographic Information Systems (GIS):** It is a framework for gathering, managing, mapping, and analyzing the physical environment data of a specific location on the Earth's surface. GIS uses layers of geographic data to produce spatial analysis and derivative maps or 3D scenes.
- 3) **Global Positioning System (GPS):** It is a navigation system using satellites, a receiver, and algorithms to synchronize location, velocity and time data for air, sea and land travel.

Source: <https://www.studysmarter.co.uk/explanations/human-geography/introduction-to-human-geography/geospatial-technologies/>

<https://mgiss.co.uk/geospatial-technology-applications-and-benefits/>

Q.9) “It is an encrypted portion of the internet that is not indexed by search engines and requires specific configuration or authorization to access. It can be accessed only by using specific browsers, such as TOR Browser.”

The above paragraph best describes which of the following?

- Open web.
- Surface Web
- Dark Web
- Telnet

Ans) c

Exp) Option c is the correct answer.

Options a and b are incorrect: Surface web/open web is the normal web which is visible for all users using internet. The websites on the surface web are indexed by search engines. The user can open websites and gain information. But the interesting thing is that the surface web is only a 4% area of internet that the users use.

Option c is correct: The term Dark Web or Dark Net refers to encrypted online content that is not indexed by conventional search engines. Accessing the dark web can only be done using specific browsers, such as TOR Browser. There is a great deal of privacy and anonymity that comes with using the dark web compared to traditional websites. As its name implies, the dark web is a secret network that exists underground. It's made up of a series of websites that are hidden from the general public. This means they aren't accessible through traditional search engines, such as Google.

Option d is incorrect: Telnet is a network protocol used to virtually access a computer and to provide a two-way, collaborative and text-based communication channel between two machines.

Source: <https://www.kaspersky.com/resource-center/threats/deep-web>

<https://www.techtarget.com/whatis/definition/dark-web>

<https://www.investopedia.com/terms/d/dark-web.asp>

<https://medium.com/@hackersleague/what-is-surface-web-deep-web-and-dark-web-cdbaf71b30d5>

<https://www.ibm.com/docs/en/aix/7.1?topic=protocols-telnet-protocol>

Q.10) Consider the following statements with reference to the Forest Certification:

1. It is given to the industries that have completed their compensatory afforestation obligation.
2. It is based on standards developed by Forest Stewardship Council (FSC).
3. It will also help to combat desertification and promote forest sustainability.

Which of the above given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: Forest Certification is a **mechanism for forest monitoring, tracing and labelling timber, wood and pulp products and non-timber forest products**. It is a process through which quality of management from environmental, social and economic perspectives is judged against a series of agreed standards.

Statement 2 is correct: Forest Certification is based on **two major international standards for sustainable management of forests and forest-based products**. One has been developed by **Forest Stewardship Council (FSC)** and the other by Programme for Endorsement of Forest Certifications (PEFC).

Statement 3 is correct: **It is voluntary forest management standard will give impetus to third-party auditing of forest owners for various principles, criteria and indicators**. Forest certification is an important tool to combat desertification and promote forest sustainability.

Source: <https://pib.gov.in/PressReleaseDetailm.aspx?PRID=1834772>

<https://indianexpress.com/article/explained/explained-climate/forests-under-threat-deforestation-investigation-8478180/>

Q.11) Which of the following statements is correct about the term ‘Splinternet’, that has been often mentioned in the media?

- a) It is a part of the internet that is used only for spying activities and for sharing sensitive information.
- b) It is a specific part of the internet which is predominated by the usage of Artificial Intelligence.
- c) It is the internet designed specifically to cater to the needs of people in the Technology industry.
- d) It means that the global internet is fragmented into pieces due to content filtering and censorship by countries.

Ans) d

Exp) Option d is the correct answer.

Recently, Russia is risking the creation of a “splinternet”. Facebook has been blocked entirely by Russian authorities, while Twitter is almost completely cut off.

Option d is correct: **The splinternet is the breaking of one global internet into several smaller and fragmented pieces due to content filtering and censorship**. This division can be caused by religion, politics, government, technology or commerce. The most famous example is China’s “Great Firewall.” When you visit China and go online, you are not on the global Internet. You are on the Chinese government’s so-called “safe” version. You see what they want you to see—and use what services they want you to use.

Option a is incorrect: **A splinter bomb is an explosive device that injures or kills people within its blast radius by dispersing deadly shrapnel**. They can be crafted using any shell or gunpowder type combined with sharp fragments.

Source: <https://www.techtargt.com/whatis/feature/The-splinternet-explained-Everything-you-need-to-know>

<https://indianexpress.com/article/explained/russia-ukraine-war-splinternet-7849249/>
<https://www.internetsociety.org/blog/2022/03/what-is-the-splinternet-and-why-you-should-be-paying-attention/>

Q.12) “It is a quantum mechanical phenomenon. In these, two subatomic particles can be intimately linked to each other even if separated by billions of light-years of space. Despite their vast separation, a change induced in one will affect the other.”

Which of the following phenomenon is mentioned in the above passage?

- a) Quantum Superposition.
- b) Quantum Entanglement.
- c) Quantum Interference.
- d) Quantum Chaos

Ans) b

Exp) Option b is the correct answer.

Quantum Entanglement is the physical phenomenon that occurs when a pair or group of particles is generated and they interact in such a way that the quantum state of each particle of the pair or group cannot be described independently of the state of the others.

Option b is correct: Quantum Entanglement is a quantum mechanical phenomenon. In these two subatomic particles can be intimately linked to each other even if separated by billions of light-years of space. Despite their vast separation, a change induced in one will affect the other. Once you have knowledge of one quantum state, you automatically know the quantum state of any entangled particles. In principle, you could place two entangled particles on opposite ends of the galaxy and still have this instantaneous knowledge, which appears to violate the limit of the speed of light.

Option a is incorrect: The principle of quantum superposition states that a quantum particle can exist in 2 distinct locations at the same time. According to this theory, an quantum particle can exist simultaneously in multiple states, unless the operation of measurement is made.

Option c is incorrect: Quantum interference is when subatomic particles interact with and influence themselves and other particles while in a probabilistic superposition state. It can influence the probability of the outcomes when the quantum state is measured.

Option d is incorrect: Quantum chaos is a branch of physics which studies how chaotic classical dynamical systems can be described in terms of quantum theory. The primary question that quantum chaos seeks to answer is: "What is the relationship between quantum mechanics and classical chaos?".

Chaos theory is an interdisciplinary area of scientific study and branch of mathematics focused on underlying patterns and deterministic laws of dynamical systems that were once thought to have completely random states of disorder and irregularities.

Source: <https://www.space.com/31933-quantum-entanglement-action-at-a-distance.html>

<https://www.livescience.com/what-is-quantum-entanglement.html>

<https://becominghuman.ai/quantum-superposition-and-what-that-means-to-quantum-computation-3fbb5a711b9a>

<https://www.techtarget.com/whatis/definition/quantum-interference#:~:text=Quantum%20interference%20is%20when%20subatomic,the%20quantum%20state%20is%20measured.>

Q.13) The term “Proof-of-Stake (PoS)” mechanism is best described by which of the following statements?

- a) It is a cryptocurrency consensus mechanism used to verify new cryptocurrency transactions.
- b) It is a method to facilitate credit and debit card transactions by retail customers.

- c) It is a technique for demonstration of a product, service or solution in a sales context.
 d) It is a legal term used in courts, where the Defendant must provide proof in response to the case.

Ans) a

Exp) Option a is the correct answer.

Option a is correct: Proof of stake is a consensus mechanism used to verify new cryptocurrency transactions. Since blockchains lack any centralized governing authorities, proof of stake is a method to guarantee that data saved on the network is valid. A consensus mechanism is a method for validating entries into a distributed database and keeping the database secure. In the case of cryptocurrency, the database is called a blockchain—so the consensus mechanism secures the blockchain. Proof-of-stake reduces the amount of computational work needed to verify blocks and transactions.

Option b is incorrect: A Point of sale (POS) is a device that is used to process transactions by retail customers. A cash register is a type of POS. The cash register has largely been replaced by electronic POS terminals that can be used to process credit cards and debit cards as well as cash. A POS may be a physical device in a brick-and-mortar store, or a checkout point in a web-based store.

Option c is incorrect: Proof of concept (POC) is a demonstration of a product, service or solution in a sales context. Proof of concept (POC) is evidence obtained from a pilot project, which is executed to demonstrate that a product idea, business plan, or project plan is feasible. For example, in drug development, clinical trials are used to gather proof of concept for a final product.

Option d is incorrect: Proof of stake is not a legal term used in courts.

Source: <https://www.forbes.com/advisor/investing/cryptocurrency/proof-of-stake/>
<https://www.mckinsey.com/featured-insights/mckinsey-explainers/what-is-proof-of-stake>

<https://www.investopedia.com/terms/p/point-of-sale.asp>
<https://www.projectmanager.com/blog/proof-of-concept-definition>
<https://www.gartner.com/en/sales/glossary/proof-of-concept-poc->

Q.14) Consider the following statements with reference to '4D printing technology':

1. This technology involves changing the shape or structure of 3D printed objects under the influence of external stimuli.
2. In this technology, time is considered as the 4th dimension.
3. It uses 'smart material' like hydrogel or shape memory polymer as inputs.

Which of the statements given above are correct?

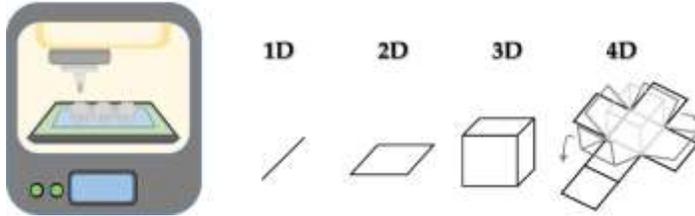

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

A 4D printed object is printed just like any 3D printed shape. The difference is that the 4D Printing technology uses programmable and advanced materials that perform a different functionality by adding hot water, light or heat. That's why a non-living object can change its 3D shape and behavior over time.

Progress of 4D Polymer Printing Techniques

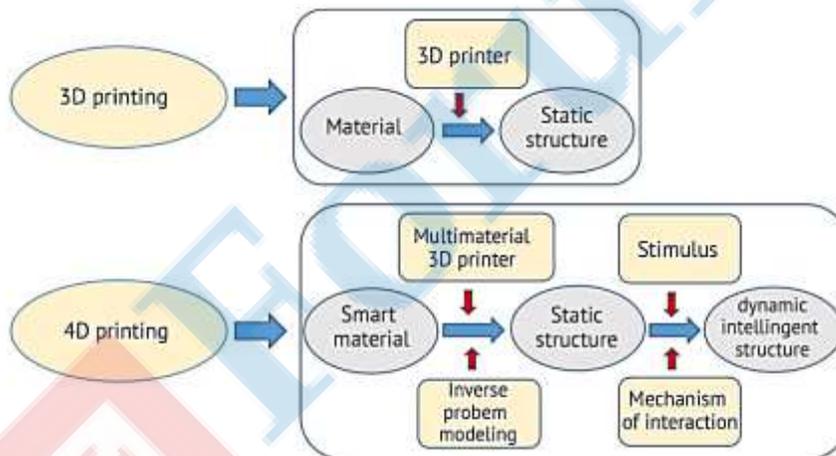

Statement 1 is correct: 4D printing is the process through which a **3D printed object transforms itself into another structure over the influence of external energy input** as temperature, light or other environmental **stimuli**.

4D printing refers to that the shape, property or functionality of 3D printed objects can change over time in response to external stimuli such as water, heat, light, electricity, etc. 4D printing has broad application prospects in many fields such as aerospace, drug delivery, biomedical equipment, and flexible electronic devices, and has been attracting widespread attention. To date, **most of the research on 4D printing involves the shapeshifting of 3D printed materials or structures**.

Statement 2 is correct: 3D Printing is about repeating a 2D structure, layer by layer in a print path, from the bottom to the top, layer by layer until a 3D volume is created. **4D Printing is referred to as 3D printing transforming over time. Thus, a fourth dimension is added: time.** So, the big breakthrough about 4D Printing over 3D Printing technology **is its ability to change shape over time**.

Statement 3 is correct: 4D printing technology uses commercial 3D printers, such as Polyjet 3D printers. **The input is a “smart material”, that can be either a hydrogel or a shape memory polymer.** Thanks to their thermomechanical properties and other material properties, smart materials are given the attributes of shape change and are differentiated from the common 3D printing materials.

Knowledge Base:

Potential Applications of 4D Printing

- 1) Self-repair piping system.
- 2) Self-assembly furniture.
- 3) Medical industry.

Source: <https://www.sculpteo.com/en/3d-learning-hub/best-articles-about-3d-printing/4d-printing-technology/#:~:text=its%20future%20applications,-,What%20is%204D%20Printing%3F,MIT%20Self%2Dassembly%20Lab.>

<https://builtin.com/3d-printing/4d-printing>

Q.15) Consider the following statements with reference to the MSME Competitive Scheme:

1. The scheme is for enterprises to promote lean manufacturing practices.
2. It is an initiative by the Ministry of Commerce.
3. Under this scheme, financial assistance is provided to MSMEs for hiring Lean Manufacturing Consultants.

Which of the above given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Recently, Ministry of MSMEs launched the MSME Competitive (LEAN) Scheme to provide a roadmap to global competitiveness for the MSMEs of India.

Statement 1 is correct: The **MSME Competitive (LEAN) Scheme promotes the adoption of lean manufacturing techniques**, which focus on reducing waste, increasing efficiency, and improving product quality.

Statement 2 is incorrect: The **MSME Competitive (LEAN) Scheme is an initiative by the Indian Government's Ministry of Micro, Small and Medium Enterprises** to enhance the competitiveness of these enterprises.

Statement 3 is correct: Under the MSME Competitive (LEAN) Scheme, MSMEs will implement LEAN manufacturing tools like 5S, Kaizen, KANBAN, Visual workplace, Poka Yoka etc under the able guidance of trained and competent LEAN Consultants to attain LEAN levels like Basic, Intermediate and Advanced. **The government will contribute 90% of implementation cost for handholding and consultancy fees.**

Knowledge Base: Lean Manufacturing or Lean Production, known simply as LEAN, is a production practice that considers the expenditure of resources for any goal, other than the creation of value for the end customer, to be wasteful and hence should be eliminated

Source: <https://www.processexcellencenetwork.com/lean-six-sigma-business-performance/articles/what-is-lean>

<https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1905561>

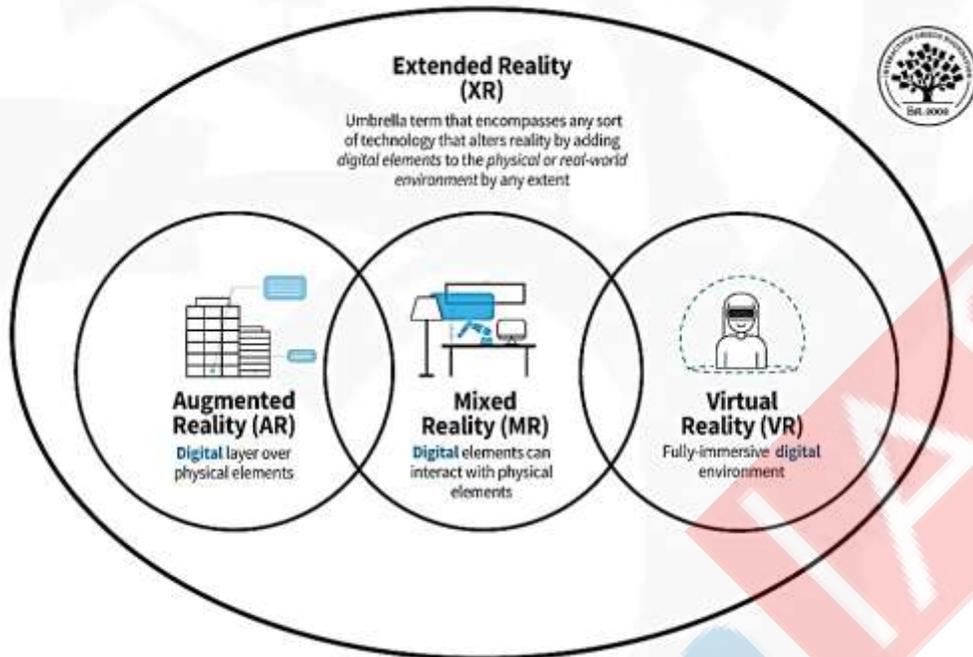

Q.16) “It is an umbrella term for any technology that alters reality by adding digital elements to the physical or real-world environment to an extent. It includes any existing or new technologies that may be created in the future that alter reality, either by blending the digital and the physical world or by creating a fully virtual environment.”

Which of the following options has been described in the above passage?

- a) Augmented Reality
- b) Mixed Reality
- c) Extended Reality
- d) Virtual Reality

Ans) c

Exp) Option c is the correct answer.

Option a is incorrect: In augmented reality, virtual information and objects are overlaid on the real world. This experience enhances the real world with digital details such as images, text, and animation. You can access the experience through AR glasses or via screens, tablets, and smartphones. This means **users are not isolated from the real world and can still interact and see what's going on in front of them**. The most well-known examples of AR are the Snapchat filters that put digital objects such as hats or glasses onto your head.

Option b is incorrect: Mixed reality is a seamless integration of the real world and rendered graphics, which creates an environment in which users can directly interact with the digital and physical worlds together. With MR, real and virtual objects blend, and are presented together within a single display. Users can experience MR environments through a headset, phone or tablet, and can interact with digital objects by moving them around or placing them in the physical world.

Option c is correct: Extended reality (XR) is an umbrella term for any technology that alters reality by adding digital elements to the physical or real-world environment to any extent and includes, but is not limited to, augmented reality (AR), mixed reality (MR) and virtual reality (VR). Therefore, the term extended reality does not refer to any specific technology; it includes any existing or new technologies that may be created in the future that alter reality, either by blending the digital and the physical world or by creating a fully virtual environment.

Option d is incorrect: Virtual reality (VR), the use of computer modeling and simulation that enables a person to interact with an artificial three-dimensional (3-D) visual or other sensory environment. VR applications immerse the user in a computer-generated environment that simulates reality through the use of interactive devices, which send and receive information and are worn as goggles, headsets, gloves, or body suits.

Q.17) Consider the following statements with reference to Double Asteroid Redirection Test (DART) mission:

1. It is the first-ever space mission to demonstrate asteroid deflection by kinetic impactor.
2. The mission aims to change the orbit of asteroid Bennu.
3. The spacecraft will return to the earth with samples collected from the targeted asteroid.

Which of the statements given above is/are correct?

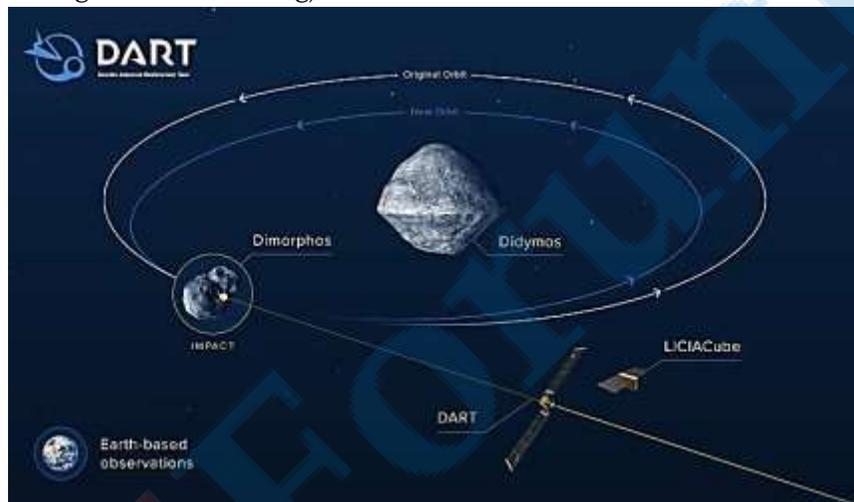

- a) 1 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1 and 2 only

Ans) a

Exp) Option a is the correct answer.

NASA's Double Asteroid Redirection Test (DART) mission launched on a SpaceX Falcon 9 rocket from Vandenberg Space Force Base in California successfully impacted its target asteroid, Dimorphos, on Sept. 26, 2022.

Statement 1 is correct: The Double Asteroid Redirection Test (DART) mission is NASA's demonstration of kinetic impactor technology, impacting an asteroid to adjust its speed and path. **DART is the first-ever space mission to demonstrate asteroid deflection by kinetic impactor** (in simplest terms means smashing a thing into another thing).

Statement 2 is incorrect: The DART spacecraft successfully crashed into the asteroid Dimorphos. The impact should have nudged the asteroid slightly and subtly changed its orbit around Didymos, the larger asteroid. While Dimorphos posed no hazard to Earth, DART's successful collision with the asteroid demonstrated one method of asteroid deflection using kinetic impactor technology.

Statement 3 is incorrect: In the mission DART spacecraft was designed to collide with the asteroid Dimorphos to change its orbit. It is a suicide mission, and the spacecraft will be completely destroyed. Thus, the DART spacecraft will not return to the Earth.

Source: <https://www.nasa.gov/press-release/nasa-confirms-dart-mission-impact-changed-asteroid-s-motion-in-space>

<https://dart.jhuapl.edu/Mission/>

<https://scitechdaily.com/nasas-double-asteroid-redirection-test-dart-mission-receives-space-foundation-achievement-award/>

Q.18) A satellite or spacecraft is most often placed in one of several particular orbits around Earth. In this context, consider the pairs showing various orbits around the earth:

Type of orbit	Mostly used for
1. Geostationary Earth Orbit (GEO)	Telecommunication purposes
2. Sun-Synchronous Orbit (SSO)	To monitor forest fires
3. Low Earth Orbit (LEO)	Satellite imaging
4. Geostationary transfer orbit (GTO)	To transfer satellite from one orbit to another

How many of the above given pairs are correctly matched?

- Only one pair
- Only two pairs
- Only three pairs
- All four pairs

Ans) d

Exp) Option d is the correct answer.

Satellites or spacecraft upon launch are placed in a particular orbit around Earth or sent on an interplanetary journey. The orbit selected depends on what the satellite is designed to achieve. Different types of orbits include Geostationary orbit (GEO), Low Earth orbit (LEO), Medium Earth orbit (MEO), Polar orbit, Sun-synchronous orbit (SSO), Transfer orbits, geostationary transfer orbit (GTO), and Lagrange points (L-points)

Pair 1 is correctly matched: Geostationary Earth Orbit (GEO) is **widely used for telecommunication purposes** because it allows the satellite to remain in a fixed position relative to a point on Earth's surface. It can also be used by weather monitoring satellites, because they can continually observe specific areas to see how weather trends emerge there

Pair 2 is correctly matched: Sun-synchronous orbit (SSO) is a type of polar orbit where a satellite travels over the polar regions and is synchronous with the Sun. This is useful for monitoring areas, taking series of images to investigate weather patterns, predict storms, monitor emergencies such as forest fires or flooding, and accumulate data on long-term problems like deforestation or rising sea levels.

Pair 3 is correctly matched: Low Earth Orbit (LEO) is a close proximity orbit commonly used for satellite imaging and is also used for the International Space Station (ISS) due to the ease of travel for astronauts. However, LEO satellites are less useful for telecommunication tasks as they move too fast across the sky and require significant effort to track from ground stations.

Pair 4 is correctly matched: Geo Transfer orbits (GTO) are a type of orbit that is used to move a satellite or spacecraft from one orbit to another. Satellites launched into space are often placed on a transfer orbit to reach their final orbit using built-in motors and relatively little energy.

Source: https://www.esa.int/Enabling_Support/Space_Transportation/Types_of_orbits

Q.19) Which of the following statements is/are correct about PARAM PORUL, a supercomputer dedicated to the nation under National Supercomputing Mission (NSM)?

- It is a part of joint initiative of Ministry of Electronics and Information Technology (MeitY) and Department of Science and Technology (DST).

2. It is equipped with Direct Contact Liquid Cooling technology.
3. It was inaugurated at the Indian Institute of Science (IISc), Bangalore

Select the correct answer from the code given below:

- a) 1 and 2 only
- b) 2 only
- c) 3 only
- d) 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

PARAM PORUL is a state-of-the-art supercomputer inaugurated on May 25, 2022, at NIT Tiruchirappalli under the National Supercomputing Mission. The facility has an 838 TeraFlops computing capacity and is equipped with a mix of CPU nodes, GPU nodes, High Memory nodes, High throughput storage, and high-performance Infiniband interconnect.

Statement 1 is correct: PARAM PORUL is a supercomputer dedicated to the nation under the National Supercomputing Mission (NSM), which is a joint initiative of Ministry of Electronics and Information Technology (MeitY) and Department of Science and Technology (DST).

Statement 2 is correct: PARAM PORUL is equipped with Direct Contact Liquid Cooling technology to obtain a high-power usage effectiveness and thereby reducing the operational cost.

Statement 3 is incorrect: PARAM PORUL was not inaugurated at IISc Bangalore. It was inaugurated at NIT Tiruchirappalli.

Knowledge Base:

Direct Contact Liquid Cooling (DCLC) is a cooling technology that uses a liquid coolant, typically water, to directly cool a hot surface, such as a computer chip or server processor. In DCLC, the coolant comes into direct contact with the hot surface, allowing for efficient heat transfer and dissipation. This technology is commonly used in high-performance computing (HPC) applications, such as PARAM PORUL, as it provides a more effective and energy-efficient cooling solution than traditional air-based cooling systems.

Q.20) Consider the following statements with reference to the Asia Energy Transition Initiative:

1. It is a China-led project aimed at promoting clean energy.
2. The key objective of the initiative is to achieve carbon neutrality in Asia.

Which of the above-given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer

Japan is eager to assist India in its clean energy transition by incorporating the country into the Asia Energy Transition Initiative (AETI).

Statement 1 is incorrect: The **Asia Energy Transition Initiative is a Japan-led project** aimed at promoting clean and sustainable energy alternatives in the Asia-Pacific region.

Statement 2 is correct: The initiative is initially targeted to supporting countries in the Association of South East Asian Nations (ASEAN) pushing toward net-zero carbon emissions. The **aim is to achieve both sustainable growth and carbon neutrality in Asia.**

Source: <https://www.downtoearth.org.in/news/world/india-japan-to-improve-bilateral-cooperation-towards-clean-energy-transition-88029>

Q.21) Which of the following statements is/are correct about Generative Artificial Intelligence (AI)?

1. It is a subset of artificial intelligence that generate new outputs based on the data they have been trained on.
2. Generative AI uses a type of deep learning called generative adversarial networks (GANs) to create new content.

Select the correct code from the options below:

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Generative artificial intelligence (AI) describes algorithms (such as ChatGPT) that can be used to create new content, including audio, code, images, text, simulations, and videos. Recent breakthroughs in the field have the potential to drastically change the way we approach content creation.

Statement 1 is correct: Generative artificial intelligence (AI) is a subset of AI that uses machine learning algorithms to generate new data based on existing data inputs.

Statement 2 is correct: Generative AI uses a type of deep learning called generative adversarial networks (GANs) to create new content. A GAN consists of two neural networks: a generator that creates new data and a discriminator that evaluates the data. The generator and discriminator work together, with the generator improving its outputs based on the feedback it receives from the discriminator until it generates content that is indistinguishable from real data.

Source: <https://www.weforum.org/agenda/2023/02/generative-ai-explain-algorithms-work/>

<https://www.mckinsey.com/featured-insights/mckinsey-explainers/what-is-generative-ai>

<https://www.techtarget.com/searchenterpriseai/definition/generative-AI>

Q.22) With reference to Radio Access Network (RAN), Consider the following statements:

1. RAN is used for connecting end user devices to core network.
2. The demand for RAN will decline due to the emergence of 5G technology.

Which of the following statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Radio Access Networks (RANs) are essential components of telecommunications networks that connect end-user devices to the core network. They are crucial for network operators as they represent significant overall network expenses, perform intensive and complex processing.

Statement 1 is correct: RAN (Radio Access Network) is a component in a telecommunications system that connects end user devices (such as mobile phones) to the core network through radio access links.

Statement 2 is incorrect: The demand for RAN is increasing with the emergence of 5G technology as it requires more RAN infrastructure to provide the promised high-speed and low latency connectivity.

Source: <https://www.redhat.com/en/topics/5g-networks/what-is-radio-access-network>

<https://www.techtarget.com/searchnetworking/definition/radio-access-network-RAN>

Q.23) Which of the following countries participated in Sea Dragon 23 military exercise?

1. United States of America
2. Japan
3. Australia
4. India
5. Canada

Select the correct code from given below:

- a) 1 and 2 only
- b) 2, 3 and 4 only
- c) 1, 2, 4 and 5 only
- d) 1, 2, 3, 4, and 5

Ans) c

Exp) Option c is the correct answer.

The Sea Dragon 23 exercise, a combined anti-submarine warfare training, featured five Indo-Pacific nations, including **the US, Canada, Japan, India, and the Republic of Korea**. The program involved more than 270 hours of in-flight training and exchange of tactics, techniques, and procedures among participants. The exercise is significant in light of the deteriorating regional maritime security environment, particularly around the South and East China Seas.

Source: <https://foreignbrief.com/daily-news/sea-dragon-23-anti-submarine-military-exercise-concludes/>

Q.24) Which of the following statements about Directed Energy Weapons (DEWs) and Hypersonic Weapons are correct?

1. DEWs use directed energy in the form of laser, microwave, or particle beams to destroy targets.
2. DEW are much cheaper to produce when compared with traditional kinetic weapons.
3. Hypersonic weapons travel at speeds greater than Mach 5.
4. Hypersonic cruise weapons have fixed trajectories and limited manoeuvrability.

Select the correct answer using the code given below:

- a) 1 and 3 only
- b) 2, 3 and 4 only
- c) 1, 2 and 4 only
- d) 1, 2, 3 and 4

Ans) a

Exp) Option a is the correct answer.

DEWs are a ranged weapon that damages its target with highly focused energy without a solid projectile, including lasers, microwaves, particle beams and sound beams. Hypersonic weapons are weapons capable of travelling at hypersonic speed, defined as between five and 25 times the speed of sound.

Statement 1 is correct: DEWs use directed energy in the form of laser, microwave, or particle beams to destroy targets. These weapons are designed to damage or destroy targets by emitting highly focused energy in the form of lasers, microwaves, or particle beams.

Statement 2 is incorrect: DEWs can be expensive to produce and maintain compared with traditional kinetic weapons as they require complex and advanced technology.

Statement 3 is correct: Hypersonic weapons are weapons that can travel at speeds of Mach 5 to Mach 10, which is five to ten times the speed of sound. These weapons can be used to strike targets with high precision and at long ranges.

Statement 4 is incorrect: Hypersonic cruise weapons are highly manoeuvrable and able to change course during flight. They are different from ballistic missiles, which can also travel at hypersonic speeds (of at least Mach 5) but have set trajectories and limited manoeuvrability.

Source: <https://theprint.in/india/defence-industry-should-work-on-directed-energy-hypersonic-weapons-iaf-chief/1461852/> <https://www.indiatimes.com/explainers/news/explained-what-are-directed-energy-weapons-and-hypersonic-weapons-597340.html> <https://www.voanews.com/a/what-are-hypersonic-weapons-and-who-has-them-/6492459.html>
<https://www.prnewswire.com/news-releases/global-directed-energy-weapons-dew-market-sizeshare-estimated-to-reach-usd-22-10-billion-by-2032--at-9-2-cagr-growth-polaris-market-research-301793284.html>

Q.25) Consider the following statements with reference to the Suspension of Operation (SoO) agreement, seen in the news recently:

1. It is a pact between the Indian government, the Assam state government, and various armed insurgent groups.
2. The pact was first signed in 2008 to initiate a political dialogue with the insurgent groups.
3. As per the agreement, the government forces would not launch any operations against insurgent groups.

Which of the above given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: The **Suspension of Operation (SoO) agreement is a pact between the Indian government, the Manipur state government,** and various armed insurgent groups in Manipur.

Statement 2 is correct: The agreement aims to maintain peace and pave the way for negotiations, providing an opportunity for these groups to join the political mainstream. **Signed in 2008, the SoO has been extended periodically, with the most recent extension in 2021, and covers 25 Kuki and Zomi armed groups.** In February 2023, the Manipur government decided to withdraw from the SoO agreement, citing violations and a lack of commitment from the armed groups.

Statement 3 is correct: The important terms under the pact are that security forces, including state and central forces, are not to launch any operations, nor can the underground groups.

The signatories of United People's Front (UPF) and Kuki National Organisation (KNO) shall abide by the Constitution of India, the laws of the land and the territorial integrity of Manipur. They are prohibited from committing all kinds of atrocities, extortion, among others. The agreement's primary goal is to establish and maintain peace by suspending armed hostilities between the parties involved.

Source: <https://indianexpress.com/article/explained/explained-politics/what-is-the-soo-agreement-manipur-govt-withdrew-from-8494829/>

Q.26) With reference to Solid Fuel Ducted Ramjet (SFDR) booster, consider the following statements:

1. It has been developed by Defense Research and Development Organization (DRDO)
2. It enables the missiles to intercept aerial threats.
3. It can help in developing long range air to air missiles.

Which of the above given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Defense Research and Development Organization (DRDO) successfully flight tested Solid Fuel Ducted Ramjet (SFDR) booster at the Integrated Test Range (ITR), Chandipur off the coast of Odisha on April 08, 2022. The test successfully demonstrated the reliable functioning of all critical components involved in the complex missile system and met all the mission objectives.

Statement 1 is correct: The SFDR has been developed by Defense Research and Development Laboratory, Hyderabad in collaboration with other DRDO laboratories such as Research Centre Imarat, Hyderabad and High Energy Materials Research Laboratory, Pune.

Statement 2 is correct: Solid Fuel Ducted Ramjet (SFDR) booster enables the missiles to intercept aerial threats at very long range at supersonic speeds.

Statement 3 is correct: It will provide DRDO with a technological advantage that will enable it to develop long-range air-to-air missiles. At present, such technology is available only with a handful of countries in the world.

Source: <https://pib.gov.in/PressReleasePage.aspx?PRID=1814813>

Q.27) Which of the following statements about the Pralay missile are correct?

1. It is India's first tactical quasi-cruise missile.
2. It was developed as a derivative of the Prahaar missile program.
3. It has a range of 150-500 kilometres.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) b

Exp) Option b is the correct answer.

India's Defense Ministry has approved the indigenous short-range ballistic surface-to-surface missile, Pralay, which will provide Indian military the ability to strike enemy positions and key installations in actual battlefield areas.

Statement 1 is incorrect: Pralay is India's first tactical quasi-ballistic missile (not a quasi-cruise) missile that has been developed by India and is capable of evading interceptor missiles.

Statement 2 is correct: It is derived from the Prahaar missile program, which was first tested in 2011, and has been developed according to the specifications and requirements of the Indian Army.

Statement 3 is correct: One of the key features of the Pralay missile is its range. It has a range of 150-500 kilometers, which makes it a potent weapon for the Indian military. In addition to its range, the missile is also capable of carrying a conventional warhead of about 350 kg to 700 kg, which makes it highly effective in combat situations.

Source: <https://theprint.in/defence/pralay-indias-first-tactical-quasi-ballistic-missile-a-step-towards-own-rocket-force/1283224/>

Q.28) Which of the following statements about Kamikaze Drones are correct?

1. They are unmanned aerial vehicles that are designed to collide with their target.
2. They are also known as Loitering Munitions.
3. Kamikaze drones are much more expensive than cruise missile.

Select the correct code from the following:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) a

Exp) Option a is the correct answer.

Kamikaze drones are unmanned aerial vehicles (UAVs) that are designed to crash into a target, effectively becoming a suicide weapon. In recent years, there has been an increase in the use of kamikaze drones in conflicts, including in the ongoing war between Russia and Ukraine.

Statement 1 is correct: Kamikaze drones, also known as suicide drones, are unmanned aerial vehicles (UAVs) that are designed to collide with their targets. They are equipped with explosive warheads and can be remotely operated or pre-programmed to fly to a specific target.

Statement 2 is correct: Kamikaze drones are also known as loitering munitions. This is because they can fly around an area for an extended period of time, waiting for a target to appear. They are equipped with sensors that allow them to identify and track targets, and can be directed to attack specific targets.

Statement 3 is incorrect: Kamikaze drones are typically smaller and cheaper than traditional cruise missiles, and are often built from off-the-shelf commercial drones. They can be equipped with explosives or other types of payloads, and can be remotely controlled or programmed to autonomously seek out and attack a target.

Source: <https://timesofindia.indiatimes.com/world/rest-of-world/what-are-kamikaze-drones-the-new-worry-for-ukraine-in-defending-against-russia/articleshow/94912735.cms>

<https://indianexpress.com/article/explained/everyday-explainers/kamikaze-drones-russia-ukraine-war-explained-8209717/>

Q.29) Which of the following statements about GSAT 7 series satellites are **incorrect**?

1. They are remote sensing satellites.
2. GSAT-7A is primarily designed for use by the Indian Army.
3. They are inducted into the Low Earth orbit (LEO)

Select the correct answer using the code given below:

- a) 1 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2, and 3

Ans) d

Exp) Option d is the correct answer.

GSAT-7 is a communication satellite designed by ISRO to provide a wide range of communication services, including low bit rate voice and high bit rate data communication. It is intended to serve a vast oceanic region as well as the Indian land-mass. The satellite's payload is compatible with ISRO's I-2.5K bus and features a multiband communication configuration.

Statement 1 is incorrect: The GSAT 7 series satellites are communication satellites, specifically designed to provide secure and real-time communication to the Indian armed forces, particularly the Indian Navy.

Statement 2 is incorrect: While the GSAT 7 series of satellites are primarily used by the Indian Navy, **GSAT-7A** is actually designed for use by the Indian Air Force (IAF) and provides secure and reliable communication to the IAF's airborne early warning and control (AEW&C) system. **GSAT 7B, which is yet to be launched is for primary use of Indian Army.**

Statement 3 is incorrect: They are placed into a geosynchronous orbit (not LEO), around 36,000 km above Earth.

Source: https://www.isro.gov.in/GSAT_7.html <https://timesofindia.indiatimes.com/india/after-navy-iaf-army-to-get-dedicated-satellite-gsat-7b-as-mod-inks-rs-3k-cr-deal-with-nsil/articleshow/99129740.cms?from=mdr> <https://indianexpress.com/article/explained/explained-the-gsat-7b-and-indias-other-military-satellites-7834659/>

Q.30) Consider the following statements with reference to the Erythritol:

1. Erythritol is used as a sugar substitute in food and beverages due to its low-calorie content.
2. One of the challenges of Erythritol is that it raises blood sugar levels.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

According to recent research, Erythritol, a popular artificial sweetener, is associated with an increased risk of heart attack and stroke.

Statement 1 is correct: Erythritol is a sugar alcohol (or polyol) that is used as a sugar substitute in food and beverages due to its sweet taste and low-calorie content. It is naturally occurring in small amounts in certain fruits and fermented foods, but most commercial erythritol is produced by fermenting glucose with the help of specific yeast or fungi.

Statement 2 is incorrect: Erythritol has about 70% of the sweetness of table sugar (sucrose) and has a glycemic index of zero, which means it does not raise blood sugar levels. Additionally, it has minimal impact on insulin levels, making it a popular choice for people with diabetes or those following low-carb diets. Erythritol is also non-cariogenic, meaning it does not contribute to tooth decay.

Source: <https://www.naturallysweet.com.au/glycemic-index>

<https://www.healthline.com/nutrition/erythritol>

Q.31) Consider the following statements about Imaging X-ray Polarimetry Explorer, often seen in news:

1. It will study the polarization of X-rays from different types of celestial objects.
2. It is a joint initiative of NASA and Japan Aerospace Exploration agency (JAXA).
3. It is the first X-ray observatory to be launched in space.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

NASA's Imaging X-ray Polarimetry Explorer, or IXPE, is a space observatory built to discover the secrets of some of the most extreme objects in the universe – the remnants of supernova explosions, powerful particle streams spit out by feeding black holes, and more.

Statement 1 is correct: IXPE is NASA's first mission to study the polarization of X-rays from many different types of celestial objects. Measuring the polarization of X-rays traces the story of where this light came from, including the geometry and inner workings of its source.

Statement 2 is incorrect: IXPE is an international collaboration between NASA and the Italian Space Agency (and not JAXA). Hundreds of engineers and scientists from more than 12 countries worked together to make IXPE a reality.

Statement 3 is incorrect: IXPE is not the first X ray observatory/telescope. There have been several earlier space telescopes and observatories like, Chandra X-ray observatory, XMM-Newton (European Space Agency's X-ray observatory).

Knowledge Base:

IXPE carries three identical telescopes. Each telescope includes a set of cylindrical mirrors, or optics, and a sensitive detector. The mirrors collect X-rays from celestial objects and focus them onto the detectors, which make an image of the incoming X-rays and measure the polarization. All three mirror sets are separated from their corresponding detectors by a deployable 12-foot (3.7-meter) boom.

IXPE builds on the discoveries of NASA's Chandra X-ray Observatory and other space telescopes by measuring the amount and direction of polarization of X-ray light. IXPE's polarization measurements will help scientists answer questions such as:

- 1) How do black holes spin?
- 2) Was the black hole at center of the Milky Way actively feeding on surrounding material in the past?
- 3) How do pulsars shine so brightly in X-rays?
- 4) What powers the jets of energetic particles that are ejected from the region around the supermassive black holes at the centers of galaxies?

Source: https://www.nasa.gov/mission_pages/ixpe/overview.html

Q.32) In the context of Dark Sky Reserves, recently seen in news, consider the following statements.

1. It is an area where light pollution is monitored, to allow better observation of sky at night.
2. A Dark Sky Reserve is to be set up at Hanle in Ladakh.
3. Currently, no Indian site has been certified as International Dark Sky Reserve by International Dark Sky Reserve Association (IDA).

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

A dark-sky preserve (DSP) is an area, usually surrounding a park or observatory that is kept free of artificial light pollution. The purpose of a dark sky preserve is generally to promote astronomy.

Statement 1 is correct: A dark sky reserve is an area where light pollution is monitored. Basically, there are several restrictions around the reserve where humans are not allowed to have any loud source of light. So, it allows better observation of skies at night for astronomy.

Statement 2 is correct: Recently, in a first-of-its-kind initiative, the Department of Science & Technology (DST) has announced the setting up of India's first Dark Sky Reserve in Hanle, Ladakh. Hanle,

which is about 4,500 metres above sea level, hosts telescopes and is regarded as one of the world's most optimal sites for astronomical observations.

Statement 3 is correct: The International Dark Sky Association (IDA) is a U.S.-based non-profit that designates places as International Dark Sky Places, Parks, Sanctuaries and Reserves, depending on the criteria they meet. Currently no Indian site is certified by IDA as an International Dark Sky Reserve.

Knowledge Base: The Indian Astronomical Observatory at Hanle also houses several telescopes like, the Himalayan Chandra Telescope (HCT), High Energy Gamma Ray telescope (HAGAR), the Major Atmospheric Cherenkov Experiment Telescope (MACE), GROWTH-India, etc.

Source: <https://www.iap.res.in/?q=iao.htm>

<https://timesofindia.indiatimes.com/travel/travel-news/ladakhs-hanle-is-indias-first-dark-sky-reserve/articleshow/96267024.cms>

<https://www.thehindu.com/sci-tech/science/india-to-have-first-astronomy-dark-reserve-in-ladakh/article65849890.ece#:~:text=In%20a%20first-of-its-kind%20initiative%2C%20the%20Department%20of%20Science,the%20world%E2%80%99s%20most%20optimal%20sites%20for%20astronomical%20observations.>

<https://www.darksky.org/our-work/conservation/idsp/reserves/>

Q.33) A joint international collaboration led by NASA launched the James Webb Space Telescope, which is the world's largest, most powerful, and most complex space science telescope ever built. Since its launch it has amazed astronomy community with its observations and space images. In this context, which of the following observations have been made by the James Webb Space Telescope?

1. It has observed the Pillars of Creation, where new stars are forming within dense clouds of gas and dust.
2. It spotted a set of concentric rings around a giant, distant star WR140.
3. It observed colourful auroras and massive storms on the planet Jupiter.
4. It captured an image of Einstein Ring in space.

Select the correct answer from the codes given below.

- a) 1 and 2 only
- b) 2 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

The James Webb Space Telescope is the world's largest, most powerful, and most complex space science telescope ever built. Webb will solve mysteries in our solar system, look beyond to distant worlds around other stars, and probe the mysterious structures and origins of our universe and our place in it. Webb is an international program led by NASA with its partners, ESA (European Space Agency) and the Canadian Space Agency. It made several astonishing observations in the recent times.

Option 1 is correct: It has captured a lush, highly detailed landscape – the iconic Pillars of Creation – where new stars are forming within dense clouds of gas and dust. The three-dimensional pillars look like majestic rock formations, but are far more permeable. These columns are made up of cool interstellar gas and dust that appear – at times – semi-transparent in near-infrared light.

Image on right by the Hubble telescope and on left by the James Webb telescope.

Option 2 is correct: The James Webb Space Telescope spotted a set of concentric angular rings around a giant, distant star, recently. A new study shows that, the first visible evidence of starlight pushing dust around, and exhibits the strange environment of the star WR140, which is in fact a system of two stars that orbit each other.

Option 3 is correct: The new images clicked by the observatory has presented Jupiter's massive storms, colourful auroras and faint rings.

Option 4 is correct: It has snapped a perfect shot of an "Einstein ring." The stunning halo is the result of light from a distant galaxy passing through warped space-time surrounding another galaxy aligned between the distant light source and Earth.

Source: <https://www.space.com/news/live/james-webb-space-telescope-updates>

<https://www.nasa.gov/feature/goddard/2022/nasa-s-webb-takes-star-filled-portrait-of-pillars-of-creation>

<https://webb.nasa.gov/index.html>

Q.34) Consider the following statements about Geomagnetic Storm, a natural phenomenon:

1. A geomagnetic storm is a disturbance of the Earth's magnetic field caused by solar emission like Coronal Mass Ejections.
2. A Geomagnetic storm can lead to the occurrence of high-rise tsunamis on Earth.
3. The severity of geomagnetic storms is ranked by the World Meteorological Organization.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

A geomagnetic storm is a major disturbance of Earth's magnetosphere that occurs when there is a very efficient exchange of energy from the solar wind into the space environment surrounding Earth. These storms result from variations in the solar wind that produces major changes in the currents, plasmas, and fields in Earth's magnetosphere.

Statement 1 is correct: According to NASA, a geomagnetic storm refers to the disruptions to the Earth's magnetic field caused by solar emissions. When a Coronal Mass Ejection (CME) or a high-speed solar stream reaches our planet, it slams into the magnetosphere. The Earth's magnetosphere is created by our magnetic fields, and it usually protects us from the particles emitted by the Sun.

Statement 2 is incorrect: According to the National Oceanic and Atmospheric Administration (NOAA), a Geomagnetic storm or a solar storm does not directly lead to occurrence of tsunamis on the Earth. For a tsunami to be unleashed on Earth, there has to be an earthquake rumbling below the ocean floor that displaces water and generates a colossal, ultra-fast wave through the entire water column.

Statement 3 is incorrect: The severity of geomagnetic storms is NOT ranked by the World Meteorological Organization. Rather, the National Oceanic and Atmospheric Administration (NOAA) Geomagnetic Storm Scale indicates the severity of geomagnetic storms. It is denoted by a G followed by a number from 1 to 5, with 1 being a minor event, and 5 being an extreme event. NOAA is a US government agency.

Source : <https://indianexpress.com/article/technology/science/severe-geomagnetic-solar-storm-8517938/>

<https://www.swpc.noaa.gov/phenomena/geomagnetic-storms>

<https://www.livescience.com/can-solar-storms-cause-tsunamis>

Q.35) Consider the following statements with reference to the Vernal Equinox:

1. The Vernal Equinox marks the beginning of spring in the Southern Hemisphere.
2. In the Northern Hemisphere, the vernal equinox corresponds to the beginning of autumn.
3. During the vernal equinox, the Sun is positioned directly above the Earth's equator.

Which of the above given statements is/are correct?

- a) 1 only
- b) 3 only
- c) 2 and 3 only
- d) 1 and 2 only

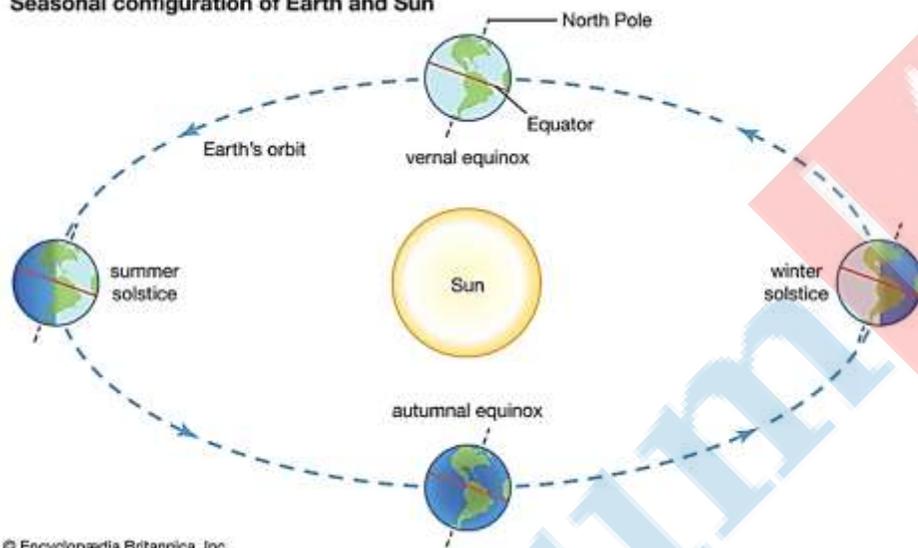

Ans) b

Exp) Option b is the correct answer.

Statements 1 and 2 are incorrect: A vernal equinox is an astronomical event that marks the beginning of spring in the Northern Hemisphere. It occurs around March 20th or 21st each year, when the tilt of Earth's axis is neither toward nor away from the Sun. In the Southern Hemisphere, the vernal equinox corresponds to the beginning of autumn, as the seasons are reversed. In this case, the event is referred to as the autumnal equinox and occurs around September 22nd or 23rd each year.

Statement 3 is correct: During the vernal equinox, the Sun is positioned directly above the Earth's equator. As a result both hemispheres receive an almost equal amount of sunlight. After the spring equinox, the northern hemisphere tilts closer to the sun in March, resulting in more hours of daylight, with earlier sunrises and later sunsets.

Seasonal configuration of Earth and Sun

Source:

[https://www.weather.gov/cle/Seasons#:~:text=The%20Equinox%20\(Vernal%20%26%20Autumnal\)&text=These%20events%20are%20referred%20to,noon%20on%20these%20two%20equinoxes.](https://www.weather.gov/cle/Seasons#:~:text=The%20Equinox%20(Vernal%20%26%20Autumnal)&text=These%20events%20are%20referred%20to,noon%20on%20these%20two%20equinoxes.)

Q.36) Which of the statements given below is correct with reference to Cruise missiles and Ballistic missiles?

- Unlike a Cruise Missile, the flight path of Ballistic Missile is within the atmosphere.
- Compared to Cruise missiles, the payload capacity is much limited in case of Ballistic missiles.
- Both ballistic missiles and cruise missiles can be launched from aircraft, ships, and submarines.
- Prithvi is a Cruise missile while Nirbhay is a Ballistic missile.

Ans) c

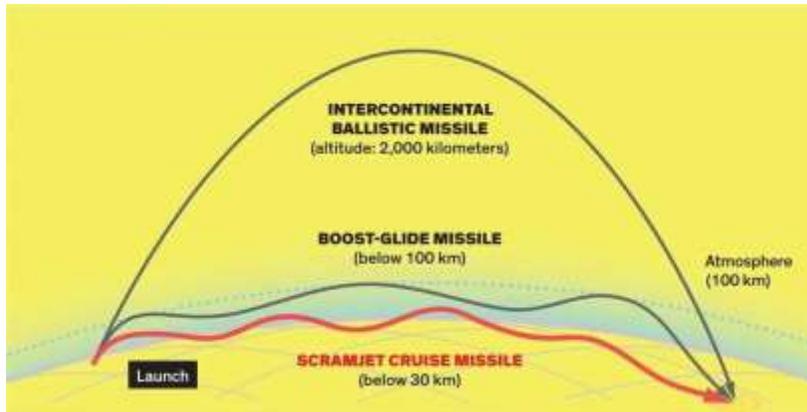

Exp) Option c is the correct answer.

Missile is a weapon that is self-propelled or directed by remote control, carrying conventional or nuclear explosive. There are two major types of Missiles- Ballistic and Cruise.

Any missile is called **Ballistic** when the trajectory it follows is ballistic.

A ballistic trajectory is the path of any object that is launched but with no active propulsion during its actual flight. Thus, in such missiles the trajectory has to be fully determined by a given initial velocity, effects of gravity, air resistance and earth's motion.

Cruise Missile is a guided missile where the target is pre-set. It is basically used against terrestrial targets. Such missiles are designed to deliver a large warhead over long distances with high precision.

Option a is incorrect. Cruise missile flies with in earth's atmosphere and use jet engine technology. Cruise missiles are known specifically for low-level flight which is staying relatively close to the surface of the earth to avoid detection from anti-missile systems. Ballistic missile travels well outside earth's atmosphere. They are launched directly into the upper layers of the earth's atmosphere. They travel outside the atmosphere, where the warhead detaches from the missile and falls towards a predetermined target.

Option b is incorrect. Payload capacity is limited in Cruise missiles. Cruise missile usually carries a single payload while Ballistic missiles can carry more than one payload (Multiple Independently targetable Re-entry Vehicle). Ballistic missile can carry huge payload. For instance, Dongfeng-41 (DF-41) is China's ICBM which have a maximum payload capacity of 2,500 kg.

Option c is correct. Both ballistic missiles and cruise missiles can be launched from aircraft, ships, and submarines in addition to land-based silos and mobile platforms. An advanced variant of BrahMos missile with indigenous sub-systems was test-fired from the Integrated Test Range off Odisha coast in January. A joint venture of India-Russia, the supersonic cruise missile can be launched from all platforms - land, aircraft, ships and submarines.

Option d is incorrect. Prithvi, Agni, Dhanush range missiles are Ballistic while BrahMos and Nirbhay missiles are cruise missiles.

Prithvi is India's first indigenously developed ballistic missile under IGMDP.

It is a short-range ballistic missile (SRBM) with a single-stage, two engines, and liquid-fuel propulsion. The Prithvi missile project has three versions for the Indian Army, Air Force, and Navy to use. Prithvi I, Prithvi II, and Prithvi III are the three variants of the Prithvi missile series that have been developed.

Source: <https://www.britannica.com/technology/missile#ref264829>

Q.37) Consider the following statements about NISAR satellite, recently seen in news:

1. It is a Low Earth Orbit (LEO) observatory designed to map the entire globe in 12 days.
2. It is a collaboration mission between Indian Space and Research Organisation (ISRO) and European Space Agency (ESA).
3. It will be launched by GSLV expendable launch vehicle of ISRO.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) d

Exp) Option d is the correct answer.

NISAR is a joint Earth-observing mission between NASA and the Indian Space Research Organization (ISRO) with the goal to make global measurements of the causes and consequences of land surface changes using advanced radar imaging.

Statement 1 is correct: NASA-ISRO SAR (NISAR) is a Low Earth Orbit (LEO) observatory which will map the entire globe in 12 days and provide spatially and temporally consistent data for understanding changes in Earth's ecosystems, ice mass, vegetation biomass, sea level rise, ground water and natural hazards including earthquakes, tsunamis, volcanoes and landslides.

It carries L and S dual band Synthetic Aperture Radar (SAR), which operates with Sweep SAR technique to achieve large swath with high resolution data. The SAR payloads mounted on Integrated Radar Instrument Structure (IRIS) and the spacecraft bus are together called an observatory.

Statement 2 is incorrect: NISAR is a joint Earth-observing mission between the Indian Space Research Organization (ISRO) and NASA (and not ESA). NASA and ISRO signed a partnership to collaborate and launch NISAR on Sept. 30, 2014. The mission is targeted to launch in 2024. NASA is providing the mission's L-band synthetic aperture radar, a high-rate communication subsystem for science data, GPS receivers, a solid-state recorder and payload data subsystem. ISRO is providing the spacecraft bus, the S-band radar, the launch vehicle and associated launch services.

Statement 3 is correct: The NISAR Observatory will be launched from Satish Dhawan Space Centre (SDSC) SHAR, Sriharikota on the southeast coast of the Indian peninsula, on the GSLV expendable launch vehicle contributed by ISRO. The target launch readiness date is January 2024.

Source: <https://www.isro.gov.in/NISARSatellite.html>

<https://nisar.jpl.nasa.gov/mission/isro-partnership/>

<https://www.thehindu.com/news/national/nisar-satellite-to-map-himalayas-seismic-zones/article66738274.ece>

Q.38) Consider the following statements about Sounding Rockets, often seen in news:

1. Sounding rockets are used to test/probe new components or subsystems to be used in actual satellite or launch systems.
2. Currently, Sounding Rockets utilise mixed both solid and liquid propellant in propulsion systems.
3. Recently, India has launched its first indigenous sounding rocket.
4. RH-200 is a sounding rocket belonging to Rohini series of rockets.

Which of the statements given above are correct?

- a) 1 and 4 only
- b) 1, 2 and 3 only
- c) 2 and 4 only
- d) 1, 3 and 4 only

Ans) a

Exp) Option a is the correct answer.

Space activities in the country started during early 1960s with the scientific investigation of upper atmosphere and ionosphere over the geo magnetic equator that passes over Thumba near Thiruvananthapuram, using small sounding rockets.

Statement 1 is correct: Sounding rockets are used for probing the upper atmospheric regions and for space research. They also serve as easily affordable platforms to test or prove prototypes of new components or subsystems intended for use in launch vehicles and satellites.

Statement 2 is incorrect: Presently Sounding rockets are single to multistage solid propellant rockets (and not mixed propellant rockets). Unlike GSLVs, the Sounding rockets only have solid propellant

propulsion system. Sounding rockets take their name from the nautical term "to sound," which means to take measurements.

Statement 3 is incorrect: The Indian Space Programme began with the launch of the first sounding rocket from Thumba near Thiruvananthapuram, Kerala on 21 November 1963. The first rockets were two-stage rockets imported from Russia (M-100) and France (Centaure). **ISRO started launching indigenously made sounding rockets from 1965.**

Statement 4 is correct: ISRO has developed a series of sounding rockets called Rohini series, important among them being RH-200, RH-300 and RH-560, number in the name indicating the diameter of the rocket in mm. 1545 RH-200 rockets have been launched so far (as of 27 Feb 2023).

Source:

<https://www.isro.gov.in/soundingRockets.html#:~:text=Sounding%20rockets%20are%20one%20or,in%20launch%20vehicles%20and%20satellites>.

https://www.isro.gov.in/100TH_SoundingRockets.html#:~:text=1545%20RH%2D200%20rockets%20have%20been%20launched%20so%20far.

Q.39) Which of the following statements best explain the term 'Quaoar', recently seen in news?

- It is a distant nebula observed by the Hubble space telescope.
- It is a minor planet observed in the Kuiper belt.
- It is a Quantum resistant cryptocurrency.
- It is a newly developed Quantum key distribution technology for Secure Communications.

Ans) b

Exp) Option b is the correct answer.

Astronomers have recently spotted a ring around a Pluto-sized minor planet called Quaoar in the outer reaches of the solar system. It is located in the Kuiper belt, at the edge of our solar system. Quaoar (named after a god of creation in Native American mythology) has a moon of its own, which is known as Weywot. The rings of the planet are positioned at a distance of over seven planetary radii (distance between a planet's centre and its surface) which is much further away from other planets that possess rings.

According to the study, the ring lies far away from the Roche limit – a mathematically determined distance beyond which rings aren't supposed to exist. Planetary rings possess small chunks of ice and other materials that orbit a larger object. Only Saturn, Jupiter, Uranus and Neptune, including two other minor planets, Chariklo and Haumea, are known to possess rings.

Many astronomers and space agencies like ESA (European Space Agency) have recognised it as a dwarf planet. However, International Astronomical Union (IAU) is yet to recognize it as a dwarf planet. According to IAU, a dwarf planet is an object in orbit around the Sun that is large enough to pull itself into a nearly round shape but has not been able to clear its orbit of debris. Aside from Pluto, there are four currently recognised dwarf planets in our Solar System: Ceres, Haumea, Makemake and Eris.

Source: <https://www.thehindu.com/sci-tech/science/astronomers-astonished-by-ring-around-frigid-distant-world-quaoar/article66488828.ece>

<https://www.iau.org/public/themes/pluto/#n6>

Q.40) A term 'MoMo Pregnancy' was recently seen in news. Which one of the following options correctly describes its meaning?

- This type of pregnancy occurs when the twins share the same placenta, amniotic sac and fluid but different umbilical cord.
- This pregnancy occurs as a result of the placenta forming in the uterus without a fetus to support.
- This type of pregnancy occurs when a fertilized egg implants in the fallopian tube instead of the uterus.
- This is a pregnancy in which one egg meets one sperm and one fetus develops.

Ans) a

Exp) Option a is the correct answer.

A US woman recently gave birth to two pairs of identical twins within six months of each other. Such twins, known scientifically as 'MoMo', an abbreviation for monoamniotic–monochorionic, are some of the rarest types of twins. Such MoMo twin pregnancies have a high risk of fetal complications.

Option a is correct: In a MoMo pregnancy, the twins are known to share the same placenta, amniotic sac and fluid. But they have different umbilical cords. They share everything except umbilical cords, which can easily become entangled in a single sac. Unfortunately, there is a high rate of stillbirths associated with MoMo twins. A mother gives birth to MoMo twins when a single fertilised ovum or egg leads to identical twins and these twins share the same placenta and amniotic sac. MoMo twins are mainly identified by ultrasound in the early pregnancy months.

Option b is incorrect: A complete molar pregnancy occurs as a result of the placenta forming in the uterus without a fetus to support. A partial molar pregnancy occurs when two sperm fertilize one egg, but two fetuses do not develop. The placenta is abnormal, and the fetus has too many chromosomes which always results in a spontaneous abortion as the fetus cannot develop safely.

Option c is incorrect: Tubal pregnancy is a type of ectopic pregnancy. This type of pregnancy occurs when a fertilized egg implants in the fallopian tube instead of the uterus. This type of pregnancy is not viable and must be terminated if a miscarriage does not occur naturally on its own.

Option d is correct: Singlet pregnancy is a pregnancy in which one egg meets one sperm and one fetus develops.

Source: https://www.emedicinehealth.com/what_are_the_types_of_pregnancy/article_em.htm
<https://indianexpress.com/article/lifestyle/health/us-woman-birth-momo-twins-rarest-of-rare-pregnancies-condition-8474768/>

Q.41) Consider the following statements about Artemis I, a lunar space mission often seen in news:

1. Its objective is to build a long-term human presence on moon.
2. It is a crewed mission that carried 4 astronauts on board including a woman.
3. It was launched by NASA's Space Launch System (SLS) rocket.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 1 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Artemis I, formerly Exploration Mission-1, will be the first integrated test of NASA's deep space exploration systems: the Orion spacecraft, Space Launch System (SLS) rocket and the ground systems at Kennedy Space Center in Cape Canaveral, Florida.

Statement 1 is correct: Artemis I is the first in a series of increasingly complex missions to build a long-term human presence at the Moon for decades to come. It is named after the sister of Apollo in Greek mythology. It is NASA's successor to the Apollo lunar missions from fifty years ago.

Statement 2 is incorrect: Artemis I is an uncrewed mission of NASA. The primary goals for Artemis I are to demonstrate Orion's systems in a spaceflight environment and ensure a safe re-entry, descent, splashdown, and recovery prior to the first flight with crew on Artemis II. **Artemis II will be a crewed mission carrying 4 astronauts including a woman.**

Statement 3 is correct: It was launched by NASA's Space Launch System (SLS) rocket, the most powerful rocket in the world. SLS is designed specifically for deep space missions for humans. It will travel 280,000 miles from Earth, thousands of miles beyond the Moon over the course of about a four to six-week mission. Source : <https://www.nasa.gov/feature/around-the-moon-with-nasa-s-first-launch-of-sls-with-orion> <https://indianexpress.com/article/explained/explained-sci-tech/attempt-no-3-for-artemis-1-with-the-promise-of-a-new-space-age-nasa-8270447/>

Q.42) We have been using nuclear energy for generation of electricity/power. Many of the nuclear power plants use nuclear fission. However, scientists have also promoted using nuclear fusion for generating power in recent past. In this context, Consider the following statements about the advantages of using nuclear fusion for power generation:

1. It doesn't produce any high activity or long-lived radioactive waste.
2. It doesn't pose any risk of meltdown or nuclear chain reaction.
3. The fuel used for fusion cannot be enriched and exploited to make nuclear weapons.

Select the correct answer using the codes given below.

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Nuclear fusion is the process by which two light atomic nuclei combine to form a single heavier one while releasing massive amounts of energy. Fusion reactions take place in a state of matter called plasma – a hot, charged gas made of positive ions and free-moving electrons with unique properties distinct from solids, liquids or gases. The sun, along with all other stars, is powered by this reaction.

ITER (International Thermonuclear Experimental Reactor) is an international nuclear fusion research and engineering megaproject aimed at creating energy through a fusion process similar to that of the Sun. It uses Tokomak reactor to carry out fusion reaction.

Statement 1 is correct: The Nuclear fusion reactors produce no high activity, long-lived nuclear waste. The activation of components in a fusion reactor is anticipated to be low enough for the materials to be recycled or reused within 100 years. However, fission reactors release radioactive wastes like, uranium mill tailings and spent (used) reactor fuel.

Statement 2 is correct: If any disturbance occurs, it is difficult to reach and maintain the precise conditions necessary for fusion, as the plasma cools within seconds and the reaction stops. Hence, a reactor meltdown cannot occur. The quantity of fuel present in the vessel at any one time is enough for a few seconds only and there is no risk of a chain reaction. Unlike in fission reactors, where risk of meltdown is very high. For example, Chernobyl and Fukushima disaster in fission reactors.

Statement 3 is correct: Fusion doesn't employ fissile materials like uranium and plutonium. (Radioactive tritium is neither a fissile nor a fissionable material.) There are no enriched materials in a fusion reactor like ITER that could be exploited to make nuclear weapons.

Knowledge Base:

Nuclear fission is the process of breaking large atomic nuclei into smaller atomic nuclei to release a large amount of energy. This is generally used in all the nuclear power plants in the world for generating power/electricity. Fusion releases several times the energy generated by fission, making it a far more powerful process.

Source: <https://www.iter.org/sci/Fusion>

<https://www.iaea.org/newscenter/news/what-is-nuclear-fusion>

Q.43) With reference to the Hyperloop Technology, consider the following statements:

1. The Hyperloop is a highly rapid means of mass transit that can move people as well as cargo.
2. It operates on the principle of shooting passenger pods or compartments through an airtight tube that is partially vacuumed.
3. The propulsion is done through magnetic levitation, with the air capsules or pods gliding or levitating over the tracks.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct. A new, extremely quick means of public transit called the hyperloop can move passengers and cargo via a pod in a vacuum. Inside a vacuum tube, a capsule carrying people moves at more than 1200 km/h. There is a low-pressure area inside this vacuum tube. These tubes are supported by sturdy pylons that are capable of withstanding earthquakes and crashes.

Statement 2 is correct. It functions on the principle of shooting passenger pods or compartments through an airtight tube that is partially vacuumed. Regenerative braking, solar energy, and wind power are some of the renewable energy sources utilised.

Statement 3 is correct. The propulsion is done through magnetic levitation, with the air capsules or pods gliding or levitating over the tracks. The train travels along these guided magnetic rails, which can control the vehicle's speed. Since there are no moving parts for any of the engine's functionality, these are clean, smooth, almost noiseless, and can reach very high speeds.

Source: <https://tumhyperloop.com/about-hyperloop/>

Q.44) Consider the following statements regarding fuel cells.

1. To produce electricity efficiently, fuel cells utilize the chemical energy of the fuels.
2. Since there are no carbon dioxide emissions from hydrogen fuel cells, they can address some climate challenges.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. A fuel cell generates electricity cleanly and effectively by utilising the chemical energy of hydrogen or other fuels. Electricity, water, and heat are the only byproducts if hydrogen is the fuel. In terms of the range of potential applications, fuel cells are unique and can run on a variety of fuels and feedstocks and can power devices as big as utility power stations and as small as laptop computers.

Statement 2 is correct. Due to the fact that hydrogen fuel cells emit only water and no carbon dioxide, they can effectively address significant climate change concerns. Compared to traditional combustion-based technologies, which are currently used in many power plants and vehicles, fuel cells offer a number of advantages. In contrast to conventional combustion engines, fuel cells run more efficiently and are capable of directly converting the chemical energy in fuel into electrical energy at efficiencies of more than 60%.

[https://www.energy.gov/eere/fuelcells/fuel-](https://www.energy.gov/eere/fuelcells/fuel-cells#:~:text=How%20Fuel%20Cells%20Work,)%E2%80%94sandwiched%20around%20an%20electrolyte)

[cells#:~:text=How%20Fuel%20Cells%20Work,\)%E2%80%94sandwiched%20around%20an%20electrolyte](https://www.energy.gov/eere/fuelcells/fuel-cells#:~:text=How%20Fuel%20Cells%20Work,)%E2%80%94sandwiched%20around%20an%20electrolyte)

Q.45) Consider the following statements regarding the recently released World Air Quality Report:

1. It was released for the first time in 2022 by the World Health Organisation.
2. India was among top 5 in the list of countries with the worst air quality index.
3. New Delhi has been declared as the most polluted city in the world.

Which of the statements given above is/are **incorrect**?

- a) 1 only
- b) 2 and 3 only
- c) 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is incorrect: The World air quality report was released for the fifth time in 2022. Fifth **Annual World Air Quality Report was released by Swiss air quality technology company, IQAir**, states that roughly 60% of cities in India included in the report recorded annual PM2.5 levels at least seven times higher than the WHO guidelines.

Statement 2 is incorrect: According to the report, **India has ranked eighth in the list of countries with the worst air quality index** and 12 of the 15 most polluted cities in Central and South Asia are in India.

Statement 3 is incorrect: **Lahore was the most polluted city in the world**, followed by Hotan in China, and **Bhiwadi in Rajasthan. New Delhi** is the second most polluted **capital city** in the world, with N'Djamena in Chad topping the list.

Source: <https://www.thehindu.com/news/national/india-ranks-eighth-among-countries-with-the-worst-air-quality-index-world-air-quality-report/article66618661.ece>

Q.46) With reference to the Large Hadron Collider (LHC), consider the following statements:

1. The LHC is world's largest and the most powerful particle accelerator.
2. It is situated in the city of Stockholm.
3. Inside the accelerator, two high-energy particle beams travel in opposite direction, at close to the speed of light before they are made to collide.
4. The LHC is a Joint collaboration of National Aeronautics and Space Administration (NASA) and European Space Agency (ESA).

Which of the above statements are correct?

- a) 1, 2 and 3 only
- b) 2 and 4 only
- c) 1 and 3 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. The largest and most powerful particle accelerator in the world is known as the Large Hadron Collider (LHC). It became operational on September 10, 2008, and it continues to be the most recent addition of the CERN accelerator complex. The LHC, which is operated by CERN (the European Organisation for Nuclear Research), is one of the biggest science experiments in the world.

Statement 2 is incorrect. The 27 km long LHC is a circular pipe that is **situated close to Geneva**, Switzerland, on the Franco-Swiss border. The LHC is made up of a 27-kilometre-long ring of superconducting magnets and other accelerating components that serve to increase the energy of the particles as they travel through the system.

Statement 3 is correct. The LHC consists of a 27-kilometre ring of superconducting magnets with a number of accelerating structures to boost the energy of the particles along the way. **Inside the accelerator, two high-energy particle beams travel at close to the speed of light before they are made to collide. The beams travel in opposite directions in separate beam pipes** – two tubes kept at ultrahigh vacuum. .

Statement 4 is incorrect. The LHC experiment is under control of CERN (European Council for Nuclear Research, and not a collaboration between NASA and ESA

Source: <https://www.home.cern/science/accelerators/large-hadron-collider>
<https://cds.cern.ch/record/532705/files/malo06.pdf>

Q.47) With reference to the Urea, consider the following statements:

1. Nano Urea is developed by the Indian Farmers and Fertilizer Cooperative (IFFCO), a multi-state cooperative society.
2. IFFCO Nano Urea is the only nano fertiliser recognised by the Indian government and included in the Fertilizer Control Order (FCO).
3. Subsidy burden on account of urea import constitutes 60-70% of the overall urea subsidy paid in a year by the governments.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct. The Indian Farmers and Fertiliser Cooperative (IFFCO), a multi-state cooperative society based in New Delhi, developed nano-urea, which the government is promoting as a panacea to help farmers become less dependent on packaged urea. According to field trials, a single 500 ml bottle of Nano Urea liquid can compensate for a 45 kg sack of urea granules.

Statement 2 is correct. The only nano fertiliser recognised by the Indian government and included in the Fertilizer Control Order (FCO) is IFFCO Nano Urea. It is developed and patented by IFFCO. Its availability to crops has increased by more than 80% due to its small size (20-50nm).

Statement 3 is incorrect. Over the years, urea imports have increased steadily, from 5.48 million tonnes (MT) in 2016-17 to 9.8 MT in 2020-21, and the subsidy burden resulting from these imports makes up 26% of the total urea subsidy paid in a year by the government.

Source: <https://www.financialexpress.com/economy/nano-urea-could-save-rs-25000-cr-in-fertilisers-subsidy-annually-nbsphouse-panel/3018109/>
<https://www.iffco.in/en/nano-urea-liquid-fertilizer#:~:text=IFFCO%20Nano%20Urea%20is%20the,least%201%20bag%20of%20Urea.>

Q.48) Consider the following statements about Synthetic Biology:

1. Synthetic Biology is an area of science which involves redesigning organisms for useful purposes.
2. Synthetic Biology can be utilised for developing microorganism which helps in Bioremediation of pollutants.
3. Synthetic Biology doesn't involve introduction of any foreign or new gene to the target organism.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct. Synthetic biology is that field of science which involves redesigning organisms for useful purposes by engineering them to have new abilities. Researchers as well as companies working in synthetic biology harnessing nature's power to address issues in agriculture, manufacturing, and medicine.

Statement 2 is correct. Synthetic biology goals generally seek to redesign organisms so that they can create a substance, such as a medicine or fuel, or acquire a new ability, such as the ability to sense something in the environment. Here are a few examples of what scientists have produced with synthetic biology:

- 1) To remove pollutants from our water, soil, and air, microorganisms are used in bioremediation.
- 2) Beta-carotene, a nutrient normally associated with carrots that prevents vitamin A deficiency, is produced by rice that has been modified. Every year, between 250,000 and 500,000 children lose their vision due to vitamin A deficiency, which also significantly increases the risk of dying from infectious infections.
- 3) A sustainable, eco-friendly substitute to the real roses that perfumers use to develop luxury scents is yeast that has been engineered to produce rose oil.

Statement 3 is incorrect. Synthetic biology and another approach called "genome editing" both require changing an organism's genetic code, although certain people distinguish between the two approaches based on how that alteration is done. **In synthetic biology, large segments of DNA are often stitched together and inserted into the genome of an organism. These synthesized DNA segments may contain genes that are already present in other organisms, or they may be completely new.**

In genome editing, scientists generally use tools to make smaller changes to the organism's DNA. Genome editing tools can be utilized to delete or add small segments of DNA in the genome.

Reverse definition is written in the statement 3 hence it is incorrect.

Source: <https://www.genome.gov/about-genomics/policy-issues/Synthetic-Biology#:~:text=Synthetic%20biology%20is%20a%20field,them%20to%20have%20new%20abilitie%20s>

Q.49) In humans, DNA can be extracted from which of the following specimens?

1. Fingernails
2. Skin
3. Hair
4. Blood
5. Saliva

Select the correct answer using the code given below:

- a) 1, 2, 3 and 4 only
- b) 1, 2, 3 and 5 only
- c) 2, 3, 4 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) d

Exp) Option d is the correct answer.

DNA extraction is used to extract a useable DNA sample for further examination. Commercial extraction kits are available and provide all components necessary for extraction. DNA can be extracted from different biological samples, such as;

- 1) **Fingernail material** - can serve as an important source of DNA. Because of the special composition and structure of fingernails that embody DNA in keratinized cells, DNA extraction procedures are more complex than usual protocols applied for fresh somatic cells.
- 2) **Skin** - DNA can be extracted from skin cells, skin cells from the lower layers produce the best result.
- 3) **Hair** - **Hair roots contain genomic DNA** while hair shafts contain mitochondrial DNA.

4) Blood – **Blood is an excellent source of human DNA.** DNA is present in white blood cells of humans, but **not red blood cells** which lack nuclei.

5) Saliva – **DNA comes from white blood cells and buccal epithelial cells** (cheek cells) in the saliva.

Source: <https://forensicdnaproject.weebly.com/dna-extraction.html#:~:text=%20DNA%20extraction%20%201%20Blood%20%E2%80%93%20The,of%20nucleated%20cells.%20These%20cells%20are...%20More%20>

Q.50) Consider the following statements regarding Siang Uying Festival:

1. It is an important festival of the Khasi community in Meghalaya.
2. During this festival, all male members of a family go on a hunting spree for one week.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: The colourful Siang Uying Festival is an important festival of the Adi community of Boleng, Arunachal Pradesh.

Whereas the most important festival of the Khasis in Manipur is **Ka Shad Suk Mynsiem** or Dance of the joyful heart. It is an annual thanksgiving dance held in Shillong in April.

Statement 2 is correct: In this festival, it is customary for **all male members of a family** to go on a **hunting spree (open season) and stay in the jungles for one week**. When they return home, they come back with various kills such as deers, birds, squirrels, fish etc. The children perform “Yakjong” (house to house) wearing colorful traditional attire and bless the house where they perform.

<https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1902396>

Direction for the following six (6) items:

Read the following **five passages** and answer the items that follow the passages. Your answers to these items should be based on the passages only:

Passage-1

The systematic annihilation of a group of people based on their ethnicity, religion, or nationality is known as genocide. Despite the prevalence of genocidal activities, the international community has struggled to come up with a unified and effective approach to deal with it. One reason for this is that the motives for genocide are complex and varied, ranging from political power struggles to economic interests and ideological differences. In certain cases genocide is carried out with acquiescence of state actors. Another reason is that the means of genocide have evolved over time, the invention of new means of communication making it increasingly challenging to detect and prevent such activities. The genocide is a complex and multifaceted phenomenon. It's like a hydra headed monster which can't be killed at one stroke. Genocide has been a prevalent feature of human history.

Q.1) Based on the passage above, following assumptions have been made:

1. The international community is not focused on putting an end to genocide.
2. The genocide cannot be easily eradicated.
3. A body politic can also has involvement in genocide too.

Which of the above statements is/are valid assumptions?

- a) 1 and 3 only
- b) 2 only
- c) 3 only
- d) 2 and 3 only

Ans) d

Exp) Option d is the correct answer.

The passage states that 'the international community has struggled to come up with a unified and effective approach to deal with it', but from this it can't be assumed that they are not focused on ending genocide. Hence statement 1 is an invalid assumption.

The passage mentions that 'It's like a hydra headed monster which can't be killed at one stroke', so it assumes that it can't be easily eradicated. Hence statement 2 is a valid assumption.

The passage states that 'In certain cases genocide is carried out with acquiescence of state actors.', so this assumes that body politic can also has involvement in genocide too. Hence statement 3 is a valid assumption.

Passage-2

The tea industry in India faces a myriad of complex challenges that threaten its sustainability and profitability. Among the most pressing of these challenges is the issue of climate change, which has led to erratic weather patterns, soil degradation, and reduced yields. The industry is also grappling with rising production costs, low wages for workers, and stiff competition from other tea-producing countries like China and Kenya. In addition, there are growing concerns over the environmental impact of tea cultivation, with critics raising issues around deforestation, soil erosion, and pesticide use. Moreover, the Indian tea industry has been plagued by deep-seated structural issues, including outdated farming practices, inadequate infrastructure, and a lack of modernization. These challenges have resulted in a decline in quality and a loss of market share.

Q.2) Which of the following statements best reflects the corollary to the passage above ?

- a) The tea industry should develop technologies to produce high quality tea.
- b) The tea industry should fix wages for their workers based on international standards.
- c) New farm practices should be adopted from tea Kenya and China.
- d) Government should put a ban on pesticide usage.

Ans) a

Exp) Option a is the correct answer.

The passage states that ‘These challenges have resulted in a decline in quality and a loss of market share’, so the best next step is to produce high quality tea. Hence option a is correct.

The passage mentions that the industry is also grappling with rising production costs, low wages for workers, but from this we can’t conclude that fixing wages based on international standards is the best way ahead. So, option b is incorrect.

The passage states that there is stiff competition from other tea-producing countries like China and Kenya. But we don’t know about their farm practices, so adopting farm practices from Kenya and China is not the best way ahead. Hence option c is incorrect.

The passage mentions ‘critics raising issues around deforestation, soil erosion, and pesticide use’ but putting a ban on pesticide usage is not the best way ahead. Hence option d is incorrect.

Passage-3

As technology advances, it seems that our ability to connect with one another diminishes. Forms of the digital world such as Social media, smartphones, and other devices have given us a false sense of connection, creating an illusion of intimacy where there is none. We have become increasingly reliant on technology to communicate, leaving us ill-equipped to deal with face-to-face interactions in the real world. As a result, our social skills have suffered, leading to higher levels of loneliness, depression, and anxiety. This trend is particularly concerning for young people, who are growing up in a world where virtual communication is the norm. Technology has become an inevitable part of our life. Despite the apparent benefits of technology, it seems that our addiction to it has left us more isolated than ever before. We have become so focused on our screens that we have forgotten how to interact with one another in meaningful ways. This loss of social skills has significant implications for our mental health and well-being, suggesting that we must find a way to find a balance amid two macrocosms.

Q.3) Which of the following statements best reflects the most critical inference drawn from the passage ?

- a) Social media and technology are the primary causes of loneliness, depression, and anxiety.
- b) The younger generation is highly vulnerable to the negative effects of technology.
- c) Face-to-face interaction is crucial for maintaining social skills and mental health.
- d) Striking a balance between digital and real-world life is the key to avoiding the negative effects of technology.

Ans) d

Exp) Option d is the correct answer.

The passage states that ‘Social media, smartphones, and other devices have given us a false sense of connection, creating an illusion of intimacy where there is none’, and our social skills have suffered, leading to higher levels of loneliness, depression, and anxiety. But from this we can’t infer that they are the “primary” cause. Hence option a is incorrect.

The passage discusses that ‘our social skills have suffered, leading to higher levels of loneliness, depression, and anxiety. This trend is particularly concerning for young people’, so option 2 is an aspect of ill effects of the technology on younger generations being discussed, but this is not the most critical inference drawn from the passage, hence option b is incorrect.

Option c is a message being conveyed by the passage, but not the most critical inference. Hence option c is incorrect.

The passage mentions that ‘Technology has become an inevitable part of our life’. So While the passage does discuss the negative effects of technology on social skills and mental health, it ultimately suggests that the key to avoiding these negative effects is to find a balance amid two microcosms (digital world and real world).

Passage-4

The issue of gig workers' rights has become a contentious topic, as the rapidly growing gig economy challenges traditional notions of employment and labor rights. While some argue that gig workers should be considered independent contractors with the right to flexible work arrangements, others contend that they are entitled to the same protections, salary and other benefits as traditional employees. One of the main challenges in defining gig workers' rights is the lack of a clear licit substructure. This has led to ambiguity around issues such as minimum wage, overtime pay, and social security contributions. In addition, gig workers often face issues around job security, access to benefits, and a lack of collective bargaining power.

Q.4) Which one of the following statements best reflects the critical message conveyed by the passage given above?

- a) The conventional employment and labor rights are unfit to today's economy..
- b) Policymakers should develop a legal framework to address issues of gig workers.
- c) Gig workers should have a say in formulating their pay structure like traditional employees.
- d) Government should begin social security contributions for gig workers.

Ans) b

Exp) Option b is the correct answer.

The passage mentions that ‘the rapidly growing gig economy challenges traditional notions of employment and labor rights’, but this doesn't imply that they are unfit. They might need some amendments. Hence option a is incorrect.

The passage discusses that ‘One of the main challenges in defining gig workers' rights is the lack of a clear licit substructure’ hence developing a legal framework will address the issue. Hence option b is correct.

The passage mentions that ‘others contend that they are entitled to the same protections, salary and other benefits as traditional employees’, but this doesn't convey the message that Gig workers should have a say in formulating their pay structure. Hence option c is incorrect.

The passage discusses that ‘This has led to ambiguity around issues such as minimum wage, overtime pay, and social security contributions’, but this does not convey that the Government should begin social security contributions for gig workers. Hence option d is incorrect.

Passage-5

The production of space is a fundamental aspect of social reproduction. The production of space involves the creation and organization of physical space, the creation and organization of social space, and the creation and organization of mental space. Physical space is the material environment in which people

live and work. Social space is the organization of social relationships and activities within physical space. Mental space is the way in which people perceive and experience physical and social space. The production of space is a dynamic process that is shaped by social relations of power and conflict. The dominant classes in society have the power to shape physical and social space according to their interests, while subordinate classes are often excluded from decision-making processes. The struggle over space is therefore an important aspect of social struggle. The production of space is also a spatially uneven process. Different regions and areas are characterized by different patterns of spatial organization and development. The uneven development of space is often linked to social and economic inequalities. The spatial division of labor is an important factor in shaping the spatial organization of society.

Q.5) Consider the following assumptions:

1. Spatial inequality is always the outcome of the production of space.
2. Power distribution can affect the production of space.

Which of the above given assumptions is/are valid?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: The passage states that the uneven development of space is often linked to social and economic inequalities. However, it does not explicitly state that spatial inequality is always the outcome of the production of space.

Statement 2 is correct: The passage explicitly states that the production of space is a dynamic process that is shaped by social relations of power and conflict. It also outlines that “The dominant classes in society have the power to shape physical and social space according to their interests, while subordinate classes are often excluded from decision-making processes.”

Q.6) According to the passage, what is the relationship between spatial division of labor and the spatial organization of society?

- a) Spatial division of labor has no effect on the spatial organization of society.
- b) Spatial division of labor is the only factor that shapes the spatial organization of society.
- c) Spatial division of labor is an important factor in shaping the spatial organization of society.
- d) Spatial division of labor is a factor in the production of mental space.

Ans) c

Exp) Option c is the correct answer.

The passage explicitly states that the spatial division of labor is an important factor in shaping the spatial organization of society. This means that the way in which labor is organized spatially (i.e., the distribution of labor across different regions and areas) has an impact on how the physical and social space is organized.

Q.7) Following Is a Matrix of certain entries. The entries follow a certain trend column wise. Choose the missing entry (?) accordingly.

80H	65G	51E
18B	33C	47E
14B	29C	?

- a) 24 E
 b) 4 D
 c) 15 A
 d) 44 A

Ans) c

Exp) Option c is the correct answer.

The matrix is of the form :

$z+y$	$z+x$	$y+x$
X	y	z
$z-y$	$z-x$	$y-x$

Where x is 18, y is 33, z is 47

$$z+y = 47+33 = 80, \quad z-y = 47-33=14$$

$$z+x = 18+47 = 65, \quad z-x = 47-18=29$$

$$y+x = 33+18 = 51, \quad y-x = 33-18 = 15$$

Similar is for alphabets :

position of E + position of C = position of H

Position of B + Position of E = Position of G

Position of B + Position of C is position of E::

position of E - position of C = position of B

Position of B - Position of E = Position of C

Position of B - Position of C is position of A

Q.8) Consider three statements and three Conclusions given below. You have to take the Statements to be true even if they seem to be at variance from the commonly known facts. Read all Conclusions and then decide which of the given Conclusions Logically follows/follow from the Statements, disregarding the commonly known facts.

Statement 1: All horses are monkeys.

Statement 2: All goats are monkeys.

Statement 3: Some monkeys are wolves.

Conclusion 1: Some wolves are goats,

Conclusion 2: Some horses are wolves.

Conclusion 3: Some monkeys are goats.

Which of the following is/are correct?

- a) Conclusion 1 only
- b) Conclusion 2 only
- c) Conclusion 3 only
- d) Neither Conclusion 1 nor Conclusion 2 nor Conclusion 3

Ans) c

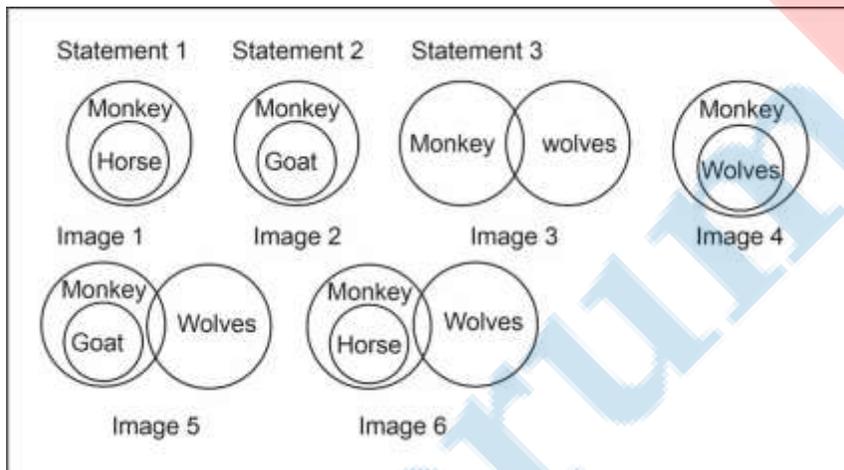

Exp) Option c is the correct answer.

From statement one we get image one. From statement two we get image two. From statement three we get image three and four.

From Image five obtained by image two and three we conclude that some wolves are not goats. Hence conclusion 1 doesn't follow.

From Image six obtained by Image one and three. We conclude that some horses are not wolves hence conclusion 2 doesn't follow.

From Image two we conclude that some monkeys are goats, hence conclusion, 3 follows.

Q.9) In a code language APPLES is written as 3, PARROT is written as 18. How is SCHOOL written in that code language?

- a) 12
- b) 18
- c) 6
- d) 7

Ans) a

Exp) Option a is the correct answer.

For APPLES,

$$(\text{Position of S} - \text{Position of A}) + (\text{Position of E} - \text{Position of P}) + (\text{Position of L} - \text{Position of P}) = (19-1) + (5-16) + (12-16) = 3$$

For PARROT,

$$(\text{Position of T} - \text{Position of R}) + (\text{Position of O} - \text{Position of A}) + (\text{Position of R} - \text{Position of R}) = (20-16) + (15-1) + (18-18) = 18$$

For SCHOOL,

$$(\text{Position of L} - \text{Position of S}) + (\text{Position of O} - \text{Position of C}) + (\text{Position of O} - \text{Position of H}) = (12-19) + (15-3) + (15-8) = 12$$

Q.10) Karan has 24 books on Indian history and Reshma has 18 books on Indian mythology. They want to arrange the books in such a way that each row contains an equal number of books, and each row must contain either only history books or only mythology books. What is the greatest number of books that can be arranged in a row?

- a) 3
- b) 6
- c) 8
- d) 12

Ans) b

Exp) Option b is the correct answer.

No. of history books Karan has = 24

of Mythology book Reshma has = 18

Each row contains an equal no. of books

Each row contains either only history books or only mythology books

We can find this by finding Highest Common Factor (H. C. F)

$$24 = 2 \times 3 \times 4 \times 1$$

$$18 = 2 \times 3 \times 3 \times 1$$

$$\text{HCF} = 6$$

We have four possibilities

- 1) 1 book in each row
- 2) 2 books in each row
- 3) 3 books in each row
- 4) 6 books in each row
- 5) In all other cases, rows will get more than one type of book.

Hence, the greatest number of books that can be arranged in a row is 6.

Q.11) Rohan and Sujit appeared for an exam. Rohan scored 84 marks more than the passing marks and secured 60% marks. Sujit scored 63 marks less than the passing marks and secured 25% marks. What are the maximum marks possible in this exam?

- a) 220
- b) 320
- c) 420
- d) 520

Ans) c

Exp) Option c is the correct answer.

Total Marks in Exam = X

Marks of Rohan = 60% of Total Marks
= $60X/100$

Marks of Sujit = 25% of Total Marks
= $25X/100$

According to the question:

Passing marks of Rohan and Sujit are same.

Marks of Rohit - 84 = Marks of Sujit + 63

$$60X/100 - 84 = 25X/100 + 63$$

$$60X/100 - 25X/100 = 63 + 84$$

$$35X/100 = 147$$

$$X = (147 \times 100)/35$$

$$X = 420$$

Q.12) Rajesh earns a monthly salary and spends 20% of it on food. After spending on food, he donates one-fourth of the remaining salary to charity. If he saves Rs. 9,600 per month, which is equal to half of the balance after spending on food and charity, what is Rajesh's monthly salary?

- a) 28,000
- b) 32,000
- c) 26,000
- d) 30,000

Ans) b

Exp) Option b is the correct answer.

Let the salary be = S

Rajesh earns a monthly salary and spends 20% of it on food.

So, the amount he spends on food every month is $20/100 * S = 0.2 * S$.

The remaining amount after spending on food = $0.8 * S$.

Now, Rajesh donates one-fourth of this remaining amount to charity.

So, the amount he donates to charity is $1/4 * 0.8 * S = 0.2 * S$

The balance amount after spending on food and charity is $0.8 * S - 0.2 * S = 0.6 * S$

We know that Rajesh saves 9,600 per month, which is equal to half of the balance after spending on food and charity. Therefore, we can write:

$$0.6 * S / 2 = 9,600$$

Solving for salary, we get:

$$S = 2 * 9,600 / 0.6 = 32,000$$

Therefore, Rajesh's monthly salary is Rs. 32,000.

Q.13) Keshav can do 30% of work in 54 days; Raghav can do a third of work in 70 days; Sandhya can do 35% of work in 105 days and Vikas can do 15% of the work in 30 days. All four are assigned to complete a work separately. Who will complete the work last?

- a) Keshav
- b) Vikas
- c) Raghav
- d) Sandhya

Ans) d

Exp) Option d is the correct answer.

If Keshav can do 30% of the work in 54 days,

Then he can do 100% of the work in $(54 / 30) * 100 = 180$ days.

For Raghav, if he can do a third of the work in 70 days,

Then he can do 100% of the work in $3 * 70 = 210$ days.

For Sandhya, if she can do 35% of the work in 105 days,

then she can do 100% of the work in $(105 / 35) * 100 = 300$ days.

For Vikas, if he can do 15% of the work in 30 days,
then he can do 100% of the work in $(30 / 15) * 100 = 200$ days.
We can see clearly that Sandhya would complete the work last.

Q.14) A group of friends is going on a road trip to a hill station. While returning, their average speed increases by 25% compared to their average speed while going. If they also spend 2 hours sightseeing during the trip and the total time taken for the entire journey is 47 hours, covering a distance of 1000 km, find the time taken for the return journey.

- 15 hours
- 20 hours
- 25 hours
- 30 hours

Ans) b

Exp) Option b is the correct answer.

Total time taken = 47 hours

Total distance = 1000 km

Average speed while returning = 25% more than the average speed while going

Let average speed while going be $100x$

: Average speed while returning = $125x$

Now, total distance = 1000 km

It means distance while going and returning = 500 km each

Time taken while going = $500/100x$

Time taken while returning = $500/125x$

Time taken while sightseeing = 2 hours

Now, total time taken = $500/100x + 500/125x + 2$ hours = 47 hours

1) $500/100x + 500/125x = 45$ hours

2) $(2500 + 2000)/500x = 45$ hours

3) $4500/500x = 45$ hours

4) $500x = 100$

5) $x = 1/5$

Now, average speed while returning = $125x$

1) Average speed while returning = 25 km/hr

2) Total time taken while returning = $500/25$

3) Total time taken while returning = 20 hours

Direction for the following seven (7) items:

Read the following **five passages** and answer the items that follow the passages. Your answers to these items should be based on the passages only:

Passage-1

The differential preservation or innovation of human societies depends on a complex array of ecological, cultural, and historical factors. Access to domesticable plant and animal species, as well as to favorable climatic and geographic conditions, can provide the necessary foundations for the development of agricultural societies. However, the emergence of such societies also depends on a range of social and cultural factors, including population size, political organization, and the spread of technology and ideas.

The interaction of these various factors is highly contingent and historically specific, making it difficult to identify simple causal relationships between any given set of conditions and the development of a particular society or culture.

Q.15) What is the *central idea* of the above-given passage?

- a) Agriculture is only possible if domesticable plant and animal species are available.
- b) Ecological factors are the most important in the development of societies.
- c) Society's development depends on many ecological, cultural, and historical factors.
- d) Simple causal relationships can explain the development of any society.

Ans) c

Exp) Option c is the correct answer.

The central idea of the passage is that the emergence and development of human societies depend on a complex interplay of multiple factors, including ecological, cultural, and historical factors such as access to domesticable plant and animal species, favorable climatic and geographic conditions, population size, political organization, and the spread of technology and ideas.

Passage-2

Habit formation involves the interplay of multiple cognitive, behavioral, and neurological factors. The basal ganglia, a part of the brain responsible for motor control and reward processing, plays a crucial role in habit formation. As a behavior becomes more habitual, it becomes increasingly automatic and less dependent on conscious decision-making. At the same time, cues, routines, and rewards are important components of habit loops that shape our habitual behaviors. Changing a habit requires identifying and modifying these cues, routines, and rewards. This process involves rewiring the neural pathways that underlie habitual behaviors and developing new habits that can replace old ones. However, the success of habit change also depends on factors such as motivation, willpower, and social support, which can vary widely among individuals and situations. The complex nature of habit formation and change highlights the importance of understanding our own habits and the forces that shape them, in order to cultivate more positive and productive habits and lead a more fulfilling life.

Q.16) Consider the following assumptions:

1. Changing a habit requires rewiring neural pathways
2. Habit change can be done with rewards only.

Which of the above-given assumptions is/are valid as per the given passage?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: It is a valid assumption according to the passage because it highlights the neurological and behavioral factors that underlie habit formation and change. The passage explains that as habits become more automatic, they rely less on conscious decision-making and more on the basal ganglia in the brain. Therefore, changing a habit requires rewiring these neural pathways by developing new habits that can replace old ones.

Statement 2 is incorrect: While cues, routines, and rewards are important components of habit loops, the passage also emphasizes the importance of other factors such as motivation, willpower, and social support in habit change. Moreover, the success of habit change can vary widely among individuals and situations, making it difficult to predict or guarantee success solely by modifying cues, routines, and rewards.

Q.17) Which of the following is the *most logical corollary* of the above passage?

- Habits are solely dependent on conscious decision-making.
- Social support is the most important factor in the process of habit change.
- Developing new habits is the only way to rewire neural pathways.
- The success of habit change depends on a complex interplay of multiple factors

Ans) d

Exp) Option d is the correct answer.

The passage emphasizes the complex nature of habit formation and change, which involves a range of factors such as neural pathways, cues, routines, rewards, motivation, willpower, and social support. Therefore, the most logical corollary of the passage is that the success of habit change depends on a complex interplay of multiple factors, including cognitive, behavioral, and neurological factors.

Passage-3

Innovation is a messy and unpredictable process that is fraught with risk and uncertainty. Successful innovation requires a combination of technological expertise, market knowledge, and managerial skill, as well as a willingness to experiment, take risks, and embrace failure. The process of innovation is also subject to a variety of disruptive forces, such as changing market dynamics, new entrants, and technological discontinuities, which can upend established business models and transform entire industries. Managing these disruptive forces requires a flexible and adaptive approach to innovation, as well as a willingness to cannibalize existing products and business models in order to stay ahead of the curve. Moreover, the success of innovation depends not only on the quality of the technology itself, but also on the ability to create and capture value from that technology. This requires a deep understanding of customer needs, as well as the ability to build effective distribution channels, establish complementary assets, and create strong network effects.

Q.18) Consider the following assumptions:

- Innovation has the power to change the market dynamics
- Ability to withstand failure is important in seeking innovation

Which of the above-given assumptions is/are valid as per the given passage?

- 1 only
- 2 only
- Both 1 and 2
- Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: The passage highlights that the process of innovation is subject to disruptive forces such as changing market dynamics, new entrants, and technological discontinuities, which can upend established business models and transform entire industries.

Statement 2 is correct: The passage emphasizes that successful innovation requires a willingness to experiment, take risks, and embrace failure, suggesting that the ability to withstand failure is an important aspect of the innovation process.

Q.19) What is most logical and critical inference that can be drawn from the above give passage?

- a) Successful innovation requires adaptability, expertise, and value creation amid disruptions.
- b) Innovation depends exclusively on access to the advanced technology.
- c) Disruptive forces are detrimental to innovation and should be shunned altogether.
- d) Success in innovation is achieved only through aggressive risk-taking.

Ans) a

Exp) Option a is the correct answer.

The passage highlights the complexity and unpredictability of the innovation process, and emphasizes the importance of adaptability, expertise, and value creation amid disruptions such as changing market dynamics and new technologies. The passage also suggests that the success of innovation depends on a combination of factors, including technological expertise, market knowledge, and managerial skill, as well as a deep understanding of customer needs and effective distribution channels.

Passage-4

The handloom industry in India has been facing a plethora of multifaceted challenges that have significantly impacted its growth and sustainability. Among the most pressing of these challenges is the lack of government support, which has led to a decline in demand for handloom products and a loss of market share to cheaper, mass-produced alternatives. In addition, the industry is grappling with issues around productivity and technology adoption, as outdated production methods and low levels of mechanization have resulted in low-quality products and limited competitiveness.

Furthermore, the handloom industry has been plagued by issues around labor exploitation, with many workers facing low wages, poor working conditions, and a lack of access to social protections. These factors have contributed to a high turnover rate and a shortage of skilled workers, further hampering the industry's growth potential.

Q.20) Which one of the following statements best reflects the most logical, rational and practical suggestion implied by the passage given above?

1. The government should not provide assistance to cheap alternatives of handloom goods,
2. The handloom industry should focus on skill development of workers to enhance their productivity.
3. Labor laws should be enacted to protect the rights of laborers.
4. Government should provide technological support to the handloom industries.
5. Ad campaigns should be organized to popularize and increase the demand of handloom.

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 1, 3 and 5 only
- c) 2 and 4 only
- d) 1, 2, 3, 4 and 5

Ans) c

Exp) Option c is the correct answer.

The passage states that ‘Among the most pressing of these challenges is the lack of government support, which has led to a decline in demand for handloom products and a loss of market share to cheaper, mass-produced alternatives.’, but this does not suggest that the government is providing support to cheap alternatives of handloom goods, so statement 1 is incorrect.

The passage discusses decline in productivity and the need for skill development, so statement 2 is a logical suggestion. Hence statement 2 is correct.

The passage explains the issues with workers, but it doesn't say that labor laws should be enacted, existing laws can be enforced in a better manner too. Hence statement 3 is incorrect.

The passage mentions that the handloom industry is grappling with technology adoption, so the government providing support to them will help these industries. Hence statement 4 is correct.

The passage does mention that there is a decline in the demand of handloom goods, but nowhere implicitly or explicitly, there is any talk about ad campaigns. His statement five is incorrect.

Passage-5

The Indian Ocean has emerged as an arena for competition between two great powers with the United States' ongoing military drills in the region eliciting concern from Beijing. These exercises, which involve joint operations with allies such as India, Japan, and Australia, have increased in frequency and scale in recent years, causing China to view them as a threat to its interests in the region. The United States has justified its presence in the Indian Ocean by citing concerns over piracy, terrorism, and the need to maintain freedom of navigation. However, China perceives these drills as a provocative move, aimed at containing its rising influence in the region. In response, Beijing has ramped up its naval presence in the Indian Ocean and established a military base in Djibouti, a move that has further escalated tensions between the two countries with both sides increasing their military capabilities and posturing for dominance.

Q.21) Which one of the following statements best reflects the most critical inference that can be made from the passage given above?

- The United States is an advocate of freedom of navigation in the Indian Ocean region.
- The increase of military presence in the Indian ocean is not righteous.
- The exercise of the United States is aimed at curbing Chinese influence in the Indian Ocean region.
- The Indian Ocean region is a strategic site of conflict for The United States and China.

Ans) d

Exp) Option d is the correct answer.

The passage states that ‘The United States has justified its presence in the Indian Ocean by citing concerns over piracy, terrorism, and the need to maintain freedom of navigation’, it's the justification of the US, this can't be inferred that they are the advocates of freedom of navigation in the Indian Ocean region. Hence option a is incorrect.

Both nations are increasing their presence in the region, but it is right or wrong is nowhere implicitly or explicitly discussed in the passage, hence option b is incorrect.

The passage does not explicitly state that they are aimed at curbing China's influence in the region. Hence option c is incorrect.

The passage discusses that ‘The Indian Ocean has emerged as an arena for competition between two great powers with the United States' ongoing military drills in the region eliciting concern from Beijing and the passage explains how it is becoming an area of conflict. So, this is the most critical inference drawn from the passage.

SFG 2023 | LEVEL 2 | Test #45 – Solutions (CSAT) | 

Q.22) Consider two Statements and a Question:

Statement 1: The rank of Durga is better than Esha, Arun and Chetan, but not as good as Bijay.

Statement 2: The rank of Durga is better than Chetan but not as good as Bijay whose rank is better than Esha's.

Question: Which of the five friends Arun, Bijay, Chetan, Durga, Esha scored better?

Which one of the following is correct in respect of the statements and the question?

- Statement 1 alone is sufficient to answer the Question
- Statement 2 alone is sufficient to answer the Question
- Both Statement 1 and Statement 2 are required to answer the Question
- Neither Statement 1 alone nor Statement 2 alone is sufficient to answer the Question.

Ans) a

Exp) Option a is the correct answer.

Statement 1: The rank of Durga is better than Esha, Arun and Chetan, implies she is better than 3 persons, so she has to be at rank 2 or 1, but her rank is not as good as Bijay, implies Bijay's rank is better than Durga's, so Durga is at 2, and Bijay is at rank 1. Rest three can be at 2/3/4.

So Bijay scored better. Statement 1 alone is sufficient to answer the Question

Rank	Name
1	Bijay
2	Durga
3	
4	
5	

Using Statement 2: The rank of Durga is better than Chetan but not as good as Bijay whose rank is better than Esha's.

If we place Durga at rank 4, so that she is better than Chetan, then Chetan will be at rank 5. Now Bijay can be at rank 3 or 2, so that Esha is better than her. But Here nothing is given about Arun's rank. So Arun can be at rank 1 or rank 5. So statement 2 alone is not sufficient to answer the question.

Rank	Name
1	Esha/Arun
2	
3	
4	Durga
5	Chetan

Q.23) Consider two Statements and a Question:

Statement 1: Anita correctly remembers that her company was established in the fourth month of the year. The date was before the 23rd but after the 14th.

Statement 2: Anita's brother correctly remembered that her company was established in the ninth last month of the year, and it was after 19th but before 27th.

Question: On which date and month was the company established?

Which one of the following is correct in respect of the statements and the question?

- Statement 1 alone is sufficient to answer the Question
- Statement 2 alone is sufficient to answer the Question
- Both Statement 1 and Statement 2 are required to answer the Question
- Neither Statement 1 nor Statement 2 is sufficient to answer the Question.

Ans) d

Exp) Option d is the correct answer.

Statement 1: Anita correctly remembers that her company was established in the fourth month of the year. The date was before the 23rd but after the 14th.

So, the month is April,

The dates can be 15,16,17,18,19,20,21,22

Using Statement 1 alone is not sufficient to answer the Question.

Statement 2: Anita's brother correctly remembered that her company was established in the ninth last month of the year, and it was after 20th but before 27th.

So, the ninth last month is April.

The date can be 21,22,23,24,25,26

Statement 2 alone is not sufficient to answer the Question.

Using both the statements:

The month is April.

The dates are 21 and 22.

So even using both the statements we cannot find out what is the date of establishment of the company.

Hence, neither statement 1 statement two are sufficient to answer the Question.

Q.24) The hotel Leelavati spent Rs 68 daily on its laundry department in the month of August. For the first 15 days of the month the average daily payment made to the laundry was Rs 85 and for the last 17 days the average daily payment made to the laundry was Rs 51. What was the money paid to the laundry on the 15th of the month ?

- 42
- 36
- 52
- 34

Ans) d

Exp) Option d is the correct answer.

Here in the average daily payment of the first 15 days is given and that of the last 17 days is given, which implies the 15th day is counted twice.

Month is August, so number of days is 31

Money paid for first 15 days = Rs (15x85) = Rs 1275

Money paid for last 17 days = Rs (17x51) = Rs 867

Money paid for entire month = Rs (31×68) = Rs 2108

Money paid on the 15th of the month = Rs $(1275 + 867) - (2108)$ = Rs 34

Q.25) The cars of Maruti and Honda are owned by Sita and Kavita. Sita's car runs on diesel while Kavitha's car runs on petrol. Kavitha's car gives an average that is 20% higher than Sita's car. The average of a car is calculated as liters per kilometers. The cost of diesel is 60% less than petrol. What is the ratio of cost per kilometer for Kavitha's car to Sita's car?

- a) 3:1
- b) 2:1
- c) 1.92:1
- d) 1:1.8

Ans) a

Exp) Option a is the correct answer.

Let the cost of petrol be p

Cost of diesel will be 40% less than petrol, as petrol is 60% of its price higher than diesel,

So, cost of diesel is $0.4p$

Let the average of Sita's car is y liter per km

So, the average of Kavitha's car is $\{y + (y \times 20)/100\} = 1.2y$

Cost per kilometer = (Average in liter per km) \times (cost of fuel)

Cost per kilometer for Sita's car = $0.4p \times y = 0.4py$

Cost per kilometer for Kavitha's car = $p \times 1.2y = 1.2py$

Ratio of cost per kilometer for Kavitha's car to Sita's car = $1.2py/0.4py = 3:1$

Q.26) A juice shop bought a combined total of 25 mango shakes and papaya shakes bottles. He marked up the mango shakes by 20% on the cost price, while each papaya shake was marked up by Rs 20. He was able to sell 75% of the mango shakes bottles and 2 papaya shakes bottles and make a profit of Rs490. The remaining mango shakes bottles and 3 papaya shakes bottles could not be sold by him. What is the overall profit or loss percentage if he gets no return on unsold items and it is known that a papaya shake bottle costs 50% of a mango shake bottle?

- a) 16.5% profit
- b) 14.3 % loss
- c) 18.4% profit
- d) 20.3% loss

Ans) b

Exp) Option b is the correct answer.

Given, he sold 2 papaya shakes bottle and he was left with 3 papaya shakes bottle,

Total bottles of papaya shakes bought was = $(3+2) = 5$

Total number of mango shake bottles bought was = $(25-5) = 20$

Total number of mango shakes bottle sold were 75% = $20 \times 75/100 = 15$

Total number of papaya shakes bottle sold were 2

Since each papaya shake bottle was marked up by Rs20, and he sells two papaya shake bottles, so he makes a profit of Rs $(20 \times 2 = 40)$ on sale of papaya shake bottles.

He makes a total profit of Rs 490

So, the total profit made on sale of mango shake bottle is $(490 - 40)$ Rs 450

Profit per mango shake bottle = $450/15 = \text{Rs } 30$

He marked up the mango shakes bottle by 20% on the cost price, implies 20% of the cost price of, a go shake bottle is Rs 30

So, using unitary method, the cost price of one mango shake bottle is = Rs 150

Sale price is a mango shake bottle is = $(150+30) = \text{Rs } 180$

Given, papaya shake bottle costs 50% of a mango shake bottle, so cost do papaya shake bottle is = Rs 75

Papaya shake bottle is marked up by Rs 20, so sale price of one papaya shake bottle is Rs $(75+20)=95$

Total cost price for all = (number of papaya shakes bottle bought x price of one papaya shake bottle) + (number of mango shakes bottle bought x price of one mango shake bottle)

= $(5 \times 75) + (20 \times 150) = \text{Rs } 3375$

Total revenue earned = (number of papaya shakes bottle sold x sale price of one papaya shake bottle) + (number of mango shakes bottle sold x sale price of one mango shake bottle)

= $(2 \times 95) + (15 \times 180) = \text{Rs } 2890$

Loss = $3375 - 2890 = \text{Rs } 485$

Loss percentage = $(485/3375) \times 100 = 14.3\%$

Q.27) Aman completes two thirds of a certain job in six days. Babitha can complete one third of the same job in eight days and Chetan can complete three fourth of the same work in 12 days. All of them start working together but after four days Aman and Chetan leave the job. How long will it take for Babitha to complete the remaining work alone?

- a) 9.33 days
- b) 5.33 days
- c) 3.33 days
- d) 7.33 days

Ans) c

Exp) Option c is the correct answer.

Aman completes $\frac{2}{3}$ of the job in 6 days, so he completes full job in $\{6 / (\frac{2}{3})\} = 9$ days.

Babitha can complete one third of the same job in eight days, so she completes full work in $\{8 / (\frac{1}{3})\} = 24$ days and Chetan can complete three fourth of the same work in 12 days, so he completes full work in $\{12 / (\frac{3}{4})\} = 16$ days

They work together for four days,

So four days work = $4\{(\frac{1}{9}) + (\frac{1}{24}) + (\frac{1}{16})\} = \frac{31}{36}$ of the work

Rest work = $1 - (\frac{31}{36}) = \frac{5}{36}$, which Babitha has to do alone,

Using unitary method, Time taken by Babitha = $24 \times (\frac{5}{36}) = 3.33$ days.

Q.28) A shooter at Nandi Hills fires from there at a difference of 11 minutes 45 seconds. Shyam is traveling towards Nandi Hills in his car and he hears the second firing after 11 minutes. What is the speed of Shyam's car?

- a) 90km/h
- b) 72 km/h
- c) 108 km/h
- d) 81 km/h

Ans) d

Exp) Option d is the correct answer.

The speed of sound is 330 m/second

There is difference of (11 minutes 45 seconds - 11 minutes) = 45 seconds in hearing the firing

So, the distance covered by sound in 45 seconds is equal to distance covered by Shyam in 11 minutes

distance covered by sound in 45 seconds = $330 \times 45 = 14850$ m

Distance covered by Shyam is 14850 m

This distance Shyam covered in 11 minutes

So, speed of car in which he is traveling is $14850/11 = 1350$ meter per minute = 81 km per hour.

Q.29) Nine friends Aman, Barun, Chaman, Dev, Eshan, Farhan, Gautam, Hira, Ishan are sitting on first bench in the classroom facing North. Barun is at one end of the row. Hira is seated adjacent to both Farhan and Gautam. Chaman is to the immediate right of Dev and third place to the right of Eshan. Aman is immediately to the left of Farhan. Farhan is at the third place to the left of Braun. Who is sitting at second from the left end in the row?

- a) Ishan
- b) Aman
- c) Dev
- d) Farhan

Ans) a

Exp) Option a is the correct answer.

Step 1: Barun is at one end of the row, and Farhan is at the third place to the left of Barun. So Barun has to be at index 9, so that Farhan is to the left of him at index 6.

Step 2: Aman is immediate left of Farhan .so he is at index 5.

Step 3: Hira is seated adjacent to both Farhan and Gautam. So, he has to be at index 7, and Gautam at index 8

Step 4: Chaman is third place to the right of Eshan. So, Eshan has to be at index 1, then Chaman will be at index 4.

Step 5: Chaman is to the immediate right of Dev. So, Dev is at index 3.

Now we are left with one position and one person, so Ishan is at index 2.

So, he is second in the row from the left end.

Index	1	2	3	4	5	6	7	8	9
person	Eshan	Ishan	Dev	Chaman	Aman	Farhan	Hira	Gautam	Barun

Q.30) Consider two Statements and a Question.

Statement-1: Reddy is son of Sharma who is wife of Varun. Patel is son of Shah who is father in law of Sharma.

Statement-2: Varun is brother of Patel and son of Shah who is father in law of Sharma, who is mother of Reddy.

Question: How is Patel related to Reddy?

SFG 2023 | LEVEL 2 | Test #45 – Solutions (CSAT) | ForumIAS

Which one of the following is correct in respect of the statements and the question?

- Statement-1 alone is sufficient to answer the Question.
- Statement-2 alone is sufficient to answer the Question.
- Either Statement-1 alone or Statement-2 alone is sufficient to answer the Question.
- Neither Statement-1 alone nor Statement-2 alone is sufficient to answer the Question.

Ans) a

Exp) Option a is the correct answer.

Step 1: Reddy is son of Sharma who is wife of Varun. From this we get Image 1.

Step2: Patel is son of Shah, from this we get Image 2.

Step3: Shah is father in law of Sharma, from this we get Image 3.

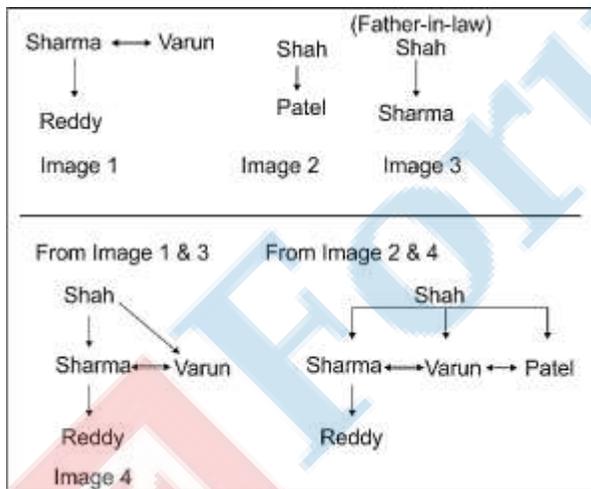

From image 1 and 3 we get image 4, which makes it evident that Varun is the son of Shah and Sharma is the daughter in law of Shah.

From Image 2 and 4, we get Image 5, which makes it clear that Patel is the brother of Varun and Reddy is the son of both Sharma and Varun. So, Patel is the paternal uncle of Reddy.

Hence statement 1 alone is sufficient to answer the Question.

Codes:

- : Female
- : Male
- ↔ : Sibling
- ↔ : Spouse
- : Child

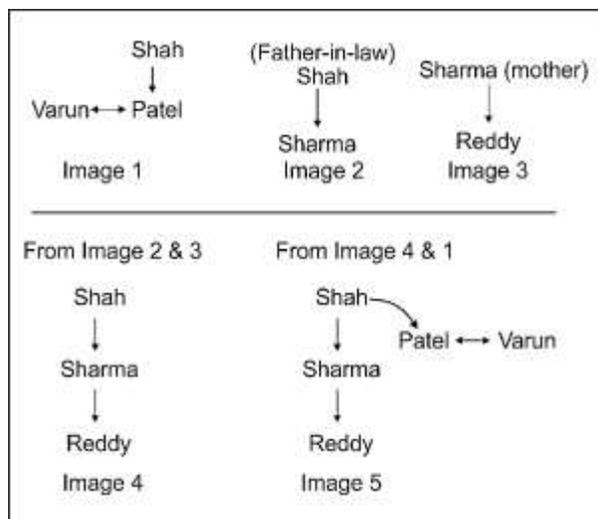

Using Statement 2: Step 1: Patel is son of Shah and Varun is brother of Patel, from this we get Image 1.

Step 2: Shah is father in law of Sharma, from this we get Image 2.

Step 3: Sharma is the mother of Reddy. From this we get Image 3.

From Image 2 and 3, we get Image 4.

From image 4 and 1, we get image 5. From image 5, we get that Patel and Varun are sons of Shah, But what is the relation of Sharma with Patel and Varun is not known, so Patel might be father or Uncle of Reddy. So, the relation can't be known. Hence Statement 2 alone is not sufficient to answer the Question.

**Direction for the following eight (8) items:**

Read the following **seven passages** and answer the items that follow the passages. Your answers to these items should be based on the passages only:

Passage-1

Cricket is a game of time, a game of patience, a game of possibility. The bowler has time to run up, the batsman has time to get into position, the ball has time to come down, the fielder has time to move, and time is allowed for everything that happens. The bowler can vary his pace, his length and his direction. The batsman can play forward, back, off his legs, over the top, square of the wicket, straight, and so on. The fielders can move around in any position, but always with a purpose. But cricket is also a game of surprises. Just when you think you have it all worked out, the unexpected happens. The game is never over until it is over. Cricket is a game that demands discipline, self-control, concentration and fitness. It is a game that requires courage, determination and skill. It is a game that can be played at the highest level by men and women of all ages, races and backgrounds. It is a game that can be played for fun or for serious competition.

But cricket is also more than just a game. It is a way of life, a philosophy, a metaphor for the struggle of human existence. It is a game that has reflected and influenced the social, political and cultural life of many nations. It is a game that has brought people together, that has inspired literature, music and art. It is a game that has given joy and pain, triumph and despair, to millions over the years. It is a game that is forever changing and yet forever the same.

Q.31) Which statement among the following best represents the key message of the passage?

- Cricket is solely a sport that requires skill and dedication.
- Cricket is a game that unites people and influences various aspects of life.
- Cricket is an exclusive sport, played only by a select few.
- Cricket is a game with few variations or challenges.

Ans) b

Exp) Option b is the correct answer.

The passage not only discusses the gameplay and strategies of cricket but also emphasizes its broader impact on society, culture, and the human experience. By describing cricket as a way of life, a philosophy,

and a metaphor for human existence, the passage highlights the game's ability to bring people together, inspire various forms of art, and reflect the social, political, and cultural life of many nation.

Passage-2

India has been at the forefront of global efforts to conserve its big cat populations, including tigers, lions, and leopards. The country has implemented a range of initiatives, including habitat conservation, anti-poaching measures, and community-based conservation programs. In addition, India has launched several successful tiger reintroduction programs and established protected areas and wildlife corridors. But policymakers should expand their efforts. Despite these efforts, India's big cat populations continue to face significant threats from habitat loss due to expansion of human settlements, agriculture and infrastructure development that has led to fragmentation of forest habitats. Big cats are highly valued for their skins, bones which are used in traditional medicines and luxury goods which make them vulnerable to trade.

Q.32) Which of the following statements best reflect the rational, plausible and practical implications that can be derived from the passage given above?

1. The government initiatives are not sufficient to protect big cats.
2. The increased man animal conflict is a big threat to big cat conservation.
3. Illegal wildlife trade poses a difficult challenge to protect the big cat population.
4. Investing in conservation initiatives is vital for big cats' long term survival.

Select the correct answer using the code given below:

- a) 2 and 3 only
- b) 1 and 4 only
- c) 1 and 2 only
- d) 2, 3 and 4 only

Ans) d

Exp) Option d is the correct answer.

The passage discusses that the government has launched various initiatives, and some have been successful too. So, this does not imply that they are insufficient to protect big cat populations. Hence statement 1 is incorrect.

The passage explains that 'Despite these efforts, India's big cat populations continue to face significant threats from habitat loss due to expansion of human settlements, agriculture and infrastructure development that has led to fragmentation of forest habitats. , so this implies that the increased man animal conflict is a big threat to big cat conservation. Hence statement 2 is correct.

The passage discusses that 'Big cats are highly valued for their skins, bones which are used in traditional medicines and luxury goods which make them vulnerable to trade'. Hence it implies that Illegal wildlife trade poses a difficult challenge to protect the big cat population. Hence statement 3 is correct.

The passage mentions that 'policymakers should expand their efforts', so this implies that Investing in conservation initiatives is vital for big cats' long term survival. Hence statement 4 is correct.

Passage-3

As the world continues to grapple with the effects of climate change, there is a growing awareness that our current economic systems may not be sustainable. Capitalism, with its emphasis on perpetual growth and profit maximization, has driven a relentless pursuit of resources and consumption. This has led to the depletion of natural resources and the degradation of the environment, which in turn has created a

vicious cycle of further resource exploitation to maintain economic growth. The current economic model assumes that growth is necessary for prosperity, but this assumption ignores the limits of the planet's resources and the ecological consequences of overconsumption.

Q.33) Which of the following statements best reflects the crux of the passage ?

- a) There is an urgent need to develop alternative economic systems.
- b) Economic growth is necessary for prosperity.
- c) Capitalism is the cause of unsustainable development.
- d) The overconsumption is a concern for the planet's resources.

Ans) a

Exp) Option a is the correct answer.

The passage discusses the limitations of the current economic system and the need to develop alternative economic systems that take into account social and environmental factors. Therefore, the crux of the passage is that there is a need to develop alternative economic systems. Hence Option a is correct.

The passage mentions that 'The current economic model assumes that growth is necessary for prosperity,' this is not the crux, just the assumption. Hence option b is incorrect.

The passage does discuss the impact of capitalism on the environment and economic development, but the crux is not this. Hence option c is incorrect.

The passage argues that overconsumption has led to the depletion of natural resources and the degradation of the environment. So, this is an aspect being discussed, but not the crux. Hence option d is incorrect.

Passage-4

The Taliban's recent takeover of Afghanistan has triggered widespread concern and alarm in the international community. The group's previous rule, which lasted from 1996 to 2001, was marked by extreme levels of human rights abuses, particularly against female gender and the communities which have lesser populations. Reports suggest that the Taliban has already begun to implement similar policies, including restrictions on women's rights and freedoms, and the targeting of journalists, activists, and other perceived opponents. Furthermore, the Taliban's return to power has raised concerns about regional stability and the potential for increased terrorist activity. The group has long been associated with terrorism and has provided a safe haven for several extremist groups, including Al-Qaeda. But the Taliban has expressed a willingness to engage with other countries and has indicated that it may be open to a power-sharing agreement.

Q.34) Based on the passage following assumptions have been made :

1. The terrorist government does not value the rights of women and ethnic minorities.
2. Journalists are a significant threat to Taliban rule.
3. The Taliban's rule is a breeding ground for terrorist organizations.
4. Power sharing agreement brings political stability.

Which of the above assumptions is/are valid ?

- a) 2 only
- b) 3 only
- c) 2 and 4 only
- d) 1, 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

The passage talks about Taliban's rule, so we can't conclude about "the" terrorist organizations in general. Hence statement 1 is an invalid assumption.

The passage does mention that the Taliban targets journalists, but they can be targeted due to their ideologies which are not appreciated by the Taliban. So, we can't assume that they are a significant threat to them. Hence statement 2 is an invalid assumption.

The passage states that 'The group has long been associated with terrorism and has provided a safe haven for several extremist groups', so statement 3 is a valid assumption.

The passage mentions that the Taliban is open to Power sharing agreement. But this does not imply that this agreement will bring political stability. Hence statement 4 is an invalid assumption.

Passage-5

Despite efforts to bring in a casteless society, the caste system is deeply ingrained in Indian society, and its legacy continues to shape social, economic, and political relationships. Despite constitutional guarantees and affirmative action policies, caste-based discrimination and inequality persist in various forms, including access to education, employment, and healthcare. Furthermore, the caste system remains a powerful force in shaping cultural and social norms, with many individuals continuing to identify strongly with their caste and the associated cultural practices. The intergenerational transmission of caste-based prejudices and biases also poses a significant challenge to creating a casteless society. As such, while the aspiration of a casteless society remains an important goal, it must be recognized that achieving this will require significant efforts to address the structural and cultural barriers that perpetuate caste-based discrimination and inequality.

Q.35) Which of the following statements best reflects the central idea being conveyed by the passage above?

- a) The concept of casteless society has been a long-standing aspiration for all in India.
- b) The reality of achieving a truly casteless society remains elusive.
- c) The aim of Indian society is to eliminate systemic discrimination and oppression.
- d) The Constitutional guarantees are not sufficient to eradicate inequalities in the society.

Ans) b

Exp) Option b is the correct answer.

The passage begins on the note that 'Despite efforts to bring in a casteless society, the caste system is deeply ingrained in Indian society', so obviously casteless society is an aspiration, but not for all. Hence option a is incorrect.

The passage mentions that 'while the aspiration of a casteless society remains an important goal, it must be recognized that achieving this will require significant efforts', and in the beginning also it's stated that despite efforts discrimination persists. Hence it is conveyed that 'The reality of achieving a truly casteless society remains elusive(difficult). Hence option b is the central idea, that we want to have a casteless society, efforts are being made, but it is still difficult to achieve. So, option b is correct.

Option c is an idea being discussed, that is what we want, but it is not the central idea. Hence option c is incorrect.

The passage mentions that 'Despite constitutional guarantees and affirmative action policies, caste-based discrimination and inequality persist in various forms,' so this does not refer to the fact that they are insufficient, might be they are not implemented strictly. So, option d is incorrect.

Passage-6

Gun culture in America has long been a topic of heated debate, as the nation struggles to balance the right to bear arms with the need to protect its citizens. Supporters of gun ownership see guns as a fundamental part of American culture, with the Second Amendment enshrining the right to bear arms as a cornerstone of democracy. Gun ownership is often tied to concepts of freedom and individualism, with proponents arguing that the ability to protect oneself and one's property is a basic human right. However, opponents of gun ownership see the proliferation of firearms as a key factor in the nation's epidemic of gun violence. From mass shootings in schools and public spaces to the everyday violence of urban crime, the presence of guns in American society is seen as a major threat to public safety. Calls for gun control legislation have been met with resistance, as gun rights advocates see such measures as an infringement on their personal liberties.

Q.36) With reference to the above passage, the following assumptions have been made:

1. Gun ownership is an essential aspect of American identity.
2. The Second Amendment is an outdated relic of the past.
3. The Americans do not support gun control legislation.
4. Gun control measures are necessary to reduce gun violence.

Which of the above assumptions are valid?

- a) 1 and 2 only
- b) 1, 3 and 4 only
- c) 2 and 3 only
- d) 1 and 4 only

Ans) d

Exp) Option d is the correct answer.

The passage states that 'Second Amendment enshrining the right to bear arms as a cornerstone of democracy.' So, it assumes that Gun ownership is an essential aspect of American identity as it is backed by law. Hence statement 1 is a valid assumption.

The passage states that the second amendment has given the right to bear arms, which is a cornerstone of democracy, though the right to bear arms is debated, but we cannot say that the second amendment is an outdated relic of the past. Hence statement 2 is an invalid assumption.

It is mentioned in the passage 'Calls for gun control legislation have been met with resistance', so it means that there are some groups who are calling for legislation but there are some groups who are opposing this legislation. It implies that Americans are divided on the need for legislation to control gun culture. Hence statement 3 is an invalid assumption as it has used 'The Americans' which implies all.

In the passage it is mentioned that 'From mass shootings in schools and public spaces to the everyday violence of urban crime, the presence of guns in American society is seen as a major threat to public safety', so it assumes that 'Gun control measures are necessary to reduce gun violence' as gun is leading to increased violence. Statement 4 is a valid assumption.

Passage-7

The Israel-Palestine conflict is one of the most enduring and complex geopolitical issues of our time. At its core, the conflict revolves around competing claims to the same land, with Israelis and Palestinians both seeking to establish their own independent states. However, the history and politics of the region are deeply intertwined, and there is hard won solution to the conflict.

One of the most significant issues in the conflict is the status of Jerusalem, which both Israelis and Palestinians claim as their capital. The city is home to holy sites revered by both Jews and Muslims, making it a highly symbolic and emotionally charged issue. Efforts to resolve the conflict have been complicated by competing claims to the city and the difficulty of finding a solution that satisfies both sides. Another issue is the ongoing Israeli occupation of Palestinian territories, which has been condemned by the international community as a violation of international law. Israel argues that it has a right to defend itself against terrorism and to protect its citizens, while Palestinians argue that the occupation has resulted in the displacement of thousands of people and the destruction of their homes and communities.

Q.37) What is the most logical and crucial message conveyed by the passage?

- The international community should impose sanctions against Israel.
- The Israel-Palestine conflict is an intractable issue with no easy solution.
- Making Jerusalem, the combined capital of both Israel and Palestine will end the conflict.
- Protecting citizens and countering terrorism is a priority for countries.

Ans) b

Exp) Option b is the correct answer.

In the passage it's mentioned that the international communities have condemned the Israeli occupation of Palestinian territories, but overall what is the stand of the international community is not known. Hence option a is not the crucial message being conveyed. Hence option a is incorrect.

Throughout the passage, the author describes the complexity and difficulty of the Israel-Palestine conflict, emphasizing that there is no easy solution to the conflict. The passage means that the history and politics of the region are deeply intertwined and there is a hard won solution (no easy solution) to the conflict which directly conveys that the Israel Palestine conflict is an intractable issue with no easy solution. Hence, option b is correct.

In the passage, it's stated that one of the significant issues in the conflict is the status of Jerusalem, so obviously resolving the issue of Jerusalem will help in ending the Israel Palestine conflict, but it will not end the Israel Palestine conflict because there are other issues also. Hence, option c is incorrect.

The passage states that 'Israel argues that it has a right to defend itself against terrorism and to protect its citizens,' this is the argument of Israel, but it can't be generalized for all the countries. Hence option d is incorrect.

Q.38) With reference to the above passage, the following assumptions have been made:

- Both Israelis and Palestinians have legitimate claims to the same land.
- History and politics of the region is the cause of ongoing conflict between Israel and Palestine.
- Both Israeli and Palestinian have equal right to create their sovereign states.

Which of the above assumptions is/are valid?

- 1 only
- 2 only
- 1 and 2 only
- 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The passage states that 'the conflict revolves around competing claims to the same land', so it assumes that both have legitimate claims to the same land. Hence statement one is a valid assumption.

In the passage it's mentioned that the history and politics of the region are deeply intertwined, and there is hard won solution to the conflict, but it doesn't indicate towards it being the cause of conflict. Statement 2 is an invalid assumption.

The passage mentions that 'Israelis and Palestinians both seek to establish their own independent states', but from this it can't be assumed that both have equal right to create their sovereign states. Hence statement 3 is an invalid assumption.

Q.39) Six friends A, B, C, D, E and F participated in a 100-meter race and finished at different times. D is not the slowest runner. E finished the race first. F finished faster than D but slower than B. C is the 3rd fastest runner. D finished faster than A. Who finished the race last?

- a) A
- b) B
- c) C
- d) D

Ans) a

Exp) Option a is the correct answer.

E is the fastest.

Since C is the 3rd fastest runner, and E is the fastest, there must be a runner between E and C. The order so far: $E > ? > C$.

A is slower than C, so A cannot be the second-fastest runner. Since D is faster than A, D cannot be the second-fastest runner either.

So, B must be the second-fastest runner. The order now is $E > B > C$.

F is faster than D but slower than B. So, F must be the fourth-fastest runner. The order now is $E > B > C > F$.

D is faster than A, so D must be the fifth-fastest runner, and A must be the slowest.

The final order is $E > B > C > F > D > A$.

Therefore, A finished the race last.

Q.40) Sanjay is the husband of Kavita. Anil is the brother of Divya. Anil is the only son of Balram. Divya is the sister of Kavita. Rakesh is married to Divya. Manoj is the father of Rakesh. Neha is the daughter of Kavita. How is Divya related to Sanjay?

- a) Sister
- b) Sister-in-law
- c) Mother-in-law
- d) Daughter

Ans) b

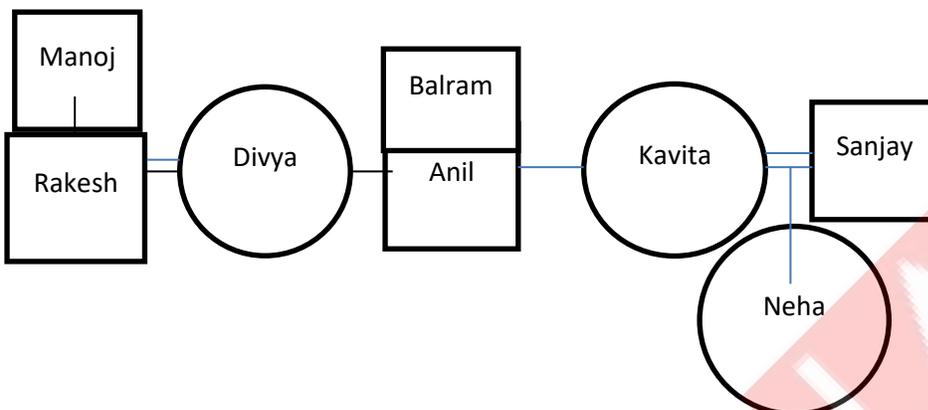

Exp) option b is the correct answer.

Given information:

- 1) Sanjay is the husband of Kavita.
- 2) Anil is the brother of Divya.
- 3) Divya is the sister of Kavita. Kavita, Anil, and Divya are siblings.
- 4) Rakesh is married to Divya.

- 5) Anil is the only son of Balram.
- 6) Manoj is the father of Rakesh.
- 7) Neha is the daughter of Kavita.

We can draw the following:

From the above we can see that Divya is the sister-in-law of Sanjay.

Q.1) Which of the following are the products of photosynthesis process?

1. Oxygen
2. Glucose
3. Carbon dioxide
4. Nitrogen

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 1, 2 and 4 only
- c) 2 and 3 only
- d) 1, 2, 3 and 4

Ans) a

Exp) Option a is the correct answer.

Photosynthesis is the process by which green plants, algae, and some bacteria convert light energy from the sun into chemical energy that can be used as food. Additionally, photosynthesis plays a significant role in regulating the Earth's climate, as it removes carbon dioxide from the atmosphere and produces oxygen.

Photosynthesis Reaction:

Option 1 is correct: Oxygen is produced during the light-dependent reactions that occur in the thylakoid membrane of the chloroplasts. These reactions use energy from sunlight to split water molecules into hydrogen ions and oxygen.

Option 2 is correct: Glucose is produced during the light-independent reactions (also called the Calvin cycle), which occur in the stroma of the chloroplasts.

Option 3 is incorrect: Carbon dioxide is the reactants of photosynthesis, not the product.

Options 4 is incorrect: Nitrogen is not the product of photosynthesis.

Source: <https://www.biologyonline.com/dictionary/photosynthesis>

Q.2) Which of the following statements accurately defines the concept of Gause's law in ecology?

- a) Two species competing for the same resources can coexist indefinitely.
- b) Two species competing for the same resources will eventually evolve to avoid competition.
- c) Two species competing for the same resources cannot coexist indefinitely.
- d) Two species competing for the same resources will form a symbiotic relationship.

Ans) c

Exp) Option c is the correct answer.

Gause's law, also known as the competitive exclusion principle, states that **two species competing for the same resources cannot coexist indefinitely**. The law suggests that one species will outcompete and eventually displace the other, leading to the extinction of the weaker species. The law has been supported by numerous ecological studies and has significant implications for conservation efforts and management of natural resources. Additionally, there are some exceptions to the law, such as instances where species partition resources or occupy different niches to avoid direct competition.

Source: <https://www.thehindu.com/opinion/op-ed/what-is-gauses-law-in-ecology/article25551522.ece>

Q.3) Which of the following statements is/are true regarding ecological pyramids?

1. Saprophytes are not represented in ecological pyramids.
2. The base of ecological pyramids is always occupied by autotrophs.
3. The Pyramid of energy is always upright.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Ecological pyramids are graphical representations of the structure of an ecosystem. These pyramids depict the trophic structure and flow of energy and nutrients through the different levels of an ecosystem. There are three types of ecological pyramids: Pyramid of numbers, Pyramid of biomass and Pyramid of energy.

Statement 1 is correct: Saprophytes are organisms that feed on dead and decaying matter, and they are not represented in ecological pyramids as they do not occupy a trophic level.

Statement 2 is correct: The base of ecological pyramids is always occupied by autotrophs, which are organisms that produce their own food through photosynthesis or chemosynthesis.

Statement 3 is correct: Energy pyramid is always upright, as it reflects the laws of thermodynamics and the fact that energy is lost at each transfer to another trophic level. The available energy decreases as we move up the pyramid, which results in the pyramid being upright.

Source: <https://egyankosh.ac.in/bitstream/123456789/16250/1/Unit-5.pdf>

<http://science.halleyhosting.com/sci/ibbio/ecology/notes/pyramid.htm>

Q.4) Consider the following statements with reference to food chains in ecosystems:

1. A food chain illustrates a sequence of eaten and being eaten in an ecosystem.
2. There is no restriction on number of trophic levels in a food chain.
3. A food chain illustrates number of organisms eaten at each trophic level.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

A food chain is the sequence of transfers of matter and energy in the form of food from organism to organism. A food chain starts with producers and ends with top carnivores.

Statement 1 is correct: The sequence of eaten and being eaten, produces transfer of food energy which is known as food chain. Hence, a food chain illustrates a sequence of organisms that feed on one another.

Statement 2 is incorrect: The number of trophic levels in a food chain depends upon the net available energy at the end of the trophic level. Since so little energy is available for the next level of consumers, food chains generally consist of only three or four steps. **The loss of energy at each step is so great that very little usable energy remains after four trophic levels.** The transfer of energy generally follows 10% law, wherein only 10% of the available energy is transferred to the next trophic level. **Hence, the number of trophic levels in a food chain is restricted by the net energy available for consumption at the next trophic level.**

Statement 3 is incorrect: A food chain does not illustrate the number of organisms eaten at each trophic level. It only illustrates the sequence of consumption or direction of flow of energy in a chain.

Source: <https://ncert.nic.in/textbook/pdf/jesc115.pdf> <https://ncert.nic.in/textbook/pdf/lebo114.pdf>

Q.5) Which of the following statements best explains the term 'Scrub Typhus', recently seen in the news?

- It is a tropical disease caused by a certain type of bacteria.
- It is a non-communicable viral disease affecting larger part of Africa.
- It is a drug produced by Indian pharma companies, recently banned by some African nations.
- It is an Injectable Typhoid Conjugate Vaccine, recently developed by Bharat biotech.

Ans) a

Exp) Option a is the correct answer.

Recently, a team of Indian Scientists has identified a significantly more effective treatment for severe Scrub typhus. **Scrub typhus, also known as bush typhus, is a disease caused by a bacteria called Orientia tsutsugamushi.** Scrub typhus is spread to people through bites of infected chiggers (larval mites). The most common symptoms of scrub typhus include fever, headache, body aches, and sometimes rash.

As per estimates, nearly one million cases are reported from South and Southeast Asia with 10% mortality. India is one of the hotspots with at least 25% of the disease burden; in CMC Vellore alone, 500-1,000 patients are treated each year, of which 250-300 have severe disease.

Saving lives by faster resolution of complications

India is one of the hotspots for scrub typhus disease with at least 25% disease burden

Of concern: Mortality due to severe disease with multi-

- Combination therapy with doxycycline and azithromycin achieved faster resolution of complications compared with monotherapy using either drug

- Combination therapy achieved faster clearance of the bacteria compared with monotherapies

- Faster resolution of

thousands of lives

- Scrub typhus infection does not cause typical symptoms, making correct and early diagnosis difficult

- Awareness about the infection and disease is very low, despite the high disease burden and mortality rate

- In Vellore, increased awareness and early diagnosis led to sharp

Scrub typhus is a tropical disease caused by a bacteria called Orientia tsutsugamushi, hence, statement b, c and d are incorrect.

Source: <https://www.thehindu.com/sci-tech/science/scrub-typhus-trial-shows-combination-therapy-can-save-more-lives/article66578021.ece>

<https://pubmed.ncbi.nlm.nih.gov/36252451/#:~:text=Scrub%20typhus%20is%20an%20under,hilly%20areas%20of%20Ttsutsugamushi%20triangle.>

Q.6) Which of the followings are biotic components of the environment?

- Symbionts
- Parasites
- Soil
- Topography
- Decomposers

Select the correct answer from the codes given below.

- 1, 2 and 3 only
- 3, 4 and 5 only
- 1, 2 and 5 only
- 1, 2, 4, and 5 only

Ans) c

Exp) Option c is the correct answer.

In ecology, biotic and abiotic factors make up an ecosystem. Organisms require both biotic and abiotic factors to survive. Also, a deficit or abundance of either component can limit other factors and influence an organism's survival.

Biotic Factors: Biotic factors include any living component of an ecosystem. They include related biological factors, such as pathogens, effects of human influence, and diseases. Living components fall into one three categories:

- 1) Producers: Producers or autotrophs convert abiotic factors into food. Plants are examples of producers.
- 2) Consumers: Consumers or heterotrophs obtain energy from producers or other consumers. Most consumers are animals.
- 3) **Decomposers: Decomposers or detritivores break down chemicals made by producers and consumers into simpler molecules.**

Components of Environment	
Abiotic	Biotic
Energy	Green plants
Radiation	Non-green plants
Temperature & heat flow	Decomposers
Water	Parasites
Atmospheric gases and wind	Symbionts
Fire	Animals
Gravity	Man
Topography	
Soil	
Geologic substratum	

Options 1 and 2 are correct: Biotic components also include parasites and symbionts. Symbionts are those living species which have a long term, intimate association with the host species for survival.

Option 5 is correct: As decomposers are one of the three major categories of the biotic component.

Option 3 is incorrect: Abiotic factors are the non-living components of an ecosystem that an organism or population needs for growth, maintenance, and reproduction. Soil is an abiotic factor.

Option 4 is incorrect: Topography, i.e., the arrangement of the natural and artificial physical features of an area is also an abiotic component.

Source: <https://www.thoughtco.com/biotic-versus-abiotic-factors-4780828>

Q.7) Which of the following food chains represent spindle shaped pyramid of number?

- a) Grass -> Insects-> Todd
- b) Tree -> Birds->Hawk
- c) Grass -> Rabbit -> Fox -> Lion
- d) Plants -> Grasshopper->Frog-> Snakes-> Eagle

Ans) b

Exp) Option b is the correct answer.

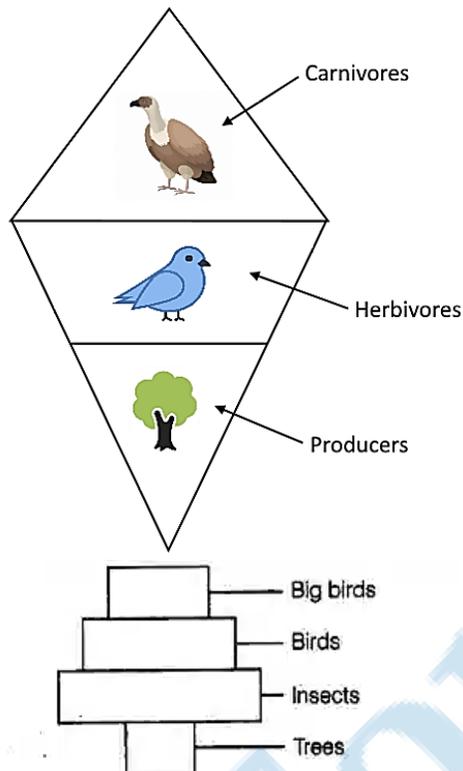

The steps of trophic levels expressed in a diagrammatic way are referred as ecological pyramids. The food producer forms the base of the pyramid, and the top carnivore forms the tip. Other consumer trophic levels are in between.

Pyramid of Numbers deals with the relationship between the numbers of primary producers and consumers of different levels. It is a graphic representation of the total number of individuals of different species,

belonging to each trophic level in an ecosystem. A Spindle shaped pyramid is Having the shape of a spindle, which is wide in the centre and tapered at both ends.

Option a is incorrect: In GRASS -> INSECT-> TODD chain, the pyramid is upright in shape. As grasses as producers are larger in number than the insects at the 2nd trophic level. Todds who are at the top are slightly lesser in number than the 2nd trophic level.

Option b is correct: In this food chain TREE-> BIRDS->HAWK, tree is a single major producer which provides food to multiple herbivores, such as birds, in a forest environment. These little herbivorous birds are typically eaten by hawks or eagles. The eagle population is, however, quite modest. **As a result, the pyramid of number derived from this type of interaction is spindle shaped.**

Pyramid of number (spindle-shaped)

Option c is incorrect: The food chain of grass -> Rabbit -> Fox -> Lion will have a a pyramid of numbers in upright triangle shape.

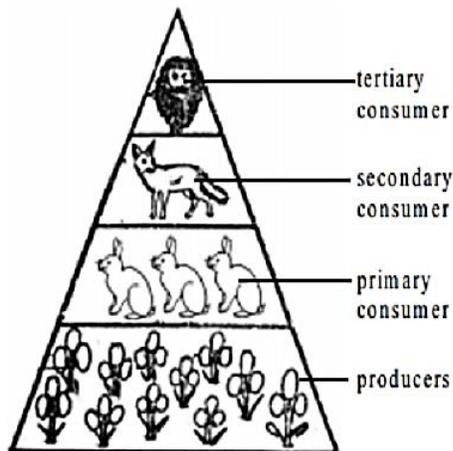

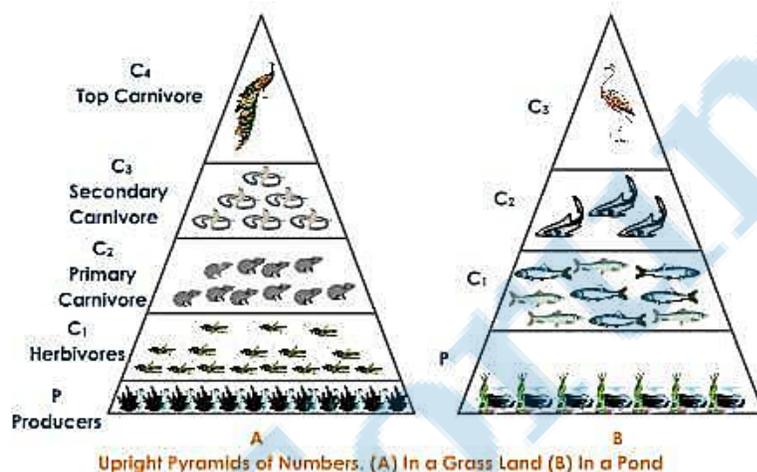

Fig. Pyramid of energy in a forest

Option d is incorrect: This food chain PLANTS-> GRASSHOPPER->FROG-> SNAKES-> EAGLES form a pyramid of number which is upright as number of consumers at each trophic level decreases consistently.

Upright Pyramids of Numbers. (A) In a Grass Land (B) In a Pond

Source: Shankar IAS, Environment

Q.8) Arrange the above Biomes in the decreasing order according to their net productivity:

1. Desert Biomes.
2. Savanna Biomes.
3. Temperate Deciduous Forest Biome.
4. Tropical Forest Biome.

Select the correct answer from the code given below:

- a) 4 - 2 - 3 - 1
- b) 4 - 3 - 2 - 1
- c) 3 - 4 - 1 - 2
- d) 4 - 2 - 1 - 3

Ans) b

Exp) Option b is the correct answer.

Net primary productivity (NPP) is the amount of carbon retained in an ecosystem (increase in biomass). It is equal to the difference between the amount of carbon produced through photosynthesis and the amount of energy that is used for respiration.

Option b is correct: The correct sequence of decreasing order of productivity is as follows- 4 - 3 - 2 - 1.

Option 1: Deserts generally occur in a band around the world between 15–30° N and S latitude. They cover between 26–35% of the land surface of the Earth. The climate of deserts is dominated by low precipitation, generally below 250 mm yr. There is a great deal of variation in the biodiversity, productivity and organisms found in different types of desert. The dominant plant biomass in most deserts is composed of perennial shrubs with extensive roots and small, gray or white leaves.. **There is a positive relationship between productivity and precipitation, and values of net primary productivity can range from near 0 to 120 g m⁻² yr⁻¹.** Just as with savannas, productivity will vary with soil depth and local drainage pattern.

Option 2: Savannas Biomes are located north and south of tropical forest They have lower yearly rainfall and longer dry seasons. These biomes are dominated by a mix of grasses and small trees. They represent a transition from tropical forests to deserts. Trees in savannas are usually drought deciduous. Fire plays a major role in the balance between trees and grasses in Savanna. **Net primary productivity ranges from 400–600 g m⁻² yr⁻¹, but varies depending upon local conditions such as soil depth.**

Option 3: Temperature deciduous forests occur in mid-latitudes where cool winters, warm summers, and high year round precipitation occurs. **Net primary productivity ranges from 600–1500 g m⁻² yr⁻¹ with high litter production.** Litter serves as a major pathway for nutrient recycling. This biome is named for the dominant trees that drop their leaves during the winter months. Biodiversity is relatively high in this biome due to the niche partitioning allowed by the multiple forest layers..

Option 4: Tropical forests are found in areas centered on the equator Climate in these biomes shows little seasonal variation with high yearly rainfall and relatively constant, warm temperatures. The dominant plants are phanerophytes - trees, lianas, and epiphytes. Tropical forests have the highest biodiversity and primary productivity of any of the terrestrial biomes. **Net primary productivity ranges from 2–3 kg m⁻² y⁻¹ or higher.** This high productivity is sustained despite heavily leached, nutrient poor soils, because of the high decomposition rates possible in moist, warm conditions.

Source: <https://www.nature.com/scitable/knowledge/library/terrestrial-biomes-13236757/>

Q.9) Consider the following statements with reference to the Endo Parasite:

1. They can be found inside the cells of human beings.
2. Protozoan Plasmodium, the causative agent of malaria, is an example of endoparasites.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Parasitism is one of the many forms of symbiosis. In parasitism, one organism (called parasite) benefits at the expense of another organism usually of different species (called host). The parasite benefits at the expense of the host organism

Endoparasites are those that live inside the host body at different sites (liver, kidney, lungs, red blood cells, etc.). **The parasites that feed on the external surface of the host organism are called ectoparasites.**

Statement 1 is correct: Endoparasites are of two forms: intercellular parasites and intracellular parasites. Intercellular parasites are those that inhabit the spaces of the body of the host. Intercellular parasites are endoparasites that live within the cell of the host.

Statement 2 is correct: Examples of intracellular parasites are the protozoan Plasmodium, the causative agent of malaria. They thrive inside the cells of their human host. Plasmodium species have different stages in their life cycle. Within the definitive host (human), the sporozoite stage of Plasmodium species occurs within the liver cells where the sporozoite gives rise to a merozoite or to a hyponozoite, which then infects the red blood cell of the host.

Source: Page 200, Chapter 11 - Organisms and Populations of 12th NCERT.

Q.10) Consider the following statements about the Dragon Fruit:

1. It is an herbaceous perennial climbing cactus.
2. It has its origin to Mexico and Central America.
3. It is also known as the “Wondrous Fruit of the 21st century”.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The dragon fruit (also known as Kamalam in India), a new introduction in India, is highly valued for its reported nutraceutical properties. The Kamalam (Dragon fruit) has recently drawn much attention of the growers worldwide, not only because of their red purple colour and economic value as food products but also for their enormous health benefits. The skin of the fruit is covered with bracts or scales which may have attributed the fruits resembling the mythical creature 'dragon', hence the name dragon fruit.

Statement 1 is correct: Kamalam or Dragon Fruit (Hylocereus undatus) is an herbaceous perennial climbing cactus. Although they are members of the cactus family, Hylocereus species all grow like vines, climbing, clambering, crawling, and sprawling as far as 30 feet (9 meters). In optimal conditions, some can grow almost 10 feet (3 meters) in their first year! Most take root in the soil and climb into trees, but some grow as epiphytes (on other plants).

Statement 2 is correct: It originated from the tropical regions of Mexico and Central and South America. From its centres of origin, dragon fruit has spread over tropical and sub-tropical America, Asia, Australia and Middle East. Currently it is being cultivated in at least 22 countries of tropics. Historical evidence indicates that the French introduced the crop to Vietnam about 100 years ago and it was grown for the King. Later, it became popular among the wealthy families of the entire country.

Statement 3 is correct: Dragon fruit is popular by different names such as Pithaya in Mexico, Pitaya Roja in Central and Northern America, Pithajah in Thailand and Kamalam after the Sanskrit name lotus in India. **It is also known as “Wondrous Fruit of the 21st century”.**

Source: <https://pib.gov.in/PressReleasePage.aspx?PRID=1906572>

<https://animals.sandiegozoo.org/animals/dragonfruit-pitahaya-pitaya>

<https://www.livemint.com/news/india/in-a-first-maharashtra-exports-kamalam-to-dubai-all-you-need-to-know-about-this-exotic-dragon-fruit-11624713335849.html>

Q.11) Consider the following pairs:

Lakes	Description
1. Pulicat lake	Freshwater lake
2. Kanwar Lake	Oxbow lake
3. Vembanad lake	Lagoon lake

Which of the pairs given above is/are correctly matched?

- 1 and 2 only
- 2 and 3 only
- 3 only
- 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

Lakes are classified into various types based on their origin or mode of formation. These can be further classified into the freshwater lake, saltwater lake, Natural lake, oxbow lake, Artificial lake, crater lake etc.

Pair 1 is incorrect: Pulicate lake is 2nd largest **brackish water lake** in India after Chilika lake. It lies along Coromonadal coast.

Pair 2 is correct: Kanwar lake is **Asia's largest freshwater oxbow lake** and Bihar's only Ramsar site, located in Begusarai district. It is currently facing threat of running dry.

Pair 3 is correct: The Vembanad Wetland System is a Ramsar site of the country. It is the **second largest lagoon** in India. It is in grave danger due to the accumulation of silt on the beds and illegal filling.

Source: <https://timesofindia.indiatimes.com/city/chennai/pulicat-declared-eco-sensitive-zone/articleshow/80914721.cms>

<https://www.hindustantimes.com/cities/patna-news/bihars-biggest-lake-left-high-and-dry-despite-ramsar-tag-101617208132502.html>

<https://www.newindianexpress.com/states/kerala/2022/feb/03/vembanad-wetland-system-shrinking-dramatically-report-2414562.html>

Q.12) The gradual and fairly predictable change in the species composition of a given area is called ecological succession. In this context, arrange the following species found in water on the basis of the correct sequence in terms of succession:

1. Rooted floating angiosperms
2. Reed Swamp
3. Free floating plants
4. Scrub
5. Marsh- meadow

Which of the options given below is correct?

- 1-3-5-4-2
- 1-2-3-5-4
- 1-2-3-4-5
- 1-3-2-5-4

Ans) d

Exp) Option d is the correct answer.

Based on the nature of the habitat – whether it is water (or very wet areas) or it is on very dry areas – succession of plants is called hydrarch or xerarch, respectively. Hydrarch succession takes place in wetter areas and the successional series progress from hydric to the mesic conditions.

In primary succession in water, the pioneers are the small phytoplanktons, they are replaced with time by rooted-submerged plants, rooted-floating angiosperms followed by free-floating plants, then reed swamp, marsh-meadow, scrub and finally the trees. The climax again would be a forest. With time the water body is converted into land.

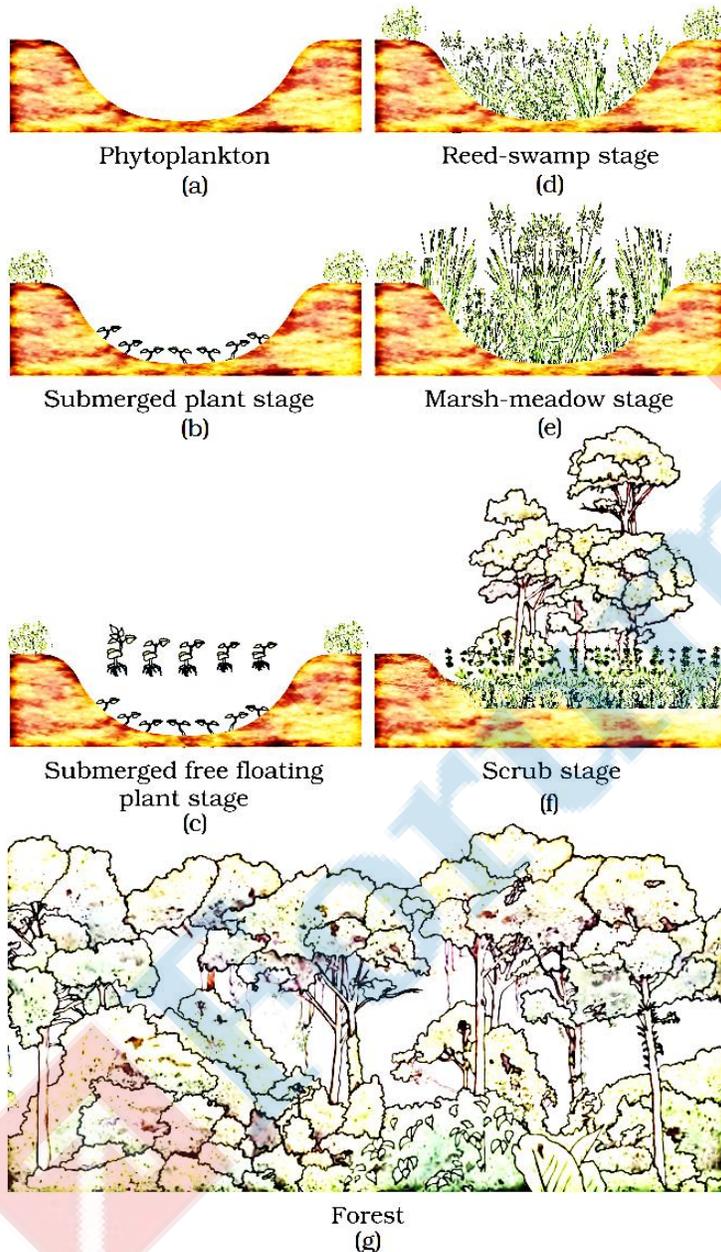

Figure 14.5 Diagrammatic representation of primary succession

Thus, based on the above information, the correct sequence of succession of species in water is 1-3-2-5-4.

Source: <https://ncert.nic.in/ncerts/l/lebo114.pdf>

Q.13) Consider the following statements regarding Ecological Niche:

1. The ecological niche describes how a species interacts within an ecosystem.
2. The niche of a species depends on both biotic and abiotic factors.
3. It is possible for more than one species to share a particular niche in one ecosystem.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: An ecological niche is the ecological role an organism plays within its habitat. **The ecological niche describes how a species interacts within an ecosystem.**

Statement 2 is correct: **The niche of a species depends on both biotic and abiotic factors, which affect the ability of a species to survive and endure.** Biotic factors affecting a species' niche include food availability and predators. Abiotic factors affecting ecological niche include temperature, landscape characteristics, soil nutrients, light and other non-living factors.

Statement 3 is incorrect: **No two species can have the exact same niche, otherwise they would be in direct competition for resources with one another.** If this occurs, then one species will outcompete the other. If the losing species then does not adapt, it would lead to its extinction.

Source: <https://education.nationalgeographic.org/resource/niche/>

<https://sciencing.com/ecological-niche-definition-types-importance-examples-13719219.html>

Q.14) Which of the following factors is/are responsible for decreasing amount of Dissolved Oxygen (DO) in aquatic water bodies?

1. Decreasing salinity of the water body
2. Warmer surface water
3. Increasing atmospheric pressure

Select the correct answer using the codes given below:

- a) 1 only
- b) 2 and 3 only
- c) 2 only
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

Dissolved oxygen enters water through the **air or as a plant by-product**. From the air, oxygen can slowly diffuse across the water's surface from the surrounding atmosphere, or be mixed in quickly through aeration, whether natural or man-made. The aeration of water can be caused by wind (creating waves), rapids, waterfalls, ground water discharge or other forms of running water.

The actual amount of dissolved oxygen (in mg/L) depends on **temperature, pressure and salinity of the water body**.

Statement 1 is incorrect: Dissolved oxygen decreases exponentially as salt levels increase. That is why, at the same pressure and temperature, **saltwater holds about 20% less dissolved oxygen than freshwater**. **Therefore, decreasing amount of salinity increases the dissolved oxygen level in the water body.**

Statement 2 is correct: The **solubility of oxygen decreases as temperature increases**. This means that warmer surface water requires less dissolved oxygen to reach 100% air saturation than does deeper, cooler water. For example, at sea level (1 atm or 760 mmHg) and 4°C (39°F), 100% air-saturated water would hold 10.92 mg/L of dissolved oxygen. But if the temperature were raised to room temperature, 21°C (70°F), there would only be 8.68 mg/L DO at 100% air saturation. In summary, **colder, deeper fresh waters have the capability to hold higher concentrations of dissolved oxygen**.

Statement 3 is incorrect: Dissolved oxygen will **increase as pressure increases**. This is true of both atmospheric and hydrostatic pressures. Water at lower altitudes can hold more dissolved oxygen than water at higher altitudes.

Source: Dissolved Oxygen - Environmental Measurement Systems (fondriest.com)

Q.15) Consider the following pairs about military exercises and the participating nations:

Exercise : Participating countries

1. Bold Kurukshetra : India and Indonesia
2. Vajra Prahar : India and USA
3. Garuda Shakti : India and Malaysia

Which of the pairs given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 2 only

Ans) d

Exp) Option d is the correct answer.

The joint military exercises with friendly countries result in constructive engagements in operational terms and enhances the skills of our armed forces in a number of diverse areas of war-fighting by operating with armed forces of various nations. In this process the current tactical and technological practices / techniques etc., are exchanged during such exercises.

Pair 1 is incorrect: Exercise Bold Kurukshetra is conducted under the ambit of the bilateral arrangement for the joint Army Training and exercises between the Singapore Army (not Indonesia) and the Indian Army. First conducted in 2005, this exercise underscores the strong and long-standing bilateral defence relationship between both countries and enhances cooperation between the two armies.

Pair 2 is correct: Exercise VAJRA PRAHAR is an India-US Special Forces exercise, which is significant in terms of security challenges faced by both Nations in the backdrop of the current global situation. The joint military exercise has further strengthened the traditional bond of friendship between the special forces of both Nations as well as improved bilateral defence cooperation between India and the USA.

Pair 3 is incorrect: Garuda Shakti is a joint military exercise between India and Indonesia (and not Malaysia). The joint exercise facilitates both armies to know each other better, and share their wide experiences and combat experience on countering terrorist operations, Regional Security Operations & Peace Keeping Operations in an international environment. The exercise is yet another significant milestone in ensuring cordial relations between the two countries and another step forward towards ensuring regional security.

Q.16) With reference to Species diversity, consider the following statements:

1. Sibling species are those species that look alike and can breed with each other.
2. Deme is a local group of individuals that cannot breed with each other.
3. Cline represents the genetic diversity within the same species.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 only
- c) 2 and 3 only
- d) 3 only

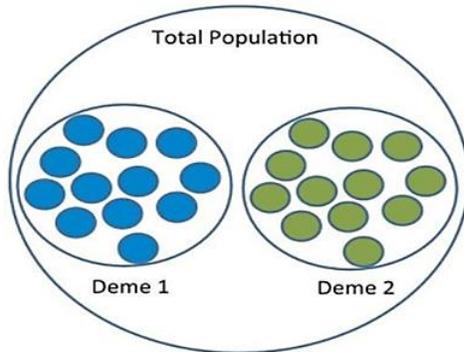

Ans) d

Exp) Option d is the correct answer.

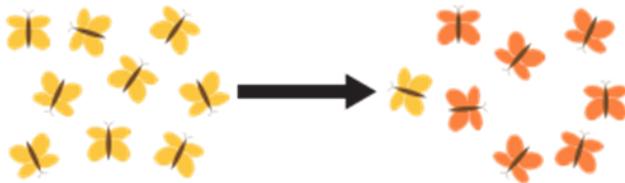

Statement 1 is incorrect: Sibling species are **species which look alike, but cannot breed with each other.** Sibling species do not breed with each other and are incapable of producing fertile offspring, but their morphology, structure and form are nearly indistinguishable. Example being the **Willow flycatcher (left) and Alder flycatcher (right)** that look alike but cannot breed with each other.

Statement 2 is incorrect: Deme is a local group of animals (from the same taxon) that can breed with each other and share a gene pool. A population of a species usually has multiple demes and they are largely the result of local environment. For instance in **Adaptive Deme Formation (ADF) hypothesis** in which **herbivorous insects can become adapted to specific host plants** in their local environment. Local plants can have unique nutrient patches to which insects will be adopted.

Statement 3 is correct: A cline represents a genetic diversity within the species. Clines are the result of two opposing drivers: **selection and gene flow**. **Selection causes adaptation to the local environment**, resulting in genetic diversity among species and **gene flow, which has a homogenising effect on populations** and prevents genetic diversity. The **yellow figure represents the gene flow** from one group to another, which counters the genetic difference between these two sets of species.

https://www.bio.miami.edu/dana/dox/rana_aurora.html

Q.17) Which one of the following is the best description of the 'ecosystem'?

- A closed relationship between animals and humans.
- A system created by interaction of only flora and fauna of two different climatic regions.
- A system in which all living organisms interact with each other together with the non-living organisms.
- A geographical area in which land, water and air interact with each other.

Ans) c

Exp) Option c is the correct answer.

Option c is correct: Ecosystems contain **biotic or living parts, as well as abiotic factors, or nonliving parts**. Biotic factors include plants, animals, and other organisms. Abiotic factors include rocks, temperature, and humidity.

Every factor (biotic and abiotic factors) in an ecosystem depends on every other factor, either directly or indirectly. For instance a non biotic factor (temperature) often affects what plants (biotic) will grow there. Plants in an area influences the animal population there (this shows interaction among biotic factors).

An ecosystem is a geographic area where plants, animals, and other organisms, as well as weather and landscape, work together to form a bubble of life. Therefore, it is **true that the Ecosystem is a system in which all living organisms interact with each other together with the non-living organisms**.

Options a and b are incorrect: Both options a and b talk about the interaction between the flora and fauna (or biotic factors of the ecosystem). But abiotic factors also included in the ecosystem, and they play important role in shaping the ecosystem.

Option d is incorrect: Statement d is focussing only on the abiotic factors of the ecosystem, and it ignored the biotic factors.

Source: <https://australian.museum/learn/species-identification/ask-an-expert/what-is-an-ecosystem/>

Q.18) With reference to Putrefying bacteria, consider the following statements:

1. All putrefying bacteria necessarily require oxygen to decompose the organic matter.
2. These organisms can be found naturally inside human bodies.
3. Putrefying bacteria play an important role in the Nitrogen cycle.

Which of the statements given above is/are correct?

- a) 1, 2 and 3
- b) 2 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) d

Exp) Option d is the correct answer.

Statement 1 is incorrect: Putrefaction refers to the breaking down of a body of a living organism post death. Putrefying bacteria is a broad term used to define several species of bacteria involved in decomposition and fermentation. **Putrefying bacterias can either be aerobic (need oxygen for decomposition) or anaerobic (does not require oxygen for decomposition).**

Statement 2 is correct: Putrefying bacteria can be found naturally inside human bodies especially in the large intestine. These bacteria aid in **digestion of nutrients** that a human's gastrointestinal tract could not process on its own. Hence Putrefying bacteria in the gut play a key role in fermenting or decomposing proteins not broken down by the body.

Statement 3 is correct: Putrefying bacteria use amino acids or urea as an energy source to decompose dead organisms. **In the process, they produce ammonium ions.** Nitrifying bacteria then convert this ammonium into nitrate by oxidation, which can then be used by plants to create more proteins thus completing the nitrogen cycle.

Source: <https://www.ncbi.nlm.nih.gov/books/NBK539741/#:~:text=the%20gram%2Dpositive%2C-,anaerobic,-%2C%20and%20rod%2Dshaped>

Q.19) With reference to Biosphere, consider the following statements:

1. It refers to only the terrestrial portion of the planet.
2. The areas in the atmosphere, such as the uppermost layers, where conditions are inhospitable for most life forms to survive are not part of the Biosphere.
3. The biotic component of the biosphere includes the land, air, and water.

Which of the above given statements is/are correct?

- a) 1 and 3 only
- b) 2 only
- c) 2 and 3 only
- d) 1 and 2 only

Ans) b

Exp) Option b is the correct answer.

The biosphere refers to the zone of the Earth where life exists, including the land, water, and air. It consists of three major components: the lithosphere, the hydrosphere, and the atmosphere. The biosphere is home to millions of different species, including plants, animals, and microorganisms. These organisms interact

with each other and with the abiotic components of the environment to form complex ecosystems. These ecosystems can range from a small pond or a patch of forest to the entire biosphere.

Statement 1 is incorrect: The biosphere refers to the zone of the Earth where life exists, including the land, water, and air. It is not limited to the largest terrestrial portion of the planet.

Statement 2 is correct: The Biosphere is commonly defined as the layer of the Earth where living organisms can exist, which typically excludes the higher regions of the atmosphere characterized by low air density and extreme temperatures, making it unsuitable for most life forms to survive.

Statement 3 is incorrect: The abiotic component is the nonliving part of the ecosystem, which includes the flow of energy, nutrients, air, water, and gases, land as well as the concentrations of organic and inorganic substances in the environment. The biotic component is the living part of the ecosystem, which includes producers (plants), consumers (animals), and decomposers (bacteria and fungi).

Source:

<https://www.biologyonline.com/dictionary/biosphere#:~:text=The%20biosphere%20consists%20of%20three,things%20thriving%20or%20inhabiting%20them.>

Q.20) Consider the following statements regarding the Defense Acquisition Council (DAC):

1. It is responsible for the co-ordination, supervision and monitoring of the defence acquisition process.
2. It also gives 'in principle' approval to Capital acquisitions in the Long-Term Perspective Plan.
3. The Defence Minister of India acts as the chairman of the DAC.

Which of the statements given above is/are correct?

- a) 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: DAC is the highest decision-making body in the defence ministry for deciding on new policies and capital acquisitions of the Army, the Navy and the Air Force along with the Indian Coast Guard.

Whereas, the **Defense Procurement Body (DPB)** is created to oversee all activities related to acquisition on the capital account in the Department of Defence flowing out of the 'Buy' and 'Buy & Make' decisions of the DAC. **DPB functions as the body responsible for the co-ordination, supervision and monitoring of the acquisition process.**

Statement 2 is correct: The DAC is tasked to give '**in principle' approval to Capital acquisitions in the Long-Term Perspective Plan (LTPP)** covering a 15-year time span at the beginning of a Five-Year Plan period. (The approval will, in particular, identify the 'Make' projects in the Perspective Plan where long gestation periods are involved).

(c) Monitor the progress of major projects on feedback from the Defence Procurement Board

Statement 3 is correct: A Defence Acquisitions Council has been created as an overarching structure with the following composition:

Chairman: Defence Minister (Raksha Mantri)

Members: Raksha Rajya Mantris (RRMs)

Chief of Defence Staff (CDS) (when appointed)

Chief of Army Staff (COAS)

Chief of Naval Staff (CNS)

Chief of Air Staff (CAS)

Defence Secretary

Secretary Dept. of Defence Production and Supplies
 Secretary, Defence Research and Development
 Secretary, Defence Finance
 Vice Chief of Defence Staff (when appointed)/CISC
 Special Secretary (Acquisition)

Member Secretary: Dy. Chief of Defence Staff (PP&FD)

<https://www.livemint.com/>

Q.21) With regard to different zones of lake, which of the following statements is/are correct?

1. Rooted aquatic plants and algae can grow in Littoral zone.
2. Profundal zone refers to the area in a deep lake where no light reaches.
3. Diversity in Benthic zone is usually very less.

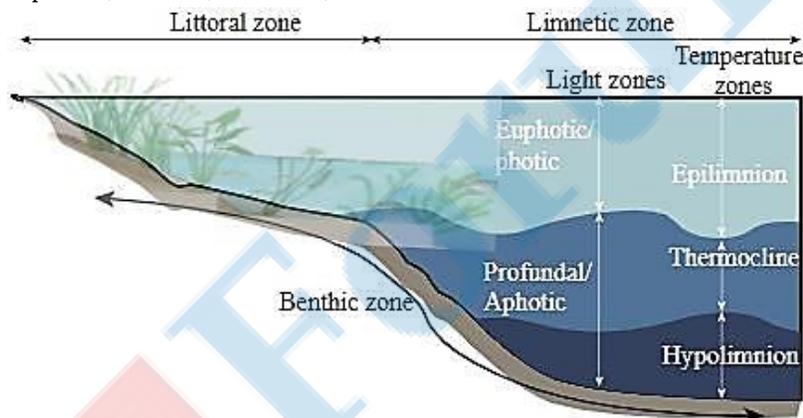

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

A typical lake has three distinct zones (limnetic, littoral and the benthic zone) of biological communities linked to its physical structure. With regard to light penetration, a lake can have five distinct zones- Euphotic, Littoral, Limnetic, Profundal and Benthic.

Statement 1 is correct: Littoral zone refers to the nearshore area that is the shallow and warmest part of the lake where sunlight penetrates all the way to the bottom sediments and **allows rooted aquatic plants, or macrophytes**, and attached algae to grow. This zone is most affected by changes at the shoreline.

Statement 2 is correct: Profundal zone refers to the area in a deep lake where no light reaches. Limnetic zone refers to the area of open water where the lake is too deep to allow rooted plant growth.

Statement 3 is correct: Benthic Zone refers to bottom sediment where a diverse variety of activities take place. The lake bottom may be made up of sand, mud, marl and/or a mixture of any or all of these materials. Changes that occur in the benthic zone of the littoral zone are sensitive to shoreline development and can result in reduced food sources, spawning and safety areas. So **there is reduced diversity in this zone** which results in a reduction in fish populations.

Source: https://www.canr.msu.edu/news/inland_lake_habitats_critical_to_maintaining_healthy_lake_ecosystems

Q.22) Which of the following statements about wetlands is/are correct?

1. They constitute about 6% of the world's geographical area.
2. Wetlands can store about 50 times more carbon than rain forests of the same size.
3. The world's largest protected wetland is Llanos de Moxos, located in Bolivia.

Select the correct code from given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

A wetland is a place in which the land is covered by water—salt, fresh, or somewhere in between—either seasonally or permanently. It functions as its own distinct ecosystem. You can recognize wetlands from other types of land or bodies of water primarily by the vegetation that has adapted to wet soil.

Statement 1 is correct: Globally, wetlands cover 6.4 per cent of the geographical area of the world. In India, according to the National Wetland Inventory and Assessment compiled by the Indian Space Research Organisation (ISRO), wetlands are spread over 1,52,600 square kilometres (sq km) which is 4.63 per cent of the total geographical area of the country.

Statement 2 is correct: Wetlands are an important natural resource that can store 50 times more carbon than rainforests, which helps in mitigating climate change. They can capture high carbon matter and bury them through sedimentation, thereby locking them away for a long time.

Statement 3 is incorrect: The largest protected wetland in the world is the Pantanal Conservation Area, located in Brazil, Bolivia, and Paraguay. Llanos de Moxos is a significant wetland in Bolivia, but it is not the largest protected wetland in the world.

Source: <https://www.worldwildlife.org/stories/what-is-a-wetland-and-8-other-wetland-facts>

<https://indianexpress.com/article/explained/ramsar-sites-significance-wetlands-listing-7757266/>

Q.23) “These roots are large, prominent roots that radiate out from the base of a tree and sometimes extend several meters above the ground. They are commonly found in tropical rainforests and are believed to be an adaptation to the shallow, nutrient-poor soil found in these regions.”

Which of the following options best describes the above passage?

- a) Tap root
- b) Fibrous root
- c) Adventitious root
- d) Buttress root

Ans) d

Exp) Option d is the correct answer.

There are several types of roots found in plants, each with their own unique characteristics and functions.

Option a is incorrect: A taproot is a single, large, central root that grows vertically into the soil. It is found in dicotyledonous plants and provides the main support to the plant.

Option b is incorrect: Fibrous roots are thin and numerous roots that grow horizontally in the soil. They are found in monocotyledonous plants and provide a larger surface area for the absorption of water and minerals.

Option c is incorrect: Adventitious roots are roots that grow from non-root tissues, such as stems or leaves. They are often found in plants that require additional support, such as climbers.

Option d is correct: Buttress roots are large, prominent roots that radiate out from the base of a tree and sometimes extend several meters above the ground. They are commonly found in tropical rainforests and are believed to be an adaptation to the shallow, nutrient-poor soil found in these regions.

Source : <https://www.homestratosphere.com/types-of-roots/>

Q.24) Which of the following are the strategies adopted by animals to survive in extreme cold conditions?

1. Reducing their metabolic rate
2. Huddling in groups
3. Shutting down non-essential bodily functions
4. Excreting concentrated urine

Select the correct code from given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 4 only
- d) 3 and 4 only

Ans) b

Exp) Option b is the correct answer.

Cold temperatures present many challenges for animals, such as difficulties in finding food, conserving energy, and avoiding freezing. However, animals have developed various adaptations to help them survive, such as insulation in the form of thick fur or feathers, regulating metabolic rates, and huddling together to conserve heat.

Statement 1 is incorrect: Animals in cold environments often need to increase their metabolic rate to generate enough body heat to stay warm. Reducing metabolic rate is a strategy adopted by some desert animals to conserve water and survive in the hot and dry desert environment.

Statement 2 is correct: Huddling in groups is a strategy adopted by animals in extreme cold conditions to conserve heat, as the collective body heat generated from a group is much greater than that produced by an individual.

Statement 3 is correct: Some animals, such as emperor penguins, are able to withstand extreme cold by regulating their blood flow and shutting down non-essential bodily functions.

Statement 4 is incorrect: Excreting concentrated urine is a strategy adopted by animals in the desert to conserve water, but it is not a strategy used by animals to survive extreme cold conditions.

Source: https://www.coolantarctica.com/Antarctica%20fact%20file/science/cold_all_animals.php

<https://blog.therainforestsite.greatergood.com/cs-desert-animals/>

Q.25) Consider the following statements regarding critical minerals:

1. These minerals can be used in making mobile phones, computers and batteries.
2. Based on their individual needs and strategic considerations, different countries create their own lists of critical minerals.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

As countries around the world scale up their transition towards clean energy and digital economy, critical mineral resources are key to the ecosystem that fuels this change.

Statement 1 is correct: Critical minerals are elements that are the building blocks of essential modern-day technologies, and are at risk of supply chain disruptions. These minerals are now used everywhere from **making mobile phones, computers to batteries, electric vehicles and green technologies** like solar panels and wind turbines.

Statement 2 is correct: Based on their individual needs and strategic considerations, different countries create their own lists. Generally, lists of critical minerals of individual countries mostly include graphite, lithium and cobalt, which are used for making EV batteries.

Source: <https://indianexpress.com/article/explained/explained-what-are-critical-minerals-the-centerpiece-of-a-new-india-australia-collaboration-8010268/>

Q.26) Consider the following statements about the types of ecological successions occurring in nature.

1. When a mature tree produces shade on the nearby region, it will change the structure and properties of soil and lead to allogenic succession in the region.
2. Overgrazing of a grassland by cattle causes elimination of grass ecosystem and may lead to growth of invasive weeds, which is an example of autogenic succession.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

Ecological succession or ecosystem development involves the changes in the structure and function of community over time. Succession may also be described as the gradual change which occurs in vegetation of a given area of the earth's surface on which one population succeed the other over a period.

Autogenic succession (self-generated): When course of succession is largely driven or determined by internal coactions then such type of succession is known as Autogenic Succession i.e., the change in both the environment and the community is brought about by the activities of organisms themselves.

Allogenic Succession (externally generated): When course of succession is controlled by some external driving forces, i.e., the forces beyond the control of the indigenous organisms or the changes in the environment are caused by some external factor unaffected by the organism (e.g., storms, fire etc.), such type of succession is known as allogenic succession.

Statement 1 is incorrect: Change in environment which is brought about by plant shade or litter input to soil which in turn will result into change in structure and properties of soil leading to change in species composition with time, is known as autogenic succession (and not allogenic succession).

Statement 2 is incorrect: Animals play an important role in allogenic changes as they are pollinators, seed dispersers and herbivores. **When a grassland is severely overgrazed by cattle, the most palatable species will disappear. As grazing continues, the grass cover is reduced, and in the open area weeds characteristic of initial stages of succession may become established. This is an example of allogenic succession (and not autogenic succession).**

<https://www.accessscience.com/content/article/a212400>

Q.27) Which of the following factors can promote the process of desertification of land in the long run?

1. Excessive use of fertilizers and pesticides
 2. Excessive Mining of natural resources
 3. Rampant Urbanization
 4. Over-drafting of Groundwater
- Select the correct answer from the codes given below.

- a) 1 and 2 only
- b) 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Desertification is not the natural expansion of existing deserts but the degradation of land in arid, semi-arid, and dry sub-humid areas. It is a gradual process of soil productivity loss and the thinning out of the vegetative cover because of human activities and climatic variations such as prolonged droughts and floods. What is alarming is that though the land's topsoil, if mistreated, can be blown and washed away in a few seasons, it takes centuries to build up. It can be caused by various natural and anthropogenic factors.

Option 1 is correct: Excessive use of fertilizers and pesticides to increase crop yields in the near term frequently results in substantial soil degradation. This could eventually turn fertile land into desert land. After a few years of intensive farming, the resulting arid land will no longer be suitable for farming since the soil has been degraded too much. Hence, it leads to desertification.

Option 2 is correct: Mining also leads to land desertification. Large amounts of resources need to be extracted by industries to meet daily demand for material goods. For mining, large areas of land must be used, which causes deforestation as well as pollution of the nearby areas. By the time, the region is excessively mined, the soil gets damaged significantly, turning it into an arid land. Hence, leading to land desertification.

Option 3 is correct: Rampant urbanisation due to overpopulation leads to excessive deforestation. The land without plants become prone to various types of erosions. This ultimately leads to desertification of land.

Option 4 is correct: Over drafting of groundwater is the process in which groundwater is extracted in excess from the aquifers than it can be recharged. Depleting groundwater can lead to fall in the natural water table of the region. **This will adversely affect the groundwater dependent ecosystem thus may lead to loss of vegetation cover and ultimately land desertification.**

Source: <https://www.conserve-energy-future.com/causes-effects-solutions-of-desertification.php>

<https://www.ipcc.ch/srcl/chapter/chapter-3/>

<https://www.unccd.int/unccd-faq#:~:text=What%20is%20Desertification%3F,and%20dry%20sub%2Dhumid%20areas.>

Q.28) Consider the following statements about Eutrophication, an environmental condition often seen in news:

1. Eutrophication is a natural process of accumulation of excessive nutrients in lakes or other water bodies which may lead to harmful algal blooms.
2. Eutrophication of coastal waters may lead to dominance of gelatinous organisms like jellyfish in the region.
3. Eutrophication may lead to increase in the pH level of the water body.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

Nutrients are essential for plant growth, but the overabundance of nutrients in water can have many harmful health and environmental effects. An overabundance of nutrients—primarily nitrogen and phosphorus—in water starts a process called eutrophication. Algae feed on the nutrients, growing, spreading, and turning the water green.

Statement 1 is correct: Eutrophication is a natural process that results from accumulation of nutrients in lakes or other bodies of water. This may further lead to overgrowth of algae and phytoplankton in the water bodies. Eutrophication occurred naturally over centuries as lakes aged and got filled in with sediments. However, human activities have accelerated the rate and extent of eutrophication through both point-source discharges and non-point loadings of limiting nutrients, such as nitrogen and phosphorus, into aquatic ecosystems.

Statement 2 is correct: Excess nutrients in coastal waters can cause excessive growth of phytoplankton, microalgae (i.e., epiphytes and microphytes), and macroalgae (i.e., seaweed). This in turn will lead to change in species composition and biomass of the benthic (bottom-dwelling) aquatic community, eventually leading to reduced species diversity and the dominance of gelatinous organisms such as jellyfish.

Statement 3 is incorrect: Eutrophication sets off a chain reaction in the ecosystem, starting with an overabundance of algae and plants. The excess algae and plant matter eventually decompose, producing large amounts of carbon dioxide. **The abundance of carbon dioxide leads to production of weak carbonic acid, thus lowering the pH of water and making it more acidic (not increasing the pH of water).**

Q.29) Which of the following criterion are considered for identification of wetlands of International Importance, as per the Ramsar Convention?

1. If a wetland supports vulnerable, endangered, or critically endangered species or threatened ecological communities.
2. If a wetland regularly supports 20,000 or more waterbirds.
3. If a wetland supports plant and/or animal species at a critical stage in their life cycles or provides refuge during adverse conditions.

Which of the statements given above are correct?

- a) 2 and 3 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Criteria for Identifying Wetlands of International Importance were adopted by the 7th (1999) and 9th (2005) Meetings of the Conference of the Contracting Parties, to guide implementation of Article 2.1 on designation of Ramsar wetlands.

Option 1 is correct: A wetland should be considered internationally important if it supports vulnerable, endangered, or critically endangered species or threatened ecological communities.

Option 2 is correct: A wetland should be considered internationally important if it regularly supports 20,000 or more waterbirds.

Option 3 is correct: A wetland should be considered internationally important if it supports plant and/or animal species at a critical stage in their life cycles or provides refuge during adverse conditions.

Source: <https://www.ramsar.org/document/the-ramsar-sites-criteria>

Q.30) Consider the following pairs regarding various types of Bails:

Types of bail	Description
1. Regular Bail	Issued to an accused person to apply for bail before being arrested.
2. Interim Bail	Issued for short period till the application seeking Anticipatory Bail or Regular Bail is pending.
3. Anticipatory Bail	Issued to an individual who is already arrested and detained by police.

How many pairs given above are correctly matched?

- Only one pair
- Only two pairs
- All three pairs
- None of the pairs

Ans) a

Exp) option a is the correct answer.

Judicial phenomenon called bail is described as mechanism established for attaining the synthesis of the right of an accused to personal freedom and the public interest in which a person's release is conditional on the surety producing the accused person in court to stand trial.

Depending on the stage of the criminal proceeding, a person may ask for one of four types of bail in India:

Pair 1 is incorrect: Regular bail is frequently issued to an individual who has already been arrested and detained by police. The accused has the right to be freed from such confinement under Section 437 and Section 439 of the CrPC. So, regular bail is simply the release of an accused from jail to ensure his attendance at the trial.

Pair 2 is correct: Interim bail is bail issued for a short period. Interim bail is granted to an accused before the hearing for regular or anticipatory bail.

Pair 3 is incorrect: If a person suspects that he may be arrested for a non-bailable offence, he may petition for anticipatory bail. Thus, it is a legal provision that allows an accused person to apply for bail before being arrested. In India, pre-arrest bail is granted under section 438 of the Code of Criminal Procedure, 1973. It is issued only by the Sessions Court and High Court.

Knowledge Base: The fourth type of bail is **Statutory Bail**. The remedy of statutory bail, also known as default bail. As the name implies, statutory bail is given when the police or investigating agency fails to file its report/complaint within a certain time frame.

Source: [https://blog.ipleaders.in/types-of-](https://blog.ipleaders.in/types-of-bail/#:~:text=Interim%20Bail%3A%20Interim%20bail%20is,may%20petition%20for%20anticipatory%20bail.)

Q.31) Mangrove vegetation are found in which of the following places in India?

1. Sundarbans
2. Kullu valley
3. Vikhroli Wetlands
4. Gulf of Mannar
5. Gulf of Kutch

Select the correct answer from the codes given below.

- a) 1, 2, and 4 only
- b) 1, 4 and 5 only
- c) 1, 3, 4 and 5 only
- d) 1, 2, 3, 4, and 5

Ans) c

Exp) Option c is the correct answer.

Mangroves are tropical trees that thrive in conditions most timber could never tolerate – salty, coastal waters, and the interminable ebb and flow of the tide. With the ability to store vast amounts of carbon, mangrove forests are key weapons in the fight against climate change.

In India they can be found in the deltas of the Ganga, the Mahanadi, the Krishna, the Godavari and the Kaveri and other river deltas.

Option 1 is correct: The Sundarbans mangrove forest, one of the largest such forests in the world (140,000 ha), lies on the delta of the Ganges, Brahmaputra and Meghna rivers on the Bay of Bengal. It is adjacent to the border of India's Sundarbans World Heritage site inscribed in 1987. The area is known for its wide range of fauna, including 260 bird species, the Bengal tiger and other threatened species such as the estuarine crocodile and the Indian python.

Option 2 is incorrect: The Kullu valley is a hilly region and the vegetation found here is of pine and deodar forests. The southern parts of Kullu have a profusion of Shisham, sal, pine and broad shiny leaved trees. Hence, Mangroves cannot be found here.

Option 3 is correct: Vikhroli wetland is in Mumbai, Maharashtra. It is one of the largest (2000ha) private mangrove forests in the country. More than 16 mangrove species, 82 butterfly species, 208 bird species, 13 crab species, 7 prawn species, 20 fish species and mammals like jackals, wild boards, mongoose, otters and leopards can be spotted at the mangrove ecosystem.

Option 4 is correct: The Gulf of Mannar endowed with three distinct Coastal ecosystems namely coral reef, seagrass bed and mangroves. Most of the islands in the gulf of Mannar have luxuriant growth of mangroves on their shorelines and swampy regions.

Option 5 is correct: Gulf of Kachchh harbours one of the major mangrove formations of India extending to an area of 980 km².

Q.32) Coral bleaching is a process when corals lose their vibrant colors and turn white. In this context, which among the following can be considered as factors responsible for coral bleaching?

1. Increases in seawater temperature.
2. Elevated levels of solar irradiance in the form of ultraviolet radiations
3. Changes in seawater chemistry due to pollution
4. Decreased levels of sediment in seawater
5. Coral's exposure to sodium cyanide

Select the correct answer using the codes given below:

- a) 1 and 4 only
- b) 2, 3 and 5 only
- c) 1, 2, 3 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) c

Exp) Option c is the correct answer.

Coral bleaching, whitening of coral that results from the loss of a coral's symbiotic algae (zooxanthellae) or the degradation of the algae's photosynthetic pigment. Bleaching is associated with the devastation of coral reefs, which are home to approximately 25 percent of all marine species.

Coral bleaching has a variety of causes. It may result from:

Option 1 and 2 are correct: Increases in seawater temperature, particularly when associated with elevated levels of solar irradiance (e.g., ultraviolet radiation)

Option 3 is correct: Changes in seawater chemistry (e.g., due to ocean acidification or pollution)

Option 4 is incorrect: Increased levels of sediment in seawater.

Option 5 is correct: a coral's exposure to sodium cyanide (a chemical used in the capture of coral reef fish)

Under such conditions the zooxanthellae may lose substantial amounts of their photosynthetic pigmentation, which decreases rates of photosynthesis and produces bleaching.

Source: <https://www.britannica.com/animal/coral>

Q.33) Which of the following terms best describes the succession in which biotic factors or living organisms bring changes in the environment to which they themselves belong to?

- a) Primary succession
- b) Secondary succession
- c) Allogenic succession
- d) Autogenic succession

Ans) d

Exp) Option d is the correct answer.

Option a is incorrect: The formation of ecosystem from bare rock, sand or clear glacial pool where previous life does not exist is called primary succession. In this case, the ecosystem is formed from the start. So, it is a long process. It often requires thousands of years.

Option b is incorrect: The formation of a new ecosystem after the disturbance of an existing ecosystem is called secondary succession. The disturbance may be in the form of, forced fire or an abandoned farm field. The previous community leaves some mark in the form of improved soil and seeds. Therefore, secondary succession occurs more rapidly than primary succession.

Option c is incorrect: The succession in which external environmental factors cause change in the environment during succession is called allogenic succession. Soil erosion, leaching or the deposition of silt can change the soil. Similarly, clays can alter the nutrient content and water relationships in the ecosystems. Animals also play an important role in allogenic changes. They act as pollinators, seed dispersers and herbivores. They can also increase nutrient content of the soil in certain areas.

Option d is correct: The succession in which biotic factors or living organisms bring change in the environment of which they themselves belong to, is called autogenic succession. The organisms cause change in the soil. These changes include accumulation of organic matter in form of humus or litter alteration of soil nutrients and change in pH of soil. The structure of the plants themselves can also change the community. For example, larger species like trees produce shade on to the developing forest floor. It destroys the light-requiring species. Shade-tolerant species-establish in the area.

Source: <https://www.dspmuranchi.ac.in/pdf/Blog/PLANT%20SUCCESSION.pdf>

Q.34) Consider the following statements regarding Ecotone:

1. It is a transitional area of vegetation between two different ecological communities.
2. The Ecotone region may contain species not found independently in overlapping communities.
3. Estuaries and lagoons are not considered ecotones as they form the boundary between the water and the land.
4. The influence of the two bordering communities on each other is known as the edge effect.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 3 and 4 only
- c) 1, 2 and 4 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: Ecotone is a transitional area of vegetation between two different ecological communities, such as forest and grassland.

Statement 2 is correct: Ecotone has some of the characteristics of each bordering biological community and often contains species not found in the overlapping communities. An ecotone may exist along a broad belt or in a small pocket, such as a forest clearing, where two local communities blend.

Statement 3 is incorrect: Ecotones also appear where one body of water meets another (e.g., estuaries and lagoons) or at the boundary between the water and the land (e.g., marshes). Freshwater and marine ecotones are characterized by the presence of large plants that rise from roots attached to the submerged substrate, and thus they occur in areas where ample light is available at the bottom of the basin to permit growth.

Statement 4 is correct: The influence of the two bordering communities on each other is known as the edge effect. An ecotonal area often has a higher density of organisms of one species and a greater number of species than are found in either flanking community. Some organisms need a transitional area for activities such as courtship, nesting, or foraging for food.

Source: <https://www.britannica.com/science/ecotone>

Q.35) Consider the following statements regarding New India Literacy Program:

1. The scheme aims to reach non-literates in the age group of 15 years and above.
2. To become a beneficiary non-literates can also register directly through a mobile app.
3. Performance Grading Index (PGI) will show the performance of States on a yearly basis.
4. The scheme is mainly implemented through volunteerism in online mode.

Which of the statements given above are correct?

- a) 3 and 4 only
- b) 1 and 2 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Government approved a new scheme “New India Literacy Programme for the period FYs 2022–2027 to cover all the aspects of Adult Education to align with National Education Policy 2020 and Budget Announcements 2021–22.

Statement 1 is correct: The scheme aims to cover a target of 5.00 crore **non-literates in the age group of 15 years and above**. The Scheme has five components: (i) Foundational Literacy and Numeracy, (ii) Critical Life Skills, (iii) Vocational Skills Development, (iv) Basic Education and (v) Continuing Education.

Statement 2 is correct: For identification of beneficiaries' door-to-door surveys on a mobile app are conducted by surveyors in the States/UTs to identify beneficiaries. Further, **non-literates can also register directly through a mobile app**.

Statement 3 is correct: **Performance Grading Index (PGI) for State/UT and district level will show the performance of States and UTs to implement the scheme and achievements on yearly basis** by weighing both the physical and financial progress through UDISE portal.

Statement 4 is correct: **The scheme will be implemented through volunteerism through online mode**. The training, orientation, workshops of volunteers, may be organized through face-to-face mode. All material and resources shall be provided digitally for easy access to registered volunteers through easily accessible digital modes, viz, TV, radio, cell phone-based free/open-source Apps/portals, etc.

Source) <https://dsel.education.gov.in/nlp>

Q.36) Symbiosis refers to close and often long-term interactions between different species which can take on various forms in nature. In this context, Egret and Rhinoceros share which type of relationship?

- a) Commensalism
- b) Mutualism
- c) Parasitism
- d) Amensalism

Ans) b

Exp) Option b is the correct answer.

Option a is incorrect: **Commensalism is a relationship between individuals of two species in which one species obtains food or other benefits from the other without either harming or benefiting the latter**. One of the best-known examples of commensalism is the remora (family Echeneidae) that rides attached to sharks and other fishes.

Option b is correct: **Mutualism is a form of symbiosis whereby both species benefit from the interaction with each other**.

The Egret is a small white bird found in Africa in Fresh water and Saltwater habitats. Rhinoceros are some of the largest remaining megafunda with all of the species able to reach one ton or more in weight. Symbiotic relationship between them is explained below:

- 1) The Egret cleans the Rhino, by eating ticks and other parasites off of it.
- 2) The Rhino cannot live without the Egret, because it has a hard time getting the ticks off of itself.
- 3) The Egret also warns the Rhino if an enemy is approaching, because the Rhino is near sighted.
- 4) Both organisms' benefit, because the Rhino is cleaned, and the Egret is fed.

Thus, **it can be concluded that Egret and Rhino follow concept of mutualism in their interaction.**

Option c is incorrect: Parasitism is a relationship between two species of plants or animals in which one benefits at the expense of the other, sometimes without killing the host organism. Malaria, which is caused by a protozoan of the genus Plasmodium transmitted to humans by the bite of an anopheline mosquito, is an example of this interaction.

Option d is incorrect: Amensalism is an association between organisms of two different species in which one is inhibited or destroyed and the other is unaffected. For example, destructive effect that the bread mold Penicillium has upon certain bacteria; the secretion, known as penicillin, has become a potent medicine in combating bacterial infections.

Source: <https://lalibela.net/symbiotic-relationships/>

<https://prezi.com/eamm2ukhxsjl/symbiotic-relationship-egret-rhinoceros/?frame=5a986ab65e079ab4bc0f8aa437ebf6ea57016f89>

<https://www.britannica.com/science/amensalism>

Q.37) Consider the following statements regarding Seral community:

1. The individual transitional communities during the process of ecological succession are called as seral communities.
2. In the successive seral stages, there is an increase in the number of species and organisms in seral community.
3. The seral community remains stable as long as the surrounding environment in the ecosystem remains unchanged.

Which of the statements given above is/ are correct?

- a) 2 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

An important characteristic of all communities is that their composition and structure constantly change in response to the changing environmental conditions. These changes lead finally to a community that is in near equilibrium with the environment and that is called a climax community.

Statement 1 is correct: The entire sequence of communities that successively change in a given area are called sere(s). **The individual transitional communities are termed seral stages or seral communities.**

Statement 2 is correct: In the successive seral stages there is a change in the diversity of species of organisms, increase in the number of species and organisms as well as an increase in the total biomass.

The present-day communities in the world have come to be because of succession that has occurred over millions of years since life started on earth. Actually, succession and evolution would have been parallel processes at that time.

Statement 3 is incorrect: The species that invade a bare area are called pioneer species. In primary succession on rocks these are usually lichens which can secrete acids to dissolve rock, helping in weathering and soil formation. These later pave way to some very small plants like bryophytes, which can take hold in the small amount of soil. They are, with time, succeeded by bigger plants, and after several more stages, ultimately a stable climax forest community is formed. **The climax community (and not the seral community) remains stable as long as the surrounding environment in the ecosystem remains unchanged.**

Source: <https://ncert.nic.in/ncerts/l/lebo114.pdf>

Q.38) Allelopathy is a common biological phenomenon by which one plant produces biochemicals that influence the growth, survival, development, and reproduction of other plants. In this reference, which of the following statement is/are correct?

1. All the plants showing allelopathy are invasive species.
2. Allelopathic chemicals can be present in many parts of the plants.
3. The impact of allelopathic chemicals can be reduced if allelopathic plants are planted in sandy soils.

Select the correct answer using the code given below.

- a) 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Allelopathy is defined as direct or indirect harmful effect of one plant over the other crop species through the release of toxic substances from the roots or the decomposition of crop residues. The allelopathic plant competes with other species through "**chemical warfare**" by releasing chemicals that inhibit the growth of its neighboring plants. **For example**, trees that are known to exhibit allelopathic tendencies include maple, pine, and eucalyptus.

Statement 1 is incorrect: All the plants showing allelopathy are not invasive species of plants. Some important cover crops with allelopathic potential include the cereals rye, sorghum, wheat, barley, oat, black mustard, or rapeseed. **But they are not considered invasive species.** The allelopathic potential belonging to a native species could induce a biotic resistance against invasive plants, whereas allelochemicals released by exotic species could favor the establishment of invasive species (invasional meltdown).

Statement 2 is correct: Allelopathic chemicals can be present in any part of the plant. They can be found in leaves, flowers, roots, fruits, or stems. The allelopathic biochemicals of many plants are found in the foliage. As leaves drop and decompose these toxins accumulate in the soil and affect nearby plants. Some plants also release toxins via their roots, which are then absorbed by other plants and trees as well as insects and microbial organisms.

Statement 3 is correct: The physical properties of soil and particularly its texture determine the effect of a potentially allelopathic species. **The impact of allelopathic chemicals can be reduced if allelopathic plants are planted in sandy soils. Because Allelopathic chemicals in sandy soils leach out quickly.** How much chemicals accumulate there depends on how well the soil drains, how much aeration there is in the soil, temperature and a number of other factors. **Clay soils that are poorly drained** result in minimum toxin leaching, whereas **sandy soils are well drained**, which maximizes toxin leaching. **So if you're planting near allelopathic plants, don't put plants sensitive to the chemicals in heavy clay soils.**

<https://www.sciencedirect.com/science/article/pii/S1658365514000090>

Q.39) A keystone species is an organism that helps define an entire ecosystem. With reference to keystone species, consider the following statements:

1. A keystone species is often a predator.
2. All the existing examples of keystone species are animals.
3. If a Keystone species disappear from the ecosystem, then the ecosystem would be forced to radically change, allowing new and possibly invasive species to populate the habitat.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

A keystone species is an organism that helps define an entire ecosystem. **Without its keystone species, the ecosystem would be dramatically different or cease to exist altogether.**

Statement 1 is correct: A keystone species are often, but not always, a predator. Just a few predators can control the distribution and population of large numbers of prey species. For example, Great white shark, Tiger and Saltwater crocodile.

Statement 2 is incorrect: Any organism, from plants to fungi, may be a keystone species. For example - the fig tree is a keystone species. It is a food resource for both the animals and birds. Its leaves are edible to animals but it is its fruits that are mostly sought after. Generally, plants or species are not always the largest or most abundant species in an ecosystem. However, It has been found that **most of examples of keystone species are animals** (but not all) that have a huge influence on food webs.

Statement 3 is correct: Keystone species have low functional redundancy. This means that if the species were to disappear from the ecosystem, no other species would be able to fill its ecological niche. The ecosystem would be forced to radically change, allowing new and possibly invasive species to populate the habitat. Whereas **Higher functional redundancy** provides a form of insurance against population fluctuations or species loss, resulting in stability in community structure.

Source: <https://education.nationalgeographic.org/resource/role-keystone-species-ecosystem/>
[https://pubmed.ncbi.nlm.nih.gov/22046474/#:~:text=Ophiocordyceps%20unilateralis%20\(Ascomycota%3A%20Hypocreales\),predominantly%20in%20tropical%20forest%20ecosystems.](https://pubmed.ncbi.nlm.nih.gov/22046474/#:~:text=Ophiocordyceps%20unilateralis%20(Ascomycota%3A%20Hypocreales),predominantly%20in%20tropical%20forest%20ecosystems.)

Q.40) Scientists have recently confirmed the existence of a fifth new layer in the Earth's interior. In this context, consider the following statements:

1. The fifth layer is the innermost inner core that lies at the Earth's centre, within the inner core.
2. The fifth layer is made of iron and nickel, the same materials that comprise the rest of the inner core.

Which of the statements given above are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Scientists have recently confirmed the existence of a fifth new layer in the Earth's interior. The idea that the Earth could hold a fifth layer was proposed in 2002. Few aspects of this layer are discussed below:

Statement 1 is correct: The four known layers of the Earth include the crust, mantle, outer liquid and inner solid core. **As per the recent study, the fifth layer – the innermost inner core – lies at the Earth’s centre, within the inner core.**

Statement 2 is correct: **The fifth layer is made of iron and nickel, the same materials that comprise the rest of the inner core.** The difference between the two parts of the inner core could stem from how iron atoms are arranged to form a solid. Alternatively, the iron in the innermost inner core could have solidified and grown in a different direction than the rest of the inner core.

Q.41) An ecosystem is the basic unit of the field of the scientific study of nature. The ecosystem is made up of two inseparable components which are biotope and biocenosis. In this context, consider the following statements:

1. Biocenosis represents the non-living components of an ecosystem with specific physical characteristics.
2. Biotope represents the living components of an ecosystem where living organisms are in constant interaction.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

Ecosystem is a biological system (biogeocenosis), consisting of a community of living organisms (**biocenosis**), their habitat (**biotope**), interacting as a system, with its own metabolism and energy exchange.

Statement 1 is incorrect: Biotope (not biocenosis) represents the non-living components of an ecosystem. The soil, water, air, and all the physio-chemical processes going on in an ecosystem comes under the term biotop.

Statement 2 is incorrect: The biocenosis (not Biotope) is a set of living organisms such as animals, plants or micro-organisms, that are in constant interaction and are, therefore, in a situation of interdependence.

Source: <https://youmatter.world/en/definition/ecosystem-definition-example/>

<https://www.earthreminder.com/difference-between-biome-and-ecosystem/#:~:text=Biotope%20represents%20the%20non%2Dliving,living%20things%20in%20an%20ecosystem.>

<https://www.pichimahuida.info/ecosystem.html#:~:text=Biocenosis%20%3A%20interacting%20organisms%20living%20together,assemblage%20of%20plants%20and%20animals.>

Q.42) “These are the large brown algae. They are the underwater forests that grow in relatively shallow waters close to the shore. They are also considered as keystone species and help reduce coastal erosion. They are recognized as one of the most productive and dynamic ecosystems on Earth.”

Which of the following is most likely referred to in the above passage?

- a) Mangrove
- b) Kelp
- c) Vallisneria
- d) Sargassum

Ans) b

Exp) Option b is the correct answer.

Kelp forests are extensive underwater habitats that range along 25% of the world's coastlines. They grow best in cold, nutrient-rich water, where they attain some of the highest rates of primary production of any natural ecosystem.

Statement a is incorrect. Mangroves are the forests that grow in sheltered low-lying coasts, estuaries, mudflats, tidal creek backwaters, marshes and lagoons of the tropical and subtropical regions. They are salt-tolerant or halophytes and are adapted to harsh ecological conditions. E.g., *Sonneratia* and *Avicennia*.

Statement b is correct. Kelp forests are large brown algae seaweeds. They grow in "underwater forests" in shallow oceans and nutrient-rich waters. Generally speaking, kelps live farther from the tropics than coral reefs. However, a few species have been known to occur exclusively in tropical deep waters.

- 1) They are considered as keystone species.
- 2) They help reduce coastal erosion and acts as a breakwater during large storms.
- 3) They are an important source of potash and iodine.
- 4) Many kelps produce algin, a complex carbohydrate useful in industries such as tire manufacturing, ice-cream industry.

Statement c is incorrect. *Vallisneria* is commonly called the eel grass or tape grass. It is the most commonly found aquatic weed plant. It was introduced as an ornamental aquarium plant in India. The genus is widely distributed in tropical and subtropical regions of Asia, Africa, Europe, and North America. In Malayalam, it is known as thalayattipullu, vazhakala and mudipayal. It was recently in news as it is posing a threat to paddy cultivation in the state of Tamil Nadu.

Statement d is incorrect. Recently, the Surge in nitrogen has turned sargassum into the world's largest harmful algal bloom. Sargassum is a genus of large brown seaweed (a type of algae) that floats in island-like masses and never attaches to the seafloor. The Sargasso Sea, lying within the Norwegian current circuit, is full of large quantities of Sargassum seaweed and is an important geographical feature.

Q.43) Consider the following pairs with reference to the phenotypes of organisms due to environmentally induced changes:

Phenotypes of organisms	Description
1. Ecotypes	They are genetically distinct organisms and can interbreed.
2. Ecophenes	They are genetically similar organisms and can interbreed.
3. Ecospecies	They are genetically distinct organisms and cannot produce viable off-springs.

Which of the pairs given above is/are correctly matched?

- a) 3 only
- b) 1 and 2 only
- c) 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Ecotype shows permanence in the adaptation due to the changes in genes, while ecophene shows temporary variations to survive in new conditions, and there are no changes in genes. Ecospecies are the environmentally induced changes in organisms if two ecotones have been separated from each other for a very long time.

Pair 1 is correct: Ecotype is a phenotype of an organism when it lives in a new environment for too long a time period. Two ecotypes show variations in their genetic makeup. Ecotypes can interbreed with other geographically adjacent ecotypes without loss of fertility. When an ecophene remains in its new habitat for too long, it becomes an ecotype. Therefore, **the adaptations are permanent**, and genetic changes occur within the organism. The genes they carry are responsible for the success in the new environment. Adaptations of the ecotypes are based on the interactions between their genes with their new environment. Therefore, they become best adapted to the new habitat and the prevailing conditions. For example, *Euphorbia hirta* has two ecotypes. One ecotype is best adapted to surviving in moist conditions, while the other species is best adapted to surviving in dry conditions.

Pair 2 is correct: Ecophene is the first response or phenotype an organism shows when it arrives in a new environment. There is no genetic difference between these two ecophenes. Ecophene can interbreed with other geographically adjacent ecophene without loss of fertility. But the adaptation and changes are not permanent, and they are reversible. **These adaptations are temporary changes.** They develop only to survive under new environmental conditions. Genetic changes do not happen. Therefore, when the organism returns to the normal habitat, changes are reversed to the normal morphology. **For example**, suppose a European arrives in the tropics. The immediate response will be the development of melanin in his skin. Then the European becomes darker.

Pair 3 is correct: Ecospecies are the environmentally induced changes in organisms if two ecotones have been separated from each other for a very long time. **They are clearly genetically distinct.** The **adaptations become a permanent part of the genes.** However, they are still the same species, but their difference physically and genetically are very distinct. **Two ecospecies cannot produce viable off-springs** (which the ecophenes and ecotones can). When ecospecies are left alone for many, many generations, then develop sufficient changes in them to become a separate species.

Source: <https://www.differencebetween.com/difference-between-ecotype-and-ecophene/>
<https://eco-intelligent.com/2016/11/13/ecophene-ecotone-ecospecies/>

Q.44) Which of the following marine species are generally considered as primary consumers in the aquatic ecosystem?

- a) Bluefin Tuna
- b) Bull shark
- c) Molluscs
- d) Cyanobacteria

Ans) c

Exp) Option c is the correct answer.

A primary consumer is an organism that feeds on primary producers. Organisms of this type make up the second trophic level and are consumed or predated by secondary consumers, tertiary consumers or apex predators.

Options a and b are incorrect: Tertiary consumers are often the “top predators” in a food chain. This means that no other animals eat them. A great white shark leaps out of the water, catching a seal in its jaws. A shark is a tertiary consumer. **Examples of tertiary consumers are Bluefin Tuna and Bull Shark.**

Option c is correct: Molluscs feed on photosynthetic algae or phytoplankton present in the aquatic ecosystem. As they directly feed on the producers, they are considered to be the primary consumers or herbivores of an aquatic ecosystem.

Option d is incorrect: In aquatic environments, cyanobacteria are important primary producers and form a part of the phytoplankton. They may also form biofilms and mats (benthic cyanobacteria).

Source: <https://education.nationalgeographic.org/resource/marine-food-chain/#:~:text=fish%2C%20barnacles%2C%20and-,mollusks,-%E2%80%94drift%20across%20the>

Q.45) Consider the following statements with reference to the Social Stock Exchange (SSE):

1. It will help organizations with social causes to raise capital.
2. Both non-profit organizations and for-profit social enterprises would be eligible to be registered on the SSE.
3. Retail investors are not allowed to invest in the Social Stock Exchange.

Which of the above-given statements is/are correct?

- a) 3 only
- b) 1 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Recently, the National Stock Exchange of India received final approval from SEBI to set up the Social Stock Exchange (SSE).

Statement 1 is correct: The **Social Stock Exchange would function as a separate segment within the existing stock exchange and help social enterprises raise funds from the public through its mechanism.** It will help organizations with social causes to raise capital.

It would serve as a medium for enterprises to seek finance for their social initiatives, acquire visibility and provide increased transparency about fund mobilization and utilization.

Statement 2 is correct: Any **non-profit organisation (NPO) or for-profit social enterprise (FPSEs)** that establishes the primacy of social intent would be recognised as a Social Enterprise, which will make it eligible to be **registered or listed on the Social Stock Exchange.**

Statement 3 is incorrect: Securities issued by all social enterprises are only available for investment by institutional and **non-institutional investors.** Retail investors **can invest in securities offered by for-profit social enterprises.**

Source: <https://www.thehindu.com/business/Economy/explained-combining-social-welfare-and-capital-markets-through-sse/article66569251.ece>

Q.46) Consider the following statements regarding Antibiosis, a type of biotic interaction:

1. It is a form of commensalism where one species gets benefited due to chemical secretion by another species which remains unaffected.
2. Relationship between alfalfa grass and Azotobacter is an example of antibiosis.

Which of the above given statements is/are **incorrect**?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Antibiosis is a mode of species interaction between two or more organism where at least one organism is hurt/killed. It can also be an antagonistic association between an organism, or a metabolic substance produced by the other.

Statement 1 is incorrect- Antibiosis is a type of biotic interaction where one species gets harmed/killed and other species is unhurt. The species unhurt kills the other species using a chemical secretion. Conceptually, in commensalism, one species is benefited and other is unaffected,

Statement 2 is incorrect- Relationship between nitrogen-fixing bacteria (like **Azotobacter**, Bacillus, Clostridium, and Klebsiella) and leguminous plants such as clover, **alfalfa**, and soybeans **is an example of symbiotic type of biotic interaction**. These bacteria live in the roots of the plants and convert atmospheric nitrogen into a form that the plants can use, such as nitrates. The plants provide the bacteria with a place to live and access to carbohydrates produced through photosynthesis. This symbiotic relationship is important because it helps to replenish the soil with nitrogen, which is essential for plant growth.

Source: <https://www.britannica.com/science/amensalism#ref62739>

Q.47) According to the recent amendment to the Environmental Impact Assessment Rules, which of the following projects exempted from the mandatory requirement of environmental clearance from the respective authority?

1. All Thermal Power Plants project up to 15 MW production capacity.
2. All the ports and harbours.
3. Terminal building activities in an airport that do not involve in the increase of airport's existing area,
4. Highway projects of strategic and defence importance, within 100 KM distance from the Line of Control (LOC).

Select the correct answer from the code given below:

- a) 1 and 2 only
- b) 1, 3 and 4 only
- c) 2, 3 and 4 only
- d) 3 and 4 only

Ans) d

Exp) Option d is the correct answer.

The Ministry of Environment, Forests and Climate Change (MoEF&CC) has notified amendments to the Environmental Impact Assessment (EIA) Rules, making several exemptions to gaining environmental clearance.

Exemptions have been provided for the following projects:

Option 1 is incorrect: Biomass Based Power Plants: Thermal power plants up to 15 MW based on biomass or non-hazardous municipal solid waste using auxiliary fuel such as coal, lignite or petroleum products up to 15% have also been exempted – as long as the fuel mix is eco-friendly.

Option 2 is incorrect: Ports and Harbour dealing in Fish: Fish handling ports and harbours with less pollution potential compared to others, and caters to small fishermen, are exempted from environmental clearance. **The recent amendment did not exempt all the ports and harbours from the scope of EIA.**

Option 3 is correct: Expansion activities in existing airports related to terminal building expansion without increase in the airport's existing area, rather than expansion of runways are exempted from mandatory environmental clearance requirements.

It also exempts toll plazas that need more width for installation of toll collection booths to cater to a large number of vehicles.

Option 4 is correct- Strategic and Defence Projects: Exempts highway projects of strategic and defence importance, which are 100 km from the Line of Control, among other locations, from an environmental clearance before construction.

Highway projects related to defence and strategic importance in border states are sensitive in nature and in many cases need to be executed on priority keeping in view strategic, defence and security considerations.

Source: <https://www.thehindu.com/news/national/highways-within-100-km-of-loc-borders-will-not-need-environmental-clearance-centre/article65657889.ece>

<https://indianexpress.com/article/india/environment-ministry-amends-eia-rules-exempts-highways-strategic-importance-8039740/>

Q.48) Consider the following statements regarding ‘Biogeochemical Cycles’:

1. A perfect nutrient cycle is one in which the nutrients are replaced as fast as they are used up.
2. In the imperfect nutrient cycle, some nutrients are lost from the cycle and become unavailable for immediate cycling.
3. All the gaseous cycles are considered imperfect due to loss of nutrients in the atmosphere.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 3 only

Ans) b

Exp) Option b is the correct answer.

The mineral nutrients move from the non-living to the living and then back to the non-living components of the ecosystem in a more or less circular manner. This is known as **biogeochemical cycling** (bio for the living; geo for atmosphere, water, rocks and soil; and chemical for the elements and processes involved).

Statement 1 is correct: The biogeochemical cycle in which the **nutrients are replaced as fast as they, are utilized** is known as Perfect biogeochemical nutrient cycle.

Statement 2 is correct: Some nutrients are lost from the cycle into the soil and sediments and become **unavailable for immediate cycling** i.e., there are more stages in which short-term or long-term stagnation occurs. Such cycle is known as an **imperfect biogeochemical cycle**.

Statement 3 is incorrect: Most **gaseous cycles are generally considered perfect**. Example: The carbon cycle is essentially a perfect one, that is, **carbon is returned to the environment about as fast as it is removed**. The source of all carbon in living organisms, dead. Organic material and fossil deposits is carbon dioxide found in the atmosphere. In contrast, **sedimentary cycles are considered relatively imperfect**.

Source: Unit-6.pdf (egyankosh.ac.in)

Unit-6.pdf (egyankosh.ac.in) Pg 36

Q.49) Which of the following statements correctly explains the meaning of the ‘Carrying Capacity’ of an ecosystem?

- a) It refers to the number of resources each individual within the community is consuming.
- b) It is the maximum population size that an ecosystem can support without degrading itself.
- c) It refers to the total size of renewable resources available in the ecosystem.
- d) It is the sum of all the physical and chemical factors that a species needs to survive in an ecosystem.

Ans) b

Exp) Option b is the correct answer.

In ecological terms, the carrying capacity of an ecosystem is the size of the population that can be supported indefinitely upon the available resources and services of that ecosystem. In other words, it is defined as the maximum population size that an ecosystem can sustainably support without degrading itself.

The limits of an ecosystem depends on three factors:

- 1) the amount of resources available in the ecosystem;
- 2) the size of the population or community; and
- 3) the amount of resources each individual within the community is consuming.

Source: https://www.sustainable-environment.org.uk/Principles/Carrying_Capacity.php

Q.50) Consider the following statements with reference to the Academic Freedom Index Report:

1. It is published by Global Public Policy Institute.
2. Freedom to research and teach is one of the indicators of the report.
3. According to report, Indian universities and scholars experience more academic freedom today than they did ten years ago.

Which of the above given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

According to the Academic Freedom Index report, India's academic freedom index is in the bottom 30% among 179 countries in 2022.

Statement 1 is correct: Academic Freedom Index report is published by **Global Public Policy Institute** as a part of a global time-series dataset (1900-2019) in close cooperation with Friedrich-Alexander University Erlangen-Nürnberg, Scholars at Risk and the V-Dem Institute.

Statement 2 is correct: The Academic Freedom Index report provides an overview of academic freedom in 179 countries by assessing five indicators. It is based on assessments by more than 2,197 country experts from around the world. The **indicators include, Freedom to research and teach Freedom of academic exchange and dissemination, Institutional autonomy of universities, Campus integrity, and the freedom of academic and cultural expression.**

Statement 3 is incorrect: Academic Freedom Index report identified 22 countries, including India, China, the United States and Mexico – where it said universities and scholars experience significantly **less academic freedom today than they did ten years ago.**

Source: <https://www.downtoearth.org.in/news/governance/india-s-academic-freedom-declined-strongly-since-2013-report-88033>

<https://academic-freedom-index.net>

Q.1) Consider the following statements about the Composting and Vermicomposting processes:

1. Composting is essentially an anaerobic process that converts organic materials into mulch.
2. Vermicompost is the process of using earthworms to convert organic waste into nutrient-rich compost.
3. Products of vermicompost generally have high nutrient density compared to the products obtained from normal composting process.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is incorrect. Through controlled aerobic (oxygen-required) breakdown, composting transforms organic materials into a nutrient-rich soil amendment or mulch. Compost, a material that is crumbly, dark, and has an earthy smell, is the end product. The materials added to the compost pile during the composting process are consumed by microorganisms. They require oxygen to breathe, carbon and nitrogen to grow and reproduce, water to digest food.

Statement 2 is correct. Worm composting or vermicomposting is the process of using earthworms to convert organic waste into compost that is rich in nutrients for the growth of plants.

Statement 3 is correct. Vermicompost has great potential as plant growth media, and also serve as a soil conditioner. It is rich in nutrients and beneficial microbes. **Vermicompost contains a higher percentage of both macro and micronutrients than the traditional compost.**

Source: <https://www.epa.gov/recycle/composting-home#:~:text=for%20Home%20Composting-,What%20is%20Composting%3F,crumbly%2C%20earthy%2Dsmelling%20material.>

<https://calrecycle.ca.gov/organics/worms/wormfact/#:~:text=They%20convert%20waste%20into%20worm,for%20the%20production%20of%20worms.>

Q.2) With reference to the Photochemical Smog, consider the following statements:

1. It is formed by the interaction of sunlight with nitrogen oxides (NO_x) and volatile organic compounds (VOCs)
2. The formation of Photochemical smog can lead to an increase in Ground level Ozone.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Photochemical smog is a type of air pollution formed by the interaction of sunlight with nitrogen oxides (NO_x) and volatile organic compounds (VOCs) emitted from various sources, mainly in urban areas. Its components include ozone (O₃), nitrogen dioxide (NO₂), and other secondary pollutants. Exposure to photochemical smog can cause respiratory problems, eye irritation, and harm to vegetation and ecosystems.

Statement 1 is correct: Photochemical smog is a type of air pollution that is formed through the interaction of sunlight with nitrogen oxides (NO_x) and volatile organic compounds (VOCs) that are emitted from various sources, such as vehicles, industrial processes, and natural sources.

Statement 2 is correct: When photochemical smog is formed, it can increase the concentration of ground-level ozone in the affected area. This is because the same chemical reactions that produce photochemical smog also generate ground-level ozone as a secondary pollutant. Thus, when there is a high level of photochemical smog, there is also likely to be an increase in ground-level ozone, which can have harmful effects on human health and the environment.

Source: https://energyeducation.ca/encyclopedia/Photochemical_smog

https://www.epa.sa.gov.au/files/8238_info_photosmog.pdf

Q.3) With reference to Cyclone Warning System in India, consider the following statements:

1. The Indian Meteorological Department (IMD) is the nodal agency responsible for issuing cyclone warnings in India.
2. IMD has formulated the National Cyclone Risk Mitigation Project to protect the vulnerable local communities from the impact of cyclones.
3. There are total seven Cyclone Warning Centers covering the east and west coasts of India.

Which of the above given statements is/are correct?

- a) 1 and 2 only
- b) 3 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) c

Exp) Option c is the correct answer.

Cyclones, which are characterized by rapid inward air circulation around a low-pressure area and are usually accompanied by violent storms and bad weather. There are two types of cyclones: tropical cyclones and extra-tropical cyclones.

Statement 1 is correct: The Indian Meteorological Department (IMD) is the **nodal agency responsible for issuing cyclone warnings in India**. The IMD is also responsible for monitoring, forecasting, and issuing early warnings for severe weather conditions, including cyclones.

Statement 2 is incorrect: Although the IMD plays a critical role in formulating policies and guidelines related to disaster management, the **National Cyclone Risk Mitigation Project is formulated by the Ministry of Home Affairs**, Government of India, and not by the IMD.

Statement 3 is correct: There are **seven Cyclone Warning Centers (CWCs) in India**, covering the east and west coasts of India. The CWCs are located in Chennai, Visakhapatnam, Bhubaneswar, Kolkata, Ahmedabad, Mumbai, and Thiruvananthapuram.

[https://www.tropmet.res.in/ip4/ppt/28112019/1%20CWS-final\(27Nov\).pdf](https://www.tropmet.res.in/ip4/ppt/28112019/1%20CWS-final(27Nov).pdf)

<https://ndma.gov.in/sites/default/files/PDF/Reports/NCRMP-NDMA.pdf>

Q.4) Which of the following statements is/are correct regarding the National Disaster Management Plan (NDMP) 2019 of India?

1. The NDMP was formulated by the National Disaster Management Authority (NDMA).
2. The NDMP covers all phases of disaster management, from prevention to response and recovery.
3. It covers both natural and man-made disasters.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The National Disaster Management Plan (NDMP) 2019 is a comprehensive plan for disaster management in India. It aims to provide a framework for effective response and recovery during disasters, as well as mitigation and prevention measures to reduce the impact of disasters.

Statement 1 is correct: The National Disaster Management Plan (NDMP) of India was formulated and released by the National Disaster Management Authority (NDMA).

Statement 2 is correct: The plan covers **all phases of disaster management, including prevention, mitigation, preparedness, response, and recovery.**

Statement 3 is correct: The NDMP identifies 18 types of disasters, including natural and man-made disasters such as earthquakes, floods, cyclones, droughts, chemical and biological disasters, and nuclear disasters.

Source: <https://ndma.gov.in/sites/default/files/PDF/ndmp-2019.pdf>

Q.5) Which of the following categories of crimes fall under the jurisdiction of the International Criminal Court (ICC)?

- 1. Terrorism
- 2. Genocide
- 3. Corruption
- 4. War Crimes
- 5. Cybercrime

Select the correct code from options given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 5 only
- c) 2 and 4 only
- d) 1, 2, 3, 4 and 5

Ans) c

Exp) Option c is the correct answer.

The International Criminal Court (ICC) has jurisdiction over four main types of international crimes: **genocide, crimes against humanity, war crimes, and the crime of aggression.**

1. **Genocide:** involves the intent to destroy a national, ethnic, racial or religious group through killing, harm, destruction of living conditions, preventing births, or transferring children.
2. **Crimes against humanity** are serious violations committed as part of a large-scale attack against any civilian population, such as murder, rape, enslavement, and torture.
3. **War crimes:** are grave breaches of the Geneva conventions in the context of armed conflict, including the use of child soldiers and intentional attacks against hospitals or historic monuments.
4. **The crime of aggression:** involves the use of armed force by one state against another's sovereignty, integrity or independence. The ICC's jurisdiction over the crime of aggression was activated in 2018.

However, Terrorism, corruption, and cybercrime are not listed under the jurisdiction of the ICC.

Source: <https://www.icc-cpi.int/about/the-court> <https://www.icc-cpi.int/about/how-the-court-works>

Q.6) Consider the following statements about the Fly Ash, an unburnt residue obtained from combustion of coal:

1. In India, Fly ash is often used in agriculture to reduce the pH of soil.
2. In India, it is mandatory to use Fly Ash-based products in road embankments works within 300 km of thermal power stations.
3. Fly ash consists primarily of oxides of silicon, aluminium, iron and calcium.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Fly ash is a residue generated in combustion and comprises the fine particles that rise with the flue gases. It is an unburnt residue obtained from combustion of pulverized coal and is transported from the combustion chamber by exhaust gases.

Statement 1 is incorrect: Fly ash has been shown to act as a liming material to neutralize soil acidity and provide plant-available nutrients. Most of the fly ash produced in India is alkaline in nature; hence, its application to agricultural soils could increase the soil pH and thereby neutralize acidic soils. Fly ash contains some mineral nutrients such as K, Ca, Mg, Fe, Zn, B, Mo and S which promote plant growth and also alleviate the condition of nutrient deficient soils.

Statement 2 is correct: Notification on Fly Ash Utilization has the following features:

- 1) Mandatory to use Fly Ash-based products in all construction projects, road embankments and low-lying filling works within 300 km of thermal power stations.
- 2) Cost of transportation of Fly Ash to be borne entirely by thermal power plants up to 100 km and equally shared between user and thermal power plants for more than 100 km and up to 300 km.
- 3) Mandatory use of Fly Ash-based products in all government schemes like MGNREGA etc.
- 4) Target 100% Fly Ash utilization by 2017

Statement 3 is correct: Fly ash consists primarily of oxides of silicon, aluminium, iron and calcium. Magnesium, potassium, sodium, titanium, and sulfur are also present to a lesser degree.

Source: <https://dst.gov.in/fly-ash-unit-0>

<https://krishijagran.com/featured/fly-ash-in-agriculture-a-way-to-improve-soil-properties/>

Q.7) With reference to the environmental pollutants and their impact on human health, consider the following pairs:

Pollutants	Health Impacts
1. Nitrogen oxides	Inflammation of lungs
2. Cadmium	Itai-Itai disease
3. Carbon Monoxide	Hypoxia

How many pairs given above are correct?

- a) One pair only
- b) Two pairs only
- c) All three pairs
- d) None of the pairs

Ans) c

Exp) Option c is the correct answer.

Pollution is defined as an addition or excessive addition of certain materials to the physical environment (water, air and lands), making it less fit or unfit for life. Environmental pollutants can have immense impact on human health, ranging from normal cough and fever to death.

Pair 1 is correct: Nitrogen oxides can cause irritation and inflammation of lungs, breathlessness, impairs enzyme function in respiratory system and causes bronchitis and asthma.

Pair 2 is correct: Itai-itai disease is caused by cadmium (Cd) exposure, produced as a result of human activities related to industrialisation, and this condition was first recognised in Japan in the 1960s. Itai-itai disease is characterised by severe bone and joints pain and is also associated with renal tubular dysfunction.

Pair 3 is correct: Carbon monoxide reacts with oxygen, creating carboxy haemoglobin (COHb), which leads to hypoxia. In addition, it has direct effect of causing cellular damage. The most common effects of CO exposure are fatigue, headaches, confusion, and dizziness due to inadequate oxygen delivery to the brain.

Source:

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5530151/#:~:text=CO%20reacts%20with%20oxygen%2C%20creating,to%20CO%20can%20also%20seen.>

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5734474/#:~:text=Itai%2Ditai%20disease%20is%20caused,in%20Japan%20in%20the%201960s.&text=Itai%2Ditai%20disease%20is%20characterised,associate d%20with%20renal%20tubular%20dysfunction.>

Q.8) Consider the following statements in the context of impact of environmental pollutants on natural vegetation:

1. Exposure to Sulphur dioxide causes bleaching of leaves.
2. Ozone stunts plant growth and depresses flowering and bud formation.
3. Excessive fluoride exposure inhibits secretion of essential enzymes in plants.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Atmospheric pollutants have a negative effect on the plants; they can have direct toxic effects, or indirectly by changing soil pH followed by solubilization of toxic salts of metals like aluminium. Different pollutants have wide ranging impact on the plants and vegetation.

Statement 1 is correct: The exposure of plant leaves to sulphur dioxide (SO₂) and its by-product sulfuric acid usually results in dry, papery blotches that are generally white, tan, or straw-coloured. On some species, chronic injury causes brown to reddish brown or black blotches. Both the upper and lower leaf surfaces are affected. Hence, it leads to bleaching of leaves.

Statement 2 is correct: Ozone is a very active form of oxygen that causes a variety of symptoms on broad-leaved plants. It stunts plant growth and depresses flowering and bud formation. Ozone exposure reduces the plants' ability to photosynthesize and produce their own food.

Statement 3 is correct: Fluorides in general, are accumulated in the plant tissues over long times. Fluorides combine with metal components of proteins or inhibit them otherwise and thus **interfere with the activity of many enzymes. Thus, it inhibits the secretion of essential enzymes in plants.** As a result, various metabolic processes of plants are affected.

Source: <https://www.intechopen.com/chapters/18642>

<https://ssl.acesag.auburn.edu/pubs/docs/A/ANR-0913/ANR-0913-archive.pdf>

Q.9) Consider the following statements in the context of recent technologies used in controlling the automobile/vehicular emissions

1. EGR (Exhaust Gas Recirculation) system is used to reduce Nitrogen Oxides (NO_x) emission from Internal Combustion engine.
2. The three-way catalytic converters are used in modern vehicles to reduce emission of Carbon monoxide, hydrocarbons and Nitrogen Oxides.
3. Selective Catalytic Reduction (SCR) can significantly reduce tailpipe emission of CFCs (Chlorofluorocarbons) from motor vehicles.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The annual car sales in India are projected to increase from the current 3.5 million to about 10.5 million – a three times increase – by 2030, which will increase exposure to vehicular exhaust emissions. Vehicular emission is a major cause of air pollution in urban areas. Typically, vehicular emission contributes 20-30% of Particulate Matter (PM) 2.5 at the breathing level of air quality.

Major pollutants produced by vehicle exhausts include carbon monoxide, hydrocarbons, nitrogen oxides, particles, volatile organic compounds and Sulphur dioxide.

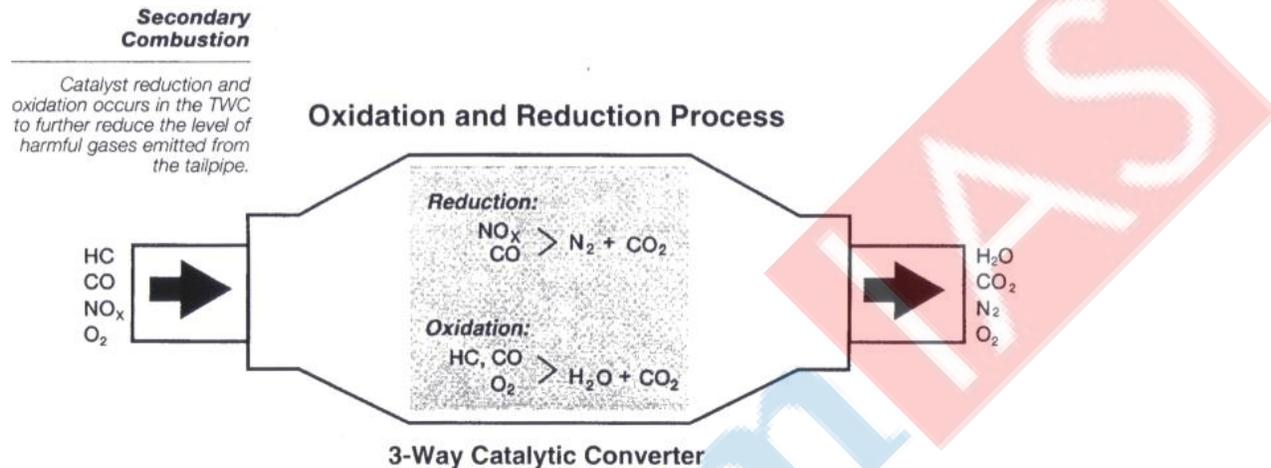

Various emission control technologies like, Catalytic converters, Particulate Filters, Traps & Adsorbers, Substrates, Catalytic coatings etc. are used based on different engine technologies, applications, etc.

Statement 1 is correct: Exhaust gas recirculation (EGR) is an emission control technology allowing significant NO_x emission reductions from most types of diesel engines. The EGR system works by returning a small portion of exhaust gas to the engine's combustion chambers through the intake manifold, lowering combustion temperatures and therefore reducing the amount of NO_x emitted.

Statement 2 is correct: Most modern cars are equipped with three-way catalytic converters. "Three-way" refers to the three regulated emissions which helps reduce - Carbon Monoxide, Hydrocarbon and Nitrogen Oxides. The converter uses different types of catalysts, for reducing and oxidizing the pollutants.

A three-way catalytic converter has three simultaneous functions:

- 1) Reduction of nitrogen oxides into elemental nitrogen and oxygen
- 2) Oxidation of carbon monoxide to carbon dioxide
- 3) Oxidation of hydrocarbons into carbon dioxide and water

Statement 3 is incorrect: Selective Catalytic Reduction is a technology that injects urea – a liquid-reducing agent – into the exhaust stream of a diesel engine. The urea sets off a chemical reaction that converts nitrogen oxides into nitrogen and water in the catalyst, which is then expelled through the vehicle tailpipe. Hence, SCR technology reduces the emission of NOx and not CFCs from the vehicle exhausts. Vehicular tailpipe exhaust doesn't contain significant CFCs emission, even though it may contain a few chlorine or Bromine.

Source: <http://www.ecmaindia.in/emission-control-technology.aspx?mpgid=8&pgidtrail=8#horizontalTab1>

Q.10) Which of the following statements about the Hindu Succession Act are correct?

1. The act does not provide equal rights to women belonging to Scheduled Tribes.
2. The Act is applicable to Sikhs who are not governed by any separate personal law.
3. The Act provides for the devolution of property in case of an intestate succession.
4. The act only applies to self-acquired property and not to ancestral property.

Select the correct code from the options below:

- a) 1 and 3 only
- b) 2 and 4 only
- c) 1, 2, and 3 only
- d) 1, 3, and 4 only

Ans) c

Exp) Option c is the correct answer.

The Hindu Succession Act of 1956 brought about significant changes to the Hindu Law of inheritance and gave daughters equal rights to ancestral and self-acquired property, along with sons. Prior to the Act, daughters were not treated as coparceners and were only entitled to a limited inheritance. The Act was

amended in 2005 to provide equal inheritance rights to daughters, which was a major step towards gender equality in inheritance laws in India.

Statement 1 is correct: Section 2(2) of the Hindu Succession Act excludes daughters of Scheduled Tribes from being considered as "Hindus" for the purpose of the Act. This exclusion results in the denial of their equal rights to inherit their father's or Hindu Undivided Family (HUF) properties. As a result, the daughters of Scheduled Tribes are not entitled to the same rights as other daughters under the Act.

Statement 2 is correct: The Hindu Succession Act is applicable to Sikhs, Jains, and Buddhists who are not governed by any separate personal law.

Statement 3 is correct: The Hindu Succession Act provides for the devolution of property in case of an intestate succession. An intestate succession is when someone dies without leaving a valid will, and their property is inherited according to the rules set out in the Act.

Statement 4 is incorrect: The Hindu Succession Act applies to both self-acquired property and ancestral property. The act provides for different rules for the devolution of ancestral property based on whether it is the property of a joint Hindu family or a divided family.

Source: <https://www.thehindu.com/news/national/include-st-women-in-hindu-succession-act-dmk-mp-wilson-tells-union-government/article66638686.ece>

<https://www.livelaw.in/lawschoolcolumn/hindu-succession-act-for-female-intestates-221707?infinitescroll=1>

Q.11) With reference to the environmental sciences, which of the following statements best explain the term 'Putrescibility'?

- It is the ability of sediments to reduce the potability of water.
- It is the process of thermal decomposition of waste material with the help of incineration.
- It is the process of leaching of heavy metals into groundwater.
- It is the process of decomposition of organic matter by micro-organisms.

Ans) d

Exp) Option d is the correct answer.

Putrescibility is the process of decomposition of organic matter present in water by micro-organisms using oxygen. 'Putrescible wastes' are referred to those solid wastes that contain organic matter capable of being decomposed by microorganisms causing odour-full gases as the products of the decomposition. They are also known as bio-degradable wastes.

Source : Shankar IAS, Environment, Chapter 5, Environmental Pollution.

Q.12) Thermal pollution is a sudden increase or decrease in the temperature of a natural body of water by human influence. In this context, which among the following factors can be considered as the effects of thermal pollution?

- Decrease in the dissolved oxygen levels in the water bodies.
- Adverse impact on biological diversity.
- Decreased metabolic rate in marine organisms.
- Adverse impact on the reproductive system of marine organisms.

Select the correct answer using the codes given below:

- 1 and 2 only
- 1, 2 and 4 only
- 2, 3 and 4 only
- 1, 3 and 4 only

Ans) b

Exp) Option b is the correct answer.

Thermal pollution is defined as a sudden increase or decrease in the temperature of a natural body of water, which may be an ocean, lake, river, or pond, by human influence. This normally occurs when a plant or facility takes in water from a natural resource and puts it back at an altered temperature. Plants that produce different products or wastewater facilities are often the culprits of this massive exodus of thermal pollution.

Some of the impacts of the thermal pollution are discussed below:

Statement 1 is correct: The warm temperature reduces the levels of DO (Dissolved Oxygen) in the water.

The warm water holds relatively less oxygen than cold water due to it being incapable. The decrease in DO can create suffocation for plants and animals such as fish, amphibians, and copepods, which may give rise to anaerobic conditions.

Statement 2 is correct: The sudden heating of waterbodies can kill off vulnerable organisms or drive them away. This is one of many serious issues for threatened and endangered animal species. This loss can come from organisms dying from the hot water, being unable to reproduce as effectively as before, or simply leaving the area. We usually think of animals as casualties of water pollution, but multi-celled aquatic plants are also at risk when thermal pollution changes the local aquatic ecosystem. Thus, thermal pollution has an adverse impact on biodiversity.

Statement 3 is incorrect: Thermal pollution increases the metabolic rate of organisms as increasing enzyme activity occurs, which causes organisms to consume more food than what is normally required if their environment were not changed. It disrupts the stability of the food chain and alters the balance of species composition.

Statement 4 is correct: A significant halt in the reproduction of marine wildlife can happen due to increasing temperatures, as reproduction can happen within a certain range of temperatures. Excessive temperatures can cause the release of immature eggs or can prevent the normal development of certain eggs.

Source: <https://www.conserve-energy-future.com/causes-and-effects-of-thermal-pollution.php>

Q.13) Consider the following statements regarding Microplastics:

1. Microplastics are tiny plastic particles which are 10mm or more in length.
2. Microplastics may consist of carbon and hydrogen atoms bound together in polymer chains.
3. Microbeads are a type of microplastics widely used as exfoliants in the cosmetic industry.
4. Consumption of microplastics by marine animals can result in neurological and reproductive toxicity.

Which of the statements given above are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 2, 3 and 4 only
- d) 1, 2 and 4 only

Ans) c

Exp) Option c is the correct answer.

Microplastics are found in growing quantities in the ocean. According to the UN, there are as many as 51 trillion microplastic particles in the seas, 500 times more than stars in our galaxy. Some of the aspects of microplastics are discussed below:

Statement1 is incorrect: Plastic is the most prevalent type of marine debris found in our ocean and Great Lakes. Plastic debris can come in all shapes and sizes, but **those that are less than five millimeters in length are called “microplastics.”**

Statement 2 is correct: Microplastics consist of carbon and hydrogen atoms bound together in polymer chains. Other chemicals, such as phthalates, polybrominated diphenyl ethers (PBDEs), and tetrabromobisphenol A (TBBPA), are typically also present in microplastics, and many of these chemical additives leach out of the plastics after entering the environment.

Statement 3 is correct: Microbeads are a kind of microplastic with a specific function for scrubbing or exfoliating. Microbeads are widely used in the cosmetic industry.

Statement 4 is correct: By 2018, in marine and freshwater ecosystems combined, microplastics had been found in more than 114 aquatic species. Microplastics have been found lodged in the digestive tracts and tissues of various invertebrate sea animals, including crustaceans such as crabs. Fish and birds are likely to ingest microplastics floating on the water surface, mistaking the plastic bits for food. **The ingestion of microplastics can cause aquatic species to consume less food and therefore to have less energy to carry out life functions, and it can result in neurological and reproductive toxicity.**

Source: <https://www.britannica.com/technology/microplastic>

<https://oceanservice.noaa.gov/facts/microplastics.html#:~:text=Most%20plastics%20in%20the%20ocean,through%20waterways%20into%20the%20ocean.>

Q.14) Which one of the following factors is responsible for the occurrence of a neurological syndrome called Minamata disease?

- Lead poisoning
- Chromium poisoning
- Cadmium poisoning
- Mercury poisoning

Ans) d

Exp) Option d is the correct answer.

Heavy metal poisoning is the accumulation of heavy metals, in toxic amounts, in the soft tissues of the body. The heavy metals most commonly associated with poisoning of humans are lead, mercury, arsenic and cadmium. Heavy metal poisoning may occur as a result of industrial exposure, air or water pollution, foods, medicines, improperly coated food containers, or the ingestion of lead-based paints.

Option a is incorrect: Lead is a cumulative toxicant that affects multiple body systems and is particularly harmful to young children. Lead exposure also causes anaemia, hypertension, renal impairment, immunotoxicity and toxicity to the reproductive organs. The neurological and behavioural effects of lead are believed to be irreversible.

Option b is incorrect: When inhaled, chromium compounds are respiratory tract irritants and can cause pulmonary sensitization. Chronic inhalation of Cr(VI) compounds increases the risk of lung, nasal, and sinus cancer. Severe dermatitis and usually painless skin ulcers can result from contact with Cr(VI) compounds. Chromium compounds can be sensitizers as well as irritants. Ingestion of a lethal dose of chromate can result in cardiovascular collapse.

Option c is incorrect: Cadmium is a heavy metal that causes direct harm to humans in several forms. Large amounts of cadmium can severely irritate the stomach and cause vomiting and diarrhea. Breathing high levels of cadmium damages people's lungs and can cause death. Exposure to low levels of cadmium in air, food, water, and particularly in tobacco smoke over time may build up cadmium in the kidneys and cause kidney disease and fragile bones. Cadmium is considered a cancer-causing agent.

Option d is correct: Minamata disease is a large-scale mercury poisoning resulting from methylmercury contamination, usually in seafood. Minamata disease results in irreversible damage to the nervous system. The disease first occurred when toxic pollutants affected the fish that comprised the food supply of the coastal community in Minamata, Japan.

Minamata disease causes neurological signs and symptoms, including:

- 1) sensory disturbance
- 2) ataxia, a lack of muscle coordination that may affect a person's voluntary movements.
- 3) dysarthria, a collective term for a group of speech disorders that occur due to muscle weakness
- 4) tunnel vision**

Source : <https://www.who.int/news-room/fact-sheets/detail/lead-poisoning-and-health#:~:text=Lead%20exposure%20also%20causes%20anaemia,are%20believed%20to%20be%20irreversible.>

[https://www.atsdr.cdc.gov/csem/chromium/physiologic_effects_of_chromium_exposure.html#:~:text=Some%20Cr\(VI\)%20compounds%2C,may%20result%20in%20hematological%20toxicity.](https://www.atsdr.cdc.gov/csem/chromium/physiologic_effects_of_chromium_exposure.html#:~:text=Some%20Cr(VI)%20compounds%2C,may%20result%20in%20hematological%20toxicity.)

<https://rarediseases.org/rare-diseases/heavy-metal-poisoning/>

Q.15) Which of the following statements about the Piezoelectric Effect are correct?

1. It is the property of certain materials to generate electric charge in response to applied mechanical stress.
2. Usually, the materials exhibiting the piezoelectric effect also exhibit the converse piezoelectric effect (i.e., the generation of stress when an electric field is applied).
3. It is a novel concept and is yet to be used on a commercial scale.

Select the correct code from the options below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) a

Exp) Option a is the correct answer.

The piezoelectric effect occurs due to the alignment of atoms or molecules in a crystal lattice structure. When an external force is applied to the crystal, it distorts the crystal lattice structure, causing a displacement of ions. This displacement creates an electric field, which in turn generates an electrical charge.

Statement 1 is correct: The Piezoelectric Effect is the property of certain materials to generate an electric charge in response to applied mechanical stress. This effect is observed in materials such as quartz, certain ceramics, and biological matter such as bone and DNA.

Statement 2 is correct: One of the unique characteristics of the piezoelectric effect is that it is reversible, meaning that materials exhibiting the direct piezoelectric effect (the generation of electricity when stress is applied) also exhibit the converse piezoelectric effect (the generation of stress when an electric field is applied).

Statement 3 is incorrect: Piezoelectric materials have been used in various commercial applications for many years. They are widely used in various applications, including ultrasonic transducers, sensors, actuators, and energy harvesters.

Source: <https://www.circuitbread.com/ee-faq/what-is-piezoelectric-effect>
<https://www.sciencedirect.com/topics/engineering/piezoelectric-effect>
<https://www.electronicdesign.com/power-management/article/21801833/what-is-the-piezoelectric-effect> <https://www.nanomotion.com/nanomotion-technology/the-piezoelectric-effect/#:~:text=Piezoelectric%20Effect%20is%20the%20ability,is%20Greek%20for%20%E2%80%9Cpush%20%E2%80%9D.>

Q.16) Consider the following statements with reference to the initiative “Forum for Decarbonizing Transport”, that has been often mentioned in the news:

1. It was recently launched by the Government of India in collaboration with the World Bank.
2. It aims to bring down the peak level of Greenhouse Gas emissions from the transport sector in Asia.

Which of the above given statements is/ are **incorrect**?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is incorrect. As a part of the NDC-Transport Initiative for Asia (NDC-TIA) initiative, NITI Aayog and World Resources Institute (WRI) India have created the Forum for Decarbonising Transport to catalyze and sustain stakeholder engagements to support policymaking for more ambitious transport action.

Statement 2 is correct. The initiative aims to bring down the peak level of Greenhouse Gas emissions (transport sector) in Asia (in line with a well below 2-degree pathway), resulting in reduction of problems like congestion and air pollution.

Knowledge Base: NDC Transport Initiative for Asia (TIA 2020-2023) is a joint programme of seven organisations that will engage China, India, and Vietnam in promoting a comprehensive approach to decarbonizing transport in their respective countries. The project is part of the International Climate Initiative (IKI). The Federal Ministry for the Environment, Nature Conservation and Nuclear Safety (BMU) support the initiative on the basis of a decision adopted by the German Bundestag.

Source:

<https://www.google.com/url?sa=t&source=web&rct=j&url=https://www.pib.gov.in/PressReleasePage.aspx%3FPRID%3D1748514&ved=2ahUKEwjZso-Lybr-AhWW-TgGHSiCBDoQFnoECFsQAQ&usg=AOvVaw0rx7c5iYrHvl-3KZXBHzGn>

Q.17) Consider the following statements regarding Arsenic contamination in India:

1. Arsenic is introduced into soil and groundwater during weathering of rocks and minerals.
2. Long-term intake of arsenic contaminated water can lead to skin and lung cancer.
3. In India, Goa and Maharashtra are reported to be most affected by arsenic contamination of groundwater.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Arsenic is a natural component of the earth's crust and is widely distributed throughout the environment in the air, water and land. It is highly toxic in its inorganic form. The greatest threat to public health from arsenic originates from contaminated groundwater.

People are exposed to elevated levels of inorganic arsenic through drinking contaminated water, using contaminated water in food preparation and irrigation of food crops, industrial processes, eating contaminated food and smoking tobacco.

Statement 1 is correct: Arsenic is introduced into soil and groundwater during weathering of rocks and minerals followed by subsequent leaching and runoff. It can also be introduced into soil and groundwater from anthropogenic sources. Arsenic is emitted into the atmosphere by high-temperature processes such as coal-fired power plants, burning vegetation and volcanism. In water, particularly groundwater, where there are sulfide mineral deposits and sedimentary deposits deriving from volcanic rocks, the concentrations can be significantly elevated. Natural low-temperature biomethylation and reduction to arsines also releases arsenic into the atmosphere.

Statement 2 is correct: Long-term intake of arsenic contaminated water leads to arsenic poisoning or arsenicosis, with cancer of skin, bladder, kidney or lung or diseases of skin (colour changes, and hard patches on palms and soles), or blood vessels of legs and feet. Fresh evidence indicates possible association between intake of contaminated water to onset of diabetes, hypertension and reproductive disorders.

Statement 3 is incorrect: In India, the states of West Bengal, Jharkhand, Bihar, Uttar Pradesh, Assam, Manipur and Chhattisgarh are reported to be most affected by arsenic contamination of groundwater above the permissible level.

As per the latest ground water quality data generated by Central Ground Water Board (CGWB) in 2021, States like Maharashtra, Kerala, Uttarakhand, Goa, Tripura and Arunachal Pradesh have not reported arsenic contamination.

Source: <https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1706657>

<https://www.who.int/india/health-topics/arsenic>

<https://www.who.int/news-room/fact-sheets/detail/arsenic>

<https://cpcb.nic.in/about-namp/>

Q.18) With reference to Radioactive Pollution, consider the following statements:

1. Compared to non-ionizing radiation, ionizing radiation has lower frequency and longer wavelength.
2. Ionizing Radiation may cause significant damage to DNA whereas the non-ionizing radiation generally causes thermal damage to the tissues.

Which of the statements given above is/are correct?

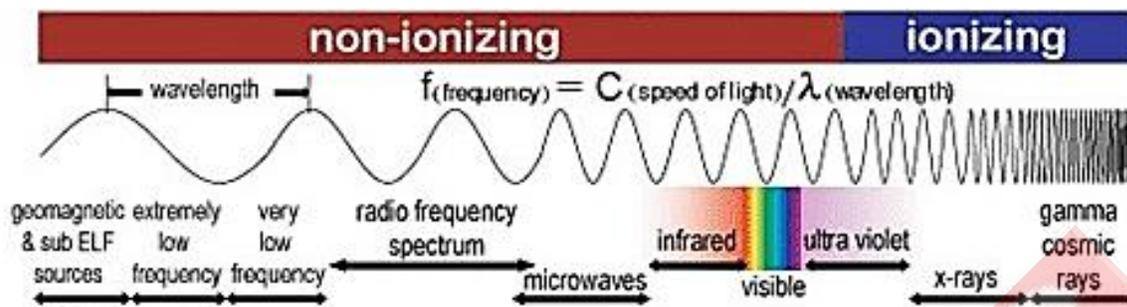

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Radiation is the energy that a body or source emits and that is then absorbed by another body after passing through a space or medium. Despite wave/particle duality in quantum physics, transmission occurs in the form of waves.

Statement 1 is incorrect: Radiation in the ultraviolet band and at lower energies (to the left of ultraviolet) is called non-ionizing radiation, while at the higher energies to the right of the ultraviolet band is called ionizing radiation. **Non-ionizing radiation has longer wavelength and lower frequency whereas ionizing radiation will have short wavelengths and high frequency.**

Statement 2 is correct. Ionizing Radiation contains sufficient energy to produce ions in matter at the molecular level. Significant harm, such as DNA damage and protein denaturation, may occur if the matter is a human. This is not to imply that non-ionizing radiation cannot harm people, but the harm is generally limited to thermal damage to tissues, such as burns.

Source: https://www.aocopm.org/assets/documents/10-31-11_Basic_Course_III_Orlando/ionizing%20an%20non.pdf

Q.19) Consider the following statements about the Dioxins:

1. Dioxins are a type of persistent environmental pollutants (POPs).
2. In human beings, dioxins can cause cancer as well as developmental and reproductive issues.
3. More than 90% of human exposure to dioxins happens through inhalation of the polluted air.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct. Dioxins are a category of persistent environmental pollutants (POPs) that are a group of chemically related compounds. Dioxins can be found in the environment all around the world, and they build up in the food chain, especially in the fatty tissue of animals.

Over 90% of human exposure occurs through food, primarily through meat, dairy, fish, and shellfish.

Statement 2 is correct. Dioxins are extremely toxic, and they can harm the immune system, interfere with hormones, impair reproductive and developmental processes, and can even cause cancer. Due to the worldwide distribution of dioxins, all people have background exposure, which is unlikely to affect human health. The highly toxic potential, however, necessitates actions to reduce the current background exposure.

Statement 3 is incorrect. Dioxins are found throughout the world in the environment, and they accumulate in the food chain, mainly in the fatty tissue of animals. **According to WHO, more than 90% of human exposure is through food, mainly meat and dairy products, fish and shellfish.** Many national authorities have programmes in place to monitor the food supply.

Source: <https://www.who.int/news-room/fact-sheets/detail/dioxins-and-their-effects-on-human-health>

Q.20) What criteria are taken into consideration when selecting institutions for the Institution of Eminence (IoE) Scheme in India?

1. Academic excellence
2. Financial sustainability

3. Research output
4. Location in urban areas

Select the correct answer from the code given below:

- a) 1 and 2 only
- b) 1, 2 and 3 only
- c) 1, 2, 3 and 4
- d) 2 and 4 only

Ans) b

Exp) Option b is the correct answer.

The Institution of Eminence (IoE) scheme was launched by the Government of India in 2017 to identify and support Indian institutions of higher education that have the potential to become world-class universities. Under the scheme, 10 public and 10 private institutions are to be selected as IoEs and provided with financial assistance of up to Rs 1,000 crore over a period of five years.

Academic excellence, research output, financial sustainability, and governance are the criteria considered for the selection of institutions under the Institution of Eminence (IoE) Scheme in India.

Location in urban areas is not one of the criteria.

Knowledge Base:

The scheme expects the institutions to have highly qualified faculty, academic, administrative and financial autonomy, excellence in research, high quality of teaching, high levels of funding, transparent merit-based selection in admissions, and a significant proportion of international students, among other notable features.

Source: <https://indianexpress.com/article/express-exclusive/for-private-campus-institution-of-eminence-tag-gift-wrapped-in-red-tape-8522548/> <https://ioe.ugc.ac.in/Home/About>

Q.21) With reference to Lead poisoning, consider the following statements:

1. Children are much less vulnerable to Lead poisoning than adults due to their strong digestive mechanism.
2. Lead poisoning primarily affects the brain and nervous system.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Lead is a toxic metal found in the Earth's crust that has resulted in widespread environmental contamination and human exposure. It is used in various products, including lead-acid batteries, pigments, paints, ammunition, jewellery, and traditional medicines. Drinking water delivered through lead pipes may also contain lead. Recycling is now a major source of global lead consumption.

Statement 1 is incorrect: Young children are particularly vulnerable to lead poisoning because they absorb 4-5 times as much ingested lead as adults from a given source. They tend to inhale and ingest more lead than adults due to their hand-to-mouth behavior, and their developing bodies and brains are more susceptible to the toxic effects of lead. Hence, this statement is incorrect.

Statement 2 is correct: Lead primarily affects the brain and nervous system, and can cause developmental delays, decreased IQ, and behavioral problems in children. In adults, lead exposure can cause high blood pressure, kidney damage, and reproductive problems.

Source: <https://www.who.int/news-room/fact-sheets/detail/lead-poisoning-and-health>

Q.22) With reference to Bioremediation, consider the following statements:

1. Landfarming is an example of the ex-situ type of bioremediation.
2. Bioventing and Bio Sparging are examples of in-situ bioremediation techniques.
3. In general, ex-situ bioremediation techniques are costlier than the in-situ bioremediation techniques.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Utilizing microorganisms to transform environmental toxins into less harmful forms is known as bioremediation. The microorganisms might have been isolated elsewhere and brought to the contaminated location, or they might be indigenous to the contaminated area.

Statement 1 is correct. Ex-Situ bioremediation techniques involve the removal or excavation of contaminated soil from the ground. Landfarming is a simple technique in which contaminated soil is excavated and spread over a prepared bed, and periodically tilled until pollutants are degraded.

Statement 2 is correct. In-situ techniques are defined as those applied to soil and groundwater at the site with minimal disturbance. **Bioventing is the most common in situ treatment and involves supplying air and nutrients through wells to contaminated soil to stimulate the indigenous bacteria.** Bioventing employs low airflow rates and provides only the amount of oxygen necessary for biodegradation while minimizing volatilization and releasing contaminants to the atmosphere. Bio sparging is also an example of in-situ bioremediation technique that involves injecting air under pressure below the water table to increase groundwater oxygen concentrations and enhance the rate of biological degradation of contaminants by naturally occurring bacteria.

Statement 3 is correct: Ex-situ bioremediation techniques tend to be more costly due to excavation and transportation from polluted sites. In contrast, in-situ techniques have no extra cost for excavation; however, it also involves the cost of on-site installation of equipment but generally this cost is lesser compared to the cost incurred on transportation and treatment of waste in ex-situ bioremediation.

Source: <https://agriculturistmusa.com/types-of-bioremediation-strategies/>

Q.23) With reference to the Soil Pollution, consider the following statements:

1. Mercury contamination in the soil can suppress crop growth and can also affect human health through bioaccumulation.
2. Overuse of chemical fertilizers may increase the salt content of the soil.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Soil pollution refers to the "addition of substances to the soil, which adversely affects physical, chemical, and biological properties of soil and reduces its productivity.

It is the accumulation of persistent toxic substances, chemicals, salts, radioactive elements, or disease-causing agents in the soil that have a negative impact on the growth of plants as well as on the health of people and animals.

Statement 1 is correct. Mercury contamination in soil, water and air is associated with potential toxicity to humans and ecosystems. Industrial activities such as coal combustion have led to increased mercury (Hg) concentrations in different environmental media. **Mercury contamination in the soil can suppress crops growth or kill plants, eventually affecting human health through bioaccumulation.**

Statement 2 is correct. Excessive use of chemical fertilizers decreases the population of organisms that live in the soil and the spheroidal structure of the soil, productivity of the soil and **increases salt content of the soil.**

Source: <https://www.environmentalpollutioncenters.org/soil/>

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6862694/#:~:text=Mercury%20contamination%20in%20the%20soil%20can%20suppress%20crops%20growth%20or%20kill%20plants%2C%20eventually%20affecting%20human%20health%20through%20bioaccumulation>

Q.24) Which of the following can be considered as the impact of Noise Pollution?

1. It can adversely affect communication and navigation among the marine organisms.
2. In human beings, noise pollution can lead to the development of a disorder known as Albinism.
3. Noise pollution can affect dissemination and germination of seedlings.

Select the correct answer from the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. Increasing noise is not only affecting animals on land, it is also a growing problem for those that live in the ocean. Ships, oil drills, sonar devices, and seismic tests have made the once tranquil marine environment loud and chaotic. **Whales and dolphins are particularly impacted by noise pollution. These marine mammals rely on echolocation to communicate, navigate, feed, and find mates, and excess noise interferes with their ability to effectively echolocate.**

Statement 2 is incorrect. Albinism refers to a group of genetic conditions marked by little or none of the pigment melanin in the skin, hair, and/or eyes. People with albinism may have vision problems and white or yellow hair; reddish, violet, blue or brown eyes; and pale skin.

Noise pollution generally causes Noise Induced Hearing Loss (NIHL). Exposure to loud noise can also cause high blood pressure, heart disease, sleep disturbances, and stress.

Statement 3 is correct. In 2007, the researchers **found that noise pollution from the gas wells disrupted seedling dissemination and germination of the pinyon pine and the juniper.** This was most likely due to the noise driving away the scrub jay, which disperses the seeds of the former tree species, and small mammals that disperses the seeds of the latter. They also found 75% fewer pinyon pine seedlings in noisy sites than quiet ones.

Source: <https://education.nationalgeographic.org/resource/noise-pollution/>

www.thehindu.com/children/the-impact-of-noise-on-trees/article34803313.ece/amp/

Q.25) With reference to various initiatives launched by the Government of India, Consider the following pairs:

Initiative	Launched by
1. SWAYATT Initiative	Ministry of Commerce and Industry
2. SAMRIDH Scheme	Ministry of Electronics and Information Technology
3. Dhara Initiative	Ministry of Culture

How many of the above given pairs are correctly matched?

- Only one pair
- Only two pairs
- All three pairs
- None of the pairs

Ans) c

Exp) Option c is the correct answer.

Pair 1 is correctly matched: SWAYATT (Start-ups, Women and Youth Advantage Through Transactions) is a program launched by the Ministry of Commerce and Industry to promote and support entrepreneurs, especially women and youth, by providing them with a platform to showcase their products and services and connect with potential buyers.

Pair 2 is correctly matched: SAMRIDH (Startup Accelerators of MeitY for Product Innovation, Development, and Growth) is a scheme launched by the Ministry of Electronics and Information Technology to support existing and upcoming accelerators in selecting and accelerating potential IT-based startups to scale for solving India's problems and creating positive social impact.

Pair 3 is correctly matched: Dhara is a series of programs powered by lecture demonstrations launched by the **Ministry of Culture** to celebrate and showcase India's contribution and achievements across diverse fields, with the first event dedicated to **'India's Contribution to Mathematics Through Ages.'**

Source: <https://dhara.amritmahotsav.nic.in/>

<https://www.meity.gov.in/writereaddata/files/SAMRIDH%20Scheme%20Document.pdf>

<https://www.pib.gov.in/PressReleasePage.aspx?PRID=1903442>

Q.26) Consider the following statements about National Air Quality Monitoring Programme (NAMP):

- It is being implemented by the Central Pollution Control Board.
- It does not include Carbon dioxide among air pollutants that are monitored under the programme.
- Wind speed, relative humidity and temperature are also monitored under NAMP.

Which of the statements given above are correct?

- 1 and 3 only
- 1 and 2 only
- 2 and 3 only
- 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct. The Central Pollution Control Board is executing a nationwide programme of ambient air quality monitoring known as National Air Quality Monitoring Programme (NAMP).

Statement 2 is correct. Under N.A.M.P. viz., Sulphur Dioxide (SO₂), Oxides of Nitrogen as NO₂, Respirable Suspended Particulate Matter (RSPM / PM₁₀) and Fine Particulate Matter (PM_{2.5}) have been identified for regular monitoring at all locations.

Statement 3 is correct. The monitoring of meteorological parameters such as wind speed and wind direction, relative humidity (RH) and temperature are also integrated with the monitoring of air quality. The monitoring of pollutants is carried out for 24 hours (4-hourly sampling for gaseous pollutants and 8-hourly sampling for particulate matter) with a frequency of twice a week, to have one hundred and four (104) observations in a year. The monitoring is being carried out with the help of Central Pollution Control Board; State Pollution Control Boards; Pollution Control Committees; National Environmental Engineering Research Institute (NEERI), Nagpur.

Source: <https://cpcb.nic.in/about-namp/>

Q.27) Consider the following statements about the Society of Integrated Coastal Management (SICOM):

1. It has been established under the aegis of the Union Ministry of Ports, Shipping and Waterways.
2. It acts as a technical Secretariat to the National Coastal Zone Management Authority (NCZMA).
3. India's eco-label programme BEAMS (Beach Environment & Aesthetic Management Services) has been prepared by SICOM.

Which of the statements given above is/are correct?

- a) 2 only
- b) 1 and 3 only
- c) 1, 2 and 3
- d) 2 and 3 only

Ans) d

Exp) Option d is the correct answer.

Statement 1 is incorrect. Society of Integrated Coastal Management (SICOM) has been established under the aegis of the Ministry of Environment, Forests and Climate change, Government of India. It has a vision for a vibrant, healthy and resilient Coastal and Marine Environment for continuous and enhanced outflow of benefits to the Country and the Coastal Community.

Statement 2 is correct. SCIOM is a Nodal agency for strategic planning, management, execution, monitoring and successful implementation of Integrated Coastal Zone Management (ICZM) practices in across the country and National Project Management Unit (NPMU) for the ICZM Project and ENCORE project in all the 13 Coastal States/UTs.

SICOM acts as a technical Secretariat to the National Coastal Zone Management Authority (NCZMA) related to regulatory provisions and CRZ classification of coastal stretches of the country.

Statement 3 is correct. In 2020, India has launched its own eco-label BEAMS (Beach Environment & Aesthetics Management Services) under ICZM (Integrated Coastal Zone Management) project.

BEAMS has been prepared by the Society of Integrated Coastal Management (SICOM) under MoEFCC.

Source: <https://sicom.nic.in/about-us/about-sicom>

Q.28) Consider the following initiatives under the Namami Gange Programme:

1. The project of "Forestry Interventions for Ganga" is being exclusively implemented by the World bank in collaboration with Zoological Survey of India.
2. The Ganga Gram programme was launched by the Ministry of Drinking Water and Sanitation for holistic sanitation development of identified villages.
3. Conservation steps of some iconic species such as Golden Mahseer, Dolphins and Gharials are taken.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is incorrect. Forestry Interventions for Ganga is a sub part of Namami Gange Programme. The main purpose of the forestry interventions is to contribute towards holistic conservation of river Ganga, including improving the flow in the river (Aviralta) by adopting a multi-pronged approach throughout the pre-defined Ganga riverscape. **The project of “Forestry Interventions for Ganga” is being implemented by State Forest Departments of Uttarakhand, Uttar Pradesh, Bihar, Jharkhand, and West Bengal (not by the World Bank)** since year 2016-17, for which NMCG is providing financial support to the respective State Forest Departments.

Statement 2 is correct. Ministry of Drinking Water and Sanitation launched the ‘Ganga Gram’ project as part of Namami Gange, for holistic sanitation development in 4,470 villages on the banks of the river. The ministry identified 1674 Gram Panchayats situated on the bank of River Ganga in 5 States (Uttarakhand, Uttar Pradesh, Bihar, Jharkhand and West Bengal).

Statement 3 is correct. Under Namami Gange, Conservation of key **iconic species such as Golden Mahseer, Dolphins, Gharials, Turtles, Otters, etc. have been already initiated.** Similarly, under ‘NamamiGange’ 30,000 hectares of land will be afforested for increased recharge of the aquifers, reduced erosion, and improved health of river ecosystem.

Source: <https://nmcg.nic.in/NamamiGanga.aspx>

<https://pib.gov.in/newsite/printrelease.aspx?relid=174802>

Q.29) In the context of National Air Quality Index (AQI), consider the following statements:

1. AQI is divided into six categories based on the level of pollution in the area.
2. Four pollutants are considered for calculating AQI including Methane and Carbon dioxide.
3. AQI is calculated only if data are available for a minimum of three pollutants out of which one should necessarily be either PM2.5 or PM10.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 3 only

Ans) a

Exp) Option a is the correct answer.

Air Quality Index is a tool for effective communication of air quality status to people in terms which are easy to understand. It transforms complex air quality data of various pollutants into a single number (index value), nomenclature and color.

Statement 1 is correct. There are **six AQI categories, namely Good, Satisfactory, Moderately polluted, Poor, Very Poor, and Severe.** Each of these categories is decided based on ambient concentration values of air pollutants and their likely health impacts (known as health breakpoints)

Table 3.11 Breakpoints for AQI Scale 0-500 (units: $\mu\text{g}/\text{m}^3$ unless mentioned otherwise)

AQI Category (Range)	PM ₁₀ 24-hr	PM _{2.5} 24-hr	NO ₂ 24-hr	O ₃ 8-hr	CO 8-hr (mg/m ³)	SO ₂ 24-hr	NH ₃ 24-hr	Pb 24-hr
Good (0-50)	0-50	0-30	0-40	0-50	0-1.0	0-40	0-200	0-0.5
Satisfactory (51-100)	51-100	31-60	41-80	51-100	1.1-2.0	41-80	201-400	0.6-1.0
Moderate (101-200)	101-250	61-90	81-180	101-168	2.1-10	81-380	401-800	1.1-2.0
Poor (201-300)	251-350	91-120	181-280	169-208	10.1-17	381-800	801-1200	2.1-3.0
Very poor (301-400)	351-430	121-250	281-400	209-748*	17.1-34	801-1600	1201-1800	3.1-3.5
Severe (401-500)	430+	250+	400+	748+*	34+	1600+	1800+	3.5+

Statement 2 is incorrect. AQI monitors **eight pollutants that include Particulate Matter (PM₁₀), Particulate Matter (PM_{2.5}), Nitrogen Dioxide (NO₂), Sulphur Dioxide (SO₂), Carbon Monoxide (CO), Ozone (O₃), Ammonia (NH₃), and Lead (Pb).** For these pollutants short-term (upto 24-hours) National Ambient Air Quality Standards are prescribed.

Statement 3 is correct. All the eight pollutants may not be monitored at all the locations. Overall **AQI is calculated only if data are available for a minimum of three pollutants out of which one should necessarily be either PM_{2.5} or PM₁₀.** Else, data is considered insufficient for calculating AQI.

Source: <https://cpcb.nic.in/National-Air-Quality-Index/>

Q.30) Which of the following statements about Adenovirus are correct?

1. It is a common virus that can cause respiratory, gastrointestinal, and eye infections.
2. Antibiotics cannot treat Adenovirus infections.
3. Adenovirus vectors are used in gene therapy and vaccine development.

Select the correct code from the options given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Adenoviruses are a common group of viruses that can cause various infections in different parts of the body, including the eyes, airways and lungs, intestines, urinary tract, and nervous system. While they commonly cause fever, coughs, sore throats, diarrhea, and pink eye, these infections are usually mild and resolve on their own within a few days.

Children are more prone to adenovirus infections, and most will have at least one type of infection before the age of 10. However, infections can be more severe in people with weakened immune systems, particularly children.

Statement 1 is correct: Adenovirus is a common virus that can cause respiratory, gastrointestinal, and eye infections.

Statement 2 is correct: Adenovirus infections cannot be treated with antibiotics because antibiotics only target bacteria, not viruses. Most adenovirus infections in children resolve on their own within a few days, while infections such as pink eye or pneumonia may last for a week or more.

Statement 3 is correct: Adenovirus vectors are widely used in gene therapy and vaccine development due to their ability to efficiently deliver genetic material into cells. Adenovirus vectors are created by removing parts of the adenovirus genome that are not required for replication and replacing them with the therapeutic gene of interest.

Source: <https://www.webmd.com/children/adenovirus-infections#:~:text=Antibiotics%20won't%20help%20adenovirus,hospital%20to%20help%20them%20recover.> <https://www.ncbi.nlm.nih.gov/books/NBK8503/>

Q.31) Consider the following statements with reference to the Central Pollution Control Board (CPCB):

1. It is a statutory organization constituted under the Air (Prevention and Control of Pollution) Act, 1981.
2. It provides technical services to the Ministry of Environment, Forest and Climate Change in the implementation of the Environment (Protection) Act, 1986
3. CPCB doesn't involve in the resolution of disputes among the State Pollution Control Boards.

Which of the above given statements is/are incorrect?

- a) 2 and 3 Only
- b) 1 Only
- c) 2 Only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the Correct Answer.

Statement 1 is incorrect. The Central Pollution Control Board (CPCB), statutory organization, was constituted in September 1974 under the Water (Prevention and Control of Pollution) Act, 1974. Further, CPCB was entrusted with the powers and functions under the Air (Prevention and Control of Pollution) Act, 1981.

Statement 2 is correct. It serves as a field formation and provides technical services to the Ministry of Environment, Forest and Climate Change under the provisions of the Environment (Protection) Act, 1986.

Statement 3 is incorrect. Coordinating the activities of the State Boards and resolving disputes among them is one of the functions of CPCB.

Source:

<https://www.google.com/url?sa=t&source=web&rct=j&url=https://cpcb.nic.in/&ved=2ahUKEwiq5ovZr7j-AhVj6jgGHQCwCLsQFnoECA0QAQ&usg=AOvVawITvaJtUb7lgzsV0Gf1QL0D>

Q.32) Consider the following statements with reference to the new E-waste (management) Rules, 2022; recently notified by the Ministry of Environment, Forest and Climate Change:

1. The definition of the term 'e-waste' has been widened to include solar photo-voltaic modules or panels or cells.
2. The rules do not apply to the Waste batteries and radio-active waste.
3. The new rules provide for the annual e-waste recycling targets to the producers of notified electrical and electronic equipment.

Which of the above given statements is/ are correct?

- a) 1 and 2 Only
- b) 1 and 3 Only
- c) 2 and 3 Only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

In November 2022, the Ministry of Environment and Forests further notified a new set of e-waste rules.

Statement 1 is correct. The 2016 e-waste rules had a restricted definition of e-waste. However, in the e-waste (management) rules-2022, the definition of the term 'e-waste' has been widened to include solar photo-voltaic modules or panels or cells.

Statement 2 is correct. As per the new rules, it is the responsibility of the manufacturer to collect e-waste generated during manufacture and to ensure its recycling or disposal.

However, the **rules do not apply to waste batteries, packaging plastics, micro enterprises and radio-active waste.**

- 1) Waste batteries are covered under Battery Waste Management Rules, 2022
- 2) Packaging plastics are covered under Plastic Waste Management Rules, 2016
- 3) Micro enterprises are covered under MSME Act, 2006**
- 4) Radio-active waste is covered under Atomic Energy Act, 1962**

Statement 3 is Correct. The e-waste rules of 2016 focused more on the producer's responsibility to collect back the e-waste and provided collection targets. **The new e-waste (management) rules, 2022 provides annual e-waste recycling targets to the producers. Producers of notified electrical and electronic equipment (EEE), have been given annual E-Waste Recycling targets based on the generation from the previously sold EEE or based on sales of EEE as the case may be.** Target may be made stable for 2 years and starting from 60% for the year 2023-2024 and 2024-25; 70% for the year 2025-26 and 2026-27 and 80% for the year 2027-28 and 2028-29 and onwards.

Source:

https://www.google.com/url?sa=t&source=web&rct=j&url=https://pib.gov.in/PressReleasePage.aspx%3FPRID%3D1881761&ved=2ahUKEwiJrqrHwbr-AhVG9jgGHRCZCJAQFnoECFEQAQ&usq=AOvVaw0KV_5EKhCVeMReSzg4U_SO

Q.33) Consider the following statements regarding Blue Baby Syndrome:

1. It is the bluish discoloration of an infant's skin due to a lack of oxygen in the hemoglobin of their blood.
2. It is usually caused when drinking water gets contaminated with excessive sulphate.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Blue baby syndrome is a condition characterized by a change in skin colour in babies. The bluish tint is most evident in thin skin areas such as the lips, earlobes, and nail beds.

Statement 1 is correct: The blue baby syndrome is the bluish discoloration of an infant's skin due to a lack of oxygen in the hemoglobin of their blood. It is also called as Infant Methemoglobinemia.

Statement 2 is incorrect: The maximum limit of nitrate in drinking water is 50 ppm. Excess nitrate in drinking water can cause disease such as **methemoglobinemia ('blue baby' syndrome).**

Whereas, Excessive sulphate (>500 ppm) in drinking water causes laxative effect, otherwise at moderate levels it is harmless.

Source: <https://ncert.nic.in/textbook/pdf/kech207.pdf>

<https://www.narayanahealth.org/blog/what-is-blue-baby-syndrome/>

Q.34) Consider the following statements with reference to Perform Achieve and Trade (PAT) Scheme:

1. It is being implemented by the Union Ministry of New and Renewable Energy.
2. Under the scheme, excess power savings by the designated consumers can be converted into Energy Saving Certificates that can be traded on power exchanges.
3. As per the scheme, units which fail to meet the energy saving targets will be liable to pay financial penalty under the Energy Conservation Act, 2001.

Which of the above given statements is/are correct?

- a) 1, 2 and 3
- b) 2 and 3 only
- c) 2 only
- d) 1 and 3 only

Ans) b)

Exp) Option b is the correct answer.

Perform, Achieve and Trade (PAT) is a regulatory instrument to reduce Specific Energy Consumption in energy intensive industries.

Statement 1 is incorrect. The Perform Achieve and Trade (PAT) scheme is a flagship programme under National Mission for Enhanced Energy Efficiency (NMEEE). It is being implemented by the Bureau of Energy Efficiency (BEE) and Union Ministry of Power.

NMEEE consists of four initiatives to enhance energy efficiency in energy intensive industries:

- 1) Perform, Achieve and Trade (PAT)
- 2) Market Transformation for Energy Efficiency (MTEE)
- 3) Energy Efficiency Financing Platform (EEFP)
- 4) Framework for Energy Efficient Economic Development (FEEED)

Statement 2 is correct. The Energy Savings Certificates (ESCerts) were introduced in India in 2011 under the PAT by the Bureau of Energy Efficiency. As a part of the scheme, the excess energy savings achieved by the designated consumers (DCs) is converted into tradable instruments called Energy Saving Certificates (ESCerts). These ESCerts are tradable at the Power Exchanges in India.

Statement 3 is Correct. Energy Saving Certificates (ESCerts) are issued to those plants that have achieved excess energy savings over their targets. Units that are **unable to meet the targets either through their own actions or through purchase of ESCerts are liable to financial penalty under the Energy Conservation Act, 2001.**

Source: <https://saathee.beeindia.gov.in/Common/BEEContent?MID=2&SMID=26>

<https://pib.gov.in/PressReleasePage.aspx?PRID=1747407#:~:text=PAT%20scheme%20as,Conservation%20Act%2C%202001.>

Q.35) Which of the following statements about Atmospheric Rivers (ARs) is/are correct?

1. Atmospheric Rivers are long and narrow corridors of water vapor in the atmosphere.
2. Atmospheric rivers typically form over tropical regions due to warm temperatures.
3. They can induce mudslides and cause catastrophic damage to life and property.

Select the correct answer from the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) d)

Exp) Option d is the correct answer.

Atmospheric rivers (ARs) are long, narrow bands of moisture in the atmosphere that can stretch for thousands of kilometers. ARs can have significant impacts on weather and precipitation patterns, and when they come back-to-back, they are called atmospheric river families. The frequency and intensity of ARs may be increasing due to climate change, and in cold climates, they are projected to grow longer, wider, and wetter, potentially leading to larger economic impacts.

Statement 1 is correct: Atmospheric rivers, stretching from the tropics to higher latitudes, are elongated and narrow corridors of moisture in the atmosphere. They can transport water vapor up to 15 times the volume of the Mississippi River.

Statement 2 is correct: Atmospheric rivers typically form over tropical regions due to warm temperatures causing ocean water to evaporate and rise into the atmosphere. Strong winds then carry the water vapour through the atmosphere. As atmospheric rivers move over land, the water vapour rises higher, cools into water droplets, and falls as precipitation.

Statement 3 is correct: Although atmospheric rivers come in many shapes and sizes, those that contain the largest amounts of water vapor and the strongest winds can create extreme rainfall and floods, often by stalling over watersheds vulnerable to flooding. These events can disrupt travel, induce mudslides and cause catastrophic damage to life and property. A well-known example is the "**Pineapple Express**," a strong atmospheric river that is capable of bringing moisture from the tropics near Hawaii over to the U.S. West Coast.

Source: <https://blog.forumias.com/atmospheric-rivers-californias-record-breaking-storm-what-is-the-pineapple-express-phenomenon-underlying-it/>

Q.36) Consider the following statements with reference to the National Green Tribunal (NGT):

1. The National Green Tribunal came into existence in 2010 under the Environmental Protection Act, 1986.
2. The members of the tribunal hold office for a maximum term of 3 years, but they are eligible for reappointment.
3. The Chairperson of the NGT is appointed by the Central Government in consultation with Chief Justice of India.
4. It adjudicates cases under the Biological Diversity Act, 2002 and the Forest (Conservation) Act, 1980.

Which of the above given statements are correct?

- a) 1, 2 and 3 Only
- b) 2, 3 and 4 Only
- c) 3 and 4 Only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

Statement 1 is incorrect. National Green Tribunal (NGT) is a quasi-judicial body established on October 18, 2010. It was established under the National Green Tribunal Act, 2010 to handle environment-related disputes. The act provides for effective and quick disposal of cases relating to environmental protection and conservation of forests and other natural resources.

Statement 2 is incorrect. The Tribunal comprises the Chairperson, the Judicial Members, and Expert Members. They shall hold office for a term of 5 years and are not eligible for reappointment.

Statement 3 is correct. The Chairperson is appointed by the Central Government in consultation with Chief Justice of India (CJI).

Statement 4 is correct. The NGT deals with civil cases under the seven laws related to the environment, these include:

- 1) The Water (Prevention and Control of Pollution) Act, 1974,
- 2) The Water (Prevention and Control of Pollution) Cess Act, 1977,

- 3) The Forest (Conservation) Act, 1980,
- 4) The Air (Prevention and Control of Pollution) Act, 1981,
- 5) The Environment (Protection) Act, 1986,
- 6) The Public Liability Insurance Act, 1991 and
- 7) The Biological Diversity Act, 2002.

Two important acts – Wildlife (Protection) Act, 1972 and Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 have been kept out of NGT's jurisdiction.

Q.37) Consider the following statements regarding the National Building Code of India:

1. It was formulated by the Bureau of Indian Standards (BIS).
2. It provides guidelines for energy efficiency and fire safety of buildings.
3. It is aimed at ensuring uniformity and standardization in building construction practices across the country.

Which of the above given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) d

Exp) Option d is the correct answer.

The National Building Code of India (NBC) is a comprehensive document that provides guidelines and standards for building construction and fire safety in India.

Statement 1 is correct: The National Building Code of India (NBC) was formulated by the **Bureau of Indian Standards (BIS)** and is widely recognized as the authoritative source of information on building regulations and standards in the country.

Statement 2 is correct: The National Building Code of India provides guidelines for **energy efficiency, fire safety**, and other aspects of building construction, such as plumbing, ventilation, and structural design.

Statement 3 is correct: While it is a recommendatory code, the Ministry of Home affairs has issued guidelines to the States to incorporate the recommendations of the National Building Code into their local building bylaws. It is aimed at **ensuring uniformity and standardization** in building construction practices across the country.

Source: <https://blog.forumias.com/guidelines-of-national-building-code-to-ensure-fire-safety-in-public-buildings/>

<https://www.bis.gov.in/standards/technical-department/national-building-code/>

<https://dgfscdhg.gov.in/national-building-code-india-fire-and-life-safety>

Q.38) With reference to Glacial Lake Outburst Floods (GLOF), consider the following statements:

1. It is usually difficult to predict their occurrence in advance.
2. Uttarakhand flash floods of 2021 are caused due to GLOF.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

GLOF can be contained by natural structures such as moraines, glacial ice, or bedrock. However, if these structures fail due to various reasons such as slope failure or overtopping, it can result in catastrophic events that endanger human life, regional infrastructure, and livelihoods in the high mountains.

Statement 1 is correct: GLOFs are **difficult to predict in advance due to their suddenness** and the many factors that can trigger them. However, scientists are working on developing models and monitoring systems to improve early warning and preparedness.

Statement 2 is correct: The 2021 Uttarakhand flash floods are believed to be caused by a GLOF triggered by a massive rock and ice avalanche from a hanging glacier. The avalanche fell into a lake called Rishiganga, causing a surge of water to rush downstream and leading to flash floods in the area.

Source: <https://indianexpress.com/article/explained/uttarakhand-glacier-flash-flood-rishiganga-death-toll-7180258/> <https://www.icimod.org/mountain/glacial-lake-outburst-flood/>

Q.39) With reference to Climate Vulnerability Index (CVI) for Indian states, consider the following statements:

1. It is released by the Ministry of Environment, Forests and Climate Change.
2. According to the index, Southern zone of India is least vulnerable to extreme climate events.
3. It is based on pillars like exposure, sensitivity, and adaptive capacity.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2, and 3

Ans) c

Exp) Option c is the correct answer.

The CVI provides insights into the vulnerability of different states to climate change and can help policymakers identify the most vulnerable areas and take steps to mitigate the impacts of climate change. It can also help identify areas where investments in climate resilience would be most effective. Assam, Andhra Pradesh, Maharashtra, Karnataka and Bihar are highly vulnerable to extreme climate events such as floods, droughts and cyclones, according to the Climate Vulnerability Index (CVI).

Statement 1 is incorrect: The Climate Vulnerability Index (CVI) is a tool designed and released by the **Council on Energy, Environment and Water (CEEW)** to assess the vulnerability of states in India to the impacts of climate change. The index assesses the impact of climate change on different sectors like agriculture, forests, health, and water.

Statement 2 is incorrect: The **southern zone of India is the most vulnerable to extreme climate events** and their compounding impacts, followed by the eastern, western, northern, north-eastern and central zones.

Statement 3 is correct: The CVI is based on three broad pillars: **exposure, sensitivity, and adaptive capacity**. Exposure measures the degree to which states are exposed to the impacts of climate change.

Sensitivity measures the extent to which a state is likely to be affected by the impacts of climate change. Adaptive capacity measures a state's ability to cope with and adapt to the impacts of climate change.

Source: <https://indianexpress.com/article/explained/climate-vulnerability-index-ceew-explained-7593385/>

<https://www.ceew.in/publications/mapping-climate-change-vulnerability-index-of-india-a-district-level-assessment>

Q.40) Consider the following statements about the Proton Beam Therapy, recently seen in news.

1. It is a type of a radiation therapy which uses Protons to treat cancerous tumours.
2. It has higher chances of affecting nearby tissues/cells than X-ray based radiation therapy.
3. The Proton beam therapy is usually more expensive than x-ray radiation therapy.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

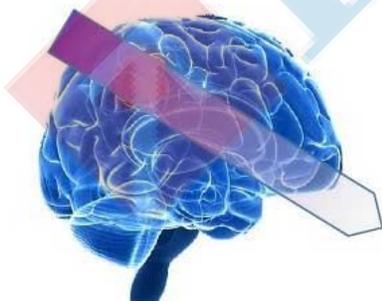

Proton therapy, also known as proton beam therapy, is a radiation treatment that precisely delivers a beam of protons to disrupt and destroy tumor cells.

Statement 1 is correct: Proton Beam Therapy is a type of radiation therapy for cancer treatment that uses a beam of high-energy protons to destroy cancer cells. A proton is a positively charged elementary particle that is a fundamental constituent of all atomic nuclei.

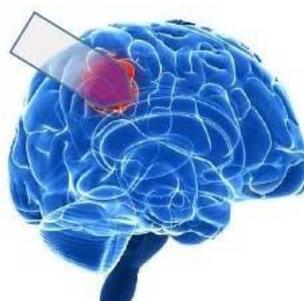

Statement 2 is incorrect: Traditional radiation therapies deliver x-rays, or beams of photons, to the tumour and beyond it. This can damage nearby healthy tissues and can cause significant side effects. By contrast, proton therapy delivers a beam of proton particles that stops at the tumour, so it's less likely to damage nearby healthy tissues.

COMPARING X-RAY THERAPY WITH PROTON BEAM THERAPY

The X-Ray radiation targeting the tumour is high dose at entry and reduces as it goes through the brain. This can affect healthy cells before and after the tumour.

Protons are accelerated to 70% of the speed of light. They slow down as the beam enters the target area and release their energy into the tumour, but do not go beyond the tumour.

Statement 3 is correct: A Proton Beam therapy machine is a huge contraption, up to three storeys tall and costs nearly ₹500 crore. Hence, Proton Beam therapy is much more expensive than the traditional radiation therapies. Setting up of the centre also poses several infrastructural and regulatory challenges.

Also, the Department of Atomic Energy has raised several safety concerns regarding this theory. Due to high costs, this therapy is available at only a few medical facilities in India.

Source:

<https://www.thehindu.com/sci-tech/health/demand-supply-gap-of-proton-beam-therapy-machines-leaves-cancer-patients-in-lurch/article66564195.ece#:~:text=The%20PBT%20is%20considered%20a,of%20cases%20are%20brain%20tumours.>

Q.41) With reference to the UN World Conferences on Disaster Risk Reduction (WCDRR), consider the following statements:

1. Till now, the United Nations has convened only three World Conferences on Disaster Risk Reduction (WCDRR).
2. India hosted the recent World Conference on Disaster Risk Reduction.
3. Sendai Framework was the outcome of the second World Conference on Disaster Risk Reduction.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1 and 2 only

Ans) a

Exp) Option a is the correct answer.

The United Nations World Conferences on Disaster Risk Reduction (WCDRR) are global forums organized by the United Nations International Strategy for Disaster Reduction (UNISDR) every decade to discuss issues related to disaster risk reduction, including the challenges and progress made in the field.

Statement 1 is correct: The UN has convened **three World Conferences on Disaster Risk Reduction (WCDRR)**. The 1st WCDRR in 1994 adopted the Yokohama Strategy and Plan of Action for a Safer World. The 2nd WCDRR in 2005 adopted the Hyogo Framework for Action 2005-2015: Building the Resilience of Countries and Communities to Disasters. The third WCDRR in 2015 adopted the Sendai Framework for Disaster Risk Reduction 2015-2030.

Statement 2 is incorrect: **Japan hosted all the three conferences**- the first conference in Yokohama in 1994, second conference in Kobe in 2005 and the third conference in Sendai in 2015.

Statement 3 is incorrect: The Sendai Framework for Disaster Risk Reduction 2015-2030 is the **outcome of the third World Conference on Disaster Risk Reduction (WCDRR) held in Sendai**, Japan in March 2015. The framework aims to reduce disaster risk and disaster losses in lives, livelihoods, and health, and to protect the environment by 2030.

Source: <https://enb.iisd.org/negotiations/un-world-conferences-disaster-risk-reduction-wcdrr>

https://www.mofa.go.jp/ic/gic/page22e_000637.html

Q.42) Which of the following statements is/are correct regarding the Coalition for Disaster Resilient Infrastructure (CDRI)?

1. It was launched by the Prime Minister of India at the UN Climate Action Summit.
2. It is a treaty-based intergovernmental organization.

3. The CDRI aims to promote the resilience of new and existing infrastructure systems to the impacts of natural hazards.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) c

Exp) Option c is the correct answer.

The Coalition for Disaster Resilient Infrastructure (CDRI) is a partnership of national governments, UN agencies and programmes, multilateral development banks and financing mechanisms, the private sector, and knowledge institutions that aims to promote the resilience of new and existing infrastructure systems to climate and disaster risks in support of sustainable development.

Statement 1 is correct: The **Prime Minister of India** launched the Coalition for Disaster Resilient Infrastructure (CDRI) during his **speech at the UN Climate Action Summit** in 2019. The CDRI is a voluntary international grouping aimed at promoting the resilience of new and existing infrastructure systems to the impacts of natural hazards.

Statement 2 is incorrect: The CDRI is **not an intergovernmental organization**, but rather a global partnership comprising national governments, UN agencies and programmes, multilateral development banks and financing mechanisms, the private sector, and academic and knowledge institutions.

Statement 3 is correct: The CDRI aims to **promote the resilience of new and existing infrastructure systems to the impacts of natural hazards**, and to mainstream disaster resilience into infrastructure systems.

Source: <https://www.cdri.world/frequently-asked-questions>

Q.43) With reference to the various ‘environmental clean-up techniques’, consider the following pairs:

Technique	Application
1. Rhizofiltration	Plants are used to absorb and precipitate contaminants from polluted aqueous sources in their roots.
2. Phytodegradation	Contaminants are taken up into the plant tissues where they are metabolized, or biotransformed.
3. Mycofiltration	A form of bioremediation in which a combination of bacteria is used to decontaminate the area.

Which of the pairs given above is/are correctly matched?

- a) 2 only
- b) 1 and 3 only

- c) 1 and 2 only
d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The pollution of environment, particularly that caused by various industrial activities, have been responsible for the organic and inorganic matter in the ecosphere. The utilization of organisms, primarily microbes, to clean up contaminated soils, aquifers, sludges, residues, and air known as 'Bioremediation', is a rapidly changing and expanding area of environmental cleanup technique than conventional physio-chemical methods.

Pair 1 is matched correctly: Rhizofiltration is defined as the use of plants, both terrestrial and aquatic; to absorb, concentrate, and precipitate contaminants from polluted aqueous sources with low contaminant concentration in their roots. Rhizofiltration can partially treat industrial discharge, agricultural runoff etc. The advantages of rhizofiltration include its ability to be used as in-situ or ex-situ applications.

Pair 2 is matched correctly: In Phytodegradation, contaminants are taken up into the plant tissues where they are metabolized, or biotransformed. Where the transformation takes place depends on the type of plant, and can occur in roots, stem or leaves.

Pair 3 is matched incorrectly: Mycoremediation is a form of bioremediation in which fungi are used to decontaminate the area. The term mycoremediation refers specifically to the use of fungal mycelia in bioremediation. The key to mycoremediation is determining the right fungal species to target a specific pollutant. **Mycofiltration is a similar process, using fungal mycelia to filter toxic waste and microorganisms from water in soil.**

Q.44) Which of the following statements is/are correct regarding earthquake disaster preparedness in India?

1. The National Disaster Management Authority (NDMA) has formulated a National Earthquake Risk Mitigation Project (NERMP) to enhance earthquake preparedness in the country.
 2. The Bureau of Indian Standards (BIS) has formulated guidelines for construction of earthquake-resistant buildings in the country.
 3. The Indian Meteorological Department (IMD) can issue earthquake warnings to people in high-risk areas.
- Select the correct answer using the code given below:

- a) 1 and 2 only
b) 2 and 3 only
c) 1 and 3 only
d) 1, 2, and 3

Ans) d

Exp) Option d is the correct answer.

The risk of earthquakes in India is high, with over 59% of the country's land area under threat of moderate to severe seismic hazard. The entire Himalayan belt is considered prone to great earthquakes of magnitude exceeding 8.0, with the potential to affect millions of people.

Statement 1 is correct: The National Disaster Management Authority (NDMA) has formulated the National Earthquake Risk Mitigation Project (NERMP) to enhance earthquake preparedness in the country. The

project aims to strengthen the existing earthquake risk mitigation mechanisms in the country and create awareness among communities regarding earthquake safety measures.

Statement 2 is correct: The **Bureau of Indian Standards (BIS)** has formulated guidelines for construction of **earthquake-resistant buildings in the country**. These guidelines are known as the Indian Standard Code of Practice for Earthquake Resistant Design and Construction of Buildings.

Statement 3 is correct: The Indian Meteorological Department (**IMD**) can **issue earthquake warnings to people in high-risk areas**. The IMD has set up a network of seismological observatories to detect earthquakes and issue early warnings to the concerned authorities and people in high-risk areas.

Source: <https://www.iitk.ac.in/nicee/EQTips/EQTip11.pdf>

[https://ndma.gov.in/Mitigation_Preparedness/NERMP#:~:text=National%20Earthquake%20Risk%20Mitigation%20\(Preparatory,years%20\(2013%2D15\).](https://ndma.gov.in/Mitigation_Preparedness/NERMP#:~:text=National%20Earthquake%20Risk%20Mitigation%20(Preparatory,years%20(2013%2D15).)

<https://weathershimla.nic.in/pdf/other/Seismological-Activities.pdf>

Q.45) Consider the following statements about the International Big Cat Alliance (IBCA), launched recently in India:

1. It is an international collaboration to protect and conserve the seven major big cats of the world.
2. The alliance aims to reach out to the range countries of the seven big cats to conserve their natural habitats.
3. Caracal and Clouded leopards have not been included in the list of wild cats to be protected under the IBCA.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

In the mega international event held on 9th April 2023, at Mysuru, Karnataka, to commemorate 50 years of Project Tiger, the Prime Minister Shri Narendra Modi launched the International Big Cat Alliance (IBCA).

Statement 1 is correct: IBCA will focus on the protection and conservation of seven major big cats of the world such as tiger, lion, leopard, snow leopard, puma, jaguar and cheetah in collaboration with countries harbouring these species. The IBCA will engage in advocacy, partnership, knowledge e-portal, capacity building, eco-tourism, partnerships between expert groups and finance tapping.

Statement 2 is correct: Membership to the alliance will be open to 97 “range” countries, which contain the natural habitat of these big cats, as well as other interested nations, international organizations, etc. IBCA would further strengthen global cooperation and efforts to conserve the wild denizens, especially the big cats.

Statement 3 is correct: The seven big cats to be protected under IBCA include Tiger, Lion, Leopard, Snow Leopard, Cheetah, Jaguar and Puma. **However, wild cat species like Caracal and clouded leopard are not included in the list.**

Source: <https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1915372>

Q.46) With reference to the Global Facility for Disaster Reduction and Recovery (GFDRR), consider the following statements:

1. It is a grant-funding mechanism managed by the World Bank.
2. It aims to support low and middle-income countries to reduce their risks from climate change.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

The Global Facility for Disaster Reduction and Recovery (GFDRR) is a multi-donor partnership that supports low and middle-income countries to understand, manage, and reduce their risks from natural hazards and climate change. The Program Management Unit, located within the World Bank, manages grant resources to carry out GFDRR's mission.

Statement 1 is correct: GFDRR is a **grant-funding mechanism that is managed by the World Bank**. It provides technical assistance, analytics, and capacity-building support for disaster risk management and climate change adaptation to low and middle-income countries.

Statement 2 is correct: The GFDRR aims to **assist low and middle-income countries to manage and reduce risks from natural hazards and climate change**. It provides funding and policy advice on disaster risk management at national and local levels, and supports the development of policies related to various sectors such as land use, building codes, public health, transport etc.

Source: <https://www.gfdr.org/en/feature-story/about-us>

Q.47) Which of the following statements is/are correct about Ground-level Ozone?

1. It is a secondary pollutant formed by the reaction of nitrogen oxides (NO_x) and volatile organic compounds (VOCs).
2. Prolonged exposure to ground-level ozone can pose respiratory problems and exacerbate asthma symptoms.

Select the correct answer using the codes given below:

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Ground-level ozone is a colorless and highly irritating gas that forms just above the earth's surface. It is called a "secondary" pollutant because it is produced when two primary pollutants react in sunlight and stagnant air. These two primary pollutants are nitrogen oxides (NO_x) and volatile organic compounds (VOCs).

Statement 1 is correct: Ground-level ozone is a **secondary pollutant** formed by the reaction of nitrogen oxides (NO_x) and volatile organic compounds (VOCs), which come from both human activities and natural sources.

Statement 2 is correct: Prolonged exposure to ground-level ozone has significant effects on human health, including premature mortality, hospital admissions, and asthma symptoms. It can also damage vegetation, decrease crop productivity, and harm synthetic materials such as rubber and textiles.

Source: <https://www.canada.ca/en/environment-climate-change/services/air-pollution/pollutants/common-contaminants/ground-level-ozone.html>

Q.48) With reference to Indoor Air Pollution, consider the following statements:

1. One of the primary causes of indoor air pollution in rural areas is the use of traditional fuels for cooking and heating.
2. In Urban areas, one of the primary causes of indoor air pollution is the use of synthetic materials for building and furnishing.
3. Indoor air pollution in developing countries is one of the four most critical global environmental problems, as identified by the World Bank in 1992.

Which of the above given statements are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Indoor air pollution refers to the physical, chemical, and biological characteristics of air in the indoor environment. In developed countries, energy efficiency improvements can make houses airtight, reducing ventilation and raising pollutant levels. Pollutants include volatile organic compounds, tobacco smoke, pesticides, biological pollutants, formaldehyde, asbestos, and radon. These pollutants can cause a range of health problems including irritation of the eyes, nose and throat, headaches, nausea, loss of coordination, and in severe cases, cancer.

Statement 1 is correct: Rural people continue to rely on traditional fuels such as firewood, charcoal, and cow dung for cooking and heating. The concentration of indoor pollutants in households that burn traditional fuels is alarming. Burning such fuels produces large amounts of smoke and other air pollutants in the confined space of the home, resulting in high exposure.

Statement 2 is correct: In urban areas, indoor air pollution is caused by a variety of factors, including reduced ventilation, use of synthetic materials for building and furnishing, and the use of chemical products like household care products.

Statement 3 is correct: Indoor air pollution in developing countries is one of the four most critical global environmental problems, as identified by the World Bank in 1992. The other three critical global environmental problems identified by the World Bank in 1992 were: Loss of biodiversity, Deforestation and desertification and Global warming and climate change.

Source: <https://edugreen.teri.res.in/explore/air/indoor.htm>

Q.49) With reference to plastic and plastic waste disposal, consider the following statements:

1. Plastic disposal poses environmental problems as many of them are chemically inert.
2. Oxo-degradable plastics do not fragment into microplastics.
3. Bioplastics can be manufactured from Lactic Acid.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Plastics are large carbon-containing compounds called polymers, which are composed of repeating units of shorter carbon-containing compounds called monomers.

Statement 1 is correct: Most plastic is chemically inert and will not react chemically with other substances. Because plastic doesn't react chemically with most other substances, it doesn't decay. Therefore, plastic disposal poses a difficult and significant environmental problem.

Statement 2 is incorrect: There have been significant efforts in recent decades toward developing and industrializing so-called "biodegradable" plastics that might have shorter residence times in the environment. **Oxo-degradable plastics are one class of plastic materials that are commonly promoted as biodegradable. In reality, they are conventional plastics (e.g., PE, PP, PET) containing additives that accelerate the oxidation process. The major issue with oxo-degradable plastics is that they rapidly fragment into huge quantities of microplastics** when exposed to a combination of sunlight and oxygen.

Statement 3 is correct: Polylactic acid (PLA) is a bioplastic made from lactic acid. It is biodegradable as well as recyclable polyester made from renewable feedstock. Lactic acid as the raw material is produced by fermentation of glucose or sucrose and is refined to a high purity. There are other polymers besides plastics. Naturally occurring polymers, such as starches, cellulose, soy protein, vegetable oil, triglycerides and bacterial polyesters, can be extracted from crops and bacteria.

Source: <https://pubs.acs.org/doi/10.1021/acs.est.7b04051>

<https://science.howstuffworks.com/plastic.htm>

Q.50) Consider the following statements about Japanese Encephalitis (JE), a disease often seen in news:

1. Japanese Encephalitis is a bacterial brain infection caused by mosquito bites.
2. Some of the patients may suffer from long-term neurological issues like paralysis and difficulty in speech.
3. There is no cure for this disease.
4. The vaccination for JE has been included under the Mission Indradhanush program of the Government of India.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 2 and 4 only

Ans) b

Exp) Option b is the correct answer.

Japanese encephalitis virus (JE) is a flavivirus related to dengue, yellow fever and West Nile viruses. JE is the main cause of viral encephalitis in many countries of Asia with an estimated 68,000 clinical cases every year.

Statement 1 is incorrect: JE is a viral disease (not bacterial) caused by flavivirus. It is transmitted to humans through bites from infected mosquitoes of the *Culex* species (mainly *Culex tritaeniorhynchus*). The first case of Japanese encephalitis viral disease (JE) was documented in 1871 in Japan.

Statement 2 is correct: Most JE infections are mild (fever and headache) or without apparent symptoms, but approximately 1 in 250 infections results in severe clinical illness. The case-fatality rate can be as high as 30% among those with disease symptoms.

Of those who survive, 20%–30% suffer permanent intellectual, behavioural or neurological sequelae such as paralysis, recurrent seizures or the inability to speak.

Statement 3 is correct: There is no cure for the disease. Treatment is focused on relieving severe clinical signs and supporting the patient to overcome the infection.

Statement 4 is correct: The Universal Immunisation program/ Mission Indradhanush which provides vaccination against 12 Vaccine-Preventable Diseases (VPD) i.e., diphtheria, Whooping cough, tetanus, polio, tuberculosis, hepatitis B, meningitis and pneumonia, Hemophilus influenza type B infections,

Japanese encephalitis (JE), rotavirus vaccine, pneumococcal conjugate vaccine (PCV) and measles-rubella (MR). However, Vaccination against Japanese Encephalitis and Haemophilus influenzae type B is being provided in selected districts of the country.

Source: <https://www.who.int/news-room/fact-sheets/detail/japanese-encephalitis>

<https://vikaspedia.in/health/nrhm/national-health-programmes-1/mission-indhradhanush>

<https://www.thehindu.com/sci-tech/no-neutralising-antibodies-after-japanese-encephalitis-vaccination/article66606617.ece>

Q.1) Consider the following statements with reference to the effects of Ocean Acidification:

1. Increased Ocean Acidification depresses metabolic rates and immune responses in some marine organisms.
2. The growth and survival of calcareous phytoplankton may be adversely affected due to Ocean Acidification.
3. Few algae may benefit from increased ocean acidification.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Ocean acidification refers to a reduction in the pH of the ocean over an extended period of time, caused primarily by uptake of carbon dioxide (CO₂) from the atmosphere.

Statement 1 is correct. The uptake of atmospheric carbon dioxide is occurring at a rate exceeding the natural buffering capacity of the oceans. This increases the acidity in oceans which finally **depresses metabolic rates and immune responses in some organisms.**

Statement 2 is correct. Carbonate ions are essential to the calcification process that allows certain marine organisms to build their calcium carbonate shells and skeletons like phytoplankton.

However, increases in atmospheric CO₂ levels lead to decrease in pH level, increase in the concentration of carbonic acid and bicarbonate ions, causing a decrease in the concentration of carbonate ions. Thus, carbonate ions are less available, and calcification is therefore harder to achieve. This impact of ocean acidification may therefore have potentially catastrophic consequences for calcareous phytoplanktons.

Statement 3 is correct. Some algae and seagrass may benefit from higher acidification of oceans, as they may increase their photosynthetic and growth rates.

Knowledge Base: Shankar Ias environment book

Source: <https://www.google.com/url?sa=t&source=web&rct=j&url=https://blog.forumias.com/oceans-are-heating-up-at-a-quickening-pace-say-scientists/&ved=2ahUKEwjYhr3E-Lz-AhWw4DgGHfgJA1kQFnoECFQQAQ&usg=AOvVaw078f9maVJMVWzJCIYddyCr>

Q.2) Which of the following options can be responsible for Ozone Depletion?

1. Sunspots and stratospheric winds
2. Commercial usage of Chlorofluorocarbons (CFCs)
3. Using halons in fire extinguishers
4. Commercial usage of Methyl chloroform

Select the correct answer using the code given below.

- a) 1, 2, and 3 only
- b) 2, and 3 only
- c) 1, 3, and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Ozone layer depletion is the gradual thinning of the earth's ozone layer in the upper atmosphere caused due to the release of chemical compounds containing gaseous bromine or chlorine from industries or other human activities.

All the above given activities can lead to the depletion of the Ozone Layer.

Option 1 is correct. There are a few natural causes also which cause ozone depletion such as volcanic eruptions, **sunspots and stratospheric winds**. However, these do not cause more than 1 – 2% of the ozone depletion.

Option 2 is correct. The use of CFCs is one of the main reasons for the depletion of the layer. They are usually used as a **coolant in refrigerators and air conditioners** used in cars, etc. It is also used as an industrial solvent, in foam products and hospital sterilization equipment.

Option 3 is correct. Other chemicals that damage the ozone layer include methyl bromide (used as a pesticide) and halons (**used in fire extinguishers**). As methyl bromide and halons are broken apart, they release bromine atoms, which are 40 times more destructive to ozone molecules than chlorine atoms

Option 4 is correct. Methyl chloroform is used as a solvent and in many consumer products **and also in adhesives**.

Knowledge Base: Shankar Ias environment book

Source:

https://www.google.com/url?sa=t&source=web&rct=j&url=https://www.unep.org/ozonaction/who-we-are/about-montreal-protocol&ved=2ahUKEwiSh_DE8Lz-AhUYSWwGHSYKDPAQFnoECCwQAQ&usg=AOvVaw0E0pb_hWpyt3VrdKEIM2iW

Q.3) Arrange the following gases as per their Global Warming Potential (GWP) in descending order?

1. Methane
2. Perfluorocarbons (PFCs)
3. Carbon Dioxide
4. Sulfur Hexafluoride (SF6)

Select the correct answer using the code given below.

- a) 4-2-1-3
- b) 2-4-1-3
- c) 3-2-4-1
- d) 4-1-2-3

Ans) a

Exp) Option a is the correct answer.

Global warming potential (GWP) is the heat absorbed by any greenhouse gas in the atmosphere expressed as a multiple of the heat absorbed by the same mass of carbon dioxide (CO₂). The global warming potential of each gas describes its impact on global warming. The Global Warming Potential (GWP) of a gas is a measure of how much energy a gas absorbs over a specific time period (usually 100 years) when compared to carbon dioxide. GWP is used to calculate carbon dioxide equivalent.

S. no.	Gas	GWP	Lifetime
1)	Carbon Dioxide	1	100
2)	Methane	21	12
3)	Nitrous Oxide	310	120
4)	Hydrofluorocarbons (HFC's)	140-11,700	1-270
5)	Perfluorocarbons (PFC's)	6,500-9,200	800-50,000

6)	Sulfur hexafluoride (SF6)	23,900	3,200
----	---------------------------	--------	-------

Knowledge Base: Shankar Ias environment book

Source:

<https://www.google.com/url?sa=t&source=web&rct=j&url=https://blog.forumias.com/climate-change/&ved=2ahUKEwj98sLi-Lz-AhVZ1zgGHUvOBokQFnoECAOQAQ&usg=AOvVaw2BRiWcfku-EYO653q1M6lP>

Q.4) Glacial retreat is a natural phenomenon that has speed up due to climate change in recent decades. Consider the following statements with reference to the impacts of Glacial retreat:

1. Increased coastal erosion.
2. Occurrence of Glacial Lake Outburst Floods (GLOF)
3. Depletion of freshwater level
4. Enhanced productivity of Coral reefs

Which of the options given above are correct?

- a) 3 and 4 only
- b) 1, 2, 3 and 4
- c) 1, 2 and 3 only
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

Glacial retreat refers to the process of a glacier shrinking or receding in size over time due to a decrease in ice accumulation or an increase in ice melt.

Option 1 is correct. Melting glaciers contribute to **rising sea levels**, which **increases coastal erosion and storm surge** as warming air and ocean temperatures produce more frequent and intense coastal storms such as hurricanes and typhoons.

Option 2 is correct. Warming is already causing faster snow and glacier melting, resulting in the formation of glacial lakes. **Glacial lake outburst floods (GLOF)** are becoming more common, resulting in massive casualties and damage to local infrastructure.

Option 3 is correct. The disappearance of glaciers also means freshwater depletion and **less water available for consumption** by the population, a lower hydroelectric energy generation capacity, and less water available for irrigation.

Option 4 is incorrect. To thrive through the process of photosynthesis, coral reefs need sunshine. Due to glaciers melting or retreating, rising sea levels prevent corals from receiving adequate sunlight. This could impact the growth of corals in oceans.

Source:

https://www.google.com/url?sa=t&source=web&rct=j&url=https://blog.forumias.com/increasing-temperature-and-low-winter-precipitation-are-causing-retreat-of-glaciers-in-zanskar-valley-ladakh/&ved=2ahUKEwia05jx-Lz-AhVXhGMGHXiOA9sQFnoECBEQAQ&usg=AOvVaw3dffZuYJcWCWoVcQfa_9s_

Q.5) With reference to Climate & Clean Air Coalition, consider the following statements:

1. It was launched by the United Nations Environment Programme (UNEP).
2. The Coalition is a global organization that is committed to reducing short-lived climate pollutants (SLCPs).
3. India is a member of this coalition.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Climate and Clean Air Coalition is a voluntary partnership of governments, intergovernmental organizations, businesses, scientific institutions and civil society organizations committed to protecting the climate and improving air quality through actions to reduce short-lived climate pollutants.

Statement 1 is correct: Climate & Clean Air Coalition (CCAC) is a voluntary partnership of governments, intergovernmental organizations, businesses, scientific institutions, and civil society organizations that aims to reduce short-lived climate pollutants (SLCPs). It was launched by the United Nations Environment Programme (UNEP) in 2012, along with six founding countries - Bangladesh, Canada, Ghana, Mexico, Sweden, and the United States.

Statement 2 is correct: The Coalition is a global organization that is committed to reducing short-lived climate pollutants (SLCPs), which include black carbon, methane, tropospheric ozone, and hydrofluorocarbons (HFCs).

Statement 3 is correct: India is a member of the coalition, along with over 78 other countries and many non-state actors.

Source: <https://www.ccacoalition.org/en/content/coalition>

<https://www.unep.org/explore-topics/climate-action/what-we-do/climate-and-clean-air-coalition-ccac>

Q.6) Which of the actions mentioned below can lead to Ocean Acidification?

1. Burning of fossil fuels
 2. Deforestation
 3. Improper Land Management
- Select the correct answer using the code given below.

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Since the beginning of the Industrial Revolution, when humans began burning coal in large quantities, the world's ocean water has gradually become more acidic. Like global warming, this phenomenon, which is known as ocean acidification, is a direct consequence of increasing levels of carbon dioxide (CO₂) in Earth's atmosphere.

All the options given are correct reasons for Ocean Acidification.

Option 1 is correct. Main factor responsible for ocean acidification is the **burning of fossil fuels such as coal, oil and gas**. Burning increases the carbon dioxide in the atmosphere which eventually mixes with ocean water leading to ocean acidification.

Option 2 is correct. **Deforestation** results in fewer trees to absorb the gas. Also, when plants are cut down and burnt or left to rot, the carbon that makes up their organic tissue is released as carbon dioxide.

Option 3 is correct. Agriculture may also contribute to the problem of ocean acidity. It may happen especially when the methods that are employed by the farmers are not suitable.

These are methods that may be prone to soil erosion, and in the process, the **chemicals are washed downstream into the ocean.** In short, if the land is poorly managed, the water masses can be hit by the impact of acidifying soil mineral content and water pollution.

Knowledge Base: Shankar ias environment book

Source:

<https://www.google.com/url?sa=t&source=web&rct=j&url=https://blog.forumias.com/climate-change/&ved=2ahUKEwionpiOlb3-AhU0VmwGHSj4DSAQFnoECFYQAQ&usg=AOvVaw2BRiWcfku-EYO653q1M6lP>

Q.7) The Ozone Layer is vital to human well-being as well as agricultural and ecosystem sustainability. Consider the following statements with reference to the Ozone Layer:

1. Most of the Earth's ozone resides in the troposphere and a very small percentage is distributed throughout the stratosphere.
2. The Dobson unit is a unit of measurement of atmospheric ozone.
3. Ozone formed near the Earth's surface is considered "good" ozone.

Which of the above given statements is/are correct?

- a) 1 and 2 only
- b) 2 and 3 Only
- c) 2 Only
- d) 1 Only

Ans) c

Exp) Option c is the correct answer.

Statement 1 is incorrect. Most of Earth's ozone layer resides in the stratosphere. About 90% of atmospheric ozone is contained in the stratospheric "ozone layer", which shields Earth's surface from harmful ultraviolet radiation emitted by the Sun.

Statement 2 is correct. The first instrument for **routinely monitoring total ozone** was developed by Gordon M.B. Dobson in the United Kingdom in the 1920s. Pioneering scientists have traditionally been honored by having units of measure named after them. Accordingly, the unit of measure for total ozone is called the "**Dobson unit**".

Statement 3 is incorrect. Ozone in the stratosphere absorbs a large part of the Sun's biologically harmful ultraviolet radiation. Stratospheric ozone is considered "good" ozone because of this beneficial role. In contrast, **ozone formed at Earth's surface** is considered "**bad**" ozone because it is harmful to humans, plants, and animals.

Source: <https://www.google.com/url?sa=t&source=web&rct=j&url=https://ozone.unep.org/20-questions-and-answers&ved=2ahUKEwiH16r4oL3-AhVp-jgGHQZLDZUQFnoECBAQAQ&usg=AOvVaw1rSpfxzRip-Hu9yyki0myS>

Q.8) Consider the following statements with reference to Carbon Credit and Carbon Offsetting:

1. Carbon credit is a kind of non-tradable permit that equals one Kilogram of carbon dioxide released into the atmosphere.
2. Unlike Carbon Credit, Carbon offsetting is a kind of right to emit carbon into the atmosphere.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

Statement 1 is incorrect. Carbon credit is a kind of tradable permit that, as per United Nations standards, equals one tonne of carbon dioxide removed, reduced, or sequestered from the atmosphere.

Statement 2 is incorrect. Carbon credit is the right to emit carbon into the atmosphere. Carbon offsetting is the carbon sequestering against the carbon emissions. Carbon credits generally represent a reduction in greenhouse gas emissions, whereas carbon offsets can represent removal of greenhouse gas. Carbon credits are typically associated with cap-and-trade systems. Carbon offsets are traded on the voluntary market and include carbon sequestering efforts, renewable energy, and other projects that remove greenhouse gases from the atmosphere.

Knowledge Base: Shankar ias environment book

Source: <https://www.google.com/url?sa=t&source=web&rct=j&url=https://blog.forumias.com/carbon-markets-benefits-and-challenges/&ved=2ahUKEwj1qcjeoL3-AhWJ-DgGHVhNBvEQFnoECA4QAQ&usg=AOvVaw0hBcvuLl6uKrs136q-cd7c>

Q.9) Consider the following statements regarding “Blue Carbon”:

1. The term “blue carbon” refers to the carbon stored in coastal and marine ecosystems.
2. Healthy blue carbon ecosystems play a significant role in protecting coastlines from erosion and storm surges.
3. The Blue Carbon Initiative is an initiative of the United Nations Environment Program.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: The term “blue carbon” refers to the carbon stored in coastal and marine ecosystems. The blue carbon ecosystems such as mangroves, tidal and salt marshes, and seagrasses – are highly productive coastal ecosystems that are particularly important for their capacity to store carbon within the plants and in the sediments below. Scientific assessments show that they can sequester two to four times more carbon than terrestrial forests and are thereby considered a key component of nature-based solutions to climate change.

Statement 2 is correct: Healthy blue carbon ecosystems perform following functions:

- 1) provide habitat for marine species,
- 2) support fish stocks and food security,
- 3) sustain coastal communities and livelihoods,
- 4) filter water flowing into our oceans and reef systems and
- 5) protect coastlines from erosion and storm surges.

They are found on every continent except Antarctica and cover approximately 49 million hectares.

Statement 3 is incorrect: The Blue Carbon Initiative (BCI) – co-organized by IOC, Conservation International (CI) and the International Union for Conservation of Nature (IUCN) – works to develop management approaches, financial incentives and policy mechanisms for ensuring the conservation, restoration and sustainable use of coastal blue carbon ecosystems. It engages local, national, and international governments to promote policies that support coastal blue carbon conservation, management and financing. **Thus, BCI is not the initiative of UNEP.**

<https://ioc.unesco.org/our-work/blue-carbon>

Q.10) With reference to Global Methane Pledge (GMP), consider the following statements:

1. It is an initiative of the United States and the European Union.
2. It aims to reduce global methane emissions by at least 30% below 2020 levels by 2030
3. India has not yet signed the pledge.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

The Global Methane Pledge (GMP) is a joint initiative launched by the United States and the European Union at COP26 in November 2021. The Pledge has 111 country participants, responsible for 45% of global human-caused methane emissions. The goal is to work together to collectively reduce methane emissions by implementing policies and technologies that can reduce methane emissions across sectors such as agriculture, oil and gas, and waste management. India did not sign the pledge.

Statement 1 is correct: The Global Methane Pledge was launched at COP26 in November 2021 to catalyse action to reduce methane emissions. It is an initiative of the United States and the European Union.

Statement 2 is correct: The aim of the Global Methane Pledge is to reduce global methane emissions by at least 30% below 2020 levels by 2030.

Statement 3 is correct: India did not sign the pledge because of its concerns over the impact on trade, on the country's vast farm sector, and the role of livestock in the rural economy.

Source: <https://indianexpress.com/article/explained/global-methane-pledge-explained-7605172/>
<https://www.iea.org/reports/global-methane-tracker-2022/the-global-methane-pledge>

Q.11) Geoengineering is the deliberate large-scale intervention in the Earth's natural systems to tackle the issue of climate change. In this context, which among the following can be considered as examples of geoengineering?

1. Albedo enhancement
2. Space reflectors
3. Stratospheric aerosols
4. Ocean Fertilisation
5. Enhanced Weathering

Select the correct answer using the codes given below:

- a) 2 and 5 only
- b) 1, 3 and 4 only
- c) 1, 2, 3 and 4 only
- d) 1, 2, 3, 4 and 5

Ans) d

Exp) Option d is the correct answer.

Geoengineering is the deliberate large-scale intervention in the Earth's natural systems to counteract climate change. There is wide range of proposed geoengineering techniques. Generally, these can be grouped into two categories:

A) Solar Radiation Management (SRM) or Solar Geoengineering

SRM techniques aim to reflect a small proportion of the Sun's energy back into space, counteracting the temperature rise caused by increased levels of greenhouse gases in the atmosphere which absorb energy and raise temperatures. Some proposed techniques include:

Option 1 is correct: Albedo enhancement involves increasing the reflectiveness of clouds or the land surface so that more of the Sun's heat is reflected back into space.

Option 2 is correct: Space reflectors involve blocking a small proportion of sunlight before it reaches the Earth.

Option 3 is correct: Stratospheric aerosols refer to introducing small, reflective particles into the upper atmosphere to reflect some sunlight before it reaches the surface of the Earth.

B) Greenhouse Gas Removal (GGR) or Carbon Geoengineering

GGR techniques aim to remove carbon dioxide or other greenhouse gases from the atmosphere, directly countering the increased greenhouse effect and ocean acidification. These techniques would have to be implemented on a global scale to have a significant impact on greenhouse gas levels in the atmosphere. Some proposed techniques include:

Option 4 is correct: Ocean Fertilisation which involves adding nutrients to the ocean in selected locations to increase primary production which draws down carbon dioxide from the atmosphere.

Option 5 is correct: Enhanced Weathering means exposing large quantities of minerals that will react with carbon dioxide in the atmosphere and storing the resulting compound in the ocean or soil.

Source: <http://www.geoengineering.ox.ac.uk/www.geoengineering.ox.ac.uk/what-is-geoengineering/what-is-geoengineering/>

Q.12) Consider the following statements regarding Greenhouse Gas (GHG) Protocol:

1. It is a joint initiative of the Intergovernmental Panel on Climate Change and the United Nations Industrial Development Organization.
2. It establishes comprehensive global standardized frameworks to measure and manage greenhouse gas (GHG) emissions from private and public sector operations.
3. Joint Implementation and Emission Trading are important mechanisms of the GHG Protocol.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: Greenhouse Gas Protocol is a joint initiative of World Resources Institute and the World Business Council for Sustainable Development (WBCSD). Thus, the Intergovernmental Panel on Climate Change and United Nations Industrial Development Organization are not associated with the GHG protocol.

Statement 2 is correct: GHG Protocol establishes comprehensive global standardized frameworks to measure and manage greenhouse gas (GHG) emissions from private and public sector operations, value chains and mitigation actions. It works with governments, industry associations, NGOs, businesses and other organizations.

Statement 3 is incorrect: Under the Kyoto Protocol, countries bound to the Kyoto Targets can meet a part of their targets through three “market-based mechanisms”:

- 1) Clean Development Mechanism (CDM)
- 2) Emission Trading/Cap and Trade
- 3) Joint Implementation

Source: [https://ghgprotocol.org/about-](https://ghgprotocol.org/about-us#:~:text=What%20is%20GHG%20Protocol%3F,value%20chains%20and%20mitigation%20actions)

[us#:~:text=What%20is%20GHG%20Protocol%3F,value%20chains%20and%20mitigation%20actions](https://ghgprotocol.org/about-us#:~:text=What%20is%20GHG%20Protocol%3F,value%20chains%20and%20mitigation%20actions) .

Q.13) Consider the following statements regarding Global Environment Facility (GEF):

1. It was created at the UN Framework Convention on Climate Change Conference held at Bonn (Germany) in 1999.
2. It acts as a financial mechanism for the Minamata Convention on Mercury and the Stockholm Convention on Persistent Organic Pollutants (POPs).

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: The Global Environment Facility (GEF) was established during the 1992 Rio Earth Summit which acts as a catalyst for action on the environment. Through its strategic investments, the GEF works with partners to tackle the planet's biggest environmental issues.

Statement 2 is correct: GEF is a financial mechanism for five major international environmental conventions: the Minamata Convention on Mercury, the Stockholm Convention on Persistent Organic Pollutants (POPs), the United Nations Convention on Biological Diversity (UNCBD), the United Nations Convention to Combat Desertification (UNCCD) and the United Nations Framework Convention on Climate Change (UNFCCC).

Source: <https://www.unep.org/about-un-environment/funding-and-partnerships/global-environment-facility>

<https://fiftrustee.worldbank.org/en/about/unit/dfi/fiftrustee/fund-detail/gef>

<https://www.unep.org/about-un-environment/funding-and-partnerships/global-environment-facility>

Q.14) Consider the following statements regarding the Intergovernmental Panel on Climate Change (IPCC):

1. It was created in 1988 by the World Meteorological Organization (WMO) and the United Nations Environment Program (UNEP).
2. One of the functions of the IPCC is to conduct research in order to support governments at all levels to develop climate policies.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: IPCC was created in 1988 by the World Meteorological Organization (WMO) and the United Nations Environment Program (UNEP). The IPCC provides regular assessments of the scientific basis of climate change, its impacts and future risks, and options for adaptation and mitigation.

Statement 2 is incorrect: The objective of the IPCC is to provide governments at all levels with scientific information that they can use to develop climate policies. **The IPCC does not conduct its own research.**

For the assessment reports, experts volunteer their time as IPCC authors to assess the thousands of scientific papers published each year to provide a comprehensive summary of what is known about the drivers of climate change, its impacts and future risks, and how adaptation and mitigation can reduce those

risks. Through its assessments, the IPCC identifies the strength of scientific agreement in different areas and indicates where further research is needed.

Source: <https://www.ipcc.ch/about/>

Q.15) With reference to Arctic Amplification, consider the following statements:

1. It refers to the phenomenon where the Arctic region is warming at a faster rate than the rest of the world.
2. Ice-albedo feedback is a process that contributes to Arctic Amplification.
3. It helps to strengthen the Arctic polar Vortex.

Which of the statements given above is/are correct?

- a) 1 only
- b) 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Arctic is experiencing a phenomenon called Arctic amplification, where it is warming at a faster rate of two to three times than the rest of the planet due to sea ice loss. The decline of sea ice causes further melting, making the ice younger and thinner, leading to a darker surface that can absorb more energy from the sun and cause additional heating.

Arctic amplification is causing ice sheet melt, sea level rise, intense Arctic fire seasons, and permafrost melt. Additionally, the rapid warming of the Arctic is also affecting mid-latitude climate and weather.

Statement 1 is correct: Arctic Amplification refers to the phenomenon where the Arctic region is warming at a faster rate than the rest of the world. This warming is characterized by a decrease in the extent and thickness of sea ice, melting of glaciers, and permafrost thawing, among other changes.

Statement 2 is correct: The ice-albedo feedback is a process that amplifies the warming of the Arctic region by causing more absorption of solar radiation. When the Arctic warms, ice and snow begin to melt, revealing darker surfaces that have a lower albedo and absorb more radiation, leading to further warming and melting. This feedback loop plays a critical role in the Arctic Amplification phenomenon, where the Arctic region is warming at a faster rate than the rest of the world.

Statement 3 is incorrect: Arctic Amplification does not strengthen the Arctic polar vortex; rather, it weakens it by allowing Arctic air to shift farther south, contributing to extreme weather events in other parts of the world.

Source: <https://www.thehindu.com/sci-tech/energy-and-environment/explained-what-is-causing-arctic-warming-should-india-be-worried/article65778586.ece#:~:text=According%20to%20the%20World%20Meteorological,polar%20regions%2C%20especially%20the%20Arctic.>

<https://www.climatesignals.org/climate-signals/arctic-amplification>

<https://www.air-worldwide.com/blog/posts/2019/4/arctic-amplification-a-very-bad-positive-feedback-loop/>

Q.16) Which one of the following options correctly describes the term “carbon fertilisation”?

- a) The process of capturing and storing atmospheric carbon dioxide in Earth’s crust.
- b) Increase of carbon dioxide in the atmosphere leading to an increase in the rate of photosynthesis in plants.
- c) A method for removing dissolved organic substances from Ocean and other marine bodies.
- d) None of the above.

Ans) b

Exp) option b is the correct answer.

Option a is incorrect: Carbon sequestration is the process of capturing and storing atmospheric carbon dioxide. It is one method of reducing the amount of carbon dioxide in the atmosphere with the goal of reducing global climate change.

Option b is correct: The carbon dioxide fertilization or carbon fertilisation is responsible for plant growth, and it also contributes to the greening effect. **It refers to the increase of carbon dioxide in the atmosphere leading to an increase in the rate of photosynthesis in plants.**

Option c is incorrect: Carbon adsorption is an effective method for removing dissolved organic substances that cause tastes, odours, or colours is adsorption by activated carbon. Adsorption is the capacity of a solid particle to attract molecules to its surface. Powdered carbon mixed with water can adsorb and hold many different organic impurities. When the carbon is saturated with impurities, it is cleaned or reactivated by heating to a high temperature in a special furnace.

Source: <https://greenstories.co.in/carbon-fertilization-and-its-effects-on-crop/>

<https://www.usgs.gov/faqs/what-carbon-sequestration#:~:text=Carbon%20sequestration%20is%20the%20process,carbon%20sequestration%3A%20geologic%20and%20biologic.>

<https://www.britannica.com/technology/water-supply-system/Chlorination#ref1084833>

<https://www.britannica.com/technology/water-supply-system/Chlorination#ref1084833>

Q.17) Consider the following statements regarding National Mission on Strategic Knowledge for Climate Change:

1. It is one of the eight missions under the National Action Plan for Climate Change.
 2. It seeks to build a vibrant and dynamic knowledge system to fulfil ecologically sustainable development.
 3. The Council of Scientific & Industrial Research (CSIR) is the main implementing agency of this mission.
- Which of the statements given above is/are correct?

- a) 2 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Statement 1 is correct: There are eight National Missions which form the core of the National Action Plan. They focus on promoting understanding of climate change, adaptation and mitigation, energy efficiency and natural resource conservation. Those are-

- 1) National Solar Mission
- 2) National Mission for Enhanced Energy Efficiency
- 3) National Mission on Sustainable Habitat
- 4) National Water Mission
- 5) National Mission for Sustaining the Himalayan Eco-system
- 6) National Mission for a Green India
- 7) National Mission for Sustainable Agriculture
- 8) **National Mission on Strategic Knowledge for Climate Change**

Statement 2 is correct: The National Mission on Strategic Knowledge for Climate Change (NMSKCC) seeks to build a vibrant and dynamic knowledge system that would inform and support national action for responding effectively to the objective of ecologically sustainable development.

Statement 3 is incorrect: NMSKCC is implemented by the Department of Science and Technology and not the CSIR.

Source:

<https://pib.gov.in/PressReleasePage.aspx?PRID=1883746#:~:text=The%20National%20Mission%20on%20Strategic,building%20relating%20to%20climate%20science.https://static.pib.gov.in/WriteReadData/specificdocs/documents/2021/dec/doc202112101.pdf>

Q.18) Consider the following statements regarding the Forest Carbon Partnership Facility (FCPF):

1. It is a specialized agency of the United Nations.
2. The FCPF assists countries in their REDD+ efforts by providing them with financial and technical assistance.
3. Activities of the FCPF are funded by the Green Climate Fund.

Which of the statements given above is/ are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 2 only
- d) 3 only

Ans) c

Exp) Option c is the correct answer.

Statement 1 is incorrect: The Forest Carbon Partnership Facility is a global partnership of governments, businesses, civil society, and Indigenous Peoples focused on reducing emissions from deforestation and forest degradation, forest carbon stock conservation, the sustainable management of forests, and the enhancement of forest carbon stocks in developing countries (activities commonly referred to as REDD+).

Statement 2 is correct: The four strategic objectives of the FCPF:

- 1) **To assist countries in their REDD+ efforts by providing them with financial and technical assistance in building their capacity to benefit from possible future systems of positive incentives for REDD+.**
- 2) To pilot a performance-based payment system for REDD+ activities, with a view to ensuring equitable benefit sharing and promoting future large-scale positive incentives for REDD+.
- 3) Within the approach to REDD+, to test ways to sustain or enhance livelihoods of local communities and to conserve biodiversity.
- 4) To disseminate broadly the knowledge gained in the development of the Facility and the implementation of Readiness Preparation Proposals (RPPs) and Emission Reductions Programs (ERPs).

Statement 3 is incorrect: The FCPF has two separate but complementary funding mechanisms, the Readiness Fund and the Carbon Fund, to achieve its strategic objectives. Both funds are underpinned by a multi-donor fund of governments and non-governmental entities, including private companies that make a minimum financial contribution of \$5 million.

- 1) Contributors to the Readiness Fund are known as Donor Participants.
- 2) Contributors to the Carbon Fund are known as Carbon Fund Participants.
- 3) Developing countries participating in the FCPF (both funds) are known as REDD Country Participants.

Whereas the Green Climate Fund was established by 194 countries that are party to the UN Framework Convention on Climate Change in 2010. It is designed as an operating entity of the UNFCCC's financial mechanism and is headquartered in the Republic of Korea.

Source: <https://www.forestcarbonpartnership.org/about-fcpf-0>

<https://www.unep.org/about-un-environment/funding-and-partnerships/green-climate-fund>

Q.19) Which of the following statements correctly describes the difference between Kyoto Protocol and Paris Agreement?

- a) While the Kyoto protocol exempted industrialized countries, Paris agreement required them to reduce greenhouse gases.
- b) While Kyoto protocol focused on 6 major greenhouse gases, Paris agreement focused on most major greenhouse gases.
- c) While Kyoto protocol aimed to reduce the temperature by 2°C, Paris agreement aimed to limit the increase to 2°C above pre-industrial levels.
- d) While the Kyoto protocol was legally non-binding, Paris agreement is a legally binding commitment.

Ans) b

Exp) Option b is the correct answer.

Kyoto Protocol and Paris Agreement were the two major milestones in the history of emission reduction for greenhouse gases. The differences between the two are:

Option a is incorrect – Kyoto Protocol, sets binding emission reduction targets for 37 industrialized countries and the European community in its first commitment period. It didn't exempt industrialized countries. Paris agreement on the other hand, **included both developed and developing countries** diluting the principle of Common but differentiated responsibility.

Option b is correct – The Kyoto Protocol focused only on major 6 Greenhouse gas emissions. They are Carbon dioxide methane, sulphur hexafluoride, HFCs, PFCs and nitrous oxide. While **the Paris agreement** rather focussed on reducing the emissions **of all the major anthropogenic greenhouse gases**. There was no specific GHGs taken and rather generally all the greenhouse gases were to be included in calculation as per the agreement.

Option c is incorrect - The specific goal of the Paris climate agreement was to reduce greenhouse gas emissions so that the global average temperature would not rise more than 2 degrees Celsius above pre-industrial levels with an earnest effort to not allow it to rise 1.5 degrees Celsius above pre-industrial levels.

The goal in Kyoto Protocol was to reduce greenhouse gas emissions to 5.2% below 1990 levels by 2012. There was no consideration to control specific amount of temperature rise in the Kyoto Protocol. Option d is incorrect – **Kyoto Protocol binds developed countries** because it recognizes that they are largely responsible for the current high levels of GHG emissions in the atmosphere, which are the result of more than 150 years of industrial activity. On the other hand, while Paris Agreement increased accountability through National Determined Contributions, it was voluntary and there was **no legally binding** provisions.

Source: <https://www.careaboutclimate.org/blog/paris-agreement-vs-kyoto-protocol-comparison-chart>

Q.20) With reference to Biodiversity Heritage Site (BHS) located in various states of India, Consider the following pairs:

Biodiversity Heritage Site	State
1. Arittapatti Biodiversity Heritage Site	Kerala
2. Hajong Tortoise Lake	Sikkim
3. Silachari Caves	Tripura

4. Mahendragiri hill Odisha
 Biodiversity Heritage
 Site

How many pairs given above are correctly matched?

- a) Only one pair
 b) Only two pairs
 c) Only three pairs
 d) All four pairs

Ans) b

Exp) Option b is the correct answer.

Biodiversity Heritage Sites (BHS) are areas that are unique, ecologically fragile ecosystems that have rich biodiversity, including wild and domesticated species, rare and threatened species, keystone species, and species of evolutionary significance. These areas may also contain fossil beds and have cultural, ethical or aesthetic values. BHS can be terrestrial, coastal, inland waters, or marine environments and are important for the maintenance of cultural diversity, with or without a long history of human association with them.

Pair 1 is incorrectly matched: Arittapatti Biodiversity Heritage Site is located in Madurai district of Tamil Nadu. This BHS has rich biological and historical significance with the presence of around 250 bird species including 3 flagship Raptor species - Laggar Falcon, Shaheen Falcon, Bonelli's Eagle and wildlife like Indan Pangolin, Python and Slender Loris.

Pair 2 is incorrectly matched: Hajong Tortoise Lake is located in the Maibang Taluk of the Dima Hasao district in Assam. This site is of significant importance as it serves as a natural habitat for the Critically Endangered freshwater 'Black Softshell turtle' Nilssonina nigricans and Endangered 'Indian Peacock Softshell turtle' Nilssonina hurum, along with other major species of flora and fauna.

Pair 3 is correctly matched: Silachari Caves is located in the Gomati district of Tripura and covers an area of 100 hectares. This site is unique as it is the only natural cave in Tripura. It serves as a habitat for several threatened cave bat species in Tripura and has a rich diversity of flora.

Pair 4 is correctly matched: Mahendragiri hill Biodiversity Heritage Site is situated in the Gajapati district of Odisha and covers an area of 4250 hectares. The site has rich floral diversity, representing 40% of the reported flora of Odisha, including 1,358 species of plants, such as angiosperms, pteridophytes, bryophytes, lichens, and macro-fungi, and 2 species of gymnosperms.

Source: <http://nbaindia.org/content/106/29/1/bhs.html>

http://www.wiienviis.nic.in/Database/bhs_8650.aspx

Q.21) Consider the following:

1. Global Climate Change Alliance
2. Forest Carbon Partnership Facility
3. Clean Technology Fund
4. Carbon Initiative for Development

Which of the above given initiatives are managed by the World Bank?

- a) 1, 2 and 3 only
 b) 1, 2 and 4 only
 c) 2, 3 and 4 only
 d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

Option 1 is incorrect. The **Global Climate Change Alliance (GCCA)** is an initiative of the European Union. Its overall objective is to build a new alliance on climate change between the **European Union** and the poor developing countries that are most affected and that have the least capacity to deal with climate change.

Option 2 is correct. The **Forest Carbon Partnership Facility (FCPF)** and the **BioCarbon Fund Initiative for Sustainable Forest Landscapes (ISFL)** focus on sustainable forest and land use. These funds guide readiness and implementation of reducing emissions from deforestation and forest degradation (REDD+), including the testing the purchase of REDD+ credits and incentivizing the development and implementation of sustainable land use activities. They are **managed by the World Bank's** Climate Change Fund Management Unit.

Option 3 is correct. The Clean Technology Fund (CTF) is administered by the World Bank in partnership with Regional Development Bank. It has begun financing clean technology deployment projects in fast growing developing countries. The objective of the CTF is to use the minimum level of concessional finance necessary to realize investment opportunities that will have transformative effects on the greenhouse gas (GHG) emissions.

Option 4 is correct. The **Carbon Initiative for Development** has a portfolio of programs that support similar emissions reduction projects, often small-scale at the household level. It has developed the Standardized Crediting Framework—a new approach to crediting emission reductions in the post-Kyoto era. It is managed **by the World Bank's** Climate Change Fund Management Unit.

<https://www.worldbank.org/en/topic/climatechange/brief/world-bank-carbon-funds-facilities>

Q.22) In the context of The Partnership for Action on Green Economy (PAGE) initiative, consider the following statements:

1. It was launched in 2013 as a direct response to the Rio+20 Declaration.
2. It is a joint initiative of the International Union for Conservation of Nature (IUCN) and World Resources Institute (WRI).
3. It helps the countries in achieving the Sustainable Development Goals.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Statement 1 is correct. PAGE was launched in 2013 as a response to the call at Rio+20 to support countries addressing one of the greatest challenges of our time: building economies that improve human well-being and social equity, while significantly reducing environmental risks and ecological scarcities.

Statement 2 is incorrect. The **United Nations Partnership for Action on Green Economy (PAGE)** puts sustainability at the heart of economic policymaking. The partnership brings together five United Nations agencies; UNEP, UNDP, ILO, UNIDO, and UNITAR. Hence it is not a joint initiative of the Union for Conservation of Nature (IUCN) and the World Resources Institute (WRI).

Statement 3 is correct. PAGE offers a comprehensive and coordinated package of technical assistance and capacity-building services. PAGE represents a mechanism to coordinate UN action on green economy and **to assist countries in achieving and monitoring the emerging Sustainable Development Goals**, especially SDG 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

Source: <https://www.un-page.org/about-page/>

Q.23) With reference to the OzonAction, consider the following statements:

1. It is an intergovernmental organization launched by the BRICS.
2. It assists countries to sustain their compliance with the Montreal Protocol.
3. It is an outcome of the 2015 Paris Climate Conference.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. OzonAction is a branch of the United Nations Environment Programme (UNEP) which has its main office in Paris, and is part of UNEP's Division of Technology, Industry and Economics (DTIE). The UN Environment Programme (UNEP) became an Implementing Agency of the Montreal Protocol's Multilateral Fund on 19 June 1991, and it was given this clearinghouse mandate. Since that date, UNEP OzonAction, which is part of UNEP's Law Division has been strengthening the capacity of governments - particularly the operational focal points for the Montreal Protocol

Statements 2 is correct. OzonAction has three areas of work:-

- 1) Assisting developing countries in UNEP's capacity as an Implementing Agency of the Multilateral Fund for the **Implementation of the Montreal Protocol**, through a Compliance Assistance Programme (CAP).
- 2) Assisting countries with economies in transition (CEIT countries) in UNEP's capacity as an Implementing Agency of the Global Environment Facility.
- 3) Specific partnerships with bilateral agencies and Governments.

Statement 3 is incorrect: OzonAction's story begins with the Montreal Protocol that was signed and brought into force in 1989. **OzonAction was established in the early 1990s (not an outcome of Paris climate Conference).** OzonAction assists developing countries and countries with economies in transition (CEITs) to enable them to achieve and sustain compliance with the Montreal Protocol.

Source: <https://www.unep.org/ozonaction/who-we-are>

<https://sdgs.un.org/partnerships/unep-montreal-protocol-ozonaction-programme>

<http://terrepolicycentre.com/pdf/OzonAction-SM-Strategy.pdf>

Q.24) Clydebank Declaration, recently seen in news, is primarily aimed at

- a) addressing the issue of deforestation and forest degradation.
- b) ensuring gender equality in the fight against climate change.
- c) reducing emissions from the maritime sector by establishing green shipping corridors.
- d) eliminating the heavy metal pollution in river waters by 2030.

Ans) c

Exp) Option c is the correct answer.

The United Kingdom has announced the launch of the Clydebank Declaration on Green Shipping Corridors at the COP26 conference in Glasgow. It aims to reduce the emissions from the maritime sector. **The signatories of the Declaration are to support the establishment of green shipping corridors – zero-emission maritime routes between 2 (or more) ports.** The declaration aims to support the establishment of at least 6 green corridors by 2025, while aiming to scale activity up in the following years, by inter alia supporting the establishment of more routes, longer routes and/or having more ships on the same routes.

Since November 2021, two green corridors have been set in motion – one between Los Angeles and Shanghai, and one between Antwerp and Montreal. 22 countries including the US, Japan, Australia and Canada have signed the Clydebank Declaration and India has not signed the Declaration yet.

Source: <https://www.gov.uk/government/publications/cop-26-clydebank-declaration-for-green-shipping-corridors/cop-26-clydebank-declaration-for-green-shipping-corridors#:~:text=The%20signatories%20of%20the,number%20of%20green%20corridors.>

Q.25) With reference to Accelerating to Zero (A2Z) Coalition, consider the following statements:

1. It was launched during the Paris Climate Meet of 2015
2. It aims to phase out sale of new petrol and Diesel vehicles by 2040 globally.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

The A2Z Coalition is a partnership of various organizations working towards accelerating the transition to zero-emission vehicles. The coalition includes partners such as the UK Government's COP26 Presidency, The Climate Change High-Level Champions, the International Council on Clean Transportation, Climate Group, and the Drive Electric Campaign.

Statement 1 is incorrect: The United Nations Framework Convention on Climate Change (COP27) **launched the Accelerating to Zero (A2Z) Coalition**, the next step in securing more ambitious commitments to a zero-emission vehicles transition aligned with the Paris Agreement (COP 21).

Statement 2 is correct: The A2Z Coalition aims to accelerate the transition to zero-emission vehicles (ZEVs) and ultimately phase out the sale of new petrol and diesel vehicles by 2040 globally and by no later than 2035 in leading markets.

Source: <https://www.livemint.com/news/world/accelerating-to-zero-coalition-launches-at-cop27-to-speed-up-transition-to-zero-emission-vehicles-11668686662963.html> <https://acceleratingtozero.org/>

Q.26) With reference to the National Mission for Enhanced Energy Efficiency (NMEEE), consider the following statements:

1. It is one of eight national missions listed in the National Action Plan on Climate Change (NAPCC).
2. It is being implemented by the Ministry of New and Renewable Energy.
3. Energy Efficiency Financing Platform (EEFP) is one of the initiatives launched under the NMEEE.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct. The National Mission for Enhanced Energy Efficiency (NMEEE) **is one of eight national missions listed in the National Action Plan on Climate Change (NAPCC)**. The mission's main objective is to boost the market for energy efficiency by establishing supportive laws and policies. It also plans to support new, environmentally friendly business models for the energy efficiency industry.

Statement 2 is incorrect. The National Mission for Enhanced Energy Efficiency (NMEEE) is implemented by the Bureau of Energy Efficiency (BEE). BEE is an organization of the Indian government, under the **Ministry of Power**.

Statement 3 is correct. Energy Efficiency Financing Platform (EEFP) was launched as one of the initiatives under National Mission for Enhanced Energy Efficiency to provide a platform to interact with Financial Institutions (FIs) and project developers for implementation of energy efficiency projects.

Other initiatives under NMEEE are:

- 1) **Framework for Energy Efficient Economic Development (FEEED)** - Developing fiscal instruments to leverage financing for Energy Efficiency through risk mitigation:
- 2) **Perform Achieve and Trade Scheme (PAT)** - Implementing a market-assisted compliance mechanism to accelerate the implementation of cost-effective improvements in energy efficiency in large energy-intensive industries.
- 3) **Market Transformation for Energy Efficiency (MTEE)** - Accelerating the shift to energy-efficient appliances in specific applications through innovative measures to make the products more affordable.

Source: <https://www.pib.gov.in/PressReleasePage.aspx?PRID=1744431>

<https://vikaspedia.in/energy/policy-support/energy-efficiency/national-mission-for-enhanced-energy-efficiency>

Q.27) Consider the following statements about National Adaptation Fund for Climate Change (NAFCC):

1. It is a Centrally Sponsored Scheme launched in the year 2011-12.
2. National Bank for Agriculture and Rural Development (NABARD) is the National Implementing Entity of NAFCC.
3. No separate budget allocation is provided for this fund, instead the government utilizes the funds available under various other schemes.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 2 only
- d) 1 only

Ans) c

Exp) Option c is the correct answer.

Statement 1 is incorrect. The National Adaptation Fund for Climate Change (NAFCC) was established in 2015–16 as a **Central Sector Scheme**. NAFCC's primary goal is to encourage practical adaptation initiatives that lessen the harmful effects of climate change.

Statement 2 is correct. National Bank for Agriculture and Rural Development (**NABARD**) **has been chosen as the National Implementing Entity (NIE)** for carrying out adaptation projects under NAFCC. It is due to the fact that there is an existing arrangement with NABARD as National Implementing Entity (NIE) for Adaptation Fund (AF) under Kyoto Protocol and its presence throughout the country.

Statement 3 is incorrect. Government of India provides budgetary allocations to the NAFCC annually. In recent years there have been concerns about the declining amounts of the budgetary allocations to the NAFCC. The government allotted INR 350 crore in FY16, and INR 60 crore assigned in Budget 2022.

Source: <https://blog.forumias.com/national-adaptation-fund/orfonline.org>

<https://vikaspedia.in/energy/environment/climate-change/national-adaptation-fund-for-climate-change>

Q.28) With reference to the National Innovations on Climate Resilient Agriculture (NICRA), consider the following statements:

1. It was launched by the Indian Council of Agricultural Research (ICAR).
2. It aims to conduct research about climate change impacts on Indian agriculture.
3. It focusses only on the agricultural crops, and the fisheries and livestock fall outside its scope.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct. Indian Council of Agricultural Research (ICAR), Ministry of Agriculture and Farmers Welfare launched a flagship network project 'National Innovations on Climate Resilient Agriculture' (NICRA) in 2011. The project aims at strategic research on adaptation and mitigation, demonstration of technologies on farmers' fields and creating awareness among farmers and other stakeholders to minimize the climatic change impacts on agriculture.

Statement 2 is correct and statement 3 is incorrect: The project aims to enhance resilience of Indian agriculture to climate change and climate vulnerability **through strategic research and technology demonstration. The research on adaptation and mitigation covers crops, livestock, fisheries and natural resource management. The project consists of four components viz. Strategic Research, Technology Demonstration, Capacity Building and Sponsored/Competitive Grants.**

Source: <http://www.nicra-icar.in/nicrarevised/index.php/home1>

<https://blog.forumias.com/national-innovations-in-climate-resilient-agriculture/nicra-2/>

<https://vikaspedia.in/agriculture/policies-and-schemes/crops-related/krishti-unnati-yojana/paramparagat-krishti-vikas-yojana>

Q.29) Which of the following are part of India's Updated Nationally Determined Contributions (NDCs)?

1. To put forward and further propagate a healthy and sustainable way of living as a key to combating climate change.
2. To reduce Emissions Intensity of its GDP by 45% by 2030, compared to 2005 level.
3. To achieve about 50% cumulative electric power installed capacity from non-fossil fuel-based energy resources by 2030.
4. To create an additional carbon sink of 2.5 to 3 billion Tonnes of CO₂ equivalent by 2030.
5. To achieve Net zero emissions by 2030.

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 5 only
- c) 1, 2, 4 and 5 only
- d) 1, 2, 3 and 4 only

Ans) d

Exp) Option d is the correct answer.

The United Nations Framework Convention on Climate Change (UNFCCC) received India's Intended Nationally Determined Contribution (NDC) on October 2, 2015. Each Party shall communicate a nationally determined contribution every five years, according to Article 4 of the Paris Agreement.

In conformity with the Paris Agreement, India communicated the following update to its first NDC recently:

Option 1 is correct: To combat climate change, it is important to promote a sustainable, healthy way of life that is based on traditions and values of moderation and conservation. One way to do this is through the "LIFE" movement, which refers to "Lifestyle for Environment."

Option 2 is correct: Compared to 2005 levels, the Emissions Intensity of its GDP to be reduced by 45% by 2030.

Option 3 is correct: With the help of technology transfer and low-cost international financing, especially from the Green Climate Fund (GCF), to attain around 50% of the total installed capacity of electric power from non-fossil fuel-based energy sources by 2030.

Option 4 is correct: To create an additional carbon sink of 2.5 to 3 billion tonnes of CO₂ equivalent through additional forest and tree cover by 2030.

Option 5 is incorrect: Achieving net zero emission by 2030 is not an INDC of India. India aims to become a net zero emitter by 2070.

Source: <https://unfccc.int/sites/default/files/NDC/2022-08/India%20Updated%20First%20Nationally%20Determined%20Contrib.pdf>

Q.30) With reference to Important Bird Areas (IBAs), consider the following statements:

1. It is a program of Bird Life International.
2. IBAs in India are declared by the Ministry of Environment, Forest and Climate Change (MoEFCC).
3. For an area to be designated as an IBA, it needs to have a substantial population of one or more bird species that are threatened on a global scale.
4. IBAs are exclusively found within national parks and wildlife sanctuaries only.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 3 and 4 only
- d) 2 and 4 only

Ans) b

Exp) Option b is the correct answer.

The IBA program of Birdlife International aims to utilize birds as reliable indicators of ecosystem health by identifying, monitoring, and safeguarding a worldwide network of IBAs. These IBAs play a crucial role in the conservation of birds and associated biodiversity at the global, regional, or sub-regional levels by serving as protected areas.

Statement 1 is correct: Important Bird Areas (IBAs) is a program of Bird Life International, which is a global partnership of conservation organizations.

Statement 2 is incorrect: IBAs in India are identified by the Bombay Natural History Society (BNHS), which is the partner organization of Bird Life International in India.

Statement 3 is correct: According to Birdlife International, designation of IBAs is based on standardized criteria, namely (i) hold significant numbers of one or more globally threatened bird species, (ii) be one of a set of sites that together hold a suite of restricted-range species or biome-restricted species and (iii) have exceptionally large numbers of migratory or congregatory birds.

Statement 4 is incorrect: IBAs can be located in a variety of habitats, including protected areas, but can also be found in non-protected areas such as agricultural lands and urban areas.

Source: http://www.wiienviis.nic.in/Database/IBA_8463.aspx

Q.31) With reference to the Global Climate Change Alliance (GCCA), consider the following statements:

1. It is an initiative of the United Nations Environment Programme.
2. It provides only technical support to the countries and does not provide any financial support.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) d

Exp) Option d is the correct answer.

Statement 1 is incorrect. The European Union launched the Global Climate Change Alliance (GCCA) in 2007. The overall objective is to create a new climate change alliance between the European Union and the poor countries that are most affected and lack the resources to deal with the issue.

Statement 2 is incorrect. The GCCA provides technical as well as financial support to partner countries to integrate climate change into their development policies and budgets, and to implement projects that address climate change on the ground, promoting climate-resilient, low-emission development. Technical and financial cooperation, in turn, informs political dialogue and exchange of experience at regional and global levels.

Source: <https://climatefundsupdate.org/the-funds/global-climate-change-alliance/#:~:text=The%20Global%20Climate%20Change%20Alliance,to%20deal%20with%20climate%20change>.

Q.32) Which of the following ministries has launched Eco Niwas Samhita?

- a) The Ministry of Housing and Urban Affairs
- b) The Ministry of New and Renewable Energy
- c) The Ministry of Power
- d) The Ministry of Rural Development

Ans) c

Exp) Option c is the correct answer.

Eco-Niwas Samhita: It is an Energy Conservation Building Code for Residential Buildings (ECBC-R) and was launched by the **Ministry of Power** of the Indian government. This code was launched on the **National Energy Conservation Day 2018**.

- 1) Its goal is to encourage the design and construction of houses, apartments, and townhouses so that their occupants can benefit from energy efficiency.
- 2) This Code was prepared following extensive discussions with all stakeholders, including building-material suppliers, developers, and architects.
- 3) The initial objective of Part-I of the Code, which establishes a minimum standard for building envelope designs, was to create energy-efficient residential buildings.
- 4) By 2030, the implementation of this Code might result in energy savings of 125 billion units of electricity, or roughly 100 million tonnes of CO2 emissions.

Source: <https://www.econiwass.com/news-details-13.html>

Q.33) Which among the following can be considered as the source of Bio-energy?

1. Wood residue
2. Agricultural crops
3. Municipal solid waste
4. Algae
5. Landfills

Select the correct answer using the code given below:

- a) 1, 4 and 5 only
- b) 1, 2 and 3 only
- c) 2, 3, 4 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) d

Exp) Option d is the correct answer.

Bioenergy is a type of renewable energy that is derived from biomass, which is organic material such as plants and animals.

Option 1 is correct: Wood is a commonly used source of bioenergy, especially in the form of residues from timber harvesting, sawmills, and other wood processing industries. This material can be used to produce heat and electricity through combustion, gasification, and other conversion technologies.

Option 2 is correct: Agricultural crops and residues such as corn, sugarcane, and soybeans are also important sources of bioenergy. These materials **can be converted into biofuels such as ethanol and biodiesel**, which can be used as transportation fuels.

Option 3 is correct: Municipal solid waste, or garbage, can also be a source of bioenergy. Waste-to-energy facilities use incineration or other technologies to convert waste into heat and electricity.

Option 4 is correct: Algae are a promising source of bioenergy because they can grow quickly and contain high levels of oils that can be converted into biodiesel. Algae can also be used to produce biogas through anaerobic digestion.

Option 5 is correct: Landfills are another source of bio-energy, which is produced when organic material decomposes in the absence of oxygen. This **can be captured and used to generate heat and electricity.**

Source: <https://www.irena.org/bioenergy>

<https://www.energy.gov/eere/bioenergy/bioenergy-basics>

<http://www.fao.org/bioenergy/en/>

Q.34) “Green Economy Initiative”, recently seen in news, is led by which of the following organizations/agencies?

- a) Greenpeace International
- b) World Economic Forum
- c) United Nations Environment Programme
- d) World Wide Fund for Nature

Ans) c

Exp) option c is the correct answer.

The Green Economy Initiative was launched in 2008. It is led by the UN Environment Programme. It is made up of several components whose overall objective is to provide analysis and policy support for investing in green sectors.

Three categories of activities are included in the Green Economy Initiative:

- 1) Producing a Green Economy Report and related research materials that analyze the macroeconomic, sustainability, and poverty reduction implications of green investment across a range of sectors.
- 2) Providing assistance on how to help certain countries shift to a green economy.
- 3) Involving a wide range of research, non-governmental organizations, business, and UN partners in the Green Economy Initiative's implementation.

Source: <https://www.unep.org/explore-topics/resource-efficiency/what-we-do/policy-and-strategy/green-economy>

Q.35) Recently, Joshimath, a small town in Uttarakhand is declared as a landslide-subsidence zone. In this context, which of the following factors make Joshimath highly vulnerable to sinking?

1. Presence of Mantle plumes below Joshimath
2. Lack of proper drainage
3. Situated in middle slopes of a hill
4. Presence of Snow in upper reaches

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1 and 4 only
- d) 1, 2, 3 and 4

Ans) b

Exp) Option b is the correct answer.

Joshimath, a town in Uttarakhand, India, has been declared a landslide and subsidence-hit zone after satellite images released by the National Remote Sensing Centre of the Indian Space Research Organisation (ISRO) showed it sinking rapidly at a rate of 5.4 cm in just 12 days, possibly due to a subsidence event on January 2. More than 600 houses in Joshimath have developed huge cracks, rendering them unfit for habitation, while roads and fields have also been affected.

Option 1 is incorrect: A mantle plume is a column of hot material that rises up from deep within the Earth's mantle. While mantle plumes can cause volcanic activity, there is no evidence to suggest that Joshimath is located on or near a mantle plume.

Option 2 is correct: According to the experts, lack of a proper drainage system might have also contributed to the sinking of Joshimath. Unplanned and unauthorised construction led to the blocking of the natural flow of water, which eventually resulted in frequent landslides.

Option 3 is correct: Joshimath is situated in middle slopes of a hill bounded by **Karmanasa and Dhaknala streams on west and east and Dhauliganga and Alaknanda rivers on south and north**. The area around town is covered with thick layer of overburden material which makes it highly vulnerable to sinking.

Option 4 is correct: Study by Uttarakhand State Disaster Management Authority (USDMA) highlighted that perennial stream, snow in upper reaches, and highly weathered rocks with low cohesive characteristics makes Joshimath prone to landslides.

Source: https://www.business-standard.com/article/current-affairs/why-is-joshimath-declared-landslide-subsidence-hit-zone-explained-123010901218_1.html

<https://www.hindustantimes.com/india-news/geology-to-unplanned-construction-decoding-why-joshimath-is-sinking-101673028772987.html>

Q.36) With reference to the Small Grants Programme (SGP), consider the following statements:

1. It is an initiative of the Global Environment Facility (GEF).
2. It provides financial support to local civil society and community-based organizations for environmental actions.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. The Small Grants Programme is an initiative of the Global Environment Facility. Through community-based initiatives, the GEF's Small Grants Programme (SGP) has been an effective tool for promoting global environmental and sustainable development.

Statement 2 is correct. The GEF Small Grants Programme (SGP) is a corporate program of the Global Environment Facility that provides financial and technical support to local civil society and community-based organizations to develop and implement innovative local actions that address global environmental issues, while also improving livelihoods and reducing poverty.

Source: <https://www.undp.org/georgia/projects/gef-small-grants-programme>

Q.37) Unlocking NATIONAL Energy Efficiency Potential (UNNATEE), a national strategy document for accelerating energy efficiency in India, is developed by which of the following agencies/organizations?

- a) NITI Aayog
- b) Energy Efficiency Services Limited (EESL)
- c) Bureau of Energy Efficiency (BEE)
- d) Alliance for an Energy Efficient Economy (AEEE)

Ans) c

Exp) Option c is the correct answer.

Bureau of Energy Efficiency (BEE) has developed a national strategy document titled UNNATEE (Unlocking NATIONAL Energy Efficiency potential). It describes a plain framework and implementation strategy to establish a clear linkage between energy supply-demand scenarios and energy efficiency opportunities.

- 1) The document offers a comprehensive roadmap to address India's environmental and climate change mitigation action through energy efficiency measures.
- 2) The document provides a comprehensive strategy for India's environmental and climate change mitigation efforts through energy saving initiatives. The document has now been made available for broader public participation and is looking for comments and valuable suggestions from all the stakeholders.

Source:

<https://pib.gov.in/PressReleasePage.aspx?PRID=1568321#:~:text=The%20strategy%20document%20titled%20UNNATEE,scenarios%20and%20energy%20efficiency%20opportunities.>

Q.38) With reference to the Carbon Pricing Leadership Coalition (CPLC), consider the following statements:

1. It is a voluntary initiative that catalyzes action towards the successful implementation of carbon pricing around the world.
2. The CPLC Secretariat is administered by the World Bank Group
3. It has been established in 1997 as a part of the Kyoto Protocol.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statements 1 and 2 are correct. The Carbon Pricing Leadership Coalition (CPLC) is a voluntary initiative that catalyzes action towards the successful implementation of carbon pricing around the world. The CPLC brings together leaders from government, business, civil society and academia to support carbon pricing, share experiences and enhance the global, regional, national and sub-national understanding of carbon pricing implementation. **The CPLC Secretariat is administered by The World Bank Group.**

Statement 3 is incorrect. **The Coalition was founded on the first day of the Paris Climate Conference (COP21) in 2015** to ensure the inclusion of carbon pricing on the global agenda. The Coalition promotes action through sharing knowledge, targeted technical analysis, and public-private dialogue that facilitates and accelerates the adoption of successful carbon pricing policies.

Source: <https://www.carbonpricingleadership.org/who-we-are>

Q.39) Consider the following statements with reference to the National Mission on Sustainable Habitat:

1. It is one of the eight climate missions under the National Action Plan on Climate Change in India.
2. The mission is governed by the Ministry of Environment, Forest, and Climate Change.
3. Swachh Bharat Mission is part of the National Mission on Sustainable Habitat.
4. The mission also focuses on the development of technologies for producing power from waste.

Which of the above-given statements are correct?

- a) 2, and 3 only
- b) 1, 3, and 4 only
- c) 1, 2 and 4 only
- d) 1, 2, 3 and 4

Ans) b

Exp) Option b is the correct answer.

The National Mission on Sustainable Habitat is an umbrella program to reduce energy consumption and hence the risk of climate change due to the urban settlement pattern.

Statement 1 is correct: The **National Mission on Sustainable Habitat is one of the eight climate missions of the Indian government under the NAPCC** (National Action Plan on Climate Change) mitigation strategy.

Statement 2 is incorrect: **National Mission on Sustainable Habitat** was launched in the year 2010 and is **governed by the Ministry of Urban Development**. It was intended to make cities more sustainable

Statement 3 is correct: The Mission on Sustainable Habitat, which is being carried out through the Ministry of Urban Development's 4 flagship missions/ programs, The four flagship missions include:

- 1) Atal Mission on Rejuvenation and Urban Transformation (AMRUT)
- 2) **Swachh Bharat Mission**
- 3) Smart Cities Mission
- 4) Urban Transport Program

Statement 4 is correct: Among the functional areas of the Mission come Energy Conservation Building Code, Growth of Medium and Small Cities, Waste to Energy and R&D Programme. **The development of**

technologies for producing power from waste will be a particular area of focus when it comes to recycling materials and managing urban waste.

Source: <https://mohua.gov.in/upload/uploadfiles/files/NMSH-2021.pdf>

Q.40) Consider the following statements regarding Community Reserves.

1. Once a forest land has been declared a Community Reserve, its governance comes under the local village councils.
2. After a forest has been made into a Community Reserve, people can hunt and practice Jhum cultivation without hindrance.
3. Community Reserves are protected under the Forest Conservation Act, 1980.

Which of the above given statements is / are **incorrect**?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

All the statements are incorrect.

A community reserve is usually formed by the local village council and the forest department signing a memorandum of understanding (MoU).

Option 1 is Incorrect. Once a forest land has been declared a community reserve, its governance comes under the forest department instead of being governed by the local village councils.

Option 2 is also Incorrect. After a forest has been made into a community reserve, people cannot hunt there, nor can they use it for agricultural practices, let alone jhum cultivation.

Option 3 is also Incorrect. Community reserves fall under the protected areas, along with marine protected areas, national parks, wildlife sanctuaries and conservation reserves, according to the Wildlife (Protection) Act (WLP), 1972.

Source:

https://www.google.com/url?sa=t&source=web&rct=j&url=https://www.downtoearth.org.in/news/forests/amp/community-reserves-are-they-forest-department-s-backdoor-entry-into-north-east-india-85242&ved=2ahUKEwju8Jie_bL-AhUk8zgGH4C8AQFnoECDsQAQ&usq=AOvVaw2-tZNdRP-UpLq_q29rG8wL

Q.41) With reference to the Energy Conservation Building Code (ECBC), consider the following statements:

1. It was launched by the Bureau of Energy Efficiency.
2. It provides mandatory requirements for water conservation in buildings.
3. It is applicable for both Government and private buildings.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Statement 1 is correct. In order to promote energy efficiency in the building sector, the **Bureau of Energy Efficiency (BEE) under the Ministry of Power** launched the Energy Conservation Building Code (ECBC) in May 2007.

Statement 2 is incorrect. ECBC addresses only energy efficiency of buildings. Water and other aspects are generally covered in the green building rating systems.

Statement 3 is correct. The ECBC is applicable to all buildings or building complexes that have a connected load of 100 kW or greater, or a contract demand of 120 kVA or greater and used for commercial purposes. **It is applicable for both Government and private buildings.** The code is not applicable to Equipment and portions of building systems that use energy primarily for manufacturing processes.

Source: <http://upsavesenergy.com/SDAActivitiesECBC.aspx>

https://beeindia.gov.in/sites/default/files/ECBC_FAQs_0.pdf

Q.42) Consider the following statements with reference to the Global Alliance for Climate Smart Agriculture (GACSA):

1. Its membership is open to both businesses and international organizations.
2. The Facilitation Unit of GACSA is hosted by the Food and Agriculture Organization.
3. It was launched at the Earth Summit of 2002.

Which of the above-given statements is/are correct?

- a) 2 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

GACSA is an inclusive, voluntary and action-oriented multi-stakeholder platform on Climate-Smart Agriculture (CSA).

Statement 1 is correct: GACSA is a voluntary coalition **open to governments, international and regional organizations, institutions, civil society, farmers' organizations and businesses** who subscribe to the vision and objectives of the Alliance.

Statement 2 is correct: The Facilitation Unit (FU) serves as the secretariat for the Alliance and helps Alliance members take action to deliver the Alliance's aspirational outcomes. For guidance and programmatic and budget planning purposes, the FU reports to the co-Chairs of the Strategic Committee (SC) of the Alliance.

The Facilitation Unit is hosted by Food and Agriculture Organization.

Statement 3 is incorrect: The concept of Climate-Smart Agriculture (CSA) was originally developed by FAO and officially presented at the Hague Conference on Agriculture, Food Security and Climate Change in 2010, through the paper "Climate-Smart Agriculture: Policies, Practices and Financing for Food Security, Adaptation and Mitigation". **GACSA was launched in 2014 at the UN Climate Summit.**

Source: <https://www.fao.org/gacsa/en/>

Q.43) Which of the following Gases are targeted under the Kyoto Protocol?

1. Nitrous oxide
2. Sulfur hexafluoride
3. Water Vapor
4. Ozone
5. Methane

Select the correct answer using the code given below:

- a) 1, 2, and 5 only
- b) 2, 3, and 4 only
- c) 1, 4 and 5 only
- d) 1, 2, 4 and 5 only

Ans) a

Exp) Option a is the correct answer.

The **Kyoto Protocol is an international agreement adopted in 1997** that aimed to **reduce greenhouse gas emissions** in response to climate change. The protocol **targets six primary greenhouse gases:**

Carbon dioxide (CO₂) - Primarily produced from the burning of fossil fuels like coal, oil, and natural gas, as well as deforestation and other industrial processes.

Methane (CH₄) - Produced by natural sources like wetlands, as well as human activities such as livestock farming, rice cultivation, landfills, and fossil fuel production. **Hence option 5 is correct.**

Nitrous oxide (N₂O) - Emitted from agricultural and industrial activities, as well as the burning of fossil fuels. **Hence option 1 is correct.**

Hydrofluorocarbons (HFCs) - Synthetic gases used in refrigeration, air conditioning, foam blowing, and other industrial processes. They were introduced as replacements for ozone-depleting substances like chlorofluorocarbons (CFCs).

Perfluorocarbons (PFCs) - A group of synthetic chemicals used in various industrial applications, including aluminum production, semiconductor manufacturing, and refrigeration.

Sulfur hexafluoride (SF₆) - A synthetic gas used primarily in electrical transmission and distribution equipment, as well as in magnesium and aluminum production. **Hence option 2 is correct.**

These gases are known to contribute to global warming by trapping heat in the Earth's atmosphere, and the Kyoto Protocol aimed to reduce their emissions in participating countries.

Option 3 and 4 are incorrect: Water Vapor and ozone are not part of **Kyoto Protocol**.

Source: http://unfccc.int/kyoto_protocol/items/2830.php

Q.44) Consider the following statements with reference to the Business Responsibility and Sustainability Report:

1. It is an initiative of the Securities and Exchange Board of India (SEBI).
2. Recently, it has been made mandatory for all the public listed companies in India.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: The Securities and Exchange Board of India (SEBI) has decided to introduce new requirements for business sustainability reporting by listed entities. This new report will be called the Business Responsibility and Sustainability Report (BRSR) and will replace the existing Business Responsibility Report (BRR).

Earlier the SEBI in 2015 mandated that listed entities report on ESG (Environment, Social, and Governance) parameters in the Business Responsibility Report (BRR) format.

Statement 2 is incorrect: Business Responsibility and Sustainability Report (BRSR) is more granular with quantifiable metrics in line with the principles enshrined in the ‘National Guidelines on Responsible Business Conduct’. **The BRSR was made mandatory for the top 1000 listed entities (by market capitalization).**

Source: Economic Survey 2022-23 Chapter 7 Page no. 234

https://www.sebi.gov.in/legal/circulars/may-2021/business-responsibility-and-sustainability-reporting-by-listed-entities_50096.html

Q.45) In a first in the country, a state government notified Slender Loris Sanctuary. Consider the following statements with reference to this Sanctuary and Slender Loris:

1. The sanctuary is recently notified by the Karnataka government.
2. Slender Loris is arboreal in nature as it spends most of its life on trees.
3. The species is categorized as “Endangered” as per the IUCN Red list of threatened species.
4. The predatory activities of Slender Loris are very detrimental to the interests of farmers.

Which of the above statements are correct?

- a) 1, 2 and 3 Only
- b) 2 and 3 Only
- c) 2, 3 and 4 Only
- d) 1 and 4 Only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. In a first in the country, Tamil Nadu government notified Kadavur Slender Loris sanctuary under Section 26 (A)(1)(b) of Wildlife (Protection) Act, 1972. The Kadavur Slender Loris sanctuary is to cover 11,806 hectares in Karur and Dindigul districts.

Statement 2 is correct. Slender Loris are small nocturnal mammals, and they are arboreal in nature as they spend most of their life on trees.

Statement 3 is correct. Its IUCN status is Endangered. The survival of the species depends on its habitat improvement, conservation efforts and mitigation of threats.

Statement 4 is incorrect. The species acts as a biological predator of pests in agricultural crops and benefits farmers. Slender Loris has a wide range of ecological roles to play in the terrestrial ecosystem.

Source:

<https://www.google.com/url?sa=t&source=web&rct=j&url=https://newsonair.com/2022/10/14/indias-first-slender-loris-sanctuary-to-be-established-in-tamil-nadu/&ved=2ahUKEwiGtqvBg7P-AhVKSwwGHUWzD0EQFnoECA4QAQ&usq=A0vVaw1DI70JFDuxOGmGYj1ddvr9>

Q.46) Which of the following was/were among the major decisions taken at the Sharm-el-Sheikh Climate Change Conference?

1. To establish a Loss and Damage fund to compensate the most vulnerable countries for their losses due to climate-related disasters.
2. Launch of African Carbon Market Initiative to support climate change initiatives in Africa.
3. Launch of Global Renewables Alliance to promote energy transition toward renewables.

Select the correct answer using the code given below:

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

There were several key outcomes of the Sharm-el-Sheikh Climate Change Conference i.e., 2022 Conference of Parties 27 of the United Nations Framework Convention on Climate Change.

Statement 1 is correct: The COP27 reached a breakthrough agreement on a new “Loss and Damage” Fund for Vulnerable Countries. 'Loss and Damage' refers to impacts of climate change that cannot be avoided either by mitigation (cutting greenhouse gas emissions) or adaptation (modifying practices to buffer against climate change impacts). The delegates from the United Nations at COP 27 agreed to create a 'Loss and Damages' fund which will compensate the most vulnerable countries for their losses due to climate-related disasters.

Statement 2 is correct: African Carbon Market Initiative (ACMI) was launched in COP 27 to support the climate change initiatives, growth of carbon credit production and create jobs in Africa. The Africa Carbon Markets Initiative (ACMI) seeks to unlock the potential of voluntary carbon markets for financing Africa's energy, climate and development goals.

Statement 3 is correct: The Global Renewables Alliance was launched at COP27 and combines industry bodies and organisations for wind, solar, hydropower, green hydrogen, energy storage and geothermal sectors. The Alliance will also act as a unified voice that represents renewables industries and technologies.

Source: <https://www.unep.org/news-and-stories/story/what-you-need-know-about-cop27-loss-and-damage-fund>

<https://www.seforall.org/ACMI>

<https://unfccc.int/cop27/auv>

<https://www.edie.net/clean-energy-sectors-unite-to-form-global-renewables-alliance-at-co27/>

Q.47) Consider the following statements:

Statement 1: Koalas are examples of specialist species.

Statement 2: They can eat variety of food and thrive in a varied range of habitats.

Which one of the following is correct in respect of the above statements?

- Both the Statement 1 and Statement 2 are correct and Statement 2 is the correct explanation for statement 1
- Both statement 1 and Statement 2 are correct but Statement 2 is not the correct explanation for Statement 1
- Statement 1 is correct but Statement 2 is not correct
- Statement 1 is not correct but Statement 2 is correct

Ans) c

Exp) Option c is the correct answer.

In the field of ecology, classifying a species as a generalist or a specialist is a way to identify what kinds of food and habitat resources it relies on to survive.

Statement 1 is correct. Koala (*Phascolarctos cinereus*) is an **example of specialist species**. Specialist species **eat a limited diet and occupy a much narrower niche**. Native to Australia, koalas are herbivorous marsupials that feed only on the leaves of the eucalyptus tree. Therefore, their range is **restricted to habitats that support eucalyptus trees**. Within this diet, some koalas specialize even further and eat leaves from only one or two specific trees. This can pose a problem when **environmental disruptions**, like effects from climate change or habitat loss, occur. Such disturbances **have a strong effect on specialists** because they cannot adapt to use other food sources or habitats as quickly as generalist species.

Statement 2 is incorrect. Specialist **species evolved to fit a very specific niche**. **Example:** Canada lynx (*Lynx canadensis*) is a carnivorous specialist which preys upon snowshoe hare. It inhabits the forested,

mountainous areas favoured by their prey. In contrast, **generalist species can feed on a wide variety of things and thrive in various environments**. Raccoons (*Procyon lotor*) are an example of a generalist species. They can live in a wide variety of environments, including forests, mountains, and large cities, which they do throughout North America. Raccoons are omnivores and can feast on everything from fruit and nuts to insects, frogs, eggs, and human trash. Other examples of generalist species include bobcats and coyotes.

Source: <https://www.nationalgeographic.org/encyclopedia/generalist-and-specialist-species/#:~:text=Koala%20are%20a%20specialist%20species,leaves%20of%20the%20eucalyptus%20tree.&text=Generalists%20can%20eat%20a%20variety,example%20of%20a%20generalist%20species.>

Q.48) Which among the following are the expected outcomes of National Green Hydrogen Mission of India?

1. Development of green hydrogen production capacity of at least 5 million metric tonne (MMT) per annum.
2. Reduction in India's dependence on fossil fuel imports
3. Abatement of nearly 50 MMT of annual greenhouse gas emissions.
4. Renewable energy capacity addition of about 125 GW in the country

Select the correct answer using the code given below:

- a) 2 and 3 only
- b) 1 and 2 only
- c) 1, 3 and 4 only
- d) 1, 2, 3, and 4

Ans) d

Exp) Option d is the correct answer.

The **National Green Hydrogen Mission, approved by the Union Cabinet on January 4, 2022**, set ambitious goals to position India as a global leader in green hydrogen production and supply. This mission aimed to foster export opportunities for green hydrogen and its derivatives, reduce the country's reliance on imported fossil fuels and feedstock, and stimulate domestic manufacturing capabilities. Additionally, it sought to attract investment and create new business opportunities for the industry, generate employment, drive economic development, and support cutting-edge research and development projects in the field. **By 2030, the National Green Hydrogen Mission envisions significant achievements in the sustainable energy sector.**

Option 1 and 4 are correct: The mission **targets the development of a green hydrogen production capacity of at least 5 million metric tons (MMT) per annum**, supported by the **addition of approximately 125 GW of renewable energy capacity** in India. This **effort is expected to attract over Rs. Eight lakh crore in total investments and generate more than six lakh jobs.**

Option 2 and 3 are correct: Moreover, the **mission aims to reduce India's dependence on fossil fuel imports by a cumulative amount of over Rs. One lakh crore and abate nearly 50 MMT of annual greenhouse gas emissions**, further contributing to global climate change mitigation efforts.

Source: <https://pib.gov.in/PressReleasePage.aspx?PRID=1888547>

<https://www.india.gov.in/spotlight/national-green-hydrogen-mission>

Q.49) With reference to the Environmental Protection Act of 1986, which of the following statements is/are correct?

1. The Environment Impact Assessment in India is statutorily backed under this act.
2. The act defines Critical Wildlife Habitat for forest dwellers.
3. The Coastal Regulation Zones are notified under the Act.

Choose the correct answer using the options given below:

- a) 1 only
- b) 1 and 3 only
- c) 3 only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

Government of India has enacted the comprehensive Environmental Protection Act, 1986 to deal with the environmental degradation and pollution. Some details are as follows:

Statement 1 is correct - The environmental impact assessment in India was started in 1976-77 when the Planning Commission asked the then Department of Science and Technology to examine the river-valley projects from environmental angle. The Government of India enacted the Environment (Protection) Act in 1986. To achieve the objectives of the Act, one of the decisions that were taken is to make environmental impact assessment statutory.

Statement 2 is incorrect - The Critical Wildlife Habitats have been envisaged in Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006. The power to notify the rules to designate a CWH rests with Ministry of Environment and Forests.

Statement 3 is correct - In India, the Coastal Regulation Zone (CRZ) Rules govern human and industrial activity close to the coastline, in order to protect the fragile ecosystems near the sea. The coastal regulation zones have been declared by the **Ministry of Environment, Forest and Climate change** under the **Environment Protection Act 1986**. While the CRZ Rules are made by the Union environment ministry, implementation is to be ensured by state governments through their Coastal Zone Management Authorities.

Source: Forum IAS Red book on Environment

<https://www.downtoearth.org.in/news/forests/community-forest-rights-in-critical-habitats-face-hurdle-due-to-lack-of-legal-roadmap-57602>

Q.50) The “Global Alliance for Industry Decarbonization” aims to accelerate net-zero ambitions and the decarbonization of industrial value chains. Consider the following statements with reference to this Alliance:

1. It was formed under the Nairobi Declaration adopted by the United Nations Development Programme.
2. JSW steel and Tata Steel are the founding members of the alliance from India.
3. The membership of the Alliance is open to private firms only.

Which of the above given statements are **incorrect**?

- a) 1 and 3 Only
- b) 1 and 2 Only
- c) 2 and 3 Only
- d) 1, 2 and 3

Ans) a

Exp) option a is the correct answer.

The International Renewable Energy Agency (IRENA) and 13 companies across industry sectors have launched the Global Alliance for Industry Decarbonization.

Statement 1 is incorrect. It was formed under the Bali Declaration adopted during The International Renewable Energy Agency’s (IRENA) Investment Forum on Energy Transitions held in Bali, Indonesia.

Statement 2 is correct. The Founding members of the alliance include Siemens Energy Enel Green Power, TAQA Arabia, JSW (India), Tata Steel (India), Sable Chemicals, Repsol, Equinor among others.

Statement 3 is incorrect. Membership of the Alliance is open to public and private firms and for the stakeholders operating in energy-intensive sectors that have the ambition to decarbonize their activities along their value chains.

Source:

<https://www.google.com/url?sa=t&source=web&rct=j&url=https://www.irena.org/news/pressreleases/2022/Sep/IRENA-and-Industry-Leaders-Launch-the-Alliance-for-Industry-Decarbonization&ved=2ahUKEwjit6-3iLP-AhUOS2wGHe1ACXMQFnoECCcQAQ&usg=AOvVaw23vFmr2sP8j-2JKG-wxgc6>

Q.1) With reference to different types of biodiversity, consider the following pairs:

Type of Biodiversity	Description
1. Genetic diversity	It refers to the variety of genes present within a particular species.
2. Species diversity	It refers to the variety of living organisms within a region.
3. Ecosystem diversity	It refers to the variety of different species and their interactions within a particular ecosystem.

How many pairs given above are correctly matched?

- Only one pair
- Only two pairs
- All three pairs
- None of the pairs

Ans) b

Exp) Option b is the correct answer.

Pair 1 is correctly matched: The term "genetic diversity" pertains to the diversity and variation in genes found within a particular species. It is vital for the species to be able to adapt to changing environmental conditions and withstand drastic changes in order to ensure the survival and continuation of the population.

Pair 2 is correctly matched: The species diversity refers to the assortment of different species present in a particular habitat or geographic area. Habitats such as rainforests and coral reefs are known to have a high number of species, while regions such as polluted streams or salt flats have a lower number of species.

Pair 3 is incorrectly matched: Ecosystem diversity refers to the range of different ecosystems within a specific location. It refers to the different types of habitats. An ecosystem is comprised of a community of living organisms and their physical environment that interact with one another. The size of an ecosystem can vary greatly, ranging from a small pond to an entire forest or even larger.

Source: <https://australian.museum/learn/science/biodiversity/what-is-biodiversity/#:~:text=Biodiversity%20is%20usually%20explored%20at,complexity%20of%20life%20on%20Earth.>

Q.2) If you observe Hoolock Gibbon, Golden Langur, and Lion-Tailed Macaque while travelling through a region, which type of region are you most likely in?

- Tropical rainforest
- Arctic tundra
- Temperate deciduous forest
- Hot Desert

Ans) a

Exp) Option a is the correct answer.

Option a is correct: Hoolock gibbons, golden langurs, and lion-tailed macaques are all primates that are typically found in tropical rainforests. Other animals commonly found in tropical rainforests include jaguars, orangutans, and toucans.

Option b is incorrect: The Arctic tundra is a cold and dry biome characterized by low-growing vegetation and animals such as polar bears, arctic foxes, and caribou.

Option c is incorrect: Temperate deciduous forests are characterized by trees that lose their leaves in the fall and include species such as oak, maple, and beech. The animals found in this biome include deer, bears, and birds such as woodpeckers and owls.

Option d is incorrect: Deserts are characterized by low precipitation and sparse vegetation, and the animals found here have adaptations to conserve water, such as camels, snakes, and lizards.

Source:

https://d43fweuh3sg51.cloudfront.net/media/assets/wgbh/tdc02/tdc02_doc_biomesummary/tdc02_doc_biomesummary.pdf

Q.3) Which of the following statements about medicines obtained from plants are correct?

1. Quinine, obtained from the bark of the Cinchona tree, is used to treat malaria.
2. Taxol, a chemotherapy drug used to treat cancer, is obtained from the bark of the Himalayan Yew.
3. Aspirin, a popular pain reliever, is extracted from the Willow tree.
4. Ladies Slipper Orchid is used to treat anxiety.

Select the correct answer using the code given below:

- a) 1 and 4 only
- b) 1, 2 and 3 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: Quinine is a medicine used to treat malaria, and it is obtained from the bark of the Cinchona tree, which is native to South America. Quinine has been used for centuries to treat malaria, and it remains an important drug in the treatment of the disease today.

Statement 2 is correct: Taxol is a chemotherapy drug used to treat cancer, and it is obtained from the bark of the Himalayan Yew. Taxol was first isolated in the 1960s, and it has since become an important drug in the treatment of several types of cancer.

Statement 3 is correct: Aspirin is derived from salicylic acid, which is found in the bark of the Willow tree. Aspirin is a popular pain reliever.

Statement 4 is correct: The Ladies Slipper Orchid is used in some traditional medicine systems to treat insomnia and anxiety.

[bark#:~:text=The%20bark%20of%20white%20willow,inflammatory%20effects%20of%20the%20herb.](https://www.mountsinai.org/health-library/herb/willow-bark#:~:text=The%20bark%20of%20white%20willow,inflammatory%20effects%20of%20the%20herb.)

Q.4) With reference to the International Union for Conservation of Nature (IUCN) Red List of Threatened Species, consider the following statements:

1. The Pink pages represent species which are critically endangered.
2. The Green pages represent species that are no longer threatened.
3. Recently, the IUCN status of the Long-tailed Macaque has been changed from endangered to vulnerable.
4. A species accorded 'Green Status' by the IUCN does not require any conservation efforts.

Which of the statements given above are correct?

- a) 2 and 4 only
- b) 3 and 4 only
- c) 1, 3 and 4 only
- d) 1 and 2 only

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: The Pink pages in the IUCN Red List represent species that are critically endangered and facing an extremely high risk of extinction.

Statement 2 is correct: The Green pages are used for species that were formerly endangered but have now recovered to a point where they are no longer threatened.

Statement 3 is incorrect: Recently the conservation status of the Long-tailed Macaque has been changed by the IUCN from **vulnerable (2021) to endangered (2022)**. In India it is found in the three southernmost islands (viz. Great Nicobar, Little Nicobar and Katchal) of the Andaman and Nicobar archipelago.

Statement 4 is incorrect: A species accorded Green Status by the IUCN means that it has met specific criteria for recovery, but it does not mean that it does not require conservation efforts anymore. Conservation efforts may still be necessary to maintain the species in its recovered state.

Source: <https://www.iucnredlist.org/about/green-status-species>

<https://www.iucnredlist.org/fr/species/12551/221666136>

<https://blog.forumias.com/wp-content/uploads/2021/12/FORUM-IAS-RED-BOOK-ENVIRONMENT-2021.pdf>

Q.5) Consider the following statement with regard to the 'Karakoram Anomaly', recently seen in the news:

1. It refers to the abnormal melting of glaciers in the central Karakoram as compared to the other Himalayan region.
2. According to the recent studies, revival of Western Disturbance has been instrumental in triggering the Karakoram Anomaly.

Which of the above-given statement is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect- The Karakoram Anomaly refers to the **stability or abnormal growth of glaciers in the Central Karakoram**, in contrast to the retreat of glaciers in nearby mountainous ranges of the Himalayas and other mountainous ranges of the world.

Statement 2 is correct- Recently for the first time a study brought forth the importance that enhanced western Disturbance (WD)-precipitation during the accumulation period plays important role in Karakoram anomalies. According to the study Western Disturbance is the primary feeder for snowfall in the

Karakoram which originate in the Caspian Sea or Mediterranean Sea and brings non-monsoonal rainfall to North-west India.

Source: <https://pib.gov.in/PressReleasePage.aspx?PRID=1842366>

Q.6) “It is a critically endangered nocturnal burrowing species that is endemic to the Western ghats. Its natural habitats include dry forests, grasslands, and urban areas. The major threats to it include habitat loss, overgrazing, and disturbance from tourism and recreational activities.”

The paragraph above best describes which of the following species?

- Malabar civet
- Kondana soft-furred rat
- Lion-tailed macaque
- Malabar giant squirrel

Ans) b

Exp) Option b is the correct answer.

The Kondana soft-furred rat, also known as the Kondana rat or large metad, is a critically endangered species of rodent in the family Muridae. It is a nocturnal, burrowing rat that is endemic to the Sinhgad plateau near Pune, Maharashtra, India. Its natural habitats include subtropical or tropical dry forests, subtropical or tropical dry lowland grassland, and urban areas.

The major threats to this species are habitat loss, overgrazing of vegetation, and disturbance from tourism and recreational activities. The taxonomic status of the Kondana rat was uncertain for a long time due to its close resemblance to the widely distributed soft-furred field rat *Millardia meltada*, but recent studies have confirmed that it is a distinct species.

Source: <https://inaturalist.nz/taxa/45319-Millardia-kondana>

<https://ptes.org/project-update-protecting-the-critically-endangered-kondana-soft-furred-rat/>

Q.7) Which of the following mammals in India are listed as Critically Endangered by the International Union for Conservation of Nature (IUCN)?

- Nicobar Shrew
- Large Rock-rat
- Malabar Civet
- Namdapha Flying Squirrel

Select the correct answer using the code given below:

- 1 and 3 only
- 2, 3 and 4 only
- 1, 3 and 4 only
- 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Option 1 is correct: The Nicobar shrew or Nicobar white-tailed shrew (*Crocidura nicobarica*) is a **critically endangered species of mammal** in the family Soricidae. It is endemic to the Great Nicobar Island of India.

Option 2 is correct: The **Large Rock Rat** or **Elvira Rat** is a medium-sized, nocturnal, burrowing rodent endemic to India. It is found in rocky areas of tropical dry deciduous shrub land forests, specifically in the Eastern Ghats of Tamil Nadu at an elevation of around 600 meters above sea level. Its major threats are habitat loss, conversion of forests, and fuel wood collection. It is listed as **Critically Endangered** by the IUCN.

Option 3 is correct: The **Malabar Civet** (*Viverra civettina*) is a nocturnal carnivorous **mammal** endemic to India, found exclusively in the Western Ghats. It inhabits the wooded plains and hill slopes of evergreen rainforests in the region. Deforestation and commercial plantations are major threats to the species. The Malabar Civet was first reported from Travancore, Kerala and is listed as **Critically Endangered** by the IUCN.

Option 4 is correct: The **Namdapha Flying Squirrel**, also known as *Biswamoyopterus biswasi*, is a unique species of flying squirrel that is found only in Namdapha Tiger Reserve in Arunachal Pradesh, India. It inhabits tropical forests and is threatened by hunting for food. It is listed as **Critically Endangered** by the IUCN.

Ch-12: Animal Diversity, Environment by Shankar IAS

Q.8) Which of the following statements is correct regarding the effect of light intensity and frost on plant growth?

1. Low light intensity retards growth, flowering and fruiting in plants.
2. Out of the 7 colors in the visible spectrum, red is the most effective in photosynthesis.
3. Frost can cause Dieback phenomenon in trees.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: High light intensity is beneficial for plant growth, while **low light intensity can retard growth, delay flowering and fruiting**. However, it is important to note that plants have specific light requirements, and exposure to excessive light can be detrimental to their growth.

Statement 2 is correct: Out of the 7 colors in the visible spectrum, **red light is most effective in photosynthesis**, while blue light can cause plants to be small and stunted. Additionally, UV and violet light can cause dwarfism in plants.

Statement 3 is correct: Frost is one of the reasons that can **lead to the dieback phenomenon** in trees. Frost can cause damage to the plant's cells, leading to the formation of canker, which can result in the death of young plants.

Forest dieback refers to the phenomenon of a stand of trees losing health and dying.

Source: <https://blog.forumias.com/wp-content/uploads/2021/12/FORUM-IAS-RED-BOOK-ENVIRONMENT-2021.pdf>

Q.9) With reference to White bellied Musk deer, consider the following statements:

1. It is a well-adapted species of deer for high altitudes.
2. It is primarily hunted for its musk, which is used in traditional medicines and perfumes.
3. It is listed as Critically Endangered on the IUCN Red List.
4. It is geography distributed to almost every continent of the world.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1, 2, and 4 only
- c) 2, 3, and 4 only
- d) 1, 2, and 3 only

Ans) a

Exp) Option a is the correct answer.

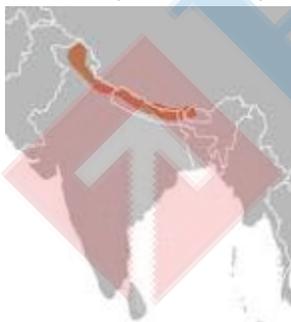

Statement 1 is correct: White-bellied musk deer are very well adapted for high altitudes. They demonstrate such adaptations as well-developed dew claws, broad toes that provide increased stability on steep slopes, and a dense coat of coarse hairs with air-filled cells to insulate against the extreme temperature.

Statement 2 is correct: The primary threat to the survival of the White-bellied Musk deer is the hunting and trading of the species. The musk produced by these animals is in high demand for use in traditional medicines and perfumes, which makes them extremely valuable

Statement 3 is incorrect: The species is currently categorized as Endangered (EN) due to a declining population trend.

Statement 4 is incorrect: White-bellied musk deer are distributed across the Himalayas in countries such as **Nepal, Bhutan, India, Pakistan, and China**. They prefer high-altitude habitats characterized by meadows, shrublands, and fir forests.

Source: <https://animalia.bio/white-bellied-musk-deer>

Q.10) Consider the following statement with respect to the Green Methanol, recently seen in the news:

1. It is obtained by synthesis reaction from methane present in natural gas.
2. It can be used as transportation fuel or in maritime fuel application.

Which of the above-given statement is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect–It is **grey methanol** which is obtained by synthesis reaction from methane present in natural gas (or in some cases, as in China, still from coal).

Green Methanol is a methanol that is produced renewably without polluting emissions, with one of its variant being generated from Green Hydrogen.

Statement 2 is correct– Green Methanol can be used as a **low-carbon liquid fuel** and is a promising alternative to fossil fuels in areas where decarbonisation is a major challenge, such as maritime transport. Some of the applications of Green Methanol includes - Transportation fuel, Substitute fuel for maritime fuel application, storing renewable electricity. Green Methanol also forms a base for the Chemical Industry.

Source: <https://www.iberdrola.com/about-us/what-we-do/green-hydrogen/green-methanol#:~:text=Green%20methanol%20is%20methanol%20that,being%20generated%20from%20green%20hydrogen.>

Q.11) With reference to the classification of organisms, which of the following animals belongs to the Class 'Arachnida'?

- a) Lobster
- b) Crab
- c) Spider
- d) Clam

Ans) c

Exp) Option c is the correct answer.

Arachnids are a class of joint-legged invertebrate animals, which include **spiders**, scorpions, ticks, mites, and other related species. They do not have an antenna.

Source: <https://blog.forumias.com/wp-content/uploads/2021/12/FORUM-IAS-RED-BOOK-ENVIRONMENT-2021.pdf>

Q.12) With reference to the National Agroforestry Policy, consider the following statements:

1. The policy aims to integrate trees, crops and livestock on the same plot of land to improve productivity of land.
2. The policy aims to achieve a target of 33% tree cover in the country.
3. India was the first country in the world to adopt a National level Agroforestry policy.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The National Agroforestry policy was approved by the Indian government in February 2014 and was launched in May of the same year. It recognizes the important role that agroforestry can play in promoting sustainable agriculture, reducing land degradation, and improving rural livelihoods. The policy aims to increase the area under agroforestry from the current 10 million hectares to 25 million hectares by 2025.

Statement 1 is correct: The National Agroforestry Policy deals with the practice of integrating trees, crops, and livestock on the same plot of land to increase the productivity of the land. It also recognizes that agroforestry can contribute to the development of sustainable value chains for forest products, such as timber and non-timber forest products.

Statement 2 is incorrect: Though the policy aims to increase the country's forest cover, it does not aim to achieve a target of 33% tree cover in the country. This is the target set by the National Forest Policy of 1988, which is a separate policy.

Statement 3 is correct: India was the first country in the world to adopt a National Agroforestry Policy in May 2014.

Source: <https://www.downtoearth.org.in/news/india-becomes-first-country-to-adopt-an-agroforestry-policy-43518>

<https://xn--i2brn5cg8b.xn--11by0av0at5becfj.xn--h2brj9c/agriculture/policies-and-schemes/crops-related/national-agroforestry-policy>

Q.13) With reference to the Shola Forest, consider the following statements:

1. They can be classified as Southern Montane Wet Temperate Forests.
2. Shola trees are commercially exploited for their valuable timber.
3. Rhododendron Nilagiricum is the only Shola tree that can tolerate fire.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Shola forests in South India are named after the Tamil word for tropical rainforest and are found in valleys with sufficient moisture and proper drainage, at altitudes over 1,500 meters. The vegetation is evergreen with stunted, multi-branched trees and small, leathery leaves. They play an important role in conserving water supply and protecting the source of water supply in the Nilgiris. **The forests act as overhead water tanks. Sholas are found in the upper reaches of the Nilgiris, Anamalais, Palni hills, Kalakadu, Mundanthurai and Kanyakumari in the states of Tamil Nadu and Kerala.**

Statement 1 is correct: Shola forests are a type of high-altitude stunted tropical montane forest ecosystem in the Southern Western Ghats of South India. They are classified as 'Southern Montane Wet Temperate Forests'.

Statement 2 is incorrect: Sholas are not of great commercial value as they produce slow-growing trees that produce timber of little or no value and take at least a century to mature.

Statement 3 is correct: Pastoral communities in grasslands have periodically burned grass, which has prevented the advance of Shola forests. However, as Shola trees are flammable, the regeneration of any Shola tree species is prevented except for **Rhododendron nilagiricum, which is the only Shola tree that can tolerate fire.**

Source: <https://www.downtoearth.org.in/blog/forests/why-south-india-needs-the-shola-forests-of-the-nilgiris-68948>

Q.14) This animal is the only mountain ungulate in southern India amongst the 12 species present in India. It inhabits the open montane grassland habitats at elevations from 1200 to 2600 m of the Southern Western Ghats. It is listed as Endangered in the IUCN Red List of Threatened Species. The Eravikulam National Park is home to the largest population of this animal.

Which one of the following species of fauna is described in the above passage?

- Nilgiri Langur
- Gaur
- Sloth Bear
- Nilgiri Tahr

Ans) d

Exp) Option d is the correct answer.

- The Nilgiri tahr is the only mountain ungulate in southern India amongst the 12 species present in India. It is also the state animal of Tamil Nadu. This endemic species of the Western Ghats is listed as Endangered in the IUCN Red List of Threatened Species.
- The Nilgiri tahr inhabits the open montane grassland habitats at elevations from 1200 to 2600 m of the South Western Ghats. Currently, Nilgiri tahr distribution is along a narrow stretch of 400 km in the Western Ghats between Nilgiris in the north and Kanyakumari hills in the south of the region.
- The Eravikulam National Park in Anamalai hills, Kerala, is home to the largest population of the Nilgiri tahr, with more than 700 individuals.
- The Nilgiri tahr, which used to be found along the entire stretch of Western Ghats, is presently found only in fragmented pockets. A large part of its population has been wiped out from its historical range. The existing populations are under severe stress due to habitat loss and hunting.

Option a is incorrect: The Nilgiri langur is classified as **Vulnerable on the IUCN Red List** and it is endemic to Western Ghats. It inhabits tropical wet evergreen, semi-evergreen and riparian forests as well as teak plantations, at altitudes of between 300 – 2,000 m above sea level.

Option b is incorrect: The Indian Bison or Gaur (*Bos gaurus*) is the tallest species of wild cattle found in India and largest extant bovine. **Vulnerable in IUCN Red List.** It is native to South and Southeast Asia. In India, they are very much prevalent in the Western Ghats.

Option c is incorrect: Sloth Bears inhabit tropical or subtropical regions of India and Sri Lanka. They are categorized as Vulnerable under IUCN Red List.

Knowledge Base: Wildlife Population in the Eravikulam National Park

29 Species of mammals are found here of which 5 are endemic to the Western Ghat's. The Nilgiri Tahr, Gaur, Sloth Bear, Nilgiri Langur, Tiger, Leopard, Giant Squirrel and wild dog are common. Half the world population of the endangered Nilgiri Tahr lives here. Panthers are usually sighted in the open grasslands while Civet cats and Jungle cats live in the Sholas.

Source: <https://forest.kerala.gov.in/index.php/about-us/wildlife/2015-03-16-09-50-24/national-parks/eravikulam-national-park#:~:text=Wildlife%20Population&text=The%20Nilgiri%20Tahr%2C%20Gaur%2C%20Sloth,cats%20live%20in%20the%20Sholas.>

https://www.wfindia.org/about_wwf/priority_species/threatened_species/nilgiri_tahr/

Q.15) Consider the following statement with reference to the PM-KUSUM Scheme:

- It aims to enable farmers to set up solar power generation capacity on their land.
- The Scheme will incentivise the farmers to sell surplus solar energy to the states.
- Under the scheme, solar power plants cannot be installed on cultivable land.

Which of the above-given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The Pradhan Mantri Urja Suraksha Evam Utthaan Mahabhiyaan (PM-KUSUM) was launched in 2019 by Ministry of New and Renewable Energy with an aim to ensure energy security for farmers through harvesting of Solar energy. Also, this scheme aims to increase the share of non-fossil fuel based energy upto 40% by 2030 as a part of Intentionally Nationally Determined Contribution (INDC).

Statement 1 is correct- KUSUM Scheme aims to enable farmers to set up solar power generation capacity on their arid lands and to sell it to the grid. It also seeks to increase the income of farmers by allowing them to sell surplus solar power to the grid.

Statement 2 is correct- KUSUM Scheme **incentivises the farmers to sell surplus solar energy to the states**, which in turn will augment their income. The scheme is expected to increase access to electricity in rural areas and provide a reliable source of energy for agriculture and other rural activities.

Statement 3 is incorrect- Under the scheme, solar **power plants can also be installed on cultivable land on stilts where crops can also be grown** below the solar panels. The renewable energy power project will be installed within five km radius of the sub-stations in order to avoid high cost of sub-transmission lines and to reduce transmission losses.

Source: <https://www.india.gov.in/spotlight/pm-kusum-pradhan-mantri-kisan-urja-suraksha-evam-utthaan-mahabhiyan-scheme>

Q.16) Fine quality wool used to make Shahtoosh shawls is primarily obtained from which one of the following animals?

- a) Gaddi sheep
- b) Chennai Red Sheep
- c) Chiru
- d) Mandya Sheep

Ans) c

Exp) Option c is the correct answer.

Option c is correct: **Shahtoosh** is a Persian word which means the ‘King of the wool’. It is an incredibly light, soft and warm wool made from the hair of **the wild antelope called Chiru**, found in the plateaus of Tibet and eastern Ladakh at an altitude of over 4,000 metres in the Himalayas.

Option a is incorrect: **Gaddi Sheep** is also known as Bhadarwah. It is native to Kishtwar and Bhadarwah tehsils of Jammu and it is widely distributed in Himachal Pradesh and Uttarakhand. The wool of this sheep breed is used to manufacture **Kullu shawls & blankets**.

Option b is incorrect: Chennai Red Sheep is mainly found in various parts of Tamil Nadu. This breed is mainly reared for **meat purposes**.

Option d is incorrect: Mandya Sheep is mostly found in the Mandya district of Karnataka. Mandya sheep are white-coloured small animals. **Among other Indian varieties, this sheep breed is known for producing the best meat.**

Source: <https://www.masterclass.com/articles/vicuna-wool-guide>
<https://www.apnikheti.com/en/pn/livestock/sheep/gaddi>

<https://www.bandhej.com/blog/post/shahtoosh-shawls>

https://omcashmeres.com/cashmere-goat-origin-type-and-wool/#What_are_the_Cashmere_Goats

<https://krishijagran.com/animal-husbandry/best-sheep-breeds-in-india-for-highest-wool-meat/>

Q.17) Consider the following pairs regarding the state animals of different states in India:

State Animals	Corresponding states
---------------	----------------------

- | | |
|--------------|-------------------|
| 1. Hangul | Jammu and Kashmir |
| 2. Red Panda | Manipur |
| 3. Sangai | Sikkim |
| 4. Gaur | Goa |

How many of the above given pairs are correctly matched?

- Only one pair
- Only two pairs
- Only three pairs
- All four pairs

Ans) b

Exp) Option b is the correct answer.

Pair 1 is correct: Kashmir Stag, commonly known as Hangul is a state animal of Jammu and Kashmir. Kashmir stag can be found in dense riverine forests in Jammu and Kashmir's high valleys and mountains, as well as northern Himachal Pradesh. Kashmir stag is found mostly in the Dachigam National Park in Kashmir, where it is protected, and elsewhere it is more vulnerable.

Pair 2 is incorrect: The red panda is a small arboreal mammal found in the forests of India, Nepal, Bhutan, and the northern mountains of Myanmar and southern China. In India, this elusive species is found in Sikkim, Arunachal Pradesh, Darjeeling and Kalimpong districts of West Bengal. **It is the state animal of Sikkim.** Listed as Endangered in the IUCN red list of Threatened Species and under Schedule I of the Indian Wildlife (Protection) Act, 1972, the red panda has the highest legal protection.

Pair 3 is incorrect: The State animal of Manipur is the Sangai. It is listed in Schedule-1 of Wildlife (Protection) Act, 1972. The brow-antlered deer is found in Keibul Lamjao National Park in Manipur. It is largely seen over the floating biomass of the Keibul Lamjao National Park, Manipur.

Pair 4 is correct: Gaur is the strong, resilient, and majestic Indian Bison, which also happens to be the State animal of Goa. Since 1986, the Indian Bison or Gaur has been listed as 'vulnerable' on the IUCN (International Union for Conservation of Nature) Red List. In India, the Gaur is a Schedule-1 animal according to the Wildlife Protection Act, 1972.

Source: <https://animalia.bio/kashmir-stag>

https://www.wwfindia.org/about_wwf/priority_species/red_panda/about_red_panda/#:~:text=It%20is%20the%20state%20animal,has%20the%20highest%20legal%20protection.

Q.18) A newly discovered species called 'Caltoris bromus sadasiva' was recently seen in the news. It is a subspecies of which one of the following?

- Butterfly
- Lizard
- Frog
- Fish

Ans) a

Exp) Option a is the correct answer.

Recently, a group of lepidopterists discovered a **butterfly subspecies** from the fringes of Akkulam and Vembanad lakes in Kerala. **It is named Caltoris bromus sadasiva**. It is the first Bromus swift butterfly to be documented in the Western Ghats. The species Bromus swift (Caltoris Bromus), is a skipper butterfly belonging to the HesperIIDae family of Lepidoptera (moths and butterflies), from the Western Ghats and Peninsular India.

Source: <https://www.thehindu.com/news/national/kerala/new-butterfly-species-discovered-in-kerala/article66691743.ece>

Q.19) Consider the following statements regarding Gharial:

1. They are listed as Critically Endangered in the IUCN Red List.
2. Gharials cannot live in freshwater ecosystems.
3. Gharial is one of the species identified under the Recovery Programme for Critically Endangered Species of Integrated Development of Wildlife Habitats initiative.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 3 only

Ans) a

Exp) option a is the correct answer.

Statement 1 is correct: Gharials are listed as Critically Endangered by the IUCN Red List. This is one step from the species becoming extinct in the wild. They are easily distinguished from other crocodiles, because of the long, slender snout it shares only with the tomistoma (previously called the false gharial).

Statement 2 is incorrect: Gharials live in clear freshwater river systems, congregating at river bends where the water is deeper. Gharial prefers deep fast flowing rivers; however adult gharial have also been observed in still water branches of rivers and in comparatively velocity-free aquatic environments of deep holes at river bends and confluences. **The surviving population can be found within the tributaries of the Ganges River system:** Girwa (Uttar Pradesh), Son (Madhya Pradesh), Ramganga (Uttarakhand), Gandak (Bihar), Chambal (Uttar Pradesh, Madhya Pradesh and Rajasthan) and Mahanadi (Orissa).

Statement 3 is incorrect: 22 species have been identified under the Recovery Programme for Critically Endangered Species of Integrated Development of Wildlife Habitats. **Gharial is not one of the species identified under the Recovery Programme for Critically Endangered Species.** The species identified under the programme include: 1. Snow Leopard, 2. Bustard (including Floricans), 3. Dolphin, 4. Hangul, 5. Nilgiri Tahr, 6. Marine Turtles, 7. Dugongs, 8. Edible Nest Swiftlet, 9. Asian Wild Buffalo, 10. Nicobar Megapode, 11. Manipur Brow-antlered Deer, 12. Vultures, 13. Indian Rhinoceros, 14. Asiatic Lion, 15. Swamp Deer, 16. Jerdon's Courser, 17. Northern River Terrapin, 18. Clouded Leopard, 19. Arabian Sea Humpback Whale, 20. Red Panda, 21. Malabar Civet and 22. Caracal.

Source: <https://nationalzoo.si.edu/animals/gharial>

<https://www.discoverwildlife.com/animal-facts/reptiles/facts-about-gharials/>

Q.20) Consider the following statements about the National Bioenergy Programme, that has been notified recently:

1. It was recently notified by the Union Ministry of New and Renewable Energy.
2. It aims to support establishment of waste to energy projects for generation of Biogas.
3. It encourages setting up of biogas plants for the purpose of cooking fuel.

Which of the above given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: The Ministry of New and Renewable Energy has notified the National Bioenergy Programme in November 2022. MNRE has continued the National Bioenergy Programme for the period from FY 2021-22 to 2025-26. The Programme mainly consist of three components, namely Waste to Energy Programme, Biomass Programme and Biogas Programme.

Statement 2 is correct: One of the objective of this programme is to support setting up of waste to energy projects for generation of Biogas/BioCNG/Power/producer or syngas from urban, industrial and agricultural wastes/residues.

Statement 3 is correct: Under Biogas Programme, the objective is to support setting up of biogas plants for clean cooking fuel, lighting, meeting thermal and small power needs of users which ultimately results in GHG reduction, improved sanitation, women empowerment and creation of rural employment.

Biomass Programme: The objective of this programme is to support setting up of Biomass Briquette/Pellet manufacturing plants and Biomass (non-bagasse) based cogeneration projects in the country.

Source: <https://pib.gov.in/PressReleseDetail.aspx?PRID=1885073>

Q.21) Consider the following statements regarding Asian Elephants:

1. India hosts more than half of the world's wild Asian elephant population.
2. They are protected under Schedule I of the Wildlife (Protection) Act, 1972.
3. According to the elephant census of 2017, Kerala has the highest number of elephants in India.

Which of the statements given above is/are correct?

- a) 2 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is correct: Asian elephants once roamed across most of Asia, now they're restricted to just 15% of their original range. There are now only about 48,000-50,000 Asian Elephants found in 13 range states.

More than 60% of the wild population exists in India alone.

Statement 2 is correct: The Asian Elephant has been given the highest level of protection in India by its inclusion in Schedule 1 of the Indian Wildlife (Protection) Act 1972. They are also included in Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora.

Statement 3 is incorrect: India has about 27,000 Asian Elephants, which is the world's largest population of the species. As per latest available census i.e., Elephant Census (2017), Karnataka has the highest number of elephants (6,049), followed by Assam (5,719) and Kerala (3,054)

Source: <https://www.iucn.org/news/species-survival-commission/202108>

<https://www.arocho.in/work/conservation/#:~:text=The%20Asian%20Elephant%20has%20been,of%20Wild%20Fauna%20and%20Flora.>

Q.22) Which among the following birds migrate from the foreign territories to India regularly?

1. Demoiselle Crane
2. Bluethroat
3. White-cheeked Barbet
4. Ruddy Shelduck

Select the correct answer using the codes given below:

- a) 1 and 3 only
- b) 2, 3 and 4 only
- c) 1, 2 and 4 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

Migratory birds fly hundreds and thousands of kilometers to find the best ecological conditions and habitats for feeding, breeding and raising their young. Some of the migratory birds that flock to India every year are discussed below:

Option 1 is correct: Demoiselle Cranes from colder regions of Eurasia fly to India in October and roost at various places in Rajasthan till March.

Option 2 is correct: Bluethroat is a beautiful bird that looks like a sparrow belongs to the thrush family and these migratory birds can be spotted in India during the winter season in Rajasthan. The Bluethroat prefers to breed in very cold climates across the world such as Alaska.

Option 3 is incorrect: White-cheeked Barbet (Small Green Barbet) is found only in southern India. Thus, it is not a migratory bird.

Option 4 is correct: The Ruddy Shelduck is a common winter visitor in India where it arrives by October and departs by April. It is found in large numbers of lakes and reservoirs. It breeds in high altitude lakes and swamps in Jammu and Kashmir.

Source: https://ebird.org/species/whcbar1?siteLanguage=en_IN

<https://www.indiatimes.com/trending/environment/migratory-birds-india-pictures-524891.html>

Q.23) Consider the following statements regarding the Insectivorous plants:

1. They are usually found in nutrient poor soils.
 2. Insectivorous plants cannot perform photosynthesis.
 3. Nepenthes Khasiana and Butterworts are examples of insectivorous plants that can be found in India.
- Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Statement 1 is correct: Insectivorous plants specialize in trapping insects. They have several attractions to lure insects like bright colours and sweet secretions. They hunt for insects despite having normal roots as they are usually found in nutrient poor soils. As a result, they have to hunt in order to replenish themselves.

Statement 2 is incorrect: Insectivorous plants may contain chloroplast and are hence green in colour. **They are capable of performing photosynthesis.** They devour insects to obtain nutrients (especially nitrogen) needed for their growth and development as they grow in soil which is not rich in nutrients.

Statement 3 is correct: Some of the insectivorous plants found in India are Drosera/Sundew, Aldrovanda/Pitcher plants, **Nepenthes khasiana**, Utricularia/Bladderworts and Pinguicula/**Butterworts**.

<https://owlcation.com/stem/Plants-That-Have-No-Chlorophyll>

[https://www.ortobotanicopd.it/en/insectivorous-plants#:~:text=Insectivorous%20plants%20\(often%20called%20carnivorous,with%20other%20plants%20is%20minimal.](https://www.ortobotanicopd.it/en/insectivorous-plants#:~:text=Insectivorous%20plants%20(often%20called%20carnivorous,with%20other%20plants%20is%20minimal.)

Q.24) Consider the following statements regarding the United Nations Convention to Combat Desertification (UNCCD):

1. It is the sole legally binding international agreement linking environment and development to sustainable land management.
2. UNCCD is an outcome of the Rio Earth Summit 1992
3. UNCCD launched Bonn Challenge in 2001 for the restoration of degraded and deforested landscapes.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: Established in 1994, the United Nations Convention to Combat Desertification (UNCCD) is the sole legally binding international agreement linking environment and development to sustainable land management. It is the driving force behind Sustainable Development Goal 15 and Land Degradation Neutrality (LDN).

Statement 2 is correct: The 1992 Rio Earth Summit gave rise to the three Rio Conventions: the Convention on Biological Diversity (CBD), the United Nations Framework Convention on Climate Change (UNFCCC), and the United Nations Convention to Combat Desertification (UNCCD).

Statement 3 is incorrect: The Bonn Challenge is a global goal to bring 150 million hectares of degraded and deforested landscapes into restoration by 2020 and 350 million hectares by 2030. Launched by the Government of Germany and IUCN in 2011, the Challenge surpassed the 150-million-hectare milestone for pledges in 2017.

Q.25) Consider the following statement about the Coal Gasification:

1. The sulphur present in the coal is converted into Hydrogen Sulphide during the coal gasification process.
2. Syngas produced through the coal gasification can be used in the production of synthetic natural gas.

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Coal Gasification is the process of converting Coal into Syngas (Synthesis Gas) with byproducts including Hydrogen Sulphide, Carbon Dioxide, and Slag (Minerals from Coal). The syngas is further cleaned.

Statement 1 is correct- The sulphur present in the coal is converted into Hydrogen Sulphide(H_2S) and very small amount of Carbonyl Sulphide (COS).

Statement 2 is correct. Gasification facilitates utilization of the chemical properties of coal. Syn Gas produced from Coal gasification can be used in producing Synthetic Natural Gas (SNG), energy fuel (methanol & ethanol), ammonia for fertilizers and Petro-chemicals.

Source: <https://netl.doe.gov/research/Coal/energy-systems/gasification/gasifipedia/intro-to-gasification>

Q.26) Consider the following statements regarding Seagrass and Seaweeds:

1. Almost all seaweed are flowering plants whereas most of the seagrass are non-flowering plants.
2. Seaweed contains vascular tissues whereas seagrass is characterized by the absence of vascular tissues.
3. While seagrass has a differentiated structure with true stem, roots and leaves; seaweed generally lacks such a differentiated structure.

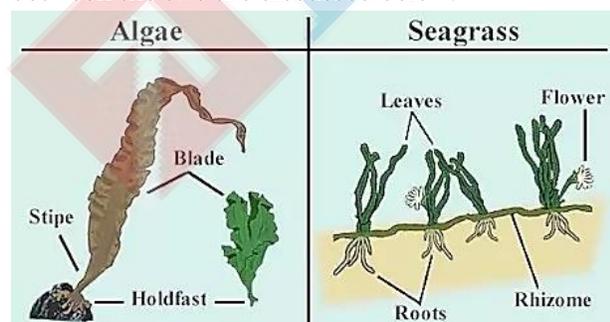

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 3 only
- d) 2 and 3 only

Ans) c

Exp) Option c is the correct answer.

Seaweed and seagrass are two marine eukaryotic photosynthetic organisms. Major points of differences between the two are discussed below:

Statement 1 is incorrect: Seagrass is a flowering plant which grows in the marine environment. Seagrasses have long green grass-like leaves. In fact, they are monocotyledons. Seagrass produces seeds.

Generally, seaweed are non-flowering plants but like land plants they do contain chlorophyll and rely on photosynthesis to produce the food they need to survive.

Statement 2 is incorrect: While **seagrasses are considered vascular plants** and have roots, stems and leaves, seaweed are multi-cellular algae and have little or no vascular tissues.

Statement 3 is correct: Seaweed is not differentiated into true stem, roots and leaves while seagrass has a differentiated structure with true stem, roots and leaves.

Source: <https://pacificharvest.co/blogs/learn/are-seaweeds-plants>

<https://www.differencebetween.com/difference-between-seaweed-and-seagrass/#Seaweed%20vs%20Seagrass%20in%20Tabular%20Form>

<https://myfwc.com/research/habitat/seagrasses/information/seagrass-vs-seaweed/#:~:text=While%20seagrasses%20are%20considered%20vascular,transport%20nutrients%20and%20dissolved%20gases.>

Q.27) Consider the following statements regarding the National Parks in India:

1. No alteration of boundaries of a national park can be made except on the recommendation of the National Board of Wildlife (NBWL).
2. Generally, livestock grazing is prohibited in a National Park.
3. Assam has the highest number of national parks in India.

Which of the statements given above is/are correct?

- a) 2 and 3 only
- b) 1 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Wildlife Protection Act, 1972 provides for the declaration of National Parks by the State Governments in addition to the declaration of WLS. Territorial waters can be included in areas to be declared as WLS or NPs for the protection of offshore marine flora and fauna.

Statement 1 is correct: As per the Wildlife Protection Act of 1972, no alteration of boundaries of a WLS or NP can be made except on the recommendation of the National Board of Wildlife (NBWL)

Statement 2 is correct: Difference between National Parks (NPs) and Wildlife Sanctuaries (WLS):

- 1) NPs enjoy a greater degree of protection than WLS.
- 2) **Livestock grazing is prohibited in a National Park but can be allowed in a regulated manner in Sanctuaries;**
- 3) WLS can be created for a particular species while a NP is not primarily focused on a particular species.
- 4) NPs cannot be downgraded to the status of WLS but WLS can be upgraded to the status of NP.

Statement 3 is incorrect: **As per the latest available data, Madhya Pradesh is the state with highest number of National Parks in India.** It has in total 11 National Parks. Whereas, Assam has 7 National Parks.

Source: http://www.wiienvi.nic.in/Database/npa_8231.aspx

<https://blog.forumias.com/wp-content/uploads/2021/12/FORUM-IAS-RED-BOOK-ENVIRONMENT-2021.pdf>

Q.28) Consider the following statements regarding the Chief Wildlife Warden in India:

1. The Chief Wildlife Warden is a statutory authority established under the Indian Forest Act,1927.
2. Chief Wildlife Warden in a state is appointed by the Government of the respective state.
3. He/she can grant permission to a person to enter in a sanctuary for conducting scientific research.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) b

Exp) option b is the correct answer.

Statement 1 is incorrect: The Chief Wildlife Warden (CWLW) is the statutory authority, under the Wildlife Protection Act, 1972 (not under Indian Forest Act, 1927). He is responsible for the implementation of Wildlife (Protection) Act, 1972 in the State. He shall perform his duties and exercise his powers by or under this Act subject to such general or special directions, as the State Government may give, from time to time.

Statement 2 is correct: Section 4 of the Wildlife (Protection) Act, 1972 empowers the State Government to appoint (a) a Chief Wildlife Warden (b) Wildlife Wardens; and (c) such other officers and employees as may be necessary for the purposes of the Act.

Statement 3 is correct: The Chief Wildlife Warden may, on application, grant to any person a permit to enter or reside in a sanctuary for all or any of the following purposes, namely:–

- a. investigation or study of wildlife and purposes ancillary or incidental thereto;
- b. photography;
- c. scientific research;**
- d. tourism;
- e. transaction of lawful business with any person residing in the sanctuary.

Source: <https://www.conservationindia.org/resources/the-institutional-framework-for-wildlife-conservation-in-india/2>

http://wildlife.punjab.gov.in/act_rulepdf/1623651699.pdf#19.pdf

Q.29) Consider the following statements regarding the ‘Conservation Reserves’ in India:

1. The conservation reserves are declared under the Wildlife Protection Act, 1972.
2. Only central government can declare an area as a Conservation Reserve.
3. Among the Indian states/UTs, Gujarat has highest number of conservation reserves.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

Conservation reserves and community reserves in India are terms denoting protected areas of India which typically act as buffer zones to or connectors and migration corridors between established national parks, wildlife sanctuaries and reserved and protected forests of India.

Statement 1 is correct: Areas are designated as conservation areas if they are uninhabited and owned by the Government of India but used for subsistence by communities. **These protected area categories were introduced in the Wildlife (Protection) Act, 1972 through an amendment in 2002.** These categories were

added because of reduced protection in and around existing or proposed protected areas due to private ownership of land, and land use.

Statement 2 is incorrect: According to the Wildlife Protection Act of 1972, the **State Government may, after having consultations with the local communities, declare any area owned by the Government as a conservation reserve.** If the conservation reserve includes any land owned by the Central Government, its prior concurrence shall be obtained before making such declaration.

Statement 3 is incorrect: Gujarat has only one conservation reserve. As per the Wildlife Institute of India, among Indian states/UTs Jammu and Kashmir has highest number of conservation reserves (33) followed by Rajasthan (18) and Karnataka (14).

Source: https://wii.gov.in/nwdc_conservation_reserves

http://www.wiienviis.nic.in/Database/cr_8229.aspx#:~:text=Conservation%20reserves%20and%20community%20reserves,and%20protected%20forests%20of%20India.

<https://blog.forumias.com/wp-content/uploads/2021/12/FORUM-IAS-RED-BOOK-ENVIRONMENT-2021.pdf>

<https://indiankanoon.org/doc/90915258/>

Q.30) Consider the following statements with regard to the Sustainable Cities Integrated Approach Pilot (SCIAP) Project:

1. The aim of the project is to include sustainable strategies into urban planning and management at city levels.
2. Union Ministry of Environment, Forest and Climate change is identified as the implementing agency of the project.
3. The project is funded by Global Environment Facility.

Which of the above given statement are correct?

- a) 2 and 3 only
- b) 1 and 2 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

SCIAP Project is launched to infuse sustainable strategies into urban planning and management at city levels and create an enabling climate for investment in green infrastructure.

Statement 1 is correct- The aim of the project is to infuse sustainable strategies into urban planning and management at city levels thereby creating an atmosphere for investment into green infrastructure so that Green House Gas emission is reduced, service delivery is improved, and quality of lives can be improved.

Statement 2 is incorrect- The implementing agency includes UNIDO, UN-Habitat, in collaboration with Ministry of Housing and Urban Affairs (MoHUA).

Statement 3 is correct- The project is funded by Global Environment Facility. The Global Environment Facility is a multilateral environmental fund that provides grants and blended finance for projects related to biodiversity, climate change, international waters, land degradation.

Source: [https://www.unhabitat.org.in/projects/Sustainable-Cities-Integrated-Approach-Pilot-\(SCIAP\)](https://www.unhabitat.org.in/projects/Sustainable-Cities-Integrated-Approach-Pilot-(SCIAP))

Q.31) Consider the following statements regarding the types of forests in India:

1. For the first time, forests in India were classified into Reserved Forests and Protected Forests under the Wildlife Protection Act, 1972.
2. Presently, Reserved Forests constitute less than 5 per cent of the total forest area of India.
3. Activities like hunting, grazing and timber collection are completely prohibited in the Protected forests.

Which of the statements given above is/are **incorrect**?

- a) 1, 2 and 3
- b) 3 only
- c) 1 and 2 only
- d) 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

Statement 1 is incorrect: Indian Forest Act, 1927 was enacted to consolidate all the previous laws regarding forests and extend state's control over forests as well as diminishing the status of people's right to forest use. It also defined forest offences. **Indian Forest Act, 1927 (Not Wildlife (Protection) Act, 1972) classified forests into Reserved Forest, Protected Forest and Village Forest.**

Statement 2 is incorrect: Reserved forests constitute more than half of the total forest area of India. They are protected by the respective state governments unlike wildlife sanctuaries and national parks which are supervised by the Government of India. Rights to activities like collecting timber or grazing cattle or hunting are banned in these forests.

Statement 3 is incorrect: Protected forests have a limited amount of protection. **These are looked after by the government but certain activities like hunting, grazing or timber collecting are allowed to people** who live on the boundaries of forests and are partially or wholly dependent on the forest resources for livelihood, provided they don't cause severe damage to the forests.

Knowledge Base: Village forests are protected and managed by village communities which are assigned by the state governments. The local communities may use it for timber or other forest produce, pasture, recreation, plantation and so on under prescribed conditions by state governments.

Source: <https://blog.ipleaders.in/an-understanding-of-the-laws-relating-to-reserved-forests-village-forests-and-protected-forests/>

<https://blog.forumias.com/wp-content/uploads/2021/12/FORUM-IAS-RED-BOOK-ENVIRONMENT-2021.pdf>

<https://ncert.nic.in/textbook/pdf/jess102.pdf>

Q.32) With respect to various zones in the Biosphere Reserve, consider the following statements:

1. The Core Zone is mostly kept free from the interference of humans.
2. The Transition Zone adjoins or surrounds the core zone, and research and educational activities are allowed here.
3. The Buffer Zone is the outermost part of a biosphere reserve which includes human settlements and croplands.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 3 only
- d) 1 and 2 only

Ans) a

Exp) Option a is the correct answer.

Biosphere Reserves involve local communities and all interested stakeholders in planning and management. They integrate three main "functions":

- 1) Conservation of biodiversity and cultural diversity
- 2) Economic development that is socio-culturally and environmentally sustainable
- 3) Logistic support, underpinning development through research, monitoring, education and training

These three functions are pursued through the Biosphere Reserves' three main zones i.e Core, buffer and transition Zones.

Statement 1 is correct. Core Zone: It is the most protected area of a Biosphere Reserve and may contain endemic plants and animals. A Core Zone is mostly kept free from human interference.

Statement 2 is incorrect. It is the Buffer Zone (not the Transition Zone) that surrounds the Core Zone and activities in this zone are managed in a way that the Core Zone is protected in its natural conditions. Research and Educational activities are allowed in this zone.

Statement 3 is incorrect. It is the Transition Zone (not the Buffer Zone) which is the outermost part of the Biosphere Reserve where human ventures and conservation are done in harmony. This area includes human settlements, croplands and other areas for intensive recreation.

Source: Forum IAS Red Book on Environment

Q.33) In the context of recently conducted Tiger Census 2022, consider the following statements:

1. The national tiger census is conducted after every ten years.
2. The current tiger population in India has slightly decreased from the previous tiger census.
3. As per the census, out of five tiger-bearing habitats, Central Indian Highlands & Eastern Ghats Landscape has largest tiger population in India.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 3 only
- c) 2 only
- d) 1 and 2 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. The national tiger census is conducted once **every four years**. The Nationwide tiger census was earlier held in **2006, 2010, 2014, 2018, 2022**. The National Tiger Conservation Authority (NTCA) conducts tiger censuses in partnership with state forest departments, conservation NGOs, and the Wildlife Institute of India (WII)

Elephant Census is conducted every 5 years and Rhino Census every 3 years.

Statement 2 is incorrect. According to the **fifth cycle of the All India Tiger Estimation (2022)** released April 9, 2023. The tiger population in **India grew by 200 from 2018 to 2022**. The number of tigers in India was 3,167 in 2022, up from 2,967 in 2018.

Statement 3 is correct. As tigers inhabit diverse habitats across a vast geographical expanse in India, census have categorized the tiger-bearing habitats into five major landscapes based on biogeography and interconnectivity of the habitats: 1) Shivalik-Gangetic plains, 2) Central India and Eastern Ghats, 3) Western Ghats, 4) North Eastern Hills and Brahmaputra Flood Plains, and 5) the Sundarbans.

The highest number (1,161) of tigers were photographed in the Central Indian Highlands and Eastern Ghats in 2022.

The big cat was found to occupy several territorial areas of Madhya Pradesh and Maharashtra, which were not occupied in 2018.

Knowledge Base:

Highlights of Tiger Census 2022

- 1) Tiger occupancy in Jharkhand, Odisha, Chhattisgarh and Telangana showed a decline.
- 2) Tiger occupancy in the Western Ghats has declined.
- 3) the population inside the region's protected areas remained stable (Mudumalai, Periyar) or have increased (Bandipur, Nagarahole), and occupancy outside the PAs has declined.

4) A major decline in tiger occupancy was observed in Mookambika-Sharavathi-Sirsi; the population remained stable in the Bhadra landscape

Source: <https://www.downtoearth.org.in/news/wildlife-biodiversity/tiger-census-2022-india-s-tiger-population-increased-by-200-in-last-four-years-88673>

Q.34) With reference to the National Tiger Conservation Authority (NTCA), consider the following statements:

1. It is a non-statutory body.
2. The Prime Minister is the ex-officio Chairperson of the NTCA.
3. It prepares an annual report which is laid before the Parliament.
4. Tiger Reserves are notified by State Governments on the advice of the National Tiger Conservation Authority.
5. It is not required to obtain the NTCA's approval before altering a Tiger Reserve's boundaries.

Which of the statements given above are correct?

- a) 1, 2 and 5 only
- b) 2, 3 and 4 only
- c) 1 and 5 only
- d) 3 and 4 only

Ans) d

Exp) Option d is the correct answer.

Statement 1 is incorrect. National Tiger Conservation Authority (NTCA) is a statutory body under the MoEFCC. It was established in 2005 following the recommendation of the Tiger Task Force.

Statement 2 is incorrect. The authority consists of the Minister in charge of the Ministry of Environment and Forests (as Chairperson), the Minister of State in the Ministry of Environment and Forests (as Vice-Chairperson), three members of Parliament, Secretary of Ministry of Environment and Forests and other members.

Statement 3 is correct. The Tiger Conservation Authority is required to prepare an Annual Report, which would be laid out in Parliament along with the Audit Report.

Statement 4 is correct. Under Project Tiger, Tiger Reserves are constituted on a 'core-buffer' strategy. The State Governments shall, on the recommendation of the National Tiger Conservation Authority (NTCA), notify an area as a tiger reserve.

Statement 5 is incorrect. Modification in the boundaries of a Tiger Reserve can be done only on a recommendation of the NTCA and it should also be approved by the National Board of Wildlife (NBWL).

Source: <https://ntca.gov.in/faqs/#faq-new> + Forum IAS Red Book on Environment

Q.35) Which of the following statements about the National Coastal Zone Management Authority (NCZMA) is/are correct?

1. The NCZMA was constituted under the provisions of the Environment (Protection) Act, 1986.
2. It is a permanent body for regulating activities in the Coastal Regulation Zone.
3. The NCZMA is chaired by the Union Minister of Environment, Forest and Climate Change.

Select the correct answer using the codes given below:

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) a

Exp) Option a is the correct answer.

The National Coastal Zone Management Authority (NCZMA) was constituted by the Ministry of Environment Forests and Climate Change (MoEF&CC) to protect and improve the quality of the coastal environment and prevent, abate, and control environmental pollution in coastal areas. The authority was empowered to coordinate the actions of the State Coastal Zone Management Authorities (SCZMAs) and Union Territory Coastal Zone Management Authorities (UTCZMAs) under the Environment Protection (EP) Act 1986.

Statement 1 is correct: The National Coastal Zone Management Authority (NCZMA) was constituted under the provisions of Section 3 of the Environment Protection Act 1986.

Statement 2 is incorrect: The NCZMA is not a permanent body but was constituted as an ad-hoc body for protecting coastal environment. As per the Comptroller and Auditor General (CAG) audit report 2022, the role of NCZMA has shrunk to mere deliberations or decision making on reclassification of Coastal Regulation Zone due to its ad-hoc status and manpower constraints.

Statement 3 is incorrect: The Chairperson of the NCZMA is not the Union Minister of Environment, Forest and Climate Change, rather it is the Secretary of the Ministry of Environment, Forests, and Climate Change who serves as the head of the committee.

Knowledge Base:

Functions of NCZMA:

- 1) Coordination of actions of the SCZMAs and UTCZMAs under the EP Act
- 2) Examination of proposal for change in classification of CRZ areas and in Coastal Zone Management Plans received from SCZMAs and UTCZMAs and make specific recommendations to the Central Government
- 3) Review of cases involving violation under EP Act 1986 for coastal areas and issuing directions for compliance
- 4) File complaints in case of non-compliance to the directions issued for cases involving violation.

Source: <https://prsindia.org/policy/report-summaries/conservation-of-coastal-ecosystems>

https://cag.gov.in/uploads/download_audit_report/2022/Chapter%20-062f1f1d0a6f573.14543971.pdf

Q.36) Consider the following statements regarding conservation measures of various species.

1. "Operation Clean Art" was the first pan-India operation to crack down on the smuggling of Mongoose Hair.
2. "Operation Save Kurma" was conducted to combat the illegal trade of turtles.
3. "Operation Thunderbird" was launched to tackle the illegal trade in Tiger and other wild cats.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct. The government launched Operation Clean Art across India. The operation aimed to crack down on illegal trade in mongoose hair. This is the first time such an operation is happening in India. It was initiated by the Wildlife Crime Control Bureau (WCCB). It was launched in the year 2019.

Statement 2 is correct. WCCB envisaged a species-specific operation code-named "OPERATION SAVE KURMA" to focus specifically on the poaching, transportation and illegal trade of live turtles and tortoises. It was launched in Dec 2016 and continued till Jan 2017

Statement 3 is correct. “Operation Thunderbird’ was conducted to prevent illegal trade in species such as Tigers and other Asian big cats. It was conducted in 2017.

Source: <http://wccb.gov.in/Content/SpecialOperations.aspx>

Q.37) With reference to the Biological Diversity Act, of 2002, consider the following statements:

1. The act aims to safeguard traditional knowledge and prevents biopiracy.
2. Any person in India involved in research related to biological resources, requires prior approval of the National Biodiversity Authority (NBA).
3. There is a provision for the appeal to the National Green Tribunal (NGT) against the orders of National Biodiversity Authority (NBA).
4. The act establishes a statutory body called Genetic Engineering Appraisal Committee to oversee research related to biological resources.

Which of the statements given above are correct?

- a) 1, 2 and 3 only
- b) 1, 2 and 4 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct. The Biological Diversity Act, of 2002 was born out of India’s attempt to realize the objectives enshrined in the United Nations Convention on Biological Diversity (CBD).

The Act in general aims in conserving the Biological Diversity, maintaining and controlling the proper use of its components, ensuring equitable distribution of benefits derived from such utilization. The **mentioned objectives of the Act provide for a safeguard of traditional knowledge, prevent biopiracy, prohibit people from claiming patents without the government’s permission.**

Statement 2 is correct. As per the Act, any person or organization (either based in India or not) obtaining any biological resource occurring in India for its research or commercial utilization.

Statement 3 is correct. Any grievances relating to the determination of benefit sharing or order of the NBA or SBB under this Act shall be taken to the National Green Tribunal (NGT).

Statement 4 is incorrect. Genetic Engineering Appraisal Committee (GEAC) functions as a **statutory body under the Environment Protection Act 1986** of the Ministry of Environment & Forests (MoEF). It was earlier known as Genetic Engineering Approval Committee. GEAC is responsible for granting permits to conduct experimental and large-scale open field trials and also grant approval for commercial release of biotech crops.

Source: Forum IAS Red Book on Environment

Q.38) With reference to the Wetland (Conservation and Management) Rules, 2017, consider the following statements:

1. As per the rules, river channels and paddy fields do not fall under the category of wetlands.
2. The rules have no provision for appeal to the National Green Tribunal (NGT).
3. Areas falling within the purview of the Coastal Regulation Zone are exempt from the rules.
4. The rules abolished the National Wetlands Committee.

Which of the statements given above are correct?

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2 and 4 only

Ans) a

Exp) Option a is the correct answer.

Wetland (Conservation and Management) Rules, 2017 have been made for the effective conservation and management of wetlands in our country.

Statement 1 is correct. The definition of wetland **does not include river channels, paddy fields, man-made water bodies/tanks specifically** for drinking water purposes and structures specifically constructed for aquaculture, salt production, recreation and irrigation purposes.

Statement 2 is correct. There is **no provision of appeal to the National Green Tribunal (NGT).**

Statement 3 is correct. Protected Areas and areas **falling within the purview of the Coastal Regulation Zone have been excluded from the Wetland Rules.**

Statement 4 is incorrect. Under the Wetland (Conservation and Management) Rules, 2017, Central Wetlands Regulatory Authority (CWRA) has **been replaced with the National Wetlands Committee, which will be led by the secretary of Ministry of Environment, Forest and Climate Change.**

Source: Forum IAS Red Book on Environment

Q.39) Consider the following statements about the Wildlife Trust of India (WTI):

1. It is an autonomous body established under the Wildlife Protection Act, 1972
2. It runs various projects across India with communities and governments to achieve its mission of conserving wildlife and their habitat.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. The Wildlife Trust of India (WTI) is a non-profit conservation organisation dedicated to safeguarding India's natural heritage. WTI was founded in November 1998 in New Delhi, India, in response to the rapidly deteriorating state of wildlife in India. Wildlife Trust of India is a registered charity in India (under Section 12A of the Income Tax Act, 1961).

Statement 2 is correct. The Wildlife Trust of India (WTI) is a leading Indian nature conservation organisation dedicated to the service of nature. It runs nearly 44 projects across India with communities and governments to achieve its mission of conserving individual wildlife and their habitat.

Source: <https://www.wti.org.in/our-projects/>

<https://www.wii.gov.in/>

Q.40) With reference to Wuhan Declaration, consider the following statements:

1. It was adopted at 14th Conference of the Parties (COP14) to Ramsar Convention
2. It calls for practical actions to promote conservation, restoration, management and sustainable use of wetlands worldwide.
3. Preserving peatlands is a key priority of the declaration.
4. The declaration acknowledges the accomplishment of member states in increasing the area of natural wetlands by 35%

Which of the above given statements are correct?

- a) 1 and 3 only
- b) 2 and 4 only
- c) 2, 3 and 4 only
- d) 1, 2 and 3 only

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: The 14th Conference of the Parties (COP14) to the Ramsar Convention on Wetlands was held in Wuhan, China in 2019. During the conference, the Wuhan Declaration was adopted.

Statement 2 is correct: The Wuhan Declaration, recognizes the importance of wetlands as critical ecosystems and calls for practical actions to promote their conservation, restoration, management and sustainable use worldwide.

Statement 3 is correct: The Wuhan Declaration encourages priority conservation and management of vulnerable ecosystems such as **peatlands**, coral reefs, seagrass beds, mangroves, highland wetlands, and subterranean wetlands, where applicable.

Statement 4 is incorrect: The declaration expresses concern over the decline of natural wetlands despite efforts made at all levels to conserve them. It notes that despite designating 2,466 wetlands of international importance, accrediting 43 wetland cities, launching 19 Ramsar Regional Initiatives, and other efforts, the area of natural wetlands has declined by 35%.

Source:

https://www.ramsar.org/sites/default/files/documents/library/wuhan_declaration_final_e.pdf

<https://news.cgtn.com/news/2022-11-08/VHJhbnNjcmlwdDY5MzE3/index.html>

Q.41) Consider the following pairs:

Protocols	Feature
1. Cartagena Protocol	to protect biological diversity from the potential risks posed by Living Modified Organisms (LMO)
2. Nagoya Protocol	Fair and Equitable Sharing of Benefit arising from genetic resources
3. Nagoya – Kuala Lumpur Supplementary Protocol	response measures which must be taken in the case of damage to biodiversity resulting from Living Modified Organisms

How many pairs given above are correctly matched?

- Only one pair
- Only two pairs
- All three pairs
- None of the pairs

Ans) c

Exp) Option c is the correct answer.

CBD is an international legally binding convention which recognized for the first time, the need for conservation of biological diversity for the welfare of humankind. The agreement covers all ecosystems and species as well as genetic resources.

Objectives of the Convention include:

- Conservation of biological diversity

- 2) Sustainable use of its components
- 3) Fair and equitable sharing of benefits

Pair 1 is correct. Cartagena Protocol on Biosafety: CBD covers the rapidly expanding field of biotechnology through its “Cartagena Protocol on Biosafety”. It addresses technology development and transfer, benefit-sharing and biosafety issues. The biosafety protocol seeks to protect biological diversity from the potential risks posed by “Living Modified Organisms (LMOs)” resulting from modern biotechnology

Pair 2 is correct. Nagoya Protocol is a 2010 supplementary agreement to the 1992 Convention on Biological Diversity (CBD). The Nagoya Protocol is about “Access to Genetic Resources” and the “**Fair and Equitable Sharing of Benefit**” arising from their utilization.

Pair 3 is correct. Nagoya Kuala Lumpur Supplementary Protocol on Liability and Redress: It reinforces the Cartagena Protocol. The Supplementary Protocol specifies **response measures which must be taken in the case of damage to biodiversity resulting from Living Modified Organisms**

Source: Forum IAS Red Book on Environment

Q.42) Consider the following statements about the Convention on Migratory Species (CMS):

1. The Convention was adopted in 1992 at the Earth Summit in Rio De Janeiro.
2. It is the only global Convention specializing in the conservation of migratory species.
3. India signed the “Raptor MOU” on Conservation of Migratory Birds of Prey in Africa and Eurasia with the CMS.
4. Gandhinagar Declaration, related to CMS, calls for the concept of ‘ecological connectivity’.

Which of the following statements given above are correct?

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 3 and 4 only
- d) 2 and 4 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. Convention on the Conservation of Migratory Species or Convention on Migratory Species (CMS) is an environmental treaty under the aegis of the **United Nations Environment Programme** that provides a global platform for the conservation and sustainable use of migratory animals and their habitats.

The Convention came into **force on November 1, 1983**. The Secretariat that administers the Convention was established in 1984.

Statement 2 is correct. CMS is the only global Convention specializing in the conservation of migratory species, their habitats and migration routes.

Statement 3 is correct. India had non-legally binding MoUs with the CMS on the conservation and management of Siberian Cranes (1998), Marine Turtles (2007), Dugongs (2008), and Raptors (2016). Indian Government signed the “Raptor MOU” on Conservation of Migratory Birds of Prey in Africa and Eurasia with the CMS

Statement 4 is correct. CMS COP 13 was held in India in 2020 and adopted the Gandhinagar Declaration.

The declaration calls for the integration of migratory species and gave the concept of ‘**ecological connectivity**’ and prioritizes it in the new framework, which is expected to be adopted at the UN Biodiversity Conference's

Source: Forum IAS Red Book on Environment

Q.43) With reference to the Rotterdam Convention, consider the following statements:

1. It is a Convention on the Control of Transboundary Movements of Hazardous Wastes and their Disposal.
2. The Convention is jointly administered by the United Nation Environment Program and the Food and Agriculture Organization.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. Rotterdam Convention is the name for the Convention that was adopted by the Conference of Plenipotentiaries (COP) in 1998 in Rotterdam (Netherlands) that aims to promote shared responsibilities in relation to the international trade of hazardous chemicals.

The **Basel Convention on the Control of Transboundary Movements of Hazardous Wastes** and their Disposal was adopted in 1989 and came into force in 1992. The objective of the Convention is to protect human health and the environment against the adverse effects of hazardous waste.

Statement 2 is correct. It was adopted in September 1998 and came into force in 2004. The Convention is jointly administered by **UNEP and FAO**. It creates a legally binding obligation for the implementation of the Prior Informed Consent (PIC) procedure.

Source: <https://www.downtoearth.org.in/news/agriculture/rotterdam-convention-international-trade-of-2-hazardous-pesticides-recommended-for-prior-informed-consent--85130> + Forum IAS Red Book on Environment

Q.44) Consider the following statements with reference to Global initiatives on Forest conservation:

1. The United Nations Forum on Forests was launched by the United Nations Environment Programme.
2. International Day of Forests (IDF) is celebrated by the United Nations Forum on Forests and the Food and Agriculture Organization.
3. REDD+ is created by the UNFCCC for enhancement of forest carbon stocks in developing countries.

Which of the above statements is/are correct?

- a) 1 and 2 only
- b) 2 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

Statement 1 is incorrect. In October 2000, the **Economic and Social Council of the United Nations (ECOSOC)**, in its Resolution 2000/35 established the **United Nations Forum on Forests (UNFF)**, a subsidiary body with the main objective to promote the management, conservation and sustainable development of all types of forests based on the Rio Declaration.

Statement 2 is correct. The United Nations observes **March 21 as the International Day of Forests**, commemorating the **green cover around the world** and reiterating its importance.

The Day is celebrated by **the United Nations Forum on Forests and the Food and Agriculture Organization of the United Nations (FAO)**, in collaboration with governments and the Collaborative Partnership on Forests.

The theme for 2022 is "Forests and sustainable production and consumption."

Themes of the International Day of Forests are aimed to fit into **the UN Decade on Ecosystem Restoration (2021-2030)**, which calls for the protection and revival of ecosystems around the world.

Statement 3 is correct. REDD+ is a framework created by the UNFCCC Conference of the Parties (COP) to guide activities in the forest sector that reduces emissions from deforestation and forest degradation. It aims for sustainable management of forests and the conservation and **enhancement of forest carbon stocks in developing countries.**

Source: <https://www.un.org/esa/forests/forum/about-unff/index.html>

Q.45) Which of the following options correctly identifies the ecological classification and habitat of the Indian Skimmer?

- A freshwater turtle found in the Ganges River basin
- A migratory bird species that breeds in the Himalayas
- A critically endangered species of dolphin found in the Brahmaputra River
- A bird species found in the riverine habitats of the Chambal River

Ans) d

Exp) Option d is the correct answer.

The Indian Skimmer is a bird species that feeds by skimming the surface of the water with its lower beak. The Chambal River provides a suitable habitat for the bird due to its clean and unpolluted water, which supports a thriving fish population.

Indian Skimmer is a vulnerable species, and its population is declining due to habitat loss and human interference in its breeding areas. The Chambal River sanctuary has been set up to protect the bird's habitat and breeding areas.

Source: <https://www.thehindu.com/sci-tech/energy-and-environment/indian-skimmer-chambal-river-environment-janaki-lenin/article65902383.ece>

Q.46) Consider the following statements with reference to Crocodiles found in India:

- Project Crocodile was started in 1975 in India with the help of UNDP and FAO.
- Katerniaghat Wildlife Sanctuary is the only protected area in India to be the home for all three species of crocodilians found in the country.
- Mugger Crocodile is considered to be the Earth's largest living crocodile species.

Which of the above statements is/are correct?

- 1 only
- 2 only
- 1 and 3 only
- 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

The Indian Crocodile Conservation Project is one of the most successful conservation initiatives in the world. It has pulled back the once threatened crocodilians from the brink of extinction and placed them on a good path of recovery. The Crocodile Conservation Project was launched in 1975 in different States. The Gharial and Saltwater crocodile conservation programme was **first implemented in Odisha** in early 1975 and subsequently, the Mugger conservation programme was initiated.

Statement 1 is correct. In 1975 the Government of India set up Project Crocodile with the support of the **United Nations Development Programme (UNDP)** and the **Food and Agriculture Organization (FAO)** of the United Nations.

Statement 2 is incorrect. Odisha's **Kendrapara** became the only district in India to be home to all three species of crocodilians found in the country. In Kendrapara, the Bhitarkanika river systems are home to salt water crocodiles, while the Mahanadi and Brahmani rivers and their tributaries that pass through the district are inhabited by muggers and gharials.

The Katarniaghat Wildlife Sanctuary is a protected area and part of crocodile conservation project in the Upper Gangetic plain in Uttar Pradesh, India and covers an area of 400.6 km² in the Terai of the Bahraich district.

Statement 3 is incorrect.

Saltwater Crocodile is considered the Earth's **largest living crocodile** species native to **saltwater habitats and brackish wetlands**. Bhitarkanika National Park in Odisha houses 70% of India's estuarine crocodiles or saltwater crocodiles. **IUCN Status:** Least Concern, **Indian Wildlife Protection Act, 1972:** Schedule 1

While, Mugger Crocodile is also called marsh crocodile or broad-snouted crocodile. It is an egg-laying and hole-nesting species. It is native to **freshwater habitats** from southern Iran and Pakistan to the Indian subcontinent and Sri Lanka. **IUCN Status:** Vulnerable, **Indian Wildlife Protection Act, 1972:** Schedule 1, **CITES:** Appendix I.

Knowledge Base: The crocodilian family consists of 27 different species that are subdivided into three families: True crocodiles, alligators and caimans and gharials.

Source: <https://www.downtoearth.org.in/news/wildlife-biodiversity/odisha-s-kendrapara-now-india-s-only-district-to-have-all-3-species-of-crocodilians-78740>

Q.47) Consider the following statements with reference to Biodiversity of India:

1. According to Conservation International, hotspot is a region that has lost at least 30% of its original habitat.
2. Sundaland Biodiversity Hotspot includes Nicobar group of Islands in India.
3. Andaman and Nicobar & Lakshadweep Islands have been named as the new “hope spots” by IUCN and Mission Blue.

Which of the above statements is/are correct?

- a) 3 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Biodiversity is referred to as the variation of plant and animal species in a particular habitat. Species evenness and species richness form the major components of biodiversity. India is known for its rich biodiversity and has around 24.46% of the geographical area covered by forests and trees.

Coined by Norman Myers, the term “Biodiversity hotspots” can be defined as the regions which are known for their high species richness and endemism.

Statement 1 is incorrect. According to **Conservation International**, a region must fulfill the following two criteria to qualify as a hotspot:

- 1) It must have **30% or less of its original natural vegetation (It has to have lost at least 70% of its original habitat)**. In other words, **it must be threatened**.
- 2) It must have at least **1,500 vascular plants** as endemics which are to say, **it must have a high percentage of plant life found nowhere else on the planet**. A hotspot, in other words, is irreplaceable.

Statement 2 is correct. There are **major four biodiversity hotspots** in India:

Himalaya: Includes the **entire Indian Himalayan region** (and that falling in Pakistan, Tibet, Nepal, Bhutan, China, and Myanmar).

Indo-Burma: Includes entire **North-eastern India, except Assam and Andaman group of Islands** (and Myanmar, Thailand, Vietnam, Laos, Cambodia, and southern China)

Western Ghats and Sri Lanka: Includes entire Western Ghats (and Sri Lanka).

Sundalands: Includes **Nicobar group of Islands** (and Indonesia, Malaysia, Singapore, Brunei, Philippines). The part of India that falls in the Sundaland Hotspot is the **Nicobar Islands**. Interestingly, it extends to the tectonic plates under the Indian Ocean. Sundaland also has the distinction of being home to the world's largest flowers, the **rafflesia**, which measure one metre across.

Statement 3 is correct. A **Hope Spot** is an **area of the ocean that merits special protection** because of its wildlife and significant underwater habitats.

Andaman and Nicobar & Lakshadweep Islands have been named as the **new “hope spots”** by IUCN and **Mission Blue**, an organization involved in the study of oceans.

Andamans & Nicobar Island has some of the **world’s unique species of birds and plants**.

Source: <https://www.thehindu.com/children/wild-wonderlands/article34686553.ece>

<https://www.downtoearth.org.in/news/andamans-lakshwadeep-declared-hope-spots-by-iucn-42556#:~:text=By%20Kumar%20Sambhav%20Shrivastava&text=Andaman%20and%20Nicobar%20Islands%20and,in%20the%20study%20of%20oceans.>

https://blog.forumias.com/conservation-efforts-in-india/#610_Biodiversity_Hotspots

Q.48) Consider the following pairs:

Sacred Groves	States
1. Orans	Jharkhand
2. Sarana	Rajasthan
3. Pavithra Vana	Andhra Pradesh

Which of the above-mentioned pairs is/are correct?

- a) 1 and 2 only
- b) 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Sacred groves comprise of patches of forests or natural vegetation – from a few trees to forests of several acres – that are usually dedicated to local folk deities. Some of important sacred groves in the country are:

Pair 1 is incorrect – Orans are the sacred woodland situated in Rajasthan. They have been a source of natural wealth like fodder, fuel, berries, timber, roots and herbs. These are also important source of water for traditional irrigation in Aravallis. The main water source for their livestock population in Johad which exists in the Oran.

Pair 2 is incorrect - Jharkhand's sacred groves, generally referred to as sarnas, are central to the tribal communities' culture and heritage. These patches of forests with sal trees and a cluster of other tree species are places of worship for the tribals in the state. Felling of trees, harming animals and plucking leaves are usually forbidden in these sacred spaces.

Pair 3 is correct - Sacred groves in Andhra Pradesh are known as Pavithravana. These are declared in various forest ranges to increase protection. Several communities feel the forest ranges as sacred and worship the trees there. It is not the name of a specific tree rather several forest patches in the state. These spaces are protected by local communities because of their religious beliefs and traditional rituals that run through several generations.

Source: <https://blog.forumias.com/appendix/>

<https://www.iccaconsortium.org/index.php/2021/02/27/orans-rajasthan-india/#:~:text=Orans%20are%20sacred%20spaces%2C%20which,intricately%20linked%20around%20these%20spaces.>

<https://india.mongabay.com/2019/12/protecting-sarna-jharkhands-groves-of-faith/#:~:text=Jharkhand's%20sacred%20groves%2C%20generally%20referred,the%20tribals%20in%20the%20state.>

<https://www.thehindu.com/features/friday-review/museum-of-biodiversity/article6570739.ece>

Q.49) With reference to difference between National Park and Wildlife Sanctuaries, which of the following statements is correct?

- a) Unlike National Parks that are declared by Union government the Wildlife Sanctuaries are declared by respective state governments.
- b) The boundaries of the National Parks are fixed and defined, which it is not so with wildlife sanctuaries.
- c) National Parks enjoy greater accessibility compared to Wildlife Sanctuaries.
- d) National Parks can be part of Biosphere reserves, but Wildlife sanctuaries are entirely separate from biosphere reserves.

Ans) b

Exp) Option b is the correct answer.

There are 104 existing NPs covering 1.23% of the geographical area in the country. There are 551 existing WLS covering 3.64% of the geographical area of the country. Difference between the two are:

Option a is incorrect - The State Government may, by notification, declare its intention to constitute any area within or outside any reserve forest as a sanctuary/National Park. Even the Central Government can do so. The notification shall specify, as nearly as possible, the situation and limits of such area. **Both Central and State Government can notify either of wildlife sanctuaries and national parks. It is done under the Wildlife Protection Act, 1972.**

Option b is correct - **The boundaries of the National Parks are fixed and defined, it is not so with wildlife sanctuaries.** The fixed boundary of a National Park is described in the Wildlife Protection Act, 1972. The legislation states the actual area of the national park which is notified by the State Government.

Option c is incorrect - **Wildlife sanctuaries are more accessible than National Park.** National Parks enjoys higher protection and even the collection of NFP under FRA, 2006 has been prohibited here. Wildlife Sanctuary is natural area which is reserve by a governmental or private agency for the protection of particular species. Human activities like tilling of land, collection of minor forest produce, harvesting of timber and private ownership rights are allowed in wildlife sanctuary. Unlike a Sanctuary, where certain rights can be allowed, in a National Park, no rights are allowed.

Option d is incorrect - **Both National Park and Wildlife sanctuaries can be the part of biosphere reserves.** Existing legally protected areas (National Parks, Wildlife Sanctuary, Tiger Reserve and reserve/protected forests) may become part of the BR without any change in their legal status. Biosphere Reserves is not intended to replace existing protected areas but it widens the scope of conventional approach of protection and further strengthens the Protected Area Network.

Source: Red Book on Environment by Forum IAS.

Q.50) With reference to Organic Photovoltaic (OPV) cells, consider the following statements:

1. OPV is a third-generation solar cell technology.
2. OPV cells have the potential to store much larger amounts of solar energy than other solar technologies.
3. OPV have a much longer operational life than their silicone based counter parts.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2, and 3

Ans) a

Exp) Option a is the correct answer.

Organic solar cells, also known as OPV, are a type of polymer solar cell that uses organic electrons to convert solar energy into electrical energy. They are lightweight, have low manufacturing costs, and can cover a larger area than other solar technologies.

Statement 1 is correct: OPV cells are a third-generation solar cell technology, which means they are more advanced than the first-generation silicon-based solar cells and second-generation thin-film solar cells.

Statement 2 is correct: OPV are thinly filmed solar cells that have the potential to store much larger amounts of solar energies than other solar technologies.

Statement 3 is incorrect: The key limitation of organic solar cells is their shorter operational lifetime compared to silicon-based solar cells, despite having higher efficiency. However, ongoing research and development involving new materials, processing methods, and device architectures are being explored to address this limitation.

Source: <https://renewableenergyhub.co.uk/main/solar-panels/organic-solar-cells/>

Q.1) Which of the following statements are the advantages of Zero tillage farming?

1. Reduction in the crop duration and higher yields
2. Zero cost of inputs used for land preparation.
3. Helpful in carbon sequestration
4. Reduces compaction of the soil

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) c

Exp) Option c is the correct answer.

Zero tillage is the process where the crop seed will be sown through drillers without prior land preparation and disturbing the soil where previous crop stubbles are present.

Zero tillage not only reduces the cost of cultivation but also reduces the soil erosion, crop duration and irrigation requirement and weed effect which is better than tillage. Zero Tillage (ZT) also called No Tillage or Nil Tillage. The No Till approach was started in 1960s by the farmers in India.

Advantages of zero tillage : -

- 1) Reduction in the crop duration and thereby early cropping can be obtained to get higher yields. **Hence option 1 is correct.**
- 2) Reduction in the cost of inputs for land preparation and therefore a saving of around 80%. **Hence option 2 is incorrect.**
- 3) Residual moisture can be effectively utilized and the number of irrigations can be reduced.
- 4) Dry matter and organic matter get added to the soil.
- 5) Environmentally safe - Greenhouse effect will get reduced due to carbon sequestration. **Hence option 3 is correct.**
- 6) No tillage **reduces the compaction of the soil** and reduces the water loss by runoff and prevents soil erosion. **Hence option 4 is correct.**
- 7) As the soil is intact and no disturbance is done, No Till lands have more useful flora and fauna.

Source: <https://vikaspedia.in/agriculture/best-practices/sustainable-agriculture/crop-management/201czero-tillage201d-zero-worries>

Q.2) Consider the following statements with reference to the Edible Oil sector of India.

1. India imports more than 50% of its edible oil requirement.
2. Sunflower oil accounts for more than 90% of all edible oil imports.
3. Rajasthan is the largest mustard oil producing state in India.

Which of the above given statements is/are correct?

- a) 1 and 2 only
- b) 1 only
- c) 2 and 3 only
- d) 1 and 3 only

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct. More than half of India's edible oil consumption is imported, India's dependence on edible **oil imports is to the tune of 55-60%**. India is the world's second-largest consumer and number one

importer of vegetable oil, and it meets 55-60 per cent of its need through imports. Although the oilseed production in India has grown over the years, the production has lagged its consumption, resulting in continuous dependence on imports.

Statement 2 is incorrect. Sunflower oil accounts for **14% of all edible oil imports India** imports 25 lakh tonnes of sunflower oil annually, of which 70% comes from Ukraine and 20% from Russia.

Statement 3 is correct. Rajasthan is the largest mustard oil producing state in the country. Currently, Rajasthan (41%), Madhya Pradesh (15%) and Haryana (8%), have a combined share of 64% in the mustard seed sown area in the country.

Source : <https://dfpd.gov.in/oil-division.htm>

Q.3) Consider the following pairs with reference to various crops and their largest producing States (As per 2022-23):

Crop	Largest Producer
1. Cotton	Telangana
2. Coffee	Karnataka
3. Jute	West Bengal
4. Maize	Rajasthan

How many pairs given above are correctly matched?

- Only One pair
- Only Two pairs
- Only three pairs
- All four pairs

Ans) b

Exp) Option b is the correct answer.

Pair 1 is matched incorrectly. During the current cotton season 2022-23, Gujarat, Maharashtra and Telangana are the major cotton producing states which produce about 65% of cotton production in the country. Gujarat with 91.83 lakh bales is followed by Maharashtra and Telangana with 80.25 lakh bales and 53.25 bales respectively.

Pair 2 is matched correctly. In fiscal year 2023, Karnataka had the largest share of coffee production in India, with 72.5 percent. Kerala followed, with Tamil Nadu ranking third during the same time period.

Pair 3 is matched correctly. India is the world's biggest producer of jute, followed by Bangladesh. In India, more than 80% of total production of Jute happens in West Bengal. West Bengal has the highest concentration of jute mills.

Pair 4 is matched incorrectly. Production of Maize in the country during 2022-23 is estimated at (record) 346.13 lakh tonnes which is higher by 8.83 lakh tonnes than the previous year production. The State of Karnataka with 5.22 million Tonnes is the largest producer followed by Madhya Pradesh (4.57 MT) and Maharashtra (3.53 MT)

Source:

https://www.google.com/url?sa=t&source=web&rct=j&url=https://pib.gov.in/PressReleaseDetail.aspx%3FPRID%3D1899193&ved=2ahUKEwjxkLq5tcD-AhU_yqACHbluCGoQFnoECA4QAQ&usq=AOvVaw2Rik9NA1LCllysjMllo384

Q.4) Dhara Mustard Hybrid (DMH-11) is an indigenously developed transgenic mustard. Consider the following statements with reference to DMH-11:

- Recently the Genetic Engineering Appraisal Committee (GEAC) has approved the commercial production of hybrid mustard DMH-11.
- It is a genetically modified variant of Herbicide Tolerant (HT) mustard.

3. It is a result of a cross between Indian mustard variety 'Varuna' and East European 'Early Heera-2' mustard.

Which of the above given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. Recently, the Genetic Engineering Appraisal Committee (GEAC) that functions under the Union Ministry of Environment, Forest and Climate Change have approved seed production prior to commercial release of genetically modified (GM) mustard. GEAC has **not given approval for commercial production of GM Mustard yet.**

Statements 2 and 3 are correct. DMH-11 is an indigenously developed transgenic mustard. It is a genetically modified variant of **Herbicide Tolerant (HT) mustard**. DMH-11 is a result of a cross between Indian mustard variety '**Varuna**' and East European '**Early Heera-2**' mustard.

It contains two alien genes ('barnase' and 'barstar') isolated from a soil bacterium called *Bacillus amyloliquefaciens* that enable breeding of high-yielding commercial mustard hybrids.

Source: <https://www.google.com/url?sa=t&source=web&rct=j&url=https://www.thehindu.com/sci-tech/agriculture/explained-the-new-hybrid-variant-of-mustard/article66088166.ece&ved=2ahUKEwiS0-KevcD-AhXyU2wGHdGOAyQQFnoECAEQAQ&usg=AOvVaw0GsfEipI56QhONL766V8kY>

Q.5) Consider the following statements with reference to Reversative agriculture:

- 1. It is a low-cost farming technique to reduce greenhouse gas emissions from agriculture.
- 2. Organic farming and Natural farming are the examples of reversative agriculture.

Which of the above given Statements is/are correct?

- a) 1 Only
- b) 2 Only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) c

Exp) Option c is the correct answer.

Statements 1 and 2 are correct. Reversative agriculture (organic or natural farming) – a low-cost approach to reducing greenhouse gas emissions.

Organic matter increase can help with carbon sequestration, while also improving the soil's microbial population.

Source: <https://www.un.org/en/observances/world-soil-day>

Q.6) Soil health is critical for healthy food production. Which of the following practices can help in reducing soil erosion?

- 1. Terrace farming
- 2. Contour farming
- 3. Crop rotation
- 4. Permaculture
- 5. Biodynamic farming

Which of the options given above are correct?

- a) 1, 2, 3 and 4 only
- b) 2, 3, 4 and 5 only
- c) 1, 3, 4 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) d

Exp) Option d is the correct answer.

Soil erosion is a gradual process that occurs when the impact of water or wind detaches and removes soil particles, causing the soil to deteriorate.

All the given techniques of farming help in reducing soil erosion.

Option 1 is correct. In terrace farming, a terrace is a piece of the sloped plane that is cut into a series of successively receding platforms, that resemble steps. This prevents rain from washing away soil, hence preventing soil erosion.

Option 2 is correct. Contour farming is the practice of tilling sloped land along lines of consistent elevation in order to conserve rainwater and to reduce soil losses from surface erosion.

Option 3 is correct. Crop rotation can improve soil structure and fertility by alternating deep-rooted and shallow-rooted plants. In turn this can reduce soil erosion and increase infiltration capacity, thereby reducing downstream flood risk.

Option 4 is correct. Trees grown on permaculture farms accomplish the purpose of **holding the topsoil layer together and preventing soil erosion.** The goal of permaculture is to maximize the use of land so that it can be used productively for food production or personal subsistence by future generations. It incorporates techniques from a variety of fields, including organic farming, agroforestry, composting, mulching, integrated farming, sustainable development, and applied ecology.

Option 5 is correct. Biodynamic farming is a **nature-based farming technique** which relies on locally-sourced materials and living soil for crop production which **helps in controlling soil erosion.** It helps maintain the balance between plants and microbial life on earth as both are essential for each other's survival. Thus, it is helpful in tackling the growing problem of soil erosion.

Source:

<https://www.google.com/url?sa=t&source=web&rct=j&url=https://www.biodynamics.com/biodynamic-principles-and-practices%23~:text=3DBiodynamic%2520plants%2520are%2520grown%2520in,cover%2520cropping%252C%2520and%2520crop%2520rotation.&ved=2ahUKEwj72tHlxMD-AhX07DgGHY3-DxIQFnoECEkQBQ&usq=AOvVaw1FkovNWM5bztpUzG50blUQ>

Q.7) Consider the following statements with reference to SMART-PDS (Scheme for Modernisation and Reforms through Technology in Public Distribution System):

1. It is a system where smart ration cards are issued to beneficiaries of the Public Distribution System (PDS).
2. Fingerprints of the beneficiaries are recorded to ensure transparency in transactions.
3. It takes leverage of the usage of Cloud and new-age technology.

Which of the above given statements is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct. SMART-PDS is a system where **smart ration cards are issued** to beneficiaries of the public distribution system, and ration is given through fair price shops on the production of the smart ration card by any member of the beneficiary family.

Statement 2 is correct. Fingerprint template of the beneficiary is recorded in these smart ration cards, which record all transactions. The SMART-PDS is an initiative of the Department of Food and Public Distribution (DFPD) under the Ministry of Consumer Affairs, Food and Public Distribution.

Statement 3 is correct. This scheme aims to transform the entire PDS IT ecosystem by **leveraging the usage of Cloud and new-age technology.**

Source: <https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1903594>

Q.8) Which of the following best explains the Cobweb cycle / phenomenon which was in the news recently?

- It refers to a phenomenon where the prices of certain goods witness fluctuations that are cyclical in nature.
- It refers to the periodic rise of some agricultural commodities due to their scarce production.
- It is a phenomenon where the price of certain agricultural commodities rises more rapidly than the prices of other goods and services.
- It refers to a cycle of price rise of all agriculture commodities during Stagflation.

Ans) a

Exp) option a is the correct answer.

Statement a is correct. Cobweb cycle / phenomenon refers to a phenomenon where the **prices of certain goods witness fluctuations that are cyclical in nature.** It happens due to faulty producer expectations.

- The producers of agricultural goods, for instance, might decide to increase their output one year because their product commanded a very high price the previous year. This, however, might lead to overproduction and cause prices to slump that year, thus leading to losses.
- Such cyclical price fluctuations are more severe in markets where speculators are banned from hoarding goods to sell them later at a higher price.

Statement b is incorrect. Cobweb cycle / phenomenon **do not** refer to the periodic rise and fall of some agricultural commodities due to their scarce production.

Statement c is incorrect. Agflation describes the phenomenon when food prices rise more rapidly than the prices of other goods and services, due to the growing demand for crops as both food and for use in biofuels.

Statement d is incorrect. Cobweb cycle / phenomenon **do not** refer to a cycle of price rise of all agriculture commodities during Stagflation.

Source:

https://www.google.com/url?sa=t&source=web&rct=j&url=https://www.thehindu.com/opinion/op-ed/what-is-cobweb-cycle-in-economics/article22744641.ece/amp/&ved=2ahUKEwiX_sX_usH-AhXXcGwGHQFxDJoQFnoECFoQAQ&usq=AOvVaw2fZ9HMUExnnHD7nSB-QSRn

Q.9) Agriculture infrastructure Fund (AIF) aims to provide all-around financial support to the farmers. Consider the following statements with reference to AIF:

- It is a Central Sector Scheme.
- Its aim is to provide a medium-long term debt financing facility for the farming sector.
- Only individual farmers are the intended beneficiaries of this scheme.

Which of the statements given above are correct?

- a) 2 and 3 only
- b) 1 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct. Agriculture infrastructure Fund (AIF) is a pan India Central Sector Scheme launched in the year 2020. The duration of the Scheme shall be from FY2020 to FY2032.

Statement 2 is correct. Agriculture infrastructure Fund (AIF) aims to provide a medium – long term debt financing facility for investment in viable projects. The projects include for post-harvest management Infrastructure and community farming assets through interest subvention and financial support.

Statement 3 is incorrect. Intended beneficiaries under this scheme include Primary Agricultural Credit Societies (PACS), Marketing Cooperative Societies, Farmer Producers Organizations (FPOs), Self Help Group (SHG), Farmers, Multipurpose Cooperative Societies, Agri-entrepreneurs, Startups, Aggregation Infrastructure Providers and Central/State agency or Local Body sponsored PPP Project.

Source:

<https://www.google.com/url?sa=t&source=web&rct=j&url=https://www.pib.gov.in/PressReleasePage.aspx%3FPRID%3D1892987&ved=2ahUKEwj05fwvH-AhWbUGwGHbI0CQMqFnoECBAQAQ&usq=AOvVaw0Cg1m4ne4s87G9AycIRAFW>

Q.10) Consider the following statements about Krishi Decision Support System (Krishi DSS), that has been often mentioned in the media:

1. It helps to enhance the evidence based decision making ability of all the stakeholders in the agriculture sector
2. It is being jointly developed by the Ministry of Agriculture and Farmers Welfare and the Department of Space.
3. It utilizes the services of BHUVAN and MOSDAC platforms of the Indian Space Research Organization (ISRO).

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statements 1 and 2 are correct. A Memorandum of Understanding (MoU) was signed between the **Ministry of Agriculture and the Department of Space** to develop the Krishi-Decision Support System (Krishi-DSS) using satellite data. **This will enhance the evidence-based decision-making capability of all the stakeholders in the agriculture sector.**

Statement 3 is correct. It provides information to the stakeholder **by way of integration with MOSDAC and BHUVAN (Geo-platform)** and ICAR systems.

- 1) **BHUVAN:** The Indian Space Research Organisation (ISRO) developed the Geoportal platform known as BHUVAN, which in Sanskrit means "earth," and it was launched in 2009. It is widely known for its collaboration with the Indian government to facilitate the the use of geospatial technology.

2) **MOSDAC (Meteorological and Oceanographic Satellite Data Archival Centre):** It serves as a data repository for ISRO and Indian government missions that deal with meteorology, oceanography, and tropical water cycles. Through the MOSDAC website, the Space Applications Centre (SAC), Ahmedabad disseminates mission data in close to real-time.

<https://bhuvan.nrsc.gov.in/>

<https://www.mosdac.gov.in/>

Q.11) The concept of green manuring is quickly gaining popularity in organic farming. In this context which of the following can be considered as advantages of “Green manuring.”:

1. It increases water holding capacity of soil
2. It helps in reclamation of alkaline soils.
3. It can be helpful in reducing weed growth.

Which of the options given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Green undecomposed material used as manure is called green manure. It is obtained in two ways: by growing green manure crops or by collecting green leaf (along with twigs) from plants grown in wastelands, field bunds and forest.

Option 1 is correct. Green manuring improves soil structure, increases water holding capacity and decreases soil loss by erosion.

Option 2 is correct. Green manuring helps in reclamation of alkaline soils. Root knot nematodes can be controlled by green manuring. Green manure acts mainly as soil-acidifying matter to decrease the alkalinity/pH of alkali soils by generating humic acid and acetic acid.

Option 3 is correct. Growing of green manure crops in the off season reduces weed proliferation and weed growth. A well-established over-wintering green manure will smother weed seedlings and some, notably grazing rye, will prevent weed seed germination as they decompose after incorporation into the soil.

Q.12) With reference to the Policy Framework for Genetically Modified (GM) Crops, consider the following statements:

1. The Genetic Engineering Appraisal Committee (GEAC) is the highest authority in India that authorises the release of GM crops for commercial use.
2. In India, the Food Safety and Standards Authority of India (FSSAI) is empowered to regulate food from genetically modified (GM) crops.
3. The GM food imports in India require approvals under the Biological Diversity Act, 2002.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct. The Genetic Engineering Appraisal Committee (**GEAC**) is the apex body in India that **approves the commercial release of GM crops**. The "Rules for the Manufacture/Use/Import/ Export and Storage of Hazardous Microorganisms, Genetically Engineered Organisms or Cells, 1989" (commonly referred to as the "Rules, 1989") are administered by the Ministry of Environment and Forests (MoEF) in accordance with the Environment (Protection) Act, 1986, and govern all GMO-related activities and products derived from GMOs in India. The Rules, 1989 cover a wide range of activities, products, and processes, including food derived from biotechnology.

Statement 2 is correct. Food Safety and Standards Act, 2006 empowers the Food Safety and Standards Authority of India (FSSAI) to **regulate genetically modified (GM) foods**. This notification exempted food stuffs, ingredients in foodstuffs and additives including processing aids derived from Living Modified Organisms where the end product is not a Living Modified Organism.

Statement 3 is incorrect. The import of genetically modified foods in India requires approvals under the **Environment Protection Act of 1986 and the Food Safety and Standards Act of 2006 (and not Biological Diversity Act 2002)**. While the former analyses how the food products impacts the environment, the latter evaluates how the food affects the health of the people.

Source: <https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1844666>

http://www.indiaenvironmentportal.org.in/files/fssa_interim%20regulation%20on%20Operatonalising%20GM%20Food%20regulation%20in%20India.pdf

<https://www.downtoearth.org.in/news/food/india-is-consuming-banned-gm-food-owing-to-lack-of-regulations-59931>

Q.13) With reference to Fisheries sector, consider the following statements:

1. India is the largest fish producer in the world.
2. More than 10% of the world's shellfish and fish species are known to be found in India.
3. Tamil Nadu is the largest fish producing state in India.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is incorrect. India is the world's second-largest aquaculture country and, after China, the world's third-largest fish producer. The fisheries and aquaculture industries have significantly improved as a result of the Indian Blue Revolution.

Statement 2 is correct. The rich and diverse fisheries of India, which include deep seas, lakes, ponds, and rivers, are home to more than 10% of the world's fish and shellfish species. The country's extensive coastline, exclusive economic zone (EEZ), and sizable continental shelf region are the home to marine fisheries resources.

Statement 3 is incorrect. Andhra Pradesh is the largest fish producing state in India. It produces over 42L tonnes of fish per year and accounts for over 30 percent of total fish produced in the country.

Source: <https://www.ibef.org/blogs/the-fisheries-aquaculture-sector-of-india#:~:text=India%20is%20the%20world's%20second,largest%20fish%20producer%20after%20China.>

<https://timesofindia.indiatimes.com/city/vijayawada/state-tops-in-fishery-lags-in-consumption/articleshow/87144847.cms>

Q.14) Which of the following are the applications of Genome sequencing in Agriculture and allied sector?

1. Improve and design crops with enhanced resistance to pests and diseases.
2. To produce large quantities food on the limited amount of land
3. To produce superior quality livestock
4. To enhance stress tolerance in aquatic organisms

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 1, 3 and 4 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

The study of genes and gene functioning is the area of genomics. Genomics targets to recognize the configuration of the genome together with gene mapping and DNA sequencing. In agriculture, genomics aids to: -

- 1) Improve and design crops with enhanced resistance to factors that influence their growth such as pests, diseases, drought, frost, floods and so on. **Hence option 1 is correct.**
- 2) To produce large quantities food on the limited amount of land and to cultivate more nutrient-rich foods. **Hence option 2 is correct.**
- 3) To breed disease resistant, **superior quality livestock** and to **produce healthy herds**. Genomics helps to accurately predict the genetic merit, to sharpen selective breeding, enhance desirable traits and increase animal health and welfare. **Hence option 3 is correct.**
- 4) Genomics helps to **improve aquaculture**, quicker growth rates, improve disease resistance and enhance **stress tolerance in aquatic organisms**. As aquaculture produces vital high-quality protein that feeds the population of the world. **Hence option 4 is correct.**

Source: <https://biotecharticles.com/Biotech-Research-Article/Genomics-and-Its-Applications-in-Agriculture-2164.html>

<https://www.mybiosource.com/learn/genome-sequencing-in-agriculture-and-food-security/>

Q.15) Consider the following pairs about the agricultural products that has got GI tag recently and their respective states:

GI Product	State
1. Adamchini Rice	Uttar Pradesh
2. Mushk Budji Rice	Telangana
3. Marcha Rice	Bihar

Which of the above given pairs are correctly matched?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Geographical Indications (GI) is a form of Intellectual Property right that identifies goods originating from a specific geographical location and having distinct nature, quality and characteristics linked to that location. The GI tags are typically applied to industrial products, foodstuffs, agricultural products, spirit

drinks, and handicrafts. GI Tag guarantees that only the registered authorized user is permitted to use the name of the popular Product.

Pair 1 is correctly matched: Adamchini Chawal belongs to the Uttar Pradesh. Banarasi Paan has received the geographical indication (GI) tag. Along with the Banarasi Paan, three other Varanasi-based products Banarasi Langda Mango, Ramnagar Bhanta (Brinjal) and **Adamchini Rice** have also received the GI tag,

Pair 2 is incorrectly marked: Mushk Budji Rice belongs to Jammu and Kashmir (not Telangana).

Pair 3 is correctly matched: Bihar's famous 'Marcha Rice' which is known for its aroma and palatability was awarded the Geographical Indication tag, according to the GI registry. Marcha is a short indigenous cultivar of rice found in West Champaran district of Bihar. By its size and shape, its grain appears like black pepper, so it is known as 'Mircha'

Source: <https://economictimes.indiatimes.com/news/india/bihars-aromatic-marcha-rice-gets-gi-tag/articleshow/99274910.cms>

<https://www.zeebiz.com/trending/news-banarasi-paan-gi-tag-geographical-indication-langda-mango-ramnagar-bhanta-228986>

Q.16) Which of the following are the advantages of cultivating millets over conventional cereals?

1. They can grow across wide latitudinal range.
2. They requires less water than wheat and rice.
3. They can withstand heat, flood and drought.
4. They are highly resistant to pests and diseases.
5. They are free of gluten.

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 1, 2, 3 and 5 only
- c) 2, 3, 4 and 5 only
- d) 1, 2, 3, 4 and 5

Ans) d

Exp) Option d is the correct answer.

Millets are resilient cereals that can offer a cost-effective and nutrient-rich alternative and help ensure food security. **At its 75th session in March 2021, the United Nations General Assembly declared 2023 the International Year of Millets (IYM 2023)** with the Food and Agriculture Organization of the United Nations (FAO) as the lead agency. Some of the advantages of millets over conventional cereals like wheat and rice are given below:

- 1) Millets can grow on arid soils, non-irrigated land, in very low rainfall regimes, and over a wide latitudinal range. **Hence, option 1 is correct.**
- 2) Compared to rice and wheat, millets require less water. They also have a low water footprint. **Hence, option 2 is correct.**
- 3) In an era of climate change and declining natural resources, the millet crop is an obvious choice for farmers due to its high tolerance for heat (up to 64 degrees Celsius), drought, and flood. **Hence, option 3 is correct.**
- 4) They require less input, have higher disease and pest resistance, and require lesser synthetic fertilisers and pesticides. **Hence, option 4 is correct.**
- 5) They are gluten-free. **Hence, option 5 is correct.**
- 6) Additionally, compared to other cereals, they are more resilient to climate change.

Source: <https://unric.org/en/millets-good-for-people-the-environment-and-farmers/>

Q.17) Which of the following are the conditions best suited for Tea cultivation?

1. Tropical climate
2. Soil rich in humus
3. Cold and dry conditions
4. Annual Rainfall less than 100 cm
5. Temperature between 21 to 29°C

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 2, 3 and 5 only
- c) 2 and 4 only
- d) 1, 2 and 5 only

Ans) d

Exp) Option d is the correct answer.

The climate not only determines the suitable place to grow tea plants but also affects the quality of tea grown in that area.

Ideal Conditions for Tea Cultivation are:

Statement 1 is correct. Tropical and Sub-tropical climates are optimal for tea cultivation.

Statement 2 is correct. Well-drained soil, rich in humus is required for tea cultivation.

Statement 3 is incorrect. Warm and moist climatic condition are needed for cultivation of tea. Humidity required is generally between 75 to 90%.

Statement 4 is incorrect. Annual Rainfall for tea cultivation is generally between 150-700 cm

Statement 5 is correct. Temperature must be in the range 21°C to 29°C.

Source: <https://vihaba.global/2022/02/17/what-is-the-ideal-climate-condition-for-tea-cultivation/>
<https://www.yourarticlelibrary.com/essay/growth-of-tea-suitable-conditions-required-for-the-growth-of-tea/25570>

Q.18) In the context of India which of the following statements represents possible negative impacts of Agricultural Subsidies given by the government?

1. Decrease in plantation of monoculture crops
2. Soil degradation
3. Overuse of fertilizers and pesticides
4. Increased Greenhouse Gas (GHG) emission
5. Increase in symbiotic efficiency of Nitrogen-fixing rhizobia with soil.

Select the correct answer using the code given below:

- a) 1, 2 and 3 only
- b) 1, 3, 4 and 5 only
- c) 2, 3 and 4 only
- d) 1, 2, 3, 4 and 5

Ans) c

Exp) Option c is the correct answer.

Option 1 is incorrect. According to a recent report by the Food and Agriculture Organisation of the United Nations (FAO), the United Nations Development Programme (UNDP), and the United Nations Environment Programme (UNEP), subsidies can have a negative impact on the environment by encouraging monoculture and the overuse of agrochemicals and natural resources.

Option 2 is correct. Subsidies are particularly problematic in the case of nitrogen-based fertilisers as, overusing them, release nitrous oxide, a gas that is around 300 times more harmful than carbon dioxide. Additionally, the use of these fertilisers is linked to soil degradation and surface water pollution.

Option 3 is correct. Farmers are urged to use inputs like fertilisers more often when their cost are subsidised through government policies.

Option 4 is correct and 5 is incorrect. Subsidies affects trade and production decisions and distorts agricultural markets. By creating strong incentives for increased production, which in turn leads to greater usage of inputs like agrochemicals, pesticides, and water, it has a **negative impact on the environment by increasing GHG emissions and nitrogen runoff from agriculture. Excessive use of Pesticides reduce symbiotic efficiency of nitrogen-fixing rhizobia and host plants.**

Source: <https://www.iisd.org/articles/policy-analysis/wto-agricultural-subsidies-trade-offs#:~:text=It%20also%20generates%20environmentally%20harmful,and%20nitrogen%20runoff%20from%20agriculture.>

Q.19) With reference to the land reforms in India, consider the following statements:

1. Bhoodan movement aimed at redistribution of the lands willingly given up by the large landowners among the landless.
2. The Gramdan led to the donation of the entire village to the society for carrying out cooperative farming.
3. The Land Satyagraha in Chhattisgarh ensured a scientific survey of land to weed out the false land records.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Acharya Vinoba Bhave started Bhoodan for providing land to the landless and Gramdan to create a new social order based on cooperative farming.

Statement 1 is correct: Bhoodan movement was initiated for the landowners to willingly give up some acres of their land to landless people. Bhoodan Movement had two components (i) the **collection of land gifts**, and (ii) **redistributing that land among the landless.**

It is also known as the land gift movement.

There were two major philosophical objectives of the movement:

- 1) To keep away from power and to create Jan Shakti, a self-reliant strength of the people.
- 2) Vinoba called for a change in land ownership from the hands of individual to that of village or society, declaring that "All land belong to Him". Society is the virtual owner of what is with us and we can only act as trustees on its behalf.

Statement 2 is correct: The **Gramdan** (Donation of the Entire Village) led to the donation of the entire village to the society for carrying out **cooperative farming**. In an ideal gramdan, all the land was to be collectively owned and managed by the Gram Sabha. The labourers will give all their earnings to the village community, which will then distribute it according to needs. Thus, gramdan acts as the ideal unit for putting the principles in the practice, "From each according to his ability, to each according to his needs".

Statement 3 is correct: The **Land Satyagraha** was launched in 1988 in about 700 villages of Raipur district of **Chhattisgarh**.

The land Satyagraha strengthened Land Reforms in India - by the support of a **scientific survey of land** in the region. Thus, parallel land records by Non-Governmental Initiatives were created **challenging the fraudulent and false land records** maintained by the revenue officials and made available to the people.

Source: <https://egyankosh.ac.in/bitstream/123456789/32684/1/Unit-4.pdf>

Q.20) With reference to the differences between the direct seeded rice (DSR) system and the traditional transplanted rice (TPR) system of cultivation, consider the following statements:

1. Unlike the TPR system, pre-germinated seeds are directly drilled into the field in the DSR system.
2. DSR is more water efficient approach than the TPR system.
3. Rice grown under the DSR system is susceptible to higher weed infestation than under the TPR system.

Which of the above given statements are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Statement 1 is correct: As opposed to the traditional method of growing seedlings in a nursery before transplanting them into flooded fields, direct seeding is a crop establishment system in which rice seeds are sown directly into the field. In DSR, the pre-germinated seeds are directly drilled into the field by a tractor-powered machine. **There is no nursery preparation or transplantation involved in DSR method.**

Statement 2 is correct: DSR can be a more water-efficient approach: water diversion to the paddy field is significantly reduced before seeding, and it does not require ponding. Generally, under the DSR system, a minimum water saving of 18% can be achieved relative to TPR without compromising yield.

Statement 3 is correct: There are nonetheless disadvantages to DSR. For example, rice grown under the DSR system is susceptible to higher weed infestation than under the TPR system.

Source: <https://dsrc.irri.org/our-work/what-is-dsr>

<https://www.cgiar.org/news-events/news/direct-seeded-rice-what-are-the-benefits-potential-and-suitability-in-haryana-india/>

<https://dsrc.irri.org/our-work/issues-opportunities>

Q.21) Consider the following statements:

1. The Indian Seeds programme recognizes two generations of seeds, namely, foundation and certified seeds.
2. Under the automatic route, FDI is allowed up to 75% in production and development of seeds.
3. In India, import of planting materials and seeds are governed by New Policy on Seed Development, 1988.

Which of the statements given above is/are **not** correct?

- a) 1 and 2 only
- b) 2 only
- c) 3 only
- d) 1, 2 and 3

Ans) a

Exp) Option a is the correct answer.

Statement 1 is incorrect. Breeder, foundation, and certified seeds are the three generations of seeds recognised by the Indian Seeds Programme.

Statement 2 is incorrect. According to the current policy, FDI is allowed up to 100% through the automatic route in the development and production of seeds and planting material. The approval of FDI up to 100% would promote the infusion of foreign investment into the seed sector and would also make it easier for domestic seed companies to expand their R&D efforts in order to produce better varieties of seeds.

Statement 3 is correct. The New Policy on Seed Development, 1988 was formulated to provide Indian farmers access to the best planting materials available worldwide while also increasing productivity, farm incomes, and earnings from exports. The New Policy on Seed Development, 1988, governs the import of seeds and other planting materials.

Source: <https://agricoop.nic.in/en/SeedsDiv#gsc.tab=0>

Q.22) Which among the following is the biggest cause of concern for the terminator seed technology?

- Consumption of food grown of them may lead to sterility in animals and humans
- Increased dependence on government
- Increased usage of chemical pesticides
- Threat to food security and farmer livelihoods

Ans) d

Exp) Option d is the correct answer.

Terminator seed technology refers to genetically engineered seeds that produce sterile plants after one generation. This means that farmers cannot save seeds from their harvest and need to purchase new seeds every year. **This method poses an environmental concern being that it significantly reduces crop diversity and introduces many GMOs into the earth.** Terminator seeds contain a repressor gene that kills the embryo in any seed that a genetically modified plant protected by Terminator technology produces. Even though the seeds produced by the plants look normal, they are not viable and cannot be used to plant more crops, which forces the farmer to buy new seeds from the biotechnology firm selling the genetically modified plant. **The biggest cause of concern for this technology is the threat it poses to food security and farmer livelihoods.**

Source: <https://cases.open.ubc.ca/monsanto-and-terminator-seeds/>
<https://borgenproject.org/terminator-seeds-threaten-sustainable-farming/>

Q.23) Consider the following statements with reference to the Minimum Support Prices (MSP) in India:

- MSP rates in India are fixed by the Commission for Agricultural Costs and Prices (CACP).
- Commission for Agricultural Costs and Prices (CACP) takes into account the effect of MSP on the cost of living while calculating their prices.
- Inter-crop price parity is also considered while determining MSPs
- The government is mandated to provide MSP under the Essential Commodities Act (ECA), 1955

Which of the above-given statements are correct?

- 2 and 3 only
- 1 and 4 only
- 1, 3 and 4 only
- 1 and 3 only

Ans) a

Exp) Option a is the correct answer.

Minimum Support Price (MSP) is a form of market intervention by the Government of India to insure agricultural producers against any sharp fall in farm prices.

Statement 1 is incorrect: The **minimum support prices are announced by the Government of India at the beginning of the sowing season** for certain crops on the basis of the recommendations of the Commission for Agricultural Costs and Prices (CACP). **MSP price is fixed by Government of India** to protect the producer - farmers - against excessive fall in price during bumper production years

Statements 2 and 3 are correct: In formulating the recommendations in respect of the level of minimum support prices and other non-price measures, the CACP takes into account, apart from a comprehensive view of the entire structure of the economy of a particular commodity or group of commodities, the following factors:-

- 1) Cost of production
- 2) Changes in input prices
- 3) Input-output price parity
- 4) Trends in market prices
- 5) Demand and supply
- 6) Inter-crop price parity**
- 7) Effect on industrial cost structure
- 8) Effect on cost of living**
- 9) Effect on general price level
- 10) International price situation
- 11) Parity between prices paid and prices received by the farmers.
- 12) Effect on issue prices and implications for subsidy

Statement 4 is incorrect: The **government is not mandated to provide MSP under the Essential Commodities Act (ECA), 1955**. There is no legislation behind the MSPs even though it has existed as policy for several decades.

Source: <https://timesofindia.indiatimes.com/business/india-business/repeal-of-agri-laws-why-some-farmers-are-now-insisting-on-msp/articleshow/87975570.cms>

<https://vikaspedia.in/agriculture/market-information/minimum-support-price>

Q.24) Consider the following statements with reference to the Nutrient Based Subsidy (NBS) Scheme:

1. Nutrient Based Subsidy (NBS) Scheme is implemented by Ministry of Agriculture and Farmers Welfare.
2. All Non-Urea based fertilizers are regulated under NBS Scheme.
3. The scheme takes into account the international and domestic prices of fertilizers while determining the Subsidy.

Which of the above given statements is/are correct?

- a) 3 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1 and 2 only

Ans) c

Exp) Option c is the correct answer.

Under the Nutrition Based Subsidy (NBS) regime – fertilizers are provided to the farmers at the subsidized rates based on the nutrients (N, P, K & S) contained in these fertilizers.

Statement 1 is incorrect: NBS policy intends to increase the consumption of P&K fertilizers so that optimum balance (N:P:K= 4:2:1) of NPK fertilization is achieved. **It is being implemented from April 2010 by the Department of Fertilizers, Ministry of Chemicals & Fertilizers.**

Statement 2 is correct: Under the current system of subsidy on fertilizers, the MRP of Urea is fixed but the subsidy can vary while MRP of DAP (Di-ammonium Phosphate) is decontrolled (i.e. subsidy is fixed but the MRP can vary). **All Non-Urea based fertilizers are regulated under Nutrient Based Subsidy Scheme.**

Statement 3 is correct: The subsidy on fertilizers under the NBS scheme is announced by the Government on an annual basis for each nutrient on a per kg basis – which are **determined taking into account the international and domestic prices of fertilizers, exchange rate, inventory level in the country etc.**

Source: <https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1873019>

<https://www.fert.nic.in/phosphatic-and-potassic-pk-policy>

Q.25) With reference the National Mission on Natural Farming (NMNF), consider the following statements:

1. It is a sub scheme of Paramparagat Krishi Vikas Yojna (PKVY)
2. Under the mission, Farmer Field Schools (FFS) helps to create awareness about the natural farming.
3. The NMNF provides financial assistance to farmers for adopting natural farming.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Natural Farming-Bhartiya Prakratik Krishi Paddhati (BPKP) is a chemical-free farming system based on locally available resources and traditional practices. It promotes the use of on-farm resources for nutrient and soil fertility management.

Statement 1 is incorrect: To motivate farmers to adopt chemical free farming and enhance the reach of natural farming, the Government has formulated National Mission on Natural Farming (NMNF) **as a separate and independent scheme from 2023-24 by up scaling the Bhartiya Prakritik Krishi Paddati (BPKP).** The scheme is for a duration of 2023–2026.

Statement 2 is correct: First year of the natural farming mission will be devoted to the awareness creation through Farmer Field School (FFS).

Statement 3 is correct: The National Mission on Natural Farming (NMNF) provides several incentives to farmers for adopting natural farming practices. These include a financial assistance of Rs. 15,000 per hectare for one-time on-farm manure production infrastructure, training of farmers by Champion farmer and CRP through six one-day training sessions for a batch of 50 farmers at a cost of Rs. 30,000 per batch etc.

Source: <https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1911558>

http://agriculture.up.gov.in/nmnf/natural_farming/guid/NMNFGuidelines.pdf

<http://naturalfarming.dac.gov.in/Initiative/BPKP>

Q.26) Consider the following statements with reference to the Bio-pesticides:

1. Biopesticides are pesticides derived from natural sources.
2. Bio-pesticides are not harmful to humans.
3. Virus, bacteria, and protozoa, all three can be used as biopesticides.

Which of the above given statements is/are correct?

- a) 2 only
- b) 1 and 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Recently, due to high toxicity of conventional pesticides, biopesticides have attracted lot of attention.

Statement 1 is correct: Biopesticides are certain types of pesticides derived from such natural materials as animals, plants, bacteria, and certain minerals. For example, canola oil and baking soda have pesticidal applications and are considered biopesticides.

Statement 2 is incorrect: While biopesticides are generally considered to be safer and more environmentally friendly than synthetic pesticides, they can still have harmful effects under certain circumstances, and some biopesticides can cause health effects in humans if they are not handled or used properly.

Statement 3 is correct: Viruses, bacteria, and protozoa can be used as biopesticides. These microorganisms can be used to control pests in agricultural crops, forests, and public health settings. However, the use of microorganisms such as biopesticides requires careful evaluation to ensure their safety and effectiveness. For example, some bacteria, such as **Bacillus thuringiensis (Bt)**, produce proteins that are toxic to certain insect pests but are harmless to humans and other non-target organisms. Similarly, some viruses, such as **nucleopolyhedroviruses**, can infect and kill specific insect pests while being safe for humans and the environment. **Protozoa, such as the microsporidian Nosema locustae, have been used to control locusts and grasshoppers**, as they can infect and reduce the population of these pests.

Source: <https://www.igb-berlin.de/en/news/biopesticides-more-toxic-expected>

<https://www.epa.gov/ingredients-used-pesticide-products/what-are-biopesticides>

Q.27) Arrange the following in decreasing order of their share in the total agricultural credit in India:

1. Scheduled commercial banks
2. Regional rural banks
3. Cooperatives

Select the correct answer using the codes given below:

- a) 1>2>3
- b) 3>2>1
- c) 1>3>2
- d) 2>1>3

Ans) c

Exp) Option c is the correct answer.

In India, agricultural credit is mainly provided by scheduled commercial banks, regional rural banks, and cooperatives. The share of each in the total agricultural credit in India is as follows:

- 1) **Scheduled commercial banks:** They have the **highest share in agricultural credit** in India. As per the data available, their share is more than 60% of the total agricultural credit.
- 2) **Cooperatives:** They have the **second-highest share in agricultural credit** in India. As per the data available, their share is around 15% of the total agricultural credit.
- 3) **Regional rural banks:** They have a significant share in agricultural credit in India. As per the data available, their share is around 5% of the total agricultural credit.

Source: <https://www.rbi.org.in/Scripts/PublicationReportDetails.aspx?UrlPage=&ID=942#CP13>

Q.28) Consider the following statements regarding Protection of Plant Varieties and Farmers' Rights Act, 2001:

1. Breeders have exclusive rights to produce, sell, market, distribute, import or export the protected variety.
2. Researchers can use any of the registered varieties under the Act for conducting experiments or research.
3. The act consists of a provision for compensation to the farmers for non-performance of protected variety.

Which of the statements given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

In order to provide for the establishment of an effective system for the protection of plant varieties, the rights of farmers and plant breeders and to encourage the development of new varieties of plants it has been considered necessary to recognize and to protect the rights of the farmers in respect of their contributions made at any time in conserving, improving and making available plant genetic resources for the development of new plant varieties. The Govt. of India enacted "The Protection of Plant Varieties and Farmers' Rights (PPV&FR) Act, 2001" adopting sui generis system.

Statement 1 is correct:

Breeders' Rights: Breeders will have exclusive rights to produce, sell, market, distribute, import or export the protected variety. Breeders may exercise civil remedy in case of infringement of rights.

Statement 2 is correct:

Researchers' Rights: Researcher can use any of the registered variety under the Act for conducting experiment or research. This includes the use of a variety as an initial source of variety for the purpose of developing another variety, but repeated use needs prior permission of the registered breeder.

Statement 3 is correct:

Farmers' Rights under PPV&FR act:

- 1) A farmer who has evolved or developed a new variety is entitled for registration and protection in like manner as a breeder of a variety;
- 2) Farmers variety can also be registered as an extant variety;
- 3) A farmer can save, use, sow, re-sow, exchange, share or sell his farm produce including seed of a variety protected under the PPV&FR Act, 2001 in the same manner as he was entitled before the coming into force of this Act provided farmer shall not be entitled to sell branded seed of a variety protected under the PPV&FR Act, 2001;
- 4) Farmers are eligible for recognition and rewards for the conservation of Plant Genetic Resources of land races and wild relatives of economic plants;
- 5) **There is also a provision for compensation to the farmers for non-performance of variety under Section 39 (2) of the Act, 2001 and**
- 6) Farmer shall not be liable to pay any fee in any proceeding before the Authority or Registrar or the Tribunal or the High Court under the Act.

Source: <https://www.vikaspedia.in/agriculture/policies-and-schemes/crops-related/protection-of-plant-varieties-and-rights-of-farmers/protection-of-plant-varieties-and-farmers-rights-act-2001>

Q.29) Which of the following options best describe the meaning of the term “Herbigation”?

It is an/a-

- effective method of applying herbicides through irrigation systems.
- method for production of natural drugs obtained from organisms such as plants, microbes, and animals.
- process of application of volatile chemicals to confined spaces or soil to produce gas that will destroy weed seeds.
- process aimed at destroying the aggregates of soil by agricultural operations on it when it is too wet.

Ans) a

Exp) Option a is the correct answer.

Option a is correct: Herbigation is an effective method of applying herbicides through irrigation systems. Weed control has been equal or better with herbigation than applications with ground or aerial sprayers. More herbicide registrations and better injection equipment has given the growers greater flexibility in herbigation programs.

Option b is incorrect: Pharmacognosy deals with the natural drugs obtained from organisms such as most plants, microbes, and animals. Up to date, many important drugs including morphine, atropine, galanthamine, etc. have originated from natural sources which continue to be good model molecules in drug discovery.

Option c is incorrect: Application of volatile chemicals in confined spaces or to soil to produce gas that will destroy weed seeds is called **fumigation**. Herbicides used for fumigation are called fumigants. These are good for killing perennial weeds and as well for eliminating weed seeds. e.g. Methyl bromide, Metham etc.

Option d is incorrect: Puddling is destroying the aggregates of soil by agricultural operations on it when it is too wet. Puddling can be defined as the process of breaking down soil aggregates into uniform mud, accomplished by applying mechanical force to the soil at high moisture content. It may also be defined as the mechanical reduction of the apparent specific volume of soil. To a farmer, puddling is mixing soil with water to make it soft for transplanting and impervious to water. To put it simply, it is an act or method of making a puddle.

Source:

<https://ucanr.edu/repository/fileaccess.cfm?article=161112&p=KWHFMO#:~:text=Herbigation%20is%20an%20effective%20method%20of%20applying%20herbicides%20through%20irrigation,greater%20flexibility%20in%20herbigation%20programs.>

Q.30) With reference to Agreement on Fisheries Subsidies (AFS), consider the following statements:

- The agreement was recently concluded under the aegis of United Nations Conference on Trade and Development (UNCTAD).
- Under the agreement a special transition period of 25 years is provided to the developing countries.
- The Agreement prohibits providing subsidies for fishing on high seas, if they result in Illegal, Unreported and Unregulated (IUU) fishing.

Which of the statements given above is/are correct?

- 1 and 2 only
- 3 only
- 2 and 3 only
- 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. The Agreement on Fisheries Subsidies (Agreement) agreed at the recently concluded World Trade Organization (WTO) Ministerial meeting will prohibit subsidies from being provided for Illegal, Unreported and Unregulated (IUU) fishing and overfished stocks.

Statement 2 is incorrect: Under the Special and Differential Treatment (S&DT), Developing Countries and Least Developed Countries (LDCs) have been allowed a transition period of two years (not 25 years) from the date of entry into force of this Agreement.

Statement 3 is correct: The Agreement also prohibits providing subsidies for fishing on high seas, which are outside the jurisdiction of coastal countries and Regional Fisheries Management Organizations/ Arrangements (RFMO/As).

As per the Agreement, no prohibition has been imposed on a WTO Member regarding granting or maintaining subsidy to its vessel or operator as long as it is not carrying out IUU. Similarly, no prohibition on providing subsidies has been imposed for fishing regarding overfished stocks as long as such subsidies are implemented to rebuild the stock to a biologically sustainable level.

Source: <https://pib.gov.in/PressReleasePage.aspx?PRID=1843952>

Q.31) Consider the following statements regarding methods of cropping in agriculture:

1. Relay cropping is a method of multiple cropping where one crop is seeded into a standing second crop well before harvesting of second crop.
2. Strip intercropping strategy is most widely used in growing tomatoes, eggplants and potatoes together.
3. Intercropping mechanism requires that different types of plants are grown in the same space at the same time.

Which of the statement/s given above is/are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Climate change, soil degradation, and depletion of natural resources are becoming the most prominent challenges for crop productivity and environmental sustainability in modern agriculture. In the scenario of conventional farming system, limited chances are available to cope with these issues which are discussed below:

Statement 1 is correct: Relay cropping is a method of multiple cropping where one crop is seeded into standing second crop well before harvesting of second crop. Relay cropping may solve a number of conflicts such as inefficient use of available resources, controversies in sowing time, fertilizer application, and soil degradation. Relay cropping is a complex suite of different resource-efficient technologies, which possesses the capability to improve soil quality, to increase net return, to increase land equivalent ratio, and to control the weeds and pest infestation.

Statement 2 is incorrect: Strip intercropping is a more industrialized version of intercropping with rows of individual crops big enough to be harvested with machinery.

Tomatoes, eggplants and potatoes are all from the nightshade family, so they don't work well for intercropping. For one, they use similar nutrients. As well, they attract similar pests and are susceptible to similar diseases. Intercropping with things from the same family is asking for nutrient depletion while promoting troublesome insects and illnesses through a lesser version of, though not far off from, mono-cropping.

Statement 3 is correct: Intercropping requires that different types of plants are grown in the same space at the same time while crop rotation is the concept of growing different types of plants in the same space at different times.

Source:

<https://pubmed.ncbi.nlm.nih.gov/28083744/#:~:text=Relay%20cropping%20is%20a%20method,before%20harvesting%20of%20second%20crop.>

<https://www.permaculturenews.org/2016/08/12/intercropping-what-it-is-what-it-isnt-and-why-we-do-it/>

Q.32) Which among the following can be considered as advantages of drip irrigation?

1. It directly targets the root zone as a result of which water isn't wasted on areas that won't benefit the plant.
2. Drip irrigation allows the rows between plants to remain dry and thereby reducing weed growth.
3. It prevents clogging of soil particles in the pipelines which otherwise would prevent the smooth flow of water.
4. Drip irrigation is aimed at reducing the amount of runoff which in turn reduces soil erosion.

Which of the statements given above are correct?

- a) 2 and 3 only
- b) 1, 2 and 4 only
- c) 1, 3 and 4 only
- d) 1, 2, 3 and 4

Ans) b

Exp) Option b is the correct answer.

Drip irrigation is an irrigation system that emits small drops of water directly to the root zone of the plant. Advantages of drip irrigation are discussed below:

Statement 1 is correct: Reduced Water Usage – By directly targeting the root zone, water isn't wasted on areas that won't benefit the plant.

Statement 2 is correct: Reduces Weeds – Allows the rows between plants to remain dry, improving access and reducing weed growth.

Statement 3 is incorrect: Perhaps the biggest disadvantage of drip irrigation is that the small holes along the drip lines can get clogged. Clogging is extra likely if water contains iron. If not properly maintained, drip line holes can clog and prevent the flow of water.

Statement 4 is correct: Prevents Soil Erosion – Drip irrigation is a gentle, steady drip and reduces the amount of runoff, therefore reducing soil erosion.

Source: <https://plantforsuccess.com/advantages-drip-irrigation/>

<https://web.uri.edu/safewater/protecting-water-quality-at-home/sustainable-landscaping/drip-irrigation/>

Q.33) Consider the following statements regarding e-National Agriculture Market (e-NAM) Scheme:

1. e-NAM is a flagship initiative of the NITI Aayog to create a unified national market for agricultural commodities.
2. It aims to provide quality testing infrastructure in every market to enable informed bidding by buyers.
3. Under e- NAM, a single license is issued by the State governments for traders which is valid across all markets in a state.

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 3 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is incorrect: National Agriculture Market (eNAM) is a pan-India electronic trading portal which networks the existing APMC mandis to create a unified national market for agricultural commodities. **Small Farmers Agribusiness Consortium (SFAC) is the lead agency for implementing eNAM under the aegis of Ministry of Agriculture and Farmers' Welfare, Government of India.** Its vision is to promote uniformity in agriculture marketing by streamlining of procedures across the integrated markets, removing information asymmetry between buyers and sellers and promoting real time price discovery based on actual demand and supply.

Statement 2 is correct: One of the objectives of the e-NAM is **–Harmonisation of quality standards of agricultural produce and provision for assaying (quality testing) infrastructure in every market to enable informed bidding by buyers.** Common tradable parameters have so far been developed for 69 commodities.

Statement 3 is correct: e- NAM includes–

- 1) Liberal licensing of traders / buyers and commission agents by State authorities without any pre-condition of physical presence or possession of shop /premises in the market yard.
- 2) **Single license issued by state governments for traders valid is across all markets in the State.**

Source: https://enam.gov.in/NAMV2/home/about_nam.html#

Q.34) With reference to Peace Clause in the WTO Agreement on Agriculture, consider the following statements:

1. The Peace Clause was introduced in 2014 as part of the Bali Package
2. The Peace Clause permits developing nations to maintain subsidies for their agricultural sector, even if such subsidies are deemed to be trade-distorting.
3. So far India has not invoked the peace clause.

Which of the statements given above is/are correct?

- a) 1 and 3 only
- b) 2 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

The Peace Clause in the WTO Agreement on Agriculture allows developing countries to provide domestic agricultural subsidies that exceed the limits set by the Agreement. The Clause was introduced in 2014 as part of the Bali Package, which included commitments to eliminate export subsidies and improve market access for least developed countries.

Statement 1 is correct: The Peace Clause was indeed introduced in 2014 as part of the Bali Package, which was a set of decisions made at the 9th WTO Ministerial Conference in Bali, Indonesia. The Peace Clause provides protection to developing countries against any legal challenge to their food security programmes, which may breach the WTO's limits on agricultural subsidies, until a permanent solution to this issue is found.

Statement 2 is correct: The Peace clause allows developing countries to continue to provide subsidies to their agricultural sectors, even if they are trade-distorting, without facing legal challenges under WTO dispute settlement. The Peace Clause is in effect until a permanent solution is found for the issue of public stockholding for food security purposes.

Statement 3 is incorrect: India has invoked the Peace Clause for the third time in 2022, due to its subsidies for rice farmers exceeding the ceiling of 10% allowed under WTO rules. The first invocation was in 2020 for the year 2018-19 when the support offered to rice farmers was above the allowed limit. The second invocation was in 2021 when the support exceeded the ceiling again.

Source: <https://www.thehindubusinessline.com/opinion/all-you-wanted-to-know-about-peace-clause/article64539923.ece>

https://www.wto.org/english/thewto_e/minist_e/mc11_e/briefing_notes_e/bfagric_e.htm

Q.35) With reference the PM KUSUM Scheme, consider the following statements:

1. It is a flagship scheme of Ministry of New and Renewable Energy
2. One of its aims is to install 20 lakh standalone Solar Powered Agriculture Pumps.
3. Under this scheme, a subsidy of up to 90% of the cost of installing a solar pump is provided by the central government to the farmer.

Which of the statements given above is/are correct?

- a) 1 only
- b) 1 and 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

PM-KUSUM (Pradhan Mantri Kisan Urja Suraksha evam Utthaan Mahabhiyan) Scheme is aimed at ensuring energy security for farmers in India, along with honoring India's commitment to increase the share of installed capacity of electric power from non-fossil-fuel sources to 40% by 2030 as part of Intended Nationally Determined Contributions (INDCs).

Statement 1 is correct: PM KUSUM Scheme is a flagship scheme of the Ministry of New and Renewable Energy (MNRE). The scheme was launched in 2019 to promote the use of solar power among farmers.

Statement 2 is correct: The PM KUSUM Scheme aims to install 20 lakh standalone solar-powered agriculture pumps. The scheme also encourages the use of barren and uncultivable land for setting up solar power plants.

Statement 3 is incorrect: The central government provides financial assistance of 30% of the benchmark cost or the tender cost, whichever is lower, for the installation of solar pumps. The state government provides a subsidy of 30%. **The remaining 40% of the cost is borne by the farmer.** Northeastern States, Sikkim, Jammu & Kashmir, Himachal Pradesh, Uttarakhand, Lakshadweep, and Andaman & Nicobar Islands, a higher financial assistance of 50% of the benchmark cost or the tender cost, whichever is lower, is provided for the installation of solar pumps. The state government provides a subsidy of 30%. The remaining 20% of the cost is borne by the farmer.

Source: <https://pmkusum.mnre.gov.in/landing-about.html>

Q.36) With reference to National Fisheries Development Board (NFDB), consider the following statements:

1. It is an autonomous organization under the Ministry of Agriculture.
2. NFDB focuses on training and empowering women in the fisheries sector to generate substantial employment.
3. NFDB is the implementing agency of Fisheries and Aquaculture Infrastructural Development Fund (FIDF)

Which of the statements given above are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

National Fisheries Development Board (NFDB) was established in 2006 to enhance fish production and productivity in the country and coordinate fishery development in an integrated and holistic manner.

Statement 1 is incorrect: The National Fisheries Development Board (NFDB) is an autonomous organization under the Department of Fisheries, Ministry of Fisheries, Animal Husbandry and Dairying, Government of India.

Statement 2 is correct: NFDB aims to provide technical guidance, marketing assistance, and financial support to fisheries-related activities. It also focuses on promoting women's participation in the fisheries sector to generate substantial employment opportunities.

Statement 3 is correct: NFDB is the implementing agency of the Fisheries and Aquaculture Infrastructural Development Fund (FIDF). The fund aims to create fisheries infrastructure facilities in both the marine and inland fisheries sectors to achieve a target of 15 million tonnes of fish production by 2020 under the Blue Revolution. Additionally, the FIDF seeks to achieve a sustainable growth rate of 8-9% to increase the country's fish production to around 20 million tonnes by 2022-23.

Source: <https://nfdb.gov.in/welcome/about> <https://www.fidf.in/>

Q.37) Recently, the Scientists from the Chinese Academy of Agricultural Sciences have shown how a Gene Modulation can boost grain yields and shorten the growth duration of rice. In this context, which of the following options best describes 'Gene Modulation'?

- a) The process of transferring genes from one organism to another
- b) The process of altering gene expression or activity within an organism
- c) The process of permanently modifying the genetic code of an organism
- d) The process of controlling the physical location of genes within an organism.

Ans) b

Exp) Option b is the correct answer.

Gene modulation is the process of temporarily altering gene expression levels without making heritable changes to the underlying cellular DNA. This can be achieved through silencing or increasing gene expression levels using techniques such as RNAi, CRISPRi, cDNA, ORF or CRISPRa. It is not a genetic modification (GM) and neither the result of a transgenic plant, carrying elements from another donor.

Source: <https://www.thehindu.com/sci-tech/science/improving-rice-yield-with-an-additional-gene/article65779699.ece> <https://horizondiscovery.com/en/gene-modulation#:~:text=Gene%20modulation%20refers%20to%20the,to%20the%20underlying%20cellular%20DNA.>

Q.38) Consider the following statements regarding conditions required for rubber cultivation in India:

1. Tropical climate with annual rainfall of 2000 – 4500 mm is suited for cultivation.
2. Minimum and maximum temperature ideal for rubber cultivation ranges from 25 to 34°C with high relative humidity.
3. Rubber cultivation needs high elaborated flat land where there is no possibility of water stagnation.

Which of the statements given above is/ are correct?

- a) 2 only
- b) 1 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

More than 36,000 articles ranging from giant Truck tyres to small bushes are manufactured from rubber. The commercial source of natural rubber is *Hevea brasiliensis*, which is introduced in India in the year 1902 and planted in Kerala. Even though it is a tropical tree, it grows well in the soils of N.E. states.

Statement 1 is correct: Rubber requires deep and lateritic fertile soil with an acidic pH of 4.5 to 6.0 and rich in phosphorus. **Tropical climate with annual rainfall of 2000 – 4500 mm is suited for rubber cultivation.**

Statement 2 is correct: Minimum and maximum temperature for rubber cultivation should be ranged from 25 to 34°C with **80 % relative humidity is ideal for cultivation.** Regions prone to heavy winds should be avoided. **High humidity is suitable and required in the rubber cultivation.**

Statement 3 is correct: Rubber is grown in **literate or loamy soil, mostly in slope and undulated land or slightly high elaborated flat land** where there is no possibility of water stagnation, and having well drainage facilities. Rubber plants can be successfully grown up to the elevation of 450 meters from mean sea level.

Source:

<https://megsoil.gov.in/mccdb/rubbergrowing.html#:~:text=Rubber%20is%20grown%20in%20literate,and%20having%20well%20drainage%20facilities.>

https://agritech.tnau.ac.in/horticulture/horti_plantation%20crops_rubber.html#:~:text=Tropical%20climate%20with%20annual%20rainfall,heavy%20winds%20should%20be%20avoided.

Q.39) Consider the following statements regarding fair and remunerative price (FRP):

1. It is the price declared by the government and paid by mill owners to farmers for the sugarcane procured from them.
2. The FRP is directly proportional to the sugar recovery ratio.
3. The payment of FRP across the country is governed by Essential Commodities Act, 1955.

Which of the statement/s given above is/ are correct?

- a) 1 only
- b) 2 and 3 only
- c) 1 and 2 only
- d) 1, 2 and 3

Ans) c

Exp) Option c is the correct answer.

Statement 1 is correct: Fair and remunerative price (FRP) is the price declared by the government, which mills are legally bound to pay to farmers for the cane procured from them.

Statement 2 is correct: **The FRP is based on the recovery of sugar from the cane.** Sugar recovery is the ratio between sugar produced versus cane crushed, expressed as a percentage. The higher the recovery, the higher is the FRP, and higher is the sugar produced. The FRP is directly proportional to the sugar recovery ratio.

Statement 3 is incorrect: **The payment of FRP across the country is governed by The Sugarcane Control order, 1966 (and not the Essential Commodities Act, 1955)** which mandates payment within 14 days of the

date of delivery of the cane. Mills have the option of signing an agreement with farmers, which would allow them to pay the FRP in installments.

Delays in payment can attract an interest up to 15 per cent per annum, and the sugar commissioner can recover unpaid FRP as dues in revenue recovery by attaching properties of the mills. Assured payment is one of the major reasons why cane is a popular crop with farmers.

Source: <https://indianexpress.com/article/explained/explained-maharashtras-sugarcane-frp-changes-farmers-7787466//>

Q.40) With reference the Lumpy Skin Disease, consider the following statements:

1. The disease is caused by protozoa belonging to the Leishmania family.
2. This disease can spread from animals to humans.
3. Currently, there is no specific treatment to completely cure the Lumpy Skin Disease.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 3 only
- d) 1 and 3 only

Ans) c

Exp) Option c is the correct answer.

Lumpy Skin Disease is caused by a contagious virus called the lumpy skin disease virus, which is spread by vectors like mosquitoes, biting flies, and ticks. It affects animals like cows and water buffaloes and is not spread to humans.

Statement 1 is incorrect: Lumpy Skin Disease is a viral infection caused by the Lumpy Skin Disease Virus (LSDV), which belongs to the family Poxviridae.

Statement 2 is incorrect: Lumpy Skin Disease is not a zoonotic virus, meaning it does not spread to humans. It is primarily a disease of cattle, water buffalo, and other ruminants.

Statement 3 is correct: Currently, there is no specific treatment for Lumpy Skin Disease. Treatment is generally supportive, and affected animals are typically quarantined and given symptomatic care to relieve their symptoms.

Source: <https://www.thehindu.com/news/national/explained-what-is-the-lumpy-skin-disease-affecting-cattle-in-india-what-are-its-economic-implications-and-does-it-affect-milk-for-consumption/article65911590.ece>

<https://www.nadis.org.uk/disease-a-z/cattle/lumpy-skin-disease/#:~:text=Treatment,most%20effective%20means%20of%20control.>

Q.41) Which of the following principles/practices are followed in Conservation Agriculture?

1. Direct seeding.
2. Crop rotation.
3. Covering soil with crop residues.

Select the correct answer using the code given below:

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Conservation Agriculture (CA) is a farming system that can prevent losses of arable land while regenerating degraded lands. It promotes maintenance of a permanent soil cover, minimum soil disturbance, and diversification of plant species.

Statement 1 is correct: Direct seeding involves growing crops without mechanical seedbed preparation and with minimal soil disturbance since the harvest of the previous crop. The term direct seeding is understood in CA systems as synonymous with no-till farming, zero tillage, no-tillage, direct drilling, etc.

Statement 2 is correct: Crop rotation is an important practice followed in the conservation agriculture. A well-designed crop rotation promotes good soil structure, fosters a diverse range of soil flora and fauna that contributes to nutrient cycling and improved plant nutrition, and helps to prevent pests and diseases.

Statement 3 is correct: Keeping the soil covered is a fundamental principle of CA. Crop residues are left on the soil surface, but cover crops may be needed if the gap is too long between harvesting one crop and establishing the next. Cover crops improve the stability of the CA system, not only on the improvement of soil properties but also for their capacity to promote an increased biodiversity in the agro-ecosystem.

Source: <https://www.fao.org/conservation-agriculture/en/>

<https://www.frontiersin.org/articles/10.3389/fsufs.2020.00031/full>

Q.42) Which of the following loans provided by the banks can be considered as part of Priority sector lending?

1. Loans provided under Kisan Credit Card scheme.
2. Loans to small and marginal farmers for purchase of land for agricultural purposes.
3. Loans to farmers for installation of stand-alone Solar Agriculture Pumps
4. Loans to distressed farmers indebted to non-institutional lenders.

Select the correct answer using the code given below:

- a) 2 and 4 only
- b) 1, 3, and 4 only
- c) 1 and 3 only
- d) 1, 2, 3, and 4

Ans) d

Exp) Option d is the correct answer.

Priority Sector means those sectors which the Government of India and Reserve Bank of India consider as important for the development of the basic needs of the country and are to be given priority over other sectors. The banks are mandated to encourage the growth of such sectors with adequate and timely credit. Under the farm credit, the lending by banks which comes under Priority sector lending are as follows:

- 1) **Loans to farmers under the Kisan Credit Card Scheme. Hence Option 1 is correct.**
- 2) Crop loans to farmers, which will include traditional/non-traditional plantations and horticulture, and loans for allied activities.
- 3) **Loans to small and marginal farmers for purchase of land for agricultural purposes. Hence Option 2 is correct.**
- 4) Medium and long-term loans to farmers for agriculture and allied activities.
- 5) Loans to farmers for pre and post-harvest activities, viz., spraying, weeding, harvesting, sorting, grading and transporting of their own farm produce
- 6) **Loans to farmers for installation of stand-alone Solar Agriculture Pumps and for solarisation of grid connected Agriculture Pumps. Hence Option 3 is correct.**
- 7) **Loans to distressed farmers indebted to non-institutional lenders. Hence Option 4 is correct.**
- 8) Loans to farmers for installation of solar power plants on barren/fallow land or in stilt fashion on agriculture land owned by farmer, etc.

Source: <https://vikaspedia.in/agriculture/agri-credit/credit-institutions/priority-sector-lending>

https://www.rbi.org.in/Scripts/BS_ViewMasDirections.aspx?id=11959

Q.43) Consider the following statements about the Pradhan Mantri Fasal Bima Yojana (PMFBY):

1. It is mandatory for the farmers, who avail loans from the institutional sources, to subscribe PMFBY.
2. If an insured area is prevented from sowing due to adverse weather conditions, the policy will be terminated without paying any insured amount to the farmer.
3. It provides insurance coverage against crop loss due to identified localized risks like hailstorms and landslides.

Which of the above given statements is/are correct?

- a) 1 and 2 only
- b) 1 and 3 only
- c) 3 only
- d) 2, and 3 only

Ans) c

Exp) Option c is the correct answer.

Pradhan Mantri Fasal Bima Yojana was launched in 2016 and is being administered by the Ministry of Agriculture and Farmers Welfare. The scheme provides for financial support to farmers suffering crop loss/damage arising out of unforeseen events. It Stabilizes the income of farmers to ensure their continuance in farming. It encourages farmers to adopt innovative and modern agricultural practices.

Statement 1 is incorrect: The Pradhan Mantri Fasal Bima Yojana was mandatory for loanee farmers till 2020, but the Central Government made it optional for all farmers from 2020.

Statement 2 is incorrect: If an insured area is prevented from sowing / planting / germination due to deficit rainfall or adverse seasonal/weather conditions. **25% of the sum insured will be paid and the Policy will be terminated.**

Statement 3 is correct: The scheme covers loss/damage to notified insured crops resulting from occurrence of identified localized risks of Hailstorm, Landslide, Inundation, Cloud burst and Natural fire due to lightening affecting isolated farms in the notified area. The States may consider providing add-on coverage for crop loss due to attack by wild animals wherever the risk is perceived to be substantial and is identifiable.

Q.44) Which of the following are the applications of Nano technology in Agriculture?

1. Identification of diseases in Plants.
2. Applying pesticides and herbicides in Field.
3. To treat wastewater in agricultural fields.
4. Facilitating gene sequencing of plants.

Select the correct answer using the code given below:

- a) 1 and 4
- b) 2, 3, and 4 only
- c) 1, 2, and 3 only
- d) 1, 2, 3 and 4

Ans) d

Exp) Option d is the correct answer.

Nanotechnology refers to the branch of science and engineering devoted to designing, producing, and using structures, devices, and systems by manipulating atoms and molecules at nanoscale, i.e. having one or more dimensions of the order of 100 nanometres (100 millionth of a millimetre) or less.

Statement 1 is correct: Nanotechnology like **nano sensors can be used in crop protection for the identification of diseases** and residues of agrochemicals in the fields.

Statement 2 is correct: Nanoparticles can be used as a delivery mechanism for pesticides and herbicides, increasing their effectiveness while reducing the amount needed. This can result in reduced environmental impact and lower costs for farmers.

Statement 3 is correct: **Nanotechnology applications can be used for filtering wastewaters in agricultural fields.** This will remove salts and other micropollutants from these waters. This provides sustainability of agricultural production using irrigation with treated wastewater.

Statement 4 is correct: Nanotechnologies can be applied in a variety of contexts, including genome sequencing, targeted resequencing and discovery of transcription factor binding sites, noncoding RNA expression profiling, and molecular diagnostics **The use of nanotechnology facilitated gene sequencing in plants that contributed to the improved identification and use of plant trait means.**

Q.45) Consider the following statements about the Primary Agricultural Credit Societies (PACS):

1. PACS in a state are registered under the Co-operative Societies Act of the respective state.
2. Only one Primary Agricultural Credit Society is allowed per village.
3. PACS may also provide marketing facilities that could enhance the sales of farmer's agricultural products.

Which of the above given Statements is/are correct?

- a) 2 and 3 only
- b) 1 and 3 only
- c) 1 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

The Union Budget has announced Rs 2,516 crore for computerization of 63,000 Primary Agricultural Credit Societies (PACS) over the next five years, with the aim of bringing greater transparency and accountability in their operations and enabling them to diversify their business and undertaking more activities.

Statement 1 is correct. PACS are registered under the Co-operative Societies Act of the respective state.

PACS serve as the last link in a three-tier cooperative credit structure. Credit from the SCBs is transferred to the district central cooperative banks (DCCBs), that operate at the district level. The DCCBs work with PACS, which deal directly with farmers.

Statement 2 is incorrect. **A village can have multiple PACS.** In India there are about 99000 PACS and they have a member base of 13 crore. Since these are cooperative bodies, individual farmers are members of the PACS, and office-bearers are elected from within them.

Statement 3 is correct. PACS helps its members by providing marketing facilities that could enhance the sale of their agricultural products in the market at reasonable prices.

SFG 2023 | LEVEL 2 | Test #50 – Solutions |

Q.46) Agriculture Census forms part of a broader system of collection of Agricultural Statistics in India. Consider the following statements with reference to the Agriculture Census in India.

1. Agriculture Census in India is conducted by the National Sample Survey Office (NSSO).
2. They are based on the broad guidelines of the World Census of Agriculture.
3. The agriculture census is conducted every ten years along with the population census.

Which of the above given Statements is/are correct?

- a) 1 and 2 Only
- b) 2 Only
- c) 1 Only
- d) 2 and 3 only

Ans) b

Exp) Option b is the correct answer.

Recognizing the importance of agriculture sector in the economy, the Department of Agriculture & Farmers Welfare has been implementing the Agriculture Census Scheme since 1970-71.

Statement 1 is incorrect. The **Department of Agriculture and Farmers Welfare**, Ministry of Agriculture & Farmers Welfare, Government of India conducts Agriculture Censuses in collaboration with the States and Union Territories.

Statement 2 is correct and statement 3 is incorrect. **Agriculture Census in India is conducted at an interval of five years following broad guidelines of decennial World Census of Agriculture (WCA) evolved by Food and Agriculture Organization (FAO) of the United Nations.** So far, ten Agriculture Censuses have been conducted in the country since 1970-71 and the current Agriculture Census with reference year 2021-22 is eleventh in the series. The Eleventh Agriculture Census (2021-22) was launched by the Hon'ble Union Minister of Agriculture and Farmers Welfare on 28th July 2022 in New Delhi.

Q.47) With reference the Essential Commodities Act, consider the following statements:

1. Commodities are considered as essential commodities only if their price has been doubled within a period of three months.
2. Stock limits shall be imposed on all the commodities identified as essential commodities.
3. Only central government can impose stock limits on specified commodities.

Which of the statements given above are **incorrect**?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

Due to the increased Tur dal prices, the Centre has recently invoked the Essential Commodities Act of 1955.

Statement 1 is incorrect: There is no specific definition of essential commodities in the Essential Commodities Act, 1955. Section 2(A) states that an “essential commodity” means a commodity specified in

the Schedule of the Act. The Centre, if it is satisfied that it is necessary to do so in the public interest, can notify an item as essential, in consultation with state governments.

Statement 2 is incorrect: Not all essential commodities are covered under the stock limits and hoarding.

For the purpose of terming a stock as hoarding the State Government has to issue stock limits orders under the EC Act. Any quantity of a commodity covered in the order kept in violation of that order is termed as hoarding. **If no stock limits are imposed**, there is no question of hoarding in that commodity.

Statement 3 is incorrect: The Essential Commodities Act 1955 enabled the state governments to impose stock limits and restrict movement of essential commodities. Whenever there are pressing reasons to arrest unfair price rise of any essential commodity, the Union Government empowers State Governments and Union Territories, by way of notifying orders under the EC Act, to decide stock limits and notify after approval of the Union Government.

Source: <https://consumeraffairs.nic.in/organisation-and-units/division/essential-commodity-regulation-and-enforcement-ecr-and-e/faqs>

<https://theprint.in/opinion/of-the-three-farm-laws-essential-commodities-act>

Q.48) Consider the following statements about the e-National warehouse receipts (e-NWR), that is often seen in the news:

1. e-NWRs do not have time validity.
2. e-NWRs can be traded through off-market or on-market in Commodity Exchange platforms.
3. An e-NWR can be transferred to another party either fully or in part.
4. An e-NWR can be auctioned under certain conditions like spoilage of the commodity in the warehouse.

Which of the above given Statements are correct?

- a) 1, 2 and 3 Only
- b) 1 and 2 Only
- c) 2, 3 and 4 Only
- d) 2 and 3 Only

Ans) c

Exp) Option c is the correct answer.

The negotiable warehouse receipt (NWR) system was launched in 2011 allowing the transfer of ownership of a commodity stored in a warehouse without having to deliver it physically.

These receipts are issued in negotiable form, making them eligible as collateral.

The eNWR was launched in 2018.

Salient features of e-NWR:

- 1) An e-NWR is available only in electronic form.
- 2) An **e-NWR has a time validity that is co-terminus with the shelf-life of the commodity** or withdrawal of the commodity fully from the warehouse, after which it expires; **Hence Statement 1 is incorrect**
- 3) The single source of information for the e-NWR is the repository system where e-NWR is issued by registered warehouses. Confidentiality, integrity and availability of the e-NWR information is provided by the Repository system.
- 4) All e-NWRs can be traded through off-market or on-market in Commodity Exchanges platforms. **Hence Statement 2 is correct.**
- 5) e-NWR can be transferred fully or in part. **Hence Statement 3 is correct.**
- 6) An e-NWR can be auctioned under certain conditions such as loan not repaid, on expiry and delivery not taken, and on likely damage or spoilage of the commodity in the warehouse. **Hence Statement 4 is correct.**

Source: <https://www.google.com/url?sa=t&source=web&rct=j&url=https://vikaspedia.in/agriculture/ic-t-applications-in-agriculture/electronic-negotiable-warehouse-receipt&ved=2ahUKEwiLgY2ugMP-AhXksFYBHdvcAPwQFnoECFkQAQ&usg=AOvVaw3zb6EY7cMZRvF22pM8gS-t>

Q.49) With reference to the land reforms in India, consider the following statements:

1. In some states Land Ceiling Acts imposed an upper limit on the amount of land that can be owned by an individual.
2. More productive land has a low ceiling limit whereas unproductive land has a higher ceiling limit.
3. In some states, the Land Ceiling Acts allowed a separate share for unmarried women.

Which of the statements given above is/are correct?

- a) 1 and 2 only
- b) 2 and 3 only
- c) 1 and 3 only
- d) 1, 2 and 3

Ans) d

Exp) Option d is the correct answer.

According to the Land Ceilings Acts, the state was supposed to identify and take possession of surplus land (above the ceiling limit) held by each household, and redistributes it to landless families and households in other specified categories, such as SCs and STs.

Statement 1 is correct: In most states initially, the ceilings were imposed on individual and not family holdings, enabling landowners to divide up their holdings 'notionally' in the names of relatives merely to avoid the ceiling. Following the CM conference 1972 (which recommended family as the unit for ceiling) most of the states implemented family as the unit for land ceiling.

Statement 2 is correct: The land ceiling varies from region to region, depending on the kind of land, its productivity, and other such factors. **Very productive land has a low ceiling** while unproductive **dry land has a higher ceiling limit.**

Statement 3 is correct: There were many loopholes in the Land Ceilings Act through which most landowners were able to escape from having their surplus land taken over by the state.

- 1) Landowners managed to divide the land among relatives and others, including servants, in so-called 'benami transfers'.
- 2) Some rich farmers actually divorced their wives in order to avoid the provisions of the **Land Ceiling Act**, which **allowed a separate share for unmarried women but not for wives.**

Q.50) In India, concerns are arising about the use of chemicals fipronil and atrazine. In this context, these chemicals are used as:

- a) pesticides
- b) food preservatives
- c) artificial fruit-ripening agents
- d) moisturizing agents in cosmetics

Ans) a

Exp) Option a is the correct answer.

According to a recent report by the Pesticide Action Network (PAN) safety of agricultural produce and environmental contamination is at risk due to the **rampant use of four highly hazardous pesticides (HHP)**. Unapproved and unauthorised use of the agrochemicals – chlorpyrifos, **fipronil**, **atrazine** and paraquat – was found across the country.

Central Insecticides Board and Registration Committee, India's pesticides regulator, has approved specific uses of agrochemicals. But according to the report, state agriculture departments and industries recommended the four chemicals for more crops than their approved use.

Source: <https://www.downtoearth.org.in/news/governance/unauthorised-use-of-4-highly-hazardous-pesticides-claims-report-84326>

Direction for the following six (6) items:

Read the following **five passages** and answer the items that follow the passages. Your answers to these items should be based on the passages only:

Passage-1

Time and space are not things-in-themselves, but rather the very forms of our intuition, within which all objects of experience necessarily appear. Time and space are therefore a priori conditions of all possible experience, and are independent of any particular objects that may be presented to us. They are also universally and necessarily valid since they are the necessary conditions of all possible judgments about objects. While we cannot know things in themselves, we can know that they must necessarily conform to the a priori forms of our intuition and that all knowledge of objects is therefore dependent on the structure of our own minds.

Q.1) What is the *most logical corollary* of the above-given passage?

- a) Knowledge of objects is inherently objective and independent of human intuition.
- b) Time and space are fundamental aspects of the external world, separate from our perception.
- c) Our understanding of objects is limited by the a priori forms of our intuition and the structure of our minds.
- d) We can gain direct knowledge of things in themselves without considering the role of our intuition.

Ans) c

Exp) Option c is the correct answer.

The passage argues that time and space are not things in themselves but are instead the forms of our intuition, within which all objects of experience necessarily appear. These forms are a priori conditions of all possible experiences and are independent of any specific objects presented to us. The passage also states that we cannot know things in themselves, but we can know that they must conform to the a priori forms of our intuition.

Passage-2

South-South economic relations are characterized by a complex interplay of power asymmetries, institutional constraints, and diverse interests and values, which shape the patterns and outcomes of cooperation and competition among developing countries. These dynamics are influenced by a range of global and domestic factors, including the changing balance of power in the international system, the emergence of new economic actors and institutions, and the diversity of political, social, and cultural contexts in the Global South. At the same time, South-South economic relations are also characterized by a high degree of resilience and adaptability, as countries seek to navigate and respond to the challenges and opportunities of globalization and regional integration. This resilience is reflected in the growing diversity and sophistication of South-South economic cooperation, which encompasses a range of sectors and modalities, including trade, investment, finance, technology transfer, and knowledge sharing. However, the realization of the full potential of South-South economic cooperation is contingent on the development of more effective institutional frameworks and mechanisms for managing and regulating these relations, as well as on the promotion of greater inclusivity, transparency, and accountability in decision-making processes. This requires a deeper understanding of the underlying power dynamics and interests at play, as well as a commitment to promoting a more equitable and sustainable form of economic development that benefits all members of the Global South.

Q.2) Consider the following assumptions:

1. South-South cooperation is able to withstand various dynamic challenges.
2. South-South economic relations are always positive and beneficial for all countries involved.

Which of the above-given assumptions is/are valid?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: The first assumption is valid based on the statement "South-South economic relations are also characterized by a high degree of resilience and adaptability." The passage states that South-South cooperation is able to withstand various dynamic challenges.

Statement 2 is incorrect: The passage does not state that South-South economic relations are always positive and beneficial for all countries involved. On the contrary, the passage mentions power asymmetries and institutional constraints that can influence the outcomes of cooperation and competition among developing countries.

Q.3) South-South economic cooperation can be improved by:

1. Removing the balance of power in the international system
2. Including more members in the decision-making process
3. Signing Free Trade Agreements with developed countries

Which of the above given statements is/are correct?

- a) 1 only
- b) 2 only
- c) 1 and 2 only
- d) 1 and 3 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: The passage states that South-South economic relations are influenced by the changing in the international system. Thus, it needs to be more equitable. The passage does not argue for removing balance of power in the international system.

Statement 2 is correct: The passage states that the realization of the full potential of South-South economic cooperation is contingent on the development of more effective institutional frameworks and mechanisms for managing and regulating these relations, as well as on the promotion of greater inclusivity, transparency, and accountability in decision-making processes.

Statement 3 is incorrect: The passage does not mention that signing Free Trade Agreements with Developed Countries would improve South-South economic cooperation. Instead, the passage emphasizes the growing diversity and sophistication of South-South economic cooperation, which encompasses a range of sectors and modalities, including trade, investment, finance, technology transfer, and knowledge sharing.

Passage-3

The problem of the theory of distinction is to account for the fact that the social world, and particularly the cultural universe, presents itself as a hierarchically organized system of distinctive signs, invested with properties of difference and with a relation of opposition between the poles that they mark. The

cultural arbitrariness of the distinctions which inform the social structures of perception and appreciation is not a reason for denying their efficacy; on the contrary, it is precise because the classification principles that inform the distribution of cultural capital are arbitrary that they can function as a basis of domination, by securing recognition and submission, and as a means of symbolic violence, by legitimating and naturalizing the social order.

Q.4) What is the *key idea* of the author as given in the above passage?

- The efficacy of social hierarchies depends on the inherent differences between individuals.
- Cultural distinctions and hierarchies are arbitrary, which allows them to serve as a basis for domination.
- The cultural universe is inherently egalitarian, but social structures impose artificial distinctions.
- Social structures of perception and appreciation are based on meritocracy and natural differences.

Ans) b

Exp) Option b is the correct answer.

The passage discusses the theory of distinction and its role in understanding the social world, particularly the cultural universe. It states that the cultural universe presents itself as a hierarchically organized system of distinctive signs, which are invested with properties of difference and opposition between poles. The passage emphasizes that the cultural arbitrariness of these distinctions does not deny their efficacy; instead, it's precisely because these classification principles are arbitrary that they can function as a basis of domination.

Passage-4

The state, in modern liberal democracy, is no longer an enemy to be contained but an instrument to be used. This implies a degree of trust between citizens and their government that does not exist in many parts of the world today. The problem of trust, however, is not just a matter of a government's being perceived as honest or effective; it is also a matter of that government being perceived as legitimate. Legitimacy is a function of the rightfulness of the political order itself, not just the effectiveness of the state. This is why democratization can have such a profound impact on political legitimacy. By allowing citizens to participate in the selection of their rulers, democracy confers legitimacy to a political order that had not previously existed.

Q.5) What is the most logical and rational inference that can be drawn from the passage?

- Trust between citizens and their government is solely dependent on the effectiveness of the state.
- Democracy is a necessary condition for political legitimacy.
- Political legitimacy can be enhanced through democratization.
- Trust between citizens and their government is primarily based on the state's honesty.

Ans) c

Exp) Option c is the correct answer.

The passage discusses the role of trust and legitimacy in modern liberal democracies. It states that trust between citizens and their government is not only about the government being perceived as honest or effective, but also about the legitimacy of the political order. The passage highlights that legitimacy is a function of the rightfulness of the political order itself, not just the effectiveness of the state. The passage then explains that democratization can have a profound impact on political legitimacy. By allowing citizens to participate in the selection of their rulers, democracy confers legitimacy on a political order that had not previously existed.

Passage-5

The press has always been a reflection of the national mood, and as the mood becomes increasingly apocalyptic, the press looks for ways to exploit that anxiety while simultaneously reinforcing it. The result is that we have created a news media that is sensation-driven, shallow, and prone to exaggeration, a media that focuses on celebrity gossip, scandals, and melodrama, rather than the critical issues of our time. In such a media environment, it is no surprise that we are unable to have meaningful discussions about the challenges facing our society. Instead, we are bombarded with trivialities, false controversies, and outright lies, leaving us ill-informed, distracted, and unable to make informed decisions about the future of our nation.

Q.6) Consider the following assumptions:

1. A sensation-driven media hinders meaningful discussions.
 2. The public is entirely passive and uncritical in its consumption of news.
- Which of the above given assumptions is/are valid as per the given passage?
- a) 1 only
 - b) 2 only
 - c) Both 1 and 2
 - d) Neither 1 nor 2

Ans) a

Exp) Option a is the correct answer.

Statement 1 is correct: The author suggests that the media's focus on sensationalism, gossip, and scandals prevents meaningful discussions about critical societal issues. This assumption is based on the idea that the media environment shapes the public discourse.

Statement 2 is incorrect: The author critiques the media environment and its impact on public discourse, but the passage does not assume that the public is entirely passive and uncritical in its consumption of news, nor does it mention whether they seek alternative sources of information. This assumption is not explicitly made, and it could be an oversimplification of the public's role in media consumption.

Q.7) Vikas walks 10 km towards south and then turns to the right. After walking 5 km he turns to the left and walks 5 km. Now in which direction is he from the starting place?

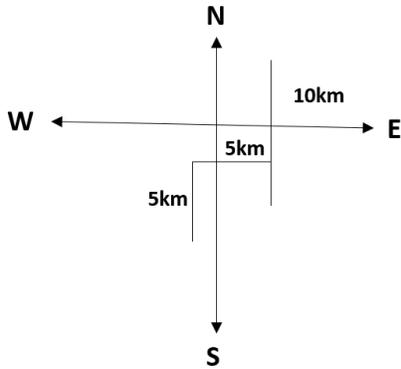

- a) West
- b) North-East
- c) South West
- d) North West

Ans) c

Exp) Option c is the correct answer.

We can draw following diagram:

We can see Vikas direction would be S-W

Q.8) In the following question, select the missing number from the given series,

34, 69, 140, 283, ?, 1145

- a) 430
- b) 525
- c) 320
- d) 570

Ans) d

Exp) Option d is the correct answer.

The series follows the following pattern:

The previous number $\times 2 + 1$

The previous number $\times 2 + 2$

The previous number $\times 2 + 3$ and so on

thus, we can see:

$$34 \times 2 + 1 = 69$$

$$69 \times 2 + 2 = 140$$

$$140 \times 2 + 3 = 283$$

$$283 \times 2 + 4 = 570$$

Q.9) Six persons Aman, Danish, Soniya, Sujit, Ranjan and Yashika are sitting around a circular table (facing away from the centre). Danish sits fourth to the right of Soniya. Yashika sits to the immediate right of Soniya. Two persons sit between Aman and Ranjan. If Ranjan is an immediate neighbour of Yashika then who sits to the immediate left of Aman?

- a) Ranjan
- b) Sujit
- c) Danish
- d) Soniya

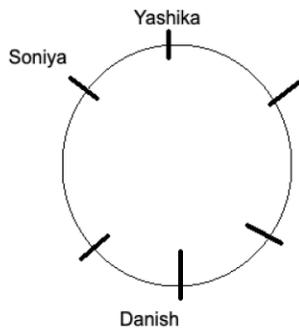

Ans) c

Exp) Option c is the correct answer.

Six persons: Aman, Danish, Soniya, Suit, Ranjan and Yashika

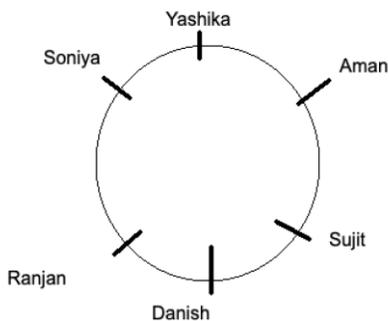

1) Danish sits fourth to the right of Soniya.

2) Yashika sits to the immediate right of Soniya.

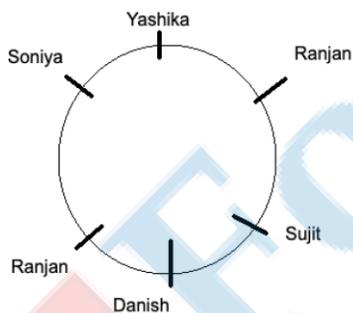

1) Two persons sits between Aman and Ranjan

Case 1:

Case 2:

The above two cases will be the final arrangement.

Now, If Ranjan is an immediate neighbour of Yashika we will consider case 2. And in that case Danish sits to the immediate left of Aman.

Hence, if Ranjan is an immediate neighbour of Yashika Danish sits to the immediate left of Aman.

Q.10) Find out the value of ? in the given matrix.

58	116	29
66	132	33
94	188	?

- a) 54
- b) 47
- c) 52
- d) 39

Ans) b

Exp) option b is the correct answer.

The logic follows here is :

From the first row:

58, 116, 29 so we can see that

$$116 : 2 = 58$$

$$58 : 2 = 29$$

From second row:

66, 132, 33 so we can see that:

$$132 : 2 = 66$$

$$66 : 2 = 33$$

From Third row:

94, 188, ?

$$188 : 2 = 94$$

$$94 : 2 = 47$$

Thus 47 is correct answer.

Q.11) Consider the following statements and conclusions:

Statements:

1. Some strawberries are bananas.
2. All bananas are avocados.
3. Some avocados are grapes.

Conclusion:

- I. Some grapes are bananas.
- II. Some avocados are strawberries.

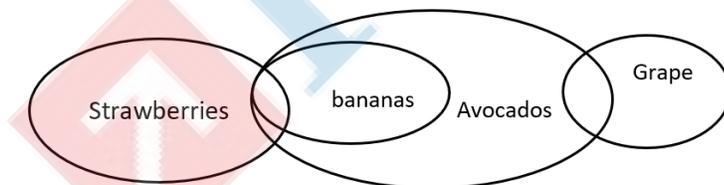

Select the correct answer using the code given below:

- a) Both Conclusion I and II follow
- b) Neither Conclusion I nor II follow
- c) Only Conclusion I follows
- d) Only Conclusion II follows

Ans) d

Exp) Option d is the correct answer.

We can draw the following diagram from the given info:

- 1) Some grapes are bananas - Does not follow - (As they have not mentioned the relationship between grapes and bananas. This is not true)
- 2) Some avocados are strawberries - Follow - (As some strawberries are bananas and all bananas are avocados. So, some avocados can be strawberries. This is true)

Direction for the following eight (8) items:

Read the following **six passages** and answer the items that follow the passages. Your answers to these items should be based on the passages only:

Passage-1

There's a new chapter in the saga of over-enthusiastic researchers trying to make the Matrix a reality. Scientists at Kyoto University are training an AI-powered robot to laugh. This is, of course, a difficult project – one that could take decades to become a true success. Yet, if a machine can mimic the myriad ways in which human beings laugh, it may finally be able to cross the Uncanny Valley – that eerie feeling of uneasiness when an AI-enabled creature can copy human behaviour, but somehow feels unnatural and alien in interactions. The questions which arise from this desire to play God's understudy. First, can the changing contextual nuances of what makes people chuckle, giggle and guffaw be programmed? And is it worth the effort?

Q.12) Which one of the following statements best reflects the most critical inference that can be made from the passage given above?

- The scientists at Kyoto University are attempting to create an AI-powered robot that can mimic human laughter, a project that may take decades to achieve.
- The ability for an AI-powered robot to accurately replicate human laughter may help it to overcome the Uncanny Valley and appear more natural in interactions.
- It is uncertain whether or not the contextual nuances of human laughter can be programmed into an AI-powered robot, and whether the effort involved in doing so is worthwhile.
- The pursuit of creating an AI-powered robot that can laugh like a human may raise ethical concerns about the desire to play God and the worthiness of such an endeavor.

Ans) d

Exp) Option d is the correct answer.

Option d is the best option as it reflects the central theme of the passage, which is the ethical questions raised by the pursuit of creating an AI-powered robot that can laugh like a human, and the desire to play God's understudy.

Option a is incorrect. It accurately describes the difficult project of creating an AI-powered robot that can mimic human laughter and the possible length of time required for this project. However, it does not address the ethical questions that arise from this pursuit.

Option b is incorrect. It correctly identifies the Uncanny Valley effect, which refers to the discomfort people feel when interacting with machines that appear too human-like but are not quite human. The option suggests that creating an AI-powered robot that can accurately replicate human laughter may help to overcome this issue. However, this option does not address the ethical concerns raised in the passage.

Option c is incorrect. It suggests that there is uncertainty about whether it is possible to program the contextual nuances of human laughter into an AI-powered robot and whether the effort is worthwhile. This option does not specifically address the ethical concerns raised in the passage, which are the main focus of the text.

Passage-2

Repetition and difference are the twin concepts that underlie all of existence, shaping and reshaping reality at every moment. Repetition creates patterns and structures, while difference introduces variation and unpredictability. Together, they create a dynamic system in which the past is constantly being transformed by the present and the future. But this system is not without its dangers. Repetition can lead to stagnation and inertia, while difference can bring chaos and disorder. The challenge, then, is to find the right balance between repetition and difference, to use them in a way that allows for growth and creativity without sacrificing stability and continuity.

Q.13) What is the *most crucial inference* that can be drawn from the passage?

- Repetition and difference are inherently contradictory concepts that cannot coexist.
- Repetition is superior to difference for maintaining a stable reality.
- The optimal balance between repetition and difference is necessary for growth and creativity,
- Existence is a static system dominated by repetition and difference.

Ans) c

Exp) Option c is the correct answer.

The passage discusses the concepts of repetition and difference, which underlie all of existence, shaping and reshaping reality. It explains that repetition creates patterns and structures, while difference introduces variation and unpredictability, together forming a dynamic system. The passage also identifies the dangers of each concept: repetition can lead to stagnation and inertia, while difference can bring chaos and disorder. The most crucial inference drawn from the passage is that finding the right balance between repetition and difference is essential for growth and creativity without sacrificing stability and continuity.

Passage-3

Each TV program was like a small world that would spin around once or twice, then stop. And there was always a person, ideally a good-looking one, who would enter and begin to speak. And it was our job as citizens to listen to that person, as they were wiser and better than we were, and had devoted their entire lives to thinking about things that we had spent only a few seconds. And so, we listened, and we learned, and we were made wiser by the people on the TV, who were so good at their jobs that sometimes they would cry, and sometimes they would even laugh, but mostly they would just talk, and talk, and talk.

Q.14) What is the *most logical corollary* of the above-given passage?

- Television programs provide valuable insights and wisdom from experts who are more knowledgeable than the average citizen.
- The emotional reactions of TV personalities are what make the content truly educational.
- Television programs are an ineffective source of learning due to the lack of diversity in topics.
- The majority of TV programs are focused on entertainment rather than education.

Ans) a

Exp) option a is the correct answer.

The passage presents a description of TV programs, where ideally good-looking people enter and begin to speak. It suggests that these individuals are wiser and better than the average citizen because they have devoted their lives to thinking about things that the average person may have only considered briefly. The passage implies that the viewers listen, learn, and become wiser by watching these TV programs. Thus, the most logical corollary, based on the passage, is that television programs provide valuable insights and wisdom from experts who are more knowledgeable than the average citizen.

Passage-4

To meet the challenging situation of widening economic and social disparity, inclusive growth is the best tool, but it is a dream without improvement in agricultural growth, employment generation, poverty reduction, and involvement of the social sector (health, education, and women empowerment). We must learn from China in this regard. Elements of the successful experience of the Chinese such as, high and labour-releasing agricultural growth, favourable income distribution through broad-based agricultural growth, availability of infrastructure, higher levels of literacy and skills, inducements for the location of enterprises in rural areas, and easy access to credit and inputs for the poor section of society, are

extremely relevant for developing countries. Women empowerment through replacing the “Life-Cycle Approach” of the girl child, which has a prime objective of marriage and motherhood, by a “Capability Approach” – as propagated by Amartya Sen, where the girl child's contributions both in economic and social terms are given due recognition. All Acts and Schemes related to the girl child, therefore, need to be thoroughly reviewed to raise the status of the girl child as an asset rather than burden, for example, conditional cash and non-cash transfer scheme, and so on.

Q.15) Based on the above passage, following assumptions have been made:

1. Life-Cycle approach has failed to ensure women empowerment in India.
2. Promoting farming techniques which require less labour is an effective way for increasing agricultural productivity.
3. Promoting stakeholder mentality through Self-Help groups is an important approach to ensure inclusive growth.

Which of the above assumptions is/are valid?

- a) 1 and 2 only
- b) 2 only
- c) 2 and 3 only
- d) 1, 2 and 3

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: The passage does not make any explicit statement about the success or failure of the Life-Cycle approach in ensuring women empowerment in India. It only suggests that the Capability Approach, which recognizes the economic and social contributions of girls beyond marriage and motherhood, should be promoted instead. Therefore, the first assumption cannot be considered valid based on the passage.

Statement 2 is correct: The passage explicitly states that high and labour-releasing agricultural growth is an element of the successful experience of China, which can be relevant for developing countries. This implies that promoting farming techniques which require less labor can be an effective way for increasing agricultural productivity. Therefore, the second assumption can be considered valid based on the passage.

Statement 3 is incorrect: The passage does not mention Self-Help groups or stakeholder mentality as an approach to ensure inclusive growth. It only mentions the importance of elements such as availability of infrastructure, higher levels of literacy and skills, inducements for the location of enterprises in rural areas, and easy access to credit and inputs for the poor section of society. Therefore, the third assumption cannot be considered valid based on the passage.

Passage-5

Many moments in our daily life are imbued with Kantian philosophy. Sitting at the bar, drinking a beer, thinking about the bartender who just carded you, are all perfect illustrations of Immanuel Kant's ‘transcendental idealism’. For example, the bartender examining the correlation between you and your driver's license photo was wondering if the appearances laid before her – concerning both you and your ID – are an informative portrayal of reality. In other words, does either the appearance of you being over twenty-one, or your ID saying that you are, genuinely reflect whether you are actually over twenty-one? In The Critique of Pure Reason (1781), Kant was challenged with a similar question: ‘Is appearance a reasonable reflection of reality?’ He asked this on the way to answering the further question, ‘Can we know what things are like beyond their appearance to us, that is, in and of themselves?’ Kant is famous for

concluding ‘No’ – that despite what we might think, there’s very little we can know about what reality is like in and of itself, either from its appearance to us, or from any other source.

Q.16) Which one of the following statements best reflects the most critical inference that can be made from the passage given above?

- a) Our sensory experiences don’t provide us with a direct and accurate representation of reality as it is.
- b) We can never truly know the nature of reality beyond its appearance to us, as it exists independently of our perception.
- c) Appearance is always a reasonable reflection of reality.
- d) Our knowledge of reality beyond its appearance to us is limited.

Ans) b

Exp) Option b is the correct answer.

Option b is correct because it accurately reflects Kant's conclusion that we cannot truly know the nature of reality beyond its appearance to us.

Option a is incorrect, as Kant believed that our sensory experiences provide us with appearances of things rather than things as they are in themselves. However, this option doesn't fully capture Kant's conclusion that we can never truly know the nature of reality beyond its appearance to us.

Option c is incorrect. Kant raises a question: ‘Is appearance a reasonable reflection of reality?’ Though he nowhere concluded in the passage that Appearance is always a reflection of reality.

Option d is incorrect, as Kant believed that our knowledge of things beyond their appearances is limited due to the limitations of our cognitive faculties. However, this option doesn't fully capture Kant's conclusion that we can never truly know the nature of reality beyond its appearance to us.

Passage-6

The jolting cry of a cockerel, the comforting smell of manure and the rumbling of tractors – the idyllic sensory landscape of rural France has been the source of much civil strife in recent years. An increasing number of city slickers have vacation homes in rural areas, to enjoy peace and serenity. As it turns out, rural life is full of activity, and at least in France, not amenable to change for the comfort of strangers. There have been several complaints about the noise and smells from animals and churches in the last few years. Maurice, the rooster, became a symbol for this conflict when his neighbours went to court against his owners in 2019, chagrined at being woken up by the cockerel’s cry at dawn. French legislators have finally put the matter to rest by passing a law to protect the countryside’s “sensory heritage”.

To be fair, there is something gnawing about being woken up when it’s still dark outside by the shrill crowing of a rooster. But the entitlement to comforts the wealthy thought money can buy at their weekend chalets, are at odds with the choices of empowered rural residents. Unlike the luxury stores at the Champs-Élysées, rural France has refused to serve the interests of tourists. France – both culturally and economically – is still strongly agricultural. The campaign for the law was based on the principle that the countryside is more than a scenic landscape, and living there means accepting that fact. Their “sensory heritage” safeguarded, French country folk must not get complacent. Soundscapes are fragile things, as Indians are well aware. A loudspeaker and an upcoming election can drown out the sounds of a homestead a lot faster than the complaints of bratty neighbours. But in the meanwhile, at least, the Maurices of France are free to make a morning racket.

Q.17) Which of the following statements best reflects the central idea of the passage on protecting rural France's heritage?

- The increasing number of vacation homes in rural France has resulted in conflicts over noise and smells, particularly regarding animals and churches. Legislation has been passed to protect the "sensory heritage" of the countryside.
- Rural life in France is full of activity and not amenable to change for the comfort of city dwellers with vacation homes. Legislation has been passed to protect the "sensory heritage" of the countryside.
- The passing of the law to protect the sensory heritage of rural France is a positive development that reflects the need for balance between the needs of different groups of people.
- The campaign for legislation to protect rural France's "sensory heritage" was based on the recognition that the countryside is more than just a scenic landscape and that living there requires accepting its sensory characteristics.

Ans) d

Exp) Option d is the correct answer.

Option d is the most appropriate answer because it accurately reflects the main idea of the passage on protecting rural France's heritage. The passage highlights the conflict between city dwellers with vacation homes in rural areas and the empowered rural residents who are not willing to compromise the sensory characteristics of their environment for the comfort of outsiders. The campaign for the law was based on the recognition that the countryside is more than just a scenic landscape, and living there requires accepting its sensory characteristics. The passing of the law is seen as a means to protect rural France's sensory heritage, which is fragile and can easily be lost due to external influences.

Option a is incorrect because although it mentions the passing of legislation to protect the "sensory heritage" of the countryside, it focuses more on conflicts over noise and smells, and does not accurately capture the main idea of the passage.

Option b is incorrect because although it mentions that rural life in France is not amenable to change for the comfort of city dwellers with vacation homes, it does not accurately capture the main idea of the passage, which is about the need to protect the sensory heritage of rural France.

Option c is incorrect because it does not accurately capture the main idea of the passage. While it acknowledges the need for balance between the needs of different groups of people, it does not accurately capture the focus of the passage, which is on the need to protect rural France's sensory heritage.

Q.18) Which of the following assumptions best justifies the reason for rural France's continued protection of its sensory heritage?

- To ensure that tourism does not compromise the natural environment.
- To preserve the longstanding agricultural way of life in these areas.
- Protecting sensory heritage is a crucial responsibility of both the French people and government.
- The sounds and smells of rural life are integral to French culture and history.

Ans) d

Exp) Option d is the correct answer.

Option (d) best justifies the reason for rural France's continued protection of its sensory heritage. This statement is supported by the article, which emphasizes that the campaign for the law was based on the principle that the countryside is more than a scenic landscape, and living there means accepting that fact. The law was passed to protect the sensory heritage of the countryside, which includes the sounds and smells of rural life, and acknowledges that these elements are an important part of French culture and history.

Option (a) is not the best justification for the law as it implies that the protection of the sensory heritage is solely for the benefit of the natural environment. While this may be a factor, the article indicates that the law was passed to protect the sensory heritage of the countryside, which includes more than just the natural environment.

Option (b) is not the best justification for the law as it focuses on preserving the agricultural way of life rather than the sensory heritage of the countryside. While agriculture is an important part of rural France, the law was passed to protect the sensory heritage, which includes more than just agriculture.

Option (c) is not the best justification for the law as it implies that protecting the sensory heritage is a general responsibility, rather than a specific reason for passing the law in question. While protecting the sensory heritage may be a crucial responsibility, it does not specifically justify the need for this particular law.

Q.19) Based on the passage following assumptions have been made about the possible features of the legislation protecting sensory heritage:

1. Limiting the number of tourists in rural areas.
2. Prevent legal action against farmers for the noises and smells of their animals.
3. Promoting the cultural and economic value of rural landscapes.
4. Giving priority to the needs of rural residents over city dwellers.
5. Prohibiting the use of loudspeakers during elections.

Which of the assumptions given above are valid?

- a) 1, 2 and 3 only
- b) 2, 3 and 5 only
- c) 2, 3 and 4 only
- d) 1, 2, 3 and 5 only

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect. While the passage notes that rural France has refused to serve the interests of tourists, but there is not enough evidence to suggest limiting number of tourists. In addition limiting the number of tourist is an extreme step in general.

Statement 2 is correct. The legislation is based on the principle that rural life is more than just a picturesque landscape, and that those who choose to live there must accept the sensory heritage that comes with it.

Statement 3 is correct. The term sensory heritage itself implies promoting the cultural and economic value of rural landscape.

Statement 4 is incorrect. Though the passage provides priority to rural way of life by protection to traditional sounds and smell but use of the term “needs” is too broad and can include many things and hence is incorrect.

Statement 5 is correct. It is indicated in the passage that the use of loudspeakers threatens soundscapes and hence it is possible that use of loudspeakers could be prohibited under the law.

Hence Option (b) 2, 3 and 5 only is the correct option.

Q.20) In a parking area, the total number of wheels of all the trucks (six-wheelers) and cars (four-wheelers) is 50 more than four times the number of parked vehicles. The number of trucks parked is:

- a) 15
- b) 20
- c) 25
- d) 30

Ans) c**Exp) Option c is the correct answer.**

Let the number of trucks parked are T and the numbers of cars parked is C. Then, total number of wheelers,

$$6T + 4C \text{ ----- (i)}$$

$$\text{Total number of vehicles parked} = T + C \text{ -----(ii)}$$

According to the question, $6T + 4C = 4(T+C) + 50$

$$\Rightarrow 6T + 4C = 4T + 4C + 50$$

$$\Rightarrow 6T - 4T = 50$$

$$\Rightarrow 2T = 50$$

$$\Rightarrow T = 25$$

Hence, the total number of trucks parked = 25. The correct answer is option c)

Q.21) A contractor is hired to complete a construction project in 50 days engaging 50 men at work. After working for 25 days, he realizes that he has completed only 1/3rd of the work. How many total number of workers he needs to complete the given work on time?

- a) 100 workers
- b) 75 workers
- c) 50 workers
- d) 150 workers

Ans) a**Exp) Option a is the correct answer.**

We know, Work = N * E * D (where N = number of men involved, E= Efficiency, and D = number of days required for work)

Given, that 50 men were working for 50 days,

$$\Rightarrow \text{Work done by them} = 50 * E * 50$$

According to question, 25 days, 50 men, and 1/3rd work completed.

$$\Rightarrow 1/3\text{rd of the work} = 25 * E * 50$$

$$\Rightarrow \text{Efficiency} = 3/1$$

Remaining work = $1 - 1/3 = 2/3$ rd work still needs to be done in 25 days.

$$\Rightarrow \text{Efficiency} = 3/2$$

$$\Rightarrow \text{Using formula, Work} = N * E * D$$

$$50 * 3/1 * 25 = M * 3/2 * 25$$

$$\Rightarrow M = 100$$

50 extra workers are needed to complete the work in time. Therefore, the total number of workers he needs = 50 + 50 = 100. Hence, Option a is correct.

Q.22) A retailer sells a product for Rs. 320, making a profit of 25% on the cost price. If the cost price of the product is increased by 20%, what should be the new selling price to maintain the same profit margin?

- a) Rs. 400
- b) Rs. 384
- c) Rs. 432
- d) Rs. 307.2

Ans) b**Exp) Option b is the correct answer.**

Let the cost price of the product be x . The selling price of the product is Rs. 320, which gives a profit of 25% on the cost price.

Profit = Selling price - Cost price

25% of cost price = Rs. 320 - x

$0.25x = \text{Rs. } 320 - x$

$1.25x = \text{Rs. } 320$

$x = \text{Rs. } 256$

So, the cost price of the product is Rs. 256.

If the cost price is increased by 20%, the new cost price will be:

New cost price = Rs. 256 + $0.2(\text{Rs. } 256) = \text{Rs. } 307.20$

To maintain the same profit margin of 25%, the new selling price should be:

New selling price = Cost price + Profit

= Rs. 307.20 + $0.25(\text{Rs. } 307.20)$

= Rs. 307.20 + Rs. 76.80

= Rs. 384

So, the new selling price to maintain the same profit percentage on the new cost price is: Rs. 384. So option b is the correct answer.

Q.23) The speed of a motorboat is 30 km/h. It starts from Mumbai at 6:00 am and reaches Goa at 8:00 am. Same day, it starts from Goa at 12:00 pm and reaches Mumbai at 4:00 pm. Find the speed of stream.

a) 8.5 Km/h

b) 12 Km/h

c) 10 Km/h

d) 11.5 Km/h

Ans) c

Exp) Option c is the correct answer.

Clearly, motorboat takes 2 h to go from Mumbai to Goa and 4h to go from Goa to Mumbai.

i.e Time taken to row upstream = 2 x Time taken to row downstream

Therefore, $n=2$

Let the speed of stream be x km/h.

Then, according to the formula,

Speed of the boat = $x * (n + 1) / (n-1)$

$\Rightarrow 30 = x * (2+1) / (2-1)$

$\Rightarrow x = 30 / 3 = 10$

Hence, the speed of stream is 10 km/h. Option c is the correct answer.

Q.24) What is the value of X in the sequence?

9, 17, 48, 187, 928, X,

a) 1298

b) 5559

c) 6814

d) 7661

Ans) b

Exp) Option b is the correct answer.

Upon close observation, each series is going by the order addition of +1 and subtraction of previous odd number i.e $(n+1) - \text{previous odd number}$.

$$17 = 9 * 2 - 1$$

$$48 = 17 * 3 - 3$$

$$187 = 48 * 4 - 5$$

$$928 = 187 * 5 - 7$$

$$5559 = 928 * 6 - 9.$$

Hence, option b is the correct answer.

Q.25) What is the smallest positive integer greater than 500 that when divided by any one of the numbers 7, 14, 21, 28, or 35 leaves a remainder of 4?

- a) 644
- b) 984
- c) 844
- d) 1034

Ans) c

Exp) Option c is the correct answer.

To solve this problem, we need to find the smallest multiple of the given numbers and add 4 to it to get the desired result. The smallest multiple of 7, 14, 21, 28, and 35 is their LCM, which is 420. Adding 4 to 420 gives us 424. Since, 424 is smaller than 500, we have to check another number.

The equation is $420k + 4$ ----- (1)

1) Putting $k = 1$ in equation (1), it is 484.

2) Lets put $k = 2$ in equation (2), it is 844.

Therefore, the answer is 844.

Alternatively, you can choose each of the options and check the answer.

Q.26) 12 men and 16 boys can do a piece of work in 5 days while 13 men and 24 boys finish it in 4 days. 5 men and 10 boys will finish it in?

- a) 10 days
- b) 12 days
- c) 15 days
- d) 9 days

Ans) a

Exp) Option a is the correct answer.

(12 men + 16 boys) can do a work in 5 days.

(60 men + 80 boys) can do a work in 1 day. -----(1)

(13 men + 24 boys) can do a work in 4 days. -----(2)

(52 men + 96 boys) can do a work in 1 day.

Equating Eqs. (1) and (2)

=> 60 men + 80 boys = 52 men + 96 boys

=> 8 men = 16 boys and 1 man = 2 boys

Now, 12 men + 16 boys = (12 x 2 + 16) boys = 40 boys can do the work in 5 days

Therefore, 5 men + 10 boys = [5 (2) + 10] boys = 20 boys

Therefore, required time = $40 \times 5 / 20 = 10$ days.

Hence, the correct answer is option a i.e 10 days.

Q.27) A clock is set right at 10:00 am. The clock gains 10 min in a day. What will be the true time when the watch indicates 3:00 pm the next day?

- a) 12 min past 2 pm
- b) 45 min past 2 pm
- c) 48 min past 2 pm
- d) 30 min past 2 pm

Ans) c

Exp) Option c is the correct answer.

Since, Time from 10 : 00 am to 3 : 00 pm of the next day = 29 h

Now, 24 h 10 min of the clock in the question = 24 h of the correct clock.

i.e. $(145/6)$ h of the clock in question = 24 h of the correct clock 29 h of the clock in the question.

= $(24 * 6/145 * 29)$ h of the correct clock.

= 28 h 48 min of correct clock

So, the correct time is 28 h 48 min after 10 : 00 am i.e. 48 min past 2 : 00 pm.

Q.28) The average speed of a train in the onward journey is 25% more than that of the return journey. The train halts for one hour on reaching the destination. The total time taken for the complete to and fro journey is 17h covering a distance of 800 km. The speed of the train in the onward journey, is:

- a) 45 km/h
- b) 47.06 km/h
- c) 50.00 km/h
- d) 56.25 km/h

Ans) d

Exp) Option d is the correct answer.

Let the speed of the train during returning journey be x Km/h.

Then speed during onward journey = $x + 25*x/100 = 5x/4$ Km/h

=> Distance covered in onward journey = $800/2 = 400$ Km

Since, total time taken = Covered Distance / Speed.

Therefore, time taken by train in onward journey = $400 / (5x/4)$

and time taken during returning journey = $400/x$

According to the question,

$$400/(5x/4) + 400/x = 16$$

$$\Rightarrow 320/x + 400/x = 16$$

$$\Rightarrow 16x = 720$$

Therefore, $x = 45$ Km/h

So, the speed of train in onward journey = $5 * 45 / 4 = 56.25$ Km/h

Hence, option d is the correct answer.

Q.29) Eight friends, namely P, Q, R, S, T, U, V and W are sitting around a circular table facing towards the centre. Q is sitting between V and S. W is third to the left of Q and second to the right of P. R is sitting between P and V. Q and T are not sitting opposite to each other.

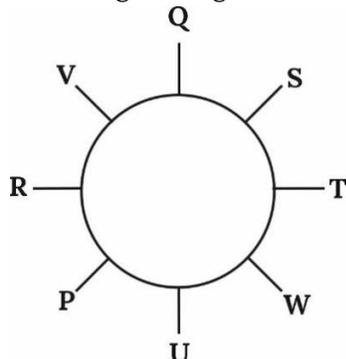

Which of the statements based on the above paragraph is correct?

- a) U is sitting third to the left of S
- b) T sits adjacent to R
- c) Q is sitting left of W.
- d) T and U sitting opposite to each other.

Ans) a

Exp) Option a is the correct answer.

According to the given information, the correct representation is given below:

From the above diagram, clearly U is sitting third to the left of S. Hence, option a is the correct answer.

Direction for the following seven (7) items:

Read the following **six passages** and answer the items that follow the passages. Your answers to these items should be based on the passages only:

Passage-1

The British administration in India was characterized by a complex interplay of power relations, institutional structures, and cultural assumptions that shaped the patterns and outcomes of colonial rule. The colonial project was premised on a dual logic of difference and superiority, which sought to justify and legitimize the imposition of British authority over Indian society. This logic was expressed in a range of discursive practices, including the construction of racial hierarchies, the cultivation of Orientalist knowledge, and the promotion of missionary activity. At the same time, colonial rule was also marked by a degree of ambivalence and contestation, as different groups and individuals sought to navigate and negotiate the constraints and opportunities of the colonial context. The legacy of British rule in India continues to be contested and debated, with some arguing that it represented a form of economic and social modernization, while others point to the devastating impact of colonialism on Indian society, culture, and politics. It is imperative to consider a range of historical and theoretical perspectives, and to recognize the diverse voices and experiences of those who lived under British rule.

Q.30) Consider the following assumptions:

1. The impact of British rule in India is conclusive and clear to the scholars of history.
2. The British rule in India was based on the logic of segregation and elitism.

Which of the above-given assumptions is/are valid?

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect: The passage states that the legacy of British rule in India continues to be contested and debated, with some arguing that it represented a form of economic and social modernization, while others point to the devastating impact of colonialism on Indian society, culture, and

politics. This implies that the impact of British rule in India is not conclusive and clear but remains a subject of ongoing discussions and differing opinions.

Statement 2 is correct: The passage discusses the dual logic of difference and superiority, which was used to justify and legitimize the imposition of British authority over Indian society. Thus, it was based in elitism, being superior and maintain segregation from Indian society. This assumption is supported by the mention of racial hierarchies, Orientalist knowledge, and missionary activity.

Q.31) What is the *most logical, rational, and crucial inference* of the above given passage?

- British rule in India was uniformly oppressive and universally resisted.
- The imposition of British authority in India was exclusively based on economic interests.
- The legacy of British rule in India is complex and multifaceted.
- British colonial rule had no lasting impact on Indian society, culture, and politics.

Ans) c

Exp) Option c is the correct answer.

The passage highlights the complexity of British rule in India, discussing the dual logic of difference and superiority, as well as the ambivalence and contestation that characterized the colonial context. It also emphasizes the ongoing debate about the legacy of British rule, with differing opinions on its impact on Indian society, culture, and politics. Therefore, the most logical, rational, and crucial inference of the passage is that the legacy of British rule in India is complex and multifaceted, with ongoing debates about its impacts.

Passage-2

The increasing demand for energy has resulted in the overuse of non-renewable sources of energy, which has led to a host of environmental issues. One of the most critical environmental issues is global warming, which is primarily caused by the release of greenhouse gasses like carbon dioxide into the atmosphere. The burning of fossil fuels like coal, oil, and gas is one of the main contributors to this problem. The rise in global temperatures has led to a variety of consequences such as melting of glaciers and ice caps, sea-level rise, and more frequent and severe weather events like hurricanes and droughts.

Another significant environmental issue is air pollution, which is caused by the release of harmful pollutants into the air. The combustion of fossil fuels for energy generation is one of the major sources of air pollution. Exposure to high levels of air pollution can cause respiratory and cardiovascular problems and can even lead to premature death.

Moreover, plastic pollution is another growing environmental issue. The increased use of single-use plastics like straws, bags, and water bottles has led to plastic pollution in our oceans and on land. Plastic waste is harmful to marine life and can even enter the food chain, posing a threat to human health.

Q.32) Which one of the following statements best reflects the central idea of the passage given above?

- The overuse of non-renewable sources of energy has led to environmental issues such as global warming
- The environmental issues related to Global Warming includes melting of glaciers, increase in insects diversity, and sea level rise.
- Deforestation is one of the reason for Global Warming
- Plastic pollution is the most critical environmental issue caused by the increased use of single-use plastics like straws, bags, and water bottles.

Ans) a

Exp) Option a is the correct answer.

Option a is correct- The passage discusses three significant environmental issues: global warming, air pollution, and plastic pollution, all of which are caused by the overuse of non-renewable sources of energy. Option a summarizes the central idea of the passage by stating that the overuse of non-renewable sources of energy has resulted in environmental issues such as global warming, air pollution, and plastic pollution. Therefore, option a is the correct answer.

Option b is incorrect- There is no mention of the word increase in insects diversity in the given passage. The passage mentions “The rise in global temperatures has led to a variety of consequences such as melting of glaciers and ice caps, sea-level rise, and more frequent and severe weather events like hurricanes and droughts.”

Option c is incorrect- Even though deforestation can be the reason for Global Warming but since there is no mention of the word ‘Deforestation’ in the given passage, we would assume option c as incorrect one.

Option d is incorrect- The passage does not describe Plastic pollution as the current most critical environmental issue. It mentions the word ‘growing’ and not critical so, Option d would also be incorrect one.

Passage-3

The martyrs, who laid down their lives for the freedom of the country, had a lofty vision of the future. They owe the nation to be free from all the slavery and bondage. They wanted the India in which all the communities would live in perfect harmony and in which there would be no high class and no low class of people, the curse of untouchability having been wiped out completely. Women would enjoy equal rights with men and contribute their fullest to the making of a great nation. Such a vision was in keeping with the ancient glory of the country owed for its splendid achievements in literature art and culture. We must now revitalise this ancient culture of ours with tolerance as its masthead. If we forget to take pride in our noble heritage, we shall have to face severe indictment in the court of history which is a ruthless judge and seldom spares the erring people.

Q.33) Which of the following inferences can be made from the passage?

1. Martyr wanted that there should be reservation in the jobs for the backward section.
2. Martyr wanted that there should be perfect communal love and peace in the country.

Select the correct answer using the code given below:

- a) 1 only
- b) 2 only
- c) Both 1 and 2
- d) Neither 1 nor 2

Ans) b

Exp) Option b is the correct answer.

Statement 1 is incorrect- There is no mention of the word reservation in the jobs in the given passage. Hence, statement 1 is incorrect.

Statement 2 is correct- Martyr wanted our country to be a place where people of all community would live peacefully and in harmony. Apart from that, they also favored untouchability and were against the concept of high class and low class. Hence, Statement 2 is correct.

Passage-4

Gender discrimination: The bias against females in India is grounded in cultural, economic and religious roots. Sons are expected to work in the fields, provide greater Income and look after parents in old age. In this way, sons are looked upon as a type of insurance. In addition, in a patriarchal society, sons are responsible for preservation of the family name. Also, as per Hindu belief, lighting the funeral pyre by a

son is considered necessary for salvation of the spirit. This strong preference for sons which results in a life-endangering deprivation of daughters, is not considered abhorrent culturally and socially. In North India, girls currently constitute about 60% of the unwanted births and the elimination of unwanted fertility in this manner has the potential to raise the sex ratio at birth to 130 boys per 100 girls.

Q.34) Which among the following is the most logical corollary to the above passage?

- In India, only sons can work in the fields and provide greater income and look after parents in old age.
- Deep rooted bias towards sons has resulted in abortion and female foeticide in India.
- Daughters should be educated and allowed to do jobs in order to end discrimination.
- The strong preference for sons resulting in criminal discrimination against daughters should be condemned and people should be made aware of the importance of girls or females in the society. Laws should be stricter to punish the guilty of aborting the female child.

Ans) d

Exp) Option d is the correct answer.

Option a is incorrect- According to the given passage, the Sons are expected to work in the fields, provide greater Income and look after parents in old age. But nowhere it is mentioned that only sons can do that. So, option a is incorrect.

Option b is incorrect- There is no mention of the term abortion and female foeticide in the given passage. Hence, option b is also incorrect.

Option c is incorrect. The given passage does not talk about education and employment of women and daughters for their empowerment. Hence, option c is also incorrect.

Option d is correct- The conservative and orthodox beliefs of the people have to be condemned and punished by law, if society has to change and discrimination against female child has to come to an end. Hence, option d is correct.

Passage-5

India has experienced a decline in its apparel and textile exports in recent years, which has raised concerns about the competitiveness of the sector. According to industry experts, factors such as a lack of modernization in production processes, high input costs, and a lack of access to modern technology have contributed to this decline. Additionally, the COVID-19 pandemic has further exacerbated the situation, with disruptions in global supply chains and a decline in demand for non-essential goods. To reverse this trend, there is a need for the Indian government to implement policy measures that encourage investment in modernizing production processes, promoting innovation, and improving access to technology. Furthermore, there is a need to strengthen trade ties with key markets and diversify export destinations to reduce dependence on a single market. The textile and apparel sector has the potential to contribute significantly to India's economic growth and job creation, and it is essential to address the challenges it currently faces to unlock this potential.

Q.35) Based on the passage above following assumptions have been made :

- There is a dearth of contemporary technology in the textile sector.
- Textile export has declined due to non competitiveness of this sector.
- Conventional production process is the reason for decline in overall export.
- Textiles or apparel are non essential goods.

Which of the above are valid assumptions?

- 1 and 2 only
- 1 and 4 only
- 2 and 3 only
- 2, 3 and 4 only

Ans) b

Exp) Option b is the correct answer.

The passage mentions that there is a lack of access to modern technology, which assumes that there is a dearth of contemporary technology in the textile sector. Hence statement 1 is a valid assumption.

The passage states that due to decline in export, concerns have been raised about competitiveness of this sector. But then it mentions the factors which have led to decline. And raising concern does it mean that it is the reason, hence statement 2 is invalid assumption.

The passage states that lack of modernisation in the production process is the reason for decline in export, but in statement 3, it just writes export, which implies General export. Hence statement 3 is an invalid assumption.

The passage mentions that the COVID-19 pandemic has further exacerbated the situation, with disruptions in global supply chains and a decline in demand for non-essential goods. So, this assumes that textile is a non-essential good. Hence statement 4 is a valid assumption.

Passage-6

Counterinsurgency in North East India is a complex and challenging phenomenon that has defied easy solutions for decades. These groups have engaged in a range of violent activities, including bombings, assassinations, extortion, and kidnappings, that have destabilized the region and created a climate of fear and uncertainty. The counterinsurgency operations in North East India have been characterized by a range of challenges, including terrain, ethnic and linguistic diversity, porous borders, and limited resources. The rugged and forested terrain of the region has made it difficult for security forces to track down and apprehend insurgent groups as they are inept to deal with it. Moreover, the ethnic and linguistic diversity of the region has made it challenging for security forces to build trust with local communities and gather intelligence. The counterinsurgency operations have also been complicated by the porous borders of the region, which allow insurgent groups to seek sanctuary in neighboring countries such as Myanmar, Bangladesh, and Bhutan. This has made it difficult for security forces to completely eliminate the insurgent threat in the region.

Q.36) Based on the passage following assumptions have been made:

1. Training in Jungle war tactics is needed to defeat the insurgents.
2. Homogeneity in language and ethnicity is pre-requisite to gain trust.
3. Myanmar, Bangladesh and Bhutan provide safe sanctuary to insurgents.
4. Insurgents use violence to threaten the government.

Which of the above are valid assumptions?

- a) 1 and 2 only
- b) 3 and 4 only
- c) 1, 2 and 4 only
- d) 1, 2, 3 and 4

Ans) a

Exp) Option a is the correct answer.

The passage states that ‘The rugged and forested terrain of the region has made it difficult for security forces to track down and apprehend insurgent groups as they are inept to deal with it’, so this assumes that training in jungle war tactics is needed to defeat the insurgents. Hence statement 1 is a valid assumption.

The passage mentions that ‘the ethnic and linguistic diversity of the region has made it challenging for security forces to build trust with local communities and gather intelligence’, so this assumes that if there is homogenous language and ethnicity, trust can be gained. Hence statement 2 is a valid assumption.

The passage states that 'porous borders of the region allow insurgent groups to seek sanctuary in neighboring countries such as Myanmar, Bangladesh, and Bhutan', but this does not imply that these countries provide them safe sanctuaries, it's due to Porous borders that they end up being used like that. Hence statement 3 is an invalid assumption.

The passage does mention about the violence being used by the insurgents and they are creating a sense of fear, but they don't state that whether it's to threaten the government. Hence statement 4 is an invalid assumption.

Q.37) A child goes to Disneyland for a toy train ride. The cost of the ride was Rs 75 for the first three minutes and Rs 20 for each additional minute after the first three minutes.

Consider the two statements are given followed by a Question:

Statement-1 : The child paid less than Rs 416.

Statement-2: The child paid more than Rs335.

Question: Did the child enjoy the toy train ride for more than 15 minutes?

Which one of the following is correct in respect of Statement and Question?

- Statement-1 alone is sufficient to answer the Question.
- Statement-2 alone is sufficient to answer the Question.
- Either Statement-1 alone or Statement-2 alone is sufficient to answer the Question.
- Neither Statement-1 alone nor Statement-2 alone is sufficient to answer the Question.

Ans) b

Exp) Option b is the correct answer.

We need to find the amount to be paid for 15 minutes, then we can conclude whether the child enjoyed the ride for more than 15 minutes or not.

Given: The cost of the ride was Rs 75 for the first three minutes and Rs 20 for each additional minute after the first three minutes.

Amount to be paid for 15 minutes = Rs 75 (for first three minutes) + Rs (20x12) [for next 12 minutes] = Rs 315

Statement-1 : The child paid less than Rs 416.

But from this we don't know how much exactly he paid, so there are chances that he paid less than Rs315. So, statement 1 alone is not sufficient to answer the question.

Statement-2: The child paid more than Rs335.

From this we know that the child certainly enjoyed the ride for more than 15 minutes.

Hence Statement-2 alone is sufficient to answer the Question.

Q.38) A company's net worth is Rs 525,000. The three shareholders Ram, Shyam and Mohan have their share in this in the ratio of (1/15):(1/21):(1/35). How much was the share of the person who received the highest amount ?

- 175,000
- 245,000
- 105,000
- 132,500

Ans) b

Exp) Option b is the correct answer.

The ratio are (1/15):(1/21):(1/35)

Multiplying this by LCM of 15,21,35 (735) to simplify the ratio.

$(1/15) \times 735 : (1/21) \times 735 : (1/35) \times 735 = 49:35:21$

So, Ram received the highest share, his share is $\{49 / (49+35+21)\} \times 525,000 = 245,000$

Q.39) Consider the following statements and conclusions, and choose the correct option:

Statements:

1. If a person owns a car, they must have a driver's license.
2. If a person has a driver's license, they must be at least 18 years old.
3. Rajesh owns a car.

Conclusions:

- I. Rajesh is at least 18 years old.
- II. Rajesh does not have a driver's license.
- III. Rajesh has a driver's license.

Select the correct answer using the code given below:

- a) Only conclusion I follows.
- b) Only conclusion II follows.
- c) Conclusions I and III follow.
- d) None of the conclusions follow.

Ans) c

Exp) Option c is the correct answer.

Statements:

- 1) If a person owns a car, they must have a driver's license.
- 2) If a person has a driver's license, they must be at least 18 years old.
- 3) Rajesh owns a car.

From statement 3, we know that Rajesh owns a car. According to statement 1, if a person owns a car, they must have a driver's license.

Therefore, we can conclude that Rajesh has a driver's license.

Now that we know Rajesh has a driver's license,

we can refer to statement 2, which says that if a person has a driver's license, they must be at least 18 years old.

Since Rajesh has a driver's license, we can conclude that Rajesh is at least 18 years old.

Conclusions:

- 1) Rajesh is at least 18 years old. (True)
- 2) Rajesh does not have a driver's license. (False)
- 3) Rajesh has a driver's license. (True)

Q.40) Nine cricket fans are watching a match in a stadium. Seated in one row, they are J, K, L, M, N, O, P, Q and R. L is at the right of M and at third place at the right of N. K is at one end of the row. Q is seated adjacent to both O and P. O is at the third place at the left of K. J is right next to left of O.

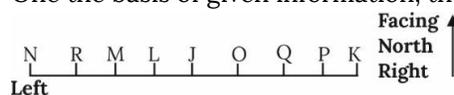

Which of the following statement is correct?

- a) N is two seats away from J.
- b) M is at one extreme end.
- c) R and P are neighbors.
- d) There is one person between L and O.

Ans) d

Exp) Option d is the correct answer.

On the basis of given information, the sitting arrangement of nine cricket fans are as below.

From the given figure, clearly J sits between L and O. Hence option d is the correct answer.
